Introduction

Introduction

This report is issued in compliance with Minnesota Statutes, section 145.4134 which requires a yearly public report of induced abortion statistics for the previous calendar year and statistics for prior years adjusted to reflect any additional information from late and/or corrected report forms, beginning with October 1, 1998 data. This is the eighteenth such report and covers the period from January 1 through December 31, 2016. Additional *Report of Informed Consent Related to Induced Abortion* forms for 2015 were submitted after publication of the 2015 data in July of 2016. Applicable updated tables can be found in the appendix.

History

The 1998 Minnesota Legislature amended Minnesota's abortion reporting requirement to include all physicians licensed and practicing in Minnesota who perform abortions and all Minnesota facilities in which abortions are performed (Minnesota Statutes, sections 145.4131 - 145.4136). A report must be completed and submitted to the Minnesota Department of Health (MDH) for each procedure performed. This law also expanded the content of the reporting form. The number of induced abortions performed out-of-state and paid for with state funds must be reported to MDH by the Minnesota Department of Human Services. Furthermore, any medical facility or any licensed, practicing physician in Minnesota who encounters an illness or injury that is the result of an induced abortion must submit a report of that complication on a separate form developed for that purpose. Both of these forms, *Report of Induced Abortion* and *Report of Complication(s) from Induced Abortion*, are included in the Appendix of this publication.

The 2003 Minnesota Legislature enacted the Woman's Right to Know Act. This law [Minnesota Statutes, sections 145.4241 – 145.4249] requires physicians to provide women with certain information at least 24 hours prior to an abortion and to collect and report to MDH the number of women who were provided this information. Physicians were required to begin collecting this data on January 1, 2004 and to submit their 2016 data to MDH by April 1, 2017. Additional information about the Woman's Right to Know Act can be found at <http://www.health.state.mn.us/wrtk/index.html>.

The 2006 Minnesota Legislature amended the Woman's Right to Know Act (WRTK) regarding the circumstance of a patient seeking an abortion of an unborn child diagnosed with a fetal anomaly incompatible with life. The patient must be informed of available perinatal hospice services and offered this care as an alternative to abortion. If the patient accepts the care the information required under the WRTK need not be provided to her. If she declines hospice services and elects abortion, only information about medical risks, gestational age and anesthesia must be given.

The 2015 Minnesota Legislature enacted the "Born Alive Infant Protection Act" a portion of which amended the abortion reporting requirements to add whether an abortion results in a born alive infant. Information collected includes medical actions taken to preserve the life of the infant, whether the infant survived and the status of a surviving infant. The text of this act can be found in the Appendix of this publication. [Minnesota Statutes, sections 145.4131, subdivision 1 and 145.423, subdivisions 1 through 9]

Technical Notes

Technical Notes

Data included in this report are submitted to the Minnesota Department of Health by facilities and physicians who perform abortions in Minnesota. The *Report of Induced Abortion* (see Appendix, Figure 1) may be submitted by a facility/clinic on behalf of physicians who practice therein; or physicians may submit reports independently. A number of data items on the report form are specifically required by Minnesota Statutes. These items include: medical specialty of the physician performing the abortion, patient age, date of the abortion, clinical estimate of gestation, number of previous spontaneous and induced abortions, type of abortion procedure, intra-operative complications (post-operative complications are collected using the *Report of Complication(s) from Induced Abortion*), method of disposal of fetal remains, type of payment, health coverage type, and reason for the abortion. The items: type of admission, patient residence, date of last menses, and contraceptive use and method were included to provide continuity with previous abortion report forms. Marital status, Hispanic origin, race, education, and previous live births correspond to items on the Minnesota *Medical Supplement to the Certificate of Live Birth* and thus allow for statistical comparison with birth data and the calculation of pregnancy rates.

Report forms submitted with incomplete data are required by law to be returned to the clinic/facility or independently reporting physician for correction. Overall compliance and cooperation in completing the forms is excellent, however, some data remain unreported. In some cases this is due to a facility being unable to locate the record in question and in other instances due to a patient's refusal to provide the data. Continuing efforts are being made to further improve reporting compliance, completeness, and timeliness.

Due to the sensitivity of abortion data, there are concerns about revealing an individual's identity, whether patient or provider, from data presented in this publication. Minnesota Statutes, section 145.4134 states "The commissioner shall ensure that none of the information included in the public reports can reasonably lead to identification of an individual having performed or having had an abortion. All data included on the forms under sections 145.4131 to 145.4133 must be included on the public report except that the commissioner shall maintain as confidential, data which alone or in combination may constitute information from which an individual having performed or having had an abortion may be identified using epidemiologic principles."

Data generally are suppressed when there are such small numbers of two or more variables that it would be difficult to protect the confidentiality of individuals. For instance, age groups tallied for only a single town in Minnesota would most likely have small counts in some of the age groups. Likewise, a table of age group by race for each county in Minnesota would have small counts in cells for those counties with small populations and few minority residents. Suppression of those small counts are necessary to protect the confidentiality of the individual.

Data by provider, Tables 1.1 and 1.2, are presented for individual clinics that have been publicly identified as abortion providers, but aggregated into a single group for independently reporting physicians. Table 1.2 presents data on individual physicians with no small-number suppression, as the law requires counts by physician by month. Physicians are simply identified as Physician A, Physician B, etc. to protect confidentiality. Please note that the identifiers are arbitrarily assigned to those physicians who reported in a given calendar year. Thus, Physician X in a prior year's report may not be the same individual as Physician X in this report. Data presented in frequency tables for the state as a whole have no small-number data suppressed. Likewise, Table 6, Country/State Residence of Woman, contains sufficiently large groups to confound identification of an individual. Table 7, County of Residence for Women Residing in Minnesota, is the only table for which counts of zero to five are suppressed. Some of the counties have a small population of females of childbearing age and/or a small number of physicians who may be qualified to provide abortion services and thus, though unlikely, it could be possible for a provider or patient to be identified.

Total	803	4	9,146	9,953

Minnesota Residents

	Fee for Service	Capitated	Other/Unknown and No Response	Total
Private Coverage	167	3	1,770	1,940
Public Assistance	616	1 **	3,794	4,411
Self Pay	-	-	2,700	2,700
Unknown	1	-	1	2
Total	784	4	8,265	9,053

**Denotes enrollment in managed care as reported by the provider or the client. Although a client may be covered under a capitated public assistance plan, i.e. 'managed care', all abortion services are paid under fee-for-service.

Table 17
Reason for Abortion*, 2016

	Occurring in Minnesota	Minnesota Residents
Pregnancy was a result of rape	77	64
Pregnancy was a result of incest	8	7
Economic reasons	2,865	2,572
Does not want children at this time	6,933	6,306
Emotional health is at stake	1,014	910
Physical Health is at stake	666	610
Continued pregnancy will cause impairment of major bodily function	36	32
Pregnancy resulted in fetal anomalies	174	136
Unknown or the woman refused to answer	1,596	1,466
Other stated reason	364 **	335

*Note: No totals are given because a woman may have given more than one response.

**See Table 17a

Table 17a
Other Stated Reason for Abortion, 2016

Physical or mental health issues and concerns	63
Education, career and employment issues	10
Not ready or prepared for a child or more children at this time or family already completed	84
Relationship issues, including abuse, separation, divorce and extra-marital affairs	36
Other miscellaneous responses	66
"Other Reason" was indicated, but not specified	116
Total**	375

*Note that these categories were changed from those of previous years beginning with the 2015 data year. The categories previously used were no longer representative of the typical responses given.

**Total is greater than 'Other Stated Reason' total on Table 17 because some women stated more than one other reason.

Table 18
Intraoperative Complications*, 2016

	Occurring in Minnesota	Minnesota Residents
No Complications	9,889	8,994
Cervical laceration requiring suture or repair	20	17
Heavy bleeding/hemorrhage with estimated blood loss in excess of 500cc	2	2
Uterine perforation	5	4
Other complication	35	34
Not Reported**	2	2
Total	9,953	9,053

Born Alive Infants Protection Act

Born Alive Infants Protection Act Report

The 2015 Minnesota Legislature enacted the “Born Alive Infants Protection Act” (section 145.423) recognizing a born alive infant resulting from an induced abortion as a human person (section 145.423, subdivision 1) and requiring that “reasonable measures consistent with good medical practice shall be taken by the responsible medical personnel to preserve the life and health of the born alive infant.” (section 145.423, subdivision 5). As part of this act, the abortion reporting requirements were modified to include the following information:

- Whether the abortion resulted in a born alive infant, as defined by section 145.423, subdivision 4
- What medical actions were taken to preserve the life of the infant
- Whether the infant survived
- The status, if known, of a surviving infant.

Reporting was required beginning July 1, 2015. The text of the amended sections can be found in the appendix.

For the calendar year of January 1, 2016 through December 31, 2016 five abortion procedures resulting in a born-alive infant were reported.

- In one instance residual, transient cardiac contractions were briefly present. No measures were taken to prolong these transient contractions and the infant did not survive.
- In two instances the infants had been diagnosed with lethal fetal anomalies. No efforts were made to preserve the lives of these infants and neither survived.
- In two instances comfort care measures were provided as planned and neither infant survived.

Appendix

Minnesota Statutes 2014, section 145.4131, subdivision 1, is amended to read:

Subdivision 1. Forms.

(a) Within 90 days of July 1, 1998, the commissioner shall prepare a reporting form for use by physicians or facilities performing abortions. A copy of this section shall be attached to the form. A physician or facility performing an abortion shall obtain a form from the commissioner.

(a) The form shall require the following information:

(1) the number of abortions performed by the physician in the previous calendar year, reported by month;

(2) the method used for each abortion;

(3) the approximate gestational age expressed in one of the following increments:

(i) less than nine weeks;

(ii) nine to ten weeks;

(iii) 11 to 12 weeks;

(iv) 13 to 15 weeks;

(v) 16 to 20 weeks;

(vi) 21 to 24 weeks;

(vii) 25 to 30 weeks;

(viii) 31 to 36 weeks; or

(ix) 37 weeks to term;

(4) the age of the woman at the time the abortion was performed;

(5) the specific reason for the abortion, including, but not limited to, the following:

(i) the pregnancy was a result of rape;

(ii) the pregnancy was a result of incest;

(iii) economic reasons;

(iv) the woman does not want children at this time;

(v) the woman's emotional health is at stake;

(vi) the woman's physical health is at stake;

(vii) the woman will suffer substantial and irreversible impairment of a major bodily function if the pregnancy continues;

- (viii) the pregnancy resulted in fetal anomalies; or
- (ix) unknown or the woman refused to answer;
 - (6) the number of prior induced abortions;
 - (7) the number of prior spontaneous abortions;
 - (8) whether the abortion was paid for by:
 - (i) private coverage;
 - (ii) public assistance health coverage; or
 - (iii) self-pay;
 - (9) whether coverage was under:
 - (i) a fee-for-service plan;
 - (ii) a capitated private plan; or
 - (iii) other;
 - (10) complications, if any, for each abortion and for the aftermath of each abortion. Space for a description of any complications shall be available on the form;
 - (11) the medical specialty of the physician performing the abortion
 - (12) whether the abortion resulted in a born alive infant, as defined in section 145.423, subdivision 4, and:
 - (i) any medical actions taken to preserve the life of the born alive infant;
 - (ii) whether the born alive infant survived; and
 - (iii) the status of the born alive infant, should the infant survive, if known

Sec. 44. Minnesota Statutes 2014, section 145.423, is amended to read:

145.423 ABORTION; LIVE BIRTHS.

Subdivision 1. Recognition; medical care.

A born alive infant as a result of an abortion shall be fully recognized as a human person, and accorded immediate protection under the law. All reasonable measures consistent with good medical practice, including the compilation of appropriate medical records, shall be taken by the responsible medical personnel to preserve the life and health of the born alive infant.

Subd. 2. Physician required.

When an abortion is performed after the twentieth week of pregnancy, a physician, other than the physician performing the abortion, shall be immediately accessible to take all reasonable measures consistent with good medical practice, including the compilation of appropriate medical records, to preserve the life and health of any

born alive infant that is the result of the abortion.

Subd. 3. Death.

If a born alive infant described in subdivision 1 dies after birth, the body shall be disposed of in accordance with the provisions of section [145.1621](#).

Subd. 4. Definition of born alive infant.

(a) In determining the meaning of any Minnesota statute, or of any ruling, regulation, or interpretation of the various administrative bureaus and agencies of Minnesota, the words "person," "human being," "child," and "individual" shall include every infant member of the species *Homo sapiens* who is born alive at any stage of development.

(b) As used in this section, the term "born alive," with respect to a member of the species *Homo sapiens*, means the complete expulsion or extraction from his or her mother of that member, at any stage of development, who, after such expulsion or extraction, breathes or has a beating heart, pulsation of the umbilical cord, or definite movement of voluntary muscles, regardless of whether the umbilical cord has been cut, and regardless of whether the expulsion or extraction occurs as a result of a natural or induced labor, cesarean section, or induced abortion.

(c) Nothing in this section shall be construed to affirm, deny, expand, or contract any legal status or legal right applicable to any member of the species *Homo sapiens* at any point prior to being born alive, as defined in this section.

Subd. 5. Civil and disciplinary actions.

(a) Any person upon whom an abortion has been performed, or the parent or guardian of the mother if the mother is a minor, and the abortion results in the infant having been born alive, may maintain an action for death of or injury to the born alive infant against the person who performed the abortion if the death or injury was a result of simple negligence, gross negligence, wantonness, willfulness, intentional conduct, or another violation of the legal standard of care.

(b) Any responsible medical personnel that does not take all reasonable measures consistent with good medical practice to preserve the life and health of the born alive infant, as required by subdivision 1, may be subject to the suspension or revocation of that person's professional license by the professional board with authority over that person. Any person who has performed an abortion and against whom judgment has been rendered pursuant to paragraph (a) shall be subject to an automatic suspension of the person's professional license for at least one year and said license shall be reinstated only after the person's professional board requires compliance with this section by all board licensees.

(c) Nothing in this subdivision shall be construed to hold the mother of the born alive infant criminally or civilly liable for the actions of a physician, nurse, or other licensed health care provider in violation of this section to which the mother did not give her consent.

Subd. 6. Protection of privacy in court proceedings.

In every civil action brought under this section, the court shall rule whether the anonymity of any female upon whom an abortion has been performed or attempted shall be preserved from public disclosure if she does not give her consent to such disclosure. The court, upon motion or sua sponte, shall make such a ruling and, upon determining that her anonymity should be preserved, shall issue orders to the parties, witnesses, and counsel and shall direct the sealing of the record and exclusion of individuals from courtrooms or hearing rooms to the extent necessary to safeguard her identity from public disclosure. Each order must be accompanied by specific written findings explaining why the anonymity of the female should be preserved from public disclosure, why the order is essential to that end, how the order is narrowly tailored to serve that interest, and why no reasonable, less restrictive alternative exists. This section may not be construed to conceal the identity of the plaintiff or of witnesses from the defendant.

Subd. 7. Status of born alive infant.

Unless the abortion is performed to save the life of the woman or fetus, or, unless one or both of the parents of the born alive infant agree within 30 days of the birth to accept the parental rights and responsibilities for the child, the child shall be an abandoned ward of the state and the parents shall have no parental rights or obligations as if the parental rights had been terminated pursuant to section 260C.301. The child shall be provided for pursuant to chapter 256J.

Subd. 8. Severability.

If any one or more provision, section, subdivision, sentence, clause, phrase, or word of this section or the application of it to any person or circumstance is found to be unconstitutional, it is declared to be severable and the balance of this section shall remain effective notwithstanding such unconstitutionality. The legislature intends that it would have passed this section, and each provision, section, subdivision, sentence, clause, phrase, or word, regardless of the fact that any one provision, section, subdivision, sentence, clause, phrase, or word is declared unconstitutional.

Subd. 9. Short title.

This act may be cited as the "Born Alive Infants Protection Act."

Updates to 2015 Data

Minnesota Statutes, sections 145.4134 and 145.4246 require that each yearly report provide the statistics for any previous calendar year for which additional information from late or corrected reports was received, adjusted to reflect these new numbers. Following the publication of the report for calendar year 2015 in July of 2016, additional ***Report of Informed Consent Related to Induced Abortion*** forms were received. Tables 25, 26 and 27, on which these data are tabulated, are included in this section of the Appendix and reflect the updated counts. Tables for which the data did not change have not been republished here.

Definitions

Definitions

Induced Abortion:

The purposeful interruption of an intrauterine pregnancy with the intention other than to produce a live-born infant, and which does not result in a live birth. This definition excludes management of prolonged retention of products of conception following a fetal death.

Fetal Death:

Death prior to the complete expulsion or extraction of a product of conception from its mother, irrespective of the duration of pregnancy. The death is indicated by the fact that, after such expulsion or extraction, the fetus does not breathe or show any other evidence of life such as beating of the heart, pulsation of the umbilical cord, or definite movement of voluntary muscles.

Fetal Remains:

MN Statutes 145.1621, subd 2: The remains of a dead offspring of a human being that has reached a stage of development so that there are cartilaginous structures, fetal or skeletal parts after an abortion or miscarriage, whether or not the remains have been obtained by induced, spontaneous, or accidental means.

Method of Abortion:

Suction Curettage: Mechanical dilation of the cervix with removal of the uterine contents by low pressure suction created by an electric suction pump.

Medical: Administration of medication to induce abortion. This does not include administration of morning-after pills or post-coital IUD insertion.

Dilation & Evacuation: Dilation of the cervix by insertion of laminaria several hours before removal of uterine contents by suction and/or sharp curettage.

Intra-Uterine Instillation: Induction of labor by injection of a sterile saline or prostaglandin (a naturally occurring hormone) solution into the amniotic sac. Laminaria are often inserted in the cervix several hours before the injection to aid dilation.

Hysterectomy/otomy: Removal of the fetus by means of a surgical incision made in the uterine wall. In the case of a hysterectomy, the entire uterus is removed.

Sharp Curettage: Mechanical dilation of the cervix with removal of uterine contents by scraping the uterine wall with a surgical curette.

Induction of Labor: Induction of labor by means of Pitocin and/or related medications which causes uterine contractions and expulsion of uterine contents.

Dilation & Extraction: Dilation of the cervix and removal of fetal tissues

Data Collection Instruments

16. Type of Abortion Procedure (Check only one)

- Suction Curettage
- Medical (Nonsurgical),

Specify Medication(s) _____ → Does not include administration of morning after pills or post coital IUD insertion.

- Dilation and Evacuation (D&E)
- Intra-Uterine Instillation (Saline or Prostaglandin)
- Hysterectomy/otomy
- Sharp Curettage (D&C)
- Induction of Labor (Pitocin, etc.)
- Intact Dilation and Extraction (D&X)
- Other Dilation and Extraction (D&X)
- Other (Specify) _____

17. Intraoperative Complication(s) from Induced Abortion

Complications that occur during and immediately following the procedure, before patient has left facility.

(Check all that apply)

- No complication(s)
- Cervical laceration requiring suture or repair
- Heavy bleeding/hemorrhage with estimated blood loss of ≥ 500 cc
- Uterine perforation
- Other (Specify) _____

*For post-operative complications, please refer to the REPORT OF COMPLICATION(S) FROM INDUCED ABORTION

18. Method of Disposal for Fetal Remains (Check only one)

- Cremation
- Interment by burial

19. Type of Payment (Check only one)

- Private coverage
- Public assistance health coverage
- Self pay

20. Type of Health Coverage (Check only one)

- Fee for service plan
- Capitated private plan
- Other/Unknown

21. Specific Reason for the Abortion (Check all that apply)

- Pregnancy was a result of rape
- Pregnancy was a result of incest
- Economic reasons
- Does not want children at this time
- Emotional health is at stake
- Physical health is at stake
- Will suffer substantial and irreversible impairment of major bodily function if the pregnancy continues
- Pregnancy resulted in fetal anomalies
- Unknown or the woman refused to answer
- Other _____

(800)657-3900

REPORT OF INDUCED ABORTION

Mandated reporters

All physicians or facilities that perform induced abortions by medical or surgical methods.

Induced abortion defined

For purpose of these reports, induced abortion means the purposeful interruption of an intrauterine pregnancy with the intention other than to produce a live-born infant, and which does not result in a live birth. This definition excludes management of prolonged retention of products of conception following fetal death.

Importance of induced abortion reporting

Reports of induced abortion are not legal records and are not maintained permanently in the files of the State office of vital statistics. However, the data they provide are very important from both a demographic and a public health viewpoint. Data from reports of induced abortion provide unique information on the characteristics of women having induced abortions. Uniform annual data of such quality are nowhere else available. Medical and health information is provided to evaluate risks associated with induced abortion at various lengths of gestation and by the type of abortion procedure used. Information on the characteristics of the women is used to evaluate the impact that induced abortion has on the birth rate, teenage pregnancy, and out-of-wedlock births. Because these abortion data provide information necessary to promote and monitor health, it is important that the reports be completed carefully.

Physician and patient confidentiality

According to MN Statutes §145.4134, the commissioner shall issue a public report providing statistics for the previous calendar year compiled from the data submitted under sections 145.4131 to 145.4133. Each report shall provide the statistics for all previous calendar years, adjusted to reflect any additional information from late or corrected reports. The commissioner shall ensure that none of the information included in the public reports can reasonably lead to identification of an individual having performed or having had an abortion. All data included on the forms under sections 145.4131 to 145.4133 must be included in the public report except that the commissioner shall maintain as confidential data which alone or in combination may constitute information from which, using epidemiologic principles, an individual having performed or having had an abortion may be identified. Service cannot be contingent upon a patient's answering, or refusing to answer, questions on this form.

MINNESOTA STATE LAW

ARTICLE 10, HEALTH DATA REPORTING

§145.4131 [RECORDING AND REPORTING ABORTION DATA.] Subdivision 1. [FORMS.] (a) Within 90 days of the effective date of this section, the commissioner shall prepare a reporting form for use by physicians or facilities performing abortions. A copy of this section shall be attached to the form. A physician or facility performing an abortion shall obtain a form from the commissioner. (b) The form shall require the following information: (1) the number of abortions performed by the physician in the previous calendar year, reported by month; (2) the method used for each abortion; (3) the approximate gestational age expressed in one of the following increments: (i) less than nine weeks; (ii) nine to ten weeks; (iii) 11 to 12 weeks; (iv) 13 to 15 weeks; (v) 16 to 20 weeks; (vi) 21 to 24 weeks; (vii) 25 to 30 weeks; (viii) 31 to 36 weeks; or (ix) 37 weeks to term; (4) the age of the woman at the time the abortion was performed; (5) the specific reason for the abortion, including, but not limited to, the following: (i) the pregnancy was a result of rape; (ii) the pregnancy was a result of incest; (iii) economic reasons; (iv) the woman does not want children at this time; (v) the woman's emotional health is at stake; (vi) the woman's physical health is at stake; (vii) the woman will suffer substantial and irreversible impairment of a major bodily function if the pregnancy continues; (viii) the pregnancy resulted in fetal anomalies; or (ix) unknown or the woman refused to answer; (6) the number of prior induced abortions; (7) the number of prior spontaneous abortions; (8) whether the abortion was paid for by: (i) private coverage; (ii) public assistance health coverage; or (iii) self-pay; (9) whether coverage was under: (i) a fee-for-service plan; (ii) a capitated private plan; or (iii) other; (10) complications, if any, for each abortion and for the aftermath of each abortion. Space for a description of any complications shall be available on the form; and (11) the medical specialty of the physician performing the abortion. Subd. 2. SUBMISSION.] A physician performing an abortion or a facility at which an abortion is performed shall complete and submit the form to the commissioner no later than April 1 for abortions performed in the previous calendar year. The annual report to the commissioner shall include the methods used to dispose of fetal tissue and remains. Subd. 3. [ADDITIONAL REPORTING.] Nothing in this section shall be construed to preclude the voluntary or required submission of other reports or forms regarding abortions.

REPORTING PROCEDURE

COMPLETION AND SUBMISSION OF REPORTS

1. Reporting by physician or facility

The Minnesota Department of Health (MDH), Center for Health Statistics, encourages physicians and facilities to develop internal policies for the completion and submission of the Report of Induced Abortion. MDH recommends that these policies designate either the physician or the facility as having the overall responsibility and authority to see that the report is completed and filed on time. This may help prevent duplicate reporting and failure to report. If facilities take the responsibility to report on behalf of their physicians MDH suggests the following reporting procedure:

- * Notify physicians that the facility will be reporting on their behalf.
- * Call the Minnesota Center for Health Statistics for assignment of facility reporting codes and physician reporting codes (See instructions #2-3).
- * Assign physician reporting codes to physicians and maintain a list of these assignments.
- * Develop efficient procedures for prompt preparation and filing of the reports.
- * Collect and record the information required by the report.
- * Prepare a correct and legible report for each abortion performed.
- * Submit the reports to the Minnesota Center for Health Statistics within the time specified by the law.
- * Cooperate with the Minnesota Center for Health Statistics concerning queries on report entries.
- * Call on the Minnesota Center for Health Statistics for advice and assistance when necessary.

If a facility decides not to report on behalf of their physicians, or for physicians who perform induced abortions outside a hospital, clinic, or other institution, the physician performing the abortion is responsible for obtaining a physician reporting code from MDH (See instruction #3), collecting all of the necessary data, completing the report, and filing it with the Minnesota Center for Health Statistics within the time period specified by law (See instruction #7).

2. Facility reporting codes

All facilities reporting on behalf of physicians must be assigned a reporting code from MDH. This code is in addition to individual physician reporting codes (See instruction #3). Facilities must submit a name and address to receive a facility code. For facilities that have been reporting to MDH prior to October 1, 1998, already have a facility reporting code and may continue to use the same code for future reporting.

3. Physician reporting codes

All physicians must be assigned a reporting code in order to submit a Report of Induced Abortion. Reports submitted without a physician reporting code will be considered incomplete. To obtain a code, physicians, or facilities reporting on behalf of physicians (See instruction # 1), must call MDH to be assigned one code per physician. MDH will require that a valid mailing address be provided for the purposes of keying the reporting code, but no other identifying information will be asked or accepted. Addresses provided may be a business address, or an address established by the physician or facility, such as a PO Box. If facilities are reporting on behalf of their physicians, the facility address may be used for the physician address.

4. One report per induced termination of pregnancy

Complete one report for each termination of pregnancy procedure performed.

5. Criterion for a complete report

All items on the report should have a response, even if the response is "0, "None," "Unknown," or "Refuse to Answer."

6. "Reason for abortion" question

MDH recommends that Item #21 on the report be reviewed with each patient. All responses can be reviewed with the patient before completing the question. If this question is transcribed to another piece of paper, or read to the patient, the question must be copied or read exactly as it is worded on the Report of Induced Abortion. If the patient does not complete the question because she refuses to answer, then the facility or physician must check the appropriate response, which is "Refuse to answer."

7. Method of disposal for fetal remains

Reporters should be informed that this question applies to disposal of fetal remains as defined under MN Statutes §145.1621, subd.2.

8. Submission dates

Reports should be completed and submitted to the Center for Health Statistics as soon as possible following each procedure. MDH encourages facilities and physicians to submit reports on a monthly basis, but the final date for submitting reports is April 1 of the following year (e.g., all reports for procedures done in 1998 are due by April 1, 1999). (MN Statutes 1998, §145.411)

REPORT OF COMPLICATION(S) FROM INDUCED ABORTION

A. Facility where patient was attended for complication: _____, _____
Name City

B. Physician who treated patient's complication: (See instruction #1)

Name: _____, _____ or Physician code: _____
Last First

C. Medical specialty of physician who treated patient's complication: _____

D. Date complication was diagnosed: ____/____/____

E. Exact date, or patient recall of the date, the induced abortion was performed:

____ Day ____ Month ____ Year (Please indicate numeric day, month, and year. If only month and/or year is known, please indicate in the spaces provided.)

F. Clinical or patient's estimate of gestation at time of induced abortion: _____ (weeks)

G. Has patient acknowledged being seen previously by another provider for the same complication?

____ Yes ____ No

1. Cervical laceration requiring suture or repair
2. Heavy bleeding/hemorrhage with estimated blood loss of ≥ 500 cc
3. Uterine Perforation
4. Infection requiring inpatient treatment
5. Heavy bleeding/anemia requiring transfusion
6. Failed termination of pregnancy (Continued viable pregnancy)
7. Incomplete termination of pregnancy (Retained products of conception requiring re-evacuation)
8. Other (May include psychological complications, future reproductive complications, or other illnesses or injuries that in the physician's medical judgment occurred as a result of an induced abortion. Please specify diagnosis.)

INSTRUCTIONS

MANDATED REPORTERS: Any physician licensed and practicing in the state who knowingly encounters an illness or injury that, in the physician's medical judgment, is related to an induced abortion, or the facility where the illness or injury is encountered shall complete and submit the Report of Complication(s) from Induced Abortion.

DEFINITION OF INDUCED ABORTION: For the purpose of these reports, induced abortion means the purposeful interruption of an intrauterine pregnancy with the intention other than to produce a live-born infant, and which does not result in a live birth. This definition excludes management of prolonged retention of products of conception following fetal death.

PROCEDURE FOR COMPLETION AND SUBMISSION OF FORMS:

1. Completion of items

All forms should have completed information for items A-G. Physicians may choose to use their name or a physician reporting code when submitting the Report of Complication(s) from Induced Abortion. To obtain a code, physicians, or facilities reporting on behalf of physicians (See instruction # 3), must call MDH to be assigned one code per physician. MDH will require that a valid mailing address be provided for the purposes of keying the reporting code, but no other identifying information will be asked or accepted. Addresses provided may be a business address, or an address established by the physician or facility, such as a PO Box. If facilities are reporting on behalf of their physicians, the facility address may be used for the physician address. **Please note: physicians who perform abortions should use the same physician reporting code when submitting the Report of Complication(s) from Induced Abortion and the Report of Induced Abortion.**

2. Reporting complications not indicated on the current list

The category "Other" should be used for any diagnosed complications that are not part of the current list. The current complications list includes those complications that are supported both in the medical literature and by clinical opinion as being directly associated with induced abortion. Because there are clinical opinions and data that suggest that there may be more complications associated with induced abortion, the "Other" category is provided to capture those types of complications. If "Other" is used, be sure to clearly state the diagnosed complication in the space provided.

3. Reporting by physician or facility

The Minnesota Department of Health (MDH), Center for Health Statistics, encourages physicians and facilities to develop internal policies for the completion and submission of the Report of Complication(s) from Induced Abortion. These policies should designate either the individual physician or the facility as having the overall responsibility and authority to see that the reports are completed. This may help prevent duplicate reporting or a failure to report. When a complication from an induced abortion is encountered outside a hospital, clinic, or other institution, the physician who encounters the complication is responsible for obtaining all of the necessary data, completing the form, and filing it with the Center for Health Statistics.

4. Submission dates

The Report of Complication(s) from Induced Abortion, must be submitted by a physician or facility to the Center for Health Statistics as soon as practicable after the encounter with the abortion related illness or injury. (MN Statutes 1998, § 145.3132)

MINNESOTA STATE LAW

§145.4132 [RECORDING AND REPORTING ABORTION COMPLICATION DATA.] Subdivision 1. [FORMS.] (a) Within 90 days of the effective date of this section, the commissioner shall prepare an abortion complication reporting form for all physicians licensed and practicing in the state. A copy of this section shall be attached to the form. (b) The board of medical practice shall ensure that the abortion complication reporting form is distributed: (1) to all physicians licensed to practice in the state, within 120 days after the effective date of this section and by December 1 of each subsequent year; and (2) to a physician who is newly licensed to practice in the state, at the same time as official notification to the physician that the physician is so licensed.

Subd. 2. [REQUIRED REPORTING.] A physician licensed and practicing in the state who knowingly encounters an illness or injury that, in the physician's medical judgment, is related to an induced abortion or the facility where the illness or injury is encountered shall complete and submit an abortion complication reporting form to the commissioner.

Subd. 3. [SUBMISSION.] A physician or facility required to submit an abortion complication reporting form to the commissioner shall do so as soon as practicable after the encounter with the abortion related illness or injury.

Subd. 4. [ADDITIONAL REPORTING.] Nothing in this section shall be construed to preclude the voluntary or required submission of other reports or forms regarding abortion complications.

REPORT OF INFORMED CONSENT RELATED TO INDUCED ABORTION

► Instructions

1. Reporting year is the year in which the required information was given to the patient.
2. Physician reporting code is required. This may be same code that is used for the "Report of Induced Abortion," but a separate code may be obtained. To obtain a code, contact the Minnesota Department of Health at 800-657-3900.

Reporting Year _____

Physician Reporting Code _____

Medical Risks Information

► Check one box in question 1.

1. *Method used to inform patient of:*
 - (i) the particular medical risks associated with the particular abortion procedure to be employed including, when medically accurate, the risks of infection, hemorrhage, breast cancer, danger to subsequent pregnancies, and infertility;
 - (ii) the probable gestation age of the unborn child at the time the abortion is to be performed;
 - (iii) the medical risks associated with carrying her child to term; and
 - (iv) for abortions after 20 weeks gestational, whether or not an anesthetic or analgesic would eliminate or alleviate organic pain to the unborn child caused by the particular method of abortion to be employed, the particular medical benefits and risks associated with the particular anesthetic or analgesic, and any additional cost of the procedure for the administration of the anesthetic or analgesic.

Telephone by:
referring physician
physician who will perform the abortion

In Person by:
referring physician
physician who will perform the abortion

Information not provided because:
an immediate abortion was necessary to avert patient's death.
(Optional to write in the principal medical condition of the patient which would have caused the patient's death: _____)
a delay would have created serious risk of substantial and irreversible impairment of a major bodily function. (Optional to write in the principal medical condition of the patient which would have caused the patient's impairment of a major bodily function: _____)
the patient's unborn child was diagnosed with a fetal anomaly incompatible with life, the patient was informed of available perinatal hospice services and offered this care as an alternative to abortion, and the patient accepted perinatal hospice services.
(Optional to write in the anomaly diagnosed: _____)

Medical Assistance and Printed Materials Information

► Check one box in question 2.

2. *Method used to inform patient that:*
 - (i) medical assistance benefits may be available for prenatal care, childbirth, and neonatal care;
 - (ii) the father is liable to assist in the support of her child, even in instances when the father has offered to pay for the abortion; and
 - (iii) she has the right to review printed materials published by the Minnesota Department of Health and that these materials are available on a state-sponsored Web site, and what the Web site address is. (<http://www.health.state.mn.us/wrtk/handbook.html>)
