

***Please join us for the
American Diabetes Association EXPO
Healthcare Professional Breakfast***

October 9, 2010

Minneapolis Convention Center, Meeting Room 101 CDE

7:00 am Breakfast and Networking

7:15 am - 8:45 am Presentation by Panel Members and Discussion

Achieving D5 Success

The D5 was created to make it easier for people with diabetes and their health care providers to work together to set and achieve goals to better manage diabetes. The D5 goals are based on clinical guidelines developed by the Institute for Clinical Systems Improvement. The same goals are promoted by the American Diabetes Association. The D5 focuses on the five goals that have the greatest health impact. The D5 goals are the most critical for preventing the dangerous cardiovascular complications associated with diabetes. Join us for an informative discussion on implementing tools and resources for patients to achieve the D5 goals.

Objectives:

Identifying the tools and resources for improving success in reaching D5 Goals.
Implementing tools and resources with patients to better manager their care.
