

Year 2016 Well Sealing Financial Assistance

The map above indicates counties that have financial assistance programs offered by various government agencies. A cost-share program reimburses the property owner for only part of the cost of well sealing. For further information about these programs, call the contact person listed in the table below for your county or contact your local Soil and Water Conservation District (SWCD), County Environmental Services Department, or county water plan coordinator. There are also a number of federal and state loan and grant programs that are offered throughout the state. Information about these programs is on page 6. **Preapproval is required to qualify for these programs so the arrangements for cost share or loans must be made before a well is sealed.** State law requires that well sealing be done by a licensed well contractor. To find a licensed well contractor, look in the Yellow Pages under “Well Drilling and Services” or visit the Minnesota Department of Health, Well Management Section website: [Licensed/Registered Well Contractor Directory \(www.health.state.mn.us/divs/eh/wells/lwc\)](http://www.health.state.mn.us/divs/eh/wells/lwc).

The following government agencies in the state offer financial assistance programs for well sealing.

* The Environmental Quality Incentives Program (EQIP) is a financial and technical assistance program available through the Natural Resources Conservation Service (NRCS) of the U.S. Department of Agriculture (USDA). This program is primarily intended for rural and agricultural properties. **The program is limited to agricultural producers, who are property owners who raise food or fiber on the property.** Depending on the county, well sealing (called "well decommissioning" in EQIP) is eligible by itself for financial assistance or is eligible if submitted with other conservation practices. Contact the local office of the NRCS in your county for details.

** Soil and Water Conservation Districts (SWCD) have a state cost-share program to promote natural resource conservation practices in the county. This program is primarily intended for rural and agricultural properties. These funds can now be used for well sealing. Each SWCD manages its own program. Contact the local office of the SWCD in your county for details.

*** Ramsey County, Capitol Region Watershed District includes parts of Falcon Heights, Lauderdale, Maplewood, Roseville, and St. Paul. The address of the property with the well must be in the district.

Additional information regarding low interest loans and grants is listed on page 6.

State or Federal Programs Offering Grants and Low Interest Loans for Well Construction, Repair, and Sealing in 2016

Financial assistance through low interest loans and grants is available for well construction, repair, and sealing from a variety of programs. These programs are offered through local lenders to homeowners depending on their income level and whether they live in rural or urban areas. The following is a list of loan and grant programs available for well sealing in 2016.

Single Family Housing Repair Loans and Grants

This program offers loans and grants for well construction, repair, and sealing. The Rural Development office of the U.S. Department of Agriculture administers this program. The program is for very low income families who live in a rural area or a community with a population of 25,000 or less. The family income cannot exceed 50 percent of the median county income. Individuals who are 62 years of age or older may qualify for a grant or a combination of a loan and grant; younger applicants are eligible only for loans. The counties of Anoka, Hennepin, Ramsey and Washington are all ineligible. Even if your property is in an eligible area, your eligibility is still subject to income limits. For more information and to find the area office for a particular county or to find out if your property is in an eligible area, call 651-602-7800 or visit the website at: [Single Family Housing Repair Loans and Grants](http://www.rd.usda.gov/programs-services/single-family-housing-repair-loans-grants) (www.rd.usda.gov/programs-services/single-family-housing-repair-loans-grants).

Minnesota Housing Finance Agency Loan Programs

Rehabilitation Loan/Emergency and Accessibility Loan Program: Provides deferred loan financing to low income homeowners needing to rehabilitate their existing residential housing. The program can be used to include well sealing and well replacement where connection to a municipal water supply is not feasible. The statewide income limit is \$18,200 for one person, \$20,800 for two persons, and higher for larger families. The loan limit is \$27,000.

Fix Up Program: Offers loans for well construction, repair, and sealing. The program is designed for homeowners with a gross annual household income of \$99,500 or less. There are no restrictions on location in this program. There is a fixed interest rate. A qualifying homeowner may repay the loan with fixed monthly payments. The repayment term will be based on the loan amount and household budget. For a list of participating lenders and the current interest rate visit their website.

For more information on these programs call Minnesota Housing Finance Agency at 800-710-8871; in the Twin Cities metropolitan area, call 651-296-8215, or visit their websites:

Agriculture Best Management Practices (AgBMP) Loan Program

Local counties and Soil and Water Conservation Districts administer this loan program offered by the Minnesota Department of Agriculture (MDA) for well replacement, well sealing, and other practices that prevent water pollution. You do not need to be a farmer to qualify. Financing to replace wells is available when wells do not comply with requirements for setback or isolation distances (such as minimum distances from septic tanks, drainfields, feedlots, fuel tanks, and pesticide preparation areas), or if the well is contaminated from human activity (such as from septic systems, petroleum products, or pesticides). Any rural landowner is eligible. There are no income limits in this program. The loan terms include a maximum of \$200,000, a maximum length of ten years, and a maximum interest rate of 3 percent plus usual and customary fees. The list of local contacts for this program is available by calling Dwight Wilcox of the MDA at 651-201-6618 or visit their website at: [Find AgBMP Loan County Contacts and Lenders](https://app.gisdata.mn.gov/mda-agbmploan/) (<https://app.gisdata.mn.gov/mda-agbmploan/>).
