

Identifying Environmental Wells and Determining Administrative Requirements

Note: Local delegated well programs with monitoring well authority (Dakota, Olmsted, and Winona Counties and the cities of Bloomington and Minneapolis) should be contacted for requirements pertaining to environmental wells.

A maintenance permit is required for an environmental well that is not sealed within 14 months after construction. The annual maintenance permit fee is \$175 per site, regardless of the number of unsealed environmental wells on the site.

If you have any questions on environmental well requirements, please call Kara Dennis at 651-201-4589 or kara.dennis@state.mn.us.
