

2008 TITLE V STATISTICS
SECTION I. IMPROVED PREGNANCY OUTCOME PROGRAM

A. NUMBER OF PRENATAL CLIENTS SERVED

- A.1 Total number of prenatal clients you provided any component of service, this reporting period, where a client chart existed. Include both clients who delivered and those who did not deliver during this reporting period. Count any client who was pregnant twice during the reporting period as two clients. 8,662
- A.2 Total number of prenatal clients who have moved out of your area during this reporting period (# of persons moved). 420
- A.3 Subtotal (Subtract A.2. from A.1.) 8,196
- A.4 Unduplicated number of prenatal clients reported under Section I.A.1 that also received family planning methods this reporting period and are reported in Section II A.1. Medical Family Planning Method services. 186

A.5 Unduplicated number of prenatal clients served and delivered this reporting period by age, race, and ethnicity. Do not include clients who have moved out of your area. The total number of individuals listed in the Race grid should equal the total number of individuals listed in the Ethnicity grid.

2008 TITLE V STATISTICS
SECTION I. IMPROVED PREGNANCY OUTCOME PROGRAM

C. PRENATAL/DELIVERY/POSTPARTUM SERVICES BY COMPONENT

C.1 Unduplicated number of prenatal women served through face to face health education/counseling visits where a client chart exists. 26,368

Ages	Female
Ages 14 & under	75
Ages 15-17	874
Ages 18-19	1,211
Ages 20-21	1,124
Ages 22-24	1,291
Ages 25-34	2,249
Ages 35 & over	363
Age Unknown	1,052
TOTAL ALL AGES	8,239

C.2 Unduplicated number of postpartum women served through face to face health education/counseling visits where a client chart exists. List only one post partum visit per pregnancy 5,239

C.3 Health education/counseling in group settings. This can include group prenatal and postnatal classes or group presentations. May include persons where a client chart exists or those for whom no client chart was opened.

# of individuals served	12,999
# of group sessions convened	1,295

2008 TITLE V STATISTICS

SECTION II. FAMILY PLANNING PROGRAM

A. FAMILY PLANNING METHOD SERVICES

A.1 Unduplicated number of females receiving medical family planning method services where a client chart exists by age, race, and ethnicity. This number should be equal to or greater than the number listed under Section I. Improved Pregnancy Outcomes A.4. Medical family planning method services means physical examination by a physician/nurse practitioner/certified nurse midwife and lab services provided prior to the provision of a family planning method (regardless of the method chosen). Services may be provided in public clinics or in private offices. Do not include in these statistics services provided using funds received as a Family Planning Special Project grantee.

Age Unknown	0	1	0	1
TOTAL ALL AGES	602	2,637	343	3,582

A.2 Unduplicated number of males receiving family planning services where a client chart exists.

401

B. PRIMARY MEDICAL COVERAGE FOR MEDICAL FAMILY PLANNING METHODS SERVICES

Include females who appear to be eligible and likely to apply for public programs. Record coverage at the women's first visit of the year. Total must equal the total in Section II. A.1 Unduplicated number of females receiving medical family planning method services where a client chart exists.

	Insurance	Medical Assistance	Minnesota Care	Other Sources	Self-pay	Unknown	Total
Persons Eligible	343	1,297	24	815	1,068	35	3,582

2008 TITLE V STATISTICS

SECTION II. FAMILY PLANNING PROGRAM

C. EDUCATION AND COUNSELING SERVICES

C.1 Unduplicated number of individuals receiving face to face family planning reproductive health counseling services by age and sex where a client chart exists. Include both clinic and non-clinic settings. Family planning counseling means the provision, on an individual basis, of factual information on pregnancy planning and all contraceptive methods, and the use of non-directive interview techniques.

Ages	Female	Male	Unknown	Total
Ages 14 & under	62	4	0	66
Ages 15-17	974	54	0	1,028
Ages 18-19	1,225	116	0	1,341

B. MAJOR MEDICAL CARE RESOURCE AVAILABLE FOR MEDICAL SERVICES AT INITIAL INTAKE

Include children who appear to be eligible and likely to apply for public programs. Record coverage at the first visit of the year. Total must equal the total in Section III. A. Unduplicated number of children with a special health care need served by age, race and ethnicity where a client chart exists.

	Medical Insurance	Minnesota Assistance	Other Care	Other Sources	Self-pay	Unknown	Total
Children Eligible	2,387	3,754	242	444	104	840	7,771

2008 TITLE V STATISTICS

SECTION III. Children with Special Health Care Needs

C. SERVICES PROVIDED BY COMPONENT

C.1 Unduplicated number of children receiving case management/care coordination where a client chart exists. Case management/care coordination refers to a set of activities provided by a health professional to a child experiencing illness, disability, or impairment, or to their family to assure that necessary care or services are provided to allow the child as full a life as is possible in the least restrictive environment. Services could include comprehensive assessment, development and implementation of an individual plan of care, arrangement for services, monitoring of service delivery, and periodic reassessment.

Ages	# of Unduplicated Children			Total
	Female	Male	Unknown	
Birth - 364 days	543	495	60	1,098
Ages 1-2	515	562	156	1,233
Ages 3-4	132	196	344	672
Ages 5-6	63	72	7	142
