

SERVICE AREAS

for Minnesota HMOs*

*The service area is the geographic area in which an HMO is permitted to market and sell its various health plans. The Minnesota Department of Health approves a service area if the HMO has sufficient providers in that area to provide services consistent with access laws. An HMO may, but is not required to, have contracts or other arrangements with providers outside its approved service area. This is most common along Minnesota borders with other states. An HMO may, but is not required to, enroll someone who lives and works outside its approved service area. Before so doing, the HMO must inform the individual that comprehensive health services may not be available and the individual may need to return to the service area to obtain all but emergency services. Please note that for certain Medicare plans provided under contract with the Centers for Medicare and Medicaid Services, an HMO may have a different service area than that listed below.

May 4, 2011

For Your Information:

County-Based Purchasing Agreement

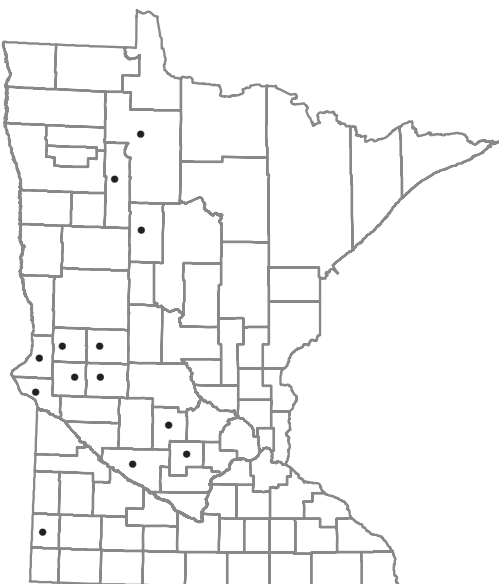

In this arrangement a county or group of counties operate a purchasing system to provide health care services to county residents who are enrolled in certain public programs. Please see the Minnesota Department of Human Services web site for maps with more detailed information on type of coverage in each specific county and for any later updates. Their web site is www.dhs.state.mn.us/maps.
