

If you hear these hoofbeats...

- Widened mediastinum on thoracic radiograph
- Influenza-like illness in summer months
- Pneumonia death in otherwise healthy young adult
- Vesicular rash that starts on extremities
- Hemorrhagic fever syndrome
- Cluster of unusual, severe or unexplained illnesses
- Unexplained critical illness in otherwise healthy young adult

... consider these zebras

- Anthrax
- Tularemia
- Plague
- Smallpox
- Brucellosis
- Viral hemorrhagic fever
- Other potential bioterrorism agents

Please report any of these diseases or syndromes **immediately** by telephone to:
Minnesota Department of Health
Infectious Disease
Epidemiology, Prevention
and Control Division

651-201-5414

or
