C&T REMARKS - CMS 1539 FORM **STATE AGENCY REMARKS**

CCN: 24-5544

On July 16, 2014, the Minnesota Department of Health completed a third post certification revist (PCR) to verify that the facility had achieved and maintained compliance with federal certification deficiencies issued pursuant to the original survey completed March 18, 2014 and the PCR completed on May 13, 2014. We presumed, based on its plan of correction, that the facility had corrected these deficiencies as of July 6, 2014. Based on our visit, we have determined that the facility has corrected the deficiencies issued pursuant to the original survey completed March 18, 2014 and PCR, completed on May 13, 2014. Please refer to CMS form 2567B for the results of the July 16, 2014 revisit.

Effective July 16, 2014, the facility is certified for 87 skilled nursing facility beds.

MINNESOTA MDH DEPARTMENT OF HEALTH

Protecting, Maintaining and Improving the Health of Minnesotans

REVISED LETTER

August 15, 2014

Ms. Leah Killian-Smith, Administrator
Camden Care Center
512 49th Avenue North
Minneapolis, Minnesota 55430

RE: Project Number S5544023

Dear Ms. Killian-Smith:

This letter revises and should replace our letter dated August 1, 2014 to correct the date of the third revisit that determined substantial compliance from July 17, 2014 to July 16, 2014. In addition, the correction dates of the deficiencies found corrected at the time of the July 16, 2014 revisit have been revised on the attached CMS-2567B form.

On April 8, 2014, we informed you that the following enforcement remedy was being imposed:

- State Monitoring effective April 13, 2014. (42 CFR 488.422)

We also notified you that remedies were being recommended for imposition to the Centers for Medicare and Medicaid Services (CMS).

On April 11, 2014, the Centers for Medicare and Medicaid Services (CMS) informed you that the following enforcement remedies were being imposed:

- Federal Civil Money Penalty of $6,300.00 per day for the nine (9) days beginning March 9, 2014 and continuing through March 17, 2014 for a total of $56,700.00

- Federal Civil Money Penalty of $250.00 per day beginning March 18, 2014

- Discretionary Denial of Payment for New Admissions effective April 29, 2014

Also, the CMS Region V Office notified you in their letter of April 11, 2014, in accordance with Federal law, as specified in the Act at Section 1819(f)(2)(B)(iii)(I)(b) and 1919(f)(2)(B)(iii)(I)(b), your facility is prohibited from conducting Nursing Aide Training and/or Competency Evaluation Programs (NATCEP) for two years from March 18, 2014.

The letter of April 11, 2014 also advised you that, should you fail to attain substantial compliance by August 18, 2014, CMS would impose the remedy of termination from the Medicare and Medicaid programs.

This was based on the deficiencies cited by this Department for an extended survey completed on March 18, 2014. At the time of our March 18, 2014 extended survey your facility was not in substantial compliance with the participation requirements and conditions in your facility constituted both substandard quality of care (SQC) and immediate jeopardy (IJ) to resident health or safety. This survey found the most serious deficiencies in your facility to be a pattern of deficiencies that constituted immediate jeopardy (Level K) whereby corrections were required.

On May 13, 2014, the Minnesota Department of Health completed a Post Certification Revisit (PCR) to verify that your facility had achieved and maintained compliance with federal certification deficiencies issued pursuant to an extended survey, completed on March 18, 2014. We presumed, based on your plan of correction, that your facility had corrected these deficiencies as of April 28, 2014. Based on our revisit, we determined that your facility had not corrected the deficiencies issued pursuant to our extended survey, completed on March 18, 2014, and conditions in the facility constituted both substandard quality of care (SQC) and immediate jeopardy (IJ) to resident health or safety. The most serious deficiencies identified in your facility at the time of the May 13, 2014 revisit were found to be a pattern of deficiencies that constituted immediate jeopardy (Level K) whereby corrections were required. At the time of the exit on May 13, 2014 the IJ situation had not been removed and the facility was notified that failure to remove the IJ would result in termination of the facility's Medicare and Medicaid provider numbers by CMS, to be effective June 5, 2014.

On May 21, 2014 a second revisit was conducted to verify removal of the IJ which was identified at F224, F323 and F490 during the revisit conducted on May 13, 2014. As a result of the May 21, 2014 revisit, it was determined that the immediate jeopardy at F224, F323 and F490 was removed on May 21, 2014. We notified your facility on May 21, 2014 that we recommended to CMS that the remedy of 23 day termination of your Medicare and Medicaid provider agreement not be imposed. Although the IJ was removed, substantial non-compliance remained. Thus, all other deficiencies from the May 13, 2014 revisit remained as written on the May 21, 2014 statement of deficiencies (CMS-2567).

As a result of the revisit findings, you were notified on June 2, 2014 that the Category 1 remedy of state monitoring would remain in effect. You were also notified that we recommended to the Region V Office of CMS that the previously imposed remedies would remain in effect and that we recommended that the following new remedy would be imposed:

- Federal Civil Money Penalty for the deficiency cited at F490 at a S/S level of J

On July 10, 2014, the CMS Region V Office notified you of the following actions related to our recommendations and the imposed remedies in their letter of April 11, 2014:

- Federal Civil Money Penalty of $6,300.00 per day for the nine (9) days beginning March 9, 2014 and continuing through March 17, 2014 for a total of $56,700.00

- Federal Civil Money Penalty of $250.00 per day for the forty-four (44) days beginning March 18, 2014 and continuing through April 30, 2014 for a total of $11,000.00

- Federal Civil Money Penalty of $6,700.00 per day for the twenty (20) days beginning May 1, 2014 and continuing through May 20, 2014 for a total of $134,000.00

- Federal Civil Money Penalty of $600.00 per day beginning May 21, 2014

- State Monitoring effective April 13, 2014, would remain in effect

- Discretionary denial of payment for new admissions, effective April 29, 2014, would remain in effect

- Modification of the date for termination of your Medicare and Medicaid provider agreement, to September 18, 2014

On July 16, 2014, the Minnesota Department of Health completed a third PCR to verify that your facility had achieved and maintained compliance with federal certification deficiencies issued pursuant to the PCRs completed on May 13, 2014 and on May 21, 2014. We presumed, based on your plan of correction, that your facility had corrected these deficiencies as of July 6, 2014. Based on our visit, we determined that your facility has corrected the deficiencies issued pursuant to our PCRs, completed on May 13, 2014 and on May 21, 2014. As a result of the revisit findings, the Department is discontinuing the Category 1 remedy of state monitoring effective July 16, 2014. The Region V Office of CMS will notify you of their determination regarding the previously imposed remedies from their letters of April 11, 2014 and July 10, 2014.

As we notified you in our letter of April 8, 2014, in accordance with Federal law, as specified in the Act at Section 1819(f)(2)(B)(iii)(I)(b) and 1919(f)(2)(B)(iii)(I)(b), your facility is prohibited from conducting Nursing Aide Training and/or Competency Evaluation Programs (NATCEP) for two years from March 18, 2014.

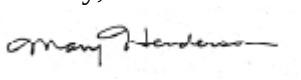
Correction of the Life Safety Code deficiencies at the time of the March 18, 2014 extended survey was verified May 1, 2014.

A revised copy of the Post Certification Revisit Form (CMS-2567B) from the health revisit completed on July 16, 2014 is being submitted to you electronically.

Please note, it is your responsibility to share the information contained in this letter and the results of this visit with the President of your facility's Governing Body.

Feel free to contact me if you have questions about this correspondence.

Sincerely,



Mary Henderson, Program Assurance Supervisor

REVISED LETTER

August 15, 2014

Ms. Leah Killian-Smith, Administrator
Camden Care Center
512 49th Avenue North
Minneapolis, Minnesota 55430

Re: Enclosed Reinspection Results - Project Number S5544023

Dear Ms. Killian-Smith:

This letter revises and should replace our letter dated August 1, 2014 to correct the date of the third revisit that determined correction of the licensing orders from July 17, 2014 to July 16, 2014. In addition, the correction dates of the orders found corrected at the time of the July 16, 2014 revisit have been revised on the attached State Form - Revisit Report.

On July 16, 2014 survey staff of the Minnesota Department of Health, Licensing and Certification Program completed a reinspection of your facility, to determine correction of orders found on the survey completed on March 18, 2014 and revisits conducted on May 13, 2014 and on May 21, 2014. At this time of our July 16, 2014 revisit these correction orders were found corrected and are listed on the accompanying Revisit Report Form submitted to you electronically.

Please note, it is your responsibility to share the information contained in this letter and the results of this visit with the President of your facility's Governing Body.

Please feel free to call me with any questions.

Sincerely,

Mary Henderson

Each deficiency should be fully identified using either the regulation or LSC provision number and the identification prefix code previously shown on the State Survey Report (prefix codes shown to the left of each requirement on the survey report form).

Protecting, Maintaining and Improving the Health of Minnesotans

CMS Certification Number (CCN): 24-5544

August 15, 2014

Ms. Leah Killian-Smith, Administrator
Camden Care Center
512 49th Avenue North
Minneapolis, Minnesota 55430

Dear Ms. Killian-Smith:

The Minnesota Department of Health assists the Centers for Medicare and Medicaid Services (CMS) by surveying skilled nursing facilities and nursing facilities to determine whether they meet the requirements for participation. To participate as a skilled nursing facility in the Medicare program or as a nursing facility in the Medicaid program, a provider must be in substantial compliance with each of the requirements established by the Secretary of Health and Human Services found in 42 CFR part 483, Subpart B.

Based upon your facility being in substantial compliance, we are recommending to CMS that your facility be recertified for participation in the Medicare and Medicaid program.

Effective July 16, 2014 the above facility is certified for:

87 Skilled Nursing Facility/Nursing Facility Beds

Your facility's Medicare approved area consists of all 87 skilled nursing facility beds.

You should advise our office of any changes in staffing, services, or organization, which might affect your certification status.

If, at the time of your next survey, we find your facility to not be in substantial compliance your Medicare and Medicaid provider agreement may be subject to non-renewal or termination.

Feel free to contact me if you have questions related to this letter.

Sincerely,

Mark Meath

This revisit was conducted only to verify removal of the immediate jeopardy (s) at F224, F323 and F490 which were cited during a federal revisit survey exited on 5/13/14. As a result of this revisit, it was determined that the immediate jeopardy (s) at F224, F323 and F490 were removed on 5/21/14. Although the immediate jeopardy (s) was removed, substantial non-compliance remains at F224 at a s/s of G level; substantial non-compliance remains at F323 at a s/s of H; substantial non-compliance remains at F490 at a s/s of F. Only deficiencies that were cited at the immediate jeopardy level were reviewed during this survey. Thus, all other deficiencies from the 5/13/14, Federal revisit survey remain as written on the 5/13/14, statement of deficiencies. Refer to the 2567 and plan of correction and the 2567B for details.

Minneapolis, Minnesota 55430

RE: Second Post Certification Revisit (PCR) for Project Number S5544023

Dear Ms. Killian-Smith:

On April 4, 2014, we informed you that the following enforcement remedy was being imposed:

• State Monitoring effective April 13, 2014. (42 CFR 488.422)

On April 11, 2014, the Centers for Medicare and Medicaid Services (CMS) informed you that the following enforcement remedies were being imposed:

- Federal Civil Money Penalty of $6,300.00 per day for nine (9) days beginning March 9, 2014 and continuing through March 17, 2014 for a total of $56,700.00

- Federal Civil Money Penalty of $250.00 per day beinning March 18, 2014

- Discretionary Denial of Payment for New Medicare and Medicaid Admissions, effective April 29, 2014 (42 CFR 488.417 (b))

- Discretionary termination of your facility's provider agreement, effective August 18, 2014 (42 CFR 488.412 and 488.456)

Also, the CMS Region V Office notified you in their letter of April 11, 2014, in accordance with Federal law, as specified in the Act at Section 1819(f)(2)(B)(iii)(I)(b) and 1919(f)(2)(B)(iii)(I)(b), your facility is prohibited from conducting Nursing Aide Training and/or Competency Evaluation Programs (NATCEP) for two years from March 18, 2014.

This was based on the deficiencies cited by this Department for an extended survey completed on March 18, 2014. The most serious deficiencies were found to be a pattern of deficiencies that constituted immediate jeopardy (Level K) whereby corrections were required.

On May 13, 2014, the Minnesota Department of Health and on May 1, 2014, the Minnesota Department

of Public Safety completed a Post Certification Revisit (PCR) to verify that your facility had achieved and maintained compliance with federal certification deficiencies issued pursuant to an extended survey, completed on March 18, 2014. Based on the Department of Health revisit, we identified conditions of both substandard quality of care (SQC) and immediate jeopardy (IJ) to resident health or safety, and determined that your facility had not corrected the deficiencies issued pursuant to our extended survey, completed on March 18, 2014. In addition, at the time of the exit on May 13, 2014 the immediate jeopardy situation had not been removed. As a result of the revisit findings, we notified you on June 2, 2014 that the Category 1 remedy of state monitoring would remain in effect.

On May 21, 2014, the Minnesota Department of Health completed a second PCR to verify that the immediate jeopardy situation identified at the time of the May 13, 2014 PCR had been removed. Based on our May 21, 2014 revisit, we have determined that your facility has not obtained substantial compliance with the deficiencies issued pursuant to our PCR, completed on May 13, 2014 but that the immediate jeopardy situation involving F224, F323 and F490 had been removed as of May 21, 2014. The deficiencies not corrected are as follows:

F0157 -- S/S: D -- 483.10(b)(11) -- Notify Of Changes (injury/decline/room, Etc)
F0221 -- S/S: D -- 483.13(a) -- Right To Be Free From Physical Restraints
F0223 -- S/S: D -- 483.13(b), 483.13(c)(1)(i) -- Free From Abuse/involuntary Seclusion
F0225 -- S/S: E -- 483.13(c)(1)(ii)-(iii), (c)(2) - (4) -- Investigate/report Allegations/individuals
F0226 -- S/S: E -- 483.13(c) -- Develop/implment Abuse/neglect, Etc Policies
F0250 -- S/S: H -- 483.15(g)(1) -- Provision Of Medically Related Social Service
F0275 -- S/S: D -- 483.20(b)(2)(iii) -- Comprehensive Assess At Least Every 12 Months
F0280 -- S/S: D -- 483.20(d)(3), 483.10(k)(2) -- Right To Participate Planning Care-Revise Cp
F0282 -- S/S: D -- 483.20(k)(3)(ii) -- Services By Qualified Persons/per Care Plan
F0309 -- S/S: D -- 483.25 -- Provide Care/services For Highest Well Being
F0314 -- S/S: D -- 483.25(c) -- Treatment/svcs To Prevent/heal Pressure Sores
F0319 -- S/S: D -- 483.25(f)(1) -- Tx/svc For Mental/psychosocial Difficulties
F0323 -- S/S: H -- 483.25(h) -- Free Of Accident Hazards/supervision/devices
F0329 -- S/S: E -- 483.25(l) -- Drug Regimen Is Free From Unnecessary Drugs
F0353 -- S/S: F -- 483.30(a) -- Sufficient 24-Hr Nursing Staff Per Care Plans
F0412 -- S/S: D -- 483.55(b) -- Routine/emergency Dental Services In Nfs
F0428 -- S/S: E -- 483.60(c) -- Drug Regimen Review, Report Irregular, Act On
F0431 -- S/S: E -- 483.60(b), (d), (e) -- Drug Records, Label/store Drugs & Biologicals
F0465 -- S/S: E -- 483.70(h) -- Safe/functional/sanitary/comfortable Environ
F0490 -- S/S: F -- 483.75 -- Effective Administration/resident Well-Being
F0493 -- S/S: F -- 483.75(d)(1)-(2) -- Governing Body-Facility Policies/appoint Admn
F0497 -- S/S: C -- 483.75(e)(8) -- Nurse Aide Perform Review-12 Hr/yr Inservice
F0500 -- S/S: D -- 483.75(h) -- Outside Professional Resources-Arrange/agrmnt
F0514 -- S/S: E -- 483.75(l)(1) -- Res Records-Complete/accurate/accessible
F0520 -- S/S: F -- 483.75(o)(1) -- Qaa Committee-Members/meet Quarterly/plans

In addition, at the time of this revisit, we identified the following new deficiencies:

F0224 -- S/S: J -- 483.13(c) -- Prohibit Mistreatment/neglect/misappropriatn

F0274 -- S/S: D -- 483.20(b)(2)(ii) -- Comprehensive Assess After Significant Change
F0469 -- S/S: D -- 483.70(h)(4) -- Maintains Effective Pest Control Program
F0492 -- S/S: E -- 483.75(b) -- Comply With Federal/state/local Laws/prof Std
F0499 -- S/S: D -- 483.75(g) -- Employ Qualified Ft/pt/consult Professionals
F0502 -- S/S: D -- 483.75(j)(1) -- Administration

The most serious deficiencies in your facility at the May 21, 2014 revisit were found to be a pattern of deficiencies that constituted immediate jeopardy (Level K), as evidenced by the attached CMS-2567, whereby corrections are required.

As a result of the revisit findings, the Category 1 remedy of state monitoring will remain in effect.

In addition, this Department recommended to the CMS Region V Office the following actions related to the imposed remedies in their letter of April 11, 2014:

- Federal Civil Money Penalty of $6,300.00 per day for nine (9) days beginning March 9, 2014 and continuing through March 17, 2014 for a total of $56,700.00 remain in effect

- Federal Civil Money Penalty of $250.00 per day beginning March 18, 2014 remain in effect until the facility attains substantial compliance

- Discretionary Denial of Payment for New Medicare and Medicaid Admissions, effective April 29, 2014 remain in effect

- Discretionary termination of your facility's provider agreement, effective August 18, 2014 remain in effect

As CMS notified you in their letter of April 11, 2014, in accordance with Federal law, as specified in the Act at Section 1819(f)(2)(B)(iii)(I)(b) and 1919(f)(2)(B)(iii)(I)(b), your facility is prohibited from conducting Nursing Aide Training and/or Competency Evaluation Programs (NATCEP) for two years from March 18, 2014.

Furthermore, we are recommending to the CMS Region V office the following additional remedies for imposition:

- Civil money penalty for the deficiency cited at: F224, at a S/S level of J (at the time of the PCR) (42 CFR 488.430 through 488.444)

- Civil money penalty for the deficiency cited at: F323, at a S/S level of K (at the time of the PCR) (42 CFR 488.430 through 488.444)

- Civil money penalty for the deficiency cited at: F490, at a S/S level of J (at the time of the PCR) (42 CFR 488.430 through 488.444)

Enclosed is a copy of the Statement of Deficiencies (CMS-2567). Please note, it is your responsibility to share the information contained in this letter and the results of this visit with the President of your facility's Governing Body.

This letter provides important information regarding your response to these deficiencies and addresses the following issues:

Removal of Immediate Jeopardy - date the Minnesota Department of Health verified that the conditions resulting in our notification of immediate jeopardy have been removed;

No Opportunity to Correct - the facility will have remedies imposed immediately after a determination of noncompliance has been made;

Remedies - the type of remedies that would remain in effect with the authorization of the Centers for Medicare and Medicaid Services (CMS);

Substandard Quality of Care - means one or more deficiencies related to participation requirements under 42 CFR § 483.13, resident behavior and facility practices, 42 CFR § 483.15, quality of life, or 42 CFR § 483.25, quality of care that constitute either immediate jeopardy to resident health or safety; a pattern of or widespread actual harm that is not immediate jeopardy; or a widespread potential for more than minimal harm, but less than immediate jeopardy, with no actual harm;

Appeal Rights - the facility rights to appeal imposed remedies;

Plan of Correction - when a plan of correction will be due and the information to be contained in that document;

Potential Consequences - the consequences of not attaining substantial compliance 5 months after the survey date; and

Informal Dispute Resolution - your right to request an informal reconsideration to dispute the attached deficiencies.

SUBSTANDARD QUALITY OF CARE

Your facility's deficiencies with §483.13, Resident Behavior and Facility Practices regulations, §483.15, Quality of Life and §483.25, Quality of Care has been determined to constitute substandard quality of care as defined at §488.301. Sections 1819(g)(5)(C) and 1919(g)(5)(C) of the Social Security Act and 42 CFR 488.325(h) require that the attending physician of each resident who was found to have received substandard quality of care, as well as the State board responsible for licensing the facility's administrator, be notified of the substandard quality of care. **If you have not already provided the following information, you are required to provide to this agency within ten working days of your receipt of this letter the name and address of the attending physician of each resident found**

to have received substandard quality of care.
Please note that, in accordance with 42 CFR 488.325(g), your failure to provide this information timely will result in termination of participation in the Medicare and/or Medicaid program(s) or imposition of alternative remedies.

APPEAL RIGHTS

Pursuant to the Federal regulations at 42 CFR Sections 498.3(b)(13)(2) and 498.3(b)(15), a finding of substandard quality of care that leads to the loss of approval by a Skilled Nursing Facility (SNF) of its NATCEP is an initial determination. In accordance with 42 CFR part 489 a provider dissatisfied with an initial determination is entitled to an appeal. If you disagree with the findings of substandard quality of care which resulted in the conduct of an extended survey and the subsequent loss of approval to conduct or be a site for a NATCEP, you or your legal representative may request a hearing before an administrative law judge of the Department of Health and Human Services, Department Appeals Board. Procedures governing this process are set out in Federal regulations at 42 CFR Section 498.40, et. Seq. A written request for a hearing must be filed no later than 60 days from the date of receipt of this letter. Such a request may be made to the Centers for Medicare and Medicaid Services (formerly Health Care Financing Administration) at the following address:

Department of Health and Human Services
Departmental Appeals Board, MS 6132
Civil Remedies Division
Attention: Karen R. Robinson, Director
330 Independence Avenue, SW
Cohen Building, Room G-644
Washington, DC 20201

A request for a hearing should identify the specific issues and the findings of fact and conclusions of law with which you disagree. It should also specify the basis for contending that the findings and conclusions are incorrect. You do not need to submit records or other documents with your hearing request. The Departmental Appeals Board (DAB) will issue instructions regarding the proper submittal of documents for the hearing. The DAB will also set the location for the hearing, which is likely to be in Minnesota or in Chicago, Illinois. You may be represented by counsel at a hearing at your own expense.

DEPARTMENT CONTACT

Questions regarding this letter and all documents submitted as a response to the resident care deficiencies (those preceded by a "F" tag), i.e., the plan of correction should be directed to:

Gloria Derfus, Unit Supervisor
Minnesota Department of Health

P.O. Box 64900
St. Paul, Minnesota 55164-0900

Telephone: (651) 201-3792
Fax: (651) 201-3790

PLAN OF CORRECTION (PoC)

A PoC for the deficiencies must be submitted within **ten calendar days** of your receipt of this letter. Your PoC must:

- Address how corrective action will be accomplished for those residents found to have been affected by the deficient practice;

- Address how the facility will identify other residents having the potential to be affected by the same deficient practice;

- Address what measures will be put into place or systemic changes made to ensure that the deficient practice will not recur;

- Indicate how the facility plans to monitor its performance to make sure that solutions are sustained. The facility must develop a plan for ensuring that correction is achieved and sustained. This plan must be implemented, and the corrective action evaluated for its effectiveness. The plan of correction is integrated into the quality assurance system;

- Include dates when corrective action will be completed. The corrective action completion dates must be acceptable to the State. If the plan of correction is unacceptable for any reason, the State will notify the facility. If the plan of correction is acceptable, the State will notify the facility. Facilities should be cautioned that they are ultimately accountable for their own compliance, and that responsibility is not alleviated in cases where notification about the acceptability of their plan of correction is not made timely. The plan of correction will serve as the facility's allegation of compliance; and,

- Include signature of provider and date.

The state agency may, in lieu of a revisit, determine correction and compliance by accepting the facility's PoC if the PoC is reasonable, addresses the problem and provides evidence that the corrective action has occurred.

If an acceptable PoC is not received within 10 calendar days from the receipt of this letter, we will recommend to the CMS Region V Office that one or more of the following remedies be imposed:

• Optional denial of payment for new Medicare and Medicaid admissions (42 CFR 488.417 (a));

- Per day civil money penalty (42 CFR 488.430 through 488.444).

Failure to submit an acceptable PoC could also result in the termination of your facility's Medicare and/or Medicaid agreement.

PRESUMPTION OF COMPLIANCE - CREDIBLE ALLEGATION OF COMPLIANCE

The facility's PoC will serve as your allegation of compliance upon the Department's acceptance. In order for your allegation of compliance to be acceptable to the Department, the PoC must meet the criteria listed in the plan of correction section above. You will be notified by the Minnesota Department of Health, Licensing and Certification Program staff and/or the Department of Public Safety, State Fire Marshal Division staff, if your PoC for their respective deficiencies (if any) is acceptable.

VERIFICATION OF SUBSTANTIAL COMPLIANCE

Upon receipt of an acceptable PoC and CMS Region V Office approval, a revisit of your facility may be conducted to verify that substantial compliance with the regulations has been attained. The revisit would occur after the date you identified that compliance was achieved in your plan of correction.

If substantial compliance has been achieved, certification of your facility in the Medicare and/or Medicaid program(s) will be continued and we will recommend that the remedies imposed be discontinued effective the date of the on-site verification. Compliance is certified as of the date of the third revisit.

FAILURE TO ACHIEVE SUBSTANTIAL COMPLIANCE BY THE SIXTH MONTH AFTER THE LAST DAY OF THE SURVEY

We will also recommend to the CMS Region V Office and/or the Minnesota Department of Human Services that your provider agreement be terminated by September 18, 2014 (six months after the identification of noncompliance) if your facility does not achieve substantial compliance. This action is mandated by the Social Security Act at Sections 1819(h)(2)(C) and 1919(h)(3)(D) and Federal regulations at 42 CFR Sections 488.412 and 488.456.

INFORMAL DISPUTE RESOLUTION

In accordance with 42 CFR 488.331, you have one opportunity to question cited deficiencies through an informal dispute resolution process. You are required to send your written request, along with the specific deficiencies being disputed, and an explanation of why you are disputing those deficiencies, to:

Nursing Home Informal Dispute Process
Minnesota Department of Health

Division of Compliance Monitoring
P.O. Box 64900
St. Paul, Minnesota 55164-0900

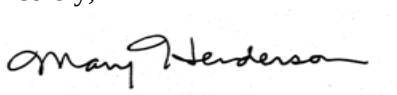
This request must be sent within the same ten days you have for submitting a PoC for the cited deficiencies. All requests for an IDR or IIDR of federal deficiencies must be submitted via the web at: http://www.health.state.mn.us/divs/fpc/profinfo/ltc/ltc_idr.cfm

You must notify MDH at this website of your request for an IDR or IIDR within the 10 calendar day period allotted for submitting an acceptable plan of correction. A copy of the Department's informal dispute resolution policies are posted on the MDH Information Bulletin website at: http://www.health.state.mn.us/divs/fpc/profinfo/infobul.htm

Please note that the failure to complete the informal dispute resolution process will not delay the dates specified for compliance or the imposition of remedies.

Feel free to contact me if you have questions about this letter.

Sincerely,



Mary Henderson, Program Assurance Supervisor
Minnesota Department of Health
Compliance Monitoring Division

Re: Camden Care Center

Dear Ms. Derfus:

Attached please find Camden Care Center's credible allegation of compliance for the survey exit date of May 21, 2014. The plan of correction being submitted is the same plan of correction being submitted for survey exit date of May 13, 2014. You can reach me with any questions or concerns at 612-529-7747 x201 or leah.smith@pathwayhealth.com . Thank you in advance for your consideration.

Respectfully submitted,

Leah Killian-Smith
Interim Executive Director

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (EACH DEFICIENCY MUST BE PRECEDED BY FULL REGULATORY OR LSC IDENTIFYING INFORMATION)	ID PREFIX TAG	PROVIDER'S PLAN OF CORRECTION (EACH CORRECTIVE ACTION SHOULD BE CROSS-REFERENCED TO THE APPROPRIATE DEFICIENCY)	(X5) COMPLETION DATE
{F 000}	INITIAL COMMENTS This revisit was conducted only to verify removal of the immediate jeopardy (s) at F224, F323 and F490 which were cited during a federal revisit survey exited on 5/13/14. As a result of this revisit, it was determined that the immediate jeopardy (s) at F224, F323 and F490 were removed on 5/21/14. Although the immediate jeopardy (s) was removed, substantial non-compliance remains at F224 at a s/s of G level; substantial non-compliance remains at F323 at a s/s of H; substantial non-compliance remains at F490 at a s/s of F. Only deficiencies that were cited at the immediate jeopardy level were reviewed during this survey. Thus, all other deficiencies from the 5/13/14, federal revisit survey remain as written on the 5/13/14, statement of deficiencies.	{F 000} MM/MK 06/24/14		
{F 157} SS=D	483.10(b)(11) NOTIFY OF CHANGES (INJURY/DECLINE/ROOM, ETC) A facility must immediately inform the resident; consult with the resident's physician; and if known, notify the resident's legal representative or an interested family member when there is an accident involving the resident which results in injury and has the potential for requiring physician intervention; a significant change in the resident's physical, mental, or psychosocial status (i.e., a deterioration in health, mental, or psychosocial status in either life threatening conditions or clinical complications); a need to alter treatment significantly (i.e., a need to discontinue an existing form of treatment due to adverse consequences, or to commence a new form of treatment); or a decision to transfer or discharge the resident from the facility as specified in §483.12(a).	{F 157}		7/6/14

{F 157}	Continued From page 1	{F 157}		

The facility must also promptly notify the resident and, if known, the resident's legal representative or interested family member when there is a change in room or roommate assignment as specified in §483.15(e)(2); or a change in resident rights under Federal or State law or regulations as specified in paragraph (b)(1) of this section.

The facility must record and periodically update the address and phone number of the resident's legal representative or interested family member.

This REQUIREMENT is not met as evidenced by:
Based on observation, interview and document review, the facility failed to ensure the physician and family member(s) was promptly notified for 1 of 1 resident (R13) observed to elope from the building during the survey on 5/6/14.

Findings include:

On 5/5/14, and 5/6/14, R13 was observed to be allowed to leave the facility unescorted to smoke in the designated smoking area. Although R13 had a WanderGuard applied, the WanderGuard alarm was disabled when R13 exited the building. On 5/6/14, at 4:45 p.m. R13 was observed to have eloped from the facility and was observed on the city sidewalk by the surveyor.

Upon arrival to the facility on 5/5/14, at 1:35 p.m. R13 was observed to be out on the designated smoking area with four other residents and two facility staff. R13 was observed to be in a wheelchair with a half lap tray on the left side of

{F 157}	Continued From page 2 the wheelchair. R13 was observed to be smoking a cigarette independently. On 5/6/14, at 8:30 a.m. R13 was observed to wheel independently to the front door. A chirping sound was heard and R13 was observed to exit the facility and wheel herself backwards to the smoking patio. No staff escorted her. Seven residents were observed to be in the designated smoking area. R13 wheeled to the table under the arbor, was assisted to light a cigarette by the smoking monitor and smoked independently. - At 8:33 a.m. R13 remained on the smoking patio with four other residents smoking. - At 8:46 a.m. R13 extinguished her cigarette appropriately and wheeled herself back into the facility. A loud beeping noise was heard as R13 entered the facility. The sound was immediately silenced to a slight chirping sound. R13 wheeled into the facility and down the hallway. No staff escorted her. - At approximately 11:00 a.m. R13 was randomly observed to be smoking in the designated smoking area, a male staff was observed to be monitoring the smokers. R13 was observed to finish smoking her cigarette at approximately 11:20 a.m. and wheel herself into the facility unescorted. The smoking monitor did not assist. A quiet chirping noise was heard as R13 entered the building. -At 4:45 p.m. R13 was observed by the surveyor to be at the end of the driveway in her wheelchair using her feet to propel the wheelchair towards 49th Avenue North. R13 turned left upon reaching the sidewalk and began wheeling herself with difficulty towards 6th street. After a few feet, R13 made a U-turn and began pushing herself backwards down the sidewalk. The street was observed to be busy with multiple cars driving	{F 157}

{F 157}	Continued From page 3	{F 157}		

rapidly (posted speed limit was 30 miles per hour). The smoking monitor was observed to be behind a pillar with his back to the street and R13.
- At 4:46 p.m. the front desk monitor (O)-C was notified by the surveyor that R13 had been observed on the city sidewalks. O-C verified R13 "could not" be on the sidewalk near the street unsupervised and immediately ran outside to R13. When O-C reached the resident, R13 was approximately 20 feet past the end of the driveway and half way to 6th street, wheeling backwards on the sidewalk facing oncoming traffic. O-C was observed to speak with R13 and after several minutes, assisted her to wheel back to the facility. O-C could be heard to tell the smoking monitor to watch for residents eloping. O-C returned R13 to the facility.

R13's Diagnosis Report dated 2/4/09, identified diagnoses to include hemiplegia affecting the dominant side, depressive disorder and cognitive deficits due to cerebrovascular disease.

The Vulnerable Adult Assessment dated 6/24/13, identified R13 had a history of wandering into other resident's rooms, history of unsafe smoking and taking other peoples' belongings. The assessment identified R13 had cognitive deficits, short-term memory loss, impaired decision making and poor judgment. In addition, the assessment indicated R13 was required to have supervised LOAs (Leave of Absences) only, and that R13 had a past history of drug abuse.

A LOA Safety Assessment dated 6/24/13, identified R13 had cognitive impairments related to dementia, and that the resident was unable to leave the facility unsupervised.

{F 157}	Continued From page 4	{F 157}		

A Camden Care Center Care Conference form dated 10/1/13, included; "[R13] propels herself independently in a wheelchair to all destinations within the building - at times she will propel herself backwards and needs frequent reminders to not do this. She has a history of wandering from the facility and thus wears a WanderGuard to alert staff if she attempts to leave the building. She also has a history of wandering into other resident rooms and taking their belongings, which can cause other residents to become frustrated with her so she needs frequent redirection."

The Nursing Assessment Packet Review for the reference period 3/19 through 3/25/14, included a safety Risk (Fall) Assessment dated 3/19/14. The assessments did not address or review the need for a WanderGuard.

R13's quarterly Minimum Data Set (MDS) dated 3/25/14, indicated R13 was cognitively intact, was identified to have no behavior problems, and required extensive assistance with activities of daily living (ADLs).

A Care Conference summary dated 4/10/14, and another Care Conference form (undated) did not address R13's use of a WanderGuard or elopement risk.

R13's Physician's Order Sheet dated 4/16/14, directed to check R13's WanderGuard every shift beginning 9/19/13.

The Behavior Monitoring Documentation form (undated) identified R13's target behavior was, "Wandering into other resident rooms" and indicated appropriate interventions such as assist

{F 157}	Continued From page 5 resident to attend activities, assist resident to the bathroom if needed, anticipate needs, visit with resident if she needs help. Dated as reviewed last on 4/23 (no year). R13's Vulnerable Adult care plan dated 4/28/14, indicated R13 had a history of elopement. The goal identified R13 would remain safe at Camden Care Center. An intervention dated 10/7/11, indicated, "WanderGuard in place." An intervention dated as initiated 3/16/12, directed, "Resident has been assessed and may not leave this facility without supervision." An undated Group 5 assignment sheet (a form carried by nursing assistant staff for quick reference to care plan needs) identified R13 had a WanderGuard. The clinical record lacked evidence R13's elopement was documented including date, time, location, and those involved. The clinical record lacked evidence R13 was evaluated for elopement risk after being found to elope, or R13's physician was notified at the time of the incident. The clinical record lacked evidence the administrator or State agency were notified of the incident. In addition, the clinical record lacked evidence the elopement was thoroughly investigated, including interview with staff present at the time of the elopement. A nursing progress note for R13 written by administration on 5/8/14, at 9:04 a.m., "Report received that the resident attempted to leave the facility on Tuesday May 6 around 4 p.m. trying to get to her son, resident was found by the receptionist on the sidewalk, redirected back into the facility. Resident has her WanderGuard on.	{F 157}

{F 157}	Continued From page 6 The receptionist [O-C] reported that the she reminded the resident that resident cannot leave the facility unsupervised; receptionist was educated that when residents with WanderGuard would like to get out of the building to smoke, the smoke monitor should be alerted. Son and daughter notified. Message left to NPs [nurse practitioner] voicemail to update on resident." Although the note indicated a message had been left for the NP, the NP and family member(s) were not called until three days after the incident. On 5/9/14, at 11:00 a.m. R13 was observed to wheel herself backwards out of the facility through the front entrance. The WanderGuard did not sound. O-C was observed to be at the front desk and was observed to reach to the right. O-C verified she reached to silence the alarm for the WanderGuard. R13 was observed to exit the facility without staff and wheel without staff to the designated smoking area. - At approximately 11:25 a.m. R13 was observed to wheel herself out of the designated smoking area, push the handicapped switch to open both doors and wheel herself backwards into the facility. O-C was observed to silence the WanderGuard alarm (reach down to activate switch). R13 wheeled herself backwards down the hallway into the facility. At the time of the observation, O-C stated she disabled the WanderGuard alarm for residents who wanted to smoke in the designated smoking area. At no time during the observation, did O-C alert the smoking monitor or staff of R13 leaving the building. On 5/9/14, at 1:11 p.m. registered nurse (RN)-C stated she was in the room when O-C had reported R13 had eloped. RN-C stated the	{F 157}

{F 221}	Continued From page 8 When asked why the W/C brake was locked, NA-V stated "we lock one brake," and verified the left brake was unlocked. NA-V explained "brakes" needed to be locked "to protect her [R89]." NA-V further explained R89 needed to protect from "falling." NA-V was unclear why the left brake was left unlocked. The right side of the W/C was observed to be flush to the table. During the observation, R89 was observed to stand repeatedly, had worried expression on her face and repeated in an anxious voice, "I gotta go!" On 5/8/14, at approximately 8:30 a.m. R89 was observed to be at the dining room table in the same location. R89 was observed to have both W/C brakes locked; the anti-rollback device remained appropriately applied to the W/C. R89 attempted to stand multiple times, appeared worried when standing, then immediately sat back down. - From 8:30 a.m. until 9:40 a.m. R89 remained at the breakfast meal. NA-V was observed to provide R89 her breakfast, set up the breakfast and sit directly next to R89 and assist her to eat. At no time were W/C brakes unlocked. R89 was observed to stand repeatedly throughout the meal, pushing back slightly with her legs as she stood. The W/C was flush to the top of the table, preventing R89 from leaving the table. The Admission Nursing Assessment dated 12/23/13, identified R89 had no visual, or hearing impairments, and she was alert to person, place, family and self only. The assessment identified "right side weakness." Although the assessment identified R89 arrived to the facility in a wheelchair, the assessment did not identify the use of a W/C and had "N/A [non-applicable]" written by hand in the section. Review of the	{F 221}

{F 221}	Continued From page 9 clinical record lacked evidence R89 was assessed for restraints. R89's admission Minimum Data Set (MDS) dated 12/28/13, indicated R89 was never or rarely understood had short and long-term memory problems and R89 had moderately impaired decision making ability. The MDS identified R89 had hallucinations, delusions, and other behavior concerns towards others. The MDS indicated R89 required limited physical assistance from staff to walk; extensive physical assistance from staff for transferring, bed mobility, locomotion and toilet use. The MDS identified R89 did not have steady balance when attempting to move from seated to standing position and R89 had impairment of the lower extremity on one side. The MDS did not identify R89 used a restraint. The Care Area Assessment (CAA) for activities of daily living (ADLs) Function/Rehabilitation Potential dated 1/3/14, identified R89's diagnoses to include altered mental status, cognitive impairment and weakness. The CAA identified R89 required staff assistance for ADLs, had no pain concerns, had a history of falls (but no falls in the facility) and was incontinent of bowel and bladder. The CAA for behaviors dated 1/3/14, indicated, "Resident exhibits behavioral symptoms and is cognitively not alert and orient [sic] when writer attempted to assess her. SS [social services] will care plan this matter accordingly." The CAA for falls, also dated 1/3/14, recapitulated the same information as the ADL CAA. The Admission Record dated 1/23/14, identified R89 had diagnoses to include difficulty walking, essential hypertension and Picks disease.	{F 221}

{F 221}	Continued From page 10 The clinical record lacked evidence R89 had been assessed for restraint use, including locked W/C brakes and having the W/C pushed flush to the table. R89's care plan dated as last reviewed on 3/28/14, identified R89 was at risk for falls related to confusion, dementia, psychotropic drug use and Picks disease. The care plan directed to provide a "safe environment for the resident." The care plan did not identify or direct to lock R89's brakes, did not identify the use of a restraint and did not include direction to place R89 against a desk or table. The care plan was updated on 4/30/14, to include, "Anti-roll back brakes installed onto wheelchair to prohibit wheelchair from rolling backwards when resident offloads independently. Least restrictive safety device while in wheelchair." On 5/12/14, at 9:24 a.m. the licensed practical nurse (LPN)-E stated R89 "was not restrained" and stated "anti-rollback brakes were placed on the wheelchair." LPN-E stated R89's W/C was "looked at by therapies" and therapies had assessed R89 for the use of the anti-rollbacks on the W/C. LPN-E was unclear whether the locking of R89's W/C brakes had been assessed as a form of restraint. - At 9:28 a.m. LPN-E stated the therapy department had only made a "recommendation" and since R89 was not on the therapy case load, they "didn't document the evaluation." LPN stated direct care staff had been "educated" not to lock R89's brakes or restrain her against a desk or table. LPN-E verified if R89 was directly supervised by a staff person, the W/C brakes should not have been locked.	{F 221}

{F 221}	Continued From page 11 On 5/12/14, at 9:44 a.m. the director of nursing (DON) verified R89 should have been assessed for the use of anti-rollbacks and the use of potential restraints, such as having both brakes locked and the W/C pushed flush to a table. DON repeatedly stated he thought "physical therapy assessed the use of the anti-rollbacks" but was unclear if R89 was assessed for restraints. DON verified therapy assessments should have been documented in R89's clinical record. On 5/12/14, at 12:28 p.m. the physical therapy assistant and rehab manager (PTA), occupational therapist (OT), and physical therapist (PT) were interviewed together in the therapy gym. All denied having assessed R89 for the use of the anti-rollbacks, W/C brake locking, or restraints. PTA stated the anti-rollbacks had been an idea that had been "brought up" in the morning meeting as "a way to keep her [R89] safe without locking the brakes." The OT stated therapy staff had "helped maintenance order the device," and stated since maintenance had not seen the device before, therapy staff had assisted him to "apply it." The PT stated no therapy staff had actually assessed R89 because there was no "physician's order" and because R89 "was not on case load." All therapists verified they would not "assess" a resident without a physician's order and stated they were unclear when they should "get involved." All verified they were employees of Videll Healthcare Limited Liability Company (LLC), but then stated, "The facility doesn't have polices to let us know our responsibilities." On 5/12/14, at 12:23 p.m. R89 was observed to be in her W/C at the lunch meal. NA-V was observed seated directly to the left of R89. NA-V	{F 221}

{F 221}	Continued From page 12	{F 221}		

was interacting with R89 before the meal. R89 was observed to have the W/C pushed up flush against the table and both W/C brakes were observed to be locked which caused R89 to be restrained. The left anti-rollback arm was observed to be twisted off R89's left W/C tire (rendering the anti-rollback ineffective). The surveyor alerted NA-V to the anti-rollback being ineffective.
- At 12:26 p.m. R89 was observed to be provided her meal. NA-V setup the meal and remained with R89. R89 was observed to remain in the dining room throughout the meal with the brakes locked. NA-V sat next to R89 until approximately 1:20 p.m. NA-V then unlocked both brakes and wheeled R89 away from the table and into the activity room on the South unit.

On 5/13/14, at 9:03 a.m. LPN-E verified R89 should not have been restrained at the table while supervised during the meal.

The facility's Restrictive Device Management Policy dated as reviewed 5/2013, identified residents should be assessed for the need for a restrictive device during the admission process and identified restrictive devices such as a lap buddy and non-releasing seat belt. The policy did not identify other potential restrictive devices, such as the practice of locking a resident's W/C brakes, seating a resident up against a table or denying access to parts of the resident's body. The policy identified the "least restrictive" device should be used and identified a care plan should be developed by the interdisciplinary team to address the device. The policy indicated the DON or designee was responsible for ensuring residents were assessed for restrictive devices and for ensuring the device was checked each

{F 223}	Continued From page 14 indicated R34 did not have delusions or hallucinations. The Cognitive Loss/Dementia Care Area Assessment (CAA) dated 4/3/14, lacked a summary regarding R34's cognitive status. A Vulnerable Adult Assessment date 3/18/14, indicated R36 was verbally abusive and condescending towards others. A Vulnerable Adult Assessment dated 4/4/13, indicated R34 had behaviors which made her susceptible to abuse by others. A Social Service Note dated 4/17/14, indicated R34 had reported on 4/15/14, R36 was verbally abusive towards her. The note indicated when R36 was interviewed on 4/16/14, he stated he calls R34 "a parasite every time I see her because that is what she is." The note indicated R36 was told calling other residents names was verbal abuse and verbal abuse was not tolerated. A Progress Notes dated 4/17/14, indicated the contracted licensed social worker (CLSW) met with R34 on 4/16/14, and R34 indicated R36 "calls her every name in the book, he is just mean." A Progress Notes dated 4/17/14, indicated social services met with R36 and R36 stated he was going to "do what he wants" and would continue to call R34 a parasite. R36 was informed calling R34 names was verbal abuse and R36 responded "I don't care." The Admission Record dated 4/28/14, indicated R34 was admitted to the facility on 3/28/13, with	{F 223}

{F 223}	Continued From page 15 diagnoses which included dementia and depressive disorder. A copy of an Incident/Accident Report dated 5/5/14, was provided on 5/8/14. The Incident/Accident Report indicated R34 had reported R36 had pushed her into a patio chair and R34 had become stuck when the patio chair fell over. It was noted the incident had occurred on 5/4/14, at night with no exact time. R36 was noted to have denied the incident; the police were called and spoke with R34. On 5/7/14, at 3:10 p.m. a copy of the facility investigation was requested. The Incident/Accident Report lacked any additional investigation into the incident. A Progress Note dated 5/9/14, indicated R34 reported she did not like R36 because "he is an old drunk." The note indicated R34 had agreed to stay away from R36 and that R34 had stated she was used to handling old drunks, and had showed staff an old scar she reported was from when her late husband broke her leg. When interviewed on 5/7/14, at 2:41 p.m. R34 stated R36 called her names "all the time." When asked how being called names made her feel, R34 stated she had filed a police report because R36 had "assaulted her" two nights ago. When asked what she meant by assaulted, R34 stated R36 waited until nobody was around and then pushed her. R34 reported the director of operations helped her file a police report. Review of the medical records for R34 and R36, lacked documentation regarding the incident which was allegedly reported on 5/5/14, and lacked indication of how R34 would be protected from R36.	{F 223}

When interviewed on 5/7/14, at 3:10 p.m. the director of operations reported he was aware of the incident which had occurred during the evening of 5/5/14, and confirmed he'd helped R34 call the police. During the interview, the administrator stated he was aware of the incident and that it had been reported to him on 5/6/14. The administrator reported R34 and R36 "spar all the time."

Upon interview on 5/8/14, at 11:36 a.m. the director of nursing (DON) reported he had received the Incident/Accident Report on 5/8/14. The DON stated he was not sure whether the incident was reportable because it had occurred on 5/5/14, and it was a "resident to resident altercation."

The director of operations was interviewed on 5/12/14, at 9:20 a.m. and stated R34 was very upset about the incident from 5/5/14, and had wanted the police called because it was not the first time, and that R34 had felt assaulted and wanted to press charges.

Upon interview on 5/12/14, at 9:24 a.m. the administrator stated the incident on 5/5/14, had been reported to the state agency and that he would provide documentation regarding the report made.

R34 was interviewed on 5/12/14, at 1:31 p.m., R34 stated R36 was abusive to her every day but that she'd heard he had gotten sent to another nursing home. R34 stated she felt what R36 was doing to her was both verbal and physical abuse.

When interviewed on 5/12/14, at 1:52 p.m. the administrator and consultant administrator

reported R34 and R36 have had an ongoing fight going on. The administrator stated R34 and R36 allege physical things and then change their stories. The consultant administrator stated that although the police had been called regarding the incident on 5/5/14, R36 had denied it happened and R34 had no visible injuries noted. The administrator stated when allegations of abuse are made, an incident report was to be filled out and a supervisor consulted to determine whether a report was needed. The administrator said the residents would be separated, an assessment would be made, the incident would be reported to the Common Entry Point (CEP) if appropriate, would be presented at their stand-up meeting the next day, and an investigation would be started. The administrator stated incidents were reported to the administrator, DON or CLSW but verified, "that system has not always been working." The administrator stated the incident form 5/5/14, had not been reported to the State Agency (SA) or to the CEP and acknowledged things needed to be reported right away and then investigated.

Minneapolis Police Department officer (MPD)-E was interviewed on 5/12/14, at 3:38 p.m. and confirmed the police department had come to the facility regarding the incident between R34 and R36 on 5/5/14. MPD-E stated the facility was aware the residents called each other names and stated it was a facility problem.

The facility Prohibition of Abuse, Neglect, Mistreatment, and Misappropriation of Resident Property policy dated May 2012, indicated staff must not permit "anyone" to engage in verbal or physical abuse. The policy indicated the facility would implement policies and procedures to ensure that residents are not subjected to abuse

supervision to residents who had a known history of drug and alcohol use resulting in medical treatment, including hospitalization, for 2 of 11 residents (R37, R129) reviewed. In addition, the facility failed to implement adequate interventions to prevent elopements for 1 of 3 residents (R116) who eloped from the facility with a WanderGuard (a system to alert staff when a resident leaves the facility) in place. This lack of supervision caused an immediate jeopardy situation for R37, R129 and R116. The IJ was not removed by exit of the 5/13/14 survey.

Findings include:

The following deficiency was cited during a revisit conducted on 5/13/14, and was the basis for an IJ to resident's health and safety.

On 5/9/14, the facility had been informed of serious and immediate safety of the residents related to lack of adequate supervision for alleged drug and alcohol use and elopement. Although, the facility was aware of the serious implications on 5/9/14, the facility did not identify and implement interventions to protect the residents from potential harm. On 5/10/14 and 5/11/14, two residents were hospitalized for drug and alcohol abuse. In addition, on 5/11/14, one resident had eloped from the facility three times with a WanderGuard on and no staff were present.

R37's Admission Record dated 1/14/14, indicated R37 was admitted to the facility on 9/19/13, with diagnoses which included altered mental status, and personal history of alcoholism. According to documented progress notes, R37 had been found with ETOH/vodka on 2/21/14, 2/22/14, 2/27/14,

The record also indicated R37 had required hospitalizations related to the use of alcohol and or drugs on 2/22/14, 4/23/14, and 5/10/14. During observations of R37 the following was observed: -On 5/5/14, at 2:53 p.m. R37 was observed approaching a white minivan parked in front of the facility. - On 5/6/14, at 1:30 p.m. R37 was observed staggering down the hallway with the health unit coordinator (HUC) and in a loud voice stated he was "crazy". - On 5/6/14, 2:02 p.m. R37 went outside without shoes on. Two staff stopped him at the nursing station and sent him back to his room for shoes. R37 left his room and went directly outside without shoes on again, walked to the smoking patio and returned to the facility. - On 5/7/14, at 8:18 a.m. R37 was observed standing next to R117 on the smoking patio with his wallet out. Another resident (R1) arrived and R37 handed his wallet to her. Surveyor was unable to see whether R1 took anything from the wallet before she handed it back to R37. R37 was observed to lean close to R1 and speak to her and gave her his wallet back. At 8:24 a.m. R1 put R37's wallet back in his left rear pant pocket. - On 5/8/14, at 11:48 a.m. R37 was observed in bed with his back to the door. R37 rolled over and looked at surveyor and rolled back towards the wall. R37 stated he did not want to talk now and would talk in an hour or two. - On 5/8/14, at 3:46 p.m. an attempt was made to interview R37 and he refused. - On 5/9/14, at 7:23 a.m. R37 was observed coming out of his room, stated he did not feel	{F 224}

good and was going to see if there was any coffee. At 7:28 a.m. R37 was observed coming from the West hallway. R37 was then observed to push another resident back down the West hallway and was observed outside room 186 R9. There was no staff with R37 when he was observed. When R37 returned to the nursing station, he told the HUC he had gotten cigarettes from R9. The HUC asked R37 if he was alone and R37 responded that he was and she asked him where his partner was. Nursing assistant (NA)-L approached R37 and stated she was with him today. NA-L verified she was assigned to provide the 1:1 for R37.
- On 5/10/14, at 1:07 p.m. R37 was observed being taken out of the facility to an ambulance.

The Nutritional Status Care Area Assessments (CAAs) dated 9/26/13, indicated R37 was at risk for impaired nutritional status due to chronic ETOH abuse and cirrhosis. Review of the Cognitive Loss/Dementia, Mood State, Behavioral Symptoms and Psychotropic Drug Use CAAs dated 10/7/13, revealed a lack of a summary regarding the triggered areas.

The Progress Notes were reviewed and the following was noted:
- On 5/2/14, R37 removed the WanderGuard (departure alert system) and refused a new one to be placed.
- On 5/3/14, R37 was walking in the hallway "wobbling" and requested staff give him a shower at 3:00 a.m. R37 was unable to maintain his balance and appeared "intoxicated." Two almost empty bottles of vodka were found in his room.
- On 5/5/14, at 3:53 p.m. R37 had exhibited signs of intoxication with an unsteady/staggering gait, slurred speech, odor of alcohol and unkempt

appearance. R37 was noted to have continually gone outside, stated he had called a limousine and was going to Las Vegas.
- On 5/5/14, at 4:56 p.m. R37 had slurred speech, smelled of ETOH and had a staggering gait.
- On 5/5/14, at 10:25 p.m. R37 was "intoxicated" and was found with an almost empty bottle of vodka.
- On 5/6/14, a notation had been made indicating it was a late entry for 5/5/14, at 6:00 p.m., the note indicated R37 was noted walking outside towards the back of the building. R37 was noted to be walking alone with a staggering gait. When approached by staff, R37 stated he was going to Las Vegas. No odor of ETOH was noted and when asked what he had been doing to become so impaired, R37 reported he had gotten cocaine and heroin from another resident and confirmed he had been injecting the drugs. Several scattered purple bruises were noted on his forearms. At 1:55 a.m. indicated R37 reported his heart was thumping out of his chest and was found to have a blood pressure of 168 /118 with a pulse of 118. At 4:37 a.m. indicated R37 exited his room without clothing and had a strong odor of ETOH on his breath. Four empty bottles and one unopened bottle of ETOH were found in R37's room and were removed by staff. Also noted R37 started having tremors and palpitations with increased pulse and blood pressure due to ETOH withdrawal and demanded medications.
- On 5/7/14, at 12:04 p.m. indicated R37 was exhibiting signs and symptoms of intoxication as evidenced by odor of ETOH, unsteady/slow/staggering gait, slurred speech, confusion and unkempt appearance. A pattern of missed pain clinic appointments due to intoxication was noted and indicated further

appointments would not be made due to ongoing intoxication and inability to follow through with appointments. In addition, R37 had a full bottle of vodka and refused to give the bottle to staff. The note indicated the administrator directed if R37 was unwilling to willingly give staff the ETOH bottle, it was ok for the resident to keep the ETOH and if he became drunk or disruptive to call the police and have him taken to detox.
- On 5/8/14, at 3:42 p.m. indicated R37 was placed on one to one (1:1) [to be within arm's length at all times] observation related to incidences of getting intoxicated.
- On 5/9/14, indicated R37 "was clearly intoxicated." An empty pint bottle of vodka was found in his room and was noted as the third empty pint bottle taken from R37's room in a 48 hour span of time.
- On 5/10/14, indicated R37 was observed giving his credit card to R117 on 5/9/14. A second note indicated R37 returned from leave of absence (LOA) accompanied by a friend of another resident (R1). R37 was observed to be shaky and verbalized he was unsteady on his feet. R37 was noted to have shakiness, profuse sweating, and sluggish pupils. R37 was noted to have a blood pressure of 178/130 and a pulse of 120s to 140s.
- On 5/11/14, indicated R37 had a drug screen positive for methadone at the hospital. R37 did not have a prescription for methadone.

The Physician's Orders and Nurse Practitioners (NP) Orders were reviewed and the following was noted:
- On 1/8/14, included a diagnosis of ETOH abuse noted to have also occurred in the facility.
- On 2/5/14, indicated R37 recently had a bottle of ETOH hidden in his pillow case and was noted to smell of ETOH.

{F 224}	Continued From page 25 ordered a behavioral health evaluation for diagnostic evaluation and treatment recommendations for R37. A Physician Visit/Progress Note written by a licensed drug and alcohol counselor (LADC) dated 2/13/14, indicated R37 had been referred for assessment of behavioral health, chemical dependency and pain, and included an order/comment of "strongly recommend a full psychiatric assessment" within 60 days to evaluate medications and therapy. The medical record lacked evidence of the psychiatric assessment having been completed. R37's care plan was reviewed and noted the following: - The vulnerable adult care plan revised on 3/5/14, indicated R37 may leave to go to medical appointments without supervision but was not safe to go on other unsupervised LOAs. - The depression care plan dated 3/11/14, included ETOH abuse and directed to arrange psych services as needed. - A behavioral symptoms care plan revised on 3/16/14, indicated ETOH consumption and concealing ETOH in room with a goal to have fewer episodes of ETOH abuse per week. The interventions included; encourage attending Alcoholics Anonymous (AA) or other substance abuse support programs, assisting with arrangements as needed, may go to medical/dental appointments unsupervised and no other unsupervised LOA. - A risk for elopement related to ETOH abuse and psychoses care plan revised 3/16/14, noted a history of returning to facility after unsupervised LOA displaying signs of ETOH consumption and/or with a supply of ETOH. The goal included	{F 224}

R37 would not to leave facility unattended unless a medical appointment and R37's safety will be maintained. The interventions indicated R37 cut off the WanderGuard and refused to have another one placed and was placed on 15 minute checks. Check room if suspected ETOH.
- A Mood/Behavior care plan initiated on 4/23/14, indicated R37 had a history of ETOH abuse and actively drank at the facility. The care plan noted R37 was sent to detox on 4/23/14, due to being very intoxicated. The goal indicated R37 would like to stop drinking ETOH with an intervention to check room daily for ETOH and check R37 for signs of intoxication.
- An at risk for adverse reaction from medications related to ETOH care plan dated 4/25/14, indicated NP was aware of R37's ETOH use, nursing staff to encourage to restrain from using ETOH and if R37 appeared intoxicated it was ok to administer medications. Another intervention dated 5/8/14, included 1:1 supervision due to ETOH abuse and intoxication.

A Vulnerable Adult Assessment dated 3/16/14, indicated R37 had both past and recent substance abuse, was not safe for unsupervised LOA except to appointments and had significant ETOH use when out on unsupervised LOA.

The quarterly Minimum Data Set (MDS) dated 3/18/14, indicated R37's cognitive skills for daily decision making was independent with consistent/reasonable decisions.

A Resident Refusal of Medical Treatment Form dated 5/5/14, indicated R37 was "wander guarded [sic]" to the facility for resident safety related to history of ETOH abuse, staggering gait and slurred speech. With the risks of refusal

noted as facility wouldn't be aware if R37 left with potential for fall risk and injury off facility grounds with no one to provide aid.

A letter dated 5/10/14, indicated the resident had received a first offense of the facility's smoking policy as R37 reported to staff he had gotten cigarettes from R9.

On 5/8/14, at 11:51 a.m. licensed practical nurse (LPN)-B stated she was aware R37 had a doctor's order and can drink as long as there are no behaviors and if behaviors occur she can call detox. LPN- B stated she did not know where R37 had obtained the ETOH from.

The safety monitor, NA-M was interviewed on 5/8/14, at 11:55 a.m. and stated he has not seen R37 exchange money for ETOH, and stated he has heard about exchanges but could not remember who he'd heard about it from.

The HUC was interviewed on 5/8/14, at 12:15 p.m. and stated "it's a nightmare; [R37] is drunk every day." She stated she had her suspicions about where the ETOH was coming from but when she asked R37 he refused to tell her. The HUC said R37 had told her he had given his credit card to R117 to buy things for him. The HUC stated R37 was drunk every day when she left and was drunk when she came in on 5/8/14. She reported that on 5/5/14, or 5/6/14, she had observed R37 in the parking lot, and had been told there was nothing they could do about it by the facility administrator. She said she'd requested assistance from the operations director to get R37 back in the building. The HUC reported she had requested that the safety monitor put R37 on every 15 minute checks but

{F 224}	Continued From page 28	{F 224}		

knew that was not enough. She stated other residents were on 1:1 for drug use and wanted to know what the facility was going to do to keep R37 safe. The HUC stated "we're not doing [R37] any justice" and "it's a shitty plan to keep people on 1:1 forever."

On 5/10/14, at 1:30 p.m. the administrator stated R37 had been taken to the hospital for delirium tremens (DTs-a severe form of ETOH withdrawal that involves sudden and severe mental or nervous system changes).

On 5/12/14, at 8:59 a.m. registered nurse (RN)-B and licensed practical nurse (LPN)-A stated R37 had gone to the bank with a friend on 5/10/14, and were not sure if the 1:1 had gone to the bank or not and would have to check.

The DON was interviewed on 5/12/14, at 9:05 a.m. and stated a "guy named [friend-A]" who is a friend of R1 went with R37 to the bank. The DON stated both the administrator and the consultant administrator were aware that friend-A was a friend of R1. The DON stated the 1:1 had refused to go to the bank with R37 and that friend-A had signed R37 out. The DON said the consultant administrator had been going to go with R37 and friend-A to the bank until it was decided the facility was not comfortable with her going with to the bank either. The DON stated he had reminded R37 he could not go because he had orders for no LOA and the administrator, consultant administrator and the social worker decided R37 could go anyway. The DON stated he had no idea where R37 had gotten methadone from.

When interviewed on 5/12/14, at 1:35 p.m. contracted licensed social worker (CLSW)-A

{F 224}	Continued From page 29 stated during a room search a quart bottle of ETOH and three plastic containers with the labels removed, which nursing indicated were methadone containers, had been found in R37's room. When interviewed on 5/12/14, at 1:52 p.m. the administrator stated he and CLSW-A were involved in R37's LOA. The administrator stated CLSW-A was under the impression R37 was allowed to go on LOA and that R37 had returned with a card from Walgreens so they knew he had not followed his agreement to only go to the bank. The administrator stated friend-A would not be able to take R37 on LOA again. The administrator stated he was not aware R37 had orders for no LOAs and he believed CLSW-A had not checked the chart. The administrator stated he was also not aware of friend-A's relationship with R1 and stated the DON had not told him about the order for no LOA and friend-A's relationship with R1. Upon interview on 5/13/14, at 8:09 a.m. CLSW-A stated on 5/10/14, prior to R37 having left on LOA, she was told by nursing (she could not remember who) that R37 could leave the facility with supervision. She reported she made it clear to friend-A that R37 could only go to the bank and nowhere else. She stated she told friend-A that R37 would try and talk him into going to the liquor store and that she'd told friend-A that R37 could not go there. CLSW-A said friend-A had reassured her he had been sober for ten years and would never take R37 to a liquor store. The CLSW-A stated after R37 left, nursing (did not remember who) told her R37 had orders for no LOA and had informed her that friend-A was R1's drug dealer. CLSW-A stated it would have been nice to know the information before she had	{F 224}

{F 224}	Continued From page 30	{F 224}		

allowed R37 to go on a LOA. She stated she had not looked at R37's chart because she trusted nursing knew the correct information. She also stated R37 had been keeping ETOH under the edge of his mattress and she could not understand why nursing did not find the ETOH when they made the bed.

When interviewed on 5/13/14, at 2:20 p.m. the administrator was asked about the discrepancy between what the DON reported had happened on 5/10/14, and what the administrator stated had happened and he verified he was not aware R37 had an order for no LOAs and friend-A's relationship with R1 prior to R37 being allowed to leave on LOA.

R129 was identified by the facility to have a history of drug seeking and ETOH dependency. Although the facility had determined R129 required a 1:1 staff member since at least 3/18/14, according to a Vulnerable Adult (VA) assessment, the appropriate supervision was not implemented and/or effective.

According to review of the progress notes in R129's record, on 5/3/14, R129 had reported to the facility that she had obtained and consumed cocaine. The documentation indicated R129 had a staff assigned as a 1:1 at the time of the incident.
An Incident/Accident Report dated 5/3/14, at 11:00 p.m. indicated R129 "told the nurse that she took cocaine earlier during the shift." The note identified R129 to be "very sweaty, weak and tired" and "she looked very sleepy." The resident's pupils were "large and nonreactive to

{F 224}	Continued From page 31	{F 224}		

light." The note indicated the nurse asked R129 what she had taken and indicated R129 then "confessed" to having taken cocaine. The report documentation indicated R129 had been sent to the emergency room (ER) and included, "She said, 'I knowingly took cocaine'.. Resident has been sent to ER. She will continue to be on 1:1 when she returns to the nursing home." The report identified R129 had a history of drug use, "resident is on a 1:1...remains on a 1:1," and "Hx [history] drug seeking, receiving drugs from others."

A North Memorial Medical Center (NMMC) Emergency Department (ER/ED) note dated 5/3/14, identified R129 had reported she'd taken cocaine at the nursing home. The ER note indicated R129 had taken the cocaine to "help with the pain" in her abdomen. "Patient [R129] is triaged directly back to ED." The Clinician History of Present Illness section of the form identified R129 had reported to hospital staff she had snorted cocaine "5 hours ago."
On 5/11/14, at 4:00 a.m. the progress notes indicated R129 had obtained and consumed a life threatening amount of ETOH, causing her to require hospitalization in an intensive care unit (ICU) with subsequent intubation (mechanical ventilator assisted breathing) as a result of a blood ETOH level of 0.323. (According to Minnesota Statute 169A.20, 0.08 is considered impaired for driving). A 1:1 staff was supposed to have been in place at the time of the incident.

The resident's record included a note documented by the facility's HUC on 5/11/14, at 10:09 a.m. which indicated NMMC had called the facility "requesting" R129's medication administration records (MARs). The note

indicated the registered nurse (RN) from the hospital had notified the HUC that R129 had been admitted to the ICU, and had been intubated "due to acute alcohol intoxication." The note indicated R129's toxicology screen was "negative for drugs but positive for alcohol with a level of 0.323."

The record also included a note documented by the director of nursing (DON) on 5/11/14, at 10:55 a.m. The DON's note recapitulated R129 had been sent to the hospital, identified the time of transport as "around 4 a.m." on the night shift, and identified R129 had been sent in "for intoxication." The DON's note indicated R129 had "become weak" and needed to be lowered to the floor." The note indicated two licensed practical nurses (LPNs) were contacted and the nursing assistant (NA) staff assigned to the 1:1 was called. The note indicated the NA assigned to R129 "reported that resident has been in and out of [R14's room number] but that she had not noticed any exchange of alcohol. She also reported that resident [R14] was upset because the 1:1 has to be in his room too while resident [R129] is visiting." In addition, the DON's documentation indicated R14 had denied giving or knowing how R129 had obtained the ETOH, and documented R14 had "mentioned that resident had alcohol overnight."

An additional progress note, dated 5/11/14, at 2:49 p.m. had been written by the DON indicating NMMC had been contacted to request updates on R129's status. The note indicated, "I also requested to have the resident undergo a chemical dependency assessment to ensure that the resident can be transferred to a residential chemical dependency facility as appropriate, considering the resident's recent hospital trip to

{F 224}	Continued From page 33 the hospital for snorting cocaine." Additional record review revealed an admission MDS dated 2/1/14, that indicated R129 had a BIMS score of 15, indicating R129 was cognitively intact. The MDS identified R129 was independent with all ADLs. The MDS identified R129 rejected cares and wandered one to three days during the assessment period. R129's comprehensive assessment analysis (CAA) for mood state dated 2/7/14, identified R129 as having intact cognition, with poor decision making and as having diagnoses of "substance induced psychotic disorder, opiate dependence, and ETOH dependence." The CAA identified further diagnoses of hepatitis C, "Hx [history] of drug ETOH use" and depression. Although the CAAs identified R129 had a history of drug and ETOH dependence, the CAA lacked documentation of interventions to promote sobriety while in the facility, such as but not limited to offering chemical dependency (CD) treatment. A Vulnerable Adult Assessment dated 3/18/14, identified R129 had a history of ETOH abuse and identified R129 had, "Ongoing drug-seeking & over medication with additional Rx [prescriptions]." R129 was identified as being susceptible to abuse "r/t [related to] substance use, varies" and required supervision with LOA from the facility. The assessment identified R129 had behaviors including a history of rummaging through others' belongings and "drug use." The assessment indicated R129 had been placed on 1:1 due to rummaging in other resident rooms. R129's care plan for safety/vulnerability dated 3/25/14, identified R129 was able to make her needs known, but was vulnerable due to her	{F 224}

{F 224}	Continued From page 34 history of opioid abuse and drug seeking behavior. A care plan intervention dated as initiated 4/11/14, directed R129 required "1:1 supervision at all times to keep [R129] safe and prevent drug use" Additionally, the care plan directed, "1:1 to discuss CD concerns, encourage [R129] to consider going to a treatment facility." The care plan for mood/behavior dated 3/25/14, identified, "I have a history of opioid abuse and I exhibit drug seeking behavior as evidenced by attempting to see several different MD's to obtain prescription medication. I have a history of walking into other residents rooms and looking thru their personal belongings." Review of the undated Group 7 NA assignment sheets (forms carried by the NA staff for quick reference direction on the resident care plan) indicated R129 was continent, independent with ADLs and required a "1:1" which was spelled out in large bold print. On 5/12/14, at 10:26 a.m. DON was interviewed about R129 having obtained ETOH and/or drugs while on a 1:1. The DON verified the 1:1 should have been within arm's length of R129 at all times. The DON denied having any knowledge of how R129 had obtained ETOH. On 5/13/14, at 2:21 p.m. the administrator stated during interview that the facility lacked a system to ensure residents on 1:1 were supervised to ensure they were not neglected. The administrator verified a thorough investigation regarding resident access to illegal drugs while R129 was on 1:1 should have been completed and documented thoroughly. The administrator verified 1:1 staffing was a short term solution and was not a viable long-term intervention to address R129's drug seeking and ETOH use.	{F 224}

{F 224}	Continued From page 35 On 5/12/14, at 2:43 p.m. contracted licensed social worker (CLSW)-A stated, "I cannot imagine how a resident who was on 1:1 would get that much alcohol in her system and when I got here on Sunday I came to the office to open the computer to see what happened and guess what, there was no nursing notes. I went outside to the desk and told the administrator and director of nursing to get the nurse in to document and have the 1:1 fired. There are so many people here than I have seen on 1:1. For me 1:1 means the person needs to be somewhere else not at the nursing home." The Special Staffing - One to One Assignment policy dated as reviewed 5/2013, indicate 1:1 staffing may be assigned "under special circumstances," must be prior authorized by the Director of Clinical Services (DCS) and "One to One staffing assignments are not permanent but rather in place based on assessed need until appropriate permanent alternative arrangements can be made." The reasons identified for the 1:1 staffing included threat of suicide, altered mentation that may "dislodge treatment lines and devices," escalating exit seeking behavior, altered cognition in an agitated state that "is not easily redirected" and "does not respect boundaries of other residents." The procedure directed to assess the resident, DON and administrator to agree 1:1 was necessary and consult DCS; instruct staff assigned to 1:1 the purpose of assignment, and directed to keep resident at "arm's length at all times." The procedure indicated if resident was not suicidal, privacy with toileting could be provided. The procedure directed to document the 1:1 assignment in the clinical record and revise the care plan.	{F 224}

Appendix A of the policy included examples of neglect including: "Failure of a caregiver to provide a resident with (or the absence or likelihood of absence of) care or services (e.g. food, clothing, shelter, health care or supervision) which are reasonable and necessary to obtain or maintain the vulnerable adult's physical or mental health or safety." According to the record, R116 eloped from the facility on 5/11/14, at 9:30 a.m., 11:30 a.m. and 11:52 a.m. while wearing a WanderGuard device which had been implemented to prevent the resident's elopement. Record review indicated R116 had been admitted to the facility on 1/20/14, with diagnoses of lung cancer with metastasis (cancer moving from one body organ to another) to the liver and the brain, metabolic encephalopathy (temporary or permanent damage to the brain that occurs when the liver cannot clear the toxins from the body), confusion and depression. The record also indicated R116 had Hospice services initiated on 1/21/14. On 4/15/14, at 10:49 p.m. a nursing progress note indicated, "Pt [patient] is declining. He is very weak and needs a lot of assistance." A progress note dated 5/5/14, indicated R116 had been outside with his son and the resident had	{F 224}

experienced a fall. R116's son was present at fall. Hospice was notified of fall and a new wheelchair (W/C) was ordered for resident. Staff had also placed a WanderGuard on the resident's chair to alert staff when the resident wanted to go outside to maintain resident's safety. "Resident is allowed to go outside although staff needs to be alerted. Son is aware and in agreement with interventions. Nursing is to continue to monitor."

Additionally, a draft progress note dated 5/5/14, at 10:47 p.m. indicated R116 had increased confusion. "He requested going the bank to complete his transaction that he began earlier. He was leaning down to the floor to pick up of stuff which was apparently not there (visual hallucination). He was ambulating around getting out of w/c. Towards the end of shift he was on one to one rotation to prevent him from falling."

A progress note dated 5/6/14, at 2:55 p.m. indicated R116 continued to sit at nursing station with staff due to attempts to self-transfer and unsteady gait.

R116 was observed on 5/11/14, at 9:30 a.m. to be on the sidewalk west of the facility. The health unit coordinator (HUC) was bringing R116 back into the building. The HUC stated she "had found him as she was driving into work." The HUC stated R116 had a WanderGuard on and she was surprised to find him walking outside since he was not able to walk every day. The HUC said she had called the facility and alerted them to the fact that R116 had left the facility and requested someone bring a wheelchair (w/c) to help bring him back to the facility. NA-R and safety monitor/NA-O had also come outside to look for R116. Two other NA's NA-P and NA-Q came

{F 224}	Continued From page 39 outside with a w/c to meet R116 and return him to the facility. On 5/11/14, at 10:38 a.m. a progress note indicated, "At 9:30 a.m. upon arrival to work this writer found R116 outside the facility walking down the sidewalk. When approached he stated 'I am going to visit a friend.' R116 currently has a WanderGuard and due to cognitive impairments is unable to leave the facility unattended. He was verbally resistant to returning to the building but was eventually returned with staff assist of three. Note resident left out a fire exit at the end of the hall. Staff was in route to locate whom ever had exited the building, the DON, administration, and social worker (SW) updated." R116's progress notes from 5/11/14, at 11:52 a.m. included: "Fire exit alarm again sounded at the end of the hallway. Staff immediately responded and found R116 outside. He again stated that he was going to visit a friend. This time he was verbally and physically resistant to returning to the building. Three staff were able to convince him to return in a w/c (wheelchair) due to unsteady/weak gait. DON, SW, and charge nurse notified. Call placed to son who was updated and encouraged to visit and offer support to R116 if able. Son voiced that he understands that this confusion and resistance is likely a direct result of the Cancer. Support provided via phone." Additional Progress Notes dated 5/11/14, at 4:27 p.m. included, "At 0930 AM resident went out the fire exit and was walking down sidewalk. Staff intervened and resident was brought into facility. Resident stated he was going to visit a friend. At 11:30 [a.m.] resident left out another exit. Staff	{F 224}

was with resident and brought resident into facility. Hospice, family and administration were notified. Resident's WanderGuard (departure alert system) was in place and functioning. Resident also placed on 15 minute checks. Hospice updated on increased confusion along with family. Family was here to visit resident."

The facility's HUC was interviewed on 5/12/14, at 10:00 a.m. and at that time the HUC verified R116 had eloped from the facility three times on 5/11/14. The HUC stated R116 had left the building without staff present at 9:30 a.m., 11:30 a.m. and 11:52 a.m.

Although the HUC verified the resident had eloped without staff presence, R116's Progress Notes had indicated staff were with the resident at 11:30 a.m.

On 5/11/14, at 10:07 a.m. the administrator was interviewed and stated the day staff, afternoon staff, and night staff had been educated on the immediate jeopardy for drugs and ETOH and elopement and he could not believe the fact that R116 had gone out the back door, and was able to leave the facility. The administrator stated the investigation so far, was that staff heard the back door open, went and looked but had not seen anyone, so they assumed it was staff. The administrator verified that there was no WanderGuard alarm on the back door.

On 5/12/14, at 11:00 a.m. surveyors tested the key pad coded door which was locked, but noted that staff unlock the door and enter without regard to which residents are nearby.

On 5/13/14, at 1:00 p.m. the consultant

administrator stated the facility had checked the key pad coded door to the access hallway to the back exit, which was functional and also there was a WanderGuard system in place on the back door, which was functional, the facility had tested the doors and were not able to determine how the resident had gotten out of the facility by the back door.

The facility Elopement policy dated 5/12, indicated... If exit seeking behavior is identified the licensed nurse immediately implements interventions to manage exit seeking behaviors. These interventions may include a personal security device such as a WanderGuard, or diversion activities. The interventions are documented on the care plan and the nursing assistance care plan. ...If the resident is not located within 30 minutes, the Administrator or designee notifies the law enforcement officials, the corporate compliance officer and corporate director of clinical services. When the resident returned to the facility a physical assessment would be done, a thorough investigation of the event would be completed by the DON or designee. A factual account of the occurrence would be documented in the medical record, and the care plan would be reviewed and revised. The administrator of designee reports the event to the appropriate state agency (SA).

On 5/7/14, at 10:02 a.m. the ombudsman was interviewed. The ombudsman stated she wanted to be sure the state agency surveyors were aware that resident's of the facility were purchasing ETOH and drugs. The ombudsman reported she believed residents were giving other residents money and credit cards to go out and purchase things for them. She reported a resident with

{F 224}	Continued From page 42 chemical dependency problems had been drinking, room checks were being completed and staff were finding ETOH bottles. In addition the ombudsman reported R37 had been found intoxicated several times and she was involved in discussing abuse prevention planning and the effects of ETOH on R37's medications. She reported the physician was encouraging discharge planning to a facility that allowed drinking. She also indicated a number of residents were accessing illegal drugs at the facility. The ombudsman reported she had been at the facility on 5/6/14, to discuss the concerns. The ombudsman stated the police had been notified and had been to the facility "quite often". She also stated she was aware R129 was on a 1:1 and had somehow obtained and consumed an "illegal drug [cocaine]" in the facility. On 5/7/14, at 10:05 a.m. the administrator verified during interview that the ombudsman had been called 5/6/14, to speak with the facility regarding R37 having given his credit card to R117 to purchase ETOH because R37 had been "drunk for days." The IJ that began on 5/10/14, was removed on 5/21/14, when the facility had implemented an IJ removal plan that included: The development and/or revision of policies related to obtaining a drug and alcohol free facility and policies related to prevention of elopements. The facility initiated assessments for reisdents who had been identified at risk for drug/alcohol issues and elopements; The facility also developed a system for investigation of ongoing incidents; Staff were educated to their responsibilities for how to supervise, care for and protect residents; Direct care staff and licensed nursing staff were	{F 224}

indicate whether staff may have been transferring the resident incorrectly or whether the plan of care had been followed in order to rule out neglect of care. The clinical record lacked evidence the administrator and SA were immediately notified of the incident, and lacked evidence the incident had been thoroughly investigated to rule out potential neglect.

R13: A nursing progress note for R13 written by administration on 5/8/14, at 9:04 a.m. included, "Report received that the resident attempted to leave the facility on Tuesday May 6 around 4 p.m. trying to get to her son, resident was found by the receptionist on the sidewalk, redirected back into the facility. Resident has her WanderGuard on. Receptionist [O-C] reported that the she reminded the resident that resident cannot leave the facility unsupervised; receptionist was educated that when residents with WanderGuard would like to get out of the building to smoke, the smoke monitor should be alerted. Son and daughter notified.

On 5/8/14, at 12:44 p.m. the administrator was interviewed and stated he had not been notified of R13's alleged elopement 5/6/14 until Tuesday "the next morning." The administrator stated he was unclear why it had not been reported to him until then.

A SA report form dated 5/8/14 (no time documented on report) included, "Report received that the resident attempted to leave the facility on Tuesday May 6 around 4 p.m. trying to get to her son, resident was found by the receptionist on the sidewalk."

The clinical record lacked evidence R13's

elopement was clearly documented, including date, time, location, and those involved. The clinical record lacked evidence R13 was evaluated for elopement risks after having eloped. The clinical record also lacked evidence the administrator or SA had been immediately informed of the incident, or that the elopement was thoroughly investigated, including interview with staff present at the time of the elopement.

R14: A Minnesota Department of Health OHFC (office of health facility complaints) report form dated 5/4/14, identified R129 had "handed popcorn [a slang name for a drug identified also as weed] that is wrapped in tissue paper to R14." R14 was asked to hand it back but refused. R14 was observed to put something in his mouth and swallowed. The report indicated, "Suspected that the item is not anything that is edible." The physician was notified, and R14 was ordered to go to the emergency room (ER), 9-1-1 was called and the police arrived. R14 was taken to North Memorial Hospital. Although the report indicated the SA had been notified, the clinical record lacked evidence the administrator was immediately notified, and the report form lacked documentation of the date, time and location of the incident.

R66: An OHFC report form indicated a report had been submitted regarding R66 on 4/30/14. The report indicated a NA was given a hand written letter from R66 that indicated the resident would not give the NA "$500" unless the NA could prove "that she [the NA] is being stalked [the NA had alleged she was being stalked and had asked R66 for money]." The DON had documented that the nursing assistant (NA) had denied taking or asking for money, but had admitted she was

being stalked and had stated all staff knew it "including the residents." Although this alleged incident of potential financial exploitation had occurred on 4/28/14, it had not been reported to the SA until 4/30/14. In addition, the clinical record lacked evidence the administrator had been immediately notified.

On 5/9/14, at 1:43 p.m. the licensed practical nurse (LPN) manager-E stated the administrator should be immediately notified of all incidents in the facility and stated when the new incident report form was implemented, the new form did not include identification of when the administrator or SA was notified.

On 5/13/14, at 2:21 p.m. the administrator verified he had not been immediately notified of the above incidents and stated the DON was developing a "log" to keep track of when he was notified. The administrator stated he'd thought the SA had been immediately notified.

The facility's policy, Prohibition of Abuse, Neglect, Mistreatment, and Misappropriation of Resident Property dated as reviewed 1/2013, included: "Each resident has the right to be free from mistreatment, neglect, abuse, involuntary seclusion and misappropriation of property. Videll Healthcare, LLC facilities have zero--tolerance for abuse, neglect, mistreatment, and/or misappropriation of resident property. Staff must not permit anyone to engage in verbal, mental, sexual, or physical abuse, neglect, mistreatment, or misappropriation of resident property. The facility will implement policies and procedures to ensure that residents are not subjected to abuse by staff, other residents, volunteers, consultants, family members and others who may have

{F 226}	Continued From page 56 members were in his room today" and "a female staff person came out of bathroom & grabbed his arms, causing reddish purplish areas on bilateral [upward pointing arrow] extremities." The report indicated R37 had refused vitals, had a reddish/purple mark on the left superior (upper arm) measuring 2.5 cm (centimeters) x 2.0 cm, a mark on the left inferior (lower arm) 5.75 cm x 2.25 cm., a mark on the right superior/forearm, 6 cm x 8 cm, and on the right hand measuring 4 cm x 3 cm. The report indicated the physician had been notified on 5/5/14, at 5:30 p.m. The form also indicated after R37 had reported after he had been grabbed by staff, he had "then told writer that he jumped off roof." The documentation on the form included, "Resident has slurred speech, staggering gait, & smelled of alcohol." The form indicated the "allegations unsubstantiated." "Resident encouraged to tell a nurse if situation happens again right away. Resident appears intoxicated, with an inconsistent story. Reddened areas appear that they have scratches & chaffing on them." Although R37 made an allegation of abuse, the clinical record lacked evidence the administrator or SA had been immediately notified. And although the report identified R37 had changed the story and identified evidence of potential intoxication, the clinical record lacked documented evidence the allegation had been thoroughly investigated. The report identified R37 was potentially intoxicated, however the clinical record lacked evidence of any screening to determine whether R37 had received alcohol (ETOH). R129: An Incident/Accident Report dated 5/3/14, at 11:00 p.m. indicated R129 had "told the nurse that she took cocaine earlier during the shift." The report described R129 as "very sweaty, weak	{F 226}

{F 226}	Continued From page 57	{F 226}		

and tired" and "looked very sleepy." R129's pupils were described as "large and nonreactive to light." The report also indicated the nurse had asked R129 what she'd taken and R129 had "confessed" to having taken cocaine. The form indicated the resident was sent to the emergency room, "She said, 'I knowingly took cocaine...Resident has been sent to ER [emergency room]. She will continue to be on 1:1 [one to one, in arms reach at all times] when she returns to the nursing home." The report identified R129 had a history of drug use, "resident is on a 1:1," "remains on a 1:1," and "Hx [history] drug seeking, receiving drugs from others." The form was signed by the director of nursing (DON) and dated as 5/5/14. The clinical record lacked evidence the administrator and SA were immediately notified, and lacked evidence the incident had been thoroughly investigated.

R13: A nursing progress note for R13 written by administration on 5/8/14, at 9:04 a.m. included, "Report received that the resident attempted to leave the facility on Tuesday May 6 around 4 p.m. trying to get to her son, resident was found by the receptionist on the sidewalk, redirected back into the facility. Resident has her WanderGuard on. Receptionist [O-C] reported that the she reminded the resident that resident cannot leave the facility unsupervised; receptionist was educated that when residents with WanderGuard would like to get out of the building to smoke, the smoke monitor should be alerted. Son and daughter notified.

On 5/8/14, at 12:44 p.m. the administrator was interviewed and stated he had not been notified of R13's alleged elopement 5/6/14 until Tuesday "the next morning." The administrator stated he

{F 226}	Continued From page 59 safety concern. The DON also verified the incident had not been thoroughly investigated. R41: An Incident/Accident Report for R41 dated 5/1/14, at 3:05 p.m. indicated R41 had returned from a leave of absence and "apparently drove off curb [in a motorized wheelchair]." The report indicated R41 was found lying on the pavement on his right side. R41 was identified to have slurred speech, but identified he was alert and oriented. The report indicated R41 had sustained a laceration on his forehead and had complained of arm pain. The report also indicated 9-1-1 had been called and R41 had been transferred to North Memorial hospital. Documentation on the Incident/Accident report indicated R41 had stated he had been drinking alcohol and his "last drink [was] about 5 min (minutes) ago.'" "Requested order for no unsupervised LOA's [leave of absence] from physician." R41 was identified to not be wearing a seat belt in the wheelchair. The clinical record lacked evidence the administrator and SA were immediately notified of the incident which required medical attention. The clinical record also lacked evidence the incident had been thoroughly investigated. R70: An Incident/Accident Report for R70 dated 4/28/14, at 6:30 a.m. indicated R70's right arm had been pulled on when staff had helped R70 get up from a sitting position. R70 had subsequently complained of pain and an ice pack had been applied. The report indicated no swelling was observed and R70 was able to move the right arm, but had slight pain. The report also included, "Resident hurt self during cares" and indicated occupational therapy orders had been obtained for activities of daily living (ADLs) and pain. The incident lacked identification of potential	{F 226}

being stalked and had stated all staff knew it "including the residents." Although this alleged incident of potential financial exploitation had occurred on 4/28/14, it had not been reported to the SA until 4/30/14. In addition, the clinical record lacked evidence the administrator had been immediately notified.

On 5/9/14, at 1:43 p.m. the licensed practical nurse (LPN) manager-E stated the administrator should be immediately notified of all incidents in the facility and stated when the new incident report form was implemented, the new form did not include identification of when the administrator or SA was notified.

R116 had eloped and the facility did not report to the administrator or SA in a timely manner.

R116 was observed on 5/11/14, at 9:30 a.m. to be on the sidewalk west of the facility. The health unit coordinator (HUC) was bringing R116 back into the building. The HUC stated she "had found him as she was driving into work." The HUC stated R116 had a WanderGuard on and she was surprised to find him walking outside since he was not able to walk every day. The HUC said she had called the facility and alerted them to the fact that R116 had left the facility and requested someone bring a wheelchair (w/c) to help bring him back to the facility. NA-R and safety monitor/NA-O had also come outside to look for R116. Two other NA's NA-P and NA-Q came outside with a w/c to meet R116 and return him to the facility.

On 5/11/14, at 10:38 a.m. a progress note indicated, "At 9:30 a.m. upon arrival to work this

{F 226}	Continued From page 63 Hospice updated on increased confusion along with family. Family was here to visit resident." The facility's HUC was interviewed on 5/12/14, at 10:00 a.m. and at that time the HUC verified R116 had eloped from the facility three times on 5/11/14. The HUC stated R116 had left the building without staff present at 9:30 a.m., 11:30 a.m. and 11:52 a.m. Although the HUC verified the resident had eloped without staff presence, R116's Progress Notes had indicated staff were with the resident at 11:30 a.m. On 5/12/14, at 10:14 a.m. (more than 24 hours after the first elopement) the DON was interviewed. The DON stated he had not reported R116's elopement because his understanding was that he had 24 hours to report. The DON stated he had wanted to investigate the issue and speak to the administrator, and was still working on the report. The DON verified he was not aware of the Federal regulations which included immediate reporting. The DON verified he was not aware that a resident who exited the building unsupervised while wearing a WanderGuard, without staff knowledge, could constitute elopement and potential neglect of care. On 5/12/14, at approximately 11:30 a.m. a report was made to the Office of Health Facility Complaints (OHFC) regarding the 9:30 a.m. elopement on 5/11/14. No reports were made to the SA for the additional elopements at 11:30 a.m. and 11:52 a.m. On 5/13/14, at 2:21 p.m. the administrator verified he had not been immediately notified of the	{F 226}

above incidents and stated the DON was developing a "log" to keep track of when he was notified. The administrator stated he'd thought the SA had been immediately notified.

EMPLOYEE SCREENING:
On 5/12/14, at 10:00 a.m. the employee files were reviewed and the following was observed:

Licensure verification:
Licensed practical nurse (LPN)-A's employee file folder lacked verification of the LPN's license. The administrator verified at 12:45 p.m. there had been no proof of nursing licensure obtained for LPN-A from the Minnesota Board of Nursing.

Registered nurse (RN)-C's employee personnel file indicated RN-c had been hired on 4/8/14, and that a back ground study request had been submitted on 4/8/14, however there were no results yet. In addition, no licensure verification completed, only a copy of a license with expiration of 10/4/13.

Background study:
RN-D's file indicated RN-D had been hired 4/16/14, and that a background Study Request had been submitted on 4/14/14. However, the background study incorrectly indicated NA-U's background study information.

Nursing assistant (NA)-U's file was reviewed and was found to include a statement that NA-U had a Minnesota Department of Human Services Background Study (MN DHS BS) form dated 5/25/14, which indicated NA-U "cannot provide Qualified Professional or Personal Care Assistance services in the personal care program under Minnesota Health Care Programs." The

{F 226}	Continued From page 65 administrator verified that NA-U could not provide care but had been providing care unsupervised, from 4/23/14, through 5/12/14. NA-U had RN-D's BS in NA-U's employee file. Also, RN-D's BS was in NA-U's employee folder. RN-D's BS indicated that RN-D could not perform cares unsupervised. However, during the survey the administrator obtained the blue BS form which indicated RN-D could perform cares unsupervised. NA-Q was hired on 3/6/14. The facility received a yellow MN DHS BS on 3/10/14, which indicated NA-Q "cannot provide Qualified Professional or Personal Care Assistance services in the personal care program under Minnesota Health Care Programs." The white BS computer genreated copy request indicated the form was submitted on 3/6/14, and passed as of 3/10/14, however the employee file lacked the information as the facility provided the information during survey. The facility did not have system in place to ensure BS were being monitored for the employees ability to work unsupervised. Reference checks: RN-C was hired on 4/8/14, and no reference checks had been completed. RN-D was hired 4/16/14, and no reference checks, could be located in the employee file. LPN-A's file lacked a hire date and no reference checks were completed as the facility policy had directed staff to complete. NA-W hired 4/23/14, had no reference check	{F 226}

{F 226}	Continued From page 66 completed. On 5/12/14, at 12:35 p.m. the administrator stated the human resources (HR) person was in charge of doing license verifications and background checks for new employees. The administrator further stated the HR person had been terminated two weeks ago and no one else had been designated to follow-up on background checks that had been flagged. The administrator acknowledged the facility had not ensured tracking for new employees' license verification and background checks. On 5/13/14, at 8:10 a.m. NA-U verified during interview that she was a NA and had started orientation on 4/23/14. When asked if she worked under supervision, NA-U stated she had received "a couple of days training" and had started working on her own on 4/28/14. On 5/13/14, at 9:00 a.m. LPN-A verified her start date was 4/2/14. LPN-A stated her days were "sporadic" for a few weeks, but stated she had been working full time on her own since 4/16/14.	{F 226}		
{F 250} SS=H	483.15(g)(1) PROVISION OF MEDICALLY RELATED SOCIAL SERVICE The facility must provide medically-related social services to attain or maintain the highest practicable physical, mental, and psychosocial well-being of each resident. {F 250}	Continued From page 67 review, the facility failed to aggressively identify, assess, determine interventions and implement the interventions for medically-related social services, and pursue the provision of these services for residents known to provide and use illegal drugs and alcohol in the facility for 4 of 11 residents (R129, R86, R41, R37) who sustained harm due to lack of social services interventions; for 5 of 11 residents (R14, R56, R117, R62, R9) for alleged substance abuse, and for 2 of 11 residents (R13, R103) who allegedly eloped from the facility. Findings include: Alleged substance abuse: On 5/8/14, at 8:02 a.m. a list of residents allegedly bringing drugs and alcohol (ETOH) into the facility, as well as a list of residents known to use drugs or alcohol in the facility was requested. A list provided by the administrator at 11:00 a.m. included R129, R86, R41, R37, R14, R56, R117, R62 and R9 as alleged substance users. R129 was not provided consistent medically related social services to address ongoing drug seeking behaviors and sustained harm. Although R129 was assigned a one to one (1:1) as of 3/14, the clinical record lacked evidence of social service assessment and interventions. On 5/3/14, R129 reported to facility staff, that she had obtained and consumed cocaine while under 1:1 supervision. On 5/11/14, at 4:00 a.m. R129 had obtained and consumed ETOH while supervised 1:1 by facility staff. This resulted in harm when R129 required hospitalization in an intensive care unit (ICU) where she was intubated (mechanical ventilator assisted breathing) for a blood ETOH level of 0.323.	{F 250}

{F 250}	Continued From page 68	{F 250}		

R129's admission Minimum Data Set (MDS) dated 2/1/14, revealed a Brief Interview of Mental Status (BIMS--a tool to determine cognitive status) score of 15, indicating the resident was cognitively intact. In addition, it was noted R129 was independent with all activities of daily living (ADLs), rejected cares, and wandered 1-3 days during the assessment period. R129's Care Area Assessment (CAA) for mood state dated 2/7/14, identified R129 displayed poor judgment, and had impaired cognition and poor decision making skills. The CAA identified diagnoses including "substance induced psychotic disorder, opiate dependence, and alcohol dependence," as well as hepatitis C, "Hx [history] of drug alcohol use" and depression. Although the history of drug and ETOH dependence was identified, the CAAs lacked documentation of interventions to promote sobriety, such as but not limited to offering chemical dependency (CD) treatment.

The Vulnerable Adult Assessment (VAA) dated 3/18/14, identified R129 had a history of ETOH abuse and "Ongoing drug-seeking & over medication with additional Rx [prescriptions]." R129 was identified as being susceptible to abuse related to substance use and required supervision with leaves of absence (LOAs) from the facility. It was noted R129 had a history of rummaging through others belongings and "drug use," and 1:1 staffing was initiated due to rummaging in other resident rooms.

R129's Smoking Evaluation dated 3/18/14, directed staff to "monitor for ETOH use or over sedation."

A Pain Evaluation and Management Plan dated

{F 250}	Continued From page 69	{F 250}		

5/1/14, identified R129 had daily chronic pain, and a history of pain and seeking drugs. "Resident is on a restricted recipient program [where only one pharmacy may fill narcotic prescriptions to deter drug seeking behavior] due to drug seeking...MD [medical doctor] is aware of drug seeking behaviors and aware pain is not controlled. MD will not order any more pain medications for resident due to her drug seeking behaviors. Resident is on the restricted recipient program due to drug seeking."

An Incident/Accident Report dated 5/3/14, at 11:00 p.m. indicated R129 "told the nurse that she took cocaine earlier during the shift." R129 was described as "very sweaty, weak and tired...she looked very sleepy," and pupils were "large and nonreactive to light." When the nurse asked the resident what she'd taken, she "confessed" to taking cocaine. The report noted, "She said, 'I knowingly took cocaine'...Resident has been sent to ER [emergency room]. She will continue to be on 1:1 when she returns to the nursing home." The resident's history of drug use and receipt of drugs from others was noted, as well as the fact that the resident had current 1:1 staffing. Although the incident occurred on 5/3/14, the form was signed by the director of nursing (DON) on 5/5/14.

An Emergency Department Chart [from the hospital ER] dated 5/3/14, identified R129 reported to have taken cocaine while residing at the facility to "help with the pain" in her abdomen. "Patient [R129] is triaged directly back to ED [emergency department]." The Clinician History of Present Illness section of the form identified R129 reported to hospital staff she snorted cocaine "'5 hours ago.'" Although R129 was identified as

{F 250}	Continued From page 70	{F 250}		

requiring the ER for a potential drug overdose, the Emergency Department Chart did not address the cocaine use, only pain. The laboratory (lab) reports indicated various pertinent lab values were checked, but lacked a toxicity screening for cocaine, drug or alcohol use. R129 was given two doses of Dilaudid (narcotic pain medication) and returned to the facility at 6:00 a.m. with no new orders. The clinical record lacked evidence the administrator, or the designated State agency (SA) were notified of the incident. The clinical record lacked evidence of new interventions to address R129's report of drug use, such as CD treatment. In addition, the clinical record lacked evidence the use of cocaine by R129 was investigated to determine how the drug had been obtained while the resident had 1:1 staff supervision.

A unlabeled typed page insert in the front of R129's paper chart dated 4/15/14, read "If Res [resident] goes to the Hospital for any reason she is to go to St. Joes [sic] Hospital Only per primary care MD and the MN [Minnesota] restricted recipient program...All scripts [prescriptions] no matter where they come from must be approved by [MD's name] or their on call MD."

On 5/7/14, at 10:24 a.m. the a return call was made to the ombudsman who had requested contact. The ombudsman stated she had been informed by a nurse of the facility of "drug use" and "drugs shared with residents" at the facility "a couple days ago." The ombudsman stated rather than call the nurse back, she visited the facility on 5/6/14, and spoke with various residents as well as management staff regarding drug, alcohol and discharge planning concerns. The ombudsman, facility staff, and residents were "suspicious

{F 250}	Continued From page 71	{F 250}		

residents may be giving money or credit cards to another [resident] to go out and purchase things [cigarettes, alcohol and drugs] for them." The ombudsman stated the police had been notified and responded "quite often." Allegedly residents who were chemically dependent were drinking in their rooms and facility staff were conducting room checks each shift and "finding empty alcohol [vodka] bottles" in resident rooms, and residents had been found "intoxicated." The ombudsman specifically reported R129 had 1:1 staffing, yet had "somehow" obtained and consumed an illegal drug (cocaine). Although the facility had employed "three temporary social workers, social services is overwhelmed" due to "no policies and procedures in place."

R129's care plan for safety/vulnerability dated 3/25/14, identified the resident was able to make her needs known, but was vulnerable due to her history of opioid abuse and drug seeking behavior. A care plan intervention dated 4/11/14, directed staff to provide "1:1 supervision at all times to keep [R129] safe and prevent drug use" Additionally, the care plan directed, "1:1 to discuss CD concerns, encourage [R129] to consider going to a treatment facility." The care plan for mood/behavior dated 3/25/14, identified, "I have a history of opioid abuse and I exhibit drug seeking behavior as evidenced by attempting to see several different MD's to obtain prescription medication. I have a history of walking into other residents rooms and looking thru [sic] their personal belongings."

Review of the undated Group 7 nursing assistant (NA) assignment sheet (for quick reference guide providing care-related direction) indicated R129 was independent with ADLs and "1:1" was noted

{F 250}	Continued From page 72 in larger bold print. Pertinent Nursing Progress Notes read as follows: 1) On 3/14/14, at 6:18 p.m. R129 "had an appointment yesterday and was immediately transferred to the hospital...while on the way home [unclear on prior destination] stopped at Cub foods" and picked up a prescription for eight tablets of Norco 5/325 milligrams (mg) (a narcotic and Tylenol pain medication)...failed to alert staff and stated that there were no new orders." The hospital, on call MD and triage nurse were updated on R129's "history of narcotic use." 2) On 3/16/14, at 6:34 a.m. R129 was "caught going through another resident's belonging...opening her purse." The note indicated R129 admitted going in the room but denied taking "any money." 3) On 3/17/14, at 3:34 p.m. "Resident still remains on 1:1 observation." Although the note identified R129 was assigned a 1:1 staff, the record lacked documentation when the 1:1 staffing was initiated. At 10:17 p.m. "called on call [physician]," reported two incontinent episodes, "lower extremities [sic] hurts" and edema (abnormal build up of fluid in the tissues). Was encouraged to "sit and rest the leg" but refused and reported the pain was "unbearable." R129 wanted to be evaluated at the hospital, and "called 911 herself." Although a previous note indicated R129 required 1:1 staffing, it was noted R129 planned to "take care of her own transportation to ER...left the facility" at 10:20 p.m. The note did not indicate if a staff person accompanied R129 to the appointment. 4) On 3/18/14, at 3:56 a.m. R129 returned from the ER at 3:30 a.m. with a "New order. No new concern at this time." At 2:31 a.m. R129 reported	{F 250}

{F 250}	Continued From page 73	{F 250}		

to the business office manager she felt "depressed due to being on a 1:1." The concern was reported to social services and the nurse on duty.
5) On 3/20/14, at 10:08 a.m. the physician R129 identified as her new primary care physician (PCP) was contacted to inform the provider R129 lived in a health care facility, and orders needed to be coordinated with the facility. The PCP was provided an update regarding R129 changing her PCP, trips to the ER and drug seeking behavior. The note further indicated, "Transport informed to bring pt [patient] to/from the clinic and no other stops to include the pharmacy." At 2:45 p.m. R129 "Went for her appointment to her care provider today. At the appointment, resident was given script for Ambien (hypnotic used to promote sleep). "Resident said she filled the prescriptions at the pharmacy but she misplaced the pills. Patient will be monitored for increased sedation." Although the previous note indicated the transportation company was directed not to make any stops during transport, R129 had been brought to the pharmacy. At 3:11 p.m. a note indicated R129 reported she "lost" the Ambien. The note indicated the "escort" assigned to go with R129 to the appointment, reported R129 "went to the pharmacy and filled her script." The escort reported R129 would not allow the staff to "see the script" or the filled prescription. "Per the escort [R129] went to the bathroom. On the ride home [R129] reported that she lost the bottle of pills. Upon return she reported that same story to this writer and requested that staff get a new script." The physician was contacted and verified a prescription had been written and a report the script was lost had been reported by R129. The physician denied taking R129 on as a patient, however, and referred the facility to R129's

current PCP.
6) On 3/28/14, at 11:52 a.m. R129 met with social services and "Also spoke with resident regarding her drug seeking. [R129] admits that she is addicted to pain medication." The note indicated R129 was scheduled to see psychologist and encouraged R129 to discuss her concerns and her "addiction."
7) On 4/4/14, at 7:11 p.m. R129 met with psychologist, as well as the DON and social worker after the appointment. The note indicated R129 "does not like being on 1:1's...informed her she was on 1:1's because of her frequent drug seeking...admits that she has urges to seek medications to manager her pain...denies addiction." Inpatient treatment was discussed such as drug and emotional counseling, which R129 rejected. The note indicated the psychologist agreed with the need for treatment, "However, should resident continue to display behaviors of drug seeking and declines treatment a CD commitment maybe considered to be in her best interest."
8) On 4/7/14, at 10:47 a.m. R129 remained, but requested she be removed from 1:1 supervision, which was noted as required "for going into other resident rooms."
9) On 5/4/14 12:03 a.m. R129 "told the nurse that she took cocaine earlier during this shift." The note recapitulated the data from the incident report dated 5/3/14. "The nurse asked the resident what she had taken and where she got it from or [who] gave it to her. She took the nurse to [R1's room number]. She also report that the package that resident in room [R14's room] swallowed earlier was marijuana." R129 accepted to to the ER for evaluation. "The nurse requested for toxicology screen and a copy should be send [sic] to the nursing home per the administrator

{F 250}	Continued From page 75	{F 250}		

order." Although the note indicated R129 obtained cocaine from another resident and identified R129's involvement with a second resident and a different illegal drug, the clinical record lacked evidence law enforcement was notified,and toxicology screening was obtained. Although R129 had an assigned 1:1, the record lacked evidence as to how the resident obtained and ingested the drugs, the incident was not immediately reported to the administrator and SA, nor was it investigated. In addition, the record lacked evidence R129 had received a CD evaluation or were immediate changes made in the monitoring and supervision provided for the resident's safety. At 7:23 a.m. a corporate nurse documented R129 approached the nurse and "admitted to writer that she took drugs given to her by another resident in this building. She was able to verbalize insight related to why she regretted this choice...remains on 1:1. 1:1 was present during this conversation." The clinical record lacked evidence 1:1 monitoring of R129 was reviewed after being identified to have accessed illegal drugs twice while on 1:1 monitoring.

10) On 5/4/13, at 12:12 p.m. an attempt was made to notify R129's doctor regarding the incident from 5/3/14. The operator at the doctor's office informed writer that they were only accepting on-call emergencies. Staff would notify doctor the morning of 5/5/14. The resident returned from the hospital at 6:00 a.m. with no new orders. Although R129 had two doses of Dilaudid administered at the ER, she immediately requested pain medication upon return to the facility (the note was not closed or signed by the writer).

On 5/5/14, during the initial tour of the facility

NA-K was observed to be sitting in a chair directly outside R129's room. The door was open and R129 was dressed and was lying in bed with her eyes closed. NA-K reported she was assigned as a 1:1 for R129. NA-K stated she needed to remain with R129 and the 1:1 was due to R129 going into "other resident rooms."

The following day at 8:30 a.m. NA-M (1:1 staff) followed R129 down the hallway and out to the smoking patio. R129 retrieved a cigarette from her front pocket, lit the cigarette and replaced the lighter in the side pocket (right). NA-M stood on the side walk outside the designated smoking area with a large cinder landscape block planter between R129 and NA-M. NA-M remained out of arm's length and looking in the opposite direction from R129 and talked with another staff person in the smoking area. R129 stood with other residents and smoked out of direct sight of NA-M. At 8:33 a.m. R129 sat on a bench with another resident on the other side of the smoking patio and out of sight of NA-M. NA-M stood on the edge of the cinder landscape block planter edge and chatted across the smoking area to the same staff person. NA-M was not near enough to R129 to intervene should there have been a concern. At 8:37 a.m. staff spoke to each other and then NA-M turned his back on all smokers (including R129) and spoke to a male who was in a car in the parking lot. NA-M then jumped down and entered the smoking area to speak to the staff directly. NA-M was not within arm's length or direct eye sight of R129. At 8:38 a.m. R129 stood up and walked to the front entrance of the facility. NA-M jumped to catch up with R129 and followed directly behind her into the facility. R129 then pushed the wheelchair of a male resident entering the building and walked rapidly down the

hallway. At 9:34 a.m. R129 pushed R62 in her wheelchair out of the facility and onto the smoking patio. R62 held out a cigarette for R129 ask she pushed the chair, and R129 concealed the cigarette. NA-M followed behind R129 and did not appear to notice or intervene when R129 took the cigarette. NA-M immediately turned his back to R129 once on the smoking patio, applied a surgical mask and talked to the female staff assigned to monitor the smoking patio. Both staff had their backs to R129. At 9:35 a.m. a staff pushed R22 back into the facility and pulled the smoking cart behind her. NA-M remained outside with R129 near the smoking patio watching a van in the parking area. NA-M had his back to R129 and was approximately 14 feet away from R129. Multiple other residents were observed to come and go from the smoking patio. R129 interacted freely with the other residents who were unsupervised. At 9:37 a.m. R117 came out of the facility, lit a cigarette at the front entrance, jumped up onto the cinder landscape block planter with ease, and walked across the top of the planters with a skipping gait. Neither the smoking monitor nor another female staff in the area intervened. R117 was observed to speak briefly with the female smoking monitor, approached R36, pulled out a large wad of cash and exchanged money with R36. R117 then went to R129 and R62. R117 remained with both residents smoking and talking. R129 sat on the edge of the cinder landscape block planter. NA-M was not within arms reach nor eyesight of R129, and was not supervising the resident. NA-M remained with the other female staff, with his back to R129. At 9:40 a.m. R129 stood and pushed R62's wheelchair towards the front entrance of the facility. Although NA-M followed, NA-M did not come into arms reach of R129 until the front door

of the facility. R129 pushed the wheelchair down the hallway with NA-M walking beside R129. At 10:19 a.m. R120 walked out to the designated smoking area. NA-M followed approximately ten feet behind outside, then stood on the sidewalk. NA-M then left the area and returned into the facility. R129 retrieved a cigarette from a pack. Multiple residents were observed to be coming out to smoke. The smoking monitor was on the patio but did not watch R129. R129 sat on planter side and spoke with R14. At 10:23 a.m. NA-M returned to the smoking area from inside and immediately stood on sidewalk on other side of planter approximately 20 feet away from R129. NA-M made no attempt to make eye contact with R129 and was not in arms reach as he spoke with the smoking monitor. At 10:25 a.m. NA-M and R129 went inside with NA-M walking within arms reach of the resident.

On 5/8/14, at 11:22 a.m. R129 was observed lying in bed, NA-E was making the roommate's bed. NA-E verified she was assigned to be the 1:1 with R129. NA-E offered to stand outside the door while R129 was interviewed and the door to the room was closed. R129 stated she was waiting for an apartment and verified she "snorted cocaine" on 5/3/14, which she had reported to facility staff. When asked when this occurred, R129 stated it was "on Saturday" (5/3/14)." When asked where she snorted the the cocaine, R129 replied, "not in the facility...down the block." When asked if she received the cocaine from another resident (as indicated in the clinical record), R129 stated "someone from the street" gave it to her, but denied being able to remember the person's name, description, or gender. R129 said she snorted "about $20 worth." When asked what happened then R129 stated, "They sent me

to the hospital...They accused me of giving it to someone else." R129 explained she was accused of giving R14 cocaine on the same day by the 1:1 assigned to her that day. R129 stated the 1:1's name (NA-G) who was to be with her at all times. She said the reason for the 1:1 was because she was accused of "rummaging" in other residents rooms. R129 reported she had a 1:1 was assigned to be with her "since March." When asked where the 1:1 was when she received the cocaine from the person on the street, R129 shrugged looked up and away and stated, "I don't know. She wasn't with me." R129 said she was "a recovering addict," but denied social services had been provided by facility staff, including assistance to obtain CD treatment. R129 stated she would like to go to outpatient rehabilitation for drug addiction. R129 further added she was "not checked" for cocaine use at the ER, but was given two shots of Dilaudid. R129 explained she "thought" that was going to happen, yet admitted she was "surprised" to have received the narcotic pain medication. Although R129 was relaxed during the interview, she was hesitant to answer some questions and did not make eye contact.

On 5/8/14, at 11:30 p.m. NA-G verified the responsibility of the 1:1 staff was to remain at arms length with R129 at all times.

On 5/8/14, at 11:41 a.m. NA-J verified she worked on R129's unit and stated was unaware of alcohol or drugs were being exchanged on "my shift," but stated was aware of situation "weeks ago" when she came to work and noticed R14 was not in his room. NA stated she asked where he was and a NA "who was [R129's] 1:1" saw R129 go into R14's room and "exchange something." She stated she learned R14 was

sent to the hospital for "eating something." Stated had not witnessed any exchanges and stated if she had she would have reported it to the nurse.

On 5/8/14, at 11:40 a.m. NA-S reported seeing alcohol bottles in residents' rooms and smelled alcohol on a resident and reported it to a nurse, but was unclear when it had occurred. NA-S "heard rumor" of a resident dealing drugs in the facility, and recalled seeing a resident with marijuana in January or February, and "could smell it." NA-S further stated when she was assigned to be the smoking monitor, she overheard residents talk about it. NA-S believed R117 was a drug dealer, as the resident left the facility "a lot" and went to the gas station. NA-S further stated she believed R117 was talking money from residents to also "buy cigarettes." NA-S stated she was unclear what happened to the resident after she reported the marijuana, but stated the nurse was from an "agency" and told her the resident "could have it."

On 5/8/14, at 11:55 a.m. housekeeper (H)-A when asked, reported she had seen "empty pint bottles" of vodka in the trash by the front doors. The last time had been, "a few months ago," and she had reported any bottles she found. " H-A was unsure which resident was drinking, but believed the pint bottles were placed in the front trash so they "wouldn't get caught." When asked if H-A knew how the bottles had been obtained, she was unsure, but thought they may have been brought in by family members.

On 5/8/14, at 12:03 p.m. LPN-H stated she had confiscated alcohol from R37. LPN-H verified alcohol was provided to R37 and suspected to other residents of the facility, as well, but it was

{F 250}	Continued From page 81 unclear how it was being provided. LPN-H verified R129 was on 1:1 which meant within arms reach. LPN-H was unaware R129 had obtained cocaine in the facility. On 5/8/14, at 12:10 p.m. the health unit coordinator (HUC) stated she was aware of resident drug and alcohol use in the facility. The HUC stated there was "always hearsay between residents...their selling [drugs and alcohol] to each other...it's always stories," including hearsay stories regarding heroin and cocaine. The HUC had put "a lot of time in" reporting to hospitals, clinics and ER if a resident was a "drug seeker" and on restrictive recipient program, and R129 was going to ER, calling herself and getting Ambien, oxycodone and "is happy after." R129 "refuses to tell" about the prescriptions, and the HUC went to the social worker to report these concerns. R129 denied having pills, "but I know she did get them...every week" R129 was finding a new doctor, and not providing the correct paperwork, or altering paperwork. The HUC was aware residents consumed alcohol in the facility, and some became intoxicated, however, it was unclear how they had obtained it. "I feel like we're supposed to do something, 'cuz no one will take charge." The HUC was aware R129 obtained cocaine and was sent to the ER, but was unsure if a toxicology screen had been done, although she had asked for them in the past. The HUC said she and other staff believed R129's (making quotation gestures) "son" was R129's dealer, and described him as a man she referred to as her son, who was at the facility at the time the resident snorted the cocaine. Further review of the nursing progress notes also revealed indicated the following:	{F 250}

{F 250}	Continued From page 82 1) On 5/9/14, at 7:31 p.m. the pharmacy was contacted regarding R129's Percocet (narcotic pain medication) refills and determined 110 Percocet tablets had been delivered and outlined the delivery dates and the amounts provided. The note indicated R129 was informed of the information. 2) On 5/11/14, at 10:09 a.m. a note written by the HUC indicated North Memorial Medical Center (NMMC) called "requesting" R129's Medication Administration Records (MARs). The note indicated the RN from the hospital notified HUC R129 had been admitted to the ICU, had been intubated "due to acute alcohol intoxication." R129's toxicology screen was "negative for drugs but positive for alcohol with a level of .323." Although R129 had a staff person assigned as 1:1, R129 had been able to obtain and ingest a life threatening amount of alcohol. Although the administrator was updated, the clinical record lacked evidence the SA was also immediately notified of the incident. The record lacked documentation at the time of the incident, as well as pertinent assessment information such as vital signs and symptom descriptions. In addition, the record lacked evidence of an immediate determination of how, when or where R129 obtained the alcohol and/or if the assigned 1:1 was interviewed at the time. 2) On 5/11/14, at 10:55 a.m. a note written by the DON, recapitulated R129 was sent to the hospital, identified the time of transport as "around 4 am" on the night shift, and identified R129 was sent in "for intoxication." R129 had "become weak" and needed to be lowered to the floor." Two LPNs were contacted and the NA staff assigned to the 1:1 was called. The NA assigned to R129 "reported that resident has been in and out of [R14's room number] but did not notice any	{F 250}

{F 250}	Continued From page 83 exchange of alcohol. She also reported that resident [R14] was upset because the 1:1 has to be in his room too while resident is visiting...." R14 denied giving R129 alcohol, but "mentioned that resident had alcohol overnight." R14 denied knowledge of where R129 could have obtained the alcohol. 3) On 5/11/14, at 2:49 p.m. a note written by DON indicated NMMC was contacted to receive updates on R129's status. "I also requested to have the resident undergo a chemical dependency assessment to ensure that the resident can be transferred to a residential chemical dependency facility as appropriate, considering the resident's recent hospital trip to the hospital for snorting cocaine." 4) On 5/12/14, at 12:07 a.m. a late entry note (no indication for the date or time the late entry was for) indicated an NA staff "report to this writer that resident was in the bathroom longer than usual, came out and appeared drowsy, unsteady gait." R129 was identified at risk for falling, was verbally aggressive to staff and stated, "'I'm drunk.'" The room was checked and no evidence of alcohol was found. R129 "threw herself to the floor" and was sent to the ER at 4:00 a.m. On 5/12/14, at approximately 2:00 p.m. contracted licensed social workers (CLSW)-A and CLSW-B both verified upon hire to the facility, they had been working on "re-writing care plans and discharge planning." CLSW-A stated there was a third social worker who no longer came to the facility and a part time social worker on evening that was "reducing her hours to once a week." Both verified they had not specifically worked with R129 regarding CD treatment and verified was last offered to R129 on 4/4/14 and had not revisited CD treatment options after R129	{F 250}

{F 250}	Continued From page 84 reported cocaine use on 5/3/14. Neither was aware R129 had been hospitalized for alcohol toxicity and said they "should have been notified." CLSW-A and B had not worked the previous few days, as facility had not paid the contracted company's bill. CLSW-B expressed concern for the residents, and said R129 should have been reassessed after she had obtained and used cocaine, and both SWs felt R129 had been harmed. At 2:43 p.m. CLSW-A stated, "I cannot imagine how a resident who was on 1:1 would get that much alcohol in her system and when I got here on Sunday I came to the office to open the computer to see what happened and guess what, there was no nursing notes. I went outside to the desk and told the administrator and DON to get the nurse in to document and have the 1:1 fired. There are so many people here than I have seen on 1:1. For me 1:1 means the person needs to be somewhere else not at the nursing home." R86 was committed as mentally ill and chemically dependent per Hennepin County Commitment papers dated 3/12/13, to include admission to a nursing home for rehabilitation and when completed and/or mentally stable, again participate in chemical dependency treatment. The facility Resident List Report, provided 5/8/14, at 11:00 a.m. identified R86 as a known pot smoker. R86 was placed at harm as R86 was hospitalized due to alleged substance abuse. On 3/16/13, R86 was admitted to the facility per the Admission Record. Diagnoses include hepatic encephalopathy (confusion related to liver failure) and cirrhosis of the liver and hepatomegaly (enlarged and fatty liver) alcoholic liver damage, thrombocytopenia and anemia (blood disorders related to clotting factors not supplied by the damaged liver, psychosis, drug abuse and	{F 250}

routine since return to the facility. Medication side effects remain on MAR. Offered and resident refused social service visits, spiritual counseling, in house psych, outside psych, and AA/NA. Bio-psychosocial assessment of drug and alcohol use in the facility completed. Resident denies any drug/alcohol use and reports using only his prescribed medications. Declined all resources offered. Repeatedly said throughout interview, 'If I drink it will kill me.' Smoking assessment completed, resident denies any tobacco use. Risk of elopement/wandering assessment completed. Resident is not at risk for elopement/wandering. Has no history of elopement/wandering. Is alert and oriented x 3. Able to make needs known. Uses call light appropriately. Katherine Leslie, responsible party, called and updated on assessments and residents readmission to facility at 1635. Care plan updated to reflect assessments."

A vulnerable adult assessment dated 3/18/14, noted "past and recent chemical abuse. Fluctuating cognitive deficits related to liver damage, chemical use. Needs supervised LOA due to fluctuating cognition and chemical use."

A smoking assessment dated 3/18/14, indicated "reports of smoking marijuana outside, and recent drug use reported by resident."

A LOA safety assessment dated 3/18/14, indicated "mental illness, fluctuating cognition related to liver disease. Needs supervised LOA due to fluctuating cognition and chemical use. (Lacked mention of committed to the facility related to substance abuse and mental illness."

An annual MDS dated 3/22/14, had a "BIMS score of 15/15. R86 required setup for dressing and meals and was independent with all other cares."

On 4/13/14, a care conference indicated: "long

{F 250}	Continued From page 89 term placement waiting for liver transplant. Is aware of need to remain sober to stay on the (transplant) list. Does not want to go to treatment. Discussed AA (alcoholics anonymous), stated he has tried in the past." The care plan dated 3/27/14, indicated: R86 was a vulnerable adult related to cognitive limitations, physical limitations, history of substance abuse past and recent, interventions included: Provide resident with treatment program information as needed and as requested. Resident has been assessed and is appropriate to leave facility for appointment with schedule transport. Resident has been assessed and may not leave this facility without supervision due to fluctuating cognition secondary to liver disease and substance abuse. The medical record lacked evidence of psychiatric or supportive treatment for chemical/substance abuse. Per CLSW-B, "tried to build report with him. He had been given 30 day notice for Marijuana in his room, but it was not a proper notice and he had not been given another." R86 planned to stay in the facility until he received a liver transplant. CLSW-A stated, "I thought people would not be eligible for a liver transplant if they were actively doing drugs." R86's The medical record lacked evidence of psychiatric or supportive treatment for chemical/substance abuse. R86 was committed to prevent exposure to alcohol and chemical substances of abuse. The facility lacked coordination of care between departments and lacked review of facilities own progress notes, which verified substance abuse, and failed to provide an environment free of chemical/alcoholic	{F 250}

substances, or to transfer R86 to a secured environment where appropriate care could be provided.

R41:
The facility failed to provide supervision to prevent ingestion of alcoholic substances, which resulted in actual harm to R41 on 5/1/14. While intoxicated the resident drove his motorized wheelchair (w/c) off the curb, fell over, sustained injury to his right forehead and right arm. R41 was hospitalized with low blood pressure, low magnesium and low potassium.

R41 was observed to sun himself in the facility driveway, outside of the front door and toward the public sidewalk on 5/5 at 2:09 p.m. and 5/6 at 10:46 a.m., 5/7 at 10:45 a.m., 5/8 at 2:15 p.m., 5/9 at 3:00 p.m., 5/10 at 2:30 p.m., 5/12 at 2:00 p.m., and 5/13/14 at 3:35 p.m. On 5/11/14, at 11:15 a.m., R41 was observed to sun himself on the smoking patio. All observations were unsupervised.

R41 was admitted to the facility per the Admission Record dated 2/4/14, from another long term care facility. R41 had a history of bipolar disorder (a mood disorder with manic and depressed phases), schizophrenia and polyneuropathy in diabetes (nerve damage usually in the feet and legs that can create sensory, motor and bodily functional problems).

The admission MDS dated 2/17/14, indicated R41 had a BIMS score of 15/15 which indicated no cognitive impairment. A Patient Health Questionnaire (PHQ9 - detects depression) was completed and R41 had a score of 7/27, which indicated mild depression. R41 had verbal

{F 250}	Continued From page 91	{F 250}		

behaviors directed at others one to three days during the seven day look back period. R41 was dependent on staff and required total assistance of two persons and a mechanical lift for transfers and toileting; extensive assistance of two persons for bed mobility; extensive assistance of one person for personal hygiene, dressing. R41 was totally dependent on the electric, tilt in space, w/c for locomotion on and off the unit. The CAAs dated 2/17/14, indicated R41 would be referred to the house psychologist.

An LOA Safety Assessment dated 2/10/14, indicated R41 was safe to leave the facility on unsupervised LOA, and left the facility daily on unsupervised LOA according to staff.

A Vulnerable Adult Assessment dated 2/10/14, indicated the resident utilizes an electric w/c for ambulation. "Resident is OK to go on unsupervised LOA." A Smoking Evaluation dated 2/10/14, indicated independent with smoking and smoking materials.

The care plan revised on 3/18/14, indicated R41 had impaired cognitive function or thought process related to personality disorders of bipolar and schizophrenia. R41 had a history of being verbally abusive to staff and other residents, and required assistance with ADLs, and was safe for unsupervised LOA.

A Physician's Progress Note dated 4/15/14, indicated the visit was to establish primary care and recommend R41 for a psychiatry consult per R41's request. In addition, a recommendation was made by the physician for R41 to have a referral made to a pain clinic consult for chronic use of opiates (oxycodone) and morphine (both

{F 250}	Continued From page 92	{F 250}		

narcotics). The medical record lacked evidence that the physician's recommendations were scheduled and that R41 went to the consults.

A progress note dated 5/1/14, at 3:05 p.m. revealed R41 was off the property in the neighborhood. He became intoxicated (on a LOA in the neighborhood), when he returned to the facility he drove his electric w/c off the curb on the driveway to the facility. R41 was found lying on pavement on his right side and his speech was slurred, but R41 remained alert and oriented. "He stated his last drink was 5 minutes ago. He was incontinent of urine and had a laceration on his forehead, he complained of right arm pain." The physician was notified and 911 was called. R41 was transferred to NMMC for further evaluation. He was admitted to ICU with low blood pressure, low potassium and low magnesium. The medical record lacked evidence that the assessments were reviewed and/or revised for R41's LOA status. On 5/1/14, the fall risk care plan was updated to include the fall on the driveway, but lacked mention of the causative factor of intoxication.

On 5/5/14, at 1:43 p.m. R41 returned to facility. New diagnoses from the Intra-agency Transfer Form dated 5/5/14, included: fall, intoxication, and alcoholism. A Physician's Order on 5/5/14, included, "No longer okay to leave unsupervised LOA's." A WanderGuard was ordered for the resident. The care plan revised on 3/18/14, lacked mention of supervised LOA.

On 5/6/14, at 9:16 a.m. the facility met with resident to discuss the incident that occurred on 5/1/14, the facility obtained an order for supervised LOA. Resident stated he was drinking

{F 250}	Continued From page 93	{F 250}		

because he was depressed. The facility placed a WanderGuard on his w/c.

Even though R41 had a WanderGuard placed on the w/c, R41 continued to remain at risk due to the facility, as the facility staff continued to silence the alarm at the front desk and let him out of facility. R41 continued to leave the facility and move about the property unsupervised. R41's medical record lacked evidence of any social service intervention at the facility for his depression and drinking related to depression which would include providing information such as alcoholics anonymous (AA) or referral to any place for help or support. Even though the CAAs dated 2/17/14, indicated R41 was referred to a house psychologist, R41's medical record lacked any evidence R41 had seen the house psychologist.

The medical record lacked evidence that social service intervention had been put into place since his last MDS dated 2/10/14 was completed. The MDS depicted R41 as having depression was identified at 7 out 15. The Care Area Assessments indicated he would be seeing the house psychologist and R41 had not been seen by the house psychologist. The medical record also lacks any staff intervention for providing information for his drinking such as like AA and referral to any place for help. Therefore, he was still drinking for depression and left the facility unsupervised. R41 remains at harm.

The Temporary Social Work Contract dated 3/15/14, indicated services provided included: 1. Conduct and document psychosocial assessments. 2. Complete the MDS, care plan and any other required paperwork. #. Participate

in care conferences. 4. Facilitate discharge planning. 5. Communicate with resident families as needed during the course of providing stoical services and discharge planning. 6. Facilitate admissions if required.
R37's Progress Notes indicated R37 had been found with alcohol/vodka on 2/21/14, 2/22/14, 2/27/14, 3/2/14, 4/13/14, 4/23/14, 4/24/14, 4/25/14, 5/3/14, 5/5/14, 5/6/14, 5/7/1, 5/9/14 and 5/10/14. R37 was hospitalized 2/22/14, 4/23/14 and 5/10/14, related to alcohol/drug use. The Admission Record dated 1/14/14, indicated R37 was admitted to the facility on 9/19/13, with diagnoses which included altered mental status, and personal history of alcoholism.

Observations of R37 revealed the following:
-On 5/5/14, at 2:53 p.m. R37 was observed approaching a white minivan parked in front of the facility.
- On 5/6/14, at 1:30 p.m. R37 was observed staggering down the hallway with the HUC and in a loud voice stated he was crazy.
- On 5/6/14, 2:02 p.m. R37 went outside without shoes on. Two staff stopped him at the nursing station and sent him back to his room for shoes. R37 left his room and went directly outside without shoes on again, walked to the smoking patio and returned to the facility.
- On 5/7/14, at 8:18 a.m. R37 was observed standing next to R117 on the smoking patio with his wallet out. Another resident (R1) arrived and R37 handed his wallet to her. Surveyor was unable to see if R1 took anything from the wallet before she handed it back to R37. R37 was observed to lean close to R1 and talk to her and gave her his wallet back. At 8:24 a.m. R1 put R37's wallet back in his left pants pocket.
- On 5/8/14, at 11:48 a.m. R37 was observed in

bed with his back to the door. R37 rolled over and looked at surveyor and rolled back towards the wall. R37 stated he did not want to talk now and would talk in an hour or two.
- On 5/8/14, at 3:46 p.m. an attempt was made to interview R37 and he refused.
- On 5/9/14, at 7:23 a.m. R37 was observed coming out of his room, stated he did not feel good and was going to see if there was any coffee. At 7:28 a.m. R37 was observed coming from the West hallway. R37 was then observed to push another resident back down the West hallway and was observed outside room 186 R9. There was no staff with R37 when he was observed. When R37 returned to the nursing station, he told the HUC he had gotten cigarettes from R9. The HUC asked R37 if he was alone and R37 responded that he was and she asked him where his partner was. NA-L approached R37 and stated she was with him today. NA-L verified she was providing 1:1 for R37.
- On 5/10/14, at 1:07 p.m. R37 was observed being taken to an ambulance. R37 was animated and chatting with the medics. Staff reported that was how you know R37 was intoxicated, when he was friendly and chatting.

The Nutritional Status CAAs dated 9/26/13, indicated R37 was at risk for impaired nutritional status due to chronic ETOH abuse and cirrhosis. Review of the Cognitive Loss/Dementia, Mood State, Behavioral Symptoms and Psychotropic Drug Use CAAs dated 10/7/13, revealed a lack of a summary regarding the triggered areas.

The Progress Notes were reviewed and the following was noted:
- On 5/2/14, indicated R37 removed the wander guard and refused a new one to be placed.

{F 250}	Continued From page 96 - On 5/3/14, indicated R37 was walking in the hallway "wobbling" and requested staff give him a shower at 3:00 a.m. R37 was unable to maintain his balance and appeared "intoxicated." Two almost empty bottles of vodka were found in his room. - On 5/5/14, at 3:53 p.m. indicated R37 had exhibited signs of intoxication with an unsteady/staggering gait, slurred speech, odor of alcohol and unkempt appearance. R37 was noted to have continually gone outside, stated he had called a limo and was going to Las Vegas. - On 5/5/14, at 4:56 p.m. indicated R37 had slurred speech, smelled of alcohol and had a staggering gait. - On 5/5/14, at 10:25 p.m. indicated R37 was "intoxicated" and was found with an almost empty bottle of vodka. - On 5/6/14, which indicated it was a late entry for 5/5/14, at 6:00 p.m. indicated R 37 was noted walking outside towards the back of the building. R37 was noted to be walking alone with a staggering gait. When approached by staff, R37 stated he was going to Las Vegas. No odor of alcohol was noted and when asked what he had been doing to become so impaired, R37 reported he had gotten cocaine and heroin from another resident and confirmed he had been injecting the drugs. Several scattered purple bruises were noted on his forearms. At 1:55 a.m. indicated R37 reported his heart was thumping out of his chest and was found to have a blood pressure of 168 /118 with a pulse of 118. At 4:37 a.m. indicated R37 exited his room without clothing and had a strong odor of alcohol on his breath. Four empty bottles and one unopened bottle of alcohol were found in R37's room and were removed by staff. Also noted R37 started having tremors and palpitations with increased pulse and blood	{F 250}

{F 250}	Continued From page 97 pressure due to alcohol withdrawal and demanded medications. - On 5/7/14, at 12:04 p.m. indicated R37 was exhibiting signs and symptoms of intoxication as evidenced by odor of alcohol, unsteady/slow/staggering gait, slurred speech, confusion and unkempt appearance. A pattern of missed pain clinic appointments due to intoxication was noted and indicated further appointments would not be made due to ongoing intoxication and inability to follow through with appointments. In addition, R37 had a full bottle of vodka and refused to give the bottle to staff. The note indicated the administrator directed if R37 was unwilling to willingly give staff the alcohol bottle, it was ok for the resident to keep the alcohol and if he became drunk or disruptive to call the police and have him taken to detox. - On 5/8/14, at 3:42 p.m. indicated R37 was placed on 1:1 observation related to incidences of getting intoxicated. - On 5/9/14, indicated R37 "was clearly intoxicated." An empty pint bottle of vodka was found in his room and was noted as the third empty pint bottle taken from R37's room in a 48 hour span of time. - On 5/10/14, indicated R37 was observed giving his credit card to R117 on 5/9/14. A second note indicated R37 returned from LOA accompanied by a friend of another resident (R1). R37 was observed to be shaky and verbalized he was unsteady on his feet. R37 was noted to have shakiness, profuse sweating, and sluggish pupils. R37 was noted to have a blood pressure of 178/130 and a pulse of 120s to 140s. - On 5/11/14, indicated R37 had a drug screen positive for methadone at the hospital. R37 did not have a prescription for methadone.	{F 250}

{F 250}	Continued From page 100 no other unsupervised LOA. - A risk for elopement related to alcohol abuse and psychoses care plan revised 3/16/14, noted a history of returning to facility after unsupervised LOA displaying signs of alcohol consumption and/or with a supply of alcohol. The goal included R37 would not to leave facility unattended unless a medical appointment and R37's safety will be maintained. The interventions indicated R37 cut off the wander guard and refused to have another one placed and was placed on 15 minute checks. Check room if suspected alcohol. - A Mood/Behavior care plan initiated on 4/23/14, indicated R37 had a history of alcohol abuse and actively drank at the facility. The care plan noted R37 was sent to detox on 4/23/14, due to being very intoxicated. The goal indicated R37 would like to stop drinking alcohol with an intervention to check room daily for alcohol and check R37 for signs of intoxication. - An at risk for adverse reaction from medications related to alcohol care plan dated 4/25/14, indicated NP was aware of R37's alcohol, nursing staff to encourage to restrain from using alcohol and if R37 appeared intoxicated it was ok to administer medications. Another intervention dated 5/8/14, included 1:1 supervision due to alcohol abuse and intoxication. A Vulnerable Adult Assessment dated 3/16/14, indicated R37 had both past and recent substance abuse, was not safe for unsupervised LOA except to appointments and had significant alcohol use when out on unsupervised LOA. The quarterly MDS dated 3/18/14, indicated R37's cognitive skills for daily decision making was independent with consistent/reasonable decisions.	{F 250}

{F 250}	Continued From page 101 A Resident Refusal of Medical Treatment Form dated 5/5/14, indicated R37 was "wander guarded [sic]" to the facility for resident safety related to history of alcohol abuse, staggering gait and slurred speech. With the risks of refusing noted as facility wouldn't be aware if R37 left with potential for fall risk and injury off facility grounds with no one to provide aid. A letter dated 5/10/14, indicated a first offense of the facility smoking policy as R37 reported to staff he had gotten cigarettes from R9. On 5/7/14, at 10:02 a.m. the ombudsman was interviewed and wanted to know if surveyors were aware of residents purchasing alcohol and drugs. Reported she believed residents were giving other residents money and credit cards to go out and purchase things for them. She reported a resident with chemical dependency problems had been drinking, room checks were being completed and staff was finding alcohol bottles. Reported R37 was being found intoxicated and she was involved in discussing abuse prevention planning if intoxicated and the effects of alcohol on R37's medications. She reported the physician was encouraging discharge planning to a facility that allowed drinking. She also indicated a number of residents were accessing illegal drugs at the facility. The ombudsman reported she had been at the facility on 5/6/14, to discuss the concerns. On 5/7/14, at 10:05 a.m. the administrator stated the ombudsman was called 5/6/14, to speak with the facility regarding R37 giving his credit card to R117 to purchase alcohol and R37 had been "drunk for days."	{F 250}

On 5/8/14, at 11:51 a.m. LPN-B stated she was aware R37 had a doctor's order and can drink as long as there are no behaviors and if behaviors occur she can call detox. LPN-B stated she did not know where R37 got alcohol from.

The safety monitor, NA-M was interviewed on 5/8/14, at 11:55 a.m. and stated he has not seen R37 exchange money or alcohol and stated he has heard about exchanges but could not remember who he heard it about.

The HUC was interviewed on 5/8/14, at 12:15 p.m. and stated "it's a nightmare; [R37] is drunk every day." She stated she had her suspicions about where the alcohol was coming from but when she asked R37 he refused to tell her. R37 told her he had given his credit card to R117 to buy things for him. The HUC stated R37 was drunk every day when she left and was drunk when she came in on 5/8/14. She reported that on 5/5/14 or 5/6/14, she had observed R37 in the parking lot, was told there was nothing they could do by the facility administrator and requested assistance from the operations director to get R37 back in the building. The HUC reported she had requested the safety monitor to put R37 on every 15 minute checks but knew that was not enough. She stated other residents were on 1:1 for drug use and wanted to know what the facility was going to do to keep R37 safe. The HUC stated "we're not doing [R37] any justice" and "it's a shitty plan to keep people on 1:1 forever."

On 5/10/14, at 1:19 p.m. the consultant administrator was approached after several staff reported they had not been informed of the immediate jeopardy (IJ) that was called on 5/9/14,

at 2:02 p.m. The consultant administrator stated she wanted the administrator to indicate why staff was not informed of the IJ and asked "are we in trouble?" The administrator approached and stated, yesterday when the IJ was called, by the time we were done with a meeting with our boss, the nurse managers had gone for the day. The administrator stated he thought they would come up with a plan and would have an all staff meeting 5/10/14, to inform staff of the IJ. The administrator further stated a meeting was scheduled at 1:45 p.m. and verified staff had not been informed of the IJ.

On 5/10/14, at 1:30 p.m. the administrator stated R37 had been taken to the hospital for delirium tremens (DTs-a severe form of alcohol withdrawal that involves sudden and severe mental or nervous system changes).

On 5/12/14, at 8:59 a.m. RN-B and LPN-A stated R37 had gone to the bank with a friend on 5/10/14, and were not sure if the 1:1 had gone to the bank or not and would have to check.

The DON was interviewed on 5/12/14, at 9:05 a.m. and stated a "guy named [friend-A]" who is a friend of R1 went with R37 to the bank. The DON stated both the administrator and the consultant administrator were aware that friend-A was a friend of R1. The DON stated the 1:1 refused to go to the bank with R37 and friend-A signed R37 out. The consultant administrator was going to go with R37 and friend-A to the bank until it was decided the facility was not comfortable with her going with to the bank either. The DON stated he reminded R37 he could not go because he had orders for no LOA and the administrator, consultant administrator and the social worker

{F 250}	Continued From page 104 decided R37 could go anyway. The DON stated he had no idea where R37 had gotten methadone from. When interviewed on 5/12/14, at 1:35 p.m. CLSW-A stated during a room search a quart bottle of alcohol had been found in R37's room and three plastic containers with the labels removed which nursing indicated were methadone containers. When interviewed on 5/12/14, at 1:52 p.m. the administrator stated he and CLSW-A were involved in R37's LOA. The administrator stated SW-A was under the impression R37 was allowed to go on LOA and R37 returned with a card from Walgreens so they knew he had not followed his agreement to only go to the bank. The administrator stated friend-A would not be able to take R37 on LOA again. The administrator stated he was not aware R37 had orders for no LOAs and he believed CLSW-A and had not checked the chart. The administrator stated he was also not aware of friend-A's relationship with R1 and the DON had not told him about the order for no LOA and friend-A's relationship with R1. Upon interview on 5/13/14, at 8:09 a.m. CLSW-A stated on 5/10/14, prior to R37 leaving on LOA she was told by nursing (she could not remember who) that R37 could leave the facility with supervision. She reported she made it clear to friend-A that R37 could only go to the bank and nowhere else. She stated she told friend-A that R37 would try and talk him into going to the liquor store and R37 could not go there. Friend-A reassured her he had been sober for ten years and would never take R37 to a liquor store. The SW-A stated after R37 left, nursing (did not	{F 250}

remember who) told her R37 had orders for no LOA and friend-A was R1's drug dealer. She stated it would have been nice to know the information before she had allowed R37 to go on a LOA. She stated she had not looked at R37's chart because she trusted nursing knew the correct information. She also stated R37 had been keeping alcohol under the edge of his mattress and she could not understand why nursing did not find the alcohol when they made the bed. R37 remained at harm as he did not receive the requested services to assist him with the self-reported drug/ETOH abuse.

R14 was not provided medically-related social services to address known illegal drug use in the facility as recently as 5/3/14.

R14's admission record dated 1/14/14, indicated diagnoses to include depressive disorder, epilepsy and below the knee amputation. R14's significant change MDS dated 12/31/13, identified R14 had moderately impaired cognition, no mood problems and physical behavior symptoms towards others one to three days in the assessment period. The MDS indicated R14 required extensive assistance with most ADLs but was independent with locomotion on and off the unit and eating. The CAA was all dated 1/9/14; CAA for cognitive loss/dementia indicated R14 was able to understand and be understood. CAA for ADL function and rehab potential identified R14 had "alcohol abuse" and "alcohol induced dementia. The CAAs did not identify any history of drug use.

R14's Vulnerable Adult care plan dated as revised on 4/26/14, defied R14 had a "History of chemical abuse, including marijuana and heroin. The care

{F 250}	Continued From page 106	{F 250}		

plan goal indicated R14 would "remain safe and free from abuse/neglect." The care plan interventions indicated R14 refused all in-house and outside psychiatric services. The care plan identified R14 required supervision for LOA from the facility.

A nursing Progress Note dated 5/3/14, at 8:35 p.m. indicated a NA reported to a nurse they saw R14 "put something" in a small plastic bag "possibly drug" at 8:30 p.m. The note indicated a nurse approached R14, noted he had something in his mouth and asked the resident to "spit out" what was in his mouth. R14 refused to open his mouth, swallowed the content and then opened his mouth for the nurse. The note indicated R14 was "non-cooperative" and "attempted to hit the nurse with his fist." The note indicated the physician was notified and R14 was sent to the ER for evaluation.

A North Memorial Robbinsdale HUC Transfer Packet indicated the results of toxicology screen identified R14 was positive for "THC Metabolites [the active drug components of marijuana]" from the past 24 hours. The report identified R14 had the lab for "drug ingestion."

Although the specific incident was documented on 5/3/14, the clinical record lacked documentation including, but not limited to: immediate notification of the administrator and SA, thorough investigation of the incident to determine potential source(s) R14 may obtained the illegal drug from, notification of law enforcement, follow up assessment of R14's safety, evaluation of R14's access to leave the facility, such as to smoke; documentation of how they would prevent potential future instances of

{F 250}	Continued From page 107 R14's illegal drug access and ingestion, monitoring of R14 and interdisciplinary involvement, such as medically-related social services. On 5/8/14, at 11:32 a.m. R14 was interviewed. R14 stated he did not recall the incident on 5/3/14. R14 stated his memory was poor due to being an "epileptic." R14 denied awareness of illegal drug and alcohol activity in the facility. When asked what R14 would do if she observed illegal drug or alcohol activity in the facility, R14 stated he would "tell the resident not to do it," but would not notify staff. When asked why he would not notify staff, R14 stated, "'Cause we all have enough troubles, if someone wants a little activity on the side, go for it!" On 5/12/14, at 10:26 a.m. the DON was interviewed, verified had not read the plan of correction and did not know what the plan was. DON verified he was not aware of changes made and reiterated he was "waiting for this [the survey]" to "blow over" and then he had plans to work on "problems" in the facility. Stated he read the survey results from 2013 and stated he was not given an accurate picture of the facility problems. Verified there was no system for monitoring staff to ensure facility policies were followed. DON was unclear on the specifics of R14's incident. On 5/12/14, at approximately 2:00 p.m. CLSW-A and CLSW-B both verified they were not aware or informed of R14 obtaining and ingesting an illegal drug. Both verified they were not notified R14 was sent to the hospital and had a positive toxicity screen for marijuana. Both CLSW's explained they would have assessed R14 and reviewed potential CD treatment options with R14. Both	{F 250}

{F 250}	Continued From page 108 CLSWs expressed R14 may require increased supervision due to accessing an illegal drug and his history of chemical dependency. Both verified they had access to the computer clinical record, CLSW-A stated the facility lacked consistent documentation of incidents, interventions, assessments and follow up. R56 had conflicting advanced directives dated 4/21/14 and 4/26/14, in her record. Review of the hospice Team Care Plan dated 5/7/14, indicated R56 signed onto hospice on 4/21/14, with a diagnosis of chronic liver disease with a prognosis of less than six months to live. A Provider Orders for Life Sustaining Treatment (POLST) dated 4/21/14, indicated R56's cardiopulmonary resuscitation status (CPR) status was DNR/Do Not Attempt Resuscitation (Allow Natural Death) and goals of treatment were noted as Comfort Care. The POLST dated 4/21/14, was signed by R56's husband. A POLST dated 4/26/14, indicated R56's CPR status was CPR/Attempt to Resuscitate, directed to Limit Interventions and Treat Reversible Conditions and included interventions and treatments of intravenous (IV)/intramuscularly (IM) antibiotic treatment and IV fluid administration. The POLST dated 4/26/14, was signed by R56. The annual MDS dated 2/24/14, included a Brief Interview of Mental Status Score (BIMS) of 15 (cognitively intact). Review of the facility care plan dated 4/23/14,	{F 250}

indicated R56 was DNR/do not intubate (DNI), comfort cares and was receiving hospice services, medical directives would be honored with an intervention to coordinate care with hospice.

Review of the hospice care plan dated 5/7/14, indicated R56 was DNR with an intervention of "DO NOT RESUSCITATE."

A Physician's Order dated 4/18/14, directed ok for hospice to evaluate and treat and ok for in-house psych to see.

A nurse practitioner progress note dated 4/30/14, noted a diagnosis of end stage liver disease, now on hospice secondary to decline in condition.

A Residential Communication Note from hospice dated 5/12/14, indicated a message was left with the hospice social worker to call the facility social worker regarding POLST.

A Progress Notes dated 5/12/14, indicated CLSW-B spoke with R56 about her POLST. R56 reported to CLSW-B she wanted to be DNR/comfort cares and that was also what her husband wanted. CLSW-B indicated she placed the correct POLST information in the advanced directives section of the medical record.

A Progress Notes dated 5/12/14, indicated CLSW-B spoke with R56's husband regarding the POLST and hospice. R56's husband stated to CLSW-B the POLST should be DNR/comfort cares.

On 5/13/14, at 8:41 a.m. a review of the Physician's Orders signed 4/9/14 continued to

{F 250}	Continued From page 110 direct "Full Code." On 5/7/14, at 9:31 a.m. RN-A reported he would go to the POLST in the front of the chart to determine what to do if R56 was found without a pulse and not breathing. The POLST in the front of the chart was the one dated 4/26/14, directing CPR. When interviewed on 5/7/14, at 10:43 a.m. LPN-A stated the POLST dated 4/26/14 would be the current one and would be the one the nurses would refer. On 5/7/14, at 10:45 a.m. the NP stated her plan of care for R56 was DNR and comfort care only. The NP stated she did not feel the resident was capable of making a decision for her POLST and the decision should be made by R56's husband. Upon interview on 5/7/14, 10:55 a.m. the hospice RN-E stated she was unaware the POLST for R56 was changed on 4/26/14. RN-E stated CLSW-D completed the POLST dated 4/21/14, with R56's husband. When interviewed on 5/7/14, at 12:04 p.m. CLSW-D stated the reason why the POLST dated 4/21/14, was signed by R56's husband was R56 "was really confused and uncooperative" and directed all questions to her husband. CLSW-D stated she was unaware the POLST was changed on 4/26/14, and would expect the facility to notify hospice with any changes because full code and the treatments requested would not be a hospice focus of care. On 5/7/14, at 12:14 p.m. the HUC verified the facility did not have a hospice care plan for R56.	{F 250}

{F 250}	Continued From page 111 On 5/7/14, at 1:08 p.m. the HUC provided a hospice care plan and stated the care plan was faxed to the facility on 5/7/14. When interviewed on 5/7/14, at 12:26 p.m. NA-D stated he does not know what hospice does for R56, he sees them come in but that's it. Upon interview on 5/7/14, at 2:01 p.m. RN-F stated the POLST dated 4/21/14, was signed by the hospice medical director on 5/7/14 with the original effective date of 4/21/14. RN-F stated she expected the hospice care plan to be in the chart within two weeks of enrollment. When interviewed on 5/9/14, at 9:22 a.m. R56's husband stated he recalled signing the POLST dated 4/21/14 and verified his expectations were R56 was DNR and comfort care only. On 5/12/14, at 1:50 p.m. CLSW-B stated she had followed up with hospice and the intent is for R56 to be DNR and CLSW-B would make sure that was in place. RN-B was interviewed on 5/13/14, at 11:41 a.m. and stated she was not aware of the code status discrepancy. RN-B stated she or the nurse would be responsible for communicating with the physician regarding code status. RN-B verified the Physician's Orders for Full Code did not match the POLST dated 4/21/14, and the nurses would have mixed guidance for what to do in case of emergency. The facility Social Services/Social Work policy (undated) directed "Work with the interdisciplinary team and administration to promote and protect resident rights and the psychological well-being of	{F 250}

{F 250}	Continued From page 112 each resident." A hospice policy was requested and was not provided. R117 was identified by the facility as questionably buying cigarettes and drugs, and selling within the facility. The facility failed to act upon allegations that R117 was bringing drugs, alcohol and cigarettes into the facility that caused actual harm and hospitalization to other residents. R117 was admitted to the facility 1/21/14, with admission diagnoses of cardiomyopathy (weakened heart muscle with decreased pumping ability), Atrial fibrillation (irregularly irregular heart beat that causes the heart chamber to be under filled when pumped and can lead to inadequate heart pump and life threatening blood clots in the heart), chronic Coumadin use (to thin the blood and prevent blood clots from forming) congestive heart failure (fluid buildup in the lungs or extremities due to poorly pumping heart), shortness of breath, hypertension (high blood pressure), anxiety, and depression. The admission MDS dated 2/3/14, indicated R117 had a BIMS score of 15/15, which depicted no cognitive impairment. R117 was independent with all activities of daily living and mobility. R117's LOA Safety Assessment dated 3/18/14, indicated the resident was assessed as appropriate to leave the facility unsupervised; a Smoking Assessment dated 3/18/14, indicated R117 was safe to smoke. A Vulnerable Adult assessment dated 3/18/14, indicated a recent history of resident to resident aggression, can be aggressive when confronted, had a history of substance abuse, but denied recent use, and was safe for unsupervised LOA.	{F 250}

The care plan revised 4/27/14, indicated R117 did exhibit verbal abuse/aggression towards staff. "Staff has reasonable cause to believe that Resident has brought alcohol & drugs into the facility for other Residents." R117 had displayed actual physical behaviors/physical fight with roommate. R117 would play music very loud and would not turn the music down which disrupted other residents. R117 often left the facility and did not return at said time. The interventions were R117 would cease bringing any type of alcoholic beverages or illegal drugs into the facility and would not exhibit threatening behavior toward staff or other residents. R117 would follow the facility policies and procedures R117 would return to facility at designated time or will call facility to report he would be late. "If Resident becomes disruptive, aggressive/not redirect able, threatening to others, 911 will be called."

The progress notes were reviewed and noted:
- On 2/12/14, at 9:11 p.m. a progress note indicated: Health status note: "resident signed out at 10:00 a.m. and wrote to be back at 6:00 p.m. tonight. Resident is not back yet. Resident did not leave number to call and does not have emergency contact person to call. Writer called 911 and reported him missing. Writer also notified administrator."
- On 2/13/14 at 6:39 a.m. a progress note indicated, "Police took report during this shift about resident reported missing during the PM shift. Resident did (not) return to facility at this time. Will continue to search. Progress notes lacked documentation of R117 return to the facility."
- On 2/16/14, 9:06 a.m. a progress note indicated, "resident was aggressive and verbally abusive to

{F 250}	Continued From page 114 fellow resident that is his roommate, he was swearing at him, calling him the F word, told him to get the F out of here, even went beyond and told him, there nothing wrong with you. Roommate said he gave a lot of trouble. A call was placed to administrator and DON we are continuing to monitor supervisor is aware." - On 3/27/14 at 4:01 p.m. a progress note indicated, "Resident had a visit from his relocation worker today; he became upset and was yelling and swearing during their visit. Writer and environmental services director approached to follow up with him. He was not in his room; drug paraphernalia was on his dresser and removed room the room. Resident was found in the staff lounge and he was educated that he could eat his meal in the dining room with other residents, continued to refuse to leave and swore at relocation worker who called 911. Police arrived and took drug paraphernalia and spoke with resident. ...states he wants to be independent. Writer called Hennepin county adult protection services to express the concern about resident's behaviors and potential risk to others. They stated that they could not take a report unless actual harm occurs. Staff educated to call 911 and CEP [common entry point] should aggressive behaviors towards others occur. Resident is calm at this time." - On 3/31/14, at 4:43 a.m. a progress note indicated, "AM nurse reported resident went out on LOA on 3/30/14, as usual. However, resident did not return to facility as required. About 02:00 a.m. Writer called police and made the report. Two police officers came to the facility and said the report should only be made after 24 hours." - On 3/31/14, at 1:40 p.m. resident had still not returned from LOA on 3/30/14. "No phone numbers on file to try to reach resident."	{F 250}

{F 250}	Continued From page 115 - On 3/31/14, at 2:58 p.m. R117 just returned from LOA at 2:30 p.m. "Meeting held with resident about LOA orders as resident does not have overnight LOA orders. Those present, Writer, Administrator, DON and NA-N, nurse. Discussed with resident that if he signs out he must return at said return time as facility is responsible for resident and cannot care for him if he is not here. Resident yelled out that he needs a safe discharge place and MD orders in order to d/c. Writer stated that is different from AMA as AMA means he is discharging himself without MD orders. Resident stated understanding. Discusses that if resident goes on LOA he must be back at midnight or he would be AMA d/c. Resident stated understanding." - On 4/11/14, at 3:18 p.m. "Residents relocation worker met with him today. He is frustrated about the time that the relocation process is taking. He toured GRH [group residential housing] housing this past week, however, did not like the setting it was in. Relocation worker will be bringing resident to apply for his MN ID [identification] and social security card on Monday 4/14. Resident is working on applying for his birth certificate and has stated that he will do this independently. Relocation services continue to follow, social services continue to follow discharge planning." - On 4/25/14, at 10:11 a.m. a progress note indicated, "Per staff, there is suspicion that Resident is bringing alcohol into facility for other Residents. LSW & Director of facility operations [DFO] met with Resident to report that due to the continuous suspicion of alcohol being brought into the building, we would be going through his things to check for any alcohol, drugs or other materials deemed unsafe in a Residents room due to the State & Federal safety guidelines. There were tools, power tools, exacto knives,	{F 250}

{F 250}	Continued From page 116 multiple scissors & many other sharp objects that were gathered and placed in a duffle, which was filled, taken to the Maintenance room to be inventoried and kept safe by the DFO. Resident made several sarcastic comments while we were in his room. Overall, he posed no problem and was not threatening in any way. Will continue to do random checks." - On 4/26/14, (no time) a progress note indicated, officer from the Minneapolis Police department (MPD) came regarding the seven credit cards that were found in R117's room that were not his name. "Officer took the cards and will check to see if any of them had had any activity or been reported stolen." - On 4/30/14, at 3:00 p.m. a Quarterly Social Service Assessment (progress note) indicated: Staff continues to provide cues and reminders as Resident does present with forgetfulness at times. Resident's relocation worker will continue to assist Resident in securing alternate placement in the community. Resident at times becomes frustrated over this d/t [due to] length of time it is taking. He has been assessed and may leave the facility unsupervised. Facility has reviewed requirements for unsupervised LOA with Resident and he is aware that if they are not followed that he may be required to only leave the facility with supervision. Resident has been assessed and is an independent smoker. Resident has a history of bringing in alcohol and drugs in to facility. Recently Resident was found to have numerous credit cards in his possession that were not his, police were notified and credit cards were confiscated. - On 5/2/14, at 2:00 p.m. a progress note indicated, "Resident declined to come to the smokers meeting to be updated on the facility policy and procedure regarding smoking. {F 250}	Continued From page 117 and administrator attempted to meet with resident to give resident a copy of the facility policy and discuss the rules regarding smoking. Resident refused to meet, writer asked if a copy of the policy could be left with the resident, he stated 'no' Writer asked when a good time would be to come back, he stated "tomorrow" (which he also stated yesterday when he refused to come to the meeting). Writer expressed the importance of receiving the information today, he continued to decline. Writer informed him that not following the facility policy may result in losing his smoking privileges and could result in being given a discharge notice, writer again asked to meet or at least to leave the policy with him, he responded 'no.' Writer and administrator left, resident came out shortly after and began yelling about the noise in the hallway and receiving his mail. Writer attempted to approach resident but he walked away. Writer and administrator met with business office manager regarding his mail complaint, she stated that resident is waiting for his check and has been looking for it daily. She stated that his check usually comes on the 3rd of the month. She stated that she has informed him that he will receive his mail the day it comes." - On 5/5/14, at 3:55 p.m. a progress note indicated, "Writer was updated by NAR [nursing assistant registered] that this resident received money from another resident [#02445] to go by cigarette from the store. Writer approached this resident reminding him of the smoking rules. Resident told this writer that soon as he buys the cigarettes for resident [#02445], he will bring them and give it to the smoking NAR. Writer reminded resident that this was discussed in the meeting and was one of the items discouraged. Writer left resident and updated the Administrator about this incident. Administrator will follow-up. "	{F 250}

{F 250}	Continued From page 118 - On 5/6/14, at 9:37 a.m. R117 was observed to come out of the facility, walked across the top of the planters (jumped up with ease, skipping gait) and had lit his cigarette at the front entrance. Smoking monitor and a DM did not intervene. R117 spoke with female staff, then went over to R36, exchanged money, and then went to talk with R129 (who had 1:1 staff that was standing 20 feet away from R129) and R91. [Note R117 pulled out a wad of cash, and R36 was observed to give him cash the smoke monitor and 1:1 staff did not observe the exchange]. R129 sat on planter and smoked with R91 and R117. R117 then returned to the building. - On 5/7/14, at 8:18 a.m. R37 was observed standing next to R117, who was sitting on the planter on the rear of the smoking patio. R37 had his wallet out and both R37 and R117 were watching the smoke monitor while R27 held his wallet open. R1 arrived back with the transport van and zoomed into the smoking patio at a high rate of speed on her motorized scooter, leaving her one to one staff behind. R37 handed R1 his wallet, (unable to determine if she took anything from it). R1 then handed the wallet back to R37. He whispered over to her. At 8:24 a.m. R37 again gave his wallet back to R1, (we were not able to see if she took anything from it), and she then reached down and put the wallet into his lower left leg pants pocket. - On 5/7/14, at 8:43 a.m. R1 stated "there were no smoking problems here until this thing started [referring to 1:1 for unsafe smoking and not following facility rules], I used to buy 50-60 packs of cigarettes a day for these guys and I never charged them a thing." "Now because I have a 1:1, R117 buys things and he charges them a pack of cigarettes just to walk down to that little store." R1 stated that "[R117] was also known to	{F 250}

charge for getting drugs and alcohol." R1 turned to R9 (roommate) and stated, "Isn't that right!" R9 verified the statement was true. The facility identified R1 as known smoking issues and questionably drugs and the facility identified R9 as a known pot smoker.
- On 5/7/14, at 1:15 p.m. a call was made to the MPD-A to see if the facility had reported suspected drug dealing. MPD-A stated the facility called today to report suspected drug dealing, but had not reported it between 3/18/14 (date of survey exit) and today (5/7/14).
- On 5/8/14, at 2:38 a.m. a progress note indicated, "Resident left facility since morning of 5/7/14, and has not returned to facility. Time now is 02:40 the DON had been notified, 911 had been called, and they are on their way to come and do a missing persons report. There is no phone number on file to contact the resident. Will continue to update as time goes on."
- On 5/8/14, at 6:30 a.m. "Resident is still not back to the facility. The police are aware, have made a police report, and have assigned a case number for missing person. Please call MPD-C at phone number 612-673-5303 as soon as resident return to facility."
- On 5/8/13, at 3:35 p.m. the interdisciplinary team (IDT) met to discuss the elopement and issued a 30 day discharge notice, and supervised leave only.
- On 5/9/14, at 10:34 a.m. R117 was observed back in the facility. At 11:22 a.m. no progress notes have been entered to acknowledge R117 was back in the facility.
- On 5/9/13, at 10:38 a.m. (was added to the progress notes) "Resident returned to facility unharmed. Resident verbalizes that resident is OK and has been safe at Treasure Island Casino. Writer called primary care physician to update on

residents return and request an order that states: Resident must be supervised on all LOA's except medical appointments. Awaiting return call from clinic."
- On 5/9/14, at 11:50 a.m. "Writer received a new order from PCP that resident cannot leave the facility unless supervised. Also resident can leave the facility unsupervised if going to a medical appointment. While writer was speaking to resident writer observed residents eyes were bulging and he had very rapid jaw movement. Resident appears to be under the influence of something. Writer placed another call to PCP office to inform MD that writer believes resident is under the influence. Writer also reported to nurse at PCP's office that resident has not taken any medications. Writer also asked resident if he would complete a toxicology screen and resident denied. Resident also denied any drug or alcohol use to writer. Writer is concerned of his safety. Awaiting response from MD office."
- On 5/9/14, at 12:00 p.m. "writer spoke with nurse at PCP office and orders received to send resident to the emergency room at St. Joseph's office due to suspected drug use along with his heart conditions. Resident will be sent to St. Joseph's hospital."
- On 5/9/14, at 12:23 p.m. two police cruisers (three officers) and an ambulance were observed to pull up to the facility and enter the building. The consultant administrator informed the surveyors that "R117 was being really unruly, had been out of the facility for several days and not been taking his medication (including Coumadin), stated his eyes are bulging and I am so concerned he is going to have a heart attack, he is refusing to do a tox [drug toxicity] screen here (urine drug screen). We have called the doctor and he said to transfer to the hospital for evaluation. The police

Resident was unwilling with the officers and refused to get on the gurney. Three police office had to physically walk resident out of the building. While resident was walking out resident continued to scream "I am leaving AMA, I am leaving AMA. Writer gave paramedics full report on resident's condition and the fact that resident has not taken Coumadin for three days with his Atrial fibrillation and CHF condition. All medication sheets, Face Sheet, code status, and physician orders sent with paramedics. Writer called St. Joseph's ER and gave report and updated on status, along with requesting toxicology screen. - On 5/9/14, at 1:04 p.m. a social work progress note indicated, "Resident discharged from the facility against medical advice today; May 9th, 2014 at 12:45 p.m. Administrator informed writer that resident was threatening to leave AMA. Writer went to meet with resident to discuss his plan, where he was planning on going, and why. When writer approached, resident yelled 'Are you LSW-C?' Writer responded affirmatively, resident then yelled 'Why did you tell [R81], I was threatening him? He's my friend and I have the right to see him.' Writer informed resident that writer was not aware of what he was talking about, writer asked who [R81] was. [R117] walked away. Another social worker approached resident regarding his statement that he was leaving AMA. Social worker asked to talk with resident he yelled 'no' and slammed the door. Social worker knocked on the door and asked resident what his plans were, he again slammed the door. Writer and social worker were informed that resident	{F 250}

appeared to be under the influence of a substance and had been asked to have a tox-screen done, when he refused his MD gave an order for resident to be sent to St. Joseph's hospital (where his cardiologist is) so that he could be monitored given his heart condition and not knowing what substances he had ingested. The police and paramedics arrived to take the resident to the hospital, resident stated that he was leaving the facility AMA. The police asked him "you are leaving the facility against medical advice?" resident stated "yes." Police and EMT then stated that his doctor gave an order for him to be admitted to the hospital so they had to take him. Resident again refused. The police informed him that they had to take him. Resident was asked to sit on the gurney he refused multiple times, the police escorted him out of the building. They asked resident if he had any drugs on his person, he stated 'yes' in his back pocket. Residents person was searched, a wallet and a pack of cigarettes were removed from his back pockets. A rolled up bag was removed from his fleece jacket pocket and resident identified this as cocaine. As resident walked down the hall he continued to yell 'I am leaving AMA' Resident refused to sign the Release of Responsibility for Discharge Against Medical Advice form. While resident was threatening to leave AMA the administrator called adult protection to update them on the concern that resident was threatening to leave and we were not able to get the information about where he would be going. The adult protection worker stated that they could not take the report until resident actually left the building. Writer called adult protection at 12:50 PM stating that resident had discharged against medical advice at 12:45 PM. Writer informed them that resident had left via ambulance and

facility (R117) and had exchanged something with resident R129 who had been admitted to the hospital on 5/11/14, with alcohol intoxication with a level of 0.323. CLSW-A stated, "I have personally had to question the 1:1 staff here at the facility when I have seen them sitting outside the door when resident is in the room with the door shut. When I have asked 1:1 staff how they are monitoring the resident when sitting outside the door some have gotten argumentative and said the resident did not want them in the room and I have told them you are supposed to be at arm-length not behind but in-front to make sure nothing is exchanged. I cannot imagine how a resident who was on 1:1 would get that much alcohol in her system and when I got here on Sunday I came to the office to open the computer to see what happened and there were no nursing notes. I went outside to the desk and told the administrator and director of nursing to get the nurse in to document and have the 1:1 fired. There are so many people here than I have seen on 1:1 for me 1:1 means the person needs to be somewhere else not at the nursing home." Although the care plan had been updated on 4/11/14, by CLSW-C and on 4/27/14 by CLSW-A, R117 had not been offered services for his repeated aggressive and confrontational behaviors, or chemical dependency.

R62 had documented drug use on the facility grounds without any social service interventions developed to address substance abuse.

R62 was admitted on 8/31/13, with diagnoses that included memory loss, dementia and cerebrovascular accident (CVA). Review of the quarterly MDS dated 2/25/14, indicated R62 had moderate cognitive impairment. The MDS did not

{F 250}	Continued From page 126 address R62's substance abuse. The most recent cognitive loss/dementia CAA dated 9/11/13, lacked a comprehensive summary of the resident. Review of the most recent Social Services Quarterly review dated 2/25/14, indicated no changes to the LOA Safety, Vulnerable Adult and Smoking Assessment. Review of a Vulnerable Adult Assessment dated 3/18/14, identified R62 had "past/recent substance abuse" and a history of risky behaviors and being in an abusive relationship. R62 was identified to need supervised LOA except for appointments with scheduled transport. R62's care plan with revision date of 4/26/14, identified that R62 had no indications for displaying inappropriate behaviors, had a history of being in an abusive relationship, and had impaired cognitive function/dementia, evidenced by varying mental function, judgment deficit, dementia, 'ETOH" abuse and impaired decision making skills. The care plan did not address alcohol and/or drug abuse even though it was identified in the Vulnerable Adult Assessment and progress notes. Review of R62's Progress Notes revealed the following: -On 1/24/14, at 5:03 p.m. indicated "a resident approached writer alerting us that another resident is sitting out front smoking marijuana. Writer went and found R62 smoking a joint. Writer told res that she'd have to put it out, and to consider this a warning. She was informed that the next time she will be discharged. Writer also asked res if she had anymore marijuana and she	{F 250}

{F 250}	Continued From page 129 -At 10:19 a.m. R9 returned back to the building. R9's significant MDS dated 3/24/14, identified R9's diagnoses included Schizophrenia, diabetes mellitus, orofacial dyskinesia, psychotic disorder, manic depression and chronic obstructive pulmonary disease (COPD). The MDS indicated R9 had no behaviors and had a BIMS score of 15 indicating intact cognition. In addition, the MDS indicated R9 received one person assist with ADL's. The nutritional status CAA dated 3/25/14, had identified R9 had history of tobacco abuse. R9's Vulnerable Adult care plan revised 10/20/11, identified R9 was a vulnerable adult related to cognitive limitations and physical limitations. The care plan goal indicated R9 would "remain safe within Camden Care Center at all times." The care plan identified R9 required supervision for LOA's from the facility. The care plan lacked to indicate R9 was a "Known pot smoker" A Vulnerable Adult assessment dated 3/18/14, indicated R9 had history of aggression to others, had mental illness/poor judgment, had no history of chemical abuse and "Cannot leave the facility unsupervised." The assessment did not indicate R9 was a "Known pot smoker." When asked on 5/13/14, at 8:36 a.m. regarding smoking "Pot" R9 stated "It's a deem lie that am using any pot" and kept repeating same statement to the surveyor. Social Service Notes were reviewed which revealed: -Social Service Note dated 4/23/14, indicated R9 had gone to social worker (SW) requesting to get her tobacco materials that had been taken from her roommate side back and had indicated they were hers. SW's reported to R9 the materials	{F 250}

Elopements:
R13 eloped from the facility on 5/6/14, after staff allowed the resident to transport to and from the designated smoking area without staff. R13 was not provided with medically-related social services to address her elopement risk and smoking.

Upon arrival to the facility on 5/5/14, at 1:35 p.m. R13 was observed to be out on the designated smoking area with four other residents and two facility staff. R13 was observed to be in a wheelchair with a half lap tray on the left side of the wheelchair. R13 was observed to be smoking a cigarette independently.

On 5/6/14, at 8:30 a.m. R13 was observed to wheel independently to the front door. A chirping sound was heard and R13 was observed to exit the facility and wheel herself backwards to the

smoking patio. No staff escorted her. Seven residents were observed to be in the designated smoking area. R13 wheeled to the table under the arbor, was assisted to light a cigarette by the smoking monitor and smoked independently.
- At 8:33 a.m. R13 remained on the smoking patio with four other residents smoking.
- At 8:46 a.m. R13 extinguished her cigarette appropriately and wheeled herself back into the facility. A loud beeping noise was heard as R13 entered the facility. The sound was immediately silenced to a slight chirping sound. R13 wheeled into the facility and down the hallway. No staff escorted her.
- At approximately 11:00 a.m. R13 was randomly observed to smoking in the designated smoking area, a male staff was observed to be monitoring the smokers. R13 was observed to complete smoking her cigarette at approximately 11:20 a.m. and wheel herself into the facility unescorted. The smoking monitor did not assist. A quiet chirping noise was heard as R13 entered the building.
-At 4:45 p.m. R13 was observed by the surveyor to be at the end of the driveway in her wheelchair wheeling with her feet towards the 49th Avenue North. R13 turned left upon reaching the sidewalk and began wheeling herself with difficulty towards 6th street. After a few feet, R13 made a U-turn and began pushing herself backwards down the sidewalk. The street was observed to be busy with multiple cars driving rapidly 30+ miles per hour (MPH). The smoking monitor was observed to be behind a pillar with his back to the street and R13.
- At 4:46 p.m. the front desk monitor (O)-C was notified by the surveyor of R13 observed on the city sidewalk. O-C verified R13 "could not" be on the sidewalk near the street unsupervised and

immediately ran outside to R13. When O-C reached the resident, R13 was approximately 20 feet past the end of the driveway and half way to 6th street, wheeling backwards facing oncoming traffic. O-C was observed to speak with R13 and after several minutes, wheeled her back into the facility. O-C could be heard to tell the smoking monitor to watch for residents eloping. O-C returned R13 to the facility.

R13's Diagnosis Report dated 2/4/09, indicated diagnoses to include hemiplegia affecting the dominant side, depressive disorder and cognitive deficits due to cerebrovascular disease.

The Vulnerable Adult Assessment dated 6/24/13, identified R13 had history of wandering into other resident's rooms, history of unsafe smoking and taking other peoples belongings. The assessment identified R13 had cognitive deficits, short-term memory loss, impaired decision making and poor judgment. In addition, R13 was identified to require supervised LOAs only and identified R13 had a past history of drug abuse.

LOA Safety Assessment dated 6/24/13, identified R13 had cognitive impairments related to dementia, and resident was unable to leave the facility unsupervised.

A Camden Care Center Care Conference form dated 10/1/13, indicated, "[R13] propels herself independently in a wheelchair to all destinations within the building - at times she will propel herself backwards and needs frequent reminders to not do this. She has a history of wandering from the facility and thus wears a wanderguard [sic-departure alert system] to alert staff if she attempts to leave the building. She also has a

history of wandering into other resident rooms and taking their belongings, which can cause other residents to become frustrated with her so she needs frequent redirection."

The Nursing Assessment Packet Review for the reference period 3/19 through 3/25/14, included a safety Risk (Fall) Assessment dated 3/19/14. The assessments did not address or review the need for a WanderGuard.

R13's quarterly MDS dated 3/25/14, indicated R13 was cognitively intact, was identified to have no behavior problems, and required extensive assistance with ADLs.

A Care Conference summary dated 4/10/14, and another Care Conference form (undated) did not address R13's use of a WanderGuard or elopement risk.

R13's Physician's Order Sheet dated 4/16/14, directed to check R13's WanderGuard every shift beginning 9/19/13.

The Behavior Monitoring Documentation form (undated) identified R13's target behavior was, "Wandering into other resident rooms" and indicated appropriate interventions such as assist resident to attend activities, assist resident to the bathroom if needed, anticipate needs, visit with resident if she needs help. Dated as reviewed last on 4/23 (no year).

R13's Vulnerable Adult care plan dated 4/28/14, identified she had a history of elopement. The goal identified R13 would remain safe at Camden Care Center. An intervention dated 10/7/11, indicated, "Wanderguard [sic] in place." An

intervention dated as initiated 3/16/12, directed, "Resident has been assessed and may not leave this facility without supervision.

An undated Group 5 assignment sheet (a form carried by nursing assistant staff for quick reference to care plan needs) identified R13 had a WanderGuard.

The clinical record lacked evidence R13's elopement was documented, including dated, time, location, and those involved. The clinical record lacked evidence R13 was evaluated for elopement risk after being found to elope, or R13's physician was notified at the time of the incident.

A nursing progress note for R13 written by administration on 5/8/14, at 9:04 a.m. "Report received that the resident attempted to leave the facility on Tuesday May 6 around 4 p.m. trying to get to her son, resident was found by the receptionist on the sidewalk, redirected back into the facility. Resident has her WanderGuard on. Receptionist [O-C] reported that the she reminded the resident that resident cannot leave the facility unsupervised; receptionist was educated that when residents with WanderGuard would like to get out of the building to smoke, the smoke monitor should be alerted. Son and daughter notified. Message left to NPs voicemail to update on resident. Although the note indicated a message was left for NP, the NP was not called until four days after the incident.

On 5/9/14, at 11:00 a.m. R13 was observed to wheel herself backwards out of the facility through the front entrance. The WanderGuard did not sound. O-C was observed to be at the front

administrator or SA. RN-C was unclear if this occurred and was unclear when to notify the administrator and SA. Information, including the incident report and notifications, were requested at the time of the interview.

On 5/9/14, at 1:26 p.m. RN-C verified no incident report was completed regarding R13's elopement. RN-C provided a copy of a corresponding nursing progress note dated 5/8/14

On 5/12/14, at 10:26 a.m. DON stated he was not in the facility at the time of the elopement and he was not informed until 5/8/14. DON confirmed R13 should not have left the facility unescorted and stated residents with WanderGuard were at risk for elopement and leaving the facility without supervision was a safety concern. In addition, DON verified the details of the incident were not documented in the clinical record and should have been. DON verified R13 should have been evaluated for elopement risk after the incident.

On 5/12/14, at approximately 2:00 p.m. CLSW-A and CLSW-B stated they were not informed of R13's elopement on 5/6/14. Both verified they should have been informed so they could assess the resident.

R103 was admitted to the facility on 7/29/13, per the Admission Record with diagnoses of multiple right sided fractures or arm, leg, rib and pelvis related to a motor vehicle accident.

A progress note on 1/5/14, at 5:30 a.m. "Resident is oriented X 3, able to communicate needs and wants. Resident was independent with movement and bed mobility."

{F 250}	Continued From page 138	{F 250}		

An MDS quarterly assessment dated 1/31/14, indicated R103 required supervision and assist of one for bed mobility, transfers, locomotion on and off the unit, dressing and toileting.

Physician's Orders dated 4/16/14, indicated R103 may have a LOA unsupervised with medications.

A progress Note dated 4/20/14, at 9:48 p.m. read, "Pt went on LOA." The chart lacked documentation of return to the facility. The medical record was reviewed on 5/11/14, and lacked documentation of LOA or discharge. The facility could not locate the Patient Sign In/Sign Out log sheet for that date.

On 5/10/14, at 1:57 p.m. R103 was observed to put two plastic bags of belongings in a car got in and was driven away. The chart lacked documentation of why the resident left the facility, the resident was ready for discharge and awaiting placement. It was not clear in the medical record if the resident had been discharged, or was on LOA.

On 5/11/14, at 10:00 a.m. facility staff were asked whether the resident had been discharged, was on LOA, or had returned to the facility. The HUC checked to see and resident was in room. He had signed out on the Resident Sign Out sheet on 5/10/14, and R103 had signed in on the Resident Sign Out sheet on 5//11/14, at 11:00 p.m. The administrator stated he would expect to have medical record documentation when residents left on LOA and returned to the facility.

On 5/11/14, at 10:10 a.m. RN-A was interviewed and was unaware R103 had left the building for

{F 250}	Continued From page 139 ten and a half hours. On 5/12/14, at 1:37 p.m. neither CLSW-A or CLSW-B had any documented notes for R103, but knew he had been working with a relocation worker. They verified R103 had not received any social service interventions for planning for discharge. The Videll Healthcare Limited Liability Company (LLC) Elopement policy dated as effective 5/2012, identified, "Videll Healthcare LLC facilities shall provide a safe environment for resident who are assessed at risk for elopement." The policy defined elopement as "'when a resident leaves the premises or a safe area without authorization (i.e., an order for discharge or leave of absence) and/or any necessary supervision to do so.'" The procedure directed if exit seeking behavior was identified to immediately implement interventions to "manage exit seeking behaviors" such as applying "personal security devices such as WanderGuard..." The procedure to directed staff to complete a "thorough" investigation of the event, document a factual account of the occurrence in the medical record and to update/complete an elopement risk evaluation. Although the policy included pertinent direction for searching if a resident eloped, the policy did not address risks such as smoking and access to the designated smoking area.	{F 250}		
{F 274} SS=D	483.20(b)(2)(ii) COMPREHENSIVE ASSESS AFTER SIGNIFICANT CHANGE A facility must conduct a comprehensive assessment of a resident within 14 days after the facility determines, or should have determined, that there has been a significant change in the	{F 274}		7/6/14

{F 274}	Continued From page 140 resident's physical or mental condition. (For purpose of this section, a significant change means a major decline or improvement in the resident's status that will not normally resolve itself without further intervention by staff or by implementing standard disease-related clinical interventions, that has an impact on more than one area of the resident's health status, and requires interdisciplinary review or revision of the care plan, or both.) This REQUIREMENT is not met as evidenced by: Based on observation, interview, and document review, the facility failed to complete a significant change in status assessment (SCSA) for 2 of 3 residents (R56, R116) who had sustained a decline in functional status; and for 1 of 3 residents (R103) who had experienced a significant improvement in activities of daily living (ADLs). Findings include: R56's record was reviewed. A SCSA minimum data set (MDS) assessment was initiated with an assessment reference date (ARD) of 4/26/14, and when reviewed on 5/7/14, at 9:00 a.m. the MDS was noted as in progress with an expected completion date of 5/12/14, twenty-two days after the change in status had been identified. When interviewed on 5/7/14, at 10:40 a.m. registered nurse (RN)-C stated the SCSA MDS was scheduled to be completed on 5/12/14, and the care plan would be completed seven days later on 5/19/14.	{F 274}

{F 274}	Continued From page 141 When interviewed on 5/13/14, at 9:53 a.m. RN-C stated she had never done MDSs before and had only received online training and telephone support. RN-C stated she used a paper list to track what MDS was due for each resident. A MDS policy was requested and was not received. R116 was admitted to the facility on 1/20/14, with diagnoses of lung cancer with metastasis (cancer moving from one body organ to another) to the liver and the brain, metabolic encephalopathy (temporary or permanent damage to the brain that occurs when the liver cannot clear the toxins from the body), confusion and depression. The admission MDS dated 1/26/14, indicated a Brief Interview for Mental Status (BIMS) score of 15/15, which showed no cognitive deficit, and a Patient Health Questionnaire (PHQ-9 is a multipurpose instrument for screening, diagnosing, monitoring and measuring the severity of depression) score of 4, which indicated minimal depression. According to the admission MDS, R116 was independent in bed mobility, transfers, toileting, dressing, locomotion on an off the unit and required supervision for personal hygiene. On 4/15/14, at 10:49 p.m. a nursing Progress Note indicated, "Pt is declining. He is very weak and needs a lot of assistance." The quarterly MDS dated 4/24/14, depicted R116 as needing assist of one person for bed mobility, ambulation in and out of room, dressing toilet use and hygiene. R116 had also deteriorated and required supervision for eating and transfers.	{F 274}

{F 274}	Continued From page 142 On 5/13/14, at 9:11 a.m. the admission nurse and interim MDS coordinator verified that "a significant change MDS should have been done when it had been determined his condition declined in two areas of functional status." Although the resident had declined in bed mobility, transfers, toileting, dressing, ambulation and personal hygiene, no significant change MDS had been conducted. The quarterly MDS (ready to export, but not exported) did show the extensive assist that R116 now required but interim MDS coordinator verified "it should have been a significant change MDS." R103 was admitted to the facility on 7/29/13, with diagnoses of multiple right sided fractures or arm, leg, rib and pelvis related to a motor vehicle accident. The progress note dated 1/5/14, at 5:30 a.m. indicated R103 was oriented X 3, able to communicate needs and wants. In addition, the notes indicated R103 was independent with movement and bed mobility, and currently utilized a Foley catheter. An MDS quarterly assessment dated 1/31/14, indicated a Foley catheter (a tube used to continuously drain the bladder) was still in place. R103 required supervision and assist of one for bed mobility, transfers, locomotion on and off the unit, dressing and toileting. An MDS quarterly assessment dated 5/1/14, indicated no Foley catheter was in use. R103 was assessed as independent in all functional activities of daily living. Although R103 had improved in more than two	{F 274}

{F 280}	Continued From page 145 and revised by a team of qualified persons after each assessment. This REQUIREMENT is not met as evidenced by: Based on interview and document review, the facility failed to ensure resident care plans were revised when appropriate, related to Foley catheter use for 1 of 3 residents (R36); for 1 of 1 resident (R116) who had a decline in activities of daily living (ADLs); and for 1 of 6 residents (R62) who was identified by the facility who had substance abuse issues. Findings include: Review of R36 ' s quarterly Minimum Data Set (MDS) dated 2/18/14, indicated R36 did not have a Foley catheter in use. Review of the care plan for R36 dated 3/18/14, identified a focus topic; " alteration in elimination". The care plan further indicated R36 had a temporary indwelling Foley catheter in place due to diuretic use. Interventions listed; change R36 catheter as needed per Physician ' s Orders and to irrigate the catheter as needed. When interviewing R36 on 5/7/14, at 7:41 a.m. he stated he did not have a catheter and used the toilet independently. During interview on 5/7/14, at 1:45 p.m. with registered nurse (RN)-A, she confirmed R36 did not have an indwelling Foley catheter.	{F 280}

{F 282}	Continued From page 149 This REQUIREMENT is not met as evidenced by: Based on observation, interview and document review, the facility failed to ensure the care plan was followed and target behaviors were monitored for the use of Zyprexa (olanzapine-an antipsychotic medication) for 1 of 1 resident (R89), and failed to ensure smoking interventions were followed in accordance with the care plan for 4 of 4 residents who smoked (R36, R1, R9, R22), and failed to ensure the care plan was followed for 1 of 3 residents (R9) who required dental services. Findings include: R89's care plan for psychotropic medications dated as revised on 1/5/14, identified R89 as having a physician order for Zyprexa (an antidepressant) related to "potential injury to self or others, dementia, agitation and pick [sic] disease." The care plan directed the staff to administer the medication as ordered, monitor/document for side effects and effectiveness of the medication. The care plan further directed the staff to "discuss with MD [physician], family regarding ongoing use of the medication," directed to educate on risks and benefits of using Zyprexa, "Monitor/record occurrence of target behaviors such as agitation, inappropriate response to verbal communication, and document per facility protocol." The care plan lacked appropriate identification of a target behavior which warranted the use of an antipsychotic, such as hallucinations. Although the care plan directed to monitor for a target behavior, the care plan lacked indications for the ongoing use of Zyprexa.	{F 282}

Observations of R36 on 5/7/14, at 9:21 a.m. the resident was observed smoking without a smoking apron on and the smoking monitor personal was approximately 20 feet from R36 and was focused on the street and not the resident. Observations of R36 on 5/7/14, at 1:40 p.m. the resident was observed in his room with a pack of eight cigarettes in his shirt. Observations of R36 on 5/7/14, at 1:40 p.m. the resident was observed smoking without a smoking apron. The smoking monitor personal was approximately 15 feet from R36. Observations of R36 on 5/7/14, at 3:15 p.m. the resident was observed smoking without a smoking apron and the smoking monitor personal was not within arm's reach. Observations of R36 on 5/8/14, at 9:29 a.m. the resident was observed smoking a cigarette; the smoking monitor personal offered a smoking apron to R36 but the resident refused. The staff did not encourage the resident to wear. Observations of R36 on 5/8/14, at 2:08 p.m. the resident was observed smoking without a smoking apron on. The smoking monitor personal was approximately 15 feet away and was looking in the opposite direction.	{F 282}

{F 282}	Continued From page 152 Observations of R36 on 5/9/14, at 7:15 a.m. the resident was approached by facility staff to wear a smoking apron. R36 stated he wouldn't wear one after what happened yesterday. R36 stated when staff put a "bib" on R34, R34 took it off and threw it on the ground. R36 stated if she (R34) did not have to wear one, he did not either. R36 wheeled to the smoking patio and smoked a cigarette without an apron on. Observations of R36 on 5/12/14, at 11:38 a.m. the resident wheeled by the smoking monitor personal and lit a cigarette and smoked without an apron on. The smoking monitor personal did not offer R36 a smoking apron. Review of R36 ' s care plan dated 6/14/13, identified R36 as having impaired cognitive function/dementia, alteration in decision making, and/or impaired thought processes. The care plan further indicated R36 required supervision when smoking, and that the resident was to smoke only in designated areas utilizing adaptive equipment apron for safety. An undated list of facility smokers indicated R36 was a supervised smoker and indicated staff keeps smoking material with directions to wear a smoking apron and stay within arm's reach. When interviewed on 5/7/14, at 7:33 a.m. nursing assistant (NA)-B stated she offers to lock the cigarettes in the facility locked box for residents who are unsafe to keep them on their person. NA-B stated if a resident refuses to follow the smoking rules, such as refusing to turn in their smoking materials, refusing to wear aprons, or smoking in non-smoking areas, she makes a	{F 282}

{F 282}	Continued From page 153 note in the smoking monitor log. R1 was observed on 5/5/14, and consecutive days 5/6/14, 5/7/14 and 5/8/14, smoking without wearing an apron, keeping her smoking material's on her and not smoking in the facility designated areas. When interviewed on 5/8/14, at 10:03 a.m. NA-E stated R1 had a pack of cigarettes and a lighter when she got off the transportation van. NA-E stated "She is very stubborn". When interviewed on 5/8/14, at 11:32 a.m. R1 indicated she had left to the appointment with five cigarettes and her lighter because it was going to be a long time without smoking and when she returned to the facility she had handed the cigarettes back to the smoking monitor. Review of R1's smoking evaluation dated 3/17/14, identified R1 as having a history of unsafe smoking practices when heavily medicated and or tired and falls asleep while smoking. R1 cannot safely utilize lighter/matches and cannot safely handle lit smoking materials and was a supervised smoker. The smoking care plan dated 3/12/14, identified R1 was a smoker. The goals were "Will follow all guidelines regarding smoking at Camden Care Center and will remain safe while smoking." The care plan directed R1 will smoke only in designated smoking areas, was a supervised smoker and had refused Cigarettes and lighter to be kept at nursing station for safety. When interviewed on 5/9/14, at 1:59 p.m. the director of nursing (DON) stated R1 had been educated about leaving her smoking materials in	{F 282}

the cart and had been asked to take the cigarettes one at a time. The DON confirmed the plan of care had not been followed.

On 5/6/14, at 7:40 a.m. R9 was observed smoking on the front smoking designated patio with no staff in attendance.

On 5/6/14, at 8:56 a.m. R9 was observed wheeling herself to the front designated smoking area then retrieved cigarettes and lighter from her right sock and placed them on the table next to a covered ash tray. During observation NA-B noticed R9 smoking and covered her with a smoking apron at that time.

Observation at 10:14 a.m. R9 lit another cigarette leaned very far forward to retrieve and replace cigarettes in her socks and continued to lean forward multiple times as she smoked.

On 5/6/14, at 2:45 p.m. when interviewing R9, surveyor observed a cigarette box in each of her socks. When R9 was asked why she was storing the cigarettes in her socks she stated "You can leave now, go now".

The smoking care plan dated 10/20/11, identified R9 as a smoker. Goal "R9 will follow all guidelines regarding smoking at Camden Care Center, will remain safe while smoking." Care plan directed cigarettes and lighter will be kept at nursing station, and R9 was a supervised Smoker.

When interviewed on 5/6/14, at 3:06 p.m. the DON verified R9 was a supervised smoker which meant she should relinquish her cigarette and lighter. DON stated R9 should not have had any

{F 282}	Continued From page 155 tobacco products on her person, but did not have to wear an apron. . When interviewed on 5/6/14, at 3:12 p.m. NA-I (smoking monitor) verified R9 did not have cigarettes in the facility locked box. NA-I stated he had been working at the facility for a month and R9 had never had cigarettes in the locked box. Observation on 5/6/14 at 8:05 a.m., staff was observed assisting R22 to the smoking area, applied a smoking apron and placed a blanket around his shoulders. Staff remained near but not within an arms-length as R22 held a handful of Kleenex while smoking. Observation on 5/7/14, at 9:27 a.m. R22 was observed outside in the designated smoking area sitting in his w/c next to the building pillar. R22 was holding a cigarette on the right hand and the other hand holding a the self-extinguishing ash tray. R22 was not wearing a smoking apron and had a blanket across his lap. R22 dropped his cigarette on to his shirt/blanket, was able to pick it up himself. The smoke monitor personal was not at arms-length and did not observe this happen. NA-B was standing approximately six feet away from the resident. At 9:31 a.m. R22 continued to smoke with no smoking apron, he dropped his cigarette for the second time on to his lap and was able to pick it up himself. NA-B was observed standing by the smoking cart approximately 5 feet away from the resident and was not at arms-length to quickly assist the resident. Review of R22's care plan dated 11/1/12, indicated R22 was a smoker with the goal, "(R22)	{F 282}

will follow all guidelines regarding smoking at Camden Care Center, will remain safe while smoking." The care plan also indicated R22 was wear smoking apron while smoking. Staff to intervene is resident displays unsafe smoking behaviors or refuses safety interventions, and R22 was a supervised smoker.

Review of R22's Smoking Evaluation dated 4/22/14, indicated R22 had a history of smoking in inappropriate places, burn holes in his clothing , was a supervised smoker and smoking materials were secured by staff.

When interviewed on 5/7/14, at 9:33 a.m. NA-B stated she had not witnessed R22 drop his cigarette at 9:27 a.m. and again at 9:31 a.m. even though she was standing near the smoking cart and designated to monitor resident during smoking.

When interviewed on 5/9/14, at 1:59 p.m. the DON confirmed the plan of care had not been implemented related to R22 smoking privileges and safety.

Review of the annual Minimum Data Set (MDS) dated 10/11/13, did not identify R9 dental issues or problems with teeth. The significant MDS dated 3/24/14, indicated R9 had no cognitive impairment and required one person assist of staff with personal hygiene.

R9's care plan reviewed 4/9/12, indicated R9 "has dental needs" and listed interventions of "Resident has natural teeth. Has some missing teeth. Resident will be seen annually or as needed. Nursing to notify dentist of any dental concerns. Resident has been seen by In-House

This REQUIREMENT is not met as evidenced by:
Based on interview and document review, the facility failed to coordinate hospice services for 1 of 1 resident (R56) reviewed for hospice.

Findings include:

R56's annual Minimum Data Set (MDS) dated 2/24/14, included a Brief Interview of Mental Status Score (BIMS) of 15 (cognitively intact).

A physician's order dated 4/18/14, gave approval for hospice to evaluate and treat and for in-house psychiatry services to be provided.

A Provider Orders for Life Sustaining Treatment (POLST) dated 4/21/14, indicated R56's cardiopulmonary resuscitation status (CPR) status was DNR/Do Not Attempt Resuscitation (Allow Natural Death) and goals of treatment were noted as Comfort Care. The POLST dated 4/21/14, was signed by R56's husband.

Review of the facility care plan dated 4/23/14, indicated R56 was DNR/Do Not Intubate (DNI), comfort cares and was receiving hospice services, medical directives would be honored with an intervention to coordinate care with hospice.

A POLST dated 4/26/14, indicated R56's CPR status was CPR/Attempt to Resuscitate, directed to Limit Interventions and Treat Reversible Conditions and included interventions and treatments of IV/IM antibiotic treatment and IV fluid administration. The POLST dated 4/26/14,

{F 309}	Continued From page 159 was signed by R56. A nurse practitioner (NP) progress note dated 4/30/14, noted a diagnosis of end stage liver disease, now on hospice secondary to decline in condition. Review of the hospice Team Care Plan dated 5/7/14, indicated R56 signed onto hospice on 4/21/14, with a diagnosis of chronic liver disease with a prognosis of less than six months to live. Review of the hospice care plan dated 5/7/14, indicated R56 was DNR with an intervention of "DO NOT RESUSCITATE." A Residential Communication Note from hospice dated 5/12/14, indicated a message was left with the hospice social worker to call the facility social worker regarding POLST. A Progress Note dated 5/12/14, indicated contracted licensed social worker (CLSW)-B spoke with R56 about her POLST. R56 reported to SW-B she wanted to be DNR/comfort cares and that was also what her husband wanted. SW-B indicated she placed the correct POLST information in the advanced directives section of the medical record. A Progress Notes dated 5/12/14, indicated CLSW-B spoke with R56's husband regarding the POLST and hospice. R56's husband stated to CLSW-B the POLST should be DNR/comfort cares. On 5/13/14, at 8:41 a.m. a review of the physician's orders signed 4/9/14, continued to direct "Full Code."	{F 309}

{F 309}	Continued From page 160 On 5/7/14, at 9:31 a.m. registered nurse (RN)-A reported he would go to the POLST in the front of the chart to determine what to do if R56 was found without a pulse and not breathing. The POLST in the front of the chart was the one dated 4/26/14, directing CPR. When interviewed on 5/7/14, at 10:43 a.m. licensed practical nurse (LPN)-A stated the POLST dated 4/26/14 would be the current one and would be the one the nurses would refer. On 5/7/14, at 10:45 a.m. the NP stated her plan of care for R56 was DNR and comfort care only. The NP stated she did not feel the resident was capable of making a decision for her POLST and the decision should be made by R56's husband. Upon interview on 5/7/14, at 10:55 a.m. the hospice RN-E stated she was unaware the POLST for R56 was changed on 4/26/14. RN-E stated CLSW-D completed the POLST dated 4/21/14, with R56's husband. When interviewed on 5/7/14, at 12:04 p.m. CLSW-D stated the reason why the POLST dated 4/21/14, was signed by R56's husband was R56 "was really confused and uncooperative" and directed all questions to her husband. SW-D stated she was unaware the POLST was changed on 4/26/14, and would expect the facility to notify hospice with any changes because full code and the treatments requested would not be a hospice focus of care. On 5/7/14, at 12:14 p.m. the health unit coordinator (HUC) verified the facility did not have a hospice care plan for R56. On 5/7/14, at 1:08	{F 309}

{F 309}	Continued From page 161 p.m. the HUC provided a hospice care plan and stated the care plan was faxed to the facility on 5/7/14. When interviewed on 5/7/14, at 12:26 p.m. nursing assistant (NA)-D stated he does not know what hospice does for R56, he sees them come in but that's it. Upon interview on 5/7/14, at 2:01 p.m. RN-F stated the POLST dated 4/21/14, was signed by the hospice medical director on 5/7/14, with the original effective date of 4/21/14. RN-F stated she expected the hospice care plan to be in the chart within two weeks of enrollment. When interviewed on 5/9/14, at 9:22 a.m. R56's husband stated he recalled signing the POLST dated 4/21/14, and verified his expectations were R56 was DNR and comfort care only. On 5/12/14, at 1:50 p.m. SW-B stated she had followed up with hospice and the intent is for R56 to be DNR and SW-B would make sure that was in place. RN-B was interviewed on 5/13/14, at 11:41 a.m. and stated she was not aware of the code status discrepancy. RN-B stated she or the nurse would be responsible for communicating with the physician regarding code status. RN-B verified the physician's orders for Full Code did not match the POLST dated 4/21/14, and the nurses would have mixed guidance for what to do in case of emergency. On 5/13/14, at 1:50 p.m. RN-B provided a copy of the POLST signed by the hospice physician and stated the NP was aware of the code status	{F 309}

{F 314}	Continued From page 164	{F 314}		

yellow tissue with scabbing, large amount of odorless drainage noted, no redness or warmth noted to the tissue surrounding the wound and non-adherent dressing was applied. The Progress Note did not also indicate if the areas neither were pressure related nor were the areas staged.

A Physician's Order dated 4/18/14, directed staff to "Apply non-adherent dressings to right ischial tuberosity wound and right heel until needed supplies are received."

The facility Initial/Temporary Care Plan dated 4/18/14, identified R123 had pressure areas marked and indicated with wound vac. However, the medical record lacked evidence of any other interventions being put into place to prevent and/or minimize potential further skin breakdown such as turning and repositioning, wound care, and pressure relieving mattress.

During document review it was revealed a Braden Scale-For Predicting Pressure Sore Risk dated 4/21/14, indicated R123 had a score of 11 which indicated R123 was at high risk and the Comprehensive Evaluation of Skin Risk Factors dated 4/21/14, identified the risk factors but lacked immediate interventions to minimize further potential skin breakdown.

R123's admission Minimum Data Set (MDS) dated 4/21/14, indicated R123 required limited to extensive assist of one to two with activities of daily living (ADL's) including bed mobility and transfers; had impairment on one side on the lower extremity with limited range of motion (ROM) and had one Stage 1 (a Stage I pressure ulcer is an observable pressure related alteration

{F 314}	Continued From page 165 of intact skin whose indicators as compared to the adjacent or opposite area on the body may include changes in one or more of the following: skin temperature (warmth or coolness), tissue consistency (firm or boggy feel) and/or sensation (pain, itching) and two Stage 2 pressure ulcers (a Stage 2 is partial thickness skin loss involving epidermis, dermis, or both. The ulcer is superficial and presents clinically as an abrasion, blister, or shallow crater). The MDS noted R123 was not on a turning and repositioning schedule and did not have wound care treatments that were completed in the last seven days. When interviewed on 5/12/14, at 9:58 a.m. registered nurse (RN)-C MDS coordinator verified the temporary care plan had been developed but there without interventions to minimize further potential skin breakdown. RN-C further indicated "I believe there should have been more interventions listed than just the wound vac as resident had already pressure ulcers." On 5/13/14, director of nursing was unavailable for interview. The facility policy entitled Skin Integrity Management, dated 5/12, directed director of nursing services (DNS) or designee and the interdisciplinary team (IDT) were responsible to ensure the development and implementation of a comprehensive plan of care including prevention and wound treatments as indicated. The policy further identified the goal of any skin integrity process is to provide safe and effective care to prevent and/or treat pressure sores or skin issues, maintain function and improve quality of life.	{F 314}

{F 319} SS=D	Continued From page 166 483.25(f)(1) TX/SVC FOR MENTAL/PSYCHOSOCIAL DIFFICULTIES Based on the comprehensive assessment of a resident, the facility must ensure that a resident who displays mental or psychosocial adjustment difficulty receives appropriate treatment and services to correct the assessed problem. This REQUIREMENT is not met as evidenced by: Based on observation, interview and document review, the facility failed to ensure appropriate treatment/services were offered for 1 of 1 newly admitted resident (R41) who had expressed difficulty with adjustment related to chemical dependency. Findings include: R41 was admitted to the facility on 2/4/14, according to the Admission Record from another long term care facility. The Admission Record indicated R41 had a history of bipolar disorder (a mood disorder with manic and depressed phases), schizophrenia and polyneuropathy in diabetes (nerve damage usually in the feet and legs that can create sensory, motor and bodily functional problems). The admission MDS dated 2/17/14, indicated R41 had a BIMS score of 15/15 which indicated no cognitive impairment. A Patient Health Questionnaire (PHQ9 - detects depression) was completed and R41 had a score of 7/27, which indicated mild depression. R41 had verbal behaviors directed at others one to three days during the seven day look back period. R41 was	{F 319}		7/6/14

R41 was totally dependent on the electric, tilt in space, w/c for locomotion on and off the unit. The CAAs dated 2/17/14, indicated R41 would be referred to the house psychologist. A LOA Safety Assessment dated 2/10/14, indicated R41 was safe to leave the facility on unsupervised LOA, and left the facility daily on unsupervised LOA according to staff. A Vulnerable Adult Assessment dated 2/10/14, indicated the resident utilizes an electric w/c for ambulation. "Resident is OK to go on unsupervised LOA." A Smoking Evaluation dated 2/10/14, indicated independent with smoking and smoking materials. The care plan revised on 3/18/14, indicated R41 had impaired cognitive function or thought process related to personality disorders of bipolar and schizophrenia. R41 had a history of being verbally abusive to staff and other residents, and required assistance with ADLs, and was safe for unsupervised LOA. A Physician's Progress Note dated 4/15/14, indicated the visit was to establish primary care and recommend R41 for a psychiatry consult per R41's request. In addition, a recommendation was made by the physician for R41 to have a referral made to a pain clinic consult for chronic use of opiates (oxycodone) and morphine (both narcotics). The medical record lacked evidence that the physician's recommendations were	{F 319}

{F 319}	Continued From page 168 scheduled and that R41 went to the consults. A progress note dated 5/1/14, at 3:05 p.m. revealed R41 had become intoxicated while off the facility property on a LOA. Upon his return to the facility, R41 had driven his electric w/c off the curb of the driveway to the facility. R41 had been found lying on the pavement on his right side and his speech was slurred, but R41 remained alert and oriented. The notes indicated, "He stated his last drink was 5 minutes ago. He was incontinent of urine and had a laceration on his forehead, he complained of right arm pain." The physician was notified and 911 was called. R41 was transferred to NMMC for further evaluation. He was admitted to ICU with low blood pressure, low potassium and low magnesium. The medical record lacked evidence that the assessments were reviewed and/or revised for R41's LOA status. On 5/1/14, the fall risk care plan was updated to include the fall on the driveway, but lacked mention of the causative factor of intoxication. On 5/5/14, documentation in the record indicated R41 had been readmitted to the facility from the hospital at 1:43 p.m. New diagnoses from the Intra-agency Transfer Form dated 5/5/14, included: fall, intoxication, and alcoholism. A Physician's Order on 5/5/14, included, "No longer okay to leave unsupervised LOA's." A WanderGuard was ordered for the resident. The care plan revised on 3/18/14, lacked mention of supervised LOA. On 5/6/14, at 9:16 a.m. progress note documentation indicated facility staff had met with the resident to discuss the incident that occurred on 5/1/14, the facility had obtained an order for a supervised LOA. According to the progress note,	{F 319}

{F 323} SS=H	Continued From page 170 HAZARDS/SUPERVISION/DEVICES The facility must ensure that the resident environment remains as free of accident hazards as is possible; and each resident receives adequate supervision and assistance devices to prevent accidents. This REQUIREMENT is not met as evidenced by: An immediate jeopardy related to neglect of supervision for residents was identified during the revisit survey on 5/9/14. The immediate jeopardy began on 5/1/14, and was removed on 5/21/14. However, noncompliance remained at the lower severity level of H, isolated actual harm that that is not immediate jeopardy (IJ). Based on observation, interview and document review, the facility failed to ensure adequate supervision was provided to prevent potential injury from alcohol (ETOH) and drug use for 4 of 11 residents (R37, R129, R41, R117). This resulted in an Immediate Jeopardy (IJ) for these four residents. A second IJ component was identified for 2 of 3 vulnerable residents at risk for elopement (R13, R116), due to the facility's failure to ensure adequate supervision and protection to prevent elopement from the facility. In addition to the resident(s) identified in the IJ, the facility failed to ensure adequate supervision was provided to prevent potential injury from ETOH and drug use for 5 of 11 residents (R9, R14, R62, R86, R113) and failed to ensure 3 of 3 residents (R1, R36, R22) who smoked cigarettes did so in a safe manner as determined by their plans of care.	{F 323}

{F 323}	Continued From page 171	{F 323}		

The IJ began on 5/1/14, when R41 drove an electric wheelchair off the sidewalk at the facility while intoxicated, requiring medical treatment with hospitalization. The administrator, consulting administrator, and director of nursing (DON) were notified of the IJ on 5/9/14, at 2:14 p.m. The administrator, consulting administrator and DON were informed of the additional IJ concerns related to R13 and R116's elopement behaviors, at 3:15 p.m. on 5/12/14. The IJ was not removed by exit of the 5/13/14 survey.

Findings include:

The following deficiency was cited during a revisit conducted on 5/13/14, and was the basis for an IJ to resident's health and safety.

Alleged substance abuse:
R37's progress notes indicated the resident had required hospitalizations 2/22/14, 4/23/14 and 5/10/14, related to ETOH/drug use. The Admission Record dated 1/14/14, indicated R37 had been admitted to the facility on 9/19/13, with diagnoses which included altered mental status, and a history of alcoholism. Progress note documentation indicated R37 had been found with ETOH/vodka while in the facility on 2/21/14, 2/22/14, 2/27/14, 3/2/14, 4/13/14, 4/23/14, 4/24/14, 4/25/14, 5/3/14, 5/5/14, 5/6/14, 5/7/1, 5/9/14 and 5/10/14.

Observations of R37 revealed the following:
- On 5/7/14, at 8:18 a.m. R37 was observed standing next to R117 on the smoking patio with his wallet out. Another resident (R1) arrived and R37 handed his wallet to her. This surveyor was unable to see whether R1 took anything from the

{F 323}	Continued From page 172 wallet before she handed it back to R37. R37 was observed to lean close to R1 and talk to her and gave her his wallet back. At 8:24 a.m. R1 put R37's wallet back in his left pants pocket. - On 5/9/14, at 7:23 a.m. R37 was observed coming out of his room, stated he did not feel good and was going to see if there was any coffee. At 7:28 a.m. R37 was observed coming from the West hallway. R37 was then observed to push another resident's wheelchair down the West hallway and was observed outside R9's room. There was no staff with R37 when during the observation. When R37 returned to the nursing station, he told the HUC he had gotten cigarettes from R9. The HUC asked R37 if he was alone and R37 responded that he was and the HUC asked him where his partner was. Nursing assistant (NA)-L approached at that time and told the HUC she was the 1:1 for R37 today. - On 5/10/14, at 1:07 p.m. R37 was observed being taken to an ambulance. Additional review of R37's record revealed these Progress Notes: - On 11/26/13, the notes indicated chemical dependency (CD) treatment/Alcoholics Anonymous (AA) was discussed. R37 had stated he'd participated in AA services in the past and he'd had success including three years of sobriety before a recent relapse. The note indicated nursing had reported two episodes of ETOH intoxication while in the nursing home since the last visit and R37 had acknowledged the report to be accurate. The assessment/plan included social worker to assist with available CD services, R37 stated he was open to CD services and no ETOH use with nursing to monitor. The NP indicated there were "clear dependency concerns."	{F 323}

{F 323}	Continued From page 173 - On 1/8/14, the notes indicated the resident had a history of ETOH abuse which had also occurred since living at the facility. - On 2/21/14, the notes indicated R37 had been drinking vodka and that an empty bottle had been found. The notes also indicated R37 had been observed to be distributing money to staff and residents. When R37 had noticed he had no money to buy vodka, he had gone to the automatic teller machine (ATM) machine to get money. The notes indicated staff were concerned about his safety and judgment. On 2/21/14, at 7:07 a.m. a note had been documented which indicated R37 was handing out his money to "anyone who would listen" and staff had taken $116.00 dollars from him to lock up. - On 2/22/14, at 10:14 p.m. the notes indicated R37 had called 911 to send himself to the hospital. It was noted R37 had been drinking during the a.m. shift and was drunk. The a.m. shift had taken a bottle of vodka from him. The notes indicated R37 had asked the p.m. shift to return the vodka or pay him $25.00. - On 2/27/14, at 1:13 p.m. the notes indicated R37 wanted to leave on a leave of absence (LOA), was advised he could not go on an unsupervised LOA, but had left the facility. - On 2/27/14, at 10:07 p.m. indicated R37 was "drunk" and had a blood pressure of 147/105. - On 3/2/14, indicated R37 was "drunk" and was noted to have a blood pressure of 176/98 and a pulse of 99. - On 4/1/14, indicated R37 had complained of shortness of breath and chest pain with a blood pressure of 146/102 and a pulse of 109 and was sent to the hospital. - On 4/13/14, the notes indicated R37"seemed intoxicated" and one full bottle of vodka and one quarter full bottle were removed from the room.	{F 323}

{F 323}	Continued From page 174 - On 4/23/14, at 3:44 a.m. indicated R37 was shouting and yelling and appeared intoxicated. One empty bottle of vodka and one 75% emptied were found in R37's room. At 12:04 p.m. staff checked R37's room and found two empty bottles in his room. Staff discussed discharge plans and R37 reported he wanted to stay and the facility and was told it was not ok to drink ETOH at the facility. R37 was offered a transfer to a facility that allowed drinking and he declined. At 3:13 p.m. R37 approached staff and appeared to be intoxicated with slurred speech and smelled of ETOH. R37 stated he would like to get help to have ETOH removed from his body. Staff called 911 and police escorted R37 to detox. - On 4/24/14, at 9:30 a.m. the notes indicated R37 reported chest pain and shortness of breath. R37 was noted to have a blood pressure of 162/103 and a pulse of 88 and was noted to smell of ETOH. At 12:01 p.m. on that day, the notes indicated R37 approached staff and "again was clearly intoxicated." The notes indicated the contracted licensed social worker (CLSW)-A and a police officer had entered R37's room and found an empty vodka bottle under the mattress. The officer told staff he could not remove the resident from the building because R37 was not disturbing anyone and was not aggressive or assaultive in any way. A facility Progress Notes dated 4/25/14, at 3:40 a.m. indicated R37 had been observed earlier walking into and out of R117's room and "seemed to be like an exchange of some transactions." The note indicated staff believed this was a trade and staff would need to monitor R37 for ETOH consumption. Further the note indicated, "A few hours later" R37 was shouting and appeared "intoxicated" and a 75% emptied bottle of vodka was found in R37's room.	{F 323}

{F 323}	Continued From page 177 hour span of time. - On 5/10/14, notes indicated R37 had been observed giving his credit card to R117 on 5/9/14. A second note indicated R37 had returned from LOA accompanied by a friend of another resident (R1). R37 was observed to be shaky and verbalized he was unsteady on his feet. R37 was noted to have shakiness, profuse sweating, sluggish pupils and was noted to have a blood pressure of 178/130 and a pulse of 120s to 140s. - On 5/11/14, the progress notes indicated R37 had a drug screen positive for methadone at the hospital. R37 did not have a prescription for Methadone. The Physician (MD) and Nurse Practitioner (NP) orders indicated they were aware of R37's alcohol use. Notes included: - On 1/8/14, included a diagnosis of ETOH abuse and a note the resident continued to have problems while living in the facility. - On 2/5/14, indicated R37 had recently been found with a bottle of ETOH hidden in his pillow case and was noted to smell of ETOH. - On 2/28/14, an order directed staff to discharge R37 to another facility (that allowed drinking). - On 3/5/14, an order directed; "do not call on-call MD or NP after hours if resident is intoxicated unless he is medically compromised. Allow resident to go to bed [and] sleep." - On 4/9/14, notes indicated R37 had been hospitalized from 4/1/14 from 4/8/14, with respiratory distress and pneumonia with pleural effusions requiring chest tube placement. the notes indicated R37 had been treated for sepsis and required thoracentesis. A NP note dated 4/9/14, indicated R37 required ongoing Kristalose and Mag-ox for chronic cirrhosis.	{F 323}

{F 323}	Continued From page 178 - On 4/10/14, included diagnoses of chemical dependency, hepatic cirrhosis, and chronic pain. - On 4/24/14, included "place wander guard [sic] for res. [resident] safety" and "pursue guardianship." A second order dated 4/24/14, indicated NP was aware of R37's use of alcohol, to encourage R37 not to use, and that even if R37 appeared intoxicated it was ok to administer all medications as ordered. - On 5/6/14, an order directed to recheck R37's blood pressure in one hour, call NP if diastolic blood pressure was greater than 100, give Ativan 0.5 milligrams (mg) orally every six hours as needed times three days for withdrawal symptoms (tremors, shaking, and increased heart rate) and a urine toxicology screen. - On 5/7/14, an order directed "no LOA-supervised or other". In addition, the NP included an order for a WanderGuard, and to check placement every shift for elopement even though R37 had cut off the WanderGuard on 5/2/14, and refused to have a new one placed. A Clinical Summary dated 2/3/14, indicated "refer to chemical dependency counselor and pain psychologist." A prescription dated 2/3/14, ordered a behavioral health evaluation for diagnostic evaluation and treatment recommendations for R37. A Physician Visit/Progress Note written by a licensed drug and ETOH counselor (LADC) dated 2/13/14, indicated R37 had been referred for assessment of behavioral health, chemical dependency and pain and included an order/comment of "strongly recommend a full psychiatric assessment" within 60 days to evaluate medications and therapy. The medical record lacked evidence of the psychiatric	{F 323}

{F 323}	Continued From page 179 assessment having been completed. R37's care plan was reviewed and noted the following: - The vulnerable adult care plan revised on 3/5/14, indicated R37 may leave to go to medical appointments without supervision and was not safe to go on other unsupervised LOAs. - The Depression care plan dated 3/11/14, included ETOH abuse and directed to arrange psych services as needed. - A behavioral symptoms care plan revised on 3/16/14, indicated ETOH consumption and concealing ETOH in room with a goal to have fewer episodes of ETOH abuse per week. The interventions included; encourage attending AA or other substance abuse support programs, assisting with arrangements as needed, may go to medical/dental appointments unsupervised and no other unsupervised LOA. - A risk for elopement related to ETOH abuse and psychoses care plan revised 3/16/14, noted a history of returning to facility after unsupervised LOA displaying signs of ETOH consumption and/or with a supply of ETOH. The goal included R37 would not to leave facility unattended unless a medical appointment and R37's safety will be maintained. The interventions indicated R37 cut off the wander guard and refused to have another one placed and was placed on 15 minute checks. Check room if suspected ETOH. - A Mood/Behavior care plan initiated on 4/23/14, indicated R37 had a history of ETOH abuse and actively drank at the facility. The care plan noted R37 was sent to detox on 4/23/14, due to being very intoxicated. The goal indicated R37 would like to stop drinking ETOH with an intervention to check room daily for ETOH and check R37 for signs of intoxication.	{F 323}

{F 323}	Continued From page 180 - An at risk for adverse reaction from medications related to ETOH care plan dated 4/25/14, indicated NP was aware of R37's ETOH, nursing staff to encourage to restrain from using ETOH and if R37 appeared intoxicated it was ok to administer medications. Another intervention dated 5/8/14, included 1:1 supervision due to ETOH abuse and intoxication. A Vulnerable Adult Assessment dated 3/16/14, indicated R37 had both past and recent substance abuse, was not safe for unsupervised LOA except to appointments and had a history of significant ETOH use when out on unsupervised LOA. The quarterly Minimum Data Set (MDS) dated 3/18/14, indicated R37's cognitive skills for daily decision making was independent with consistent/reasonable decisions. Review of the Interagency Transfer Orders dated 4/1/14, included Non-Hospital Problems of ETOH intoxication and ETOH withdrawal noted 9/23/13, and substance abuse noted 2/23/14. A Care Conference Summary dated 4/1/14, indicated a discharge plan of "discharge to a facility that allows drinking, he declined, has been sober since." The summary indicated R37 had a history of drinking and bringing ETOH in the building or going on unsupervised LOA and R37 had stayed in the building with no ETOH use since 3/3/14. A Resident Refusal of Medical Treatment Form dated 5/5/14, indicated R37 was "wander guarded [sic]" to the facility for resident safety related to history of ETOH abuse, staggering gait	{F 323}

and slurred speech. With the risks of refusing noted as facility wouldn't be aware if R37 left with potential for fall risk and injury off facility grounds with no one to provide aid.

A letter dated 5/10/14, indicated a first offense of the facility smoking policy as R37 reported to staff he had gotten cigarettes from R9.

On 5/7/14, at 10:02 a.m. the ombudsman was interviewed and wanted to know if surveyors were aware of residents purchasing ETOH and drugs. Reported she believed residents were giving other residents money and credit cards to go out and purchase things for them. She reported a resident with chemical dependency problems had been drinking, room checks were being completed and staff was finding ETOH bottles. Reported R37 was being found intoxicated and she was involved in discussing abuse prevention planning if intoxicated and the effects of ETOH on R37's medications. She reported the physician was encouraging discharge planning to a facility that allowed drinking. She also indicated a number of residents were accessing illegal drugs at the facility. The ombudsman reported she had been at the facility on 5/6/14, to discuss the concerns.

On 5/7/14, at 10:05 a.m. the administrator stated the ombudsman was called 5/6/14, to speak with the facility regarding R37 giving his credit card to R117 to purchase ETOH and R37 had been "drunk for days."

On 5/8/14, at 11:51 a.m. licensed practical nurse (LPN)-B stated she was aware R37 had a doctor's order and can drink as long as there are no behaviors and if behaviors occur she can call

detox. LPN- B stated she did not know where R37 got ETOH from.

The safety monitor, NA-M was interviewed on 5/8/14, at 11:55 a.m. and stated he has not seen R37 exchange money or ETOH and stated he has heard about exchanges but could not remember who he had heard it about.

The HUC was interviewed on 5/8/14, at 12:15 p.m. and stated "it's a nightmare; [R37] is drunk every day." She stated she had her suspicions about where the ETOH was coming from but when she asked R37 he refused to tell her. R37 told her he had given his credit card to R117 to buy things for him. The HUC stated R37 was drunk every day when she left and was drunk when she came in on 5/8/14. She reported that on 5/5/14 or 5/6/14, she had observed R37 in the parking lot, was told there was nothing they could do by the facility administrator and requested assistance from the operations director to get R37 back in the building. The HUC reported she had requested the safety monitor to put R37 on every 15 minute checks but knew that was not enough. She stated other residents were on 1:1 for drug use and wanted to know what the facility was going to do to keep R37 safe. The HUC stated "we're not doing [R37] any justice" and "it's a shitty plan to keep people on 1:1 forever."

On 5/10/14, at 1:30 p.m. the administrator stated R37 had been taken to the hospital for Delirium tremens (DTs-significant withdrawal symptoms). During interview on 5/12/14, at 8:59 a.m., registered nurse (RN)- B and LPN-A stated R37 had gone to the bank with a friend on 5/10/14, and were not sure if the 1:1 had gone to the bank or not and would have to check.

{F 323}	Continued From page 183 The DON was interviewed on 5/12/14, at 9:05 a.m. and stated a "guy (stated name) a friend of R1" went with R37 to the bank. The DON stated both the administrator and the consultant administrator were aware of who R1's friend was. The DON stated the 1:1 had refused to go to the bank with R37 and that the friend of R1 had signed R37 out. The DON stated the consultant administrator was going to go with R37 and R1's friend to the bank until it was decided the facility was not comfortable with her (the consultant administrator) going with to the bank either. The DON stated he had reminded R37 he could not go because he had orders for no LOA, but stated the administrator, consultant administrator and the social worker had decided R37 could go anyway. The DON stated he had no idea where R37 had gotten methadone from. When interviewed on 5/12/14, at 1:35 p.m. contracted licensed social worker (CLSW)-A stated during a room search a quart bottle of ETOH had been found in R37's room and 3 plastic containers with the labels removed which nursing indicated were methadone containers. When interviewed on 5/12/14, at 1:52 p.m. the administrator stated he and CLSW-A were involved in R37's LOA. The administrator stated CLSW-A was under the impression R37 was allowed to go on a LOA, and stated R37 had returned with a card from Walgreens so they knew he hadn't followed his agreement to only go to the bank. The administrator stated the friend of R1 would not be able to take R37 on LOA again. The administrator stated he was not aware R37 had orders for no LOA and that he had believed CLSW-A and had not checked the chart himself.	{F 323}

{F 323}	Continued From page 184 The administrator stated he was also not aware of R1's relationship with the friend and that the DON had not told him about the order for no LOA or the relationship between R1 and the friend. Upon interview on 5/13/14, at 8:09 a.m. CLSW-A stated on 5/10/14, prior to R37 leaving on LOA she had been informed by nursing (she could not remember who) that R37 could leave the facility with supervision. CLSW-A reported she'd made it clear to the person taking R37 out, R1's friend, that R37 could only go to the bank and nowhere else. She stated she'd told R1's friend that R37 would try and talk him into going to the liquor store but that R37 could not go there. CLSW-A said R1's friend had reassured her he had been sober for ten years and would never take R37 to a liquor store. CLSW-A stated it was not until after R37 had left, that nursing (did not remember who) told her R37 had orders for "no LOA" and that R1's friend was a drug dealer. CLSW-A said it would have been nice to have known that information before she'd allowed R37 to go on a LOA. She stated she had not looked at R37's chart because she'd trusted nursing to know the correct information. She also stated she was aware R37 had been keeping ETOH under the edge of his mattress and she could not understand why nursing hadn't been finding the ETOH when they made the bed. When interviewed on 5/13/14, at 2:20 p.m. the administrator was asked about the discrepancy between what the DON reported had happened on 5/10/14 and what the administrator stated had happened and he verified he was not aware R37 had an order for no LOAs or aware that R1's friend was her drug dealer prior to having allowed R37 to leave with R1's friend on an LOA.	{F 323}

{F 323}	Continued From page 185 R129 was identified by the facility to require a staff member to be assigned to follow/accompany R129 one to one (1:1, to be within arms length at all times). R129 reported to the facility she obtained and consumed cocaine on 5/3/14. R129 obtained and consumed ETOH on 5/11/13, at 4:00 a.m. causing her to require hospitalization in the intensive care unit (ICU) and intubation (mechanical ventilator assisted breathing) for a blood ETOH level of .323. The admission MDS dated 2/1/14, indicated R129 had a Brief Interview of Mental Status (BIMS, a tool to determine potential cognitive losses) score of 15, indicating R129 was cognitively intact. The MDS identified R129 was Independent with all activities of daily living (ADLs). The MDS identified R129 rejected cares and wandered 1-3 days during the assessment period. R129's CAA for mood state dated 2/7/14, identified R129 had poor judgement, impaired cognition and poor decision making and had diagnosis of "substance induced psychotic disorder, opiate dependence, and alcohol dependence." The CAA identified further diagnoses of hepatitis C, "Hx [history] of drug alcohol use" and depression. R129 was identified to be independent with ADLs. Although the CAAs identified R129 had a history of drug and ETOH dependence, the CAAs lacked documentation of interventions to promote sobriety while in the facility, such as but not limited to offering CD treatment. The Vulnerable Adult Assessment dated 3/18/14, identified R129 had a history of ETOH abuse and identified R129 had, "Ongoing drug-seeking & over medication with additional Rx [prescriptions]." R129 was identified as being	{F 323}

{F 323}	Continued From page 186	{F 323}		

susceptible to abuse "r/t [related to] substance use, varies" and required supervision with LOA from the facility. The assessment identified R129 had a behavior and history of rummaging through others belongings and "drug use." The assessment indicated R129 was placed on 1:1 due to rummaging in other resident rooms.

R129's Smoking Evaluation dated 3/18/14, identified to "monitor for ETOH use or oversedation."

The Pain Evaluation and Management Plan dated 5/1/14, identified R129 had chronic pain daily, identified a history of pain and drug seeking. "Resident is on a restricted recipient program due to drug seeking [a program where only one pharmacy may fill the prescriptions for narcotics, a program to potentially deter drug seeking behaviors]." The evaluation identified R129 had a history of "drug seeking" and indicated, "MD is aware of drug seeking behaviors and aware pain is not controlled. MD will not order any more pain medications for resident due to her drug seeking behaviors. Resident is on the restricted recipient program due to drug seeking."

A Incident/Accident Report dated 5/3/14, at 11:00 p.m. indicated R129 "told the nurse that she took cocaine earlier during the shift." The note identified R129 to be "very sweaty, weak and tired" and "she looked very sleepy." The resident's pupils were "large and nonreactive to light." The note indicated the nurse asked R129 what she took and indicated R129 then "confessed" to taking cocaine. The report documentation indicated R129 was sent to the emergency room (ER), identified, "She said, 'I knowingly took cocaine'" and, "Resident has been

{F 323}	Continued From page 187 sent to ER. She will continue to be on 1:1 when she returns to the nursing home." The report identified R129 had a history of drug use, "resident is on a 1:1," "remains on a 1:1," and "Hx [history] drug seeking, receiving drugs from others." Although the incident occurred on 5/3/14, the form was signed by the DON on 5/5/14. An Emergency Department Chart [a form from the ER] dated 5/3/14, identified R129 reported to have taken cocaine at the facility. The note indicated R129 took the cocaine to "help with the pain" in her abdomen. "Patient [R129] is triaged directly back to ED [emergency department]." The Clinician History of Present Illness section of the form identified R129 reported to hospital staff she snorted cocaine "5 hours ago." Although R129 was identified to go to the ER for a potential drug overdose, the Emergency Department Chart did not address the cocaine use and only addressed R129's pain. The labs indicated various pertinent laboratory values were checked by the ER, but lacked a toxicity screening for cocaine, drug or ETOH use. R129 was given two doses of Dilaudid (a narcotic pain medication) and returned to the facility at 6:00 a.m. with no new orders. The clinical record lacked evidence the administrator, or the State agency (SA) were notified of the incident. The clinical record lacked evidence of new interventions to address R129's report of drug use, such as CD treatment. In addition, the clinical record lacked evidence the use of cocaine by R129 was investigated to determine how the drug may have been obtained while the resident had a staff assigned to her 1:1. A unlabeled typed page insert immediately in the front of R129's paper chart dated 4/15/14, indicated, "If Res goes to the Hospital for any	{F 323}

{F 323}	Continued From page 188 reason she is to go to St. Joes [sic] Hospital Only per primary care MD and the MN [Minnesota] restricted recipient program" and further directed "all scripts [prescriptions] no matter where they come from must be approved by [MD's name] or their oncall MD." On 5/7/14, at 10:24 a.m. the ombudsman was contacted via telephone per an emailed request to be contacted by the surveyor. The ombudsman stated she had been informed by a nurse of the facility of "drug use" and "drugs shared with residents" at the facility "a couple days ago." The ombudsman stated rather than call the nurse back, she came to the facility "yesterday [5/6/14]," had spoken with various residents of the facility and communicated with the facility's management regarding drug, ETOH and discharge planning concerns. The ombudsman stated residents, facility staff and the ombudsman were "suspicious residents may be giving money or credit cards to another [resident] to go out and purchase things [alcohol and drugs] for them." The ombudsman stated the police had been notified and been to the facility "quite often." The ombudsman stated there were problems with residents who were chemically dependent, who were drinking in their rooms and facility staff were conducting room checks per shift and "finding empty alcohol [vodka] bottles" in resident rooms. The ombudsman stated residents had been found by facility staff to be "intoxicated" in the facility. The ombudsman specifically stated R129 was on a 1:1 and had "somehow" obtained and consumed and "illegal drug [cocaine]" in the facility. The ombudsman stated although the facility had employed "three temporary social workers," the ombudsman stated she felt "social services is overwhelmed" due to "no policies and	{F 323}

{F 323}	Continued From page 189 procedures in place." R129's care plan for safety/vulnerability dated 3/25/14, identified R129 was able to make her needs known, but was vulnerable due to her history of opioid abuse and drug seeking behavior. A care plan intervention dated as initiated 4/11/14, directed R129 required "1:1 supervision at all times to keep [R129] safe and prevent drug use" Additionally, the care plan directed, "1:1 to discuss CD concerns, encourage [R129] to consider going to a treatment facility." The care plan for mood/behavior dated 3/25/14, identified, "I have a history of opioid abuse and I exhibit drug seeking behavior as evidenced by attempting to see several different MD's to obtain prescription medication. I have a history of walking into other residents rooms and looking thru their personal belongings." Review of the undated Group 7 NA assignment sheets (forms carried by the NA staff for quick reference direction on the resident care plan) indicated R129 was continent, independent with ADLs and "1:1" in larger bold print. Nursing Progress Notes: - On 3/14/14, at 6:18 p.m. a note indicated R129 "had an appointment yesterday and was immediately transferred to the hospital." The note indicated "while on the way home [unclear on prior destination]" R129 "stopped at Cub foods" and picked up a prescription for eight tablets of Norco 5/325 mg [a narcotic and Tylenol pain medication]. The note indicated R129 "failed to alert staff and stated that there were no new orders." The hospital, oncall MD and triage nurse were called and updated on R129's "history of narcotic use."	{F 323}

{F 323}	Continued From page 190 - On 3/16/14, at 6:34 a.m. a note indicated R129 was "caught going through another resident's belonging." The note indicated a resident observed R129 "opening her purse. The note indicated R129 admitted going in the room but denied taking "any money." - On 3/17/14, at 3:34 p.m. a note indicated, "Resident still remains on 1:1 observation." Although the note identified R129 was assigned a 1:1 staff, the clinical record lacked documentation regarding starting 1:1 with the resident. At 10:17 p.m. a note indicated R129 "called on call [physician]," reported two incontinent episodes, her "lower extremities [sic] hurts" and edema. Staff encourage R129 to "sit and rest the leg" but R129 refused and stated the pain became "unbearable." R129 stated she wanted to go to the ER for evaluation and "called 911 herself." Although a previous note indicated R129 required a 1:1, the note indicated R129 would "take care of her own transportation to ER" and "left the facility" at 10:20 p.m. The note did not indicate if a staff person accompanied R129 to the appointment. - On 3/18/14, at 3:56 a.m. a note indicated R129 returned from the ER at 3:30 a.m. with "new order. No new concern at this time." At 2:31 a.m. a note indicated R129 reported to the business office manager she felt "depressed due to being on a 1:1." The concern was reported to social services and the nurse on duty. - On 3/20/14, at 10:08 a.m. the physician identified by R129 as her new primary care physician (PCP) was contacted regarding R129 living in a health care facility, that orders must be coordinated with the nursing home, gave update regarding R129 changing her PCP, trips to the ER and "drug seeking beh's [behaviors]." The note further indicated, "Transport informed to bring pt [patient] to/from the clinic and no other	{F 323}

stops to include the pharmacy." At 2:45 p.m. R129 "went for her appointment to her care provider today. At the appointment, resident was given script for Ambien (a hypnotic medication used to promote sleep). Resident said she filled the prescriptions at the pharmacy but she misplaced the pills. patient [sic] will be monitored for increased sedation." Although the previous note indicated the transportation company was notified of restrictions in R129's transport, the note identified R129 was still brought to the pharmacy. At 3:11 p.m. a note indicated R129 reported she "lost" the Ambien. The note indicated the "escort" assigned to go with R129 to the appointment, reported R129 "went to the pharmacy and filled her script." The escort reported R129 would not allow the staff to "see the script" or the filled prescription. "Per the escort [R129] went to the bathroom. On the ride home [R129] reported that she lost the bottle of pills. Upon return she reported that same story to this writer and requested that staff get a new script." The physician was contacted and verified a prescription for Ambien and R129 loosing the medication was reported. The physician denied taking R129 on as a PCP and referred the facility to R129's current PCP.

- On 3/28/14, at 11:52 a.m. a note indicated R129 met with social services and "Also spoke with resident regarding her drug seeking. She [R129] admits that she is addicted to pain medication." The note indicated R129 was scheduled to see psychologist and encouraged R129 to discuss her concerns and her "addiction."
- On 4/4/14, at 7:11 p.m. a note indicated R129 met with psychologist. The note indicated R129 met with DON and social worker after the appointment. The note indicated R129 "does not like being on 1:1's" and the DON "informed her

{F 323}	Continued From page 192 [R129] she was on 1:1's because of her frequent drug seeking." The note indicated R129 "admits that she has urges to seek medications to manager her pain" but "denies addiction." The note indicated "inpatient treatment" was discussed, such as drug and emotional counseling, R129 rejected the treatment. The note indicated the psychologist agreed with the need for treatment and "However, should resident continue to display behaviors of drug seeking and declines treatment a CD commitment maybe considered to be in her best interest." - On 4/7/14, at 10:47 a.m. the note identified R129 remained on 1:1 and R129 had requested to be taken off 1:1's. The note indicated R129 was on 1:1 "for going into other resident rooms." - On 5/4/2014 12:03 a.m. a note indicated R129 "told the nurse that she took cocaine earlier during this shift." The note recapitulated the data from the incident report dated 5/3/14. The note further indicated, "The nurse asked the resident what she had taken and where she got it from or [who] gave it to her. She took the nurse to [room number for R1]. She also report that the package that resident in room [R14's room] swallowed earlier was marijuana." R129 accepted to to to the ER for evaluation. "The nurse requested for toxicology screen and that a copy should be send [sic] to the nursing home per the administrator order." Although the note indicated R129 obtained cocaine from another resident and identified R129 involvement with a second resident and a different illegal drug, the clinical record lacked evidence law enforcement was notified, the clinical record lacked evidence a toxicology screen was obtained. Although R129 was identified to have a 1:1 assigned to follow her, the clinical record lacked evidence the incident of R129 obtaining and ingesting illegal	{F 323}

{F 323}	Continued From page 193 drugs was identified, reported to the administrator immediately, reported to the SA or investigated. In addition, the clinical record lacked evidence R129 was further evaluated for chemical dependency, had immediate changes or increases in monitoring to ensure her supervision and safety. At 7:23 a.m. a corporate nurse documented R129 approached the nurse and R129 "admitted to writer that she took drugs given to her by another resident in this building. She was able to verbalize insight related to why she regretted this choice." The note indicated R129 "remains on 1:1. 1:1 was present during this conversation." The clinical record lacked evidence 1:1 monitoring of R129 was reviewed after being identified to have accessed illegal drugs twice while on 1:1 monitoring. - On 5/4/13, at 12:12 p.m. a note indicated an attempt was made to notify R129's doctor regarding the incident from 5/3/14. The operator at the doctor's office informed writer that they are only accepting on-call emergencies. Staff will notify doctor in the morning of 5/5/14. Resident was returned from the hospital at 6:00 a.m. with no new orders. Although R129 had two doses of Dilaudid administered at the ER, R129 immediately requested pain medication upon return to the facility [the note was not closed or signed by the writer]. On 5/5/14, during the initial tour of the facility NA-K was observed to be sitting in a chair directly outside R129's room, the door was open and R129 was observed to be lying in bed, fully dressed with her eyes closed. NA-K stated she was assigned to be a 1:1 for R129. NA-K stated she needed to remain with R129 and the 1:1 was due to R129 going into "other resident rooms."	{F 323}

{F 323}	Continued From page 194 On 5/6/14, at 8:30 a.m. R129 was observed to have NA-M (1:1 staff) follow her down the hallway and out to the smoking patio. R129 retrieved a cigarette from her front pocket, lit the cigarette and replaced the lighter in the side pocket (right). NA-M stood on the side walk outside the designated smoking area with a large cinder landscape block planter between R129 and NA-M. NA-M remained out of arm's length from R129 and was observed to talk with the female staff monitoring the smoking area, looking away from R129. R129 stood with other residents and smoked her cigarette out of direct sight of NA-M. - At 8:33 a.m. R129 sat on a bench with another female resident on the other side of the smoking patio and out of sight of NA-M. NA-M stood on the edge of the cinder landscape block planter edge and chatted across the smoking area to the same female staff in the smoking area. NA-M was not near enough to R129 to interfere if concern. - At 8:37 a.m. staff spoke to each other and then NA-M turned his back on smokers (including R129) and spoke to a male in a car in the parking lot. NA-M then jumped down and entered the smoking area to speak to the female staff directly. NA-M was not within arms length or direct eye sight of R129. - At 8:38 a.m. R129 stood up and walked to the front entrance of the facility. NA-M jumped to catch up with R129 and followed directly behind into the facility. R129 then pushed the wheelchair of a male resident entering the building and walked rapidly down the hallway. - At 9:34 a.m. R129 was observed to push R62 in her wheelchair out of the facility and to the smoking patio. While pushing R62, R62 held out a cigarette and R129 took it out of R129's hand and tucked it into her own hand, concealing the	{F 323}

{F 323}	Continued From page 195 cigarette. NA-M followed behind R129 and did not appear to notice or intervene when R129 took the cigarette. NA-M immediately turned his back to R129 once on the smoking patio, applied a surgical mask and talked to the female staff assigned to monitor the smoking patio. Both staff had their backs to R129. - At 9:35 a.m. the female staff pushed R22 back into the facility and pulled the smoking cart behind her. NA-M remained outside with R129 near the smoking patio watching a van in the parking area. NA-M had his back to R129 and was approximately 14 feet away from R129. Multiple other residents were observed to come and go from the smoking patio. R129 interacted freely with the other residents unsupervised. - At 9:37 a.m. R117 was observed to come out of the facility, light his cigarette at the front entrance, jump up onto the cinder landscape block planter with ease, and walk across the top of the planters with a skipping gait. Neither the smoking monitor and another female staff in the area did not intervene. R117 was observed to speak briefly with the female smoking monitor, approach R36, pull out a large wad of cash and exchanged money with R36. R117 then went to R129 and R62. R117 remained with both residents smoking and talking. R129 sat on the edge of the cinder landscape block planter, NA-M was not within arms reach of R129, was not within eye site of R129 and was not supervising R129. NA-M remained with the other female staff, back to R129. - At 9:40 a.m. R129 stood and pushed R62's wheelchair towards the front entrance of the facility. Although NA-M followed, NA-M did not come into arms reach of R129 until the front door of the facility. R129 was observed to push the wheelchair down the hallway with NA-M walking	{F 323}

{F 323}	Continued From page 196 beside (to the left) of R129. - At 10:19 a.m. R120 was observed to walk out of the facility and onto the designated smoking area. NA-M followed approximately ten feet behind outside, then stood on the sidewalk. NA-M then left the area and returned into the facility. R129 retried a cigarette from a pack. Multiple residents were observed to be coming out to smoke. The smoking monitor was on the patio but did not watch R129. R129 sat on planter side and spoke with R14. - At 10:23 a.m. NA-M returned to the smoking area from inside and immediately stood on sidewalk on other side of planter approximately 20 feet away from R129. NA-M made no attempt to make contact with R129, was not in arms reach of R129 and did not make eye contact with R129. NA-M spoke with the smoking monitor. - At 10:25 a.m. NA-M and R129 returned to the facility. NA-M walked to the left of R129 and within arms reach of R129 upon entering the building. Once in the building, NA-M remained in arms length while walking down the hallway towards the nursing desk. On 5/8/14, at 11:22 a.m. R129 was observed to be laying in bed, NA-E was observed to be making the roommate's bed. NA-E verified she was assigned to be the 1:1 with R129. NA-E offered to stand outside the door while R129 was interviewed and the door to the room was closed. R129 stated she was waiting for an apartment and verified she "snorted cocaine" on 5/3/14, and verified she reported it to facility staff. When asked when this occurred, R129 stated it was "on Saturday [5/3/14]." When asked where she snorted the cocaine, R129 stated "not in the facility," and explained she received and snorted the cocaine "down the block." When asked if she	{F 323}

{F 323}	Continued From page 197 received the cocaine from a resident (as indicated in the clinical record), R129 stated "someone from the street" gave it to her, but denied being able to remember their name, description, or gender. When asked how much cocaine she snorted, R129 stated "about $20 worth." When asked what happened after she reported the cocaine use to the facility, R129 stated, "They sent me to the hospital." and then stated, "They [facility staff] accused me of giving it to someone else." R129 explained she was accused of giving R14 cocaine on the same day. R129 stated the staff who accused her was the 1:1 staff assigned to her at the time. R129 stated the 1:1's name (NA-G) and explained the one to one was assigned to be with her at all times. When asked why she had a 1:1 assigned to her, R129 stated it was because she was accused of "rummaging" in other residents rooms and stated the 1:1 was assigned to be with her "since March." When asked where the 1:1 was when she received the cocaine from the person on the street, R129 shrugged looked up and away and stated, "I don't know. She wasn't with me." R129 verified she was "a recovering addict." When asked after snorting the cocaine, if the facility assisted her with rehabilitation or psychiatric services, R129 denied social services were offered including assistance with drug and ETOH treatment. R129 stated she would like to go to outpatient rehabilitation for drug addiction. R129 further added she was "not checked" for cocaine use at the emergency room of the hospital and stated the emergency room gave her two shots of dilaudid. R129 explained she "thought" that was going to happen, but she was "surprised" to have received doses of dilaudid. R129 appeared relaxed, but uncomfortable during the interview and was hesitant to answer questions and would	{F 323}

{F 323}	Continued From page 198 not make eye contact. On 5/8/14, at 11:30 p.m. NA-G verified their 1:1 responsibility was to remain at arms length with R129 at all times. On 5/8/14, at 11:41 a.m. NA-J verified she worked on R129's unit and stated she was not aware of ETOH or drugs being exchanged on "my shift," but stated she was aware of situation "weeks ago" when she came to work, she noticed R14 was not in his room. NA stated she asked where he was and a nurses aide "who was R129's 1:1" saw R129 go into R14's room and "exchange something." She stated she learned R14 was sent to the hospital for "eating something." Stated she had not witnessed any exchanges and stated if she saw any she'd report to the nurse. On 5/8/14, at 11:40 a.m. NA-S stated they had seen ETOH bottles in residents rooms and smelled ETOH on another resident and reported it to a nurse. NA-S was unclear when. NA-S stated they "Heard rumor" of a resident dealing drugs in the facility. NA-S further recalled seeing a resident with marijuana in January 2104 or February 2014. NA-S stated she "could smell it." NA-S further stated when she was assigned to be the smoking monitor, she heard residents talk about it. NA-S stated they believed R117 was a dealer. When asked why, NA-S stated R117 left the facility "a lot" and went to the gas station. NA-S further stated she believed R117 was talking money from residents to also "buy cigarettes." NA-S stated she was unclear what happened to the resident after she reported the marijuana, but stated the nurse was "agency" and told her the resident "could have it."	{F 323}

{F 323}	Continued From page 199 On 5/8/14, at 11:55 a.m. a housekeeper (H)-A was asked if they were aware of any residents drinking ETOH in the facility. H-A stated they had seen "empty pint bottles [vodka]" in the trash "by front doors." When asked the last time she found vodka bottles in the front trash, H-A stated, "A few months ago." H-A stated they would report any ETOH bottles found in the facility "and has." H-A was unclear which resident was drinking, but believed the pint bottles were placed in the front trash so they "wouldn't get caught." When asked if H-A knew where the ETOH bottles came from, H-A stated she was unclear, but thought they may have been provided by family. On 5/8/14, at 12:03 p.m. LPN-H stated she confiscated ETOH from R37. LPN-H verified ETOH was provided to R37 and suspected to other residents of the facility, but was unclear how the ETOH was provided to the resident. LPN-H verified R129 was on 1:1 and 1:1 should remain in arms reach of the resident. LPN-H was unaware R129 had obtained cocaine in the facility. On 5/8/14, at 12:10 p.m. the HUC stated she was aware of resident drug and ETOH use in the facility. HUC stated there was "always hearsay between residents they're selling [drugs and alcohol] to each other" included hearsay stories regarding heroin and cocaine "it's always stories." HUC stated she has put "a lot of time in" reporting to hospitals, clinics and ER if a resident was a "drug seeker" and on restrictive recipient program. HUC stated R129 was going to ER, calling herself and getting Ambien, oxycodone and "is happy after." HUC stated R129 "refuses to tell them the script." HUC stated she "goes to the	{F 323}

{F 323}	Continued From page 200	{F 323}		

social worker to report" these concerns and when R129 denied she had pills, "but I know she did get them." HUC stated "every week" R129 had picking a new doctor, stated R129 was not giving paperwork to physicians or altering the paperwork. HUC verified she was aware of residents consuming ETOH in the facility, verified she was aware of residents becoming intoxicated, but was unclear where the ETOH was coming from. "I feel like we're supposed to do something, 'cuz no one will take charge." HUC verified she was aware of R129 obtaining cocaine and going to the ER. Stated she was not clear if there was a toxicology screen, but stated she had asked for them in the past. HUC stated she and other facility staff believed R129's "son" (HUC made quoting gesture with both hands) was also R129's dealer and described him as a native man who R129 called her son, was at the facility at the time R129 snorted cocaine.

On 5/8/14, at 3:59 p.m. NA-F stated they were scheduled as the safety monitor in the facility. NA-F stated they were aware of a resident "caught with several bottles of vodka" in their room but denied knowing about drug use amongst residents in the facility. NA-F stated they would report any suspected drug and ETOH use to a supervisor or the charge nurse. NA-F verified R129 was assigned a 1:1 and the staff should remain in arms reach of R129.

Further review of the nursing progress notes indicated the following:
- On 5/9/14, at 7:31 p.m. the pharmacy was contacted regarding R129's Percocet (a narcotic pain medication) refills and determined R129's prescription had 110 Percocet tablets delivered and outlined the delivery dates and the amounts

{F 323}	Continued From page 201 provided. The note indicated R129 was informed of the information. - On 5/11/14, at 10:09 a.m. a note written by the HUC indicated NMMC called the facility "requesting" R129's medication administration records (MARs). The note indicated the RN from the hospital notified HUC R129 had been admitted to the ICU, had been intubated "due to acute alcohol intoxication." The note indicated R129's toxicology screen was "negative for drugs but positive for alcohol with a level of .323." Although R129 had a staff person assigned as 1:1, R129 obtained and ingested enough ETOH to be life threatening. Although the note identified the administrator was updated, the clinical record lacked evidence the State agency was immediately notified of the incident. The clinical record lacked documentation at the time of the incident, lacked pertinent assessment information such as vital signs at the time, descriptions of R129's symptoms, immediate determination of how, when or where R129 obtained the ETOH and/or if the assigned 1:1 was interviewed at the time. - On 5/11/14, at 10:55 a.m. a note written by the DON, recapitulated R129 was sent to the hospital, identified the time of transport as "around 4 am" on the night shift, and identified R129 was sent in "for intoxication." DON's note indicated R129 had "become weak" and needed to be lowered to the floor." The note indicated two LPNs were contacted and the NA staff assigned to the 1:1 was called. The note indicated the NA assigned to R129 "reported that resident has been in and out of [R14's room number] but did not notice any exchange of ETOH. She also reported that resident [R14] was upset because the 1:1 has to be in his room too while resident is visiting..." The note indicated R14 denied giving	{F 323}

{F 323}	Continued From page 202 R129 ETOH, but "mentioned that resident had alcohol overnight." R14 denied knowledge of where R129 could have obtained her ETOH. - On 5/11/14, at 2:49 p.m. a note written by DON indicated NMMC was contacted to receive updates on R129's status. The note indicated, "I also requested to have the resident undergo a chemical dependency assessment to ensure that the resident can be transferred to a residential chemical dependency facility as appropriate, considering the resident's recent hospital trip to the hospital for snorting cocaine." - On 5/12/14, at 12:07 a.m. a late entry note (no indication for the date or time the late entry was for) indicated an NA staff "report to this writer that resident was in the bathroom longer than usual, came out and appeared drowsy, unsteady gait" and identified R129 was at risk for falling, was verbally aggressive to staff and R129 stated, "I'm drunk." The note indicated the room was checked and no evidence of ETOH was found. The note indicated R129 "threw herself to the floor" and was sent to the ER at 4:00 a.m. On 5/12/14, at 10:26 a.m. DON verified had not read the plan of correction from the previous survey and and did not know what the plan was. Verified was not aware of policy, system or facility changes made as a result of the survey. DON reiterated he was "waiting for this [the survey]" to "blow over" and then he had plans to work on "problems" in the facility. DON stated he read the online public survey results for the facility from 2013 and stated he was not given an accurate picture of the facility problems. DON stated there was "no system for monitoring staff to ensure facility policies were followed." - Was asked regarding R129 obtaining ETOH or drugs while on a 1:1, DON verified the	{F 323}

{F 323}	Continued From page 203	{F 323}		

information was not documented in the clinical record. DON stated it was "because the LPN did not have access to document" and explained it was because she was "gone for a longer time." DON was unclear when the documentation was going to be completed, or why the LPN did not have access to computer documentation. DON verified the 1:1 should have been in arms length of R129 at all times. After surveyor explained observations of the 1:1 14-20 feet away from R129 outside the facility, DON stated the staff assigned to the 1:1 on 5/6/14, was "not compliant" with facility policy. DON was unclear on when to report to the administrator and stated he "believed it was within 24 hours," DON was unclear when to report to the State agency and verified he had not documented the investigation. When asked if DON had determined if R129 may have been neglected, having obtained both cocaine and ETOH while being assigned to be supervised by a facility staff person 1:1, DON stated he was concerned regarding the "safety component" and was not aware R129 was neglected. DON further stated he was "unaware how" R129 could have been neglected. DON was unclear how the resident obtained ETOH, but verified R129 was harmed by the incident.

On 5/12/14, at approximately 2:00 p.m. CLSW-A and CLSW-B both verified upon hire to the facility, they had been working on "re-writing care plans and discharge planning." CLSW-A stated there was a third social worker who no longer came to the facility and a part time social worker on evening who was "reducing her hours to once a week." Both verified they had not specifically worked with R129 for CD treatment and verified was last noted to be offered to R129 on 4/4/14. Both verified they should have revisited CD

treatment options after R129 reported cocaine use on 5/3/14. Both verified they did not know R129 was hospitalized for ETOH toxicity and expressed they "should have been notified." Both stated they were not in the facility over the past few days due to the facility not paying their company's bill. CLSW-B stated she was concerned for the residents of the facility and verified R129 should have been reassessed after obtaining cocaine. Both verified R129 was harmed. At 2:43 p.m. CLSW-A stated, "I cannot imagine how a resident who was on 1:1 would get that much ETOH in her system and when I got here on Sunday I came to the office to open the computer to see what happened and guess what, there was no nursing notes. I went outside to the desk and told the administrator and DON to get the nurse in to document and have the 1:1 fired. There are so many people here than I have seen on 1:1. For me 1:1 means the person needs to be somewhere else not at the nursing home."

R41:
The facility failed to provide supervision to prevent ingestion of alocholic substances, which resulted in actual harm to R41 on 5/1/14. While intoxicated the resident drove his motorized wheelchair (w/c) off the curb, fell over, sustained injury to his right forehead and right arm. R41 was hospitalized with low blood pressure, low magnesium and low potassium.

R41 was observed to sun himself in the facility driveway, outside of the front door and toward the public sidewalk on 5/5 at 2:09 p.m. and 5/6 at 10:46 a.m., 5/7 at 10:45 a.m., 5/8 at 2:15 p.m. , 5/9 at 3:00 p.m., 5/10 at 2:30 p.m. , 5/12 at 2:00 p.m., and 5/13/14 at 3:35 p.m.. On 5/11/14 at 11:15 a.m., R41 was observed to sun himself on

{F 323}	Continued From page 205 the smoking patio. All observations were unsupervised. R41 was admitted to the facility per the Admission Record dated 2/4/14, from another long term care facility. R41 had a history of bipolar disorder (a mood disorder with manic and depressed phases), schizophrenia and polyneuropathy in diabetes (nerve damage usually in the feet and legs that can create sensory, motor and bodily function problems). The admission MDS dated 2/17/14, indicated R41 had a BIMS score of 15/15, which indicated no cognitive impairment. A Patient Health Questionnaire (PHQ9 - detected depression) was completed and R41 had a score of 7/27, which indicated mild depression. R41 had verbal behaviors directed at others one to three days during the seven day look back period. R41 was dependent on staff and required total assistance of two persons and a mechanical lift for transfers and toileting; extensive assistance of two persons for bed mobility; extensive assistance of one person for personal hygiene, dressing. R41 was totally dependent on the electric, tilt in space, w/c for locomotion on and off the unit. The CAAs dated 2/17/14, indicated R41 would be referred to the house psychologist. An LOA Safety Assessment dated 2/10/14, indicated R41 was safe to leave the facility on unsupervised LOA, and left the facility daily on unsupervised LOA according to staff. A Vulnerable Adult Assessment dated 2/10/14, indicated the resident utilizes an electric w/c for ambulation. "Resident is OK to go on unsupervised LOA." A Smoking Evaluation dated	{F 323}

{F 323}	Continued From page 206 2/10/14, indicated independent with smoking and smoking materials. The care plan revised on 3/18/14, indicated R41 had impaired cognitive function or thought process related to personality disorders of bipolar and schizophrenia. R41 had a history of being verbally abusive to staff and other residents, and required assistance with ADLs, and was safe for unsupervised LOA. A Physician's Progress Note dated 4/15/14, indicated the visit was to establish primary care and recommend R41 for a psychiatry consult per R41's request. In addition, a recommendation was made by the physician for R41 to have a referral made to a pain clinic consult for chronic use of opiates (oxycodone) and morphine (both narcotics). The medical record lacked evidence that the physician's recommendations were scheduled and that R41 went to the consults. A progress note dated 5/1/14, at 3:05 p.m. revealed R41 was off the property in the neighborhood. He became intoxicated (on a LOA) in the neighborhood), when he returned to the facility he drove his electric w/c off the curb on the driveway to the facility. R41 was found lying on pavement on his right side and his speech was slurred, but R41 remained alert and oriented. "He stated his last drink was 5 minutes ago. He was incontinent of urine and had a laceration on his forehead, he complained of right arm pain." The physician was notified and 9-1-1 was called. R41 was transferred to NMMC for further evaluation. He was admitted to ICU with low blood pressure, low potassium and low magnesium. The medical record lacked evidence that the assessments were reviewed and/or revised for R41's LOA	{F 323}

{F 323}	Continued From page 207 status. On 5/1/14, the fall risk care plan was updated to include the fall on the driveway, but lacked mention of the causative factor of intoxication. On 5/5/14, at 1:43 p.m. R41 returned to facility. New diagnoses from the Intra-agency Transfer Form dated 5/5/14, included: fall, intoxication, and alcoholism. A Physician's Order on 5/5/14, included, "No longer okay to leave unsupervised LOA's." A WanderGuard (a personal alarm attached to resident to alert staff the resident attempted to leave the building) was ordered for the resident. The care plan revised on 3/18/14, lacked mention of supervised LOA. On 5/6/14, at 9:16 a.m. the facility met with resident to discuss the incident that occurred on 5/1/14, the facility obtained an order for supervised LOA. Resident stated he was drinking because he was depressed. The facility placed a WanderGuard on his w/c. Even though R41 had a WanderGuard placed on the w/c, R41 continued to remain at risk due to the facility, as the facility staff continued to silence the alarm at the front desk and let him out of facility. R41 continued to leave the facility and move about the property unsupervised. R41's medical record lacked evidence of any social service intervention at the facility for his depression and drinking related to depression which would include providing information such as AA or referral to any place for help or support. Even though the CAAs dated 2/17/14, indicated R41 was referred to a house psychologist, R41's medical record lacked any evidence R41 had seen the house psychologist.	{F 323}

R117:
R117 was identified by the facility as questionably buying cigarettes and drugs, and selling within the facility. The facility failed to act upon allegations that R117 was bringing drugs, alcohol and cigarettes into the facility that caused actual harm and hospitalization to other residents.

R117 was admitted to the facility 1/21/14, with admission diagnoses of cardiomyopathy (weakened heart muscle with decreased pumping ability), Atrial fibrillation (irregularly irregular heart beat that causes the heart chamber to be under filled when pumped and can lead to inadequate heart pump and life threatening blood clots in the heart), chronic Coumadin use (to thin the blood and prevent blood clots from forming) congestive heart failure (fluid buildup in the lungs or extremities due to poorly pumping heart), shortness of breath, hypertension (high blood pressure), anxiety, and depression.

The admission MDS dated 2/3/14, indicated R117 had a BIMS score of 15/15, which depicted no cognitive impairment. R117 was independent with all activities of daily living and mobility.

R117's LOA Safety Assessment dated 3/18/14, indicated the resident was assessed as appropriate to leave the facility unsupervised; a Smoking Assessment dated 3/18/14, indicated R117 was safe to smoke. A Vulnerable Adult assessment dated 3/18/14, indicated a recent history of resident to resident aggression, can be aggressive when confronted, had a history of substance abuse, but denied recent use, and was safe for unsupervised LOA.

The care plan revised 4/27/14, indicated R117 did

{F 323}	Continued From page 213 discuss the rules regarding smoking. Resident refused to meet, writer asked if a copy of the policy could be left with the resident, he stated 'no' Writer asked when a good time would be to come back, he stated "tomorrow" (which he also stated yesterday when he refused to come to the meeting). Writer expressed the importance of receiving the information today, he continued to decline. Writer informed him that not following the facility policy may result in losing his smoking privileges and could result in being given a discharge notice, writer again asked to meet or at least to leave the policy with him, he responded 'no.' Writer and administrator left, resident came out shortly after and began yelling about the noise in the hallway and receiving his mail. Writer attempted to approach resident but he walked away. Writer and administrator met with business office manager regarding his mail complaint, she stated that resident is waiting for his check and has been looking for it daily. She stated that his check usually comes on the 3rd of the month. She stated that she has informed him that he will receive his mail the day it comes." - On 5/5/14, at 3:55 p.m. a progress note indicated, "Writer was updated by NAR [nursing assistant registered] that this resident received money from another resident [#02445] to go by cigarette from the store. Writer approached this resident reminding him of the smoking rules. Resident told this writer that soon as he buys the cigarettes for resident [#02445], he will bring them and give it to the smoking NAR. Writer reminded resident that this was discussed in the meeting and was one of the items discouraged. Writer left resident and updated the Administrator about this incident. Administrator will follow-up. " - On 5/6/14, at 9:37 a.m. R117 was observed to come out of the facility, walked across the top of	{F 323}

the planters (jumped up with ease, skipping gait) and had lit his cigarette at the front entrance. Smoking monitor and a dietary manager (DM) did not intervene. R117 spoke with female staff, then went over to R36, exchanged money, and then went to talk with R129 (who had 1:1 staff that was standing 20 feet away from R129) and R91. [Note R117 pulled out a wad of cash, and R36 was observed to give him cash the smoke monitor and 1:1 staff did not observe the exchange]. R129 sat on planter and smoked with R91 and R117. R117 then returned to the building.

- On 5/7/14, at 8:18 a.m. R37 was observed standing next to R117, who was sitting on the planter on the rear of the smoking patio. R37 had his wallet out and both R37 and R117 were watching the smoke monitor while R27 held his wallet open. R1 arrived back with the transport van and zoomed into the smoking patio at a high rate of speed on her motorized scooter, leaving her one to one staff behind. R37 handed R1 his wallet, (unable to determine if she took anything from it). R1 then handed the wallet back to R37. He whispered over to her. At 8:24 a.m. R37 again gave his wallet back to R1, (we were not able to see if she took anything from it), and she then reached down and put the wallet into his lower left leg pants pocket.

- On 5/7/14, at 8:43 a.m. R1 stated "there were no smoking problems here until this thing started [referring to 1:1 for unsafe smoking and not following facility rules], I used to buy 50-60 packs of cigarettes a day for these guys and I never charged them a thing." "Now because I have a 1:1, R117 buys things and he charges them a pack of cigarettes just to walk down to that little store." R1 stated that "[R117] was also known to charge for getting drugs and alcohol." R1 turned to R9 (roommate) and stated, "Isn't that right!" R9

verified the statement was true. The facility identified R1 as known smoking issues and questionably drugs and the facility identified R9 as a known pot smoker.
- On 5/7/14, at 1:15 p.m. a call was made to the MPD-A to see if the facility had reported suspected drug dealing. MPD-A stated the facility called today to report suspected drug dealing, but had not reported it between 3/18/14 (date of survey exit) and today (5/7/14).
- On 5/8/14, at 2:38 a.m. a progress note indicated, "Resident left facility since morning of 5/7/14, and has not returned to facility. Time now is 02:40 the DON had been notified, 911 had been called, and they are on their way to come and do a missing persons report. There is no phone number on file to contact the resident. Will continue to update as time goes on."
- On 5/8/14, at 6:30 a.m. "Resident is still not back to the facility. The police are aware, have made a police report, and have assigned a case number for missing person. Please call MPD-C at phone number 612-673-5303 as soon as resident return to facility."
- On 5/8/13, at 3:35 p.m. the interdisciplinary team (IDT) met to discuss the elopement and issued a 30 day discharge notice, and supervised leave only.
- On 5/9/14, at 10:34 a.m. R117 was observed back in the facility. At 11:22 a.m. no progress notes have been entered to acknowledge R117 was back in the facility.
- On 5/9/13, at 10:38 a.m. (was added to the progress notes) "Resident returned to facility unharmed. Resident verbalizes that resident is OK and has been safe at Treasure Island Casino. Writer called primary care physician to update on residents return and request an order that states: Resident must be supervised on all LOA's except

{F 323}	Continued From page 216 medical appointments. Awaiting return call from clinic." - On 5/9/14, at 11:50 a.m. "Writer received a new order from PCP that resident cannot leave the facility unless supervised. Also resident can leave the facility unsupervised if going to a medical appointment. While writer was speaking to resident writer observed residents eyes were bulging and he had very rapid jaw movement. Resident appears to be under the influence of something. Writer placed another call to PCP office to inform MD that writer believes resident is under the influence. Writer also reported to nurse at PCP's office that resident has not taken any medications. Writer also asked resident if he would complete a toxicology screen and resident denied. Resident also denied any drug or alcohol use to writer. Writer is concerned of his safety. Awaiting response from MD office." - On 5/9/14, at 12:00 p.m. "writer spoke with nurse at PCP office and orders received to send resident to the emergency room at St. Joseph's office due to suspected drug use along with his heart conditions. Resident will be sent to St. Joseph's hospital." - On 5/9/14, at 12:23 p.m. two police cruisers (three officers) and an ambulance were observed to pull up to the facility and enter the building. The consultant administrator informed the surveyors that "R117 was being really unruly, had been out of the facility for several days and not been taking his medication (including Coumadin), stated his eyes are bulging and I am so concerned he is going to have a heart attack, he is refusing to do a tox [drug toxicity] screen here (urine drug screen). We have called the doctor and he said to transfer to the hospital for evaluation. The police have been called to back up EMS, since he is not cooperating."	{F 323}

{F 323}	Continued From page 217 - On 5/9/14, at 12:35 p.m. a progress note indicated: Paramedics and police arrived to facility to transport per MD orders. Resident was unwilling with the officers and refused to get on the gurney. Three police office had to physically walk resident out of the building. While resident was walking out resident continued to scream "I am leaving AMA, I am leaving AMA. Writer gave paramedics full report on resident's condition and the fact that resident has not taken Coumadin for three days with his Atrial fibrillation and congestive heart failure (CHF) condition. All medication sheets, Face Sheet, code status, and physician orders sent with paramedics. Writer called St. Joseph's ER and gave report and updated on status, along with requesting toxicology screen. - On 5/9/14, at 1:04 p.m. a social work progress note indicated, "Resident discharged from the facility against medical advice today; May 9th, 2014 at 12:45 p.m. Administrator informed writer that resident was threatening to leave AMA. Writer went to meet with resident to discuss his plan, where he was planning on going, and why. When writer approached, resident yelled 'Are you LSW-C?' Writer responded affirmatively, resident then yelled 'Why did you tell [R81], I was threatening him? He's my friend and I have the right to see him.' Writer informed resident that writer was not aware of what he was talking about, writer asked who [R81] was. [R117] walked away. Another social worker approached resident regarding his statement that he was leaving AMA. Social worker asked to talk with resident he yelled 'no' and slammed the door. Social worker knocked on the door and asked resident what his plans were, he again slammed the door. Writer and social worker were informed that resident appeared to be under the influence of a	{F 323}

substance and had been asked to have a tox-screen done, when he refused his MD gave an order for resident to be sent to St. Joseph's hospital (where his cardiologist is) so that he could be monitored given his heart condition and not knowing what substances he had ingested. The police and paramedics arrived to take the resident to the hospital, resident stated that he was leaving the facility AMA. The police asked him "you are leaving the facility against medical advice?" Resident stated "yes." Police and emergecnt medical technician (EMT) then stated that his doctor gave an order for him to be admitted to the hospital so they had to take him. Resident again refused. The police informed him that they had to take him. Resident was asked to sit on the gurney he refused multiple times, the police escorted him out of the building. They asked resident if he had any drugs on his person, he stated 'yes' in his back pocket. Residents person was searched, a wallet and a pack of cigarettes were removed from his back pockets. A rolled up bag was removed from his fleece jacket pocket and resident identified this as cocaine. As resident walked down the hall he continued to yell 'I am leaving AMA' Resident refused to sign the Release of Responsibility for Discharge Against Medical Advice form. While resident was threatening to leave AMA the administrator called adult protection to update them on the concern that resident was threatening to leave and we were not able to get the information about where he would be going. The adult protection worker stated that they could not take the report until resident actually left the building. Writer called adult protection at 12:50 PM stating that resident had discharged against medical advice at 12:45 PM. Writer informed them that resident had left via ambulance and

facility (R117) and had exchanged something with resident R129 who had been admitted to the hospital on 5/11/14, with alcohol intoxication with a level of 0.323. CLSW-A stated, "I have personally had to question the 1:1 staff here at the facility when I have seen them sitting outside the door when resident is in the room with the door shut. When I have asked 1:1 staff how they are monitoring the resident when sitting outside the door some have gotten argumentative and said the resident did not want them in the room and I have told them you are supposed to be at arm-length not behind but in-front to make sure nothing is exchanged. I cannot imagine how a resident who was on 1:1 would get that much alcohol in her system and when I got here on Sunday I came to the office to open the computer to see what happened and there were no nursing notes. I went outside to the desk and told the administrator and director of nursing to get the nurse in to document and have the 1:1 fired. There are so many people here than I have seen on 1:1 for me 1:1 means the person needs to be somewhere else not at the nursing home." Although the care plan had been updated on 4/11/14, by CLSW-C and on 4/27/14 by CLSW-A, R117 had not been offered services for his repeated aggressive and confrontational behaviors, or chemical dependency.

ELOPEMENT:
On 5/5/14, and 5/6/14, R13 was observed to be allowed to leave the facility unescorted to smoke in the designated smoking area. Although R13 had a WanderGuard applied, the WanderGuard alarm was disabled when R13 left the building. On 5/6/14, at 4:45 p.m. R13 was observed to have eloped from the facility and was observed

{F 323}	Continued From page 222 on the city sidewalk by the surveyor. Upon arrival to the facility on 5/5/14, at 1:35 p.m. R13 was observed to be out on the designated smoking area with four other residents and two facility staff. R13 was observed to be in a wheelchair with a half laptray on the left side of the wheelchair. R13 was observed to be smoking a cigarette independently. On 5/6/14, at 8:30 a.m. R13 was observed to wheel independently to the front door. A chirping sound was heard and R13 was observed to exit the facility and wheel herself backwards to the smoking patio. No staff escorted her. Seven residents were observed to be in the designated smoking area. R13 wheeled to the table under the arbor, was assisted to light a cigarette by the smoking monitor and smoked independently. - At 8:33 a.m. R13 remained on the smoking patio with four other residents smoking. - At 8:46 a.m. R13 extinguished her cigarette appropriately and wheeled herself back into the facility. A loud beeping noise was heard as R13 entered the facility. The sound was immediately silenced to a slight chirping sound. R13 wheeled into the facility and down the hallway. No staff escorted her. - At approximately 11:00 a.m. R13 was randomly observed to smoking in the designated smoking area, a male staff was observed to be monitoring the smokers. R13 was observed to complete smoking her cigarette at approximately 11:20 a.m. and wheel herself into the facility unescorted. The smoking monitor did not assist. A quiet chirping noise was heard as R13 entered the building. -At 4:45 p.m. R13 was observed by the surveyor to be at the end of the driveway in her wheelchair	{F 323}

wheeling with her feet towards the 49th Avenue North. R13 turned left upon reaching the sidewalk and began wheeling herself with difficulty towards 6th street. After a few feet, R13 mad a U-turn and began pushing herself backwards down the sidewalk. The street was observed to be busy with multiple cars driving rapidly The speed limit was 30 miles per hour (MPH). The smoking monitor was observed to be behind a pillar with his back to the street and R13.
- At 4:46 p.m. the front desk monitor (O)-C was notified by the surveyor of R13 observed on the city sidewalk. O-C verified R13 "could not" be on the sidewalk near the street unsupervised and immediately ran outside to R13. When O-C reached the resident, R13 was approximately 20 feet past the end of the driveway and half way to 6th street, wheeling backwards on the sidewalk facing oncoming traffic. O-C was observed to speak with R13 and after several minutes, wheeled her back into the facility. O-C could be heard to tell the smoking monitor to watch for residents eloping. O-C returned R13 to the facility.

R13's Diagnosis Report dated 2/4/09, indicated diagnoses to include hemiplegia affecting the dominant side, depressive disorder and cognitive deficits due to cerebrovascular disease.

The Vulnerable Adult Assessment dated 6/24/13, identified R13 had history of wandering into other residents rooms, history of unsafe smoking and taking other peoples belongings. The assessment identified R13 had cognitive deficits, short-term memory loss, impaired decision making and poor judgement. In addition, R13 was identified to require supervised LOAs (Leave of Absences) only and identified R13 had a past history of drug

{F 323}	Continued From page 224 abuse. LOA Safety Assessment dated 6/24/13, identified R13 had cognitive impairments related to dementia, and resident was unable to leave the facility unsupervised. A Camden Care Center Care Conference form dated 10/1/13, indicated, "[R13] propels herself independently in a wheelchair to all destinations within the building - at times she will propel herself backwards and needs frequent reminders to not do this. She has a history of wandering from the facility and thus wears a WanderGuard to alert staff if she attempts to leave the building. She also has a history of wandering into other resident rooms and taking their belongings, which can cause other residents to become frustrated with her so she needs frequent redirection." The Nursing Assessment Packet Review for the reference period 3/19 - 3/25/14, included a safety Risk (Fall) Assessment dated 3/19/14. The assessments did not address or review the need for a WanderGuard. R13's quarterly MDS dated 3/25/14, indicated R13 was cognitively intact, was identified to have no behavior problems, and required extensive assistance with ADLs. A Care Conference summary dated 4/10/14, and another Care Conference form (undated) did not address R13's use of a WanderGuard or elopement risk. R13's Physician's Order Sheet dated 4/16/14, directed to check R13's WanderGuard every shift beginning 9/19/13.	{F 323}

{F 323}	Continued From page 225 The Behavior Monitoring Documentation form (undated) identified R13's target behavior was, "Wandering into other resident rooms" and indicated appropriate interventions such as assist resident to attend activities, assist resident to the bathroom if needed, anticipate needs, visit with resident if she needs help. Dated as reviewed last on 4/23 (no year). R13's Vulnerable Adult care plan dated 4/28/14, identified she had a history of elopement. The goal identified R13 would remain safe at Camden Care Center. An intervention dated 10/7/11, indicated, "Wanderguard in place." An intervention dated as initiated 3/16/12, directed, "Resident has been assessed and may not leave this facility without supervision. An undated Group 5 assignment sheet (a form carried by nursing assistant staff for quick reference to care plan needs) identified R13 had a WanderGuard. The clinical record lacked evidence R13's elopement was documented, including dated, time, location, and those involved. The clinical record lacked evidence R13 was evaluated for elopement risk after being found to elope, or R13's physician was notified at the time of the incident. The clinical record lacked evidence the administrator or State agency were notified of the incident. In addition, the clinical record lacked evidence the elopement was thoroughly investigated, including interview with staff present at the time of the elopement. A nursing progress note for R13 written by administration on 5/8/14, at 9:04 a.m., "Report	{F 323}

{F 323}	Continued From page 226 received that the resident attempted to leave the facility on Tuesday May 6 around 4 pm trying to get to her son, resident was found by the receptionist on the sidewalk, redirected back into the facility. Resident has her WanderGuard on. Receptionist [O-C] reported that the she reminded the resident that resident cannot leave the facility unsupervised, receptionist was educated that when residents with WanderGuard would like to get out of the building to smoke, the smoke monitor should be alerted. Son and daughter notified. Message left to NPs voicemail to update on resident. Although the note indicated a message was left for NP, the NP was not called until four days after the incident. On 5/8/14, at 12:44 p.m. the administrator stated he was notified of the elopement on Tuesday "the next morning" but was unclear why it was not reported to him until then. The SA form dated 5/8/14 (no time documented of report), indicated, "Report received that the resident attempted to leave the facility on Tuesday May 6 around 4 pm trying to get to her son, resident was found by the receptionist on the sidewalk." On 5/9/14, at 11:00 a.m. R13 was observed to wheel herself backwards out of the facility through the front entrance. The WanderGuard did not sound. O-C was observed to be at the front desk and was observed to reach to the right. O-C verified she reached to silence the alarm for the WanderGuard. R13 was observed to exit the facility without staff and wheel without staff to the designated smoking area. - At approximately 11:25 a.m. R13 was observed to wheel herself out of the designated smoking	{F 323}

area, push the handicapped switch to open both doors and wheel herself backwards into the facility. O-C was observed to silence the WanderGuard alarm (reach down to activate switch). R13 wheeled herself backwards down the hallway into the facility. At the time of the observation, O-C stated she disabled the WanderGuard alarm for residents who wanted to smoke in the designated smoking area. At not time during the observation, do O-C alert the smoking monitor or staff of R13 leaving the building.

On 5/9/14, at 1:11 p.m. RN-C stated she was in the room when O-C reported R13 had eloped. RN-C stated the announcement was made and RN-C, LPN-E, LPN-A and DM were present for the announcement. RN-C stated she did not report the concern as it was LPN-A's responsibility and verified R13 was assigned to her unit. RN-C stated LPN-E was not available for interview. RN-C stated if a resident was found to elope, the staff should try to locate the resident; notify the family and physician of the elopement and if the resident was not located to notify law enforcement. RN-C stated an incident report should have been completed. RN-C did not indicate when the administrator or SA would be notified. When asked if and when the administrator and SA should be notified for elopement, RN-C stated LPN-A was responsible and she "believed" she may have notified the administrator or SA. RN-C was unclear if that occurred and was unclear when to notify the administrator and SA. Information, including the incident report and notifications, were requested at the time of the interview.

On 5/9/14, at 1:26 p.m. RN-C verified no incident

report was completed regarding R13's elopement and provided a copy of the report to the State agency dated 5/8/14. RN-C stated the report was made "48 hours later." RN-C provided a copy of a corresponding nursing progress note dated 5/8/14. RN-C verified the clinical record did not indicate when the administrator or State agency was notified.

On 5/12/14, at 10:26 a.m. DON stated he was not in the facility at the time of the elopement and he was not informed until 5/8/14. DON explained the incident was not reported to the administrator or SA because he was not at the facility. DON was unclear who was assigned to report in his absence. DON confirmed R13 should not have left the facility unescorted and stated residents with WanderGuards were at risk for elopement and leaving the facility without supervision was a safety concern. When asked if staff knowingly allowing a resident with a WanderGuard to leave the facility unsupervised was potentially neglect, DON stated he was aware of a "safety component" but was unclear on if this was neglect. DON verified the incident was no thoroughly investigated. In addition, DON verified the details of the incident were not documented in the clinical record and should have been. DON verified R13 should have been evaluated for elopement risk after the incident.

On 5/12/14, at approximately 2:00 p.m. CLSW-A and CLSW-B stated they were not informed of R13's elopement on 5/6/14. Both verified they should have been informed so they could assess the resident.

According to the record, R116 eloped from the facility on 5/11/14, at 9:30 a.m., 11:30 a.m. and

{F 323}	Continued From page 229 11:52 a.m. while wearing a WanderGuard device which had been implemented to prevent the resident's elopement. Record review indicated R116 had been admitted to the facility on 1/20/14, with diagnoses of lung cancer with metastasis (cancer moving from one body organ to another) to the liver and the brain, metabolic encephalopathy (temporary or permanent damage to the brain that occurs when the liver cannot clear the toxins from the body), confusion and depression. The record also indicated R116 had Hospice services initiated on 1/21/14. On 4/15/14, at 10:49 p.m. a nursing progress note indicated, "Pt [patient] is declining. He is very weak and needs a lot of assistance." A progress note dated 5/5/14, indicated R116 had been outside with his son and the resident had experienced a fall. R116's son was present at fall. Hospice was notified of fall and a new wheelchair (W/C) was ordered for resident. Staff had also placed a WanderGuard on the resident's chair to alert staff when the resident wanted to go outside to maintain resident's safety. "Resident is allowed to go outside although staff needs to be alerted. Son is aware and in agreement with interventions. Nursing is to continue to monitor." Additionally, a draft progress note dated 5/5/14, at 10:47 p.m. indicated R116 had increased confusion. "He requested going the bank to complete his transaction that he began earlier. He was leaning down to the floor to pick up of stuff which was apparently not there (visual hallucination). He was ambulating around getting out of w/c. Towards the end of shift he was on	{F 323}

{F 323}	Continued From page 230 one to one rotation to prevent him from falling." A progress note dated 5/6/14, at 2:55 p.m. indicated R116 continued to sit at nursing station with staff due to attempts to self-transfer and unsteady gait. R116 was observed on 5/11/14, at 9:30 a.m. to be on the sidewalk west of the facility. The health unit coordinator (HUC) was bringing R116 back into the building. The HUC stated she "had found him as she was driving into work." The HUC stated R116 had a WanderGuard on and she was surprised to find him walking outside since he was not able to walk every day. The HUC said she had called the facility and alerted them to the fact that R116 had left the facility and requested someone bring a wheelchair (w/c) to help bring him back to the facility. NA-R and safety monitor/NA-O had also come outside to look for R116. Two other NA's NA-P and NA-Q came outside with a w/c to meet R116 and return him to the facility. On 5/11/14, at 10:38 a.m. a progress note indicated, "At 9:30 a.m. upon arrival to work this writer found R116 outside the facility walking down the sidewalk. When approached he stated 'I am going to visit a friend.' R116 currently has a WanderGuard and due to cognitive impairments is unable to leave the facility unattended. He was verbally resistant to returning to the building but was eventually returned with staff assist of three. Note resident left out a fire exit at the end of the hall. Staff was in route to locate whom ever had exited the building, the DON, administration, and social worker (SW) updated." R116's progress notes from 5/11/14, at 11:52	{F 323}

a.m. included: "Fire exit alarm again sounded at the end of the hallway. Staff immediately responded and found R116 outside. He again stated that he was going to visit a friend. This time he was verbally and physically resistant to returning to the building. Three staff were able to convince him to return in a w/c (wheelchair) due to unsteady/weak gait. DON, SW, and charge nurse notified. Call placed to son who was updated and encouraged to visit and offer support to R116 if able. Son voiced that he understands that this confusion and resistance is likely a direct result of the Cancer. Support provided via phone."

Additional Progress Notes dated 5/11/14, at 4:27 p.m. included, "At 0930 AM resident went out the fire exit and was walking down sidewalk. Staff intervened and resident was brought into facility. Resident stated he was going to visit a friend. At 11:30 [a.m.] resident left out another exit. Staff was with resident and brought resident into facility. Hospice, family and administration were notified. Resident's WanderGuard (departure alert system) was in place and functioning. Resident also placed on 15 minute checks. Hospice updated on increased confusion along with family. Family was here to visit resident."

The facility's HUC was interviewed on 5/12/14, at 10:00 a.m. and at that time the HUC verified R116 had eloped from the facility three times on 5/11/14. The HUC stated R116 had left the building without staff present at 9:30 a.m., 11:30 a.m. and 11:52 a.m.

Although the HUC verified the resident had eloped without staff presence, R116's Progress Notes had indicated staff were with the resident

{F 323}	Continued From page 232 at 11:30 a.m. On 5/11/14, at 10:07 a.m. the administrator was interviewed and stated the day staff, afternoon staff, and night staff had been educated on the immediate jeopardy for drugs and ETOH and elopement and he could not believe the fact that R116 had gone out the back door, and was able to leave the facility. The administrator stated the investigation so far, was that staff heard the back door open, went and looked but had not seen anyone, so they assumed it was staff. The administrator verified that there was no WanderGuard alarm on the back door. On 5/12/14, at 11:00 a.m. surveyors tested the key pad coded door which was locked, but noted that staff unlock the door and enter without regard to which residents are nearby. On 5/13/14, at 1:00 p.m. the consultant administrator stated the facility had checked the key pad coded door to the access hallway to the back exit, which was functional and also there was a WanderGuard system in place on the back door, which was functional, the facility had tested the doors and were not able to determine how the resident had gotten out of the facility by the back door. The facility Elopement policy dated 5/12, indicated... If exit seeking behavior is identified the licensed nurse immediately implements interventions to manage exit seeking behaviors. These interventions may include a personal security device such as a WanderGuard, or diversion activities. The interventions are documented on the care plan and the nursing assistance care plan. ...If the resident is not	{F 323}

located within 30 minutes, the Administrator or designee notifies the law enforcement officials, the corporate compliance officer and corporate director of clinical services. When the resident returned to the facility a physical assessment would be done, a thorough investigation of the event would be completed by the DON or designee. A factual account of the occurrence would be documented in the medical record, and the care plan would be reviewed and revised. The administrator of designee reports the event to the appropriate state agency (SA).
R9 was not supervised during smoking, was keeping smoking materials and was an alleged "Pot smoker."

On 5/6/14, at 7:40 a.m. R9 was observed smoking cigarettes out front on the designated smoking patio with no staff in attendance.

On 5/6/14, at 8:56 a.m. R9 was observed wheeling herself to the front designated smoking area, she retrieved cigarettes and a lighter from her right sock and placed them on the table next to a covered ash tray. R9 then leaned to the table with her right elbow as she lit her cigarette and started to smoke. During observation, NA-B went over to the smoking cart to get a smoking apron, applied the apron on R9, and sat directly across from R9.
-At 9:05 a.m. NA-B continued to watch R9 as she smoked.
-At 9:08 a.m. R9 was observed wheeling herself into the building. No burn holes noted on the front of her shirt or clothing.

On 5/6/14, at 10:05 a.m. R9 was observed wheeling herself out of the building as staff monitoring the smoking area was observed

{F 323}	Continued From page 234 applying a smoking apron, wheeled herself to the smoking area retrieved her cigarette and lighter from her socks as she was leaning far forward and continued to lit the cigarette and began to smoke. -At 10:11 a.m. R9 was still observed sitting on her w/c at the smoking area. At 10:14 a.m. R9 lit another cigarette leaned very far forward to retrieve and replace cigarettes in her socks and continued to lean forward multiple times as she smoked. -At 10:19 a.m. R9 returned back to the building. On 5/6/14, at 2:45 p.m. when interviewing R9 surveyor observed a cigarette box in each white sock on each inner leg. When R9 was asked why she was storing the cigarettes in the socks she stated "You can leave now, go now". Surveyor left the room as requested. When interviewed on 5/6/14, at 3:06 p.m., the DON stated he was not sure if R9 was supposed to be supervised during smoking, and indicated he had been given a list of smokers who required supervision just that day. Upon review of the list, the DON stated R9 was a supervised smoker which meant she should relinquish her cigarettes and lighter. DON stated R9 should not have had any tobacco products on her person, but did not have to wear an apron. Following the interview, the DON was observed to approach R9 at the smoking area and speak to her, and to return to tell the surveyor R9 had refused to give him the cigarettes she had in her socks. When interviewed on 5/6/14, at 3:12 p.m. NA-I (smoking monitor) verified after looking through the locked cigarette box on the cart R9 did not have cigarettes in box. NA-I stated he had been	{F 323}

working at the facility for a month and R9 had never had cigarettes in the locked box.

When interviewed on 5/6/14, at 3:20 p.m. the administrator, DON and LPN-A (the resident care manager for R9) all stated if a resident was a supervised smoker they were supposed to relinquish all smoking materials but many refused. They said they couldn't force them to do it as the residents were part of the supervised program. LPN-A further stated "They have been told that they have to do this and we had a meeting with all smokers last week. They were given a copy of the smoking policy by social services and were supposed to sign it, but some refused. We have told them the rules and when they are or aren't allowed to keep them [their cigarettes], but they don't care. [R9] should be in there, but she won't give them to us."

When interviewed on 5/6/14, at 3:25 p.m. the DON stated, "We have a smoking policy updated and it does include that they should relinquish, are still supervised, the smoking monitor makes sure they are safe with their usage, that is why they are out there and we are still keeping them safe, we have tried to get her lighter and cigarettes on repeated effort but have not been able to do so."

When interviewed on 5/6/14, at 3:43 p.m. LPN-A stated "Problem is if I took her cigarette and lighter, she would just get the cigarettes from somewhere else probably gives someone money to go buy a pack of cigarettes. We tried this morning to take them from her and she stated "I'm not giving them to you because you will sell them to another resident". LPN-A stated the policy had been explained and R9 had asked

what would happen if they did not abide and LPN-A had stated they were consequences. LPN-A further stated the NA who was monitoring the smoking had a book on the cart and documented when a resident refused or when they are not safe. When asked by surveyor if the smoking monitor had reported off to her LPN-A stated she was not sure maybe the social worker had been reported to.

When interviewed on 5/12/14, at 2:26 p.m. CLSW-A stated when R9's room had been searched on 4/23/14, R9's cigarette roller had been found on the roommate's side and had been taken out of the room and kept in the social service room and family had been called to get it but R9's family had been very upset about staff removing the roller from the room. Both CLSW-A and CLSW-B stated they were un-aware R9 was an alleged "Pot smoker" or had history of using per the Resident List Report dated 5/8/2014, provided by the administrator. Both indicated they had not received the list of all the residents who had been thought to have substance abuse issues.

When R9 was interviewed on 5/13/14, at 8:36 a.m., and asked whether she smoked "pot', R9 stated "It's a lie that I am using any pot" and kept repeating same statement to the surveyor.

R9's MDS dated 3/24/14, identified R9's diagnoses included schizophrenia, diabetes mellitus, orofacial dyskinesia, psychotic disorder, manic depression and chronic obstructive pulmonary disease. The MDS indicated R9 had no behaviors and had a BIMS score of 15 indicating intact cognition. In addition, the MDS indicated R9 received one person assist with

transfers, dressing, hygiene, and R9 was did not use any mobility devices yet R9 used a w/c during the course of the survey around and off the unit for mobility. The nutritional status Care Area Assessment dated 3/25/14,, had identified R9 had history of tobacco abuse.

The smoking care plan dated 10/20/11, identified R9 was a smoker. Goal "[R9] will follow all guidelines regarding smoking at Camden Care Center, will remain safe while smoking." Care plan directed cigarettes and lighter will be kept at nursing station, and R9 was a supervised Smoker.

Smoking Evaluation dated 10/7/13, indicated R9 was independent with smoking and smoking materials. After concern was brought to the facility attention on 5/6/14, another Smoking Safety Assessment was completed which indicated R9 was to remain as a supervised smoker, facility was to store tobacco products but may choose to wear apron or not.

Progress Note dated 4/30/14, indicated the director of facility operations and two social workers had been to R9's room and a bottle of "Shout", raw tobacco and other materials (for the tobacco to be rolled) had been removed from the room and placed in the Administrator's office for the family to pick up when they visited.

The undated and untitled list of Unsupervised and Supervised Smokers, revealed R9 was identified as a supervised smoker,did not need to wear a smoking apron, but was supposed to be within an arms distance from the smoking monitor.
R14 was observed to ingest an unknown substance, was sent to the hospital and tested

{F 323}	Continued From page 238 positive for THC (the active substance in marijuana) on 5/3/14, R14 was not evaluated for substance abuse, assessed for safety or provided supervision to prevent potential future access to illegal drugs. R14's admission record dated 1/14/14, indicated diagnoses to include depressive disorder, epilepsy and below the knew amputation. R14's significant change MDS dated 12/31/13, identified R14 had moderately impaired cognition, no mood problems and physical behavior symptoms towards others 1-3 days in the assessment period. The MDS indicated R14 required extensive assistance with most ADLs but was independent with locomotion on and off the unit and eating. The CAA were all dated 1/9/14; CAA for cognitive loss/dementia indicated R14 was able to understand and be understood. CAA for ADL function and rehab potential identified R14 had "alcohol abuse" and "alcohol induced dementia. CAAs did not identify any history of drug use. R14's Vulnerable Adult care plan dated as revised on 4/26/14, indicated R14 had a "History of chemical abuse, including marijuana and heroin. The care plan goal indicated R14 would "remain safe and free from abuse/neglect." The care plan interventions indicated R14 refused all in-house and outside psychiatric services. The care plan identified R14 required supervision for LOA from the facility. A nursing Progress Note dated 5/3/14, at 8:35 p.m. indicated a nursing assistant (NA) had reported to a nurse they saw R14 "put something" in a small plastic bag "possibly drug" at 8:30 p.m. The note indicated a nurse approached R14,	{F 323}

noted he had something in his mouth and asked the resident to "spit out" what was in his mouth. R14 refused to open his mouth, swallowed the content and then opened his mouth for the nurse. The note indicated R14 was "non-cooperative" and "attempted to hit the nurse with his fist." The note indicated the physician had been notified and R14 had been sent to the ER for evaluation.

A North Memorial Robbinsdale HUC Transfer Packet indicated the results of toxicology screen identified R14 was positive for "THC Metabolites [the active drug components of marijuana]" from the past 24 hours. The report identified the laboratory report had been obtained for R14 due to "drug ingestion."

Although the specific incident was documented on 5/3/14, the clinical record lacked documentation including, investigation of the incident to determine potential source(s) R14 may have obtained the illegal drug from, notification of law enforcement, any follow up assessment of R14's safety, an evaluation of R14's access to leave the facility, such as to smoke; documentation of how to prevent potential future instances of R14's illegal drug access and ingestion, monitoring of R14 and interdisciplinary involvement, such as medically related social services.

On 5/8/14, at 11:32 a.m. R14 was interviewed. R14 stated he did not recall the incident on 5/3/14. R14 stated his memory was poor due to being an "eplileptic." R14 denied awareness of illegal drug and ETOH activity in the facility. When asked what R14 would do if she observed illegal drug or ETOH activity in the facility, R14 stated he would "tell the resident not to do it," but would not

{F 323}	Continued From page 240 notifiy staff. When asked why he would not notify staff, R14 stated, "'Cause we all have enough troubles, if someone wants a little activity on the side, go for it!" On 5/12/14, at 10:26 a.m. the DON was interviewed, and verified there was no current system in place for monitoring staff to ensure facility policies were followed. DON was unclear on the specifics of R14's incident. On 5/12/14, at approximately 2:00 p.m. CLSW-A and CLSW-B both verified they were not aware or informed of R14 obtaining and ingesting an illegal drug. Both verified they were not notified R14 was sent to the hospital and had a positive toxicity screen for marijuana. Both CLSW's explained they would have assessed R14 and reviewed potential CD treatment options with R14. Both CLSWs expressed R14 may require increased supervision due to accessing an illegal drug and his history of chemical dependency. Both verified they had access to the computer clinical record, CLSW-A stated the facility lacked consistent documentation of incidents, interventions, assessments and follow up. R62 was identified by the facility to have past/recent substance abuse. R62 had diagnoses that included memory loss, dementia and cerebrovascular accident (CVA). The MDS did not address R62's substance abuse. The most recent cognitive loss/dementia CAA dated 9/11/13, lacked a comprehensive summary of the resident. Review of the quarterly MDS, dated 2/25/14, indicated R62 had moderate cognitive impairment. Review of facility progress note dated 1/24/14, at	{F 323}

{F 323}	Continued From page 241 17:03, indicated "a resident approached writer alerting us that another resident (res) is sitting outfront smoking marijuana. Writer went and found R62 smoking a joint. Writer told res that she'd have to put it out, and to consider this a warning. She was informed that the next time she will be discharged. Writer also asked res if she had anymore marijuana and she denied having any". Review of facility progress note dated 1/24/14, at 17:17, indicated "this writer with the Administrator approached this resident in her room to talk to her about her smoking weed-as per another resident who is a smoker too. Res agreed that she was smoking "weed" this afternoon at the smoking designated area. Writer told resident that the next time she is found smoking "weed" she will be discharged. Res verbalized understanding, and denied having anymore "weed" with her. Nursing will continue to monitor". Review of a Vulnerable Adult Assessment dated 3/18/14, identified R62 had "past/recent substance abuse" and a history of risky behaviors and being in an abusive relationship. R62 was identified to need supervised LOA except for appointments with scheduled transport. R62's care plan with revision date of 4/26/14, identified that R62 had no indications for displaying inappropriate behaviors, had a history of being in an abusive relationship, and had impaired cognitive function/dementia, evidenced by varying mental function, judgment deficit, dementia, 'ETOH" abuse and impaired decision making skills. The care plan did not address ETOH and/or drug abuse even though it was identified in the Vulnerable Adult Assessment and	{F 323}

{F 323}	Continued From page 242 progress notes. Review of a facility provided list of residents with questionable or known ETOH and drug use dated 5/8/14, at 8:02 a.m. identified R62 for drugs. During an interview on 5/13/14, at 10:18 a.m., the DM stated "I did what the 1/24/14 progress note says and reported it to the social worker, director of nursing and the interdisciplinary team...I did not search her room that I remember." During an interview on 5/13/14, at 10:33 a.m. CLSW-A and CLSW-B stated that they were unaware until now of the incident with R62 smoking marijuana in the outside smoking area even though it was documented in the progress notes and the vulnerable adult assessment dated 3/18/14 identified recent and history of substance abuse. CLSW-A stated she has been at the facility for "about a month". SW-B stated she has been at the facility since 3/19/14. During an interview on 5/13/14, at 12:57 p.m. RN-B stated on 1/24/14, R62 had verified she'd been smoking 'weed' but had told them she did not have anymore. RN-B stated they did not search R62's room for drugs and "I would assume the administrator would take care of it because she was there." RN-B verified the care plan was not updated and that she "didn't think" R62 had ever been offered any chemical dependency assistance. R86 had been committed as mentally ill and chemically dependent on 10/31/12, which was amended on 3/12/13, to include admission to a nursing home for rehabilitation and when completed and/or mentally stable, again	{F 323}

participate in chemical dependency treatment. The facility Resident List Report, provided 5/8/14, at 11:00 a.m. identified R86 as a known pot smoker.

According to the Admission Record dated 3/16/13, R86 had been admitted to the facility with diagnoses including: hepatic encephalopathy (confusion related to liver failure) and cirrhosis of the liver and hepatomegaly (enlarged and fatty liver) alcoholic liver damage, thrombocytopenia and anemia (blood disorders related to clotting factors not supplied by the damaged liver, psychosis, drug abuse and drunkenness.

A care conference dated 1/2/13[sic] (2014), lacked mention of commitment to facility for chemical dependency and mental illness, or need for treatment when stable.

A progress note dated 2/24/14, at 4:38 a.m. " Resident had been very confused and having difficulty to settled down in bed. judgement [sic] has been non intact and appearing restless with a lot of tremor. He did attested [sic] to this writer that when he goes LOA he smokes marijuana but never drink ETOH at all. He state "If I drink I will die. " His platelet has been dangerously lower thus posing him at a risk for bleeding. Update DR smiley about resident change in condition, which then mandate this writer to send resident to the emergency for thorough evaluation at this time. Meanwhile, writer had been trying to touch base with family members but unable. We will continue to follow up with his condition. "

A progress note dated 2/24/14, indicated at 11:00 p.m. "Pt was found smoking 'pot' in his room. His roommate was in the room at that time. The

nurse discussed the disadvantages of smoking in the room including fire hazard. The administrator was informed via text messaging and incident report filled out."

A progress note dated 3/4/14, at 6:11 a.m. noted, " While executing an initial nursing rounds this shift, this writer smell and noted a medicine bottle fill up with marijuana. Upon conversation, this resident did urge this staff that; he was not going to smoke within this vicinity and he refused to surrender it to this writer, instead he affirmed to this writer that he was going to report it to the police. Added to that, he did want to have an extra oxycodone which had been previously discontinued. He had flexeral [sic]with some benefit noted. He want [sic] another sleeping pills at about 4 am. He had one sleeping pill at bedtime. Refused 50 mg of Trazodone [sic], he wanted 100 mg. Meanwhile we will continue to offer him support and encourage him with care and pain management protocol at this moment. "

An annual MDS dated 3/22/14, had a BIMS score of 15/15. R86 required setup for dressing and meals and was independent with all other cares. A vulnerable adult assessment dated 3/18/14, noted past and recent chemical abuse. R86 had fluctuating cognitive deficits related to liver damage, chemical use and needed supervised LOA due to fluctuating cognition and chemical use.

A smoking assessment dated 3/18/14, indicated reports of smoking marijuana outside, and recent drug use reported by resident.

A LOA safety assessment dated 3/18/14 indicated mental illness, fluctuating cognition related to liver

On 5/12/14, at 1:53 p.m. R113 was observed sitting on his bed back facing the door and was observed rolling cigarettes using a cigarette roller. R113 asked if it was okay to continue to roll the cigarettes as surveyor talked to him. -At 1:54 p.m. R113 stated he knew exactly who started the rumor about the narcotics. R113 indicated he is currently trying to resolve his marriage and his wife who would not allow him to come out to her house for visits if she found out he had ETOH and drugs issues. R113 stated he remembered the incident when the therapy staff had intervened when he had been approached by another resident for cigarettes and he remembered being talked to by the administrator and social worker about the policy. R113 further stated he also took his medications in front of the nurses as he knew this was going to be a concern/issue and also indicated he knew of ETOH being used at the facility by other residents but because he was a recovered alcoholic he kept his nose out of all trouble to get back with his wife. When interviewed on 5/12/14, at 1:57 p.m. RN-A stated he always watched R113 take all his medications and made sure he swallowed them then took the medication cup out of the room. When interviewed on 5/12/14, at 2:18 p.m. both CLSW-A and CLSW-B stated they were not aware of R113 using any illicit drugs at the facility. CLSW-A stated she remembered talking to R113 for less than ten seconds when he had asked if he would continue to roll the cigarettes and had told him not to until he was told otherwise.	{F 323}

{F 329}	Continued From page 251 R36 was admitted to the facility on 5/26/12 with diagnoses of femur fracture and alcoholic cirrhosis of the liver. The quarterly MDS dated 2/18/14, indicated R36 had occasional pain rated at a four. The Physician's Order Sheet dated 5/1/14, included orders for Tylenol 1000 mg three times a day (tid) as needed and Oxycodone 10 mg tid both for pain and lacked parameters for use. Review of the MAR dated 4/1/2014-4/30/2014, revealed R36 received Tylenol three times for pain rated at an eight and Oxycodone two times for pain rated at an eight. When interviewed on 5/7/14, at 1:51 p.m. registered nurse (RN)-A reported he would usually do a pain assessment for PRN pain medications and for a pain level below three he would not give Oxycodone. When interviewed on 5/7/14, at 1:56 p.m. the consultant pharmacist stated he would expect parameters written by the physician to clarify when to give which PRN pain medication. On 5/9/14, at 8:46 a.m. licensed practical nurse (LPN)-B was interviewed and stated when there is multiple PRN pain medications ordered, she would assess pain level and start with the lowest pain medication unless the resident's pain was "really bad" or something else worked for the resident. Upon interview on 5/12/14, at 9:40 a.m. RN-B stated she would start with Tylenol first and see if it works, then would document if it was ineffective	{F 329}

{F 329}	Continued From page 252 and then try Oxycodone unless there was a specific physician order. The facility Pain Management policy revised May 2013, lacked direction regarding parameters for PRN pain medication. R37 had physician orders for Seroquel (an antipsychotic medication) without adequate indications for use, without side effect and symptom monitoring and lacked evidence of a gradual dose reduction (GDR) or documentation of a clinical contraindication. The Admission Record dated 1/14/14, indicated R37 was admitted to the facility on 9/19/13. Diagnoses included altered mental status and alcoholism. The Psychotropic Drug Use Care Area Assessment (CAA) dated 10/7/13, indicated R37 was receiving antidepressant and antipsychotic medications; however, lacked a comprehensive assessment summary regarding the medications in use. A Psychotropic Medications care plan revised on 3/16/14, included Seroquel was used for psychoses and directed to monitor for side effects and consult with pharmacy and physician to consider dosage reduction when clinically appropriate. The Physician's Order Sheet dated 4/1/14, included orders for Seroquel 25 mg every bedtime and indicated the diagnosis was anxiety. Review of the Physician's Order Sheet dated	{F 329}

5/1/14, lacked a diagnosis for the medication. The Information and Consent for Psychotropic Medications dated 9/19/13 and 2/26/14, indicated the diagnosis to support use were "agitation/sleep."

A review of three undated Behavior/Intervention Monthly Flow Record, revealed R37 was monitored for number of hours of sleep and "yelling/striking." The records revealed R37 slept between six and eight hours on all nights recorded and yelling/striking behavior did not occur.

Physician and nurse practitioner notes dated 11/15/13, 1/8/14, 1/22/14, 2/5/14, 4/9/14 and 4/10/14, were reviewed and lacked a diagnosis of psychosis or a clinical contraindication to a gradual dose reduction.

When interviewed on 5/7/14, at 3:09 p.m. the consultant pharmacist (CP) stated side effects were supposed to be monitored as this was required by the regulation. CP further stated all behaviors have to be specific to the resident.

Upon interview on 5/12/14, at 3:57 p.m. the nurse practitioner (NP) stated R37 received Seroquel for psychosis, verbal outbursts and generalized anxiety which were mainly problematic when R37 was drinking. The NP stated she believed a different medication was used when R37 was in the hospital prior to admit and was unsuccessful because of liver disease. The NP stated she had not reviewed R37's medications because he had been in the hospital frequently and she tries to do dose reductions quarterly.

When interviewed on 5/13/14, at 8:46 a.m. LPN-A

{F 329}	Continued From page 254 stated the indication for use for Seroquel was not listed and she would have to check with the physician. LPN-A stated she was not sure what target behaviors were being monitored for Seroquel. LPN-A stated orthostatic blood pressures were recorded in the electronic record. After review of the Weights and Vitals Summary, LPN-A verified there were no orthostatic blood pressures recorded for R37 since December 2013. A call was placed to the CP on 5/13/14, at 10:01 a.m. to clarify adequate indications for use of antipsychotic medications, no return call was received. The facility Psychoactive Medication Management policy revised May 2013, directed the DNS [director of nursing services] or designee was responsible to ensure timely medical consultation when a psychoactive medication requires a medical review. R89 was not monitored for target behaviors to determine efficacy of Zyprexa (an antipsychotic medication). In addition, R89 was not monitored for potential side effect of orthostatic hypotension (a sudden drop in blood pressure with position change, such as standing or sitting up from a lying position). R89's admission MDS dated 12/28/13, indicated R89 was never or rarely understood, had short and long-term memory problems and R89 had moderately impaired decision making ability. The MDS identified R89 had hallucinations, delusions,	{F 329}

{F 329}	Continued From page 255 and other behaviors concerns towards others. The CAA for ADL (activities of daily living) function/Rehabilitation Potential dated 1/3/14, identified R89's diagnoses to include altered mental status, cognitive impairment and weakness. The CAA identified R89 required staff assistance for ADLs, had no pain concerns, had a history of falls (but no falls in the facility) and was incontinent of bowel and bladder. The CAA for behaviors dated 1/3/14, indicated, "Resident exhibits behavioral symptoms and is cognitively not alert and orient [sic] when writer attempted to assess her. SS [social services] will care plan this matter accordingly." The CAA for falls, also dated 1/3/14, recapitulated the same information as the ADL CAA. The CAA for psychotropic drug use identified R89 used an antipsychotic and R89 had "hallucinations." Although the CAA identified the class of medication used and hallucinations, the CAA lacked identification of what the hallucinations were, what antipsychotic was used, and what target behaviors would be monitored. The CAA indicated, "Nurses will continue to assess for effectiveness of meds [medications] and side effects." R89's care plan for psychotropic medications dated as revised on 1/5/14, identified R89 used Zyprexa related to "potential injury to self or others, dementia and agitation, pick [sic] disease." The care plan directed to administer the medication as ordered, monitor/document for side effects and effectiveness. The care plan directed to "discuss with MD [physician], family re [regarding] ongoing need for use of medication," directed to educate on risks and benefits of using Zyprexa, "Monitor/record occurrence of for target behavior such as agitation, inappropriate response to verbal communication, and	{F 329}

{F 329}	Continued From page 256	{F 329}		

document per facility protocol." The care plan lacked appropriate identification of a target behavior which warranted the use of an antipsychotic, such as hallucinations. Although the care plan directed to monitor for a target behavior, the care plan lacked indications for the ongoing use of Zyprexa.

A physician's Progress Note dated 2/12/14, identified R89 was seen for her first visit. The note indicated while in the hospital R89 had been on a high dose of Seroquel and switched to a low dose of Zyprexa. The note indicated R89's Zyprexa would be considered to be increased to 7.5 mg.

The Physician's Order Sheet dated 3/5/14, indicated R89 had olanzapine (Zyprexa) 5 mg ordered by mouth daily for diagnosis of atypical psychosis.

A Geriatric Services of Minnesota Progress Note dated 3/7/14, indicated R89 was seen by a nurse practitioner. The note identified R89 "appears to be distressed" and was noted to "sit/stand multiple times from wheelchair." The note indicated R89 received 5 mg of Zyprexa daily, "Staff have no reports of behavior changes, but note impulsivity" and identified R89 fell twice in February. The "Psych:" section indicated R89 was "Agitated w/ [with] worried look on face. Mumbling. Slight diaphoresis [sweating]." Continuation of the note indicated Zyprexa would be increased to 7.5 mg "due to continued agitation/impulsivity." A Physician's Order dated 3/7/14, indicated Zyprexa was increased to 7.5 mg by mouth daily and directed to add the diagnosis of schizophrenia.

{F 329}	Continued From page 257 Review of the clinical record, including interdisciplinary team (IDT) Progress Notes from admission to the time of survey indicated no behavioral concerns were documented, such as hallucinations, agitations symptoms or impulsivity. R89 had no IDT progress notes documented after 2/14/14. Although appropriate side effect monitoring was noted in the clinical record, such as labs and Abnormal Involuntary Movement Scale (AIMS) on 3/12/14, the clinical record lacked evidence of target behavior monitoring for the efficacy of Zyprexa. A social service progress note dated 3/26/14, at 3:00 p.m. indicated R89's behaviors were reviewed. "Quarterly Social Service Assessment-Care plan reviewed for changes in mood, behavior, and cognition and updated to reflect Resident's current status. Staff assessment for BIMS [brief interview of mental status, a tool used to measure cognition] and PHQ-9-OV [a tool used to measure potential depression] completed as Resident never or rarely understood questions being asked. Resident has severely impaired cognition r/t [related to] dementia. PHQ-9-OV assessment score of 0 out of 27 indicating no s/sx [signs or symptoms] of depression. Resident continues to receive Zyprexa 7.5 mg [milligrams] daily for dementia/schizophrenia which seems effective. No adverse reactions noted with use of psych med. Will continue to monitor for side effects and effectiveness. [name or R89's guardian], assists with all business and personal needs. Resident has been assessed and cannot leave the facility on an unsupervised LOA [leave of absence]. Resident and guardian have been invited to the upcoming care conference. Social services to continue to be available and assist in meeting the psychosocial needs of Resident."	{F 329}

{F 329}	Continued From page 258 Although the clinical record lacked evidence of target behavior monitoring, the note identified Zyprexa "seems effective." The Care Conference Summary dated 4/10/14, indicated R89 was "Stable, no mood concerns at this time" and "reviewed medications." The concerns and/or Complaints section indicated, "As agitation increases family notes that her breathing gets heavy. Dislikes walking by family would like to see her walk more." The Information and Consent for Psychotropic Medications dated 4/29/14, indicated Zyprexa was administrated for diagnosis of Schizophrenia. On 5/5/14, at approximately 1:40 p.m. R89 was observed to be laying in bed, eyes closed. R89 did not rouse to knock or surveyor announcement at the door. Observations of R89 on 5/7/14, at 8:28 a.m.; 5/8/14, at 8:30 a.m.; and 5/12/14, at 12:23 p.m. Review of the Behavior Monthly Flowsheet for May 2014 indicated R89 was monitored for restlessness and anxiety, but lacked resident specific target behavior monitoring. The monitoring was initiated on 5/5/14. The clinical record lacked evidence resident specific target behavior monitoring was completed for R89. On 5/12/14, at 9:24 a.m. the LPN-E verified the target behaviors were diagnoses and were not resident specific. LPN-E verified target behavior monitoring was only implemented on 5/5/14. LPN-E stated "the other way of monitoring wasn't working" and stated the form was changed. LPN-E verified R89's target behaviors were not assessed or re-evaluated. LPN-E verified no orthostatic blood pressures were checked on R89	{F 329}

{F 329}	Continued From page 259 since January. On 5/12/14, at 9:44 a.m. the director of nursing (DON) verified R89 should have been assessed for the use of antirollbacks and restraints. DON verified the facility identified target behaviors of agitation and restlessness were not resident specific. DON verified checking the orthostatic blood pressure should have been included in monitoring for side effects of the medication. The Psychoactive Medication Management policy dated as reviewed 5/2013, directed the IDT to identify residents whose behaviors may require the use of psychotropic medications, and identify the diagnosis and/or behavior that are "antecedent" for the psychoactive medication. The policy indicated the goal of the IDT was to assess/monitor the psychoactive drug use and "ensure residents are assessed/evaluated for dose reduction opportunities on an ongoing basis." Although the policy identified potential examples of behaviors which may require monitoring, the policy incorrectly identified diagnoses of "Agitation" and vague terms such as "Aggression" and "Socially inappropriate actions" as "behaviors." The policy lacked clear direction to determine resident specific target behaviors, and lacked clear direction on where to document target behaviors in the facilities clinical record. The policy lacked identification of the frequency of target behavior monitoring and frequency of the evaluation of the data. Consultant Pharmacist Recommendations for dated 4/17/14, identified Olanzapine 7.5 mg daily. The form indicated "also, we need to monitor these behaviors" after a list of potential target behaviors (none were checked). The Modifications as follows section indicated	{F 329}

{F 329}	Continued From page 260	{F 329}		

"Behavior monitoring implemented." The form was not signed or dated. The PharMerica Medication Regimen Review form indicated last review was on 5/7/14 and "No New Suggestions" were identified. On 4/17/14, the consultant pharmacist review indicated, "Suggest change Dx [diagnosis] to include supporting behavior patterns & then Monitor."

On 5/13/14, at 10:01 a.m. the consultant pharmacist was called and a message left. The consultant pharmacist did not return the call.

R1 was not monitored for potential side effects related to use of Trazodone and Venlafaxine (an anti-depressants) and Zolpidem (a hypnotic).

Findings include:

R1's diagnoses included insomnia, chronic pain, arthritis, osteoporosis, depression and diabetes mellitus obtained from the MDS dated 3/4/14. The Mood section of the MDS identified R1 as having symptoms "Feeling down, depressed, or hopeless, trouble falling or staying asleep, or sleeping too much, feeling tired or having little energy, poor appetite or overeating, feeling bad about yourself-or that you are a failure or have let yourself or your family down and thoughts that you would better off dead, or of hurting yourself in some way." The assessment indicated R1 had all the symptoms were nearly every day.

The CAA dated 12/10/13, indicated R1 used antidepressants, and sleep aides, and indicated staff would continue to monitor for effectiveness of the antidepressants and sleep aides as well as for side effects. In addition the CAA indicated R1 was at risk for adverse side effects. Care plan

{F 329}	Continued From page 262 we are auditing the psychotropic and including the side effects." Verified R1's MAR's lacked side effects monitoring as indicated in the plan of correction. When interviewed on 5/7/14, at 3:09 p.m. the consultant pharmacist stated side effects were supposed to be monitored and as this was required by the regulation. CP stated he had just not gotten to review R1's medications and record. CP went through R1's physician orders verified and indicated the medications that needed to be monitored for side effects. CP further stated if a resident sleep/Insomnia medications a sleep log or study needed to be completed and consistently. When interviewed on 5/9/14, at 2:03 p.m. DON stated monitoring of side effects should have been standard for residents who were taking antidepressants and anti-psychotropic. DON further stated currently was working on implementing all the interventions and monitoring and was including the night shift to do some of the monitoring such as the amount of hours slept among others. When interviewed on 5/12/14, at 12:52 p.m. LPN-A stated the nurses were supposed to make sure the documentation was completed and the resident care managers (RCM's) like her were supposed to oversee to make sure the documentation was done consistently. LPN stated there was no documentation on the monitoring of sleep hours after 4/28/14, through 5/5/14, because the forms did not have a place to document the number of hours slept and the facility had to create a new form which started on the 5/5/14, but was still not being completed consistently. The Psychoactive Medication Management policy dated as reviewed 5/2013, indicated the care plan	{F 329}

{F 329}	Continued From page 265 Review of the Admission Record dated 4/28/14, indicated R29 was admitted on 1/15/14, with diagnoses that included chronic pain, diabetic polyneuropathy (nerve damage) and adult failure to thrive. The quarterly MDS dated 4/17/14, indicated R29 had frequent pain rated at a pain level of six. The CAA dated 1/28/14, indicated R29 "has chronic back pain, she gets Neurontin, OxyContin and oxycodone PRN, it has been effective at time". The CAA did not indicate diseases or conditions that may cause the pain, characteristics or frequency of the pain, but indicated it adversely affects mood. During observation on 5/12/14, at 9:10 a.m. R29 was observed to be very thin, awake in a darkened room, in bed and when surveyor asked to enter room, resident stated "no". During observation on 5/12/14, at 2:01 p.m. R29 was in darkened room, in bed sleeping. During observation on 5/13/14, at 850 a.m. R29 was observed lying in bed, dressed in a hospital gown in a darkened room. R29 stated "I am not doing well today, the pain is constant, the meds help for a while, then it starts again". R29 stated she does go to a pain clinic. Review of the physician's order sheet dated 5/9/14 included an order for morphine 30 mg four times daily as needed. Review of the MAR dated 4/1/14 to 5/31/14, revealed R29 received multiple doses of PRN morphine. Review of the pain evaluation and management plan dated 4/17/14, indicated R29 had occasional	{F 329}

{F 329}	Continued From page 266 pain in back and feet, current pain regimen was effective and nursing would continue to monitor and update MD/NP as needed. R29's care plan with revision date of 4/12/2014, identified R29 was on pain medication therapy due to foot surgery and chronic back pain. Interventions included: pain assessment per facility policy, administer medication as ordered and to frequently review for pain medication efficacy. During an interview on 5/12/14 at 3:29 a.m., LPN-E stated that for R29, "some days are good, some days are bad, she is on quite a bit of meds for pain" and that on 5/9/14 R29's primary physician increased some meds, "that may be why she is sleepy". LPN-E stated R29 was not on her caseload, but she would have put short term implementations of pain monitoring in place when there is a change in meds. LPN-E verified that it looks like every three to four hours the morphine is given and that the order should be more specific "like every 4 or 6 hours [hrs]". LPN-E verified there was no pain monitoring being completed, "it must have fallen thru the cracks when we went from paper to the computer". During an interview on 5/13/14, at 10:58 a.m. LPN-G stated he had not given any morphine yet today and would ask the resident if she has any pain. LPN-G further stated he would expect the order to be more specific such as "every 4 or 6 hrs" in addition to PRN, but would ask the nurse manager for more clarification. Review of Medication Administration General Guidelines, section 7.1, page 3 of the facility Nursing Care Center Pharmacy Policy &	{F 329}

{F 353}	Continued From page 268 section, the facility must designate a licensed nurse to serve as a charge nurse on each tour of duty. This REQUIREMENT is not met as evidenced by: Based on observation, interview and document review, the facility failed to provide adequate staff to meet the individual needs for safety, supervision and care for 13 of 44 residents reviewed during the revisit (R22, R129, R1, R41, R37, R13, R86, R116, R36, R117, R9, R14, R62). In addition, the facility did not retain the required staff schedule and was not able to provide documentation of staff schedules from 3/18/14 through 4/5/14. This had the potential to affect each of the 67 residents who resided at the facility. Findings include: The facility has started using agency staff, licensed nursing and nursing assistants (NA) from Soul Care LLC 1521 Como Ave Southeast Minneapolis, 55414. On 5/6/14, orientation was requested for any agency staff that has worked since the last survey. A review of the orientation files verified that the facility did not ensure staff had background checks, and had received the required tuberculin skin testing (TST). A review of the facility schedules dated from 4/5/14 through 5/17/14, indicated the facility staffing plan called for on the day shift: two licensed nurses with 13 nursing assistant (NA's); on the evening shift: two licensed nurses with 13 NA's and on the night shift: two licensed nurses with 6 NA's.	{F 353}

{F 353}	Continued From page 269 Open nursing and NA shifts in the two week block of time from 5/4/14 through 5/17/14, included nine nursing day shifts and 53 NA's open day shifts, 17 open evening shifts, and 30 open night shifts. Two additional staff was being used for 1:1's for R1 who was alleged by the facility to both ingest and provide illicit substances to residents within the facility and R129 after she had obtained and ingested cocaine within the facility and required hospitalization. An undated facility typed document titled 1:1 Observation Staff Responsibilities indicated: only one staff person performs the 1:1 observation with only one resident during the assigned time, and follows the resident wherever he/she goes and maintains a distance no further than arm's length at tall times. When the resident is in the room, staff will be either sitting outside or inside his/her room and make sure that they maintain residents visual at all times. Notify nurse/supervisor with any suspicious activity observed on resident. Will accompany resident if he desires to go out and smoke and make sure that appropriate clothing is worn, and oxygen is removed 5 minutes before going out to smoke. Nursing was to oversee the 1:1 observations and respond to concerns reported. One additional staff per shift was used as a smoke monitor. The Smoking Monitor Responsibilities (undated document) directed the monitor to ensure the smoking areas are monitored at all times, carry a list of smokers, and the smoking assessment results at all times. The monitors were to use the list to determine which residents require close supervision or other	{F 353}

{F 353}	Continued From page 270 interventions and ensure the interventions are in place. "Supervised smokers must be within direct line of sight at all times. Those requiring assistance with smoking materials must be within reach of the smoking monitor.... Direct all smokers to the designated smoking areas only... No smoking will be allowed in front of the building. Notify supervisor immediately if: a resident not on the list is smoking. A resident refused indicated interventions, such as wearing a smoking apron or staying within the designated smoking area." On 5/7/14, at 9:27 a.m. and again at 9:31 a.m. R22 (a resident identified by the facility as a supervised smoker required to wear a smoking apron) was observed by surveyors to drop a lit cigarette onto his shirt, both times the resident was able to pick it back up. When interviewed at 9:32 a.m. the smoke monitor NA-B stated she had not observed R22 dropping the cigarette at 9:27 a.m. or 9:31 a.m. and verified that she had been more than an arm ' s length away from the smoker. R22's clothing was checked and no burn holes were noted in his shirt, or in the blanket that had been covering his lap. NA-B stated that R22 was supposed to be a supervised smoker with a smoking apron, but the resident had refused to wear the smoking apron. NA-B verified she had given R22 a cigarette to smoke, even though she knew he was assessed to require a smoking apron. NA-B stated when R22 or any resident refused to wear the smoking apron, or follow the rules; they would record it in the smoke monitor notes. The smoke monitor notes were reviewed and revealed that notes started on 3/15/14, and were present for March 16th through 21st, 24th through 27th, 28th was blank, 29th and 30th, and the 31st was blank. On April 28th and 30th and	{F 353}

{F 353}	Continued From page 271 May 2nd-3rd, and 4th were left blank. On all of the days listed residents had refused to wear smoking aprons, and/or relinquish the smoking materials. The administrator stated he thought the other logs had been collected, but stated he had not reviewed them for compliance with the smoking policy. Residents within the facility were able to obtain, ingest and allegedly sell alcohol and drug substances within the facility while the smoking monitor, safety monitor and 1:1 staff were in place for R129 and R1. Immediate Jeopardy (IJ) was identified at F323 for lack of supervision to prevent alcohol and drug use that lead to hospitalization for (R41, R129, and R37) and elopement by R13, a resident with a WanderGuard (an alert system that lets the facility know a resident has left the building) who was let outside to smoke and went from there to the public sidewalk, the facility had to be notified by surveyors of the elopement) Refer to F323 on 5/9/14. After the IJ was identified on 5/9/14, two Residents (R129 and R37) who both had one to one (1:1) staff (defined by the facility administrator as being within arm's length of the resident to prevent incidents from occurring) were able to obtain and ingest alcohol and drug substances on 5/10/14. On 5/10/14 at 1:07 p.m. R37 was taken to North Memorial Medical Center for intoxication. R37 was animated and chatting with the medics as he was taken, and the health unit coordinator (HUC) stated that is how you know he is intoxicated, he was friendly and chatting, when not intoxicated he was usually very quiet. It was reported from the	{F 353}

{F 353}	Continued From page 272 hospital that the resident had alcohol and methadone (a drug he had not been prescribed) in his system. The administrator stated the 1:1 staff assigned to R37 should have been able to prevent him from obtaining and consuming alcohol and methadone. On 5/11/14, at 10:55 a.m. the administrator notified surveyors he had not been notified that R129 was sent to emergency room, at 4:00 a.m., after she had reported to a staff member that she was intoxicated. A blood alcohol level was determined to be .323 (more than three times the legal limit) and R129 was in the intensive care unit, intubated and assisted to breath by a mechanical ventilator. The administrator stated the 1:1 staff assigned to R129 should have been able to prevent her from obtaining and consuming alcohol. After investigation it was noted by contracted licensed social work (CLSW)-A that R1 accelerated away from her 1:1 staff at a high rate of speed in her electric w/c and was able to make an exchange with R117 (a former resident), R1 and R129 were noted to make an exchange later in R129's room, both had 1:1 staff who did not report the exchange, and failed to protect the residents on 1:1 observation. A special Staffing - One to One Assignment policy dated May 2012 and revised May 2013 included: one to one staffing assignments are in place based on an assessed need until appropriate permanent alternative arrangements can be made reasons may include, but are not limited to: treat of suicide by a resident, altered mentation that may dislodge treatment lines or devices, escalating exit seeking behavior, altered cognition in an agitated state that is not easily redirected., or not respected the boundaries of	{F 353}

{F 353}	Continued From page 273 other residents. The procedure stated "to keep the one to one within arm's reach at all times. (if not suicidal may have visual privacy for toileting). Alternatives to one to one assignment are investigated as timely as possible. (alternative care setting, medical evaluation), family or responsible party are notified to see if they are available to provide this heightened level of supervision. Documentation of the one to one assignment is made in the clinical record; appropriate care plan/review/revision is made during the one to one assignment. IDT [interdisciplinary team] will meet to determine the appropriateness of removing a one to one and under what circumstances it may be reinitiated." The one to one staff, and safety monitor were not effective in preventing residents from obtaining and consuming drugs and alcohol within the facility, the facility lacked an analysis of that staffing failure and lacked additional interventions to safe guard residents. Refer to F224: the facility failed to provide adequate supervision to residents for that had alleged drug and alcohol use for 3 of 11 residents (R37, R129, R117). In addition, the facility failed to provide adequate supervision to residents to prevent elopement from the facility for 1 of 3 residents (R116). In addition, to the resident(s) in IJ, the facility failed to ensure adequate supervision was provided to prevent elopement for 1 of 3 residents (R13). These facility failures resulted in Immediate Jeopardy (IJ) issues at F323 related to the failure of the facility to supervise the residents for the alleged drug and alcohol use and elopement. This had the potential to affect all 67 residents in the facility.	{F 353}

Dental Progress notes dated 10/9/12, noted R36 had refused to be seen as he did not have his dentures with him and wanted to be rescheduled for next time when he had his dentures with him.

Dental Progress notes dated 10/23/12, indicated R36 did not want to be seen as he did not have his dentures with him and did not want the dentist to look at his gums.

The dental care plan dated 6/14/13, identified R36 had oral/dental health problems (edentulous) related to natural teeth missing. The care plan directed "Conduct oral assessment/evaluation per facility protocol; Coordinate arrangements for dental care, transportation as needed/as ordered and provide mouth care ..."

The Camden Care Center Quarterly Care Conference summary dated 9/17/13, written by nutrition & culinary indicated R36 had upper and lower dentures but stated that they were at home and had reported he was able to chew adequately without dentures and did not want a mechanically textured diet.

R36's quarterly MDS dated 2/18/14, indicated R36's Brief Interview for Mental Status (BIMS) score of 13 out of 15 which noted R36 was cognitively intact. The MDS also indicated R36 received limited assistance of one person with hygiene which included brushing teeth. In addition the MDS was void of any oral concerns.

The Care Conference Summary dietary assessment dated 3/4/14, noted had no teeth or dentures and is able to chew adequately without his teeth and noted weight as stable.

{F 412}	Continued From page 278 could not be found. On 3/14/14, at 12:14 a.m. during a phone interview R36's guarantor indicated R36 did not have dentures and the facility had not asked him to inquire if he was able to locate his old dentures or get fitted new ones. The most recent Care Area Assessment (CAA) was requested but was not provided on 3/18/14, at 10:15 a.m. and the policy for dental was requested but was never provided. The facility plan of correction indicated by 4/28/14, social service and nursing would coordinate getting R36 fitted with dentures and these activities would be clearly documented in the clinical record to include any and all communication with the guardian. Review of R36's record on 5/7/14, at 1:50 p.m. lacked evidence of a dental visit. When interviewed on 5/7/14, at 2:10 p.m. the health unit coordinator (HUC) stated reported she had spoken to R36 and he stated his dentures were in a storage locker and he did not want new ones and stated the information was in the progress notes. The HUC was again interviewed on 5/8/14, at 8:17 a.m. and she stated she was unable to locate any documentation regarding her conversation with R36 regarding his dentures and she verified she had not offered R36 a routine dental exam. At 2:32 p.m. the HUC reported R36 had agreed to a dental visit and would be scheduled for one. When interviewed on 5/13/14, at 2:29 p.m. licensed practical nurse (LPN)-E stated the facility did not have a dental policy and the corporate consultant stated it was on a case by case basis. The facility Medical Services policy dated May	{F 412}

{F 412}	Continued From page 279 2012, indicated the social services director or designee was responsible to arrange dental services to meet the needs of the residents. R9 had a dental exam on 2/27/14, which indicated that more dental treatment was needed, however had not received dental follow up as recommended. The annual MDS dated 10/11/13, did not identify R9 had any dental issues or problems with teeth. The significant MDS dated 3/24/14, indicated R9 had no cognitive impairment and required one person assist of staff with personal hygiene. Review of R9's care plan dated 4/10/12, indicated R9 "has dental needs" and listed interventions of "Resident has natural teeth. Has some missing teeth. Resident will be seen annually or as needed. Nursing to notify dentist of any dental concerns. Resident has been seen by In-House Dental for their dental needs." The careplan indicated R9 had diagnoses that included schizophrenia, diabetes mellitus, and orofacial dyskinesia. Review of In House Senior Services, LLC (limited liability company) Patient Progress Notes dated 2/27/14, outlined a treatment plan that included "Pt [patient] has several retained root tips and a couple fractured crowns. #23 and #25 are quite mobile, but they do not bother pt. These should be extracted when they become symptomatic. #31 and #12 should be restored. #9 should be attempted to be restored, though because gingiva has already grown into the cavity, it may not be successful. Res was cooperative, though has difficult time holding her mouth still, and her tongue is very active."	{F 412}

{F 412}	Continued From page 280 During an interview on 5/6/14, at 2:45 p.m. R9 stated "I can chew. I saw a dentist here. I'm missing some teeth but he said they have to fall out before I can get dentures." During an interview on 5/7/14, at 3:28 p.m. LPN-A stated "I went through the progress notes and I don't see anything that addresses the dental exam." During an interview on 5/7/14, at 3:30 p.m. HUC stated she was not aware of this dental exam and to her knowledge nothing has been set up for her, "I am making a copy to do something about this." Review of the facility Medical Services policy with revision date of May 2013, indicated the facility will ensure each resident has access to dental/vision/hearing/podiatric services to meet their individualized needs, resident needs are identified at the time of admission and additionally through the RAI [resident assessment indicator] process and daily assessment/monitoring of resident condition and change in condition also alerts staff to the need for medical services.	{F 412}		
{F 428} SS=E	483.60(c) DRUG REGIMEN REVIEW, REPORT IRREGULAR, ACT ON The drug regimen of each resident must be reviewed at least once a month by a licensed pharmacist. The pharmacist must report any irregularities to the attending physician, and the director of nursing, and these reports must be acted upon.	{F 428}		7/6/14

{F 428}	Continued From page 281	{F 428}		

This REQUIREMENT is not met as evidenced by:
Based on interview and document review, the consultant pharmacist failed to identify lack of medication parameters for as needed (PRN) pain medications for 2 of 7 residents (R91, R36), failed to identify a lack of adequate indication for use, resident specific target behaviors and monitoring for antipsychotic medication for 2 of 7 residents (R37, R89) and failed to identify a lack of side effect monitoring and sleep monitoring for antidepressant medications for 1 of 7 residents (R1) reviewed for unnecessary medications.

Findings include:

R91's Admission Record dated 5/9/14, indicated R91 was admitted on 10/9/13, with a diagnosis of osteoporosis.

Review of the Medication Regimen Reviews (MRR) for R91 from 10/17/13 through 5/7/14, lacked evidence the missing parameters for PRN pain medications were identified.

Review of the Medication Administration Record (MAR) dated 4/1/14 through 4/30/14, revealed R91 did not receive any PRN Tylenol (a mild amalgesic) and Ibuprofen (an anti-inflammatory medication) and received multiple doses of PRN Oxycodone (a narcotic).

Review of the Physician's Order Sheet signed 4/18/14, included orders for Ibuprofen 600 milligrams (mg) every six hours PRN, Tylenol 650 mg every six hours PRN and Oxycodone 15 mg

{F 428}	Continued From page 282 every six hours PRN all for pain. R91 had orders for multiple PRN pain medications which lacked parameters for use. R36's Admission Record dated 4/28/14, indicated R36 was admitted to the facility on 5/26/12, with diagnoses of femur fracture and alcoholic cirrhosis of the liver. Review of the MRR for R36 from 4/22/13 through 5/6/14, lacked evidence the missing parameters for PRN pain medications were identified. Review of the MAR dated 4/1/14 through 4/30/14, revealed R36 received Tylenol three times for pain rated at an eight and Oxycodone two times for pain rated at an eight. The Physician's Order Sheet dated 5/1/14, included orders for Tylenol 1000 mg three times a day (TID) as needed and Oxycodone 10 mg TID, both for pain, and lacked parameters for use. R36 had orders for multiple PRN pain medications which lacked parameters for use. R37's Admission Record dated 1/14/14, indicated R37 was admitted to the facility on 9/19/13. Diagnoses included altered mental status and alcoholism. Review of the MRR for R37 on 11/14/13, indicated R37 was taking Seroquel for psychosis, however lacked direction for target behavior monitoring. Review of the MRRs from 9/25/13-4/18/14, revealed the CP failed to identify the need for a gradual dose reduction or	{F 428}

{F 428}	Continued From page 283 documentation of the clinical contraindication. Physician and Nurse Practitioner (NP) Notes dated 11/15/13, 1/8/14, 1/22/14, 2/5/14, 4/9/14 and 4/10/14, were reviewed and lacked a diagnosis of psychosis or a clinical contraindication to a gradual dose reduction. The Physician's Order Sheet dated 4/1/14, included orders for Seroquel 25 mg every bedtime and indicated the diagnosis was anxiety. A review of three undated Behavior/Intervention Monthly Flow Record, revealed R37 was monitored for number of hours of sleep and "yelling/striking." The records revealed R37 slept between six and eight hours on all nights recorded and yelling/striking behavior did not occur. R37 received Seroquel (an antipsychotic medication) daily without adequate indication for use, monitoring or an attempt at a gradual dose reduction. When interviewed on 5/7/14, at 1:56 p.m. the consultant pharmacist (CP) stated he would expect parameters written by the physician to clarify when to give which PRN pain medication. When interviewed on 5/7/14, at 3:09 p.m. the CP stated side effects were supposed to be monitored as this was required by the regulation. CP further stated all behaviors have to be specific to the resident. A call was placed to the CP on 5/13/14, at 10:01 a.m. to clarify adequate indications for use of antipsychotic medications, no return call was received.	{F 428}

{F 428}	Continued From page 284 The consultant pharmacist did not identify the lack of monitoring for resident specific target behaviors and the lack of orthostatic hypotension side effect monitoring for R89's use of Zyprexa (an antipsychotic medication). R89's admission Minimum Data Set (MDS) dated 12/28/13, indicated R89 was never or rarely understood had short and long-term memory problems and R89 had moderately impaired decision making ability. The MDS identified R89 had hallucinations, delusions, and other behavior concerns towards others. The Care Area Assessment (CAA) for ADL (activities of daily living) function/Rehabilitation Potential dated 1/3/14, identified R89's diagnoses to include altered mental status, cognitive impairment and weakness. The CAA identified R89 required staff assistance for ADLs, had no pain concerns, had a history of falls (but no falls in the facility) and was incontinent of bowel and bladder. The CAA for behaviors dated 1/3/14, indicated, "Resident exhibits behavioral symptoms and is cognitively not alert and orient [sic] when writer attempted to assess her. SS [social services] will care plan this matter accordingly." The CAA for falls, also dated 1/3/14, recapitulated the same information as the ADL CAA. The CAA for psychotropic drug use identified R89 used an antipsychotic and R89 had "hallucinations." Although the CAA identified the class of medication used and hallucinations, the CAA lacked identification of what the hallucinations were, what antipsychotic was used, and what target behaviors would be monitored. The CAA indicated, "Nurses will continue to assess for effectiveness of meds [medications] and side effects." R89's care plan for psychotropic medications	{F 428}

{F 428}	Continued From page 285 dated as revised on 1/5/14, identified R89 used Zyprexa related to "potential injury to self or others, dementia and agitation, pick [sic] disease." The care plan directed to administer the medication as ordered, monitor/document for side effects and effectiveness. The care plan directed to "discuss with MD [physician], family re [regarding] ongoing need for use of medication," directed to educate on risks and benefits of using Zyprexa, "Monitor/record occurrence of for target behavior such as agitation, inappropriate response to verbal communication, and document per facility protocol." The care plan lacked appropriate identification of a target behavior which warranted the use of an antipsychotic, such as hallucinations. Although the care plan directed to monitor for a target behavior, the care plan lacked indications for the ongoing use of Zyprexa. A physician's Progress Note dated 2/12/14, identified R89 was seen for her first visit. The note indicated while in the hospital R89 had been on a high dose of Seroquel and switched to a low dose of Zyprexa. The note indicated R89's Zyprexa would be considered to be increased to 7.5 mg. The Physician's Order Sheet dated 3/5/14, indicated R89 had olanzapine (Zyprexa) 5 mg ordered by mouth daily for diagnosis of atypical psychosis. A Geriatric Services of Minnesota Progress Note dated 3/7/14, indicated R89 was seen by a nurse practitioner. The note identified R89 "appears to be distressed" and was noted to "sit/stand multiple times from wheelchair." The note indicated R89 received 5 mg of Zyprexa daily,	{F 428}

{F 428}	Continued From page 286	{F 428}		

"Staff have no reports of behavior changes, but note impulsivity" and identified R89 fell twice in February. The "Psych:" section indicated R89 was "Agitated w/ [with] worried look on face. Mumbling. Slight diaphoresis [sweating]." Continuation of the note indicated Zyprexa would be increased to 7.5 mg "due to continued agitation/impulsivity." A Physician's Order dated 3/7/14, indicated Zyprexa was increased to 7.5 mg by mouth daily and directed to add the diagnosis of schizophrenia.

Review of the clinical record, including interdisciplinary team (IDT) Progress Notes from admission to the time of survey indicated no behavioral concerns were documented, such as hallucinations, agitation symptoms or impulsivity. R89 had no IDT progress notes documented after 2/14/14. Although appropriate side effect monitoring was noted in the clinical record, such as labs and Abnormal Involuntary Movement Scale (AIMS) on 3/12/14, the clinical record lacked evidence of target behavior monitoring for the efficacy of Zyprexa.

A social service progress note dated 3/26/14, at 3:00 p.m. indicated R89's behaviors were reviewed. "Quarterly Social Service Assessment-Care plan reviewed for changes in mood, behavior, and cognition and updated to reflect Resident's current status. Staff assessment for BIMS [brief interview of mental status, a tool used to measure cognition] and PHQ-9-OV [a tool used to measure potential depression] completed as Resident never or rarely understood questions being asked. Resident has severely impaired cognition r/t [related to] dementia. PHQ-9-OV assessment score of 0 out of 27 indicating no s/sx [signs or symptoms] of depression. Resident

continues to receive Zyprexa 7.5 mg daily for dementia/schizophrenia which seems effective. No adverse reactions noted with use of psych med. Will continue to monitor for side effects and effectiveness. [name or R89's guardian], assists with all business and personal needs. Resident has been assessed and cannot leave the facility on an unsupervised LOA [leave of absence]. Resident and guardian have been invited to the upcoming care conference. Social services to continue to be available and assist in meeting the psychosocial needs of Resident." Although the clinical record lacked evidence of target behavior monitoring, the note identified Zyprexa "seems effective."

The Care Conference Summary dated 4/10/14, indicated R89 was "Stable, no mood concerns at this time" and "reviewed medications." The concerns and/or Complaints section indicated, "As agitation increases family notes that her breathing gets heavy. Dislikes walking by family would like to see her walk more."

The Information and Consent for Psychotropic Medications dated 4/29/14, indicated Zyprexa was administrated for diagnosis of Schizophrenia.

On 5/5/14, at approximately 1:40 p.m. R89 was observed to be lying in bed, eyes closed. R89 did not rouse to knock or surveyor announcement at the door.

Review of the Behavior Monthly Flowsheet for May 2014 indicated R89 was monitored for restlessness and anxiety, but lacked resident specific target behavior monitoring. The monitoring was initiated on 5/5/14. The clinical record lacked evidence resident specific target

{F 428}	Continued From page 288 behavior monitoring was completed for R89. On 5/12/14, at 9:24 a.m. the licensed practical nurse (LPN)-E verified the target behaviors were diagnoses and were not resident specific. LPN-E verified target behavior monitoring was only implemented on 5/5/14. LPN-E stated "the other way of monitoring wasn't working" and stated the form was changed. LPN-E verified R89's target behaviors were not assessed or re-evaluated. LPN-E verified no orthostatic blood pressures were checked on R89 since January. On 5/12/14, at 9:44 a.m. the director of nursing (DON) verified the facility identified target behaviors of agitation and restlessness were not resident specific. DON verified checking the orthostatic blood pressure should have been included in monitoring for side effects of the medication. The Psychoactive Medication Management policy dated as reviewed 5/2013, directed the IDT to identify residents whose behaviors may require the use of psychotropic medications, and identify the diagnosis and/or behavior that are "antecedent" for the psychoactive medication. The policy indicated the goal of the IDT was to assess/monitor the psychoactive drug use and "ensure residents are assessed/evaluated for dose reduction opportunities on an ongoing basis." Although the policy identified potential examples of behaviors which may require monitoring, the policy incorrectly identified diagnoses of "Agitation" and vague terms such as "Aggression" and "Socially inappropriate actions" as "behaviors." The policy lacked clear direction to determine resident specific target behaviors, and lacked clear direction on where to document	{F 428}

{F 428}	Continued From page 289 target behaviors in the facilities clinical record. The policy lacked identification of the frequency of target behavior monitoring and frequency of the evaluation of the data. Consultant Pharmacist Recommendations for dated 4/17/14, identified Olanzapine 7.5 mg daily. The form indicated "also, we need to monitor these behaviors" after a list of potential target behaviors (none were checked). The Modifications as follows section indicated "Behavior monitoring implemented." The form was not signed or dated. The PharMerica Medication Regimen Review form indicated last review was on 5/7/14 and "No New Suggestions" were identified. On 4/17/14, the consultant pharmacist review indicated, "Suggest change Dx [diagnosis] to include supporting behavior patterns & then Monitor." On 5/13/14, at 10:01 a.m. the CP was called and a message left. The consultant pharmacist did not return the call. The consultant pharmacist did not identify monitoring of R1's side effects for Trazodone and Venlafaxine (Effexor-both anti-depressants) and sleep monitoring was lacking. R1's diagnoses included insomnia, chronic pain, arthritis, osteoporosis, depression and diabetes mellitus obtained from the MDS dated 3/4/14. The Mood section of the MDS identified R1 as having symptoms "Feeling down, depressed, or hopeless, trouble falling or staying asleep, or sleeping too much, feeling tired or having little energy, poor appetite or overeating, feeling bad about yourself-or that you are a failure or have let yourself or your family down and thoughts that	{F 428}

{F 428}	Continued From page 290 you would better off dead, or of hurting yourself in some way." The assessment indicated R1 had all the symptoms were nearly every day. The CAA dated 12/10/13, indicated R1 used antidepressants, and sleep aides, and indicated staff would continue to monitor for effectiveness of the antidepressants and sleep aides as well as for side effects. In addition the CAA indicated R1 was at risk for adverse side effects. Care plan dated 3/12/14, indicated R1 was on antidepressants: Trazodone and Effexor related to diagnoses of depression and insomnia. Goal "[R1] will be free from discomfort or adverse reactions related to antidepressant therapy ..." Care plan directed to administer antidepressant medications as ordered by physician, monitor and document side effects and effectiveness. Physician's Orders dated 2/26/14, indicated R1 received the following medication: -Trazodone 100 mg by mouth at bedtime (HS) for insomnia -Venlafaxine (Effexor) 150 mg by mouth daily for depression - Zolpidem Tartrate 5 mg tablet by mouth at HS as needed for Insomnia "Do not exceed 5 mg dose." Review of the Monthly Medication Regimen (MMR) from 3/18/14 forward, revealed the consultant pharmacist had reviewed R1's medications, both were undated and unsigned. The MMR's failed to identify side effects monitoring, and sleep monitoring were lacking, as indicated in the plan of correction dated 4/28/14. Review of the MARs dated 4/28/14, through 5/7/14, revealed R1's side effects monitoring was not be done. In addition review of Blank	{F 428}

{F 428}	Continued From page 291 Flowsheet Report dated 5/5/14, and Behavior Monitoring Documentation dated 3/31/14, through 4/23/14, revealed R1 a sleep log had been initiated but was not being completed as indicated in the plan of correction. When interviewed on 5/7/14, at 1:40 p.m. registered nurse (RN)-B stated she was not sure where medication side effects were documentation for anti-depressants and anti-psychotropic but indicated she would find out and get back. She showed the surveyor the "Red 3 ring binder East/West" which the staff were supposed to record the number of hours slept and the behaviors for each resident that had behavior monitoring. When interviewed on 5/7/14, at 1:48 p.m. LPN-E stated "We have not done this for all the residents just a few and currently we are going through as we are auditing the psychotropic and including the side effects." Verified R1's MAR's lacked side effects monitoring as indicated in the plan of correction. When interviewed on 5/7/14, at 3:09 p.m. the consultant pharmacist stated side effects were supposed to be monitored and as this was required by the regulation. CP stated he had just not gotten to review R1's medications and record. CP went through R1's physician orders verified and indicated the medications that needed to be monitored for side effects. CP further stated if a resident sleep/Insomnia medications a sleep log or study needed to be completed and consistently. When interviewed on 5/9/14, at 2:03 p.m. DON stated monitoring of side effects should have been standard for residents who were taking antidepressants and anti-psychotropic. DON further stated currently was working on	{F 428}

{F 428}	Continued From page 292 implementing all the interventions and monitoring and was including the night shift to do some of the monitoring such as the amount of hours slept among others. When interviewed on 5/12/14, at 12:52 p.m. LPN-A stated the nurses were supposed to make sure the documentation was completed and the resident care managers (RCM's) like her were supposed to oversee to make sure the documentation was done consistently. LPN stated there was no documentation on the monitoring of sleep hours after 4/28/14, through 5/5/14, because the forms did not have a place to document the number of hours slept and the facility had to create a new form which started on the 5/5/14, but was still not being completed consistently. R113 CP failed to identify lack of parameters for as needed pain medication. Physician order dated 4/21/14, indicated resident had three orders for Oxycodone (Narcotic pain medication) 1-3 tablets (5-15mg) by mouth every four PRN, Oxycodone 0.5-1 tablets (5-10 mg) by mouth daily as needed for dressing changes only and Oxycodone 1 tablet (5 mg) by mouth daily as needed for physical therapy/occupational therapy (PT/OT) only. When interviewed on 5/13/14, agency LPN-G verified when reviewing R113's Medication Administration Record that the orders for Oxycodone did not have parameters for what to give with what pain rate. LPN stated R113 was on LOA but would look in his chart to make sure this was clarified by the provider.	{F 428}

{F 428}	Continued From page 293 When interviewed on 5/13/14, at 9:34 a.m. LPN-E who also was also the resident care manager acknowledged R113 had orders without parameters. LPN-E further stated "We like to clarify and have parameters especially with new admissions. Will call and clarify and ask for parameters thank you." R113's diagnoses include neuralgia neuritis and radiculitis, abnormal gait, acute alcohol hepatitis, alcohol dependence obtained from the significant MDS dated 2/14/14. R113's Medication Administration Record date 4/1/14, through 5/13/14, indicated R113 had received the medication on multiple occasions and all the orders lacked parameters for administering the different Oxycodone orders. The PharMerica Medication Regimen Review completed by the CP monthly dated 4/18/14, and two other times after which were signed but undated did not identify R113's physician orders lacked the parameters. R113's pain care plan dated 3/11/14, identified R113 had acute pain related to postoperative discomfort and had toes amputated secondary to burn from frost bite. Care plan directed to administer analgesia including Oxycodone as ordered. On 5/7/14, at 1:56 p.m. CP stated he would expect parameters written by the physician to clarify when to give which medication.	{F 428}

{F 431}	Continued From page 295 drawers kept clean; the facility failed to ensure medications were dated when opening; eye medications, suppositories, topical medications were observed to be stored together for 11 of 67 residents (R13, R92, R9, R54, R29, R25, R66, R22, R95, R86, R88). In addition, the white refrigerator in the medication room (used to store refrigerated medications) was observed to have a heavy buildup of frost in the freezer compartment. These practices had the potential to affect all 67 residents residing in the facility. In addition, the facility failed to lock a medication cart which held biologicals and medications (anti-depressants, anti-psychotropic, blood pressure medication, supplements/vitamins among other prescribed medication). This had the potential to affect 4 of 7 residents (R73, R37, R83, R115) who were near the medication cart. The four residents were able to access to the cart according to staff. Findings include: WEST MEDICATION CART On 5/7/14, at 7:52 a.m. first (top) drawer was observed to have the following: R13 had an open Advair Diskus inhaler (used for breathing) without an open date. R13's Minimum Data Set (MDS) dated 3/25/14, noted R134 had breathing problems and was cognitively intact. According to the package insert by GalxoKlineSmith dated 2008, staff were to "Take ADVAIR DISKUS out of the box and foil pouch. Write the 'Pouch opened' and 'Use by' dates on the label on top of the DISKUS. The 'Use by' date is 1 month from date of opening the pouch."	{F 431}

{F 431}	Continued From page 296 R92 had an opened and expired bottle of Travatan Z 0.004% (reduce the elevated pressure inside your eye) eye drops for R92. The label indicated to "Order After 3/27/14." A sticker affixed to the bottle indicated the medication was opened on 3/3/14. The bottle was observed to be stored loosely with oral medications. A second bottle of the same eye drop with date opened of 4/19 (no year) written on the label, had no open date documented on the Date Opened sticker. A third bottle of the same eye drop was also observed to be stored loosely (no zip lock bag) in and with oral medications for various other residents and had no open date. All three Travatan Z bottles for R92 were opened and had remaining doses in each bottle. R92's MDS dated 1/15/14, indicated R92 had adequate vision and no vision problems. According to the package insert by Alcon Laboratories (SA) (Pty) Ltd, Revised 11/02, directed staff, "STORAGE INSTRUCTIONS: Store below 25°C., DO NOT USE MORE THAN 30 DAYS AFTER OPENING. KEEP OUT OF REACH OF CHILDREN." R9's Insulin Aspart pen (Novolog- used to control blood sugar) had no open date and had a sticker on the pen which indicated "EXP [expires]: 04/11/14." A second pen of the same medication for R9 lacked the protective cover for the end of the pen (where the needle affixes) and lacked an open date. Both pens were stored in and with eye drops for other residents. R9's MDS dated 3/24/14, indicated R9 was cognitively intact and had diabetes. According to the package insert by Novo Nordisk	{F 431}

{F 431}	Continued From page 298 On 5/7/14, at 8:39 a.m. the registered nurse (RN)-B verified he worked out of the cart and opened the cart. The following was observed: R29's Levemir insulin flexpen (used to control blood sugar) had no open date on the sticker. R29 's MDS dated 1/29/14, indicated R29 was cognitively intact and was a diabetic. According to the package insert by Novo Nordisk INC, dated 2005 through 20012, staff were to store as follows: "Recommended Storage: 3 mL LEVEMIR FlexPen: Not in-use (unopened) Room Temperature (below 30°C) for 42 days. In-use (opened) was to be stored for 42 days at room temperature." R25's Lantus insulin had an open date of 4/4 (no year) and expiration date of 5/3 (no year). The insulin was open, partially used and expired. R25's MDS dated 4/8/14, indicated R25 was a diabetic and was moderately cognitively impaired. According to the drug package insert by Dispensing Solutions, Inc. last revised: 9/20/11, "Once you take your SoloStar® out of cool storage, for use or as a spare, you can use it for up to 28 days. During this time it can be safely kept at room temperature up to 86°F (30°C). Do not use it after this time. SoloStar® in use must not be stored in a refrigerator. Do not use SoloStar® after the expiration date printed on the label of the pen or on the carton. " R66's Lantus Solostar insulin had no open date.	{F 431}

completed. LPN-A stated she did not know the audit or cleaning schedules for the carts. LPN-A was unclear what the facility system was to ensure the medication carts were kept clean. LPN-A further stated she was unclear who was responsible for cleaning the medication carts and was unclear on the policy for medication cart cleaning.

On 5/8/14, at 4:21 p.m. the consulting administrator stated the facility did not have a policy or a procedure for medication cart cleaning and verified the carts should have been cleaned. The consulting administrator stated the facility was "not allowed to write policies," but could write a "procedure."

A PharMerica 3.7 Medications and Medication Labels policy dated 9/2010, directed multi-dose vials "shall be labeled to assure product integrity, considering the manufacturers' specifications. (Example: Modified expiration dates upon opening the multi-dose vial.)" The policy further identified all medications should have a pharmacy affixed label.

The PharMerica 4.1 Storage of Medication policy dated 9/2010, directed to store eye, internally administered, oral inhalation, nasal, oral and topical medications separately.

Medications carts were left unlock and un-supervised.
South Hallway Medication cart
On 5/5/14, at 1:39 p.m. observed the key lock to the nursing medication cart to be fully extended in the unlocked position on the South unit. Two residents were observed to wheel by the cart and no staff was in the hallway. RN-B, was observed

{F 431}	Continued From page 306 the South Hallway. When interviewed on 5/8/14, at 4:06 p.m. LPN-D if the medication cart was supposed to left open stated, "No." LPN-D walked over to unlocked medication cart and locked it. When interviewed on 5/9/14, at 10:05 a.m. LPN-E stated, "All the medication carts are not supposed to left open." When interviewed on 5/9/14, at 1:32 p.m. RN-B stated the medication cart should be locked when staff was not around and when nurses walked away from the carts. RN-B further stated the nurse that had left the cart unlocked had acknowledged she had left the cart unlocked on 5/8/14. The facility Storage of Medication dated 9/10, directed "In order to limit access to prescription medication, only licensed nurses, pharmacy staff, and those lawfully authorized to administer medications (such as medication aides) are allowed access to medication carts. Medication rooms, cabinets and medication supplies should remain locked when not in use or attended by persons with authorized access.	{F 431}

{F 465}	Continued From page 307 by: Based on observation, interview and document review, the facility failed to ensure resident room carpets for 3 of 3 residents (R22, R56, R33) and an E-Z stand (a mechanical stand used for transfers) were kept in good repair, clean and in a sanitary manner. Findings include: A tour of the facility was conducted on 5/9/14, at 8:59 a.m. through 10:05 a.m. with the director of facility operations (DFO) and the following concerns were identified: Carpets: On 5/9/14, R22's portion of the room was observed. The carpet had large dark brown stain/spots from the bed to the dresser. DFO verified the carpet was not clean and stated, "I think it is filthy and trashed." R22's annual Minimum Data Set (MDS) dated 4/10/14, indicated R22 had moderate impaired cognition, required assist of one staff with walking in the room and transfer needs. R22 used both the walker and wheelchair (w/c) for mobility in his room. On 5/7/14, at 7:59 a.m. R22's carpet was observed to have dark brown spots/stain on the carpet around the bed area and to the entrance of the room. On 5/9/14, at 9:34 a.m. DFO verified R22's carpet was not clean stated "Again this is one of the rooms that I would like to have a deep cleaning and was hoping the cleaning of the carpet would have been done after pest control was here yesterday."	{F 465}

{F 465}	Continued From page 308	{F 465}		

R56 was bedfast in the room. When R56's room was observed on 5/9/14, at 8:59 a.m. the carpet had several dark, black ground-in spots and stained red around the bed.

R56's annual MDS dated 2/25/14, indicated R56 required extensive to total assistance with activities of daily living (ADLs) including transfers, was bed bound, used a w/c for mobility and had intact cognition.

On 5/9/14, at 9:30 a.m. DFO verified the carpet in R56's room was not clean and stated, "It needs to be deep cleaned."

R33
On 5/6/14, at 9:00 a.m. surveyor noticed a strong malodorous urine smell coming out of R33's room and the carpet observed to have dark brown large stain/spots from the bed to the radiator and on the area between the foot of bed and dresser (walk area). During observation a housekeeping staff was observed standing outside R33's room but was cleaning the next room.

On 5/9/14, at 9:38 a.m. DFO verified the smell stated, "It's very strong and this is another room that needs to have the carpet cleaned or replaced." DFO stated, "We were supposed to get the air freshener's from Ameri-Pride today but they were supposed to be delivered on Friday." DFO further stated the carpet cleaning company had been to the facility recently and cleaned the common areas. The DFO knew the contract was expired and directed questions to the administrator.

{F 465}	Continued From page 309 R33's quarterly MDS 2/20/14, indicated intact cognition, required limited assistance with ADLs, had impairment to both lower extremities and used a walker and w/c for mobility. R33's also received a diuretic. Mechanical lift: E-Z stand handle did not have a cleanable surface. On 5/9/14, at 9:05 a.m. the E-Z stand was observed stored on the alcove on the West Hall and the left bar was observed to have vinyl peeling off exposing the foam underneath. The cracked vinyl was covered with gray duct tape and at the end the tape was exposing the sticky side of the tape making it not a cleanable surface. When interviewed on 5/9/14, at 9:07 a.m. DFO verified stated, "I was told by the vice president to put the duct tape over for now and I have a bid for cushions and guard and am waiting." When interviewed on 5/9/14, at 8:38 a.m. the administrator stated there is a carpet cleaning plan with a contractor who would be coming in to clean a couple rooms at a time. Administrator further stated, "We are going to order replacement parts for the E-Z stand, we had been told that the duct tape was sufficient." Review of the w/c cleaning schedule for Maintenance dated May 2014 indicated R36's w/c had not been cleaned. The Wheelchairs To Pull For Night Washing sheets dated 5/1/14, through 5/9/14, also indicated R36's w/c had not been cleaned.	{F 465}

{F 469}	Continued From page 311 and inside the heater under the window. When interviewed on 5/7/14, at 7:50 a.m. the director of facility operations stated the facility used Xtreme Pest Solutions for pest control. He stated staff identify any concerns with pests by documenting in the maintenance log kept behind the nursing station. When interviewed on 5/7/14, at 8:05 a.m. housekeeper-B verified there were bugs in R56's room and stated he had not seen them the prior Thursday when he'd cleaned the room. Housekeeper-B stated R56, "Has lots of sweets in her room and that may be why." On 5/7/14, at 8:09 a.m. the director of facility operations was asked to come to R56's room and stated, "We have to get her out of the room right away!" and call the pest company. He stated he was not sure what the bugs were but thought they were ants or wasps. The pest control contractor was interviewed on 5/7/14, at 12:52 p.m. and stated the bugs were a form of pavement ants and he had treated the room and the surrounding areas. He reported the ants were drawn into the room for food and the facility would need to maintain treatment to the affected areas. Review of the Service Report dated 2/13/14, included treatment for mice and rats. Review of the Service Report dated 4/3/14, included treatment for multiple targeted pests including ants. The Service Report dated 5/7/14, at 12:30 p.m. included treatment for multiple targeted	{F 469}

{F 469}	Continued From page 312 pests including ants and indicated four rooms on the south hall were treated as well as the exterior of the south wing. A policy regarding pest control was requested and the director of facility operations stated the facility did not have a policy.	{F 469}		
{F 490} SS=F	483.75 EFFECTIVE ADMINISTRATION/RESIDENT WELL-BEING A facility must be administered in a manner that enables it to use its resources effectively and efficiently to attain or maintain the highest practicable physical, mental, and psychosocial well-being of each resident. This REQUIREMENT is not met as evidenced by: An immediate jeopardy related to administrative failures was identified during the revisit survey on 5/12/14. The immediate jeopardy began on 5/10/14 and was removed on 5/21/14. However, non-compliance remained at the lower severity level of F (wide spread with no actual harm). Based on observation, interview and document review, the administrator failed to provide adequate supervision and oversight for residents who had known drug and alcohol (ETOH) use for 2 of 11 residents (R37, R129). In addition, the administrator failed to provide adequate supervision to residents to prevent elopement from the facility for 1 of 3 residents (R116). These administrative failures resulted in Immediate Jeopardy (IJ) issues being identified at F490. In addition to the IJ issues, the facility was not administered in a manner to maintain compliance	{F 490}		7/6/14

{F 490}	Continued From page 313 with other regulations specific to meet the needs of residents for 15 of 40 residents (R34, R129, R37, R116, R41, R70, R13, R117, R62, R56, R123, R22, R1, R36, R9) reviewed for various deficient practices; 3 of 5 employees (E1, E2, E3) reviewed whose annual evaluations were not completed; 1 of 5 nursing assistants (NA-Z) did not meet the required inservice hours; 5 of 11 employees (RN-C, RN-D, LPN-A, NA-U, NA-Q) did not have current license verification. These administrative failures had the potential to affect all residents of the facility. The following deficiency was cited during a revisit conducted on 5/13/14, and was the basis for an IJ to resident's health and safety. The IJ began on 5/10/14, when R37 was admitted to the hospital for acute alcohol intoxication requiring medical treatment including intubation to assist with breathing. The administrator, consulting administrator, and director of nursing (DON) were notified of the IJ on 5/12/14, at 3:15 p.m. The IJ was not removed by exit of the 5/13/14 survey. Findings include: On 5/9/14, the facility had been informed of serious and immediate safety and supervision issues related to a lack of adequate supervision for residents, specifically related to resident's with known drug and alcohol use issues, and elopements. The facility had been informed these issues constituted an immediate jeopardy situation. Although, the facility was aware of the serious implications on 5/9/14, the facility did not identify and implement interventions to protect	{F 490}

residents from potential harm. On 5/10/14 and 5/11/14, two residents were hospitalized for drug and/or alcohol intoxication. In addition, on 5/11/14, a vulnerable resident was able to elope from the facility on three separate occasions without staff present even though the facility had implemented a WanderGuard device.

Refer to F223: the facility failed to ensure 1 of 1 resident (R34) was free from verbal and physical abuse.

Refer to F224: the facility neglected to provide adequate supervision to residents who had a known history of drug and alcohol use resulting in medical treatment, including hospitalization, for 2 of 11 residents (R37, R129) reviewed. In addition, the facility failed to implement adequate interventions to prevent elopements for 1 of 3 residents (R116) who eloped from the facility with a WanderGuard (a system to alert staff when a resident leaves the facility) in place. This lack of supervision caused an IJ situation for R37, R129 and R116.

Refer to F225: the facility failed to ensure incidents of potential abuse, neglect and mistreatment were immediately reported to the administrator and State agency (SA) for 7 of 7 residents (R129, R37, R116, R41, R10, R70, and R13).

Refer to F226: the facility failed to ensure the facility reported allegations of potential abuse/neglect immediately to the administrator and State agency (SA) and to thoroughly investigate potential situations of abuse/neglect/elopement for 4 of 5 residents (R37, R129, R13, and R116); the facility failed to

However, non-compliance remained at the lower scope and severity (s/s) of an F (no actual harm with potential for more than minimal harm that is not immediate jeopardy) because of the number of deficient practices that remained uncorrected at the time of the revisit 5/21/14.	{F 490}		
{F 492} SS=E	483.75(b) COMPLY WITH FEDERAL/STATE/LOCAL LAWS/PROF STD The facility must operate and provide services in compliance with all applicable Federal, State, and local laws, regulations, and codes, and with accepted professional standards and principles that apply to professionals providing services in such a facility. This REQUIREMENT is not met as evidenced by: Based on interview and document review, the facility failed to ensure nurses and nursing assistants (NAs) from a supplemental nursing services agency (Soul Care) had the necessary screening and clearance to ensure freedome from tuberculosis (TB) before they were assigned to work. This had the potential to affect all 67 residents residing in the facility. Findings include: The facility did not comply with the Minnesota Statute 144A.72 REGISTRATION REQUIREMENTS; PENALTIES. Subdivision 1.Minimum criteria. The commissioner shall require that, as a condition of registration: (2) the supplemental nursing services agency shall comply with all pertinent requirements relating to the health and other qualifications of personnel	{F 492}		7/6/14

{F 492}	Continued From page 319 employed in health care facilities. A review of the supplemental staff files revealed the following: NA-T had a negative tuberculin skin test (TST) administered on 8/26/11. There was no record to show a second TST was done. Licensed practical nurse (LPN)-C had a chest x-ray result dated 10/17/07. There was no screening for symptoms of active TB completed and there was no examination done by a medical doctor. LPN-F's TB screening test result dated 4/10/14, read "Negative. M. tuberculosis infection not likely, but cannot be excluded in cases of immunosupression." There was no screening for symptoms of active TB and there was no examination done by a medical doctor after the TB screening test. LPN-I had a first TST administered on 3/29/11. There was no evidence of a second TST having been done. LPN-J had a negative CXR results done on 12/7/09. There was no screening for symptoms of active TB completed and there was no examination done by a medical doctor. LPN-K CXR results done on 1/19/09, was read as "Unremarkable exam." There was no screening for symptoms of active tuberculosis and there was no examination done by a medical doctor. On 5/13/14, at 9:33 a.m. during a telephone interview, O-I from Soul Care staffing agency	{F 492}

{F 492}	Continued From page 320 verified the above-named supplemental staff are employed by Soul Care and that the same staff had been reporting for work at the facility. He further verified all of the findings pertaining to TB screening dates and procedures for the employees named. On 5/13/24, 10:27 a.m. LPN-A, nurse manager, stated the staffing agency would provide to the facility the TB screening records of staff coming to work. LPN-A stated that it was human resources (HR's) responsibility to keep track of the records and to keep the files for the facility. On 5/13/14, at 10:55 a.m., the consultant administrator verified the list of supplemental staff provided to surveyors was current, and the staff had been working at the facility. The consultant administrator stated that supplemental staff was not treated any differently from regular facility staff with regard to TB screening. She stated Soul Care provided the TB screening records of supplemental staff, and if staff were found positive for the TST results, they should have been required to undergo assessments for current TB symptoms, should have had CXR and physician's visit indicating employees were clear from tuberculosis. The consultant administrator stated HR was responsible to keep track of pool staff records and to report to the director of nursing and the administrator if issues were identified. The Clinical and Operations Manual dated 5/2012, directed the facility to administer a 2-step PPD (purified protein derivative used to do a TST) to all employees and that documented copies were to be kept in the employees' file records.	{F 492}

{F 502}	Continued From page 333 A Physician's Orders dated 5/6/14, directed urine toxicology screen. A Progress Notes dated 5/6/14, indicated the nurse went to R37's room to obtain a urine specimen for toxicology screen. R37 refused to provide a urine sample to the nurse. The note indicated a urine sample cup and supplies were left in R37's room with instructions to obtain a sample when R37 had the urge to void even though a urine specimen for toxicology needed to be witnessed by staff. Review of the medical record lacked evidence of any further attempts made to obtain the urine toxicology screen or lab results. When interviewed on 5/12/14, at 11:53 a.m. the health unit coordinator stated there was not a urine toxicology screen completed as ordered and the only lab work completed for R37 in May 2014 was done in the hospital. A facility policy regarding lab work was requested and not provided.	{F 502}		
{F 514} SS=E	483.75(l)(1) RES RECORDS-COMPLETE/ACCURATE/ACCESSIBLE The facility must maintain clinical records on each resident in accordance with accepted professional standards and practices that are complete; accurately documented; readily accessible; and systematically organized. type II, tobacco abuse, and neuropathic pain. A review of medication list, and laboratory tests were ordered Hbg A1c (a indicator of diabetic compliance over a three month period), lipid panel (cholesterol testing) alt (liver test), lytes and BUN (kidney function tests).

On 5/6/14, a review of the medical record revealed no results for the lab tests that had been ordered on 4/16/14.

On 5/7/14, at 3:14 p.m. the health unit coordinator (HUC) verified the medical record lacked results of the 4/16/14, ordered labs, and also lacked the new PCP initial visit notes, assessment, or plan for patient treatment.

R9's medical record lacked laboratory results since 7/30/13.

On 5/13/14, at 9:30 a.m. during review of R9's medical reviewed it was revealed R9 had been to the primary physician's office several times for routine visit since 7/30/13, but lacked laboratory results for all the tests completed during the office visits.

When interviewed on 5/13/14, at 10:58 a.m. the HUC verified there were no labs in the resident chart since 7/30/13. The HUC stated the particular clinic the resident went to "always" had given her a hard time getting the notes and labs. The HUC indicated she had been told in the past that she had to call the day of the appointment to request for the information or write a note in the facility referral sheet but still nothing was being sent back with resident.

Copies of R34's care plan were requested from

Protecting, Maintaining and Improving the Health of Minnesotans

June 24, 2014

Ms. Leah Killian-Smith, Administrator
Camden Care Center
512 49th Avenue North
Minneapolis, MN 55430

RE: Project Number S5544023

Dear Ms. Killian-Smith:

On May 21, 2014, a Post Certification Revisit was completed at your facility to verify the status of Immediate Jeopardy level deficiencies. You have alleged that the deficiencies that remained in effect at the time of that onsite revisit by the Minnesota Department of Health, Licensing and Certification Program staff (F tags) have been corrected. We are accepting your plan of correction and presume that your facility will achieve substantial compliance.

We will be conducting a revisit of your facility to verify that substantial compliance has been achieved and maintained.

Sincerely,

Gloria Derfus

by MK

Submission of this credible allegation of compliance by Camden Care Center is not a legal admission that a deficiency exists or that the statement of deficiencies were cited correctly. It is not to be construed as an admission against interest of the facility, its administrator, employees, agents or other individuals who draft or may be documented in this credible allegation of compliance. The preparation and submission of this document does not constitute an admission of agreement with the alleged deficiencies or conclusions made by the survey agency. This credible allegation of compliance is submitted due to state and federal law requirements as a condition to participate in the Medicare and Medicaid programs.

Date of Completion: 7/6/2014

F-157

It is the policy of Camden Care Center to immediately inform the resident; consult with the resident's physician, and if known, notify the residents' legal representative or an interested family member when there is an accident involving the resident which results in injury and has the potential for requiring physician intervention.

For resident #13 the physician and/or family were updated on 5/8/20124. A new evaluation regarding Vulnerable Adult Assessment, smoking evaluation and elopement risk was completed. Corresponding updates have been made to the care plan, care assignment sheet. The primary physician was informed of the results on 6/20/2014 and a review of the current physician orders was completed. Education will be provided for staff members regarding notification of physician and legal representative. The preceding will be completed by July 6, 2014.

For other residents who may be affected by this practice, a comprehensive review and update of individual resident assessments (current clinical status, Vulnerable Adult Assessment, medications or treatments regime, elopement risk, smoking (as applicable) and fall risk), corresponding care plans and care assignment sheets to accurately reflect current resident status. Primary MD, resident and legal decision makers will be updated upon completion of this process. Education will be provided for direct care staff related to individual plan of care revisions and notification protocols by 7/6/2014.

The policy of incident notification was reviewed and revised as necessary. The Medical Director will review and approve the revised notification policy by 7/6/2014. Staff will be trained as it relates to their respective roles and responsibilities for the revised policies and procedures by July 6, 2014.

Audits will be completed by review of the 24 hour report form, documentation notes and Incident/Accident reports. Audits will be completed daily x4 weeks, monthly for 3 months and then quarterly on notification protocols to ensure proper notification was provided and documentation meets the facility standard. Residents are monitored for changes in condition with the provision of care, shift to shift report and weekly IDT meetings. Staff will receive additional education as needed based on outcomes of audits. The results will be reported to the QA/QI Committee for review and further recommendations. Upon this review, system revisions and/or staff education will be implemented if indicated by a prescribed action plan.

The Director of Nursing or designee will be responsible for compliance.

Date of correction: July 6, 2014

F-221

It is the policy of Camden Care Center that each resident has the right to be free from any physical restraints for purposes of discipline or convenience, and those not required to treat the resident's medical symptoms.

For Resident #89 a new assessment for physical device/physical restraints was completed on. Corresponding updates have been made to the care plan, care assignment sheet. Primary physician, resident and legal decision maker will be notified of assessment results. Consents for the physical device were obtained as warranted. Direct care staff for resident #89 will be educated on revised care interventions by July 1, 2014.

For other residents who may be affected by this practice, a review of resident with restraints will be completed to ensure medical reason for the device. Based upon this review, care interventions were updated per policy. The facility will assess new residents and those readmitted prior to the utilization of a device which meets the definition of a physical restraint. The preceding will be completed by July 6, 2014.

The policy of procedure for physical devices (assessment, medical reason and application of device during meals) was reviewed and revised accordingly. The Medical Director will review and approve the revised notification policy by July 6, 2014. IDT staff members will be trained as it relates to their respective roles and responsibilities regarding the physical device policy by July 1, 2014.

Random observation audits related to physical device utilization in accordance to individual care plan will be completed weekly for 4 weeks and monthly for 3 months. Results of audits will be reported to the QA/QI Committee for review and further recommendations. Upon this review, system revisions and/or staff education will be implemented if indicated by a prescribed corrective action plan.

The Director of Nursing or designee will be responsible for compliance.

Date of Correction: July 6, 2014

F-223

It is the policy of Camden Care Center that each resident has the right to be free from mistreatment, neglect and misappropriation if resident property.

For residents #34 and #36, a Vulnerable Adult Assessment has been completed. Assessment results have been reviewed with the resident, legal decision maker and primary physician. Corresponding updates have been made to the care plan and care assignment sheet. Behaviors have been reviewed and targeted behaviors have been identified. Direct staff responsible for the care of residents #34 and #36 have been educated on care plan updates as indicated.

For other residents who may be affected by this practice, a record review of current residents related to vulnerable adult assessments will be completed. A new vulnerable adult assessment will be completed for each current resident. Upon this review, system revisions and/or staff education will be implemented. This will be completed by July 1, 2014.

The policy for Vulnerable Adult Assessment was reviewed and revised as warranted. The Medical Director has reviewed and approved Initiation of a standardized, carbon-copied 24 hour report form will be implemented to assist in the enhancement of the internal communication process as it relates to resident care and needs. Incident and accident report form has been revised to contain the necessary components. Staff members will be trained as it relates to their respective roles and responsibilities regarding implementation of 24 hour report format, targeted behaviors and Vulnerable Adult Assessment. Facility orientation and agency staff orientation has been updated to reflect the revised policies and procedures as indicated.

Daily audits will be completed of the 24 hour report book to recognize any changes of condition, at risk potential for abuse/neglect for 4 weeks, monthly for 3 months, then quarterly. Audits will be completed 2x/week for one month, weekly x one month and then quarterly to observe care and staff to resident interactions.

Reviews will be completed on allegations of abuse, neglect and misappropriation of property will be completed to ensure facility protocols are followed to ensure the environment is free from abuse. Based on the audits care plans and assessments will be updated to reflect changes. The results will be reported to the QA/QI Committee for further review and recommendations. Upon this review, system revisions and/or staff education will be implemented if indicated via a prescribed corrective action plan.

The Director of Nursing/Director of Social Services or designee will be responsible for compliance.

It is the policy of Camden Care Center that each resident's drug regimen is free from unnecessary drugs.

For resident #91 review of physician orders has been completed with parameters established for administration of prn pain medication.
For resident #36 review of physician orders has been completed with parameters established for administration of prn pain medication.
For resident #37 drug regimen review has been completed. Side effect monitoring in in progress and GDR has been reviewed.
For resident #89 drug regimen review has been completed. Targeted behaviors have been identified along with monitoring of side effects for psychotropic medication.
For resident R113 a review of physician orders has been completed with parameters established for the administration of prn pain medication.
For resident #29 a review of physician orders has been completed with parameters for use of prn pain medication. Pain monitoring has been implemented.

For those residents identified, inclusion of the updates in the facility Behavior Management and Pain Management programs, as individually indicated, has been completed. Corresponding care plans and corresponding care assignment sheets have been updated as indicated. Resident attending physicians have been notified of the updates. The preceding was completed by July 6, 2014.

For other residents who may be affected by this practice a comprehensive pain assessment has been completed. Based on the assessment review of physician orders will be reviewed with parameters established as necessary for the use of prn pain medication. Pain monitoring will be reviewed for those residents receiving pain medication. For other residents who may be affected receiving psychotropic medication, drug regimen review was completed on 6/6/2013, targeted behaviors have been identified and GDR potentials have been considered. Review of appropriate indicators for the use of psychotropic medication has been completed. Corresponding care plans and care assignment sheets have been updated as necessary. Resident primary physicians have been informed of assessment results. Treatment recommendations have been obtained as indicated. The preceding steps have been completed by July 6, 2014.

The policy and procedure for pain management (including PRN medications, pain resolution and break through pain management) and psychoactive medication management (including GDR, targeted behaviors and documentation) has been reviewed and revised. The Medical Director has reviewed and approved the revisions by July 6, 2014. Clinical staff members were trained as it relates to their respective roles and responsibilities regarding pain management and psychotropic medication review and monitoring by July 6, 2014.

Audits of the 24 Hour Reports and new Physician orders will be completed monthly x3 months and then quarterly to ensure continued adherence to pain management and psychoactive medication management policies as indicated. The results will be reported to QA/QI committee for review and further recommendation.

The Director of Nursing or designee will be responsible for compliance.

It is the policy of Camden Care Center to have sufficient nursing staff to provide nursing and related services to attain or maintain practicable physical, mental, and psychosocial well-being of each resident, as determined by resident assessments and individual plans of care.

For Residents # R22, R129, R1, R41,R37, R13, R86, R116, R36, R113, R117, R9, R14, R62, R 129, R1, RR22 - comprehensive clinical assessments will be completed to accurately reflect current status and care needs. Corresponding care plan, care assignment sheets and physician orders will be reviewed and updated per policy. Attending physician, resident and legal decision maker will be notified of assessment results. **Please refer to corresponding POC for F tags 224 and 323.

The nursing schedule will be reviewed and revised to include staffing ratios that are within industry standards. The policy for staffing of 1:1 was reviewed and revised. In-service on staffing policies was presented to staff members on 6/4/2014. The facility has implemented a Staffing Manager who is responsible for the time keeping and policies. Attendance and punctuality was addressed at the in-service on 6/4/2014.

Daily schedules will be reviewed by the Director of Nursing or designee before posting to ensure appropriate staffing levels.

The staffing patterns, scheduling coordination was reviewed and revised as warranted. Staff members were trained as it relates to their respective roles and responsibilities.

Staffing pattern audits will be completed daily for 4 weeks, monthly for 3 months and then quarterly to ensure continued compliance. The results will be reported to QA/QI committee for review and further recommendation.

The Director of Nursing or designee will be responsible for compliance.

It is the policy of Camden Care Center to provide or obtain from an outside resource dental services to meet the needs of each resident.

For resident #9 a consent was obtained and resident was seen by the outside dental service agency on 6/4/2014. For resident #36 resident states he has found his dentures. He has adamantly refused to see the outside dental service agency that was present in the facility on 6/4/2014.

For other residents who may be affected by this practice a record review and brief oral exam of all residents will be completed regarding dental referrals, dental concerns, eating problems or nutritional concerns. Residents with dental concerns will be identified by the chart review and brief oral exam and will be placed on the list to be seen at the next dental facility visit. After the review the physician will be notified of the request for dental services for each resident identified.

The protocols/practices/contract for dental services will be reviewed and revised as necessary/warranted. The Medical Director has reviewed and approved the contract and protocols by July 6, 2014. Staff members will be trained as it relates to their respective roles and responsibilities. This will be completed by July 6, 2014.

The DON and or designee will conduct monthly record review audits for 3 months to ensure dental services are provided per revised policy. After three months, dental service audits will be conducted quarterly basis to coincide with the MDS schedule to ensure continued compliance with results reported to the QA/QI Committee for review and further recommendations.

The Director of Nursing or designee will be responsible for compliance.

It is the policy of Camden Care Center that the drug regimen of each resident must be reviewed at least once a month by a licensed pharmacist.

For residents #1, #36, #37, #89, #91 and #113, a new pharmacy consultation/medication regime review was completed on June 6, 2014. Additionally, the consultant pharmacist will conduct specific reviews as indicated: Resident #91, #113 and #36 – pain medication, PRN medication parameters and break through pain management, Resident #37 and #89 - resident specific target behaviors and monitoring for

antipsychotic medication, Resident #1 for unnecessary medication and GDR. Resident Parameters for pain medication will be determined and addressed on the MAR and care plan. Behavior monitoring will be initiated if necessary along with a sleep study for those residents receiving hypnotic medication. Care plans will be reviewed for indicators of use for psychotropic medication. The attending physicians will be notified of pharmacy consultant recommendations and updated will be completed as indicated. The preceding will be completed by July 6, 2014.

For other residents who may be affected by this practice a medication regimen review will be completed by a licensed pharmacist for all residents on pain medications and antipsychotics. Upon completion of the review, the pharmacy recommendations will be reviewed with the respective attending physicians. Updates will be completed as indicated. The facility has obtained the services of a new pharmacy consultant.

The protocol/practices/contract for consultant pharmacy services will be reviewed and revised by July 6, 2014. The Medical Director will review and approve the policies by July 6, 2014. Licensed nursing staff will be trained as it relates to their respective roles and responsibilities regarding consultant pharmacy recommendations.

The facility will conduct biweekly for 3 months pain management, hypnotic and antipsychotic use drug regimen audits to ensure adherence to facility policies and procedures. This audit will include a review of pharmacy recommendations and physician response to recommendations. Upon completion of reviews/audits, corrective actions, if applicable will be completed immediately. The results of monitoring of the corrective actions (track, trend and analysis) will be reported to the facility QA Committee monthly for 3 months. Upon this review, system revisions and/or staff education will be implemented if indicated via a prescribed corrective action plan.

The Director of Nursing or designee will be responsible for compliance.

F-469

It is the policy of Camden Care Center to maintain an effective pest control program so that the facility is free of pests and rodents.

Resident #56 room has been treated by Pest control. No additional infestations have been noted since treatment.

The Pest control contractor was at the facility on 6/9/2014 and completed routine pest control and monitoring. All insect lights traps were serviced and all entrances were treated. All traps were checked and no evidence of mice. Exterior face of building was also treated. Contract signed 6/9/2014 includes an increase in frequency of visits to service weekly for the month of June and bi-weekly for the month of July. Pest Control contractor was at the facility on 5/7/14 and performed treatment to specific rooms and exterior of the south wing.

Facility has purchased disposable food saver containers made available for the residents to store snack, food and other small food items in their room. This was reviewed with Resident Council on 6/16/2014.

The policy for pest control will be developed/reviewed/revised. All staff members will be trained as it relates to their respective roles and responsibilities regarding storage of food items in resident rooms and the use of covered containers. This was completed by July 6, 2014.

The Director of Maintenance/Environmental Services will conduct room to room environmental rounds related to pest control on a weekly basis for 4 weeks and monthly for 3 months. Results of audits will be reported to QA/QI committee for further review and further recommendation.

The Director of Maintenance/Environmental Services or designee will be responsible for compliance.

It is the policy of Camden Care Center that our facility be administered in a manner that enables it to use its resources effectively and efficiently to attain or maintain the highest practicable physical, mental and psychosocial well-being of each resident.

The new managing agent has removed the NHA from the facility. A new Interim NHA with related experience and expertise with this resident population is in place effective May 30, 2014. The INHA and designees have developed and implemented specific plans of corrections for each correlating citation in this Statement of Deficiency. The INHA has notified all facility staff of the outstanding citations and serious and immediate issues that are being addressed. Additional consultation and resources have been brought in to assist the INHA and facility staff to assess all residents as indicated in each citation and revise care processes and policies to address all areas identified. All policy revisions have been approved by the Medical Director. The Managing Agent and INHA have instituted clinical monitoring across shifts to resident safety and care needs. This was implemented on May 30, 2014 and remains in effect. The INHA has revised applicable policies and procedures in accordance to professional standards as indicated in the respective F Tag POC.

7/6/2014

For residents #37, #129 a comprehensive assessment, a vulnerable adult assessment and elopement assessment will be completed. Care plans will be reviewed to identify risks and interventions. Corresponding updates will be made to the care plan and care assignment sheet.

All other residents have the potential to be affected by this practice.

-F223 (see related POC for this F Tag)- For other residents who may be affected by this practice a record review will be completed regarding vulnerable adult assessment. A new vulnerable adult assessment will be completed for each current resident. Upon this review, system revisions and/or staff education will be implemented.

The policy for Vulnerable Adult Assessment was reviewed and revised as warranted. Initiation of a standardized, carbon-copied 24 hour report form will be implemented to assist in the enhancement of the internal communication process as it relates to resident care and needs. Incident and accident report form has been revised to contain the necessary components. Staff members will be trained as it relates to their respective roles and responsibilities regarding implementation of 24 hour report format, targeted behaviors and Vulnerable Adult Assessment.

Daily audits will be completed of the 24 hour report book to recognize any changes of condition, at risk potential for abuse/neglect for 4 weeks, monthly for 3 months, then quarterly. Audits are being completed to determine if staff are assessing and planning for "at risk behavior". Reviews will be completed on allegations of abuse, neglect and misappropriation of property will be completed to ensure facility protocols are followed to ensure the environment is free from abuse. Based on the audits care plans and assessments will be updated to reflect changes. The results will be reported to the QA/QI Committee for further review and recommendations. Upon this review, system revisions and/or staff education will be implemented if indicated via a prescribed corrective action plan.

-F-224 (see related POC for this F Tag)- All residents will have a comprehensive assessment completed, care plan review and revision of the care plan as necessary along with a chart review.

The policy and procedures for abuse prevention and reporting, resident protection policies was reviewed and revised as necessary. Facility staff members were trained as it relates to their roles and responsibilities for the revised policies and procedures regarding abuse reporting, abuse allegations. A review of the internal communication process will be completed to determine/establish an effective interdisciplinary communication process

On-going daily audits will be conducted of the 24 hour report, incidents and nursing documentation. This will be completed by the nurse manager on a daily basis. The results will be reported to the QA/QI Committee for further review and recommendations. Upon this review, system revisions and/or staff education will be implemented if indicated via a prescribed corrective action plan.

-F-225(see related POC for this F Tag)- Education will be provided for staff members regarding abuse reporting, investigation, incident completion, timely notification and documentation.

All other residents have the potential to be affected. Other residents who may be affected by this practice will have a vulnerable adult assessment completed. All other residents who operate a motorized w/c will be assessed for their ability to operate a motorized wheel chair.

The policy and procedures for abuse prevention and reporting, resident protection policies was reviewed and revised as necessary. Facility staff members were trained as it relates to their roles and responsibilities for the revised policies and procedures regarding abuse reporting, abuse allegations.

Audits regarding 24 hour report, incident reports and progress notes will be completed daily x4 weeks, then weekly x4 weeks, monthly for 3 months then quarterly to ensure continued compliance with facility protocol.

-F-226 (see related POC for this F Tag)- The facility has reviewed and revised the policies and procedures for screening and training of employees, protection of resident and policies pertaining to prevention, identification, investigation, and reporting abuse neglect and mistreatment.

All employee files have been reviewed to assure that the proper components are present such as licensure, background checks and reference checks. Nineteen staff members have been suspended and/or terminated based on the checks. Facility is in the process of performing an 8 point background check on all employees.

For other residents who may be affected by this practice a review of the abuse policy and procedure was completed. Training of employees as it relates to prevention, identification, investigation, and reporting abuse neglect and mistreatment.

The policy and procedure for resident protection was reviewed and revised. The policy was reviewed to ensure all components are present: screening, training, prevention, identification, investigation, protection and reporting and response. Staff members were trained as it relates to their respective roles and responsibilities for the policies and procedures.

New employee files will be reviewed on a continuous basis to verify licensure, background checks along with reference checks are present and appropriate action taken based on the result of the checks.

Daily review of the 24 hour report along with nursing notes to identify possible abuse, neglect, investigation for timeliness, reporting, documentation and notification.

The results of the audits will be reported to the QA/QI committee for further review and recommendations. Upon this review, system revisions and/or staff education will be implemented if indicated via a prescribed corrective action plan

F-250 (see related POC for this F Tag)- For resident #29, 386, #41, #37, #14, #56, #62, #9, #13, and #103 comprehensive assessments will be completed including vulnerable adult assessment, Risk of drug and ETOH assessment, smoking assessment, pain assessment, BIMs and elopement assessment. The comprehensive care plan will be reviewed and revised and the NAR assignment sheets will be updated to reflect current care needs. Appropriate referrals to be made to other professional resources as indicated.

R#117 was discharged from the facility

For other residents who may be affected by this practice a comprehensive assessment including the following assessments; vulnerable adult, pain, smoking, BIMs, elopement, risk of drug and alcohol will be completed. Comprehensive care plan will be reviewed and revised as indicated based on the assessments. Appropriate referrals to be made to other professional resources as indicated.

The policy and procedures for Incident/Accident an reporting, elopement, AMA, drug testing, LOA, smoking, controlled substance storage and documentation, 1:1 policy, change of condition were reviewed to ensure policies meet current standards of practice. Education was provided for staff regarding revised policies and procedures and their respective roles and responsibilities.

On-going daily audits will be completed of 24 hour report, incident/accident reports, physician orders and interdisciplinary progress notes to identify problems/concerns and follow up as needed for resolution. Completion of appropriate assessments, interventions and notification to physician and resident and family/legal representative as indicated.

F-309 (see related POC for this F Tag)- For resident #56 POLST was reviewed. Advance directive was discussed with resident and husband on 5/12/2014 and the correct advance directive was placed in the chart. Corresponding updates have been made to care plans and care assignment sheets.

For other residents who may be affected by this practice, an audit of all resident's advance directives care and planning will be completed. Upon this review, care plan revisions and/or staff education will be implemented if indicated.

The policy for Advance Directives was reviewed and revised as necessary. Staff members were trained as it relates to their respective roles and responsibilities regarding advance directives.

Advance Directive audits along with physician order audits will be completed weekly for 4 weeks, monthly for 3 months, then quarterly to ensure compliance with results reported to QA/QI committee for review and further recommendations.

F-314 (see related POC for this F Tag)- Resident #123 expired on 4/21/14.

For other residents who may be affected by this practice a comprehensive record review of skin will be completed by June 13, 2014. After review, updates will be made as appropriate for each resident identified.

Wound policy and procedure was reviewed and revised as necessary. Staff members were trained as it relates to their respective roles and responsibilities regarding wound documentation as it relates to wound location, staging as appropriate and documentation.

Daily audits will be completed of weekly skin checks completed on bath day. Weekly audits x 4 weeks will be completed for wound documentation to include location and staging as necessary then monthly x3 months and then quarterly to ensure compliance. The results of the audits will be reported to the QA/QI committee for review and further recommendations.

-F-319 (see related POC for this F Tag)- For resident #41 a Vulnerable Adult, elopement, cognitive assessments have been completed. Corresponding updates have been made to the care plan, care assignment sheet. All staff members responsible have been educated on the Leave of absence policy, comprehensive care plan, arranging of psych services and the internal communication process.

For other residents who may be affected by this practice a comprehensive record review of mental and psychosocial functioning and behavior monitoring will be completed. After review updates will be made as appropriate for each resident identified.

The policy and procedure for elopement risk, psychotropic drug use, and vulnerable adult assessment were reviewed and revised as necessary. Staff members were trained as it relates to their respective roles and responsibilities as it relates policies and procedures relating to leave of absence.

Audits of vulnerable adult assessment, comprehensive care plans and psychotropic drug use will be completed weekly x4 weeks, monthly for 3 months and then quarterly to ensure continued compliance. The results will be reported to the QA/QI committee for review and further recommendation.

F-323 (see related POC for this F Tag)- For resident #37, #129, #13, #41, #9, #36, #22, #14, #62, #86 and #113 a vulnerable adult assessment, elopement risk assessment, smoking assessment, psychosocial assessment and fall risk assessment will be completed. Corresponding updates will be made to the care plan, care assignment sheet. All staff members responsible will be educated on fall risk, elopement risk, vulnerable adult risk, and smoking assessment policy and procedures.

For other residents who may be affected by this practice, a comprehensive record review of fall risk, vulnerable adult, smoking, elopement risk will be reviewed and completed. After review, updates will be made as appropriate for each resident identified.

The policy and procedures for vulnerable adult, smoking, elopement, fall risk have been reviewed and revised. Staff members will be trained as it relates to their respective roles and responsibilities regarding the above policies and procedures.

Audits will be completed for all new admissions within 24 hours of admission/readmission, with a significant change in status, and quarterly to ensure all assessments are completed with appropriate changes made to comprehensive care plan and nursing assistant assignment sheets. The results will be reported to the QA/QI committee for review and further recommendations.

F-353 (see related POC for this F Tag)- The nursing schedule was reviewed and revised to include staffing ratios that are within industry standards. The policy for staffing of 1:1 was reviewed and revised as necessary. In-service on staffing policies was presented to staff members on 6/4/2014. The facility has implemented a Staffing Manager who is responsible for the staffing and scheduling. Attendance and punctuality was addressed at the in-service on 6/4/2014.

Daily schedules will be reviewed by the Director of Nursing or designee before posting to ensure appropriate staffing level.

The staffing patterns, scheduling coordination was reviewed and revised as warranted. Staff members were trained as it relates to their respective roles and responsibilities.

Staffing pattern audits will be completed daily for 4 weeks, monthly for 3 months and then quarterly to ensure continued compliance.

Upon completion of all reviews/audits, corrective actions, if applicable will be completed immediately. Additional education will be provided as derived from the reviews. Failure to adhere to educated protocols will result in corrective counseling. The results of monitoring of the corrective actions (track, trend and analysis) will be reported to the facility QA Committee monthly for 3 months. Upon this review, system revisions and/or staff education will be implemented if indicated via a prescribed corrective action plan.

F-492 Prior to working in the facility, each agency person will have a file that verifies that the appropriate screenings were completed prior to working in the facility. This verification process will include the completion of a master file which includes a two -step TB test and results prior for each agency personnel to the start of their first shift at Camden Care Center. This information will be provided from the staffing agency. This was implemented on 6/6/2014.

Development and implementation of an agency orientation has been completed on 6/6/2014. The DON and/or designee will assure that all proper paperwork is present in supplemental staff files.

The facility will conduct a daily audit of scheduled contracted staff files, to ensure all required and necessary paperwork and screenings are present prior to start of their first scheduled shift. Results of this monitoring will be presented to QA Committee for further review and further recommendation

F-497 The INHA and or designee has implemented measures to ensure that this practice does not recur, including: review and revision employee annual training requirements and annual review process policies and procedures. A review of the revised policies by the Medical Director will be conducted by July 6, 2014 for approval. Staff will be trained as it relates to their respective roles and responsibilities for the aforementioned reviewed and revised policies and procedures by July 6, 2014.

The facility has audited and reviewed all nursing assistant employment and training files for evidence of required annual training and annual performance evaluations. Those files requiring improvement have been identified and actions for adherence to annual training requirements and annual performance evaluations will be completed by 7/1/2014.

Upon completion of all reviews/audits, corrective actions, if applicable will be completed immediately. Additional education will be provided as derived from the reviews. Failure to adhere to educated protocols will result in corrective counseling. The results of monitoring of the corrective actions (track, trend and analysis) will be reported to the facility QA Committee monthly for 3 months. Upon this review, system revisions and/or staff education will be implemented if indicated via a prescribed corrective action plan.

F-499 The facility has completed license verification for employees (LPN)-A and registered nurse (RN)-C) and filed those results in accordance to policy.

The INHA and or designee has implemented measures to ensure that this practice does not recur, including: review and revision of license and certification verification (upon hire and annually) process policies and procedures. A review of the revised policies by the Medical Director will be conducted by July 6, 2014 for approval. Staff will be trained as it relates to their respective roles and responsibilities for the aforementioned reviewed and revised policies and procedures.

The facility has audited and reviewed all employees in a position requiring license or certification for evidence of license/certification verification. Those files requiring improvement have been identified and actions for adherence to license verification will be completed. All new employee files will be reviewed with the NHA for license/certification verification in accordance with applicable State laws.

Upon completion of all reviews/audits, corrective actions, if applicable will be completed immediately. Additional education will be provided as derived from the reviews. Failure to adhere to educated protocols will result in corrective counseling. The results of monitoring of the

corrective actions (track, trend and analysis) will be reported to the facility QA Committee monthly for 3 months. Upon this review, system revisions and/or staff education will be implemented if indicated via a prescribed corrective action plan.

The Administrator or designee will be responsible for compliance.

Date of Correction: 7/6/14

F-520 **CORRECTIVE ACTION**

The State of MN has appointed a new managing agent to provide oversight for the facility. The managing agent has placed a new Interim NHA with related experience and expertise with the facility resident population effective May 30, 2014. The INHA and designees have developed and implemented specific plans of corrections for each correlating citation in this Statement of Deficiency. Additional consultation and resources have been brought in to assist the INHA and facility staff to assess all residents as indicated in each citation and revise care processes and policies to address all areas identified. All policy revisions have been approved by the Medical Director and Managing Agent. The Managing Agent and INHA have instituted clinical monitoring across shifts to resident safety and care needs. This was implemented on May 30, 2014 and remains in effect. The INHA has revised applicable policies and procedures in accordance to professional standards as indicated in the respective F Tag POC. The INHA has revised the Quality Assurance and Performance Improvement processes to meet current professional standards. Education for all F Tags identified in this SOD will be completed for staff members. Documentation of individual education will be completed. Competency testing, as indicated in respective F Tags, will be documented. As indicated in corresponding F Tags, the NHA and or designee has reviewed and revised employee orientation as well as agency staff orientation programs to reflect the updated policies and procedures.

All current residents clinical records will be reviewed as indicated in F Tags notated in this statement of deficiency. Updates to individual care plans, care assignment sheets for direct care staff will be completed. Notification of assessment results/record review results will be completed specifically for residents, responsible parties and primary care physicians. Physician orders will be updated as indicated. All staff responsible for those residents identified for revisions will be completed to ensure care and services are being delivered per current clinical functional level.

The Administrator and/or designee will implement measures to ensure that this practice does not recur, including: review and revision as indicated of the following policies and procedures – QAA (Quality Assessment and Assurance) program protocols based on the new guidelines to include, but not limited to: Overview of QAA Program (serves as a management process that is ongoing, multi-level, and facility wide. It encompasses all managerial, administrative, clinical, and environmental services, contracted entities. The purpose of the program is to continuously evaluate the facility systems for clinical, financial and operational focuses to provide the highest level of care and services to the residents and staff of the facility);

- Keeping facility systems in accordance with current industry standards of practice;
- Prevent deviations from care processes from arising;
- Discerning issues and concerns as identified with facility systems and utilizing root cause analysis
- protocols to determine necessary action steps;
- Facility process for identification of quality deficiencies;
- Description of QAA facility team composition; additional committee members may include the facility administrator, Medical Director –
- Description of QAA Committee functions;
- Frequency of meetings and recording processes utilized;
- Monitoring processes for action plan implementation and determination of quality improvement of necessary changes for improvement.

A review of the revised policies by the Medical Director and Quality Assurance/Compliance Committee will be completed to determine if policies meet current standards of practice.

All facility staff will be trained as it relates to their respective roles and responsibilities for the aforementioned reviewed and revised policies and procedures related to quality assessment and assurance activities. Staff will be educated by the NHA on the QAA committee responsibility to have oversight and monitoring of the plan of correction for the recertification survey. The facility Managing Agent and INHA have added additional external consultants to assist with the facility's response to the statement of deficiency as well as QAA/monitoring activities to ensure compliance with respective regulations.

The Administrator and /or designee will monitor the corrective actions to ensure the effectiveness of these actions, including:

Development of peer review committee to assess current QAA functionality including identified QAA improvement plans and effectiveness of implemented action plans. This will be completed monthly for 4 months. Upon completion of reviews/audits, corrective actions, if applicable will be completed immediately. Additional education will be provided as derived from the reviews. Failure to adhere to educated protocols will result in corrective counseling. The results of monitoring of the corrective actions for the overall Statement of Deficiency (track, trend and analysis) will be reported to the facility QA Committee monthly for 4 months. Upon this review, system revisions and/or staff education will be implemented if indicated via a prescribed corrective action plan.

The INHA and Managing Agent will be responsible for compliance.

It is the policy of Camden Care Center to operate and provide services in compliance with all applicable federal, state and local laws, regulations and codes, and with accepted professional standards and principles that apply to professionals providing services in such a facility.

Prior to working in the facility, each agency person will have a file that verifies that the appropriate screenings were completed prior to working in the facility. This verification process will include the completion of a master file which includes a two -step TB test and results prior for each agency personnel to the start of their first shift at Camden Care Center. This information will be provided from the staffing agency. This was implemented on 6/6/2014.

Development and implementation of an agency orientation has been completed on 6/6/2014. The DON and/or designee will assure that all proper paperwork is present in supplemental staff files.

The facility will conduct a daily audit of scheduled contracted staff files, to ensure all required and necessary paperwork and screenings are present prior to start of their first scheduled shift. Results of this monitoring will be presented to QA Committee for further review and further recommendation

The Administrator/Director of Nursing or designee is responsible for compliance.

It is the Policy of Camden Care Center to have a governing body that is legally responsible for establishing and implementing policies regarding the management and operation of the facility; and the governing body appoints the administrator who is licensed by the State where licensing is required; and responsible for the management of the facility

The State of MN has appointed a new managing agent to provide oversight for the facility. The managing agent has placed a new Interim NHA with related experience and expertise with the facility resident population effective May 30, 2014. The INHA and designees have developed and

implemented specific plans of corrections for each correlating citation in this Statement of Deficiency. Additional consultation and resources have been brought in to assist the INHA and facility staff to assess all residents as indicated in each citation and revise care processes and policies to address all areas identified. All policy revisions have been approved by the Medical Director and Managing Agent. The Managing Agent and INHA have instituted clinical monitoring across shifts to resident safety and care needs. This was implemented on May 30, 2014 and remains in effect. The INHA has revised applicable policies and procedures in accordance to professional standards as indicated in the respective F Tag POC.

All residents identified in this citation (R34, R129, R37, R116, R41, R70, R13, R117, R62, R56, R123, R22, R1, R36, R9) have been clinically reassessed and plans of care have updated as indicated in the correlating F Tag citations indicated in the SOD. Employees (E1, E2, E3) annual evaluations have been completed. Staff (NA-Z) has completed the required education. License/certification verification for RN-C, RN-D, LPN-A, NA-U, NA-Q) has been completed. Facility vendors have been notified of the receivership and vendor payment processes and needs.

Refer to specific Plan of Correction actions for F223, F224, F 225, F 226, F250, F 309, F 314, F319, F 323, F 353, F 412, F 490, F 492, F497, F 499, F500, and F520 related to resident specific changes, policy revisions and updates, staff education and monitoring activities.

Upon completion of all reviews/audits, corrective actions, if applicable will be completed immediately. Additional education will be provided as derived from the reviews. Failure to adhere to educated protocols will result in corrective counseling. The results of monitoring of the corrective actions (track, trend and analysis) will be reported to the facility QA Committee monthly for 3 months. Upon this review, system revisions and/or staff education will be implemented if indicated via a prescribed corrective action plan.

The INHA and Managing Agent will be responsible for compliance.

It is the policy of Camden Care Center to complete a performance review of every nurse aide at least once every 12 months, and provide regular in-service education based on the outcome of these reviews. The in-service training will be sufficient to ensure the continuing competence of nurse aides, but must be no less than 12 hours per year.

Employees (E1, E2, E3) annual evaluations have been completed. Staff (NA-Z) has completed the required education.

The INHA and or designee has implemented measures to ensure that this practice does not recur, including: review and revision employee annual training requirements and annual review process policies and procedures. A review of the revised policies by the Medical Director will be conducted. Staff will be trained as it relates to their respective roles and responsibilities for the aforementioned reviewed and revised policies and procedures.

The facility has audited and reviewed all nursing assistant employment and training files for evidence of required annual training and annual performance evaluations. Those files requiring improvement have been identified and actions for adherence to annual training requirements and annual performance evaluations will be completed.

Upon completion of all reviews/audits, corrective actions, if applicable will be completed immediately. Additional education will be provided as derived from the reviews. Failure to adhere to educated protocols will result in corrective counseling. The results of monitoring of the corrective actions (track, trend and analysis) will be reported to the facility QA Committee monthly for 3 months. Upon this review, system revisions and/or staff education will be implemented if indicated via a prescribed corrective action plan.

The INHA will be responsible for compliance.

It is the policy of Camden Care Center to employ professional staff who are licensed, certified, or registered in accordance with applicable State laws.

The facility has completed license verification for employees (LPN)-A and registered nurse (RN)-C) and filed those results in accordance to policy.

The INHA and or designee has implemented measures to ensure that this practice does not recur, including: review and revision of license and certification verification (upon hire and annually) process policies and procedures. A review of the revised policies by the Medical Director will be conducted. Staff will be trained as it relates to their respective roles and responsibilities for the aforementioned reviewed and revised policies and procedures.

The facility has audited and reviewed all employees in a position requiring license or certification for evidence of license/certification verification. Those files requiring improvement have been identified and actions for adherence to license verification will becompleted. All new employee files will be reviewed with the NHA for license/certification verification in accordance with applicable State laws.

Upon completion of all reviews/audits, corrective actions, if applicable will be completed immediately. Additional education will be provided as derived from the reviews. Failure to adhere to educated protocols will result in corrective counseling. The results of monitoring of the corrective actions (track, trend and analysis) will be reported to the facility QA Committee monthly for 3 months. Upon this review, system revisions and/or staff education will be implemented if indicated via a prescribed corrective action plan.

The INHA will be responsible for compliance.

It is the policy of Camden Care Center that if the facility to employ a qualified professional person to furnish a specific service to be provided by the facility, the facility must have that service furnished to residents by a person or agency outside the facility under an approved arrangement.

The State of MN has appointed a new managing agent to provide oversight for the facility. The managing agent has placed a new Interim NHA with related experience and expertise with the facility resident population effective May 30, 2014. The INHA and designees have developed and implemented specific plans of corrections for each correlating citation in this Statement of Deficiency. Additional consultation and resources have been brought in to assist the INHA and facility staff to assess all residents as indicated in each citation and revise care processes and policies to address all areas identified. Facility vendors, including contracted Social Services Agency, have been notified of the receivership and vendor payment processes and needs.

The facility INHA is currently working with the contracted social services vendor and external social services resources for the provision of medically related social services. Refer to F 250 for the specific plan of correction actions for those residents identified in the citation, all residents potentially affected by this practice, revision and implementation of policies and procedures, staff orientation changes , staff education as well as monitoring activities. The Managing Agent and INHA have instituted clinical monitoring across shifts to resident safety and care needs. This was implemented on May 30, 2014 and remains in effect.

The INHA and new Managing Agent will review accounts payable on a weekly basis for 3 months to ensure vendor invoices are processed and paid in accordance to the individualized agreements.

Upon completion of all reviews/audits, corrective actions, if applicable will be completed immediately. Additional education will be provided as derived from the reviews. Failure to adhere to educated protocols will result in corrective counseling. The results of monitoring of the corrective actions (track, trend and analysis) will be reported to the facility QA Committee monthly for 3 months. Upon this review, system revisions and/or staff education will be implemented if indicated via a prescribed corrective action plan.

The INHA will be responsible for compliance.

It is the policy of Camden Care Center to maintain clinical records on each resident in accordance with accepted professional standards and practices that are complete; accurately documented, readily accessible; and systematically organized. The clinical record contains sufficient information to identify the resident, record of the resident's assessments, plan of care and services provided, and the results of any preadmission screening conducted by the State.

Residents (R103, R116,R86, R71, R9, R34, R51, R129, R13, R117, R41,R62, R37, R56, R36, R123, R1, R113, R29, R91) identified in this statement of deficiency clinical records have been reviewed for completion of all applicable assessments , MDS, comprehensive care plan, physician order updates, physician progress notes, behavior tracking as applicable, laboratory services as ordered and respective nursing documentation. Updates have been completed as indicated per record review. Corresponding updates have been made to the care plan, care assignment sheet and communicated to the resident and/or designated decision maker. Primary physician has been informed of assessment results and a review of the current physician orders will be completed. All staff responsible for care for each resident identified has been educated on updated care interventions.

For other residents who may be affected by this practice, an audit of all current resident records for completion of applicable assessments , MDS, comprehensive care plan, physician order updates, physician progress notes, behavior tracking as applicable, laboratory services as ordered and respective nursing documentation. Updates have been completed as indicated per record review. Corresponding updates have been made to the care plan, care assignment sheet and communicated to the resident and/or designated decision maker. Primary physician has been informed of assessment results and a review of the current physician orders will be completed.

The Director of Nursing and/or designee will implement measures to ensure that this practice does not recur, including: review and revision as indicated of the following policies and procedures – medical record protocols including - completion of applicable assessments , MDS, comprehensive care plan, physician order updates, physician progress notes, behavior tracking as applicable, laboratory services as ordered and respective nursing documentation. A review of the revised policies by the Medical Director will be conducted to determine if policies meet current standards of practice was completed.

Clinical staff were trained as it relates to their respective roles and responsibilities for the aforementioned reviewed and revised policies and procedures .

The Director of Nursing and /or designee will monitor the corrective actions to ensure the effectiveness of these actions, including: Conduct random record review to ensure the aforementioned policies and procedures are in place and practice. This will be completed 3 times per week for 4 weeks.

In addition, a weekly review of new/re admission records will be completed to ensure the aforementioned policies and procedures are in place and practice per new and re admission processes. This will be completed one time per week for four weeks.

Upon completion of all reviews/audits, corrective actions, if applicable will be completed immediately. Additional education will be provided as derived from the reviews. Failure to adhere to educated protocols will result in corrective counseling. The results of monitoring of the corrective actions (track, trend and analysis) will be reported to the facility QA Committee monthly for 3 months. Upon this review, system revisions and/or staff education will be implemented if indicated via a prescribed corrective action plan.

The INHA will be responsible for compliance.

Date of Correction: July 6, 2014

It is the policy of Camden Care Center that the facility maintains a quality assessment and assurance committee consisting of the director of nursing services; a physician designated by the facility and at least 3 other members of the facility staff. This meets at least quarterly to identify issues with respect to which quality assessment and assurance activities are necessary and develop appropriate plans of action to correct identified quality deficiencies.

CORRECTIVE ACTION

The State of MN has appointed a new managing agent to provide oversight for the facility. The managing agent has placed a new Interim NHA with related experience and expertise with the facility resident population effective May 30, 2014. The INHA and designees have developed and implemented specific plans of corrections for each correlating citation in this Statement of Deficiency. Additional consultation and resources have been brought in to assist the INHA and facility staff to assess all residents as indicated in each citation and revise care processes and policies to address all areas identified. All policy revisions have been approved by the Medical Director and Managing Agent. The Managing Agent and INHA have instituted clinical monitoring across shifts to resident safety and care needs. This was implemented on May 30, 2014 and remains in effect. The INHA has revised applicable policies and procedures in accordance to professional standards as indicated in the respective F Tag POC. The INHA has revised the Quality Assurance and Performance Improvement processes to meet current professional standards.

As of July 6, 2014 education for all F Tags identified in this SOD was completed. Documentation of individual education is completed. Competency testing, as indicated in respective F Tags, is documented as indicated. As indicated in corresponding F Tags, the NHA and or designee has reviewed and revised employee orientation as well as agency staff orientation programs to reflect the updated policies and procedures.

All current residents comprehensive records will be reviewed as indicated in respective F Tags notated in this statement of deficiency, have been completed. Updates to individual care plans, care assignment sheets for direct care staff have been completed. Notification of assessment results/record review results were completed specifically for residents, responsible parties and primary care physicians. Physician orders have been updated as indicated. All staff responsible for those residents identified for revisions was completed to ensure care and services are being delivered per current clinical functional level.

The Administrator and/or designee will implement measures to ensure that this practice does not recur, including: review and revision as indicated of the following policies and procedures – QAA (Quality Assessment and Assurance) program protocols based on the new guidelines to include, but not limited to: Overview of QAA Program (serves as a management process that is ongoing, multi-level, and facility wide. It encompasses all managerial, administrative, clinical, and environmental services, contracted entities. The purpose of the program is to continuously evaluate the facility systems for clinical, financial and operational focuses to provide the highest level of care and services to the residents and staff of the facility);

- Keeping facility systems in accordance with current industry standards of practice;
- Prevent deviations from care processes from arising;
- Discerning issues and concerns as identified with facility systems and utilizing root cause analysis
- protocols to determine necessary action steps;
- Facility process for identification of quality deficiencies;
- Description of QAA facility team composition; additional committee members may include the facility administrator, Medical Director –
- Description of QAA Committee functions;
- Frequency of meetings and recording processes utilized;
- Monitoring processes for action plan implementation and determination of quality improvement of necessary changes for improvement.

A review of the revised policies by the Medical Director and Quality Assurance/Compliance Committee will be completed by July 6, 2014 to determine if policies meet current standards of practice. QAA meeting is scheduled for the week of June 23, 2014.

All facility staff was trained as it relates to their respective roles and responsibilities for the aforementioned reviewed and revised policies and procedures related to quality assessment and assurance activities. As of July 6, 2014 staff will be educated by the NHA on the QAA committee responsibility to have oversight and monitoring of the plan of correction for the recertification survey. The facility Managing Agent and INHA have added additional external consultants to assist with the facility's response to the statement of deficiency as well as QAA/monitoring activities to ensure compliance with respective regulations.

The Administrator and /or designee will monitor the corrective actions to ensure the effectiveness of these actions, including:

Development of peer review committee to assess current QAA functionality including identified QAA improvement plans and effectiveness of implemented action plans. This will be completed monthly for 4 months. Upon completion of reviews/audits, corrective actions, if applicable will be completed immediately. Additional education will be provided as derived from the reviews. Failure to adhere to educated protocols will result in corrective counseling. The results of monitoring of the corrective actions for the overall Statement of Deficiency (track, trend and analysis) will be reported to the facility QA Committee monthly for 4 months. Upon this review, system revisions and/or staff education will be implemented if indicated via a prescribed corrective action plan.

The INHA will be responsible for compliance.

The facility must also promptly notify the resident and, if known, the resident's legal representative or interested family member when there is a change in room or roommate assignment as specified in §483.15(e)(2); or a change in resident rights under Federal or State law or regulations as specified in paragraph (b)(1) of this section.

The facility must record and periodically update the address and phone number of the resident's legal representative or interested family member.

This REQUIREMENT is not met as evidenced by:
Based on observation, interview and document review, the facility failed to ensure the physician and family member(s) was promptly notified for 1 of 1 resident (R13) observed to elope from the building during the survey on 5/6/14.

Findings include:

On 5/5/14, and 5/6/14, R13 was observed to be allowed to leave the facility unescorted to smoke in the designated smoking area. Although R13 had a WanderGuard applied, the WanderGuard alarm was disabled when R13 exited the building. On 5/6/14, at 4:45 p.m. R13 was observed to have eloped from the facility and was observed on the city sidewalk by the surveyor.

Upon arrival to the facility on 5/5/14, at 1:35 p.m. R13 was observed to be out on the designated smoking area with four other residents and two facility staff. R13 was observed to be in a wheelchair with a half lap tray on the left side of

{F 157}	Continued From page 2 the wheelchair. R13 was observed to be smoking a cigarette independently. On 5/6/14, at 8:30 a.m. R13 was observed to wheel independently to the front door. A chirping sound was heard and R13 was observed to exit the facility and wheel herself backwards to the smoking patio. No staff escorted her. Seven residents were observed to be in the designated smoking area. R13 wheeled to the table under the arbor, was assisted to light a cigarette by the smoking monitor and smoked independently. - At 8:33 a.m. R13 remained on the smoking patio with four other residents smoking. - At 8:46 a.m. R13 extinguished her cigarette appropriately and wheeled herself back into the facility. A loud beeping noise was heard as R13 entered the facility. The sound was immediately silenced to a slight chirping sound. R13 wheeled into the facility and down the hallway. No staff escorted her. - At approximately 11:00 a.m. R13 was randomly observed to be smoking in the designated smoking area, a male staff was observed to be monitoring the smokers. R13 was observed to finish smoking her cigarette at approximately 11:20 a.m. and wheel herself into the facility unescorted. The smoking monitor did not assist. A quiet chirping noise was heard as R13 entered the building. -At 4:45 p.m. R13 was observed by the surveyor to be at the end of the driveway in her wheelchair using her feet to propel the wheelchair towards 49th Avenue North. R13 turned left upon reaching the sidewalk and began wheeling herself with difficulty towards 6th street. After a few feet, R13 made a U-turn and began pushing herself backwards down the sidewalk. The street was observed to be busy with multiple cars driving	{F 157}

{F 157}	Continued From page 3 rapidly (posted speed limit was 30 miles per hour). The smoking monitor was observed to be behind a pillar with his back to the street and R13. - At 4:46 p.m. the front desk monitor (O)-C was notified by the surveyor that R13 had been observed on the city sidewalks. O-C verified R13 "could not" be on the sidewalk near the street unsupervised and immediately ran outside to R13. When O-C reached the resident, R13 was approximately 20 feet past the end of the driveway and half way to 6th street, wheeling backwards on the sidewalk facing oncoming traffic. O-C was observed to speak with R13 and after several minutes, assisted her to wheel back to the facility. O-C could be heard to tell the smoking monitor to watch for residents eloping. O-C returned R13 to the facility. R13's Diagnosis Report dated 2/4/09, identified diagnoses to include hemiplegia affecting the dominant side, depressive disorder and cognitive deficits due to cerebrovascular disease. The Vulnerable Adult Assessment dated 6/24/13, identified R13 had a history of wandering into other resident's rooms, history of unsafe smoking and taking other peoples' belongings. The assessment identified R13 had cognitive deficits, short-term memory loss, impaired decision making and poor judgment. In addition, the assessment indicated R13 was required to have supervised LOAs (Leave of Absences) only, and that R13 had a past history of drug abuse. A LOA Safety Assessment dated 6/24/13, identified R13 had cognitive impairments related to dementia, and that the resident was unable to leave the facility unsupervised.	{F 157}

A Camden Care Center Care Conference form dated 10/1/13, included; "[R13] propels herself independently in a wheelchair to all destinations within the building - at times she will propel herself backwards and needs frequent reminders to not do this. She has a history of wandering from the facility and thus wears a WanderGuard to alert staff if she attempts to leave the building. She also has a history of wandering into other resident rooms and taking their belongings, which can cause other residents to become frustrated with her so she needs frequent redirection."

The Nursing Assessment Packet Review for the reference period 3/19 through 3/25/14, included a safety Risk (Fall) Assessment dated 3/19/14. The assessments did not address or review the need for a WanderGuard.

R13's quarterly Minimum Data Set (MDS) dated 3/25/14, indicated R13 was cognitively intact, was identified to have no behavior problems, and required extensive assistance with activities of daily living (ADLs).

A Care Conference summary dated 4/10/14, and another Care Conference form (undated) did not address R13's use of a WanderGuard or elopement risk.

R13's Physician's Order Sheet dated 4/16/14, directed to check R13's WanderGuard every shift beginning 9/19/13.

The Behavior Monitoring Documentation form (undated) identified R13's target behavior was, "Wandering into other resident rooms" and indicated appropriate interventions such as assist

resident to attend activities, assist resident to the bathroom if needed, anticipate needs, visit with resident if she needs help. Dated as reviewed last on 4/23 (no year).

R13's Vulnerable Adult care plan dated 4/28/14, indicated R13 had a history of elopement. The goal identified R13 would remain safe at Camden Care Center. An intervention dated 10/7/11, indicated, "WanderGuard in place." An intervention dated as initiated 3/16/12, directed, "Resident has been assessed and may not leave this facility without supervision."

An undated Group 5 assignment sheet (a form carried by nursing assistant staff for quick reference to care plan needs) identified R13 had a WanderGuard.

The clinical record lacked evidence R13's elopement was documented including date, time, location, and those involved. The clinical record lacked evidence R13 was evaluated for elopement risk after being found to elope, or R13's physician was notified at the time of the incident. The clinical record lacked evidence the administrator or State agency were notified of the incident. In addition, the clinical record lacked evidence the elopement was thoroughly investigated, including interview with staff present at the time of the elopement.

A nursing progress note for R13 written by administration on 5/8/14, at 9:04 a.m., "Report received that the resident attempted to leave the facility on Tuesday May 6 around 4 p.m. trying to get to her son, resident was found by the receptionist on the sidewalk, redirected back into the facility. Resident has her WanderGuard on.

{F 157}	Continued From page 6 The receptionist [O-C] reported that the she reminded the resident that resident cannot leave the facility unsupervised; receptionist was educated that when residents with WanderGuard would like to get out of the building to smoke, the smoke monitor should be alerted. Son and daughter notified. Message left to NPs [nurse practitioner] voicemail to update on resident." Although the note indicated a message had been left for the NP, the NP and family member(s) were not called until three days after the incident. On 5/9/14, at 11:00 a.m. R13 was observed to wheel herself backwards out of the facility through the front entrance. The WanderGuard did not sound. O-C was observed to be at the front desk and was observed to reach to the right. O-C verified she reached to silence the alarm for the WanderGuard. R13 was observed to exit the facility without staff and wheel without staff to the designated smoking area. - At approximately 11:25 a.m. R13 was observed to wheel herself out of the designated smoking area, push the handicapped switch to open both doors and wheel herself backwards into the facility. O-C was observed to silence the WanderGuard alarm (reach down to activate switch). R13 wheeled herself backwards down the hallway into the facility. At the time of the observation, O-C stated she disabled the WanderGuard alarm for residents who wanted to smoke in the designated smoking area. At no time during the observation, did O-C alert the smoking monitor or staff of R13 leaving the building. On 5/9/14, at 1:11 p.m. registered nurse (RN)-C stated she was in the room when O-C had reported R13 had eloped. RN-C stated the	{F 157}

{F 157}	Continued From page 7 announcement was made and RN-C, licensed practical nurse (LPN)-E, LPN-A and dietary manager (DM) was present for the announcement. RN-C stated she had not reported the concern as it was LPN-A's responsibility and verified R13 was assigned to her unit. RN-C stated LPN-E was not available for interview. RN-C stated if a resident was found to elope, the staff should try to locate the resident; and would be responsible to notify the family and physician regarding the elopement.	{F 157}		
{F 221} SS=D	483.13(a) RIGHT TO BE FREE FROM PHYSICAL RESTRAINTS The resident has the right to be free from any physical restraints imposed for purposes of discipline or convenience, and not required to treat the resident's medical symptoms. This REQUIREMENT is not met as evidenced by: Based on observation, interview and document review, the facility failed to ensure 1 of 1 resident (R89) reviewed for restraint, was free of physical restraints while directly supervised by staff during meals. Findings include: On 5/7/14, at 8:28 a.m. R89 was observed to be at a meal in her wheelchair (W/C) with the right break locked. Anti-rollbacks (devices which engage and keep wheelchair from rolling back when a resident stands) were observed to be applied to the back of the W/C. A nursing assistant (NA)-V was observed to be sitting directly to R89's left and assisted R89 to eat.	{F 221}

{F 221}	Continued From page 8 When asked why the W/C brake was locked, NA-V stated "we lock one brake," and verified the left brake was unlocked. NA-V explained "brakes" needed to be locked "to protect her [R89]." NA-V further explained R89 needed to protect from "falling." NA-V was unclear why the left brake was left unlocked. The right side of the W/C was observed to be flush to the table. During the observation, R89 was observed to stand repeatedly, had worried expression on her face and repeated in an anxious voice, "I gotta go!" On 5/8/14, at approximately 8:30 a.m. R89 was observed to be at the dining room table in the same location. R89 was observed to have both W/C brakes locked; the anti-rollback device remained appropriately applied to the W/C. R89 attempted to stand multiple times, appeared worried when standing, then immediately sat back down. - From 8:30 a.m. until 9:40 a.m. R89 remained at the breakfast meal. NA-V was observed to provide R89 her breakfast, set up the breakfast and sit directly next to R89 and assist her to eat. At no time were W/C brakes unlocked. R89 was observed to stand repeatedly throughout the meal, pushing back slightly with her legs as she stood. The W/C was flush to the top of the table, preventing R89 from leaving the table. The Admission Nursing Assessment dated 12/23/13, identified R89 had no visual, or hearing impairments, and she was alert to person, place, family and self only. The assessment identified "right side weakness." Although the assessment identified R89 arrived to the facility in a wheelchair, the assessment did not identify the use of a W/C and had "N/A [non-applicable]" written by hand in the section. Review of the	{F 221}

{F 221}	Continued From page 9 clinical record lacked evidence R89 was assessed for restraints. R89's admission Minimum Data Set (MDS) dated 12/28/13, indicated R89 was never or rarely understood had short and long-term memory problems and R89 had moderately impaired decision making ability. The MDS identified R89 had hallucinations, delusions, and other behavior concerns towards others. The MDS indicated R89 required limited physical assistance from staff to walk; extensive physical assistance from staff for transferring, bed mobility, locomotion and toilet use. The MDS identified R89 did not have steady balance when attempting to move from seated to standing position and R89 had impairment of the lower extremity on one side. The MDS did not identify R89 used a restraint. The Care Area Assessment (CAA) for activities of daily living (ADLs) Function/Rehabilitation Potential dated 1/3/14, identified R89's diagnoses to include altered mental status, cognitive impairment and weakness. The CAA identified R89 required staff assistance for ADLs, had no pain concerns, had a history of falls (but no falls in the facility) and was incontinent of bowel and bladder. The CAA for behaviors dated 1/3/14, indicated, "Resident exhibits behavioral symptoms and is cognitively not alert and orient [sic] when writer attempted to assess her. SS [social services] will care plan this matter accordingly." The CAA for falls, also dated 1/3/14, recapitulated the same information as the ADL CAA. The Admission Record dated 1/23/14, identified R89 had diagnoses to include difficulty walking, essential hypertension and Picks disease.	{F 221}

{F 221}	Continued From page 10 The clinical record lacked evidence R89 had been assessed for restraint use, including locked W/C brakes and having the W/C pushed flush to the table. R89's care plan dated as last reviewed on 3/28/14, identified R89 was at risk for falls related to confusion, dementia, psychotropic drug use and Picks disease. The care plan directed to provide a "safe environment for the resident." The care plan did not identify or direct to lock R89's brakes, did not identify the use of a restraint and did not include direction to place R89 against a desk or table. The care plan was updated on 4/30/14, to include, "Anti-roll back brakes installed onto wheelchair to prohibit wheelchair from rolling backwards when resident offloads independently. Least restrictive safety device while in wheelchair." On 5/12/14, at 9:24 a.m. the licensed practical nurse (LPN)-E stated R89 "was not restrained" and stated "anti-rollback brakes were placed on the wheelchair." LPN-E stated R89's W/C was "looked at by therapies" and therapies had assessed R89 for the use of the anti-rollbacks on the W/C. LPN-E was unclear whether the locking of R89's W/C brakes had been assessed as a form of restraint. - At 9:28 a.m. LPN-E stated the therapy department had only made a "recommendation" and since R89 was not on the therapy case load, they "didn't document the evaluation." LPN stated direct care staff had been "educated" not to lock R89's brakes or restrain her against a desk or table. LPN-E verified if R89 was directly supervised by a staff person, the W/C brakes should not have been locked.	{F 221}

{F 221}	Continued From page 11 On 5/12/14, at 9:44 a.m. the director of nursing (DON) verified R89 should have been assessed for the use of anti-rollbacks and the use of potential restraints, such as having both brakes locked and the W/C pushed flush to a table. DON repeatedly stated he thought "physical therapy assessed the use of the anti-rollbacks" but was unclear if R89 was assessed for restraints. DON verified therapy assessments should have been documented in R89's clinical record. On 5/12/14, at 12:28 p.m. the physical therapy assistant and rehab manager (PTA), occupational therapist (OT), and physical therapist (PT) were interviewed together in the therapy gym. All denied having assessed R89 for the use of the anti-rollbacks, W/C brake locking, or restraints. PTA stated the anti-rollbacks had been an idea that had been "brought up" in the morning meeting as "a way to keep her [R89] safe without locking the brakes." The OT stated therapy staff had "helped maintenance order the device," and stated since maintenance had not seen the device before, therapy staff had assisted him to "apply it." The PT stated no therapy staff had actually assessed R89 because there was no "physician's order" and because R89 "was not on case load." All therapists verified they would not "assess" a resident without a physician's order and stated they were unclear when they should "get involved." All verified they were employees of Videll Healthcare Limited Liability Company (LLC), but then stated, "The facility doesn't have polices to let us know our responsibilities." On 5/12/14, at 12:23 p.m. R89 was observed to be in her W/C at the lunch meal. NA-V was observed seated directly to the left of R89. NA-V	{F 221}

{F 221}	Continued From page 12 was interacting with R89 before the meal. R89 was observed to have the W/C pushed up flush against the table and both W/C brakes were observed to be locked which caused R89 to be restrained. The left anti-rollback arm was observed to be twisted off R89's left W/C tire (rendering the anti-rollback ineffective). The surveyor alerted NA-V to the anti-rollback being ineffective. - At 12:26 p.m. R89 was observed to be provided her meal. NA-V setup the meal and remained with R89. R89 was observed to remain in the dining room throughout the meal with the brakes locked. NA-V sat next to R89 until approximately 1:20 p.m. NA-V then unlocked both brakes and wheeled R89 away from the table and into the activity room on the South unit. On 5/13/14, at 9:03 a.m. LPN-E verified R89 should not have been restrained at the table while supervised during the meal. The facility's Restrictive Device Management Policy dated as reviewed 5/2013, identified residents should be assessed for the need for a restrictive device during the admission process and identified restrictive devices such as a lap buddy and non-releasing seat belt. The policy did not identify other potential restrictive devices, such as the practice of locking a resident's W/C brakes, seating a resident up against a table or denying access to parts of the resident's body. The policy identified the "least restrictive" device should be used and identified a care plan should be developed by the interdisciplinary team to address the device. The policy indicated the DON or designee was responsible for ensuring residents were assessed for restrictive devices and for ensuring the device was checked each	{F 221}

{F 223}	Continued From page 15 diagnoses which included dementia and depressive disorder. A copy of an Incident/Accident Report dated 5/5/14, was provided on 5/8/14. The Incident/Accident Report indicated R34 had reported R36 had pushed her into a patio chair and R34 had become stuck when the patio chair fell over. It was noted the incident had occurred on 5/4/14, at night with no exact time. R36 was noted to have denied the incident; the police were called and spoke with R34. On 5/7/14, at 3:10 p.m. a copy of the facility investigation was requested. The Incident/Accident Report lacked any additional investigation into the incident. A Progress Note dated 5/9/14, indicated R34 reported she did not like R36 because "he is an old drunk." The note indicated R34 had agreed to stay away from R36 and that R34 had stated she was used to handling old drunks, and had showed staff an old scar she reported was from when her late husband broke her leg. When interviewed on 5/7/14, at 2:41 p.m. R34 stated R36 called her names "all the time." When asked how being called names made her feel, R34 stated she had filed a police report because R36 had "assaulted her" two nights ago. When asked what she meant by assaulted, R34 stated R36 waited until nobody was around and then pushed her. R34 reported the director of operations helped her file a police report. Review of the medical records for R34 and R36, lacked documentation regarding the incident which was allegedly reported on 5/5/14, and lacked indication of how R34 would be protected from R36.	{F 223}

When interviewed on 5/7/14, at 3:10 p.m. the director of operations reported he was aware of the incident which had occurred during the evening of 5/5/14, and confirmed he'd helped R34 call the police. During the interview, the administrator stated he was aware of the incident and that it had been reported to him on 5/6/14. The administrator reported R34 and R36 "spar all the time."

Upon interview on 5/8/14, at 11:36 a.m. the director of nursing (DON) reported he had received the Incident/Accident Report on 5/8/14. The DON stated he was not sure whether the incident was reportable because it had occurred on 5/5/14, and it was a "resident to resident altercation."

The director of operations was interviewed on 5/12/14, at 9:20 a.m. and stated R34 was very upset about the incident from 5/5/14, and had wanted the police called because it was not the first time, and that R34 had felt assaulted and wanted to press charges.

Upon interview on 5/12/14, at 9:24 a.m. the administrator stated the incident on 5/5/14, had been reported to the state agency and that he would provide documentation regarding the report made.

R34 was interviewed on 5/12/14, at 1:31 p.m., R34 stated R36 was abusive to her every day but that she'd heard he had gotten sent to another nursing home. R34 stated she felt what R36 was doing to her was both verbal and physical abuse.

When interviewed on 5/12/14, at 1:52 p.m. the administrator and consultant administrator

reported R34 and R36 have had an ongoing fight going on. The administrator stated R34 and R36 allege physical things and then change their stories. The consultant administrator stated that although the police had been called regarding the incident on 5/5/14, R36 had denied it happened and R34 had no visible injuries noted. The administrator stated when allegations of abuse are made, an incident report was to be filled out and a supervisor consulted to determine whether a report was needed. The administrator said the residents would be separated, an assessment would be made, the incident would be reported to the Common Entry Point (CEP) if appropriate, would be presented at their stand-up meeting the next day, and an investigation would be started. The administrator stated incidents were reported to the administrator, DON or CLSW but verified, "that system has not always been working." The administrator stated the incident form 5/5/14, had not been reported to the State Agency (SA) or to the CEP and acknowledged things needed to be reported right away and then investigated.

Minneapolis Police Department officer (MPD)-E was interviewed on 5/12/14, at 3:38 p.m. and confirmed the police department had come to the facility regarding the incident between R34 and R36 on 5/5/14. MPD-E stated the facility was aware the residents called each other names and stated it was a facility problem.

The facility Prohibition of Abuse, Neglect, Mistreatment, and Misappropriation of Resident Property policy dated May 2012, indicated staff must not permit "anyone" to engage in verbal or physical abuse. The policy indicated the facility would implement policies and procedures to ensure that residents are not subjected to abuse

supervision to residents who had a known history of drug and alcohol use resulting in medical treatment, including hospitalization, for 2 of 11 residents (R37, R129) reviewed. In addition, the facility failed to implement adequate interventions to prevent elopements for 1 of 3 residents (R116) who eloped from the facility with a WanderGuard (a system to alert staff when a resident leaves the facility) in place. This lack of supervision caused an immediate jeopardy situation for R37, R129 and R116. The IJ was not removed by exit of the 5/13/14 survey.

Findings include:

The following deficiency was cited during a revisit conducted on 5/13/14, and was the basis for an IJ to resident's health and safety.

On 5/9/14, the facility had been informed of serious and immediate safety of the residents related to lack of adequate supervision for alleged drug and alcohol use and elopement. Although, the facility was aware of the serious implications on 5/9/14, the facility did not identify and implement interventions to protect the residents from potential harm. On 5/10/14 and 5/11/14, two residents were hospitalized for drug and alcohol abuse. In addition, on 5/11/14, one resident had eloped from the facility three times with a WanderGuard on and no staff were present.

R37's Admission Record dated 1/14/14, indicated R37 was admitted to the facility on 9/19/13, with diagnoses which included altered mental status, and personal history of alcoholism. According to documented progress notes, R37 had been found with ETOH/vodka on 2/21/14, 2/22/14, 2/27/14,

{F 224}	Continued From page 20 3/2/14, 4/13/14, 4/23/14, 4/24/14, 4/25/14, 5/3/14, 5/5/14, 5/6/14, 5/7/14, 5/9/14 and 5/10/14. The record also indicated R37 had required hospitalizations related to the use of alcohol and or drugs on 2/22/14, 4/23/14, and 5/10/14. During observations of R37 the following was observed: -On 5/5/14, at 2:53 p.m. R37 was observed approaching a white minivan parked in front of the facility. - On 5/6/14, at 1:30 p.m. R37 was observed staggering down the hallway with the health unit coordinator (HUC) and in a loud voice stated he was "crazy". - On 5/6/14, 2:02 p.m. R37 went outside without shoes on. Two staff stopped him at the nursing station and sent him back to his room for shoes. R37 left his room and went directly outside without shoes on again, walked to the smoking patio and returned to the facility. - On 5/7/14, at 8:18 a.m. R37 was observed standing next to R117 on the smoking patio with his wallet out. Another resident (R1) arrived and R37 handed his wallet to her. Surveyor was unable to see whether R1 took anything from the wallet before she handed it back to R37. R37 was observed to lean close to R1 and speak to her and gave her his wallet back. At 8:24 a.m. R1 put R37's wallet back in his left rear pant pocket. - On 5/8/14, at 11:48 a.m. R37 was observed in bed with his back to the door. R37 rolled over and looked at surveyor and rolled back towards the wall. R37 stated he did not want to talk now and would talk in an hour or two. - On 5/8/14, at 3:46 p.m. an attempt was made to interview R37 and he refused. - On 5/9/14, at 7:23 a.m. R37 was observed coming out of his room, stated he did not feel	{F 224}

good and was going to see if there was any coffee. At 7:28 a.m. R37 was observed coming from the West hallway. R37 was then observed to push another resident back down the West hallway and was observed outside room 186 R9. There was no staff with R37 when he was observed. When R37 returned to the nursing station, he told the HUC he had gotten cigarettes from R9. The HUC asked R37 if he was alone and R37 responded that he was and she asked him where his partner was. Nursing assistant (NA)-L approached R37 and stated she was with him today. NA-L verified she was assigned to provide the 1:1 for R37.
- On 5/10/14, at 1:07 p.m. R37 was observed being taken out of the facility to an ambulance.

The Nutritional Status Care Area Assessments (CAAs) dated 9/26/13, indicated R37 was at risk for impaired nutritional status due to chronic ETOH abuse and cirrhosis. Review of the Cognitive Loss/Dementia, Mood State, Behavioral Symptoms and Psychotropic Drug Use CAAs dated 10/7/13, revealed a lack of a summary regarding the triggered areas.

The Progress Notes were reviewed and the following was noted:
- On 5/2/14, R37 removed the WanderGuard (departure alert system) and refused a new one to be placed.
- On 5/3/14, R37 was walking in the hallway "wobbling" and requested staff give him a shower at 3:00 a.m. R37 was unable to maintain his balance and appeared "intoxicated." Two almost empty bottles of vodka were found in his room.
- On 5/5/14, at 3:53 p.m. R37 had exhibited signs of intoxication with an unsteady/staggering gait, slurred speech, odor of alcohol and unkempt

appearance. R37 was noted to have continually gone outside, stated he had called a limousine and was going to Las Vegas.
- On 5/5/14, at 4:56 p.m. R37 had slurred speech, smelled of ETOH and had a staggering gait.
- On 5/5/14, at 10:25 p.m. R37 was "intoxicated" and was found with an almost empty bottle of vodka.
- On 5/6/14, a notation had been made indicating it was a late entry for 5/5/14, at 6:00 p.m., the note indicated R37 was noted walking outside towards the back of the building. R37 was noted to be walking alone with a staggering gait. When approached by staff, R37 stated he was going to Las Vegas. No odor of ETOH was noted and when asked what he had been doing to become so impaired, R37 reported he had gotten cocaine and heroin from another resident and confirmed he had been injecting the drugs. Several scattered purple bruises were noted on his forearms. At 1:55 a.m. indicated R37 reported his heart was thumping out of his chest and was found to have a blood pressure of 168 /118 with a pulse of 118. At 4:37 a.m. indicated R37 exited his room without clothing and had a strong odor of ETOH on his breath. Four empty bottles and one unopened bottle of ETOH were found in R37's room and were removed by staff. Also noted R37 started having tremors and palpitations with increased pulse and blood pressure due to ETOH withdrawal and demanded medications.
- On 5/7/14, at 12:04 p.m. indicated R37 was exhibiting signs and symptoms of intoxication as evidenced by odor of ETOH, unsteady/slow/staggering gait, slurred speech, confusion and unkempt appearance. A pattern of missed pain clinic appointments due to intoxication was noted and indicated further

appointments would not be made due to ongoing intoxication and inability to follow through with appointments. In addition, R37 had a full bottle of vodka and refused to give the bottle to staff. The note indicated the administrator directed if R37 was unwilling to willingly give staff the ETOH bottle, it was ok for the resident to keep the ETOH and if he became drunk or disruptive to call the police and have him taken to detox.
- On 5/8/14, at 3:42 p.m. indicated R37 was placed on one to one (1:1) [to be within arm's length at all times] observation related to incidences of getting intoxicated.
- On 5/9/14, indicated R37 "was clearly intoxicated." An empty pint bottle of vodka was found in his room and was noted as the third empty pint bottle taken from R37's room in a 48 hour span of time.
- On 5/10/14, indicated R37 was observed giving his credit card to R117 on 5/9/14. A second note indicated R37 returned from leave of absence (LOA) accompanied by a friend of another resident (R1). R37 was observed to be shaky and verbalized he was unsteady on his feet. R37 was noted to have shakiness, profuse sweating, and sluggish pupils. R37 was noted to have a blood pressure of 178/130 and a pulse of 120s to 140s.
- On 5/11/14, indicated R37 had a drug screen positive for methadone at the hospital. R37 did not have a prescription for methadone.

The Physician's Orders and Nurse Practitioners (NP) Orders were reviewed and the following was noted:
- On 1/8/14, included a diagnosis of ETOH abuse noted to have also occurred in the facility.
- On 2/5/14, indicated R37 recently had a bottle of ETOH hidden in his pillow case and was noted to smell of ETOH.

{F 224}	Continued From page 24 - On 2/28/14, directed to discharge R37 to another facility (that allowed drinking). - On 3/5/14, directed "do not call on-call MD [physician] or NP after hours if resident is intoxicated unless he is medically compromised. Allow resident to go to bed [and] sleep." - On 4/9/14, indicated R37 was hospitalized from 4/1/14 from 4/8/14, with respiratory distress and pneumonia with pleural effusions requiring chest tube placement, treated for sepsis and required thoracentesis. A NP note dated 4/9/14, indicated R37 required ongoing Kristalose and Mag-ox for chronic cirrhosis. - On 4/10/14, included diagnoses of chemical dependency, hepatic cirrhosis, and chronic pain. - On 4/24/14, included "place wander guard [sic] for res. [resident] safety" and "pursue guardianship." A second order dated 4/24/14, indicated NP was aware of R37's ETOH, to encourage R37 not to use and if R37 appeared intoxicated it was ok to administer all medications as ordered. - On 5/6/14, directed to recheck R37's blood pressure in one hour, call NP if diastolic blood pressure was greater than 100, give Ativan 0.5 milligrams (mg) orally every six hours as needed times three days for withdrawal symptoms (tremors, shaking, and increased heart rate) and a urine toxicology screen. - On 5/7/14, directed no LOA-supervised or other. Also, the NP included an order for a WanderGuard to check placement every shift for elopement even though R37 had cut off the WanderGuard on 5/2/14, and refused to have a new one placed. A Clinical Summary dated 2/3/14, indicated "refer to chemical dependency counselor and pain psychologist." A prescription dated 2/3/14,	{F 224}

{F 224}	Continued From page 25 ordered a behavioral health evaluation for diagnostic evaluation and treatment recommendations for R37. A Physician Visit/Progress Note written by a licensed drug and alcohol counselor (LADC) dated 2/13/14, indicated R37 had been referred for assessment of behavioral health, chemical dependency and pain, and included an order/comment of "strongly recommend a full psychiatric assessment" within 60 days to evaluate medications and therapy. The medical record lacked evidence of the psychiatric assessment having been completed. R37's care plan was reviewed and noted the following: - The vulnerable adult care plan revised on 3/5/14, indicated R37 may leave to go to medical appointments without supervision but was not safe to go on other unsupervised LOAs. - The depression care plan dated 3/11/14, included ETOH abuse and directed to arrange psych services as needed. - A behavioral symptoms care plan revised on 3/16/14, indicated ETOH consumption and concealing ETOH in room with a goal to have fewer episodes of ETOH abuse per week. The interventions included; encourage attending Alcoholics Anonymous (AA) or other substance abuse support programs, assisting with arrangements as needed, may go to medical/dental appointments unsupervised and no other unsupervised LOA. - A risk for elopement related to ETOH abuse and psychoses care plan revised 3/16/14, noted a history of returning to facility after unsupervised LOA displaying signs of ETOH consumption and/or with a supply of ETOH. The goal included	{F 224}

R37 would not to leave facility unattended unless a medical appointment and R37's safety will be maintained. The interventions indicated R37 cut off the WanderGuard and refused to have another one placed and was placed on 15 minute checks. Check room if suspected ETOH.
- A Mood/Behavior care plan initiated on 4/23/14, indicated R37 had a history of ETOH abuse and actively drank at the facility. The care plan noted R37 was sent to detox on 4/23/14, due to being very intoxicated. The goal indicated R37 would like to stop drinking ETOH with an intervention to check room daily for ETOH and check R37 for signs of intoxication.
- An at risk for adverse reaction from medications related to ETOH care plan dated 4/25/14, indicated NP was aware of R37's ETOH use, nursing staff to encourage to restrain from using ETOH and if R37 appeared intoxicated it was ok to administer medications. Another intervention dated 5/8/14, included 1:1 supervision due to ETOH abuse and intoxication.

A Vulnerable Adult Assessment dated 3/16/14, indicated R37 had both past and recent substance abuse, was not safe for unsupervised LOA except to appointments and had significant ETOH use when out on unsupervised LOA.

The quarterly Minimum Data Set (MDS) dated 3/18/14, indicated R37's cognitive skills for daily decision making was independent with consistent/reasonable decisions.

A Resident Refusal of Medical Treatment Form dated 5/5/14, indicated R37 was "wander guarded [sic]" to the facility for resident safety related to history of ETOH abuse, staggering gait and slurred speech. With the risks of refusal

{F 224}	Continued From page 27 noted as facility wouldn't be aware if R37 left with potential for fall risk and injury off facility grounds with no one to provide aid. A letter dated 5/10/14, indicated the resident had received a first offense of the facility's smoking policy as R37 reported to staff he had gotten cigarettes from R9. On 5/8/14, at 11:51 a.m. licensed practical nurse (LPN)-B stated she was aware R37 had a doctor's order and can drink as long as there are no behaviors and if behaviors occur she can call detox. LPN- B stated she did not know where R37 had obtained the ETOH from. The safety monitor, NA-M was interviewed on 5/8/14, at 11:55 a.m. and stated he has not seen R37 exchange money for ETOH, and stated he has heard about exchanges but could not remember who he'd heard about it from. The HUC was interviewed on 5/8/14, at 12:15 p.m. and stated "it's a nightmare; [R37] is drunk every day." She stated she had her suspicions about where the ETOH was coming from but when she asked R37 he refused to tell her. The HUC said R37 had told her he had given his credit card to R117 to buy things for him. The HUC stated R37 was drunk every day when she left and was drunk when she came in on 5/8/14. She reported that on 5/5/14, or 5/6/14, she had observed R37 in the parking lot, and had been told there was nothing they could do about it by the facility administrator. She said she'd requested assistance from the operations director to get R37 back in the building. The HUC reported she had requested that the safety monitor put R37 on every 15 minute checks but	{F 224}

{F 224}	Continued From page 28	{F 224}		

knew that was not enough. She stated other residents were on 1:1 for drug use and wanted to know what the facility was going to do to keep R37 safe. The HUC stated "we're not doing [R37] any justice" and "it's a shitty plan to keep people on 1:1 forever."

On 5/10/14, at 1:30 p.m. the administrator stated R37 had been taken to the hospital for delirium tremens (DTs-a severe form of ETOH withdrawal that involves sudden and severe mental or nervous system changes).

On 5/12/14, at 8:59 a.m. registered nurse (RN)-B and licensed practical nurse (LPN)-A stated R37 had gone to the bank with a friend on 5/10/14, and were not sure if the 1:1 had gone to the bank or not and would have to check.

The DON was interviewed on 5/12/14, at 9:05 a.m. and stated a "guy named [friend-A]" who is a friend of R1 went with R37 to the bank. The DON stated both the administrator and the consultant administrator were aware that friend-A was a friend of R1. The DON stated the 1:1 had refused to go to the bank with R37 and that friend-A had signed R37 out. The DON said the consultant administrator had been going to go with R37 and friend-A to the bank until it was decided the facility was not comfortable with her going with to the bank either. The DON stated he had reminded R37 he could not go because he had orders for no LOA and the administrator, consultant administrator and the social worker decided R37 could go anyway. The DON stated he had no idea where R37 had gotten methadone from.

When interviewed on 5/12/14, at 1:35 p.m. contracted licensed social worker (CLSW)-A

stated during a room search a quart bottle of ETOH and three plastic containers with the labels removed, which nursing indicated were methadone containers, had been found in R37's room.

When interviewed on 5/12/14, at 1:52 p.m. the administrator stated he and CLSW-A were involved in R37's LOA. The administrator stated CLSW-A was under the impression R37 was allowed to go on LOA and that R37 had returned with a card from Walgreens so they knew he had not followed his agreement to only go to the bank. The administrator stated friend-A would not be able to take R37 on LOA again. The administrator stated he was not aware R37 had orders for no LOAs and he believed CLSW-A had not checked the chart. The administrator stated he was also not aware of friend-A's relationship with R1 and stated the DON had not told him about the order for no LOA and friend-A's relationship with R1.

Upon interview on 5/13/14, at 8:09 a.m. CLSW-A stated on 5/10/14, prior to R37 having left on LOA, she was told by nursing (she could not remember who) that R37 could leave the facility with supervision. She reported she made it clear to friend-A that R37 could only go to the bank and nowhere else. She stated she told friend-A that R37 would try and talk him into going to the liquor store and that she'd told friend-A that R37 could not go there. CLSW-A said friend-A had reassured her he had been sober for ten years and would never take R37 to a liquor store. The CLSW-A stated after R37 left, nursing (did not remember who) told her R37 had orders for no LOA and had informed her that friend-A was R1's drug dealer. CLSW-A stated it would have been nice to know the information before she had

allowed R37 to go on a LOA. She stated she had not looked at R37's chart because she trusted nursing knew the correct information. She also stated R37 had been keeping ETOH under the edge of his mattress and she could not understand why nursing did not find the ETOH when they made the bed.

When interviewed on 5/13/14, at 2:20 p.m. the administrator was asked about the discrepancy between what the DON reported had happened on 5/10/14, and what the administrator stated had happened and he verified he was not aware R37 had an order for no LOAs and friend-A's relationship with R1 prior to R37 being allowed to leave on LOA.

R129 was identified by the facility to have a history of drug seeking and ETOH dependency. Although the facility had determined R129 required a 1:1 staff member since at least 3/18/14, according to a Vulnerable Adult (VA) assessment, the appropriate supervision was not implemented and/or effective.

According to review of the progress notes in R129's record, on 5/3/14, R129 had reported to the facility that she had obtained and consumed cocaine. The documentation indicated R129 had a staff assigned as a 1:1 at the time of the incident.
An Incident/Accident Report dated 5/3/14, at 11:00 p.m. indicated R129 "told the nurse that she took cocaine earlier during the shift." The note identified R129 to be "very sweaty, weak and tired" and "she looked very sleepy." The resident's pupils were "large and nonreactive to

{F 224}	Continued From page 31	{F 224}		

light." The note indicated the nurse asked R129 what she had taken and indicated R129 then "confessed" to having taken cocaine. The report documentation indicated R129 had been sent to the emergency room (ER) and included, "She said, 'I knowingly took cocaine'.. Resident has been sent to ER. She will continue to be on 1:1 when she returns to the nursing home." The report identified R129 had a history of drug use, "resident is on a 1:1...remains on a 1:1," and "Hx [history] drug seeking, receiving drugs from others."

A North Memorial Medical Center (NMMC) Emergency Department (ER/ED) note dated 5/3/14, identified R129 had reported she'd taken cocaine at the nursing home. The ER note indicated R129 had taken the cocaine to "help with the pain" in her abdomen. "Patient [R129] is triaged directly back to ED." The Clinician History of Present Illness section of the form identified R129 had reported to hospital staff she had snorted cocaine "5 hours ago."
On 5/11/14, at 4:00 a.m. the progress notes indicated R129 had obtained and consumed a life threatening amount of ETOH, causing her to require hospitalization in an intensive care unit (ICU) with subsequent intubation (mechanical ventilator assisted breathing) as a result of a blood ETOH level of 0.323. (According to Minnesota Statute 169A.20, 0.08 is considered impaired for driving). A 1:1 staff was supposed to have been in place at the time of the incident.

The resident's record included a note documented by the facility's HUC on 5/11/14, at 10:09 a.m. which indicated NMMC had called the facility "requesting" R129's medication administration records (MARs). The note

indicated the registered nurse (RN) from the hospital had notified the HUC that R129 had been admitted to the ICU, and had been intubated "due to acute alcohol intoxication." The note indicated R129's toxicology screen was "negative for drugs but positive for alcohol with a level of 0.323."

The record also included a note documented by the director of nursing (DON) on 5/11/14, at 10:55 a.m. The DON's note recapitulated R129 had been sent to the hospital, identified the time of transport as "around 4 a.m." on the night shift, and identified R129 had been sent in "for intoxication." The DON's note indicated R129 had "become weak" and needed to be lowered to the floor." The note indicated two licensed practical nurses (LPNs) were contacted and the nursing assistant (NA) staff assigned to the 1:1 was called. The note indicated the NA assigned to R129 "reported that resident has been in and out of [R14's room number] but that she had not noticed any exchange of alcohol. She also reported that resident [R14] was upset because the 1:1 has to be in his room too while resident [R129] is visiting." In addition, the DON's documentation indicated R14 had denied giving or knowing how R129 had obtained the ETOH, and documented R14 had "mentioned that resident had alcohol overnight."

An additional progress note, dated 5/11/14, at 2:49 p.m. had been written by the DON indicating NMMC had been contacted to request updates on R129's status. The note indicated, "I also requested to have the resident undergo a chemical dependency assessment to ensure that the resident can be transferred to a residential chemical dependency facility as appropriate, considering the resident's recent hospital trip to

{F 224}	Continued From page 33 the hospital for snorting cocaine." Additional record review revealed an admission MDS dated 2/1/14, that indicated R129 had a BIMS score of 15, indicating R129 was cognitively intact. The MDS identified R129 was independent with all ADLs. The MDS identified R129 rejected cares and wandered one to three days during the assessment period. R129's comprehensive assessment analysis (CAA) for mood state dated 2/7/14, identified R129 as having intact cognition, with poor decision making and as having diagnoses of "substance induced psychotic disorder, opiate dependence, and ETOH dependence." The CAA identified further diagnoses of hepatitis C, "Hx [history] of drug ETOH use" and depression. Although the CAAs identified R129 had a history of drug and ETOH dependence, the CAA lacked documentation of interventions to promote sobriety while in the facility, such as but not limited to offering chemical dependency (CD) treatment. A Vulnerable Adult Assessment dated 3/18/14, identified R129 had a history of ETOH abuse and identified R129 had, "Ongoing drug-seeking & over medication with additional Rx [prescriptions]." R129 was identified as being susceptible to abuse "r/t [related to] substance use, varies" and required supervision with LOA from the facility. The assessment identified R129 had behaviors including a history of rummaging through others' belongings and "drug use." The assessment indicated R129 had been placed on 1:1 due to rummaging in other resident rooms. R129's care plan for safety/vulnerability dated 3/25/14, identified R129 was able to make her needs known, but was vulnerable due to her	{F 224}

{F 224}	Continued From page 34	{F 224}		

history of opioid abuse and drug seeking behavior. A care plan intervention dated as initiated 4/11/14, directed R129 required "1:1 supervision at all times to keep [R129] safe and prevent drug use" Additionally, the care plan directed, "1:1 to discuss CD concerns, encourage [R129] to consider going to a treatment facility." The care plan for mood/behavior dated 3/25/14, identified, "I have a history of opioid abuse and I exhibit drug seeking behavior as evidenced by attempting to see several different MD's to obtain prescription medication. I have a history of walking into other residents rooms and looking thru their personal belongings." Review of the undated Group 7 NA assignment sheets (forms carried by the NA staff for quick reference direction on the resident care plan) indicated R129 was continent, independent with ADLs and required a "1:1" which was spelled out in large bold print.

On 5/12/14, at 10:26 a.m. DON was interviewed about R129 having obtained ETOH and/or drugs while on a 1:1. The DON verified the 1:1 should have been within arm's length of R129 at all times. The DON denied having any knowledge of how R129 had obtained ETOH.

On 5/13/14, at 2:21 p.m. the administrator stated during interview that the facility lacked a system to ensure residents on 1:1 were supervised to ensure they were not neglected. The administrator verified a thorough investigation regarding resident access to illegal drugs while R129 was on 1:1 should have been completed and documented thoroughly. The administrator verified 1:1 staffing was a short term solution and was not a viable long-term intervention to address R129's drug seeking and ETOH use.

{F 224}	Continued From page 35 On 5/12/14, at 2:43 p.m. contracted licensed social worker (CLSW)-A stated, "I cannot imagine how a resident who was on 1:1 would get that much alcohol in her system and when I got here on Sunday I came to the office to open the computer to see what happened and guess what, there was no nursing notes. I went outside to the desk and told the administrator and director of nursing to get the nurse in to document and have the 1:1 fired. There are so many people here than I have seen on 1:1. For me 1:1 means the person needs to be somewhere else not at the nursing home." The Special Staffing - One to One Assignment policy dated as reviewed 5/2013, indicate 1:1 staffing may be assigned "under special circumstances," must be prior authorized by the Director of Clinical Services (DCS) and "One to One staffing assignments are not permanent but rather in place based on assessed need until appropriate permanent alternative arrangements can be made." The reasons identified for the 1:1 staffing included threat of suicide, altered mentation that may "dislodge treatment lines and devices," escalating exit seeking behavior, altered cognition in an agitated state that "is not easily redirected" and "does not respect boundaries of other residents." The procedure directed to assess the resident, DON and administrator to agree 1:1 was necessary and consult DCS; instruct staff assigned to 1:1 the purpose of assignment, and directed to keep resident at "arm's length at all times." The procedure indicated if resident was not suicidal, privacy with toileting could be provided. The procedure directed to document the 1:1 assignment in the clinical record and revise the care plan.	{F 224}

{F 224}	Continued From page 37 policy also included "Neglect means a failure to provide a vulnerable adult with necessary food, clothing, shelter, health care, or supervision." Appendix A of the policy included examples of neglect including: "Failure of a caregiver to provide a resident with (or the absence or likelihood of absence of) care or services (e.g. food, clothing, shelter, health care or supervision) which are reasonable and necessary to obtain or maintain the vulnerable adult's physical or mental health or safety." According to the record, R116 eloped from the facility on 5/11/14, at 9:30 a.m., 11:30 a.m. and 11:52 a.m. while wearing a WanderGuard device which had been implemented to prevent the resident's elopement. Record review indicated R116 had been admitted to the facility on 1/20/14, with diagnoses of lung cancer with metastasis (cancer moving from one body organ to another) to the liver and the brain, metabolic encephalopathy (temporary or permanent damage to the brain that occurs when the liver cannot clear the toxins from the body), confusion and depression. The record also indicated R116 had Hospice services initiated on 1/21/14. On 4/15/14, at 10:49 p.m. a nursing progress note indicated, "Pt [patient] is declining. He is very weak and needs a lot of assistance." A progress note dated 5/5/14, indicated R116 had been outside with his son and the resident had	{F 224}

{F 224}	Continued From page 38	{F 224}		

experienced a fall. R116's son was present at fall. Hospice was notified of fall and a new wheelchair (W/C) was ordered for resident. Staff had also placed a WanderGuard on the resident's chair to alert staff when the resident wanted to go outside to maintain resident's safety. "Resident is allowed to go outside although staff needs to be alerted. Son is aware and in agreement with interventions. Nursing is to continue to monitor."

Additionally, a draft progress note dated 5/5/14, at 10:47 p.m. indicated R116 had increased confusion. "He requested going the bank to complete his transaction that he began earlier. He was leaning down to the floor to pick up of stuff which was apparently not there (visual hallucination). He was ambulating around getting out of w/c. Towards the end of shift he was on one to one rotation to prevent him from falling."

A progress note dated 5/6/14, at 2:55 p.m. indicated R116 continued to sit at nursing station with staff due to attempts to self-transfer and unsteady gait.

R116 was observed on 5/11/14, at 9:30 a.m. to be on the sidewalk west of the facility. The health unit coordinator (HUC) was bringing R116 back into the building. The HUC stated she "had found him as she was driving into work." The HUC stated R116 had a WanderGuard on and she was surprised to find him walking outside since he was not able to walk every day. The HUC said she had called the facility and alerted them to the fact that R116 had left the facility and requested someone bring a wheelchair (w/c) to help bring him back to the facility. NA-R and safety monitor/NA-O had also come outside to look for R116. Two other NA's NA-P and NA-Q came

{F 224}	Continued From page 39 outside with a w/c to meet R116 and return him to the facility. On 5/11/14, at 10:38 a.m. a progress note indicated, "At 9:30 a.m. upon arrival to work this writer found R116 outside the facility walking down the sidewalk. When approached he stated 'I am going to visit a friend.' R116 currently has a WanderGuard and due to cognitive impairments is unable to leave the facility unattended. He was verbally resistant to returning to the building but was eventually returned with staff assist of three. Note resident left out a fire exit at the end of the hall. Staff was in route to locate whom ever had exited the building, the DON, administration, and social worker (SW) updated." R116's progress notes from 5/11/14, at 11:52 a.m. included: "Fire exit alarm again sounded at the end of the hallway. Staff immediately responded and found R116 outside. He again stated that he was going to visit a friend. This time he was verbally and physically resistant to returning to the building. Three staff were able to convince him to return in a w/c (wheelchair) due to unsteady/weak gait. DON, SW, and charge nurse notified. Call placed to son who was updated and encouraged to visit and offer support to R116 if able. Son voiced that he understands that this confusion and resistance is likely a direct result of the Cancer. Support provided via phone." Additional Progress Notes dated 5/11/14, at 4:27 p.m. included, "At 0930 AM resident went out the fire exit and was walking down sidewalk. Staff intervened and resident was brought into facility. Resident stated he was going to visit a friend. At 11:30 [a.m.] resident left out another exit. Staff	{F 224}

was with resident and brought resident into facility. Hospice, family and administration were notified. Resident's WanderGuard (departure alert system) was in place and functioning. Resident also placed on 15 minute checks. Hospice updated on increased confusion along with family. Family was here to visit resident."

The facility's HUC was interviewed on 5/12/14, at 10:00 a.m. and at that time the HUC verified R116 had eloped from the facility three times on 5/11/14. The HUC stated R116 had left the building without staff present at 9:30 a.m., 11:30 a.m. and 11:52 a.m.

Although the HUC verified the resident had eloped without staff presence, R116's Progress Notes had indicated staff were with the resident at 11:30 a.m.

On 5/11/14, at 10:07 a.m. the administrator was interviewed and stated the day staff, afternoon staff, and night staff had been educated on the immediate jeopardy for drugs and ETOH and elopement and he could not believe the fact that R116 had gone out the back door, and was able to leave the facility. The administrator stated the investigation so far, was that staff heard the back door open, went and looked but had not seen anyone, so they assumed it was staff. The administrator verified that there was no WanderGuard alarm on the back door.

On 5/12/14, at 11:00 a.m. surveyors tested the key pad coded door which was locked, but noted that staff unlock the door and enter without regard to which residents are nearby.

On 5/13/14, at 1:00 p.m. the consultant

administrator stated the facility had checked the key pad coded door to the access hallway to the back exit, which was functional and also there was a WanderGuard system in place on the back door, which was functional, the facility had tested the doors and were not able to determine how the resident had gotten out of the facility by the back door.

The facility Elopement policy dated 5/12, indicated... If exit seeking behavior is identified the licensed nurse immediately implements interventions to manage exit seeking behaviors. These interventions may include a personal security device such as a WanderGuard, or diversion activities. The interventions are documented on the care plan and the nursing assistance care plan. ...If the resident is not located within 30 minutes, the Administrator or designee notifies the law enforcement officials, the corporate compliance officer and corporate director of clinical services. When the resident returned to the facility a physical assessment would be done, a thorough investigation of the event would be completed by the DON or designee. A factual account of the occurrence would be documented in the medical record, and the care plan would be reviewed and revised. The administrator of designee reports the event to the appropriate state agency (SA).

On 5/7/14, at 10:02 a.m. the ombudsman was interviewed. The ombudsman stated she wanted to be sure the state agency surveyors were aware that resident's of the facility were purchasing ETOH and drugs. The ombudsman reported she believed residents were giving other residents money and credit cards to go out and purchase things for them. She reported a resident with

{F 225}	Continued From page 45 that she took cocaine earlier during the shift." The report described R129 as "very sweaty, weak and tired" and "looked very sleepy." R129's pupils were described as "large and nonreactive to light." The report also indicated the nurse had asked R129 what she'd taken and R129 had "confessed" to having taken cocaine. The form indicated the resident was sent to the emergency room, "She said, 'I knowingly took cocaine...Resident has been sent to ER [emergency room]. She will continue to be on 1:1 [one to one, in arms reach at all times] when she returns to the nursing home." The report identified R129 had a history of drug use, "resident is on a 1:1," "remains on a 1:1," and "Hx [history] drug seeking, receiving drugs from others." The form was signed by the director of nursing (DON) and dated as 5/5/14. The clinical record lacked evidence the administrator and SA were immediately notified, and lacked evidence the incident had been thoroughly investigated. R37: An Incident/Accident Report dated 5/5/14, at 5:00 p.m. indicated R37 had reported "4 staff members were in his room today" and "a female staff person came out of bathroom & grabbed his arms, causing reddish purplish areas on bilateral [upward pointing arrow] extremities." The report indicated R37 had refused vitals, had a reddish/purple mark on the left superior (upper arm) measuring 2.5 cm (centimeters) x 2.0 cm, a mark on the left inferior (lower arm) 5.75 cm x 2.25 cm., a mark on the right superior/forearm, 6 cm x 8 cm, and on the right hand measuring 4 cm x 3 cm. The report indicated the physician had been notified on 5/5/14, at 5:30 p.m. The form also indicated after R37 had reported after he had been grabbed by staff, he had "then told writer that he jumped off roof." {F 225}	Continued From page 46 the form included, "Resident has slurred speech, staggering gait, & smelled of alcohol." The form indicated the "allegations unsubstantiated." "Resident encouraged to tell a nurse if situation happens again right away. Resident appears intoxicated, with an inconsistent story. Reddened areas appear that they have scratches & chaffing on them." Although R37 made an allegation of abuse, the clinical record lacked evidence the administrator or SA had been immediately notified. And although the report identified R37 had changed the story and identified evidence of potential intoxication, the clinical record lacked documented evidence the allegation had been thoroughly investigated. The report identified R37 was potentially intoxicated, however the clinical record lacked evidence of any screening to determine whether R37 had received alcohol (ETOH). R116 had eloped and the facility did not report to the administrator or SA in a timely manner. R116 was observed on 5/11/14, at 9:30 a.m. to be on the sidewalk west of the facility. The health unit coordinator (HUC) was bringing R116 back into the building. The HUC stated she "had found him as she was driving into work." The HUC stated R116 had a WanderGuard on and she was surprised to find him walking outside since he was not able to walk every day. The HUC said she had called the facility and alerted them to the fact that R116 had left the facility and requested someone bring a wheelchair (w/c) to help bring him back to the facility. NA-R and safety monitor/NA-O had also come outside to look for R116. Two other NA's NA-P and NA-Q came outside with a w/c to meet R116 and return him to the facility.	{F 225}

{F 225}	Continued From page 47	{F 225}		

On 5/11/14, at 10:38 a.m. a progress note indicated, "At 9:30 a.m. upon arrival to work this writer found R116 outside the facility walking down the sidewalk. When approached he stated 'I am going to visit a friend.' R116 currently has a WanderGuard and due to cognitive impairments is unable to leave the facility unattended. He was verbally resistant to returning to the building but was eventually returned with staff assist of three. Note resident left out a fire exit at the end of the hall. Staff was in route to locate whom ever had exited the building, the DON, administration, and social worker (SW) updated."

R116's progress notes from 5/11/14, at 11:52 a.m. included: "Fire exit alarm again sounded at the end of the hallway. Staff immediately responded and found R116 outside. He again stated that he was going to visit a friend. This time he was verbally and physically resistant to returning to the building. Three staff were able to convince him to return in a w/c (wheelchair) due to unsteady/weak gait. DON, SW, and charge nurse notified. Call placed to son who was updated and encouraged to visit and offer support to R116 if able. Son voiced that he understands that this confusion and resistance is likely a direct result of the Cancer. Support provided via phone."

Additional Progress Notes dated 5/11/14, at 4:27 p.m. included, "At 0930 AM resident went out the fire exit and was walking down sidewalk. Staff intervened and resident was brought into facility. Resident stated he was going to visit a friend. At 11:30 [a.m.] resident left out another exit. Staff was with resident and brought resident into

{F 225}	Continued From page 48 facility. Hospice, family and administration were notified. Resident's WanderGuard (departure alert system) was in place and functioning. Resident also placed on 15 minute checks. Hospice updated on increased confusion along with family. Family was here to visit resident." The facility's HUC was interviewed on 5/12/14, at 10:00 a.m. and at that time the HUC verified R116 had eloped from the facility three times on 5/11/14. The HUC stated R116 had left the building without staff present at 9:30 a.m., 11:30 a.m. and 11:52 a.m. Although the HUC verified the resident had eloped without staff presence, R116's Progress Notes had indicated staff were with the resident at 11:30 a.m. On 5/12/14, at 10:14 a.m. (more than 24 hours after the first elopement) the DON was interviewed. The DON stated he had not reported R116's elopement because his understanding was that he had 24 hours to report. The DON stated he had wanted to investigate the issue and speak to the administrator, and was still working on the report. The DON verified he was not aware of the Federal regulations which included immediate reporting. The DON verified he was not aware that a resident who exited the building unsupervised while wearing a WanderGuard, without staff knowledge, could constitute elopement and potential neglect of care. On 5/12/14, at approximately 11:30 a.m. a report was made to the Office of Health Facility Complaints (OHFC) regarding the 9:30 a.m. elopement on 5/11/14. No reports were made to the SA for the additional elopements at 11:30	{F 225}

{F 225}	Continued From page 49 a.m. and 11:52 a.m. R41: An Incident/Accident Report for R41 dated 5/1/14, at 3:05 p.m. indicated R41 had returned from a leave of absence and "apparently drove off curb [in a motorized wheelchair]." The report indicated R41 was found lying on the pavement on his right side. R41 was identified to have slurred speech, but identified he was alert and oriented. The report indicated R41 had sustained a laceration on his forehead and had complained of arm pain. The report also indicated 9-1-1 had been called and R41 had been transferred to North Memorial hospital. Documentation on the Incident/Accident report indicated R41 had stated he had been drinking alcohol and his "last drink [was] about 5 min (minutes) ago.'" "Requested order for no unsupervised LOA's [leave of absence] from physician." R41 was identified to not be wearing a seat belt in the wheelchair. The clinical record lacked evidence the administrator and SA were immediately notified of the incident which required medical attention. The clinical record also lacked evidence the incident had been thoroughly investigated. R70: An Incident/Accident Report for R70 dated 4/28/14, at 6:30 a.m. indicated R70's right arm had been pulled on when staff had helped R70 get up from a sitting position. R70 had subsequently complained of pain and an ice pack had been applied. The report indicated no swelling was observed and R70 was able to move the right arm, but had slight pain. The report also included, "Resident hurt self during cares" and indicated occupational therapy orders had been obtained for activities of daily living (ADLs) and pain. The incident lacked identification of potential problems with transfer assistance and did not	{F 225}

indicate whether staff may have been transferring the resident incorrectly or whether the plan of care had been followed in order to rule out neglect of care. The clinical record lacked evidence the administrator and SA were immediately notified of the incident, and lacked evidence the incident had been thoroughly investigated to rule out potential neglect.

R13: A nursing progress note for R13 written by administration on 5/8/14, at 9:04 a.m. included, "Report received that the resident attempted to leave the facility on Tuesday May 6 around 4 p.m. trying to get to her son, resident was found by the receptionist on the sidewalk, redirected back into the facility. Resident has her WanderGuard on. Receptionist [O-C] reported that the she reminded the resident that resident cannot leave the facility unsupervised; receptionist was educated that when residents with WanderGuard would like to get out of the building to smoke, the smoke monitor should be alerted. Son and daughter notified.

On 5/8/14, at 12:44 p.m. the administrator was interviewed and stated he had not been notified of R13's alleged elopement 5/6/14 until Tuesday "the next morning." The administrator stated he was unclear why it had not been reported to him until then.

A SA report form dated 5/8/14 (no time documented on report) included, "Report received that the resident attempted to leave the facility on Tuesday May 6 around 4 p.m. trying to get to her son, resident was found by the receptionist on the sidewalk."

The clinical record lacked evidence R13's

elopement was clearly documented, including date, time, location, and those involved. The clinical record lacked evidence R13 was evaluated for elopement risks after having eloped. The clinical record also lacked evidence the administrator or SA had been immediately informed of the incident, or that the elopement was thoroughly investigated, including interview with staff present at the time of the elopement.

R14: A Minnesota Department of Health OHFC (office of health facility complaints) report form dated 5/4/14, identified R129 had "handed popcorn [a slang name for a drug identified also as weed] that is wrapped in tissue paper to R14." R14 was asked to hand it back but refused. R14 was observed to put something in his mouth and swallowed. The report indicated, "Suspected that the item is not anything that is edible." The physician was notified, and R14 was ordered to go to the emergency room (ER), 9-1-1 was called and the police arrived. R14 was taken to North Memorial Hospital. Although the report indicated the SA had been notified, the clinical record lacked evidence the administrator was immediately notified, and the report form lacked documentation of the date, time and location of the incident.

R66: An OHFC report form indicated a report had been submitted regarding R66 on 4/30/14. The report indicated a NA was given a hand written letter from R66 that indicated the resident would not give the NA "$500" unless the NA could prove "that she [the NA] is being stalked [the NA had alleged she was being stalked and had asked R66 for money]." The DON had documented that the nursing assistant (NA) had denied taking or asking for money, but had admitted she was

being stalked and had stated all staff knew it "including the residents." Although this alleged incident of potential financial exploitation had occurred on 4/28/14, it had not been reported to the SA until 4/30/14. In addition, the clinical record lacked evidence the administrator had been immediately notified.

On 5/9/14, at 1:43 p.m. the licensed practical nurse (LPN) manager-E stated the administrator should be immediately notified of all incidents in the facility and stated when the new incident report form was implemented, the new form did not include identification of when the administrator or SA was notified.

On 5/13/14, at 2:21 p.m. the administrator verified he had not been immediately notified of the above incidents and stated the DON was developing a "log" to keep track of when he was notified. The administrator stated he'd thought the SA had been immediately notified.

The facility's policy, Prohibition of Abuse, Neglect, Mistreatment, and Misappropriation of Resident Property dated as reviewed 1/2013, included: "Each resident has the right to be free from mistreatment, neglect, abuse, involuntary seclusion and misappropriation of property. Videll Healthcare, LLC facilities have zero--tolerance for abuse, neglect, mistreatment, and/or misappropriation of resident property. Staff must not permit anyone to engage in verbal, mental, sexual, or physical abuse, neglect, mistreatment, or misappropriation of resident property. The facility will implement policies and procedures to ensure that residents are not subjected to abuse by staff, other residents, volunteers, consultants, family members and others who may have

{F 226}	Continued From page 57	{F 226}		

and tired" and "looked very sleepy." R129's pupils were described as "large and nonreactive to light." The report also indicated the nurse had asked R129 what she'd taken and R129 had "confessed" to having taken cocaine. The form indicated the resident was sent to the emergency room, "She said, 'I knowingly took cocaine...Resident has been sent to ER [emergency room]. She will continue to be on 1:1 [one to one, in arms reach at all times] when she returns to the nursing home." The report identified R129 had a history of drug use, "resident is on a 1:1," "remains on a 1:1," and "Hx [history] drug seeking, receiving drugs from others." The form was signed by the director of nursing (DON) and dated as 5/5/14. The clinical record lacked evidence the administrator and SA were immediately notified, and lacked evidence the incident had been thoroughly investigated.

R13: A nursing progress note for R13 written by administration on 5/8/14, at 9:04 a.m. included, "Report received that the resident attempted to leave the facility on Tuesday May 6 around 4 p.m. trying to get to her son, resident was found by the receptionist on the sidewalk, redirected back into the facility. Resident has her WanderGuard on. Receptionist [O-C] reported that the she reminded the resident that resident cannot leave the facility unsupervised; receptionist was educated that when residents with WanderGuard would like to get out of the building to smoke, the smoke monitor should be alerted. Son and daughter notified.

On 5/8/14, at 12:44 p.m. the administrator was interviewed and stated he had not been notified of R13's alleged elopement 5/6/14 until Tuesday "the next morning." The administrator stated he

{F 226}	Continued From page 58 was unclear why it had not been reported to him until then. A SA report form dated 5/8/14 (no time documented on report) included, "Report received that the resident attempted to leave the facility on Tuesday May 6 around 4 p.m. trying to get to her son, resident was found by the receptionist on the sidewalk." The clinical record lacked evidence R13's elopement was clearly documented, including date, time, location, and those involved. The clinical record lacked evidence R13 was evaluated for elopement risks after having eloped. The clinical record also lacked evidence the administrator or SA had been immediately informed of the incident, or that the elopement was thoroughly investigated, including interview with staff present at the time of the elopement. On 5/9/14, at 1:43 p.m. LPN-E stated the administrator should be immediately notified of all incidents in the facility and stated when the new incident report form was implemented, the form did not identify when the administrator or SA was notified. On 5/12/14, at 10:26 a.m. director of nursing (DON) stated he was not in the facility at the time of R13's elopement and had not been informed until 5/8/14. The DON explained the incident was not reported to the administrator or SA because he was not at the facility. DON was unclear who was assigned to report in his absence. DON confirmed R13 should not have left the facility unescorted and stated residents with a WanderGuard were at risk for elopement and leaving the facility without supervision was a	{F 226}

{F 226}	Continued From page 59	{F 226}		

safety concern. The DON also verified the incident had not been thoroughly investigated.

R41: An Incident/Accident Report for R41 dated 5/1/14, at 3:05 p.m. indicated R41 had returned from a leave of absence and "apparently drove off curb [in a motorized wheelchair]." The report indicated R41 was found lying on the pavement on his right side. R41 was identified to have slurred speech, but identified he was alert and oriented. The report indicated R41 had sustained a laceration on his forehead and had complained of arm pain. The report also indicated 9-1-1 had been called and R41 had been transferred to North Memorial hospital. Documentation on the Incident/Accident report indicated R41 had stated he had been drinking alcohol and his "last drink [was] about 5 min (minutes) ago.'" "Requested order for no unsupervised LOA's [leave of absence] from physician." R41 was identified to not be wearing a seat belt in the wheelchair. The clinical record lacked evidence the administrator and SA were immediately notified of the incident which required medical attention. The clinical record also lacked evidence the incident had been thoroughly investigated.

R70: An Incident/Accident Report for R70 dated 4/28/14, at 6:30 a.m. indicated R70's right arm had been pulled on when staff had helped R70 get up from a sitting position. R70 had subsequently complained of pain and an ice pack had been applied. The report indicated no swelling was observed and R70 was able to move the right arm, but had slight pain. The report also included, "Resident hurt self during cares" and indicated occupational therapy orders had been obtained for activities of daily living (ADLs) and pain. The incident lacked identification of potential

{F 226}	Continued From page 60	{F 226}		

problems with transfer assistance and did not indicate whether staff may have been transferring the resident incorrectly or whether the plan of care had been followed in order to rule out neglect of care. The clinical record lacked evidence the administrator and SA were immediately notified of the incident, and lacked evidence the incident had been thoroughly investigated to rule out potential neglect.

R14: A Minnesota Department of Health OHFC (office of health facility complaints) report form dated 5/4/14, identified R129 had "handed popcorn [a slang name for a drug identified also as weed] that is wrapped in tissue paper to R14." R14 was asked to hand it back but refused. R14 was observed to put something in his mouth and swallowed. The report indicated, "Suspected that the item is not anything that is edible." The physician was notified, and R14 was ordered to go to the emergency room (ER), 9-1-1 was called and the police arrived. R14 was taken to North Memorial Hospital. Although the report indicated the SA had been notified, the clinical record lacked evidence the administrator was immediately notified, and the report form lacked documentation of the date, time and location of the incident.

R66: An OHFC report form indicated a report had been submitted regarding R66 on 4/30/14. The report indicated a NA was given a hand written letter from R66 that indicated the resident would not give the NA "$500" unless the NA could prove "that she [the NA] is being stalked [the NA had alleged she was being stalked and had asked R66 for money]." The DON had documented that the nursing assistant (NA) had denied taking or asking for money, but had admitted she was

{F 226}	Continued From page 61	{F 226}		

being stalked and had stated all staff knew it "including the residents." Although this alleged incident of potential financial exploitation had occurred on 4/28/14, it had not been reported to the SA until 4/30/14. In addition, the clinical record lacked evidence the administrator had been immediately notified.

On 5/9/14, at 1:43 p.m. the licensed practical nurse (LPN) manager-E stated the administrator should be immediately notified of all incidents in the facility and stated when the new incident report form was implemented, the new form did not include identification of when the administrator or SA was notified.

R116 had eloped and the facility did not report to the administrator or SA in a timely manner.

R116 was observed on 5/11/14, at 9:30 a.m. to be on the sidewalk west of the facility. The health unit coordinator (HUC) was bringing R116 back into the building. The HUC stated she "had found him as she was driving into work." The HUC stated R116 had a WanderGuard on and she was surprised to find him walking outside since he was not able to walk every day. The HUC said she had called the facility and alerted them to the fact that R116 had left the facility and requested someone bring a wheelchair (w/c) to help bring him back to the facility. NA-R and safety monitor/NA-O had also come outside to look for R116. Two other NA's NA-P and NA-Q came outside with a w/c to meet R116 and return him to the facility.

On 5/11/14, at 10:38 a.m. a progress note indicated, "At 9:30 a.m. upon arrival to work this

{F 226}	Continued From page 62 writer found R116 outside the facility walking down the sidewalk. When approached he stated 'I am going to visit a friend.' R116 currently has a WanderGuard and due to cognitive impairments is unable to leave the facility unattended. He was verbally resistant to returning to the building but was eventually returned with staff assist of three. Note resident left out a fire exit at the end of the hall. Staff was in route to locate whom ever had exited the building, the DON, administration, and social worker (SW) updated." R116's progress notes from 5/11/14, at 11:52 a.m. included: "Fire exit alarm again sounded at the end of the hallway. Staff immediately responded and found R116 outside. He again stated that he was going to visit a friend. This time he was verbally and physically resistant to returning to the building. Three staff were able to convince him to return in a w/c (wheelchair) due to unsteady/weak gait. DON, SW, and charge nurse notified. Call placed to son who was updated and encouraged to visit and offer support to R116 if able. Son voiced that he understands that this confusion and resistance is likely a direct result of the Cancer. Support provided via phone." Additional Progress Notes dated 5/11/14, at 4:27 p.m. included, "At 0930 AM resident went out the fire exit and was walking down sidewalk. Staff intervened and resident was brought into facility. Resident stated he was going to visit a friend. At 11:30 [a.m.] resident left out another exit. Staff was with resident and brought resident into facility. Hospice, family and administration were notified. Resident's WanderGuard (departure alert system) was in place and functioning. Resident also placed on 15 minute checks.	{F 226}

{F 226}	Continued From page 63 Hospice updated on increased confusion along with family. Family was here to visit resident." The facility's HUC was interviewed on 5/12/14, at 10:00 a.m. and at that time the HUC verified R116 had eloped from the facility three times on 5/11/14. The HUC stated R116 had left the building without staff present at 9:30 a.m., 11:30 a.m. and 11:52 a.m. Although the HUC verified the resident had eloped without staff presence, R116's Progress Notes had indicated staff were with the resident at 11:30 a.m. On 5/12/14, at 10:14 a.m. (more than 24 hours after the first elopement) the DON was interviewed. The DON stated he had not reported R116's elopement because his understanding was that he had 24 hours to report. The DON stated he had wanted to investigate the issue and speak to the administrator, and was still working on the report. The DON verified he was not aware of the Federal regulations which included immediate reporting. The DON verified he was not aware that a resident who exited the building unsupervised while wearing a WanderGuard, without staff knowledge, could constitute elopement and potential neglect of care. On 5/12/14, at approximately 11:30 a.m. a report was made to the Office of Health Facility Complaints (OHFC) regarding the 9:30 a.m. elopement on 5/11/14. No reports were made to the SA for the additional elopements at 11:30 a.m. and 11:52 a.m. On 5/13/14, at 2:21 p.m. the administrator verified he had not been immediately notified of the	{F 226}

above incidents and stated the DON was developing a "log" to keep track of when he was notified. The administrator stated he'd thought the SA had been immediately notified.

EMPLOYEE SCREENING:
On 5/12/14, at 10:00 a.m. the employee files were reviewed and the following was observed:

Licensure verification:
Licensed practical nurse (LPN)-A's employee file folder lacked verification of the LPN's license. The administrator verified at 12:45 p.m. there had been no proof of nursing licensure obtained for LPN-A from the Minnesota Board of Nursing.

Registered nurse (RN)-C's employee personnel file indicated RN-c had been hired on 4/8/14, and that a back ground study request had been submitted on 4/8/14, however there were no results yet. In addition, no licensure verification completed, only a copy of a license with expiration of 10/4/13.

Background study:
RN-D's file indicated RN-D had been hired 4/16/14, and that a background Study Request had been submitted on 4/14/14. However, the background study incorrectly indicated NA-U's background study information.

Nursing assistant (NA)-U's file was reviewed and was found to include a statement that NA-U had a Minnesota Department of Human Services Background Study (MN DHS BS) form dated 5/25/14, which indicated NA-U "cannot provide Qualified Professional or Personal Care Assistance services in the personal care program under Minnesota Health Care Programs." The

{F 226}	Continued From page 65	{F 226}		

administrator verified that NA-U could not provide care but had been providing care unsupervised, from 4/23/14, through 5/12/14.

NA-U had RN-D's BS in NA-U's employee file. Also, RN-D's BS was in NA-U's employee folder. RN-D's BS indicated that RN-D could not perform cares unsupervised. However, during the survey the administrator obtained the blue BS form which indicated RN-D could perform cares unsupervised.

NA-Q was hired on 3/6/14. The facility received a yellow MN DHS BS on 3/10/14, which indicated NA-Q "cannot provide Qualified Professional or Personal Care Assistance services in the personal care program under Minnesota Health Care Programs." The white BS computer genreated copy request indicated the form was submitted on 3/6/14, and passed as of 3/10/14, however the employee file lacked the information as the facility provided the information during survey. The facility did not have system in place to ensure BS were being monitored for the employees ability to work unsupervised.

Reference checks:
RN-C was hired on 4/8/14, and no reference checks had been completed.

RN-D was hired 4/16/14, and no reference checks, could be located in the employee file.

LPN-A's file lacked a hire date and no reference checks were completed as the facility policy had directed staff to complete.

NA-W hired 4/23/14, had no reference check

{F 226}	Continued From page 66 completed. On 5/12/14, at 12:35 p.m. the administrator stated the human resources (HR) person was in charge of doing license verifications and background checks for new employees. The administrator further stated the HR person had been terminated two weeks ago and no one else had been designated to follow-up on background checks that had been flagged. The administrator acknowledged the facility had not ensured tracking for new employees' license verification and background checks. On 5/13/14, at 8:10 a.m. NA-U verified during interview that she was a NA and had started orientation on 4/23/14. When asked if she worked under supervision, NA-U stated she had received "a couple of days training" and had started working on her own on 4/28/14. On 5/13/14, at 9:00 a.m. LPN-A verified her start date was 4/2/14. LPN-A stated her days were "sporadic" for a few weeks, but stated she had been working full time on her own since 4/16/14.	{F 226}		
{F 250} SS=H	483.15(g)(1) PROVISION OF MEDICALLY RELATED SOCIAL SERVICE The facility must provide medically-related social services to attain or maintain the highest practicable physical, mental, and psychosocial well-being of each resident. {F 250}	Continued From page 67 review, the facility failed to aggressively identify, assess, determine interventions and implement the interventions for medically-related social services, and pursue the provision of these services for residents known to provide and use illegal drugs and alcohol in the facility for 4 of 11 residents (R129, R86, R41, R37) who sustained harm due to lack of social services interventions; for 5 of 11 residents (R14, R56, R117, R62, R9) for alleged substance abuse, and for 2 of 11 residents (R13, R103) who allegedly eloped from the facility. Findings include: Alleged substance abuse: On 5/8/14, at 8:02 a.m. a list of residents allegedly bringing drugs and alcohol (ETOH) into the facility, as well as a list of residents known to use drugs or alcohol in the facility was requested. A list provided by the administrator at 11:00 a.m. included R129, R86, R41, R37, R14, R56, R117, R62 and R9 as alleged substance users. R129 was not provided consistent medically related social services to address ongoing drug seeking behaviors and sustained harm. Although R129 was assigned a one to one (1:1) as of 3/14, the clinical record lacked evidence of social service assessment and interventions. On 5/3/14, R129 reported to facility staff, that she had obtained and consumed cocaine while under 1:1 supervision. On 5/11/14, at 4:00 a.m. R129 had obtained and consumed ETOH while supervised 1:1 by facility staff. This resulted in harm when R129 required hospitalization in an intensive care unit (ICU) where she was intubated (mechanical ventilator assisted breathing) for a blood ETOH level of 0.323.	{F 250}

{F 250}	Continued From page 68	{F 250}		

R129's admission Minimum Data Set (MDS) dated 2/1/14, revealed a Brief Interview of Mental Status (BIMS--a tool to determine cognitive status) score of 15, indicating the resident was cognitively intact. In addition, it was noted R129 was independent with all activities of daily living (ADLs), rejected cares, and wandered 1-3 days during the assessment period. R129's Care Area Assessment (CAA) for mood state dated 2/7/14, identified R129 displayed poor judgment, and had impaired cognition and poor decision making skills. The CAA identified diagnoses including "substance induced psychotic disorder, opiate dependence, and alcohol dependence," as well as hepatitis C, "Hx [history] of drug alcohol use" and depression. Although the history of drug and ETOH dependence was identified, the CAAs lacked documentation of interventions to promote sobriety, such as but not limited to offering chemical dependency (CD) treatment.

The Vulnerable Adult Assessment (VAA) dated 3/18/14, identified R129 had a history of ETOH abuse and "Ongoing drug-seeking & over medication with additional Rx [prescriptions]." R129 was identified as being susceptible to abuse related to substance use and required supervision with leaves of absence (LOAs) from the facility. It was noted R129 had a history of rummaging through others belongings and "drug use," and 1:1 staffing was initiated due to rummaging in other resident rooms.

R129's Smoking Evaluation dated 3/18/14, directed staff to "monitor for ETOH use or over sedation."

A Pain Evaluation and Management Plan dated

5/1/14, identified R129 had daily chronic pain, and a history of pain and seeking drugs. "Resident is on a restricted recipient program [where only one pharmacy may fill narcotic prescriptions to deter drug seeking behavior] due to drug seeking...MD [medical doctor] is aware of drug seeking behaviors and aware pain is not controlled. MD will not order any more pain medications for resident due to her drug seeking behaviors. Resident is on the restricted recipient program due to drug seeking."

An Incident/Accident Report dated 5/3/14, at 11:00 p.m. indicated R129 "told the nurse that she took cocaine earlier during the shift." R129 was described as "very sweaty, weak and tired...she looked very sleepy," and pupils were "large and nonreactive to light." When the nurse asked the resident what she'd taken, she "confessed" to taking cocaine. The report noted, "She said, 'I knowingly took cocaine'...Resident has been sent to ER [emergency room]. She will continue to be on 1:1 when she returns to the nursing home." The resident's history of drug use and receipt of drugs from others was noted, as well as the fact that the resident had current 1:1 staffing. Although the incident occurred on 5/3/14, the form was signed by the director of nursing (DON) on 5/5/14.

An Emergency Department Chart [from the hospital ER] dated 5/3/14, identified R129 reported to have taken cocaine while residing at the facility to "help with the pain" in her abdomen. "Patient [R129] is triaged directly back to ED [emergency department]." The Clinician History of Present Illness section of the form identified R129 reported to hospital staff she snorted cocaine "'5 hours ago.'" Although R129 was identified as

{F 250}	Continued From page 70	{F 250}		

requiring the ER for a potential drug overdose, the Emergency Department Chart did not address the cocaine use, only pain. The laboratory (lab) reports indicated various pertinent lab values were checked, but lacked a toxicity screening for cocaine, drug or alcohol use. R129 was given two doses of Dilaudid (narcotic pain medication) and returned to the facility at 6:00 a.m. with no new orders. The clinical record lacked evidence the administrator, or the designated State agency (SA) were notified of the incident. The clinical record lacked evidence of new interventions to address R129's report of drug use, such as CD treatment. In addition, the clinical record lacked evidence the use of cocaine by R129 was investigated to determine how the drug had been obtained while the resident had 1:1 staff supervision.

A unlabeled typed page insert in the front of R129's paper chart dated 4/15/14, read "If Res [resident] goes to the Hospital for any reason she is to go to St. Joes [sic] Hospital Only per primary care MD and the MN [Minnesota] restricted recipient program...All scripts [prescriptions] no matter where they come from must be approved by [MD's name] or their on call MD."

On 5/7/14, at 10:24 a.m. the a return call was made to the ombudsman who had requested contact. The ombudsman stated she had been informed by a nurse of the facility of "drug use" and "drugs shared with residents" at the facility "a couple days ago." The ombudsman stated rather than call the nurse back, she visited the facility on 5/6/14, and spoke with various residents as well as management staff regarding drug, alcohol and discharge planning concerns. The ombudsman, facility staff, and residents were "suspicious

{F 250}	Continued From page 71	{F 250}		

residents may be giving money or credit cards to another [resident] to go out and purchase things [cigarettes, alcohol and drugs] for them." The ombudsman stated the police had been notified and responded "quite often." Allegedly residents who were chemically dependent were drinking in their rooms and facility staff were conducting room checks each shift and "finding empty alcohol [vodka] bottles" in resident rooms, and residents had been found "intoxicated." The ombudsman specifically reported R129 had 1:1 staffing, yet had "somehow" obtained and consumed an illegal drug (cocaine). Although the facility had employed "three temporary social workers, social services is overwhelmed" due to "no policies and procedures in place."

R129's care plan for safety/vulnerability dated 3/25/14, identified the resident was able to make her needs known, but was vulnerable due to her history of opioid abuse and drug seeking behavior. A care plan intervention dated 4/11/14, directed staff to provide "1:1 supervision at all times to keep [R129] safe and prevent drug use" Additionally, the care plan directed, "1:1 to discuss CD concerns, encourage [R129] to consider going to a treatment facility." The care plan for mood/behavior dated 3/25/14, identified, "I have a history of opioid abuse and I exhibit drug seeking behavior as evidenced by attempting to see several different MD's to obtain prescription medication. I have a history of walking into other residents rooms and looking thru [sic] their personal belongings."

Review of the undated Group 7 nursing assistant (NA) assignment sheet (for quick reference guide providing care-related direction) indicated R129 was independent with ADLs and "1:1" was noted

{F 250}	Continued From page 72 in larger bold print. Pertinent Nursing Progress Notes read as follows: 1) On 3/14/14, at 6:18 p.m. R129 "had an appointment yesterday and was immediately transferred to the hospital...while on the way home [unclear on prior destination] stopped at Cub foods" and picked up a prescription for eight tablets of Norco 5/325 milligrams (mg) (a narcotic and Tylenol pain medication)...failed to alert staff and stated that there were no new orders." The hospital, on call MD and triage nurse were updated on R129's "history of narcotic use." 2) On 3/16/14, at 6:34 a.m. R129 was "caught going through another resident's belonging...opening her purse." The note indicated R129 admitted going in the room but denied taking "any money." 3) On 3/17/14, at 3:34 p.m. "Resident still remains on 1:1 observation." Although the note identified R129 was assigned a 1:1 staff, the record lacked documentation when the 1:1 staffing was initiated. At 10:17 p.m. "called on call [physician]," reported two incontinent episodes, "lower extremities [sic] hurts" and edema (abnormal build up of fluid in the tissues). Was encouraged to "sit and rest the leg" but refused and reported the pain was "unbearable." R129 wanted to be evaluated at the hospital, and "called 911 herself." Although a previous note indicated R129 required 1:1 staffing, it was noted R129 planned to "take care of her own transportation to ER...left the facility" at 10:20 p.m. The note did not indicate if a staff person accompanied R129 to the appointment. 4) On 3/18/14, at 3:56 a.m. R129 returned from the ER at 3:30 a.m. with a "New order. No new concern at this time." At 2:31 a.m. R129 reported	{F 250}

{F 250}	Continued From page 73	{F 250}		

to the business office manager she felt "depressed due to being on a 1:1." The concern was reported to social services and the nurse on duty.
5) On 3/20/14, at 10:08 a.m. the physician R129 identified as her new primary care physician (PCP) was contacted to inform the provider R129 lived in a health care facility, and orders needed to be coordinated with the facility. The PCP was provided an update regarding R129 changing her PCP, trips to the ER and drug seeking behavior. The note further indicated, "Transport informed to bring pt [patient] to/from the clinic and no other stops to include the pharmacy." At 2:45 p.m. R129 "Went for her appointment to her care provider today. At the appointment, resident was given script for Ambien (hypnotic used to promote sleep). "Resident said she filled the prescriptions at the pharmacy but she misplaced the pills. Patient will be monitored for increased sedation." Although the previous note indicated the transportation company was directed not to make any stops during transport, R129 had been brought to the pharmacy. At 3:11 p.m. a note indicated R129 reported she "lost" the Ambien. The note indicated the "escort" assigned to go with R129 to the appointment, reported R129 "went to the pharmacy and filled her script." The escort reported R129 would not allow the staff to "see the script" or the filled prescription. "Per the escort [R129] went to the bathroom. On the ride home [R129] reported that she lost the bottle of pills. Upon return she reported that same story to this writer and requested that staff get a new script." The physician was contacted and verified a prescription had been written and a report the script was lost had been reported by R129. The physician denied taking R129 on as a patient, however, and referred the facility to R129's

current PCP.
6) On 3/28/14, at 11:52 a.m. R129 met with social services and "Also spoke with resident regarding her drug seeking. [R129] admits that she is addicted to pain medication." The note indicated R129 was scheduled to see psychologist and encouraged R129 to discuss her concerns and her "addiction."
7) On 4/4/14, at 7:11 p.m. R129 met with psychologist, as well as the DON and social worker after the appointment. The note indicated R129 "does not like being on 1:1's...informed her she was on 1:1's because of her frequent drug seeking...admits that she has urges to seek medications to manager her pain...denies addiction." Inpatient treatment was discussed such as drug and emotional counseling, which R129 rejected. The note indicated the psychologist agreed with the need for treatment, "However, should resident continue to display behaviors of drug seeking and declines treatment a CD commitment maybe considered to be in her best interest."
8) On 4/7/14, at 10:47 a.m. R129 remained, but requested she be removed from 1:1 supervision, which was noted as required "for going into other resident rooms."
9) On 5/4/14 12:03 a.m. R129 "told the nurse that she took cocaine earlier during this shift." The note recapitulated the data from the incident report dated 5/3/14. "The nurse asked the resident what she had taken and where she got it from or [who] gave it to her. She took the nurse to [R1's room number]. She also report that the package that resident in room [R14's room] swallowed earlier was marijuana." R129 accepted to to the ER for evaluation. "The nurse requested for toxicology screen and a copy should be send [sic] to the nursing home per the administrator

{F 250}	Continued From page 75	{F 250}		

order." Although the note indicated R129 obtained cocaine from another resident and identified R129's involvement with a second resident and a different illegal drug, the clinical record lacked evidence law enforcement was notified,and toxicology screening was obtained. Although R129 had an assigned 1:1, the record lacked evidence as to how the resident obtained and ingested the drugs, the incident was not immediately reported to the administrator and SA, nor was it investigated. In addition, the record lacked evidence R129 had received a CD evaluation or were immediate changes made in the monitoring and supervision provided for the resident's safety. At 7:23 a.m. a corporate nurse documented R129 approached the nurse and "admitted to writer that she took drugs given to her by another resident in this building. She was able to verbalize insight related to why she regretted this choice...remains on 1:1. 1:1 was present during this conversation." The clinical record lacked evidence 1:1 monitoring of R129 was reviewed after being identified to have accessed illegal drugs twice while on 1:1 monitoring.

10) On 5/4/13, at 12:12 p.m. an attempt was made to notify R129's doctor regarding the incident from 5/3/14. The operator at the doctor's office informed writer that they were only accepting on-call emergencies. Staff would notify doctor the morning of 5/5/14. The resident returned from the hospital at 6:00 a.m. with no new orders. Although R129 had two doses of Dilaudid administered at the ER, she immediately requested pain medication upon return to the facility (the note was not closed or signed by the writer).

On 5/5/14, during the initial tour of the facility

NA-K was observed to be sitting in a chair directly outside R129's room. The door was open and R129 was dressed and was lying in bed with her eyes closed. NA-K reported she was assigned as a 1:1 for R129. NA-K stated she needed to remain with R129 and the 1:1 was due to R129 going into "other resident rooms."

The following day at 8:30 a.m. NA-M (1:1 staff) followed R129 down the hallway and out to the smoking patio. R129 retrieved a cigarette from her front pocket, lit the cigarette and replaced the lighter in the side pocket (right). NA-M stood on the side walk outside the designated smoking area with a large cinder landscape block planter between R129 and NA-M. NA-M remained out of arm's length and looking in the opposite direction from R129 and talked with another staff person in the smoking area. R129 stood with other residents and smoked out of direct sight of NA-M. At 8:33 a.m. R129 sat on a bench with another resident on the other side of the smoking patio and out of sight of NA-M. NA-M stood on the edge of the cinder landscape block planter edge and chatted across the smoking area to the same staff person. NA-M was not near enough to R129 to intervene should there have been a concern. At 8:37 a.m. staff spoke to each other and then NA-M turned his back on all smokers (including R129) and spoke to a male who was in a car in the parking lot. NA-M then jumped down and entered the smoking area to speak to the staff directly. NA-M was not within arm's length or direct eye sight of R129. At 8:38 a.m. R129 stood up and walked to the front entrance of the facility. NA-M jumped to catch up with R129 and followed directly behind her into the facility. R129 then pushed the wheelchair of a male resident entering the building and walked rapidly down the

hallway. At 9:34 a.m. R129 pushed R62 in her wheelchair out of the facility and onto the smoking patio. R62 held out a cigarette for R129 ask she pushed the chair, and R129 concealed the cigarette. NA-M followed behind R129 and did not appear to notice or intervene when R129 took the cigarette. NA-M immediately turned his back to R129 once on the smoking patio, applied a surgical mask and talked to the female staff assigned to monitor the smoking patio. Both staff had their backs to R129. At 9:35 a.m. a staff pushed R22 back into the facility and pulled the smoking cart behind her. NA-M remained outside with R129 near the smoking patio watching a van in the parking area. NA-M had his back to R129 and was approximately 14 feet away from R129. Multiple other residents were observed to come and go from the smoking patio. R129 interacted freely with the other residents who were unsupervised. At 9:37 a.m. R117 came out of the facility, lit a cigarette at the front entrance, jumped up onto the cinder landscape block planter with ease, and walked across the top of the planters with a skipping gait. Neither the smoking monitor nor another female staff in the area intervened. R117 was observed to speak briefly with the female smoking monitor, approached R36, pulled out a large wad of cash and exchanged money with R36. R117 then went to R129 and R62. R117 remained with both residents smoking and talking. R129 sat on the edge of the cinder landscape block planter. NA-M was not within arms reach nor eyesight of R129, and was not supervising the resident. NA-M remained with the other female staff, with his back to R129. At 9:40 a.m. R129 stood and pushed R62's wheelchair towards the front entrance of the facility. Although NA-M followed, NA-M did not come into arms reach of R129 until the front door

of the facility. R129 pushed the wheelchair down the hallway with NA-M walking beside R129. At 10:19 a.m. R120 walked out to the designated smoking area. NA-M followed approximately ten feet behind outside, then stood on the sidewalk. NA-M then left the area and returned into the facility. R129 retrieved a cigarette from a pack. Multiple residents were observed to be coming out to smoke. The smoking monitor was on the patio but did not watch R129. R129 sat on planter side and spoke with R14. At 10:23 a.m. NA-M returned to the smoking area from inside and immediately stood on sidewalk on other side of planter approximately 20 feet away from R129. NA-M made no attempt to make eye contact with R129 and was not in arms reach as he spoke with the smoking monitor. At 10:25 a.m. NA-M and R129 went inside with NA-M walking within arms reach of the resident.

On 5/8/14, at 11:22 a.m. R129 was observed lying in bed, NA-E was making the roommate's bed. NA-E verified she was assigned to be the 1:1 with R129. NA-E offered to stand outside the door while R129 was interviewed and the door to the room was closed. R129 stated she was waiting for an apartment and verified she "snorted cocaine" on 5/3/14, which she had reported to facility staff. When asked when this occurred, R129 stated it was "on Saturday" (5/3/14)." When asked where she snorted the the cocaine, R129 replied, "not in the facility...down the block." When asked if she received the cocaine from another resident (as indicated in the clinical record), R129 stated "someone from the street" gave it to her, but denied being able to remember the person's name, description, or gender. R129 said she snorted "about $20 worth." When asked what happened then R129 stated, "They sent me

{F 250}	Continued From page 79	{F 250}		

to the hospital...They accused me of giving it to someone else." R129 explained she was accused of giving R14 cocaine on the same day by the 1:1 assigned to her that day. R129 stated the 1:1's name (NA-G) who was to be with her at all times. She said the reason for the 1:1 was because she was accused of "rummaging" in other residents rooms. R129 reported she had a 1:1 was assigned to be with her "since March." When asked where the 1:1 was when she received the cocaine from the person on the street, R129 shrugged looked up and away and stated, "I don't know. She wasn't with me." R129 said she was "a recovering addict," but denied social services had been provided by facility staff, including assistance to obtain CD treatment. R129 stated she would like to go to outpatient rehabilitation for drug addiction. R129 further added she was "not checked" for cocaine use at the ER, but was given two shots of Dilaudid. R129 explained she "thought" that was going to happen, yet admitted she was "surprised" to have received the narcotic pain medication. Although R129 was relaxed during the interview, she was hesitant to answer some questions and did not make eye contact.

On 5/8/14, at 11:30 p.m. NA-G verified the responsibility of the 1:1 staff was to remain at arms length with R129 at all times.

On 5/8/14, at 11:41 a.m. NA-J verified she worked on R129's unit and stated was unaware of alcohol or drugs were being exchanged on "my shift," but stated was aware of situation "weeks ago" when she came to work and noticed R14 was not in his room. NA stated she asked where he was and a NA "who was [R129's] 1:1" saw R129 go into R14's room and "exchange something." She stated she learned R14 was

{F 250}	Continued From page 80 sent to the hospital for "eating something." Stated had not witnessed any exchanges and stated if she had she would have reported it to the nurse. On 5/8/14, at 11:40 a.m. NA-S reported seeing alcohol bottles in residents' rooms and smelled alcohol on a resident and reported it to a nurse, but was unclear when it had occurred. NA-S "heard rumor" of a resident dealing drugs in the facility, and recalled seeing a resident with marijuana in January or February, and "could smell it." NA-S further stated when she was assigned to be the smoking monitor, she overheard residents talk about it. NA-S believed R117 was a drug dealer, as the resident left the facility "a lot" and went to the gas station. NA-S further stated she believed R117 was talking money from residents to also "buy cigarettes." NA-S stated she was unclear what happened to the resident after she reported the marijuana, but stated the nurse was from an "agency" and told her the resident "could have it." On 5/8/14, at 11:55 a.m. housekeeper (H)-A when asked, reported she had seen "empty pint bottles" of vodka in the trash by the front doors. The last time had been, "a few months ago," and she had reported any bottles she found. " H-A was unsure which resident was drinking, but believed the pint bottles were placed in the front trash so they "wouldn't get caught." When asked if H-A knew how the bottles had been obtained, she was unsure, but thought they may have been brought in by family members. On 5/8/14, at 12:03 p.m. LPN-H stated she had confiscated alcohol from R37. LPN-H verified alcohol was provided to R37 and suspected to other residents of the facility, as well, but it was	{F 250}

{F 250}	Continued From page 81 unclear how it was being provided. LPN-H verified R129 was on 1:1 which meant within arms reach. LPN-H was unaware R129 had obtained cocaine in the facility. On 5/8/14, at 12:10 p.m. the health unit coordinator (HUC) stated she was aware of resident drug and alcohol use in the facility. The HUC stated there was "always hearsay between residents...their selling [drugs and alcohol] to each other...it's always stories," including hearsay stories regarding heroin and cocaine. The HUC had put "a lot of time in" reporting to hospitals, clinics and ER if a resident was a "drug seeker" and on restrictive recipient program, and R129 was going to ER, calling herself and getting Ambien, oxycodone and "is happy after." R129 "refuses to tell" about the prescriptions, and the HUC went to the social worker to report these concerns. R129 denied having pills, "but I know she did get them...every week" R129 was finding a new doctor, and not providing the correct paperwork, or altering paperwork. The HUC was aware residents consumed alcohol in the facility, and some became intoxicated, however, it was unclear how they had obtained it. "I feel like we're supposed to do something, 'cuz no one will take charge." The HUC was aware R129 obtained cocaine and was sent to the ER, but was unsure if a toxicology screen had been done, although she had asked for them in the past. The HUC said she and other staff believed R129's (making quotation gestures) "son" was R129's dealer, and described him as a man she referred to as her son, who was at the facility at the time the resident snorted the cocaine. Further review of the nursing progress notes also revealed indicated the following:	{F 250}

{F 250}	Continued From page 82 1) On 5/9/14, at 7:31 p.m. the pharmacy was contacted regarding R129's Percocet (narcotic pain medication) refills and determined 110 Percocet tablets had been delivered and outlined the delivery dates and the amounts provided. The note indicated R129 was informed of the information. 2) On 5/11/14, at 10:09 a.m. a note written by the HUC indicated North Memorial Medical Center (NMMC) called "requesting" R129's Medication Administration Records (MARs). The note indicated the RN from the hospital notified HUC R129 had been admitted to the ICU, had been intubated "due to acute alcohol intoxication." R129's toxicology screen was "negative for drugs but positive for alcohol with a level of .323." Although R129 had a staff person assigned as 1:1, R129 had been able to obtain and ingest a life threatening amount of alcohol. Although the administrator was updated, the clinical record lacked evidence the SA was also immediately notified of the incident. The record lacked documentation at the time of the incident, as well as pertinent assessment information such as vital signs and symptom descriptions. In addition, the record lacked evidence of an immediate determination of how, when or where R129 obtained the alcohol and/or if the assigned 1:1 was interviewed at the time. 2) On 5/11/14, at 10:55 a.m. a note written by the DON, recapitulated R129 was sent to the hospital, identified the time of transport as "around 4 am" on the night shift, and identified R129 was sent in "for intoxication." R129 had "become weak" and needed to be lowered to the floor." Two LPNs were contacted and the NA staff assigned to the 1:1 was called. The NA assigned to R129 "reported that resident has been in and out of [R14's room number] but did not notice any	{F 250}

{F 250}	Continued From page 83 exchange of alcohol. She also reported that resident [R14] was upset because the 1:1 has to be in his room too while resident is visiting...." R14 denied giving R129 alcohol, but "mentioned that resident had alcohol overnight." R14 denied knowledge of where R129 could have obtained the alcohol. 3) On 5/11/14, at 2:49 p.m. a note written by DON indicated NMMC was contacted to receive updates on R129's status. "I also requested to have the resident undergo a chemical dependency assessment to ensure that the resident can be transferred to a residential chemical dependency facility as appropriate, considering the resident's recent hospital trip to the hospital for snorting cocaine." 4) On 5/12/14, at 12:07 a.m. a late entry note (no indication for the date or time the late entry was for) indicated an NA staff "report to this writer that resident was in the bathroom longer than usual, came out and appeared drowsy, unsteady gait." R129 was identified at risk for falling, was verbally aggressive to staff and stated, "'I'm drunk.'" The room was checked and no evidence of alcohol was found. R129 "threw herself to the floor" and was sent to the ER at 4:00 a.m. On 5/12/14, at approximately 2:00 p.m. contracted licensed social workers (CLSW)-A and CLSW-B both verified upon hire to the facility, they had been working on "re-writing care plans and discharge planning." CLSW-A stated there was a third social worker who no longer came to the facility and a part time social worker on evening that was "reducing her hours to once a week." Both verified they had not specifically worked with R129 regarding CD treatment and verified was last offered to R129 on 4/4/14 and had not revisited CD treatment options after R129	{F 250}

{F 250}	Continued From page 84 reported cocaine use on 5/3/14. Neither was aware R129 had been hospitalized for alcohol toxicity and said they "should have been notified." CLSW-A and B had not worked the previous few days, as facility had not paid the contracted company's bill. CLSW-B expressed concern for the residents, and said R129 should have been reassessed after she had obtained and used cocaine, and both SWs felt R129 had been harmed. At 2:43 p.m. CLSW-A stated, "I cannot imagine how a resident who was on 1:1 would get that much alcohol in her system and when I got here on Sunday I came to the office to open the computer to see what happened and guess what, there was no nursing notes. I went outside to the desk and told the administrator and DON to get the nurse in to document and have the 1:1 fired. There are so many people here than I have seen on 1:1. For me 1:1 means the person needs to be somewhere else not at the nursing home." R86 was committed as mentally ill and chemically dependent per Hennepin County Commitment papers dated 3/12/13, to include admission to a nursing home for rehabilitation and when completed and/or mentally stable, again participate in chemical dependency treatment. The facility Resident List Report, provided 5/8/14, at 11:00 a.m. identified R86 as a known pot smoker. R86 was placed at harm as R86 was hospitalized due to alleged substance abuse. On 3/16/13, R86 was admitted to the facility per the Admission Record. Diagnoses include hepatic encephalopathy (confusion related to liver failure) and cirrhosis of the liver and hepatomegaly (enlarged and fatty liver) alcoholic liver damage, thrombocytopenia and anemia (blood disorders related to clotting factors not supplied by the damaged liver, psychosis, drug abuse and	{F 250}

{F 250}	Continued From page 89 term placement waiting for liver transplant. Is aware of need to remain sober to stay on the (transplant) list. Does not want to go to treatment. Discussed AA (alcoholics anonymous), stated he has tried in the past." The care plan dated 3/27/14, indicated: R86 was a vulnerable adult related to cognitive limitations, physical limitations, history of substance abuse past and recent, interventions included: Provide resident with treatment program information as needed and as requested. Resident has been assessed and is appropriate to leave facility for appointment with schedule transport. Resident has been assessed and may not leave this facility without supervision due to fluctuating cognition secondary to liver disease and substance abuse. The medical record lacked evidence of psychiatric or supportive treatment for chemical/substance abuse. Per CLSW-B, "tried to build report with him. He had been given 30 day notice for Marijuana in his room, but it was not a proper notice and he had not been given another." R86 planned to stay in the facility until he received a liver transplant. CLSW-A stated, "I thought people would not be eligible for a liver transplant if they were actively doing drugs." R86's The medical record lacked evidence of psychiatric or supportive treatment for chemical/substance abuse. R86 was committed to prevent exposure to alcohol and chemical substances of abuse. The facility lacked coordination of care between departments and lacked review of facilities own progress notes, which verified substance abuse, and failed to provide an environment free of chemical/alcoholic	{F 250}

substances, or to transfer R86 to a secured environment where appropriate care could be provided.

R41:
The facility failed to provide supervision to prevent ingestion of alcoholic substances, which resulted in actual harm to R41 on 5/1/14. While intoxicated the resident drove his motorized wheelchair (w/c) off the curb, fell over, sustained injury to his right forehead and right arm. R41 was hospitalized with low blood pressure, low magnesium and low potassium.

R41 was observed to sun himself in the facility driveway, outside of the front door and toward the public sidewalk on 5/5 at 2:09 p.m. and 5/6 at 10:46 a.m., 5/7 at 10:45 a.m., 5/8 at 2:15 p.m., 5/9 at 3:00 p.m., 5/10 at 2:30 p.m., 5/12 at 2:00 p.m., and 5/13/14 at 3:35 p.m. On 5/11/14, at 11:15 a.m., R41 was observed to sun himself on the smoking patio. All observations were unsupervised.

R41 was admitted to the facility per the Admission Record dated 2/4/14, from another long term care facility. R41 had a history of bipolar disorder (a mood disorder with manic and depressed phases), schizophrenia and polyneuropathy in diabetes (nerve damage usually in the feet and legs that can create sensory, motor and bodily functional problems).

The admission MDS dated 2/17/14, indicated R41 had a BIMS score of 15/15 which indicated no cognitive impairment. A Patient Health Questionnaire (PHQ9 - detects depression) was completed and R41 had a score of 7/27, which indicated mild depression. R41 had verbal

behaviors directed at others one to three days during the seven day look back period. R41 was dependent on staff and required total assistance of two persons and a mechanical lift for transfers and toileting; extensive assistance of two persons for bed mobility; extensive assistance of one person for personal hygiene, dressing. R41 was totally dependent on the electric, tilt in space, w/c for locomotion on and off the unit. The CAAs dated 2/17/14, indicated R41 would be referred to the house psychologist.

An LOA Safety Assessment dated 2/10/14, indicated R41 was safe to leave the facility on unsupervised LOA, and left the facility daily on unsupervised LOA according to staff.

A Vulnerable Adult Assessment dated 2/10/14, indicated the resident utilizes an electric w/c for ambulation. "Resident is OK to go on unsupervised LOA." A Smoking Evaluation dated 2/10/14, indicated independent with smoking and smoking materials.

The care plan revised on 3/18/14, indicated R41 had impaired cognitive function or thought process related to personality disorders of bipolar and schizophrenia. R41 had a history of being verbally abusive to staff and other residents, and required assistance with ADLs, and was safe for unsupervised LOA.

A Physician's Progress Note dated 4/15/14, indicated the visit was to establish primary care and recommend R41 for a psychiatry consult per R41's request. In addition, a recommendation was made by the physician for R41 to have a referral made to a pain clinic consult for chronic use of opiates (oxycodone) and morphine (both

{F 250}	Continued From page 92	{F 250}		

narcotics). The medical record lacked evidence that the physician's recommendations were scheduled and that R41 went to the consults.

A progress note dated 5/1/14, at 3:05 p.m. revealed R41 was off the property in the neighborhood. He became intoxicated (on a LOA in the neighborhood), when he returned to the facility he drove his electric w/c off the curb on the driveway to the facility. R41 was found lying on pavement on his right side and his speech was slurred, but R41 remained alert and oriented. "He stated his last drink was 5 minutes ago. He was incontinent of urine and had a laceration on his forehead, he complained of right arm pain." The physician was notified and 911 was called. R41 was transferred to NMMC for further evaluation. He was admitted to ICU with low blood pressure, low potassium and low magnesium. The medical record lacked evidence that the assessments were reviewed and/or revised for R41's LOA status. On 5/1/14, the fall risk care plan was updated to include the fall on the driveway, but lacked mention of the causative factor of intoxication.

On 5/5/14, at 1:43 p.m. R41 returned to facility. New diagnoses from the Intra-agency Transfer Form dated 5/5/14, included: fall, intoxication, and alcoholism. A Physician's Order on 5/5/14, included, "No longer okay to leave unsupervised LOA's." A WanderGuard was ordered for the resident. The care plan revised on 3/18/14, lacked mention of supervised LOA.

On 5/6/14, at 9:16 a.m. the facility met with resident to discuss the incident that occurred on 5/1/14, the facility obtained an order for supervised LOA. Resident stated he was drinking

{F 250}	Continued From page 93 because he was depressed. The facility placed a WanderGuard on his w/c. Even though R41 had a WanderGuard placed on the w/c, R41 continued to remain at risk due to the facility, as the facility staff continued to silence the alarm at the front desk and let him out of facility. R41 continued to leave the facility and move about the property unsupervised. R41's medical record lacked evidence of any social service intervention at the facility for his depression and drinking related to depression which would include providing information such as alcoholics anonymous (AA) or referral to any place for help or support. Even though the CAAs dated 2/17/14, indicated R41 was referred to a house psychologist, R41's medical record lacked any evidence R41 had seen the house psychologist. The medical record lacked evidence that social service intervention had been put into place since his last MDS dated 2/10/14 was completed. The MDS depicted R41 as having depression was identified at 7 out 15. The Care Area Assessments indicated he would be seeing the house psychologist and R41 had not been seen by the house psychologist. The medical record also lacks any staff intervention for providing information for his drinking such as like AA and referral to any place for help. Therefore, he was still drinking for depression and left the facility unsupervised. R41 remains at harm. The Temporary Social Work Contract dated 3/15/14, indicated services provided included: 1. Conduct and document psychosocial assessments. 2. Complete the MDS, care plan and any other required paperwork. #. Participate	{F 250}

in care conferences. 4. Facilitate discharge planning. 5. Communicate with resident families as needed during the course of providing stoical services and discharge planning. 6. Facilitate admissions if required.
R37's Progress Notes indicated R37 had been found with alcohol/vodka on 2/21/14, 2/22/14, 2/27/14, 3/2/14, 4/13/14, 4/23/14, 4/24/14, 4/25/14, 5/3/14, 5/5/14, 5/6/14, 5/7/1, 5/9/14 and 5/10/14. R37 was hospitalized 2/22/14, 4/23/14 and 5/10/14, related to alcohol/drug use. The Admission Record dated 1/14/14, indicated R37 was admitted to the facility on 9/19/13, with diagnoses which included altered mental status, and personal history of alcoholism.

Observations of R37 revealed the following:
-On 5/5/14, at 2:53 p.m. R37 was observed approaching a white minivan parked in front of the facility.
- On 5/6/14, at 1:30 p.m. R37 was observed staggering down the hallway with the HUC and in a loud voice stated he was crazy.
- On 5/6/14, 2:02 p.m. R37 went outside without shoes on. Two staff stopped him at the nursing station and sent him back to his room for shoes. R37 left his room and went directly outside without shoes on again, walked to the smoking patio and returned to the facility.
- On 5/7/14, at 8:18 a.m. R37 was observed standing next to R117 on the smoking patio with his wallet out. Another resident (R1) arrived and R37 handed his wallet to her. Surveyor was unable to see if R1 took anything from the wallet before she handed it back to R37. R37 was observed to lean close to R1 and talk to her and gave her his wallet back. At 8:24 a.m. R1 put R37's wallet back in his left pants pocket.
- On 5/8/14, at 11:48 a.m. R37 was observed in

bed with his back to the door. R37 rolled over and looked at surveyor and rolled back towards the wall. R37 stated he did not want to talk now and would talk in an hour or two.
- On 5/8/14, at 3:46 p.m. an attempt was made to interview R37 and he refused.
- On 5/9/14, at 7:23 a.m. R37 was observed coming out of his room, stated he did not feel good and was going to see if there was any coffee. At 7:28 a.m. R37 was observed coming from the West hallway. R37 was then observed to push another resident back down the West hallway and was observed outside room 186 R9. There was no staff with R37 when he was observed. When R37 returned to the nursing station, he told the HUC he had gotten cigarettes from R9. The HUC asked R37 if he was alone and R37 responded that he was and she asked him where his partner was. NA-L approached R37 and stated she was with him today. NA-L verified she was providing 1:1 for R37.
- On 5/10/14, at 1:07 p.m. R37 was observed being taken to an ambulance. R37 was animated and chatting with the medics. Staff reported that was how you know R37 was intoxicated, when he was friendly and chatting.

The Nutritional Status CAAs dated 9/26/13, indicated R37 was at risk for impaired nutritional status due to chronic ETOH abuse and cirrhosis. Review of the Cognitive Loss/Dementia, Mood State, Behavioral Symptoms and Psychotropic Drug Use CAAs dated 10/7/13, revealed a lack of a summary regarding the triggered areas.

The Progress Notes were reviewed and the following was noted:
- On 5/2/14, indicated R37 removed the wander guard and refused a new one to be placed.

{F 250}	Continued From page 96 - On 5/3/14, indicated R37 was walking in the hallway "wobbling" and requested staff give him a shower at 3:00 a.m. R37 was unable to maintain his balance and appeared "intoxicated." Two almost empty bottles of vodka were found in his room. - On 5/5/14, at 3:53 p.m. indicated R37 had exhibited signs of intoxication with an unsteady/staggering gait, slurred speech, odor of alcohol and unkempt appearance. R37 was noted to have continually gone outside, stated he had called a limo and was going to Las Vegas. - On 5/5/14, at 4:56 p.m. indicated R37 had slurred speech, smelled of alcohol and had a staggering gait. - On 5/5/14, at 10:25 p.m. indicated R37 was "intoxicated" and was found with an almost empty bottle of vodka. - On 5/6/14, which indicated it was a late entry for 5/5/14, at 6:00 p.m. indicated R 37 was noted walking outside towards the back of the building. R37 was noted to be walking alone with a staggering gait. When approached by staff, R37 stated he was going to Las Vegas. No odor of alcohol was noted and when asked what he had been doing to become so impaired, R37 reported he had gotten cocaine and heroin from another resident and confirmed he had been injecting the drugs. Several scattered purple bruises were noted on his forearms. At 1:55 a.m. indicated R37 reported his heart was thumping out of his chest and was found to have a blood pressure of 168 /118 with a pulse of 118. At 4:37 a.m. indicated R37 exited his room without clothing and had a strong odor of alcohol on his breath. Four empty bottles and one unopened bottle of alcohol were found in R37's room and were removed by staff. Also noted R37 started having tremors and palpitations with increased pulse and blood	{F 250}

{F 250}	Continued From page 97 pressure due to alcohol withdrawal and demanded medications. - On 5/7/14, at 12:04 p.m. indicated R37 was exhibiting signs and symptoms of intoxication as evidenced by odor of alcohol, unsteady/slow/staggering gait, slurred speech, confusion and unkempt appearance. A pattern of missed pain clinic appointments due to intoxication was noted and indicated further appointments would not be made due to ongoing intoxication and inability to follow through with appointments. In addition, R37 had a full bottle of vodka and refused to give the bottle to staff. The note indicated the administrator directed if R37 was unwilling to willingly give staff the alcohol bottle, it was ok for the resident to keep the alcohol and if he became drunk or disruptive to call the police and have him taken to detox. - On 5/8/14, at 3:42 p.m. indicated R37 was placed on 1:1 observation related to incidences of getting intoxicated. - On 5/9/14, indicated R37 "was clearly intoxicated." An empty pint bottle of vodka was found in his room and was noted as the third empty pint bottle taken from R37's room in a 48 hour span of time. - On 5/10/14, indicated R37 was observed giving his credit card to R117 on 5/9/14. A second note indicated R37 returned from LOA accompanied by a friend of another resident (R1). R37 was observed to be shaky and verbalized he was unsteady on his feet. R37 was noted to have shakiness, profuse sweating, and sluggish pupils. R37 was noted to have a blood pressure of 178/130 and a pulse of 120s to 140s. - On 5/11/14, indicated R37 had a drug screen positive for methadone at the hospital. R37 did not have a prescription for methadone.	{F 250}

The Physician's Orders and NP Orders were reviewed and the following was noted:
- On dated 1/8/14, included a diagnosis of alcohol abuse noted to have also occurred in the facility.
- On 2/5/14, indicated R37 recently had a bottle of alcohol hidden in his pillow case and was noted to smell of alcohol.
- On 2/28/14, directed to discharge R37 to another facility (that allowed drinking).
- On 3/5/14, directed "do not call on-call MD or NP after hours if resident is intoxicated unless he is medically compromised. Allow resident to go to bed [and] sleep."
- On 4/9/14, indicated R37 was hospitalized from 4/1/14 from 4/8/14, with respiratory distress and pneumonia with pleural effusions requiring chest tube placement, treated for sepsis and required thoracentesis. A NP note dated 4/9/14, indicated R37 required ongoing Kristalose and Mag-ox for chronic cirrhosis.
- On 4/10/14, included diagnoses of chemical dependency, hepatic cirrhosis, and chronic pain.
- On 4/24/14, included "place wander guard [sic] for res. [resident] safety" and "pursue guardianship." A second order dated 4/24/14, indicated NP was aware of R37's alcohol, to encourage R37 not to use and if R37 appeared intoxicated it was ok to administer all medications as ordered.
- On 5/6/14, directed to recheck R37's blood pressure in one hour, call NP if diastolic blood pressure was greater than 100, give Ativan 0.5 mg orally every six hours as needed times three days for withdrawal symptoms (tremors, shaking, and increased heart rate) and a urine toxicology screen.
- On 5/7/14, directed no LOA-supervised or other. Also, the NP included an order for a WanderGuard to check placement every shift for

elopement even though R37 had cut off the WanderGuard on 5/2/14, and refused to have a new one placed.

A Clinical Summary dated 2/3/14, indicated "refer to chemical dependency counselor and pain psychologist." A prescription dated 2/3/14, ordered a behavioral health evaluation for diagnostic evaluation and treatment recommendations for R37.

A Physician Visit/Progress Note written by a licensed drug and alcohol counselor (LADC) dated 2/13/14, indicated R37 was referred to assess behavioral health, chemical dependency and pain and included an order/comment of "strongly recommend a full psychiatric assessment" within 60 days to evaluate medications and therapy. The medical record lacked evidence of the psychiatric assessment having been completed.

R37's care plan was reviewed and noted the following:
- The vulnerable adult care plan revised on 3/5/14, indicated R37 may leave to go to medical appointments without supervision and was not safe to go on other unsupervised LOAs.
- The depression care plan dated 3/11/14, included alcohol abuse and directed to arrange psych services as needed.
- A behavioral symptoms care plan revised on 3/16/14, indicated alcohol consumption and concealing alcohol in room with a goal to have fewer episodes of alcohol abuse per week. The interventions included; encourage attending AA or other substance abuse support programs, assisting with arrangements as needed, may go to medical/dental appointments unsupervised and

{F 250}	Continued From page 100 no other unsupervised LOA. - A risk for elopement related to alcohol abuse and psychoses care plan revised 3/16/14, noted a history of returning to facility after unsupervised LOA displaying signs of alcohol consumption and/or with a supply of alcohol. The goal included R37 would not to leave facility unattended unless a medical appointment and R37's safety will be maintained. The interventions indicated R37 cut off the wander guard and refused to have another one placed and was placed on 15 minute checks. Check room if suspected alcohol. - A Mood/Behavior care plan initiated on 4/23/14, indicated R37 had a history of alcohol abuse and actively drank at the facility. The care plan noted R37 was sent to detox on 4/23/14, due to being very intoxicated. The goal indicated R37 would like to stop drinking alcohol with an intervention to check room daily for alcohol and check R37 for signs of intoxication. - An at risk for adverse reaction from medications related to alcohol care plan dated 4/25/14, indicated NP was aware of R37's alcohol, nursing staff to encourage to restrain from using alcohol and if R37 appeared intoxicated it was ok to administer medications. Another intervention dated 5/8/14, included 1:1 supervision due to alcohol abuse and intoxication. A Vulnerable Adult Assessment dated 3/16/14, indicated R37 had both past and recent substance abuse, was not safe for unsupervised LOA except to appointments and had significant alcohol use when out on unsupervised LOA. The quarterly MDS dated 3/18/14, indicated R37's cognitive skills for daily decision making was independent with consistent/reasonable decisions.	{F 250}

{F 250}	Continued From page 101 A Resident Refusal of Medical Treatment Form dated 5/5/14, indicated R37 was "wander guarded [sic]" to the facility for resident safety related to history of alcohol abuse, staggering gait and slurred speech. With the risks of refusing noted as facility wouldn't be aware if R37 left with potential for fall risk and injury off facility grounds with no one to provide aid. A letter dated 5/10/14, indicated a first offense of the facility smoking policy as R37 reported to staff he had gotten cigarettes from R9. On 5/7/14, at 10:02 a.m. the ombudsman was interviewed and wanted to know if surveyors were aware of residents purchasing alcohol and drugs. Reported she believed residents were giving other residents money and credit cards to go out and purchase things for them. She reported a resident with chemical dependency problems had been drinking, room checks were being completed and staff was finding alcohol bottles. Reported R37 was being found intoxicated and she was involved in discussing abuse prevention planning if intoxicated and the effects of alcohol on R37's medications. She reported the physician was encouraging discharge planning to a facility that allowed drinking. She also indicated a number of residents were accessing illegal drugs at the facility. The ombudsman reported she had been at the facility on 5/6/14, to discuss the concerns. On 5/7/14, at 10:05 a.m. the administrator stated the ombudsman was called 5/6/14, to speak with the facility regarding R37 giving his credit card to R117 to purchase alcohol and R37 had been "drunk for days."	{F 250}

On 5/8/14, at 11:51 a.m. LPN-B stated she was aware R37 had a doctor's order and can drink as long as there are no behaviors and if behaviors occur she can call detox. LPN-B stated she did not know where R37 got alcohol from.

The safety monitor, NA-M was interviewed on 5/8/14, at 11:55 a.m. and stated he has not seen R37 exchange money or alcohol and stated he has heard about exchanges but could not remember who he heard it about.

The HUC was interviewed on 5/8/14, at 12:15 p.m. and stated "it's a nightmare; [R37] is drunk every day." She stated she had her suspicions about where the alcohol was coming from but when she asked R37 he refused to tell her. R37 told her he had given his credit card to R117 to buy things for him. The HUC stated R37 was drunk every day when she left and was drunk when she came in on 5/8/14. She reported that on 5/5/14 or 5/6/14, she had observed R37 in the parking lot, was told there was nothing they could do by the facility administrator and requested assistance from the operations director to get R37 back in the building. The HUC reported she had requested the safety monitor to put R37 on every 15 minute checks but knew that was not enough. She stated other residents were on 1:1 for drug use and wanted to know what the facility was going to do to keep R37 safe. The HUC stated "we're not doing [R37] any justice" and "it's a shitty plan to keep people on 1:1 forever."

On 5/10/14, at 1:19 p.m. the consultant administrator was approached after several staff reported they had not been informed of the immediate jeopardy (IJ) that was called on 5/9/14,

{F 250}	Continued From page 103 at 2:02 p.m. The consultant administrator stated she wanted the administrator to indicate why staff was not informed of the IJ and asked "are we in trouble?" The administrator approached and stated, yesterday when the IJ was called, by the time we were done with a meeting with our boss, the nurse managers had gone for the day. The administrator stated he thought they would come up with a plan and would have an all staff meeting 5/10/14, to inform staff of the IJ. The administrator further stated a meeting was scheduled at 1:45 p.m. and verified staff had not been informed of the IJ. On 5/10/14, at 1:30 p.m. the administrator stated R37 had been taken to the hospital for delirium tremens (DTs-a severe form of alcohol withdrawal that involves sudden and severe mental or nervous system changes). On 5/12/14, at 8:59 a.m. RN-B and LPN-A stated R37 had gone to the bank with a friend on 5/10/14, and were not sure if the 1:1 had gone to the bank or not and would have to check. The DON was interviewed on 5/12/14, at 9:05 a.m. and stated a "guy named [friend-A]" who is a friend of R1 went with R37 to the bank. The DON stated both the administrator and the consultant administrator were aware that friend-A was a friend of R1. The DON stated the 1:1 refused to go to the bank with R37 and friend-A signed R37 out. The consultant administrator was going to go with R37 and friend-A to the bank until it was decided the facility was not comfortable with her going with to the bank either. The DON stated he reminded R37 he could not go because he had orders for no LOA and the administrator, consultant administrator and the social worker	{F 250}

decided R37 could go anyway. The DON stated he had no idea where R37 had gotten methadone from.

When interviewed on 5/12/14, at 1:35 p.m. CLSW-A stated during a room search a quart bottle of alcohol had been found in R37's room and three plastic containers with the labels removed which nursing indicated were methadone containers.

When interviewed on 5/12/14, at 1:52 p.m. the administrator stated he and CLSW-A were involved in R37's LOA. The administrator stated SW-A was under the impression R37 was allowed to go on LOA and R37 returned with a card from Walgreens so they knew he had not followed his agreement to only go to the bank. The administrator stated friend-A would not be able to take R37 on LOA again. The administrator stated he was not aware R37 had orders for no LOAs and he believed CLSW-A and had not checked the chart. The administrator stated he was also not aware of friend-A's relationship with R1 and the DON had not told him about the order for no LOA and friend-A's relationship with R1.

Upon interview on 5/13/14, at 8:09 a.m. CLSW-A stated on 5/10/14, prior to R37 leaving on LOA she was told by nursing (she could not remember who) that R37 could leave the facility with supervision. She reported she made it clear to friend-A that R37 could only go to the bank and nowhere else. She stated she told friend-A that R37 would try and talk him into going to the liquor store and R37 could not go there. Friend-A reassured her he had been sober for ten years and would never take R37 to a liquor store. The SW-A stated after R37 left, nursing (did not

remember who) told her R37 had orders for no LOA and friend-A was R1's drug dealer. She stated it would have been nice to know the information before she had allowed R37 to go on a LOA. She stated she had not looked at R37's chart because she trusted nursing knew the correct information. She also stated R37 had been keeping alcohol under the edge of his mattress and she could not understand why nursing did not find the alcohol when they made the bed. R37 remained at harm as he did not receive the requested services to assist him with the self-reported drug/ETOH abuse.

R14 was not provided medically-related social services to address known illegal drug use in the facility as recently as 5/3/14.

R14's admission record dated 1/14/14, indicated diagnoses to include depressive disorder, epilepsy and below the knee amputation. R14's significant change MDS dated 12/31/13, identified R14 had moderately impaired cognition, no mood problems and physical behavior symptoms towards others one to three days in the assessment period. The MDS indicated R14 required extensive assistance with most ADLs but was independent with locomotion on and off the unit and eating. The CAA was all dated 1/9/14; CAA for cognitive loss/dementia indicated R14 was able to understand and be understood. CAA for ADL function and rehab potential identified R14 had "alcohol abuse" and "alcohol induced dementia. The CAAs did not identify any history of drug use.

R14's Vulnerable Adult care plan dated as revised on 4/26/14, defied R14 had a "History of chemical abuse, including marijuana and heroin. The care

plan goal indicated R14 would "remain safe and free from abuse/neglect." The care plan interventions indicated R14 refused all in-house and outside psychiatric services. The care plan identified R14 required supervision for LOA from the facility.

A nursing Progress Note dated 5/3/14, at 8:35 p.m. indicated a NA reported to a nurse they saw R14 "put something" in a small plastic bag "possibly drug" at 8:30 p.m. The note indicated a nurse approached R14, noted he had something in his mouth and asked the resident to "spit out" what was in his mouth. R14 refused to open his mouth, swallowed the content and then opened his mouth for the nurse. The note indicated R14 was "non-cooperative" and "attempted to hit the nurse with his fist." The note indicated the physician was notified and R14 was sent to the ER for evaluation.

A North Memorial Robbinsdale HUC Transfer Packet indicated the results of toxicology screen identified R14 was positive for "THC Metabolites [the active drug components of marijuana]" from the past 24 hours. The report identified R14 had the lab for "drug ingestion."

Although the specific incident was documented on 5/3/14, the clinical record lacked documentation including, but not limited to: immediate notification of the administrator and SA, thorough investigation of the incident to determine potential source(s) R14 may obtained the illegal drug from, notification of law enforcement, follow up assessment of R14's safety, evaluation of R14's access to leave the facility, such as to smoke; documentation of how they would prevent potential future instances of

{F 250}	Continued From page 107 R14's illegal drug access and ingestion, monitoring of R14 and interdisciplinary involvement, such as medically-related social services. On 5/8/14, at 11:32 a.m. R14 was interviewed. R14 stated he did not recall the incident on 5/3/14. R14 stated his memory was poor due to being an "epileptic." R14 denied awareness of illegal drug and alcohol activity in the facility. When asked what R14 would do if she observed illegal drug or alcohol activity in the facility, R14 stated he would "tell the resident not to do it," but would not notify staff. When asked why he would not notify staff, R14 stated, "'Cause we all have enough troubles, if someone wants a little activity on the side, go for it!" On 5/12/14, at 10:26 a.m. the DON was interviewed, verified had not read the plan of correction and did not know what the plan was. DON verified he was not aware of changes made and reiterated he was "waiting for this [the survey]" to "blow over" and then he had plans to work on "problems" in the facility. Stated he read the survey results from 2013 and stated he was not given an accurate picture of the facility problems. Verified there was no system for monitoring staff to ensure facility policies were followed. DON was unclear on the specifics of R14's incident. On 5/12/14, at approximately 2:00 p.m. CLSW-A and CLSW-B both verified they were not aware or informed of R14 obtaining and ingesting an illegal drug. Both verified they were not notified R14 was sent to the hospital and had a positive toxicity screen for marijuana. Both CLSW's explained they would have assessed R14 and reviewed potential CD treatment options with R14. Both	{F 250}

{F 250}	Continued From page 108 CLSWs expressed R14 may require increased supervision due to accessing an illegal drug and his history of chemical dependency. Both verified they had access to the computer clinical record, CLSW-A stated the facility lacked consistent documentation of incidents, interventions, assessments and follow up. R56 had conflicting advanced directives dated 4/21/14 and 4/26/14, in her record. Review of the hospice Team Care Plan dated 5/7/14, indicated R56 signed onto hospice on 4/21/14, with a diagnosis of chronic liver disease with a prognosis of less than six months to live. A Provider Orders for Life Sustaining Treatment (POLST) dated 4/21/14, indicated R56's cardiopulmonary resuscitation status (CPR) status was DNR/Do Not Attempt Resuscitation (Allow Natural Death) and goals of treatment were noted as Comfort Care. The POLST dated 4/21/14, was signed by R56's husband. A POLST dated 4/26/14, indicated R56's CPR status was CPR/Attempt to Resuscitate, directed to Limit Interventions and Treat Reversible Conditions and included interventions and treatments of intravenous (IV)/intramuscularly (IM) antibiotic treatment and IV fluid administration. The POLST dated 4/26/14, was signed by R56. The annual MDS dated 2/24/14, included a Brief Interview of Mental Status Score (BIMS) of 15 (cognitively intact). Review of the facility care plan dated 4/23/14,	{F 250}

{F 250}	Continued From page 109 indicated R56 was DNR/do not intubate (DNI), comfort cares and was receiving hospice services, medical directives would be honored with an intervention to coordinate care with hospice. Review of the hospice care plan dated 5/7/14, indicated R56 was DNR with an intervention of "DO NOT RESUSCITATE." A Physician's Order dated 4/18/14, directed ok for hospice to evaluate and treat and ok for in-house psych to see. A nurse practitioner progress note dated 4/30/14, noted a diagnosis of end stage liver disease, now on hospice secondary to decline in condition. A Residential Communication Note from hospice dated 5/12/14, indicated a message was left with the hospice social worker to call the facility social worker regarding POLST. A Progress Notes dated 5/12/14, indicated CLSW-B spoke with R56 about her POLST. R56 reported to CLSW-B she wanted to be DNR/comfort cares and that was also what her husband wanted. CLSW-B indicated she placed the correct POLST information in the advanced directives section of the medical record. A Progress Notes dated 5/12/14, indicated CLSW-B spoke with R56's husband regarding the POLST and hospice. R56's husband stated to CLSW-B the POLST should be DNR/comfort cares. On 5/13/14, at 8:41 a.m. a review of the Physician's Orders signed 4/9/14 continued to	{F 250}

{F 250}	Continued From page 110 direct "Full Code." On 5/7/14, at 9:31 a.m. RN-A reported he would go to the POLST in the front of the chart to determine what to do if R56 was found without a pulse and not breathing. The POLST in the front of the chart was the one dated 4/26/14, directing CPR. When interviewed on 5/7/14, at 10:43 a.m. LPN-A stated the POLST dated 4/26/14 would be the current one and would be the one the nurses would refer. On 5/7/14, at 10:45 a.m. the NP stated her plan of care for R56 was DNR and comfort care only. The NP stated she did not feel the resident was capable of making a decision for her POLST and the decision should be made by R56's husband. Upon interview on 5/7/14, 10:55 a.m. the hospice RN-E stated she was unaware the POLST for R56 was changed on 4/26/14. RN-E stated CLSW-D completed the POLST dated 4/21/14, with R56's husband. When interviewed on 5/7/14, at 12:04 p.m. CLSW-D stated the reason why the POLST dated 4/21/14, was signed by R56's husband was R56 "was really confused and uncooperative" and directed all questions to her husband. CLSW-D stated she was unaware the POLST was changed on 4/26/14, and would expect the facility to notify hospice with any changes because full code and the treatments requested would not be a hospice focus of care. On 5/7/14, at 12:14 p.m. the HUC verified the facility did not have a hospice care plan for R56.	{F 250}

{F 250}	Continued From page 111 On 5/7/14, at 1:08 p.m. the HUC provided a hospice care plan and stated the care plan was faxed to the facility on 5/7/14. When interviewed on 5/7/14, at 12:26 p.m. NA-D stated he does not know what hospice does for R56, he sees them come in but that's it. Upon interview on 5/7/14, at 2:01 p.m. RN-F stated the POLST dated 4/21/14, was signed by the hospice medical director on 5/7/14 with the original effective date of 4/21/14. RN-F stated she expected the hospice care plan to be in the chart within two weeks of enrollment. When interviewed on 5/9/14, at 9:22 a.m. R56's husband stated he recalled signing the POLST dated 4/21/14 and verified his expectations were R56 was DNR and comfort care only. On 5/12/14, at 1:50 p.m. CLSW-B stated she had followed up with hospice and the intent is for R56 to be DNR and CLSW-B would make sure that was in place. RN-B was interviewed on 5/13/14, at 11:41 a.m. and stated she was not aware of the code status discrepancy. RN-B stated she or the nurse would be responsible for communicating with the physician regarding code status. RN-B verified the Physician's Orders for Full Code did not match the POLST dated 4/21/14, and the nurses would have mixed guidance for what to do in case of emergency. The facility Social Services/Social Work policy (undated) directed "Work with the interdisciplinary team and administration to promote and protect resident rights and the psychological well-being of	{F 250}

{F 250}	Continued From page 112 each resident." A hospice policy was requested and was not provided. R117 was identified by the facility as questionably buying cigarettes and drugs, and selling within the facility. The facility failed to act upon allegations that R117 was bringing drugs, alcohol and cigarettes into the facility that caused actual harm and hospitalization to other residents. R117 was admitted to the facility 1/21/14, with admission diagnoses of cardiomyopathy (weakened heart muscle with decreased pumping ability), Atrial fibrillation (irregularly irregular heart beat that causes the heart chamber to be under filled when pumped and can lead to inadequate heart pump and life threatening blood clots in the heart), chronic Coumadin use (to thin the blood and prevent blood clots from forming) congestive heart failure (fluid buildup in the lungs or extremities due to poorly pumping heart), shortness of breath, hypertension (high blood pressure), anxiety, and depression. The admission MDS dated 2/3/14, indicated R117 had a BIMS score of 15/15, which depicted no cognitive impairment. R117 was independent with all activities of daily living and mobility. R117's LOA Safety Assessment dated 3/18/14, indicated the resident was assessed as appropriate to leave the facility unsupervised; a Smoking Assessment dated 3/18/14, indicated R117 was safe to smoke. A Vulnerable Adult assessment dated 3/18/14, indicated a recent history of resident to resident aggression, can be aggressive when confronted, had a history of substance abuse, but denied recent use, and was safe for unsupervised LOA.	{F 250}

{F 250}	Continued From page 113	{F 250}		

The care plan revised 4/27/14, indicated R117 did exhibit verbal abuse/aggression towards staff. "Staff has reasonable cause to believe that Resident has brought alcohol & drugs into the facility for other Residents." R117 had displayed actual physical behaviors/physical fight with roommate. R117 would play music very loud and would not turn the music down which disrupted other residents. R117 often left the facility and did not return at said time. The interventions were R117 would cease bringing any type of alcoholic beverages or illegal drugs into the facility and would not exhibit threatening behavior toward staff or other residents. R117 would follow the facility policies and procedures R117 would return to facility at designated time or will call facility to report he would be late. "If Resident becomes disruptive, aggressive/not redirect able, threatening to others, 911 will be called."

The progress notes were reviewed and noted:
- On 2/12/14, at 9:11 p.m. a progress note indicated: Health status note: "resident signed out at 10:00 a.m. and wrote to be back at 6:00 p.m. tonight. Resident is not back yet. Resident did not leave number to call and does not have emergency contact person to call. Writer called 911 and reported him missing. Writer also notified administrator."
- On 2/13/14 at 6:39 a.m. a progress note indicated, "Police took report during this shift about resident reported missing during the PM shift. Resident did (not) return to facility at this time. Will continue to search. Progress notes lacked documentation of R117 return to the facility."
- On 2/16/14, 9:06 a.m. a progress note indicated, "resident was aggressive and verbally abusive to

{F 250}	Continued From page 114 fellow resident that is his roommate, he was swearing at him, calling him the F word, told him to get the F out of here, even went beyond and told him, there nothing wrong with you. Roommate said he gave a lot of trouble. A call was placed to administrator and DON we are continuing to monitor supervisor is aware." - On 3/27/14 at 4:01 p.m. a progress note indicated, "Resident had a visit from his relocation worker today; he became upset and was yelling and swearing during their visit. Writer and environmental services director approached to follow up with him. He was not in his room; drug paraphernalia was on his dresser and removed room the room. Resident was found in the staff lounge and he was educated that he could eat his meal in the dining room with other residents, continued to refuse to leave and swore at relocation worker who called 911. Police arrived and took drug paraphernalia and spoke with resident. ...states he wants to be independent. Writer called Hennepin county adult protection services to express the concern about resident's behaviors and potential risk to others. They stated that they could not take a report unless actual harm occurs. Staff educated to call 911 and CEP [common entry point] should aggressive behaviors towards others occur. Resident is calm at this time." - On 3/31/14, at 4:43 a.m. a progress note indicated, "AM nurse reported resident went out on LOA on 3/30/14, as usual. However, resident did not return to facility as required. About 02:00 a.m. Writer called police and made the report. Two police officers came to the facility and said the report should only be made after 24 hours." - On 3/31/14, at 1:40 p.m. resident had still not returned from LOA on 3/30/14. "No phone numbers on file to try to reach resident."	{F 250}

{F 250}	Continued From page 118 - On 5/6/14, at 9:37 a.m. R117 was observed to come out of the facility, walked across the top of the planters (jumped up with ease, skipping gait) and had lit his cigarette at the front entrance. Smoking monitor and a DM did not intervene. R117 spoke with female staff, then went over to R36, exchanged money, and then went to talk with R129 (who had 1:1 staff that was standing 20 feet away from R129) and R91. [Note R117 pulled out a wad of cash, and R36 was observed to give him cash the smoke monitor and 1:1 staff did not observe the exchange]. R129 sat on planter and smoked with R91 and R117. R117 then returned to the building. - On 5/7/14, at 8:18 a.m. R37 was observed standing next to R117, who was sitting on the planter on the rear of the smoking patio. R37 had his wallet out and both R37 and R117 were watching the smoke monitor while R27 held his wallet open. R1 arrived back with the transport van and zoomed into the smoking patio at a high rate of speed on her motorized scooter, leaving her one to one staff behind. R37 handed R1 his wallet, (unable to determine if she took anything from it). R1 then handed the wallet back to R37. He whispered over to her. At 8:24 a.m. R37 again gave his wallet back to R1, (we were not able to see if she took anything from it), and she then reached down and put the wallet into his lower left leg pants pocket. - On 5/7/14, at 8:43 a.m. R1 stated "there were no smoking problems here until this thing started [referring to 1:1 for unsafe smoking and not following facility rules], I used to buy 50-60 packs of cigarettes a day for these guys and I never charged them a thing." "Now because I have a 1:1, R117 buys things and he charges them a pack of cigarettes just to walk down to that little store." R1 stated that "[R117] was also known to	{F 250}

charge for getting drugs and alcohol." R1 turned to R9 (roommate) and stated, "Isn't that right!" R9 verified the statement was true. The facility identified R1 as known smoking issues and questionably drugs and the facility identified R9 as a known pot smoker.
- On 5/7/14, at 1:15 p.m. a call was made to the MPD-A to see if the facility had reported suspected drug dealing. MPD-A stated the facility called today to report suspected drug dealing, but had not reported it between 3/18/14 (date of survey exit) and today (5/7/14).
- On 5/8/14, at 2:38 a.m. a progress note indicated, "Resident left facility since morning of 5/7/14, and has not returned to facility. Time now is 02:40 the DON had been notified, 911 had been called, and they are on their way to come and do a missing persons report. There is no phone number on file to contact the resident. Will continue to update as time goes on."
- On 5/8/14, at 6:30 a.m. "Resident is still not back to the facility. The police are aware, have made a police report, and have assigned a case number for missing person. Please call MPD-C at phone number 612-673-5303 as soon as resident return to facility."
- On 5/8/13, at 3:35 p.m. the interdisciplinary team (IDT) met to discuss the elopement and issued a 30 day discharge notice, and supervised leave only.
- On 5/9/14, at 10:34 a.m. R117 was observed back in the facility. At 11:22 a.m. no progress notes have been entered to acknowledge R117 was back in the facility.
- On 5/9/13, at 10:38 a.m. (was added to the progress notes) "Resident returned to facility unharmed. Resident verbalizes that resident is OK and has been safe at Treasure Island Casino. Writer called primary care physician to update on

residents return and request an order that states: Resident must be supervised on all LOA's except medical appointments. Awaiting return call from clinic."
- On 5/9/14, at 11:50 a.m. "Writer received a new order from PCP that resident cannot leave the facility unless supervised. Also resident can leave the facility unsupervised if going to a medical appointment. While writer was speaking to resident writer observed residents eyes were bulging and he had very rapid jaw movement. Resident appears to be under the influence of something. Writer placed another call to PCP office to inform MD that writer believes resident is under the influence. Writer also reported to nurse at PCP's office that resident has not taken any medications. Writer also asked resident if he would complete a toxicology screen and resident denied. Resident also denied any drug or alcohol use to writer. Writer is concerned of his safety. Awaiting response from MD office."
- On 5/9/14, at 12:00 p.m. "writer spoke with nurse at PCP office and orders received to send resident to the emergency room at St. Joseph's office due to suspected drug use along with his heart conditions. Resident will be sent to St. Joseph's hospital."
- On 5/9/14, at 12:23 p.m. two police cruisers (three officers) and an ambulance were observed to pull up to the facility and enter the building. The consultant administrator informed the surveyors that "R117 was being really unruly, had been out of the facility for several days and not been taking his medication (including Coumadin), stated his eyes are bulging and I am so concerned he is going to have a heart attack, he is refusing to do a tox [drug toxicity] screen here (urine drug screen). We have called the doctor and he said to transfer to the hospital for evaluation. The police

Resident was unwilling with the officers and refused to get on the gurney. Three police office had to physically walk resident out of the building. While resident was walking out resident continued to scream "I am leaving AMA, I am leaving AMA. Writer gave paramedics full report on resident's condition and the fact that resident has not taken Coumadin for three days with his Atrial fibrillation and CHF condition. All medication sheets, Face Sheet, code status, and physician orders sent with paramedics. Writer called St. Joseph's ER and gave report and updated on status, along with requesting toxicology screen. - On 5/9/14, at 1:04 p.m. a social work progress note indicated, "Resident discharged from the facility against medical advice today; May 9th, 2014 at 12:45 p.m. Administrator informed writer that resident was threatening to leave AMA. Writer went to meet with resident to discuss his plan, where he was planning on going, and why. When writer approached, resident yelled 'Are you LSW-C?' Writer responded affirmatively, resident then yelled 'Why did you tell [R81], I was threatening him? He's my friend and I have the right to see him.' Writer informed resident that writer was not aware of what he was talking about, writer asked who [R81] was. [R117] walked away. Another social worker approached resident regarding his statement that he was leaving AMA. Social worker asked to talk with resident he yelled 'no' and slammed the door. Social worker knocked on the door and asked resident what his plans were, he again slammed the door. Writer and social worker were informed that resident	{F 250}

appeared to be under the influence of a substance and had been asked to have a tox-screen done, when he refused his MD gave an order for resident to be sent to St. Joseph's hospital (where his cardiologist is) so that he could be monitored given his heart condition and not knowing what substances he had ingested. The police and paramedics arrived to take the resident to the hospital, resident stated that he was leaving the facility AMA. The police asked him "you are leaving the facility against medical advice?" resident stated "yes." Police and EMT then stated that his doctor gave an order for him to be admitted to the hospital so they had to take him. Resident again refused. The police informed him that they had to take him. Resident was asked to sit on the gurney he refused multiple times, the police escorted him out of the building. They asked resident if he had any drugs on his person, he stated 'yes' in his back pocket. Residents person was searched, a wallet and a pack of cigarettes were removed from his back pockets. A rolled up bag was removed from his fleece jacket pocket and resident identified this as cocaine. As resident walked down the hall he continued to yell 'I am leaving AMA' Resident refused to sign the Release of Responsibility for Discharge Against Medical Advice form. While resident was threatening to leave AMA the administrator called adult protection to update them on the concern that resident was threatening to leave and we were not able to get the information about where he would be going. The adult protection worker stated that they could not take the report until resident actually left the building. Writer called adult protection at 12:50 PM stating that resident had discharged against medical advice at 12:45 PM. Writer informed them that resident had left via ambulance and

facility (R117) and had exchanged something with resident R129 who had been admitted to the hospital on 5/11/14, with alcohol intoxication with a level of 0.323. CLSW-A stated, "I have personally had to question the 1:1 staff here at the facility when I have seen them sitting outside the door when resident is in the room with the door shut. When I have asked 1:1 staff how they are monitoring the resident when sitting outside the door some have gotten argumentative and said the resident did not want them in the room and I have told them you are supposed to be at arm-length not behind but in-front to make sure nothing is exchanged. I cannot imagine how a resident who was on 1:1 would get that much alcohol in her system and when I got here on Sunday I came to the office to open the computer to see what happened and there were no nursing notes. I went outside to the desk and told the administrator and director of nursing to get the nurse in to document and have the 1:1 fired. There are so many people here than I have seen on 1:1 for me 1:1 means the person needs to be somewhere else not at the nursing home." Although the care plan had been updated on 4/11/14, by CLSW-C and on 4/27/14 by CLSW-A, R117 had not been offered services for his repeated aggressive and confrontational behaviors, or chemical dependency.

R62 had documented drug use on the facility grounds without any social service interventions developed to address substance abuse.

R62 was admitted on 8/31/13, with diagnoses that included memory loss, dementia and cerebrovascular accident (CVA). Review of the quarterly MDS dated 2/25/14, indicated R62 had moderate cognitive impairment. The MDS did not

{F 250}	Continued From page 126 address R62's substance abuse. The most recent cognitive loss/dementia CAA dated 9/11/13, lacked a comprehensive summary of the resident. Review of the most recent Social Services Quarterly review dated 2/25/14, indicated no changes to the LOA Safety, Vulnerable Adult and Smoking Assessment. Review of a Vulnerable Adult Assessment dated 3/18/14, identified R62 had "past/recent substance abuse" and a history of risky behaviors and being in an abusive relationship. R62 was identified to need supervised LOA except for appointments with scheduled transport. R62's care plan with revision date of 4/26/14, identified that R62 had no indications for displaying inappropriate behaviors, had a history of being in an abusive relationship, and had impaired cognitive function/dementia, evidenced by varying mental function, judgment deficit, dementia, 'ETOH" abuse and impaired decision making skills. The care plan did not address alcohol and/or drug abuse even though it was identified in the Vulnerable Adult Assessment and progress notes. Review of R62's Progress Notes revealed the following: -On 1/24/14, at 5:03 p.m. indicated "a resident approached writer alerting us that another resident is sitting out front smoking marijuana. Writer went and found R62 smoking a joint. Writer told res that she'd have to put it out, and to consider this a warning. She was informed that the next time she will be discharged. Writer also asked res if she had anymore marijuana and she	{F 250}

{F 250}	Continued From page 129 -At 10:19 a.m. R9 returned back to the building. R9's significant MDS dated 3/24/14, identified R9's diagnoses included Schizophrenia, diabetes mellitus, orofacial dyskinesia, psychotic disorder, manic depression and chronic obstructive pulmonary disease (COPD). The MDS indicated R9 had no behaviors and had a BIMS score of 15 indicating intact cognition. In addition, the MDS indicated R9 received one person assist with ADL's. The nutritional status CAA dated 3/25/14, had identified R9 had history of tobacco abuse. R9's Vulnerable Adult care plan revised 10/20/11, identified R9 was a vulnerable adult related to cognitive limitations and physical limitations. The care plan goal indicated R9 would "remain safe within Camden Care Center at all times." The care plan identified R9 required supervision for LOA's from the facility. The care plan lacked to indicate R9 was a "Known pot smoker" A Vulnerable Adult assessment dated 3/18/14, indicated R9 had history of aggression to others, had mental illness/poor judgment, had no history of chemical abuse and "Cannot leave the facility unsupervised." The assessment did not indicate R9 was a "Known pot smoker." When asked on 5/13/14, at 8:36 a.m. regarding smoking "Pot" R9 stated "It's a deem lie that am using any pot" and kept repeating same statement to the surveyor. Social Service Notes were reviewed which revealed: -Social Service Note dated 4/23/14, indicated R9 had gone to social worker (SW) requesting to get her tobacco materials that had been taken from her roommate side back and had indicated they were hers. SW's reported to R9 the materials	{F 250}

When interviewed on 5/12/14, at 2:26 p.m. CLSW-A stated when R9's room had been searched on 4/23/14, R9's cigarette roller had been found in roommates side and had been taken out of the room and kept in the social service room and family had been called to get it but R9's family was very upset on the staff removing the roller out of room. Both CLSW-A and CLSW-B stated they were un-aware R9 was an alleged "Known pot smoker" or had history of using per the Resident List Report dated 5/8/2014, provided by the administrator. Both indicated they had not gotten the list of residents who had been thought to have substance abuse issues. Additionally both stated the facility lacked consistent documentation of incidents, interventions, communication and follow up.

Elopements:
R13 eloped from the facility on 5/6/14, after staff allowed the resident to transport to and from the designated smoking area without staff. R13 was not provided with medically-related social services to address her elopement risk and smoking.

Upon arrival to the facility on 5/5/14, at 1:35 p.m. R13 was observed to be out on the designated smoking area with four other residents and two facility staff. R13 was observed to be in a wheelchair with a half lap tray on the left side of the wheelchair. R13 was observed to be smoking a cigarette independently.

On 5/6/14, at 8:30 a.m. R13 was observed to wheel independently to the front door. A chirping sound was heard and R13 was observed to exit the facility and wheel herself backwards to the

smoking patio. No staff escorted her. Seven residents were observed to be in the designated smoking area. R13 wheeled to the table under the arbor, was assisted to light a cigarette by the smoking monitor and smoked independently.
- At 8:33 a.m. R13 remained on the smoking patio with four other residents smoking.
- At 8:46 a.m. R13 extinguished her cigarette appropriately and wheeled herself back into the facility. A loud beeping noise was heard as R13 entered the facility. The sound was immediately silenced to a slight chirping sound. R13 wheeled into the facility and down the hallway. No staff escorted her.
- At approximately 11:00 a.m. R13 was randomly observed to smoking in the designated smoking area, a male staff was observed to be monitoring the smokers. R13 was observed to complete smoking her cigarette at approximately 11:20 a.m. and wheel herself into the facility unescorted. The smoking monitor did not assist. A quiet chirping noise was heard as R13 entered the building.
-At 4:45 p.m. R13 was observed by the surveyor to be at the end of the driveway in her wheelchair wheeling with her feet towards the 49th Avenue North. R13 turned left upon reaching the sidewalk and began wheeling herself with difficulty towards 6th street. After a few feet, R13 made a U-turn and began pushing herself backwards down the sidewalk. The street was observed to be busy with multiple cars driving rapidly 30+ miles per hour (MPH). The smoking monitor was observed to be behind a pillar with his back to the street and R13.
- At 4:46 p.m. the front desk monitor (O)-C was notified by the surveyor of R13 observed on the city sidewalk. O-C verified R13 "could not" be on the sidewalk near the street unsupervised and

{F 250}	Continued From page 133	{F 250}		

immediately ran outside to R13. When O-C reached the resident, R13 was approximately 20 feet past the end of the driveway and half way to 6th street, wheeling backwards facing oncoming traffic. O-C was observed to speak with R13 and after several minutes, wheeled her back into the facility. O-C could be heard to tell the smoking monitor to watch for residents eloping. O-C returned R13 to the facility.

R13's Diagnosis Report dated 2/4/09, indicated diagnoses to include hemiplegia affecting the dominant side, depressive disorder and cognitive deficits due to cerebrovascular disease.

The Vulnerable Adult Assessment dated 6/24/13, identified R13 had history of wandering into other resident's rooms, history of unsafe smoking and taking other peoples belongings. The assessment identified R13 had cognitive deficits, short-term memory loss, impaired decision making and poor judgment. In addition, R13 was identified to require supervised LOAs only and identified R13 had a past history of drug abuse.

LOA Safety Assessment dated 6/24/13, identified R13 had cognitive impairments related to dementia, and resident was unable to leave the facility unsupervised.

A Camden Care Center Care Conference form dated 10/1/13, indicated, "[R13] propels herself independently in a wheelchair to all destinations within the building - at times she will propel herself backwards and needs frequent reminders to not do this. She has a history of wandering from the facility and thus wears a wanderguard [sic-departure alert system] to alert staff if she attempts to leave the building. She also has a

history of wandering into other resident rooms and taking their belongings, which can cause other residents to become frustrated with her so she needs frequent redirection."

The Nursing Assessment Packet Review for the reference period 3/19 through 3/25/14, included a safety Risk (Fall) Assessment dated 3/19/14. The assessments did not address or review the need for a WanderGuard.

R13's quarterly MDS dated 3/25/14, indicated R13 was cognitively intact, was identified to have no behavior problems, and required extensive assistance with ADLs.

A Care Conference summary dated 4/10/14, and another Care Conference form (undated) did not address R13's use of a WanderGuard or elopement risk.

R13's Physician's Order Sheet dated 4/16/14, directed to check R13's WanderGuard every shift beginning 9/19/13.

The Behavior Monitoring Documentation form (undated) identified R13's target behavior was, "Wandering into other resident rooms" and indicated appropriate interventions such as assist resident to attend activities, assist resident to the bathroom if needed, anticipate needs, visit with resident if she needs help. Dated as reviewed last on 4/23 (no year).

R13's Vulnerable Adult care plan dated 4/28/14, identified she had a history of elopement. The goal identified R13 would remain safe at Camden Care Center. An intervention dated 10/7/11, indicated, "Wanderguard [sic] in place." An

intervention dated as initiated 3/16/12, directed, "Resident has been assessed and may not leave this facility without supervision.

An undated Group 5 assignment sheet (a form carried by nursing assistant staff for quick reference to care plan needs) identified R13 had a WanderGuard.

The clinical record lacked evidence R13's elopement was documented, including dated, time, location, and those involved. The clinical record lacked evidence R13 was evaluated for elopement risk after being found to elope, or R13's physician was notified at the time of the incident.

A nursing progress note for R13 written by administration on 5/8/14, at 9:04 a.m. "Report received that the resident attempted to leave the facility on Tuesday May 6 around 4 p.m. trying to get to her son, resident was found by the receptionist on the sidewalk, redirected back into the facility. Resident has her WanderGuard on. Receptionist [O-C] reported that the she reminded the resident that resident cannot leave the facility unsupervised; receptionist was educated that when residents with WanderGuard would like to get out of the building to smoke, the smoke monitor should be alerted. Son and daughter notified. Message left to NPs voicemail to update on resident. Although the note indicated a message was left for NP, the NP was not called until four days after the incident.

On 5/9/14, at 11:00 a.m. R13 was observed to wheel herself backwards out of the facility through the front entrance. The WanderGuard did not sound. O-C was observed to be at the front

{F 250}	Continued From page 136 desk and was observed to reach to the right. O-C verified she reached to silence the alarm for the WanderGuard. R13 was observed to exit the facility without staff and wheel without staff to the designated smoking area. - At approximately 11:25 a.m. R13 was observed to wheel herself out of the designated smoking area, push the handicapped switch to open both doors and wheel herself backwards into the facility. O-C was observed to silence the WanderGuard alarm (reach down to activate switch). R13 wheeled herself backwards down the hallway into the facility. At the time of the observation, O-C stated she disabled the WanderGuard alarm for residents who wanted to smoke in the designated smoking area. At no time during the observation, do O-C alert the smoking monitor or staff of R13 leaving the building. On 5/9/14, at 1:11 p.m. RN-C stated she was in the room when O-C reported R13 had eloped. RN-C stated the announcement was made and RN-C, LPN-E, LPN-A and dietary manager (DM) were present for the announcement. RN-C stated she did not report the concern as it was LPN-A's responsibility and verified R13 was assigned to her unit. RN-C stated LPN-E was not available for interview. RN-C stated if a resident was found to elope, the staff should try to locate the resident; notify the family and physician of the elopement and if the resident was not located to notify law enforcement. RN-C stated an incident report should have been completed. RN-C did not indicate when the administrator or State agency (SA) would be notified. When asked if and when the administrator and SA should be notified for elopement, RN-C stated LPN-A was responsible and she "believed" she may have notified the	{F 250}

{F 250}	Continued From page 137 administrator or SA. RN-C was unclear if this occurred and was unclear when to notify the administrator and SA. Information, including the incident report and notifications, were requested at the time of the interview. On 5/9/14, at 1:26 p.m. RN-C verified no incident report was completed regarding R13's elopement. RN-C provided a copy of a corresponding nursing progress note dated 5/8/14 On 5/12/14, at 10:26 a.m. DON stated he was not in the facility at the time of the elopement and he was not informed until 5/8/14. DON confirmed R13 should not have left the facility unescorted and stated residents with WanderGuard were at risk for elopement and leaving the facility without supervision was a safety concern. In addition, DON verified the details of the incident were not documented in the clinical record and should have been. DON verified R13 should have been evaluated for elopement risk after the incident. On 5/12/14, at approximately 2:00 p.m. CLSW-A and CLSW-B stated they were not informed of R13's elopement on 5/6/14. Both verified they should have been informed so they could assess the resident. R103 was admitted to the facility on 7/29/13, per the Admission Record with diagnoses of multiple right sided fractures or arm, leg, rib and pelvis related to a motor vehicle accident. A progress note on 1/5/14, at 5:30 a.m. "Resident is oriented X 3, able to communicate needs and wants. Resident was independent with movement and bed mobility."	{F 250}

{F 250}	Continued From page 138	{F 250}		

An MDS quarterly assessment dated 1/31/14, indicated R103 required supervision and assist of one for bed mobility, transfers, locomotion on and off the unit, dressing and toileting.

Physician's Orders dated 4/16/14, indicated R103 may have a LOA unsupervised with medications.

A progress Note dated 4/20/14, at 9:48 p.m. read, "Pt went on LOA." The chart lacked documentation of return to the facility. The medical record was reviewed on 5/11/14, and lacked documentation of LOA or discharge. The facility could not locate the Patient Sign In/Sign Out log sheet for that date.

On 5/10/14, at 1:57 p.m. R103 was observed to put two plastic bags of belongings in a car got in and was driven away. The chart lacked documentation of why the resident left the facility, the resident was ready for discharge and awaiting placement. It was not clear in the medical record if the resident had been discharged, or was on LOA.

On 5/11/14, at 10:00 a.m. facility staff were asked whether the resident had been discharged, was on LOA, or had returned to the facility. The HUC checked to see and resident was in room. He had signed out on the Resident Sign Out sheet on 5/10/14, and R103 had signed in on the Resident Sign Out sheet on 5//11/14, at 11:00 p.m. The administrator stated he would expect to have medical record documentation when residents left on LOA and returned to the facility.

On 5/11/14, at 10:10 a.m. RN-A was interviewed and was unaware R103 had left the building for

{F 250}	Continued From page 139 ten and a half hours. On 5/12/14, at 1:37 p.m. neither CLSW-A or CLSW-B had any documented notes for R103, but knew he had been working with a relocation worker. They verified R103 had not received any social service interventions for planning for discharge. The Videll Healthcare Limited Liability Company (LLC) Elopement policy dated as effective 5/2012, identified, "Videll Healthcare LLC facilities shall provide a safe environment for resident who are assessed at risk for elopement." The policy defined elopement as "'when a resident leaves the premises or a safe area without authorization (i.e., an order for discharge or leave of absence) and/or any necessary supervision to do so.'" The procedure directed if exit seeking behavior was identified to immediately implement interventions to "manage exit seeking behaviors" such as applying "personal security devices such as WanderGuard..." The procedure to directed staff to complete a "thorough" investigation of the event, document a factual account of the occurrence in the medical record and to update/complete an elopement risk evaluation. Although the policy included pertinent direction for searching if a resident eloped, the policy did not address risks such as smoking and access to the designated smoking area.	{F 250}		
{F 274} SS=D	483.20(b)(2)(ii) COMPREHENSIVE ASSESS AFTER SIGNIFICANT CHANGE A facility must conduct a comprehensive assessment of a resident within 14 days after the facility determines, or should have determined, that there has been a significant change in the	{F 274}

{F 274}	Continued From page 140	{F 274}		

resident's physical or mental condition. (For purpose of this section, a significant change means a major decline or improvement in the resident's status that will not normally resolve itself without further intervention by staff or by implementing standard disease-related clinical interventions, that has an impact on more than one area of the resident's health status, and requires interdisciplinary review or revision of the care plan, or both.)

This REQUIREMENT is not met as evidenced by:
Based on observation, interview, and document review, the facility failed to complete a significant change in status assessment (SCSA) for 2 of 3 residents (R56, R116) who had sustained a decline in functional status; and for 1 of 3 residents (R103) who had experienced a significant improvement in activities of daily living (ADLs).

Findings include:

R56's record was reviewed. A SCSA minimum data set (MDS) assessment was initiated with an assessment reference date (ARD) of 4/26/14, and when reviewed on 5/7/14, at 9:00 a.m. the MDS was noted as in progress with an expected completion date of 5/12/14, twenty-two days after the change in status had been identified.

When interviewed on 5/7/14, at 10:40 a.m. registered nurse (RN)-C stated the SCSA MDS was scheduled to be completed on 5/12/14, and the care plan would be completed seven days later on 5/19/14.

{F 274}	Continued From page 141 When interviewed on 5/13/14, at 9:53 a.m. RN-C stated she had never done MDSs before and had only received online training and telephone support. RN-C stated she used a paper list to track what MDS was due for each resident. A MDS policy was requested and was not received. R116 was admitted to the facility on 1/20/14, with diagnoses of lung cancer with metastasis (cancer moving from one body organ to another) to the liver and the brain, metabolic encephalopathy (temporary or permanent damage to the brain that occurs when the liver cannot clear the toxins from the body), confusion and depression. The admission MDS dated 1/26/14, indicated a Brief Interview for Mental Status (BIMS) score of 15/15, which showed no cognitive deficit, and a Patient Health Questionnaire (PHQ-9 is a multipurpose instrument for screening, diagnosing, monitoring and measuring the severity of depression) score of 4, which indicated minimal depression. According to the admission MDS, R116 was independent in bed mobility, transfers, toileting, dressing, locomotion on an off the unit and required supervision for personal hygiene. On 4/15/14, at 10:49 p.m. a nursing Progress Note indicated, "Pt is declining. He is very weak and needs a lot of assistance." The quarterly MDS dated 4/24/14, depicted R116 as needing assist of one person for bed mobility, ambulation in and out of room, dressing toilet use and hygiene. R116 had also deteriorated and required supervision for eating and transfers.	{F 274}

{F 275}	Continued From page 144 completed on 5/29/13. The Quarterly MDS's were completed on 8/29/13, 11/21/13, and 2/18/14. A fourth quarterly MDS had been initiated with an assessment reference date of 5/14/14. An annual comprehensive MDS was not initiated as required. When interviewed on 5/13/14, at 9:53 a.m. registered nurse (RN)-C verified she had initiated a quarterly MDS instead of the required annual MDS and confirmed that an annual MDS should have been implemented. RN-C stated she had never done MDSs before and received online training and telephone support. RN-C stated she used a paper list to track what MDS was due for each resident. A MDS scheduling and completion policy was requested and was not received.	{F 275}		
{F 280} SS=D	483.20(d)(3), 483.10(k)(2) RIGHT TO PARTICIPATE PLANNING CARE-REVISE CP The resident has the right, unless adjudged incompetent or otherwise found to be incapacitated under the laws of the State, to participate in planning care and treatment or changes in care and treatment. A comprehensive care plan must be developed within 7 days after the completion of the comprehensive assessment; prepared by an interdisciplinary team, that includes the attending physician, a registered nurse with responsibility for the resident, and other appropriate staff in disciplines as determined by the resident's needs, and, to the extent practicable, the participation of the resident, the resident's family or the resident's legal representative; and periodically reviewed	{F 280}

{F 280}	Continued From page 145 and revised by a team of qualified persons after each assessment. This REQUIREMENT is not met as evidenced by: Based on interview and document review, the facility failed to ensure resident care plans were revised when appropriate, related to Foley catheter use for 1 of 3 residents (R36); for 1 of 1 resident (R116) who had a decline in activities of daily living (ADLs); and for 1 of 6 residents (R62) who was identified by the facility who had substance abuse issues. Findings include: Review of R36 ' s quarterly Minimum Data Set (MDS) dated 2/18/14, indicated R36 did not have a Foley catheter in use. Review of the care plan for R36 dated 3/18/14, identified a focus topic; " alteration in elimination". The care plan further indicated R36 had a temporary indwelling Foley catheter in place due to diuretic use. Interventions listed; change R36 catheter as needed per Physician ' s Orders and to irrigate the catheter as needed. When interviewing R36 on 5/7/14, at 7:41 a.m. he stated he did not have a catheter and used the toilet independently. During interview on 5/7/14, at 1:45 p.m. with registered nurse (RN)-A, she confirmed R36 did not have an indwelling Foley catheter.	{F 280}

{F 280}	Continued From page 146 During interview on 5/13/14, at 11:41 a.m. with RN-B, she indicated R36 previously had an indwelling Foley catheter but no longer used one. RN-B confirmed the care plan should have been updated to reflect R36's current status. A care plan policy was requested and was not provided. R116 was admitted to the facility on 1/20/14, with diagnoses of lung cancer with metastasis (cancer moving from one body organ to another) to the liver and the brain, metabolic encephalopathy (temporary or permanent damage to the brain that occurs when the liver cannot clear the toxins from the body), confusion and depression. R116 was receiving hospice care since 1/21/14, the resident was independent in self-cares, transfers, and mobility. The admission MDS dated 1/26/14, identified a brief interview for mental status (BIMS) score of 15/15, which showed no cognitive deficit, and a patient health questionnaire (PHQ-9 is a multipurpose instrument for screening, diagnosing, monitoring and measuring the severity of depression) score of 4, which indicated minimal depression. The MDS further indicated R116 was independent in bed mobility, transfers, toileting, dressing, locomotion on an off the unit and required supervision for personal hygiene. Review of the quarterly MDS dated 4/24/14, indicated R116 as requiring 1assistance with bed mobility, ambulation in and out of room, dressing, toileting and hygiene. The MDS further indicated R116 required supervision for eating and	{F 280}

{F 280}	Continued From page 147 transfers. Review of the progress notes for R116 on 4/15/14, at 10:49 p.m. indicated R116 condition was declining and requiring more assistance with ADL's. Review of R116 ' s care plan with a revision date of 5/2/14, indicated, "Cognition intact and independent with activities of daily living, with the potential to decline in cognition and function related to terminal diagnosis." The care plan had not been revised to depict the changes in ADLs. On 5/13/14, at 9:11 a.m. the admission nurse and interim MDS coordinator verified that R116 care plan was not current to reflect R116 decline in health status that required assistance with ADL's updated with the needed assistance with ADLs. R62 was admitted to the facility on 8/31/13, with diagnoses that included; memory loss, dementia and cerebrovascular accident (CVA) per the Admission Record. Review of the quarterly MDS dated 2/25/14, indicated R62 had moderate cognitive impairment. The MDS did not address R62's substance abuse. Review of facility progress notes dated 1/24/14, indicated R62 was observed smoking marijuana on the outside smoking patio, verified that she had smoked marijuana, denied having more marijuana and verbalized understanding regarding discharge if she continued this behavior. Review of the most recent cognitive loss/dementia CAA dated 9/11/13, lacked a comprehensive summary of the residents health status Review of a Vulnerable Adult Assessment dated 3/18/14, identified R62 as having "past/recent substance abuse" and a history of risky behaviors	{F 280}

{F 280}	Continued From page 148 and being in an abusive relationship. R62 required supervised LOA (leave of absence) except for appointments with scheduled transport. Review of facility progress notes dated 1/24/14, indicated R62 was observed smoking marijuana on the outside smoking patio, R62 denied she was smoking marijuana Review of R62's care plan with a revision date of 4/26/14, identified R62 having a history of being in an abusive relationship, and as having impaired cognitive function/dementia. Interventions included "approach resident in a calm manner, assess and report any change in mood/behavior and provide the resident with resources as needed. R62 has been assessed and may not leave the facility without supervision." The care plan had never been revised to include R62's known alcohol and/or drug abuse even though it was identified in the Vulnerable Adult Assessment dated 3/18/14, and documented in the nursing progress notes on 1/24/14. During an interview with the facility contracted licensed social worker (CLSW)-A and CLSW-B confirmed the plan of care had not been revised to reflect R62's substance abuse.	{F 280}		
{F 282} SS=D	483.20(k)(3)(ii) SERVICES BY QUALIFIED PERSONS/PER CARE PLAN The services provided or arranged by the facility must be provided by qualified persons in accordance with each resident's written plan of care.	{F 282}

{F 282}	Continued From page 149 This REQUIREMENT is not met as evidenced by: Based on observation, interview and document review, the facility failed to ensure the care plan was followed and target behaviors were monitored for the use of Zyprexa (olanzapine-an antipsychotic medication) for 1 of 1 resident (R89), and failed to ensure smoking interventions were followed in accordance with the care plan for 4 of 4 residents who smoked (R36, R1, R9, R22), and failed to ensure the care plan was followed for 1 of 3 residents (R9) who required dental services. Findings include: R89's care plan for psychotropic medications dated as revised on 1/5/14, identified R89 as having a physician order for Zyprexa (an antidepressant) related to "potential injury to self or others, dementia, agitation and pick [sic] disease." The care plan directed the staff to administer the medication as ordered, monitor/document for side effects and effectiveness of the medication. The care plan further directed the staff to "discuss with MD [physician], family regarding ongoing use of the medication," directed to educate on risks and benefits of using Zyprexa, "Monitor/record occurrence of target behaviors such as agitation, inappropriate response to verbal communication, and document per facility protocol." The care plan lacked appropriate identification of a target behavior which warranted the use of an antipsychotic, such as hallucinations. Although the care plan directed to monitor for a target behavior, the care plan lacked indications for the ongoing use of Zyprexa.	{F 282}

{F 282}	Continued From page 152 Observations of R36 on 5/9/14, at 7:15 a.m. the resident was approached by facility staff to wear a smoking apron. R36 stated he wouldn't wear one after what happened yesterday. R36 stated when staff put a "bib" on R34, R34 took it off and threw it on the ground. R36 stated if she (R34) did not have to wear one, he did not either. R36 wheeled to the smoking patio and smoked a cigarette without an apron on. Observations of R36 on 5/12/14, at 11:38 a.m. the resident wheeled by the smoking monitor personal and lit a cigarette and smoked without an apron on. The smoking monitor personal did not offer R36 a smoking apron. Review of R36 ' s care plan dated 6/14/13, identified R36 as having impaired cognitive function/dementia, alteration in decision making, and/or impaired thought processes. The care plan further indicated R36 required supervision when smoking, and that the resident was to smoke only in designated areas utilizing adaptive equipment apron for safety. An undated list of facility smokers indicated R36 was a supervised smoker and indicated staff keeps smoking material with directions to wear a smoking apron and stay within arm's reach. When interviewed on 5/7/14, at 7:33 a.m. nursing assistant (NA)-B stated she offers to lock the cigarettes in the facility locked box for residents who are unsafe to keep them on their person. NA-B stated if a resident refuses to follow the smoking rules, such as refusing to turn in their smoking materials, refusing to wear aprons, or smoking in non-smoking areas, she makes a	{F 282}

{F 282}	Continued From page 153 note in the smoking monitor log. R1 was observed on 5/5/14, and consecutive days 5/6/14, 5/7/14 and 5/8/14, smoking without wearing an apron, keeping her smoking material's on her and not smoking in the facility designated areas. When interviewed on 5/8/14, at 10:03 a.m. NA-E stated R1 had a pack of cigarettes and a lighter when she got off the transportation van. NA-E stated "She is very stubborn". When interviewed on 5/8/14, at 11:32 a.m. R1 indicated she had left to the appointment with five cigarettes and her lighter because it was going to be a long time without smoking and when she returned to the facility she had handed the cigarettes back to the smoking monitor. Review of R1's smoking evaluation dated 3/17/14, identified R1 as having a history of unsafe smoking practices when heavily medicated and or tired and falls asleep while smoking. R1 cannot safely utilize lighter/matches and cannot safely handle lit smoking materials and was a supervised smoker. The smoking care plan dated 3/12/14, identified R1 was a smoker. The goals were "Will follow all guidelines regarding smoking at Camden Care Center and will remain safe while smoking." The care plan directed R1 will smoke only in designated smoking areas, was a supervised smoker and had refused Cigarettes and lighter to be kept at nursing station for safety. When interviewed on 5/9/14, at 1:59 p.m. the director of nursing (DON) stated R1 had been educated about leaving her smoking materials in	{F 282}

the cart and had been asked to take the cigarettes one at a time. The DON confirmed the plan of care had not been followed.

On 5/6/14, at 7:40 a.m. R9 was observed smoking on the front smoking designated patio with no staff in attendance.

On 5/6/14, at 8:56 a.m. R9 was observed wheeling herself to the front designated smoking area then retrieved cigarettes and lighter from her right sock and placed them on the table next to a covered ash tray. During observation NA-B noticed R9 smoking and covered her with a smoking apron at that time.

Observation at 10:14 a.m. R9 lit another cigarette leaned very far forward to retrieve and replace cigarettes in her socks and continued to lean forward multiple times as she smoked.

On 5/6/14, at 2:45 p.m. when interviewing R9, surveyor observed a cigarette box in each of her socks. When R9 was asked why she was storing the cigarettes in her socks she stated "You can leave now, go now".

The smoking care plan dated 10/20/11, identified R9 as a smoker. Goal "R9 will follow all guidelines regarding smoking at Camden Care Center, will remain safe while smoking." Care plan directed cigarettes and lighter will be kept at nursing station, and R9 was a supervised Smoker.

When interviewed on 5/6/14, at 3:06 p.m. the DON verified R9 was a supervised smoker which meant she should relinquish her cigarette and lighter. DON stated R9 should not have had any

{F 282}	Continued From page 155 tobacco products on her person, but did not have to wear an apron. . When interviewed on 5/6/14, at 3:12 p.m. NA-I (smoking monitor) verified R9 did not have cigarettes in the facility locked box. NA-I stated he had been working at the facility for a month and R9 had never had cigarettes in the locked box. Observation on 5/6/14 at 8:05 a.m., staff was observed assisting R22 to the smoking area, applied a smoking apron and placed a blanket around his shoulders. Staff remained near but not within an arms-length as R22 held a handful of Kleenex while smoking. Observation on 5/7/14, at 9:27 a.m. R22 was observed outside in the designated smoking area sitting in his w/c next to the building pillar. R22 was holding a cigarette on the right hand and the other hand holding a the self-extinguishing ash tray. R22 was not wearing a smoking apron and had a blanket across his lap. R22 dropped his cigarette on to his shirt/blanket, was able to pick it up himself. The smoke monitor personal was not at arms-length and did not observe this happen. NA-B was standing approximately six feet away from the resident. At 9:31 a.m. R22 continued to smoke with no smoking apron, he dropped his cigarette for the second time on to his lap and was able to pick it up himself. NA-B was observed standing by the smoking cart approximately 5 feet away from the resident and was not at arms-length to quickly assist the resident. Review of R22's care plan dated 11/1/12, indicated R22 was a smoker with the goal, "(R22)	{F 282}

will follow all guidelines regarding smoking at Camden Care Center, will remain safe while smoking." The care plan also indicated R22 was wear smoking apron while smoking. Staff to intervene is resident displays unsafe smoking behaviors or refuses safety interventions, and R22 was a supervised smoker.

Review of R22's Smoking Evaluation dated 4/22/14, indicated R22 had a history of smoking in inappropriate places, burn holes in his clothing , was a supervised smoker and smoking materials were secured by staff.

When interviewed on 5/7/14, at 9:33 a.m. NA-B stated she had not witnessed R22 drop his cigarette at 9:27 a.m. and again at 9:31 a.m. even though she was standing near the smoking cart and designated to monitor resident during smoking.

When interviewed on 5/9/14, at 1:59 p.m. the DON confirmed the plan of care had not been implemented related to R22 smoking privileges and safety.

Review of the annual Minimum Data Set (MDS) dated 10/11/13, did not identify R9 dental issues or problems with teeth. The significant MDS dated 3/24/14, indicated R9 had no cognitive impairment and required one person assist of staff with personal hygiene.

R9's care plan reviewed 4/9/12, indicated R9 "has dental needs" and listed interventions of "Resident has natural teeth. Has some missing teeth. Resident will be seen annually or as needed. Nursing to notify dentist of any dental concerns. Resident has been seen by In-House

{F 309}	Continued From page 158	{F 309}		

This REQUIREMENT is not met as evidenced by:
Based on interview and document review, the facility failed to coordinate hospice services for 1 of 1 resident (R56) reviewed for hospice.

Findings include:

R56's annual Minimum Data Set (MDS) dated 2/24/14, included a Brief Interview of Mental Status Score (BIMS) of 15 (cognitively intact).

A physician's order dated 4/18/14, gave approval for hospice to evaluate and treat and for in-house psychiatry services to be provided.

A Provider Orders for Life Sustaining Treatment (POLST) dated 4/21/14, indicated R56's cardiopulmonary resuscitation status (CPR) status was DNR/Do Not Attempt Resuscitation (Allow Natural Death) and goals of treatment were noted as Comfort Care. The POLST dated 4/21/14, was signed by R56's husband.

Review of the facility care plan dated 4/23/14, indicated R56 was DNR/Do Not Intubate (DNI), comfort cares and was receiving hospice services, medical directives would be honored with an intervention to coordinate care with hospice.

A POLST dated 4/26/14, indicated R56's CPR status was CPR/Attempt to Resuscitate, directed to Limit Interventions and Treat Reversible Conditions and included interventions and treatments of IV/IM antibiotic treatment and IV fluid administration. The POLST dated 4/26/14,

{F 309}	Continued From page 159 was signed by R56. A nurse practitioner (NP) progress note dated 4/30/14, noted a diagnosis of end stage liver disease, now on hospice secondary to decline in condition. Review of the hospice Team Care Plan dated 5/7/14, indicated R56 signed onto hospice on 4/21/14, with a diagnosis of chronic liver disease with a prognosis of less than six months to live. Review of the hospice care plan dated 5/7/14, indicated R56 was DNR with an intervention of "DO NOT RESUSCITATE." A Residential Communication Note from hospice dated 5/12/14, indicated a message was left with the hospice social worker to call the facility social worker regarding POLST. A Progress Note dated 5/12/14, indicated contracted licensed social worker (CLSW)-B spoke with R56 about her POLST. R56 reported to SW-B she wanted to be DNR/comfort cares and that was also what her husband wanted. SW-B indicated she placed the correct POLST information in the advanced directives section of the medical record. A Progress Notes dated 5/12/14, indicated CLSW-B spoke with R56's husband regarding the POLST and hospice. R56's husband stated to CLSW-B the POLST should be DNR/comfort cares. On 5/13/14, at 8:41 a.m. a review of the physician's orders signed 4/9/14, continued to direct "Full Code."	{F 309}

{F 309}	Continued From page 160 On 5/7/14, at 9:31 a.m. registered nurse (RN)-A reported he would go to the POLST in the front of the chart to determine what to do if R56 was found without a pulse and not breathing. The POLST in the front of the chart was the one dated 4/26/14, directing CPR. When interviewed on 5/7/14, at 10:43 a.m. licensed practical nurse (LPN)-A stated the POLST dated 4/26/14 would be the current one and would be the one the nurses would refer. On 5/7/14, at 10:45 a.m. the NP stated her plan of care for R56 was DNR and comfort care only. The NP stated she did not feel the resident was capable of making a decision for her POLST and the decision should be made by R56's husband. Upon interview on 5/7/14, at 10:55 a.m. the hospice RN-E stated she was unaware the POLST for R56 was changed on 4/26/14. RN-E stated CLSW-D completed the POLST dated 4/21/14, with R56's husband. When interviewed on 5/7/14, at 12:04 p.m. CLSW-D stated the reason why the POLST dated 4/21/14, was signed by R56's husband was R56 "was really confused and uncooperative" and directed all questions to her husband. SW-D stated she was unaware the POLST was changed on 4/26/14, and would expect the facility to notify hospice with any changes because full code and the treatments requested would not be a hospice focus of care. On 5/7/14, at 12:14 p.m. the health unit coordinator (HUC) verified the facility did not have a hospice care plan for R56. On 5/7/14, at 1:08	{F 309}

{F 309}	Continued From page 161 p.m. the HUC provided a hospice care plan and stated the care plan was faxed to the facility on 5/7/14. When interviewed on 5/7/14, at 12:26 p.m. nursing assistant (NA)-D stated he does not know what hospice does for R56, he sees them come in but that's it. Upon interview on 5/7/14, at 2:01 p.m. RN-F stated the POLST dated 4/21/14, was signed by the hospice medical director on 5/7/14, with the original effective date of 4/21/14. RN-F stated she expected the hospice care plan to be in the chart within two weeks of enrollment. When interviewed on 5/9/14, at 9:22 a.m. R56's husband stated he recalled signing the POLST dated 4/21/14, and verified his expectations were R56 was DNR and comfort care only. On 5/12/14, at 1:50 p.m. SW-B stated she had followed up with hospice and the intent is for R56 to be DNR and SW-B would make sure that was in place. RN-B was interviewed on 5/13/14, at 11:41 a.m. and stated she was not aware of the code status discrepancy. RN-B stated she or the nurse would be responsible for communicating with the physician regarding code status. RN-B verified the physician's orders for Full Code did not match the POLST dated 4/21/14, and the nurses would have mixed guidance for what to do in case of emergency. On 5/13/14, at 1:50 p.m. RN-B provided a copy of the POLST signed by the hospice physician and stated the NP was aware of the code status	{F 309}

{F 309}	Continued From page 162 because she had given orders for hospice. The facility Social Services/Social Work policy (undated) directed "Work with the interdisciplinary team and administration to promote and protect resident rights and the psychological well-being of each resident." A hospice policy was requested and was not provided.	{F 309}		
{F 314} SS=D	483.25(c) TREATMENT/SVCS TO PREVENT/HEAL PRESSURE SORES Based on the comprehensive assessment of a resident, the facility must ensure that a resident who enters the facility without pressure sores does not develop pressure sores unless the individual's clinical condition demonstrates that they were unavoidable; and a resident having pressure sores receives necessary treatment and services to promote healing, prevent infection and prevent new sores from developing. This REQUIREMENT is not met as evidenced by: Based on interview and document review, the facility failed to develop interventions for 1 of 3 residents (R123) identified with pressure ulcers at the time of admission to the facility. Findings include: R123's Hospital Nursing Progress Note dated 4/11/14, indicated R123 had three pressure ulcers which were connected to continuous wound vacuum (vac) suction and the dressings were intact. The pressure ulcers locations and stages were not identified.	{F 314}

{F 314}	Continued From page 163 R123 was admitted to the facility on 4/18/14, and deceased on 4/21/14. R123's diagnoses included: spastic paralysis due to multiple sclerosis (MS), pressure ulcers, physical deconditioning, generalized weakness, abnormal pain, diabetes, cerebral palsy, and weakness of both legs obtained from the Discharge Orders and Plan dated 4/18/14. Admission Nursing Assessment dated 4/18/14, indicated a full skin assessment had been completed and a right hip pressure ulcer area with measurements 6.5 centimeters (cm) length (L) x 3 cm width (W) x 2.2 cm depth (D) and 2.5 cm tunnel at 6 o'clock position, right buttock with measurements 4.6 cm (L) x 2.0 cm (W) X 0.0 cm (D) cm and right heel area measured 1.2 cm (L) x 1.0 cm (W) x 2.0 cm (D) had all been identified. The form did not indicate if the areas were pressure related nor were the areas staged. Progress Notes dated 4/18/14, indicated a full skin assessment had been completed with measurements as noted on the Admission Nursing Assessment dated 4/18/14. On the right hip area a wet to dry dressing had been removed and wound bed consisted of moist yellow, pink, red tissue with moderate amount of yellow, red odorless drainage were observed and the surrounding wound tissue had no redness, warmth, or tenderness noted and wound vac dressing had been applied. On the right buttock foam dressing had been removed from with wound bed consisting of dry pink and red tissue, no drainage, no redness, warmth, or tenderness noted to the tissue surrounding the wound and non-adherent dressing applied. On right heel foam dressing had been removed ulcer observed with wound bed consisting of moist red and	{F 314}

{F 314}	Continued From page 164 yellow tissue with scabbing, large amount of odorless drainage noted, no redness or warmth noted to the tissue surrounding the wound and non-adherent dressing was applied. The Progress Note did not also indicate if the areas neither were pressure related nor were the areas staged. A Physician's Order dated 4/18/14, directed staff to "Apply non-adherent dressings to right ischial tuberosity wound and right heel until needed supplies are received." The facility Initial/Temporary Care Plan dated 4/18/14, identified R123 had pressure areas marked and indicated with wound vac. However, the medical record lacked evidence of any other interventions being put into place to prevent and/or minimize potential further skin breakdown such as turning and repositioning, wound care, and pressure relieving mattress. During document review it was revealed a Braden Scale-For Predicting Pressure Sore Risk dated 4/21/14, indicated R123 had a score of 11 which indicated R123 was at high risk and the Comprehensive Evaluation of Skin Risk Factors dated 4/21/14, identified the risk factors but lacked immediate interventions to minimize further potential skin breakdown. R123's admission Minimum Data Set (MDS) dated 4/21/14, indicated R123 required limited to extensive assist of one to two with activities of daily living (ADL's) including bed mobility and transfers; had impairment on one side on the lower extremity with limited range of motion (ROM) and had one Stage 1 (a Stage I pressure ulcer is an observable pressure related alteration	{F 314}

{F 314}	Continued From page 165 of intact skin whose indicators as compared to the adjacent or opposite area on the body may include changes in one or more of the following: skin temperature (warmth or coolness), tissue consistency (firm or boggy feel) and/or sensation (pain, itching) and two Stage 2 pressure ulcers (a Stage 2 is partial thickness skin loss involving epidermis, dermis, or both. The ulcer is superficial and presents clinically as an abrasion, blister, or shallow crater). The MDS noted R123 was not on a turning and repositioning schedule and did not have wound care treatments that were completed in the last seven days. When interviewed on 5/12/14, at 9:58 a.m. registered nurse (RN)-C MDS coordinator verified the temporary care plan had been developed but there without interventions to minimize further potential skin breakdown. RN-C further indicated "I believe there should have been more interventions listed than just the wound vac as resident had already pressure ulcers." On 5/13/14, director of nursing was unavailable for interview. The facility policy entitled Skin Integrity Management, dated 5/12, directed director of nursing services (DNS) or designee and the interdisciplinary team (IDT) were responsible to ensure the development and implementation of a comprehensive plan of care including prevention and wound treatments as indicated. The policy further identified the goal of any skin integrity process is to provide safe and effective care to prevent and/or treat pressure sores or skin issues, maintain function and improve quality of life.	{F 314}

{F 319}	Continued From page 168 scheduled and that R41 went to the consults. A progress note dated 5/1/14, at 3:05 p.m. revealed R41 had become intoxicated while off the facility property on a LOA. Upon his return to the facility, R41 had driven his electric w/c off the curb of the driveway to the facility. R41 had been found lying on the pavement on his right side and his speech was slurred, but R41 remained alert and oriented. The notes indicated, "He stated his last drink was 5 minutes ago. He was incontinent of urine and had a laceration on his forehead, he complained of right arm pain." The physician was notified and 911 was called. R41 was transferred to NMMC for further evaluation. He was admitted to ICU with low blood pressure, low potassium and low magnesium. The medical record lacked evidence that the assessments were reviewed and/or revised for R41's LOA status. On 5/1/14, the fall risk care plan was updated to include the fall on the driveway, but lacked mention of the causative factor of intoxication. On 5/5/14, documentation in the record indicated R41 had been readmitted to the facility from the hospital at 1:43 p.m. New diagnoses from the Intra-agency Transfer Form dated 5/5/14, included: fall, intoxication, and alcoholism. A Physician's Order on 5/5/14, included, "No longer okay to leave unsupervised LOA's." A WanderGuard was ordered for the resident. The care plan revised on 3/18/14, lacked mention of supervised LOA. On 5/6/14, at 9:16 a.m. progress note documentation indicated facility staff had met with the resident to discuss the incident that occurred on 5/1/14, the facility had obtained an order for a supervised LOA. According to the progress note,	{F 319}

{F 323} SS=H	Continued From page 170 HAZARDS/SUPERVISION/DEVICES The facility must ensure that the resident environment remains as free of accident hazards as is possible; and each resident receives adequate supervision and assistance devices to prevent accidents. This REQUIREMENT is not met as evidenced by: An immediate jeopardy related to neglect of supervision for residents was identified during the revisit survey on 5/9/14. The immediate jeopardy began on 5/1/14, and was removed on 5/21/14. However, noncompliance remained at the lower severity level of H, isolated actual harm that that is not immediate jeopardy (IJ). Based on observation, interview and document review, the facility failed to ensure adequate supervision was provided to prevent potential injury from alcohol (ETOH) and drug use for 4 of 11 residents (R37, R129, R41, R117). This resulted in an Immediate Jeopardy (IJ) for these four residents. A second IJ component was identified for 2 of 3 vulnerable residents at risk for elopement (R13, R116), due to the facility's failure to ensure adequate supervision and protection to prevent elopement from the facility. In addition to the resident(s) identified in the IJ, the facility failed to ensure adequate supervision was provided to prevent potential injury from ETOH and drug use for 5 of 11 residents (R9, R14, R62, R86, R113) and failed to ensure 3 of 3 residents (R1, R36, R22) who smoked cigarettes did so in a safe manner as determined by their plans of care.	{F 323}

{F 323}	Continued From page 171	{F 323}		

The IJ began on 5/1/14, when R41 drove an electric wheelchair off the sidewalk at the facility while intoxicated, requiring medical treatment with hospitalization. The administrator, consulting administrator, and director of nursing (DON) were notified of the IJ on 5/9/14, at 2:14 p.m. The administrator, consulting administrator and DON were informed of the additional IJ concerns related to R13 and R116's elopement behaviors, at 3:15 p.m. on 5/12/14. The IJ was not removed by exit of the 5/13/14 survey.

Findings include:

The following deficiency was cited during a revisit conducted on 5/13/14, and was the basis for an IJ to resident's health and safety.

Alleged substance abuse:
R37's progress notes indicated the resident had required hospitalizations 2/22/14, 4/23/14 and 5/10/14, related to ETOH/drug use. The Admission Record dated 1/14/14, indicated R37 had been admitted to the facility on 9/19/13, with diagnoses which included altered mental status, and a history of alcoholism. Progress note documentation indicated R37 had been found with ETOH/vodka while in the facility on 2/21/14, 2/22/14, 2/27/14, 3/2/14, 4/13/14, 4/23/14, 4/24/14, 4/25/14, 5/3/14, 5/5/14, 5/6/14, 5/7/1, 5/9/14 and 5/10/14.

Observations of R37 revealed the following:
- On 5/7/14, at 8:18 a.m. R37 was observed standing next to R117 on the smoking patio with his wallet out. Another resident (R1) arrived and R37 handed his wallet to her. This surveyor was unable to see whether R1 took anything from the

{F 323}	Continued From page 172 wallet before she handed it back to R37. R37 was observed to lean close to R1 and talk to her and gave her his wallet back. At 8:24 a.m. R1 put R37's wallet back in his left pants pocket. - On 5/9/14, at 7:23 a.m. R37 was observed coming out of his room, stated he did not feel good and was going to see if there was any coffee. At 7:28 a.m. R37 was observed coming from the West hallway. R37 was then observed to push another resident's wheelchair down the West hallway and was observed outside R9's room. There was no staff with R37 when during the observation. When R37 returned to the nursing station, he told the HUC he had gotten cigarettes from R9. The HUC asked R37 if he was alone and R37 responded that he was and the HUC asked him where his partner was. Nursing assistant (NA)-L approached at that time and told the HUC she was the 1:1 for R37 today. - On 5/10/14, at 1:07 p.m. R37 was observed being taken to an ambulance. Additional review of R37's record revealed these Progress Notes: - On 11/26/13, the notes indicated chemical dependency (CD) treatment/Alcoholics Anonymous (AA) was discussed. R37 had stated he'd participated in AA services in the past and he'd had success including three years of sobriety before a recent relapse. The note indicated nursing had reported two episodes of ETOH intoxication while in the nursing home since the last visit and R37 had acknowledged the report to be accurate. The assessment/plan included social worker to assist with available CD services, R37 stated he was open to CD services and no ETOH use with nursing to monitor. The NP indicated there were "clear dependency concerns."	{F 323}

{F 323}	Continued From page 173 - On 1/8/14, the notes indicated the resident had a history of ETOH abuse which had also occurred since living at the facility. - On 2/21/14, the notes indicated R37 had been drinking vodka and that an empty bottle had been found. The notes also indicated R37 had been observed to be distributing money to staff and residents. When R37 had noticed he had no money to buy vodka, he had gone to the automatic teller machine (ATM) machine to get money. The notes indicated staff were concerned about his safety and judgment. On 2/21/14, at 7:07 a.m. a note had been documented which indicated R37 was handing out his money to "anyone who would listen" and staff had taken $116.00 dollars from him to lock up. - On 2/22/14, at 10:14 p.m. the notes indicated R37 had called 911 to send himself to the hospital. It was noted R37 had been drinking during the a.m. shift and was drunk. The a.m. shift had taken a bottle of vodka from him. The notes indicated R37 had asked the p.m. shift to return the vodka or pay him $25.00. - On 2/27/14, at 1:13 p.m. the notes indicated R37 wanted to leave on a leave of absence (LOA), was advised he could not go on an unsupervised LOA, but had left the facility. - On 2/27/14, at 10:07 p.m. indicated R37 was "drunk" and had a blood pressure of 147/105. - On 3/2/14, indicated R37 was "drunk" and was noted to have a blood pressure of 176/98 and a pulse of 99. - On 4/1/14, indicated R37 had complained of shortness of breath and chest pain with a blood pressure of 146/102 and a pulse of 109 and was sent to the hospital. - On 4/13/14, the notes indicated R37"seemed intoxicated" and one full bottle of vodka and one quarter full bottle were removed from the room.	{F 323}

{F 323}	Continued From page 174 - On 4/23/14, at 3:44 a.m. indicated R37 was shouting and yelling and appeared intoxicated. One empty bottle of vodka and one 75% emptied were found in R37's room. At 12:04 p.m. staff checked R37's room and found two empty bottles in his room. Staff discussed discharge plans and R37 reported he wanted to stay and the facility and was told it was not ok to drink ETOH at the facility. R37 was offered a transfer to a facility that allowed drinking and he declined. At 3:13 p.m. R37 approached staff and appeared to be intoxicated with slurred speech and smelled of ETOH. R37 stated he would like to get help to have ETOH removed from his body. Staff called 911 and police escorted R37 to detox. - On 4/24/14, at 9:30 a.m. the notes indicated R37 reported chest pain and shortness of breath. R37 was noted to have a blood pressure of 162/103 and a pulse of 88 and was noted to smell of ETOH. At 12:01 p.m. on that day, the notes indicated R37 approached staff and "again was clearly intoxicated." The notes indicated the contracted licensed social worker (CLSW)-A and a police officer had entered R37's room and found an empty vodka bottle under the mattress. The officer told staff he could not remove the resident from the building because R37 was not disturbing anyone and was not aggressive or assaultive in any way. A facility Progress Notes dated 4/25/14, at 3:40 a.m. indicated R37 had been observed earlier walking into and out of R117's room and "seemed to be like an exchange of some transactions." The note indicated staff believed this was a trade and staff would need to monitor R37 for ETOH consumption. Further the note indicated, "A few hours later" R37 was shouting and appeared "intoxicated" and a 75% emptied bottle of vodka was found in R37's room.	{F 323}

{F 323}	Continued From page 175 - On 4/25/14, at 9:58 a.m. notes indicated R37 was "clearly inebriated", had slurred speech and could barely wake up. R37 refused to provide the source where he continued to get ETOH. - On 4/25/14, at 3:24 p.m. notes indicated staff reported R37 appeared intoxicated, was outside swaying back and forth, was very talkative with staff and still smelled like he had ETOH on his breath. - On 5/2/14, notes indicated R37 had removed a wander guard and refused a new one to be placed. - On 5/3/14, notes indicated R37 was walking in the hallway "wobbling" and requested staff give him a shower at 3:00 a.m. R37 was unable to maintain his balance and appeared "intoxicated." Two almost empty bottles of vodka were found in his room. - On 5/5/14, at 3:53 p.m. the notes indicated R37 had exhibited signs of intoxication with an unsteady/staggering gait, slurred speech, odor of ETOH and unkempt appearance. R37 was noted to have continually gone outside, stated he had called a limo and had said he was going to Las Vegas. - On 5/5/14, at 4:56 p.m. the notes indicated R37 had slurred speech, smelled of ETOH and had a staggering gait. - On 5/5/14, at 10:25 p.m. the notes indicated R37 was "intoxicated" and was found with an almost empty bottle of vodka. - On 5/6/14, a note, which indicated it was a late entry for 5/5/14 at 6:00 p.m., indicated R37 was noted walking outside towards the back of the building. R37 was noted to be walking alone with a staggering gait. When approached by staff, R37 had stated he was going to Las Vegas. No odor of ETOH was noted and when asked what he had been doing to become so impaired, R37 reported	{F 323}

he had gotten cocaine and heroin from another resident and confirmed he had been injecting the drugs. Several scattered purple bruises were noted on his forearms. At 1:55 a.m. indicated R37 reported his heart was thumping out of his chest and was found to have a blood pressure of 168 /118 with a pulse of 118. At 4:37 a.m. indicated R37 exited his room without clothing and had a strong odor of ETOH on his breath. Four empty bottles and one unopened bottle of ETOH were found in R37's room and were removed by staff. Also noted R37 started having tremors and palpitations with increased pulse and blood pressure due to ETOH withdrawal and demanded medications.

- On 5/7/14, at 12:04 p.m. indicated R37 was exhibiting signs and symptoms of intoxication as evidenced by odor of ETOH, unsteady/slow/staggering gait, slurred speech, confusion and unkempt appearance. A pattern of missed pain clinic appointments due to intoxication was noted and indicated further appointments would not be made due to ongoing intoxication and inability to follow through with appointments. In addition, R37 had a full bottle of vodka and refused to give the bottle to staff. The note indicated the administrator directed if R37 was unwilling to willingly give staff the ETOH bottle, it was ok for the resident to keep the ETOH and if he became drunk or disruptive to call the police and have him taken to detox.
- On 5/8/14, at 3:42 p.m. the progress notes indicated R37 had been placed on 1:1 observation related to incidences of getting intoxicated.
- On 5/9/14, notes indicated R37 "was clearly intoxicated" and that an empty pint bottle of vodka was found in his room and was noted as the third empty pint bottle taken from R37's room in a 48

{F 323}	Continued From page 177 hour span of time. - On 5/10/14, notes indicated R37 had been observed giving his credit card to R117 on 5/9/14. A second note indicated R37 had returned from LOA accompanied by a friend of another resident (R1). R37 was observed to be shaky and verbalized he was unsteady on his feet. R37 was noted to have shakiness, profuse sweating, sluggish pupils and was noted to have a blood pressure of 178/130 and a pulse of 120s to 140s. - On 5/11/14, the progress notes indicated R37 had a drug screen positive for methadone at the hospital. R37 did not have a prescription for Methadone. The Physician (MD) and Nurse Practitioner (NP) orders indicated they were aware of R37's alcohol use. Notes included: - On 1/8/14, included a diagnosis of ETOH abuse and a note the resident continued to have problems while living in the facility. - On 2/5/14, indicated R37 had recently been found with a bottle of ETOH hidden in his pillow case and was noted to smell of ETOH. - On 2/28/14, an order directed staff to discharge R37 to another facility (that allowed drinking). - On 3/5/14, an order directed; "do not call on-call MD or NP after hours if resident is intoxicated unless he is medically compromised. Allow resident to go to bed [and] sleep." - On 4/9/14, notes indicated R37 had been hospitalized from 4/1/14 from 4/8/14, with respiratory distress and pneumonia with pleural effusions requiring chest tube placement. the notes indicated R37 had been treated for sepsis and required thoracentesis. A NP note dated 4/9/14, indicated R37 required ongoing Kristalose and Mag-ox for chronic cirrhosis.	{F 323}

{F 323}	Continued From page 178 - On 4/10/14, included diagnoses of chemical dependency, hepatic cirrhosis, and chronic pain. - On 4/24/14, included "place wander guard [sic] for res. [resident] safety" and "pursue guardianship." A second order dated 4/24/14, indicated NP was aware of R37's use of alcohol, to encourage R37 not to use, and that even if R37 appeared intoxicated it was ok to administer all medications as ordered. - On 5/6/14, an order directed to recheck R37's blood pressure in one hour, call NP if diastolic blood pressure was greater than 100, give Ativan 0.5 milligrams (mg) orally every six hours as needed times three days for withdrawal symptoms (tremors, shaking, and increased heart rate) and a urine toxicology screen. - On 5/7/14, an order directed "no LOA-supervised or other". In addition, the NP included an order for a WanderGuard, and to check placement every shift for elopement even though R37 had cut off the WanderGuard on 5/2/14, and refused to have a new one placed. A Clinical Summary dated 2/3/14, indicated "refer to chemical dependency counselor and pain psychologist." A prescription dated 2/3/14, ordered a behavioral health evaluation for diagnostic evaluation and treatment recommendations for R37. A Physician Visit/Progress Note written by a licensed drug and ETOH counselor (LADC) dated 2/13/14, indicated R37 had been referred for assessment of behavioral health, chemical dependency and pain and included an order/comment of "strongly recommend a full psychiatric assessment" within 60 days to evaluate medications and therapy. The medical record lacked evidence of the psychiatric	{F 323}

{F 323}	Continued From page 179 assessment having been completed. R37's care plan was reviewed and noted the following: - The vulnerable adult care plan revised on 3/5/14, indicated R37 may leave to go to medical appointments without supervision and was not safe to go on other unsupervised LOAs. - The Depression care plan dated 3/11/14, included ETOH abuse and directed to arrange psych services as needed. - A behavioral symptoms care plan revised on 3/16/14, indicated ETOH consumption and concealing ETOH in room with a goal to have fewer episodes of ETOH abuse per week. The interventions included; encourage attending AA or other substance abuse support programs, assisting with arrangements as needed, may go to medical/dental appointments unsupervised and no other unsupervised LOA. - A risk for elopement related to ETOH abuse and psychoses care plan revised 3/16/14, noted a history of returning to facility after unsupervised LOA displaying signs of ETOH consumption and/or with a supply of ETOH. The goal included R37 would not to leave facility unattended unless a medical appointment and R37's safety will be maintained. The interventions indicated R37 cut off the wander guard and refused to have another one placed and was placed on 15 minute checks. Check room if suspected ETOH. - A Mood/Behavior care plan initiated on 4/23/14, indicated R37 had a history of ETOH abuse and actively drank at the facility. The care plan noted R37 was sent to detox on 4/23/14, due to being very intoxicated. The goal indicated R37 would like to stop drinking ETOH with an intervention to check room daily for ETOH and check R37 for signs of intoxication.	{F 323}

{F 323}	Continued From page 180 - An at risk for adverse reaction from medications related to ETOH care plan dated 4/25/14, indicated NP was aware of R37's ETOH, nursing staff to encourage to restrain from using ETOH and if R37 appeared intoxicated it was ok to administer medications. Another intervention dated 5/8/14, included 1:1 supervision due to ETOH abuse and intoxication. A Vulnerable Adult Assessment dated 3/16/14, indicated R37 had both past and recent substance abuse, was not safe for unsupervised LOA except to appointments and had a history of significant ETOH use when out on unsupervised LOA. The quarterly Minimum Data Set (MDS) dated 3/18/14, indicated R37's cognitive skills for daily decision making was independent with consistent/reasonable decisions. Review of the Interagency Transfer Orders dated 4/1/14, included Non-Hospital Problems of ETOH intoxication and ETOH withdrawal noted 9/23/13, and substance abuse noted 2/23/14. A Care Conference Summary dated 4/1/14, indicated a discharge plan of "discharge to a facility that allows drinking, he declined, has been sober since." The summary indicated R37 had a history of drinking and bringing ETOH in the building or going on unsupervised LOA and R37 had stayed in the building with no ETOH use since 3/3/14. A Resident Refusal of Medical Treatment Form dated 5/5/14, indicated R37 was "wander guarded [sic]" to the facility for resident safety related to history of ETOH abuse, staggering gait	{F 323}

and slurred speech. With the risks of refusing noted as facility wouldn't be aware if R37 left with potential for fall risk and injury off facility grounds with no one to provide aid.

A letter dated 5/10/14, indicated a first offense of the facility smoking policy as R37 reported to staff he had gotten cigarettes from R9.

On 5/7/14, at 10:02 a.m. the ombudsman was interviewed and wanted to know if surveyors were aware of residents purchasing ETOH and drugs. Reported she believed residents were giving other residents money and credit cards to go out and purchase things for them. She reported a resident with chemical dependency problems had been drinking, room checks were being completed and staff was finding ETOH bottles. Reported R37 was being found intoxicated and she was involved in discussing abuse prevention planning if intoxicated and the effects of ETOH on R37's medications. She reported the physician was encouraging discharge planning to a facility that allowed drinking. She also indicated a number of residents were accessing illegal drugs at the facility. The ombudsman reported she had been at the facility on 5/6/14, to discuss the concerns.

On 5/7/14, at 10:05 a.m. the administrator stated the ombudsman was called 5/6/14, to speak with the facility regarding R37 giving his credit card to R117 to purchase ETOH and R37 had been "drunk for days."

On 5/8/14, at 11:51 a.m. licensed practical nurse (LPN)-B stated she was aware R37 had a doctor's order and can drink as long as there are no behaviors and if behaviors occur she can call

detox. LPN- B stated she did not know where R37 got ETOH from.

The safety monitor, NA-M was interviewed on 5/8/14, at 11:55 a.m. and stated he has not seen R37 exchange money or ETOH and stated he has heard about exchanges but could not remember who he had heard it about.

The HUC was interviewed on 5/8/14, at 12:15 p.m. and stated "it's a nightmare; [R37] is drunk every day." She stated she had her suspicions about where the ETOH was coming from but when she asked R37 he refused to tell her. R37 told her he had given his credit card to R117 to buy things for him. The HUC stated R37 was drunk every day when she left and was drunk when she came in on 5/8/14. She reported that on 5/5/14 or 5/6/14, she had observed R37 in the parking lot, was told there was nothing they could do by the facility administrator and requested assistance from the operations director to get R37 back in the building. The HUC reported she had requested the safety monitor to put R37 on every 15 minute checks but knew that was not enough. She stated other residents were on 1:1 for drug use and wanted to know what the facility was going to do to keep R37 safe. The HUC stated "we're not doing [R37] any justice" and "it's a shitty plan to keep people on 1:1 forever."

On 5/10/14, at 1:30 p.m. the administrator stated R37 had been taken to the hospital for Delirium tremens (DTs-significant withdrawal symptoms). During interview on 5/12/14, at 8:59 a.m., registered nurse (RN)- B and LPN-A stated R37 had gone to the bank with a friend on 5/10/14, and were not sure if the 1:1 had gone to the bank or not and would have to check.

{F 323}	Continued From page 183 The DON was interviewed on 5/12/14, at 9:05 a.m. and stated a "guy (stated name) a friend of R1" went with R37 to the bank. The DON stated both the administrator and the consultant administrator were aware of who R1's friend was. The DON stated the 1:1 had refused to go to the bank with R37 and that the friend of R1 had signed R37 out. The DON stated the consultant administrator was going to go with R37 and R1's friend to the bank until it was decided the facility was not comfortable with her (the consultant administrator) going with to the bank either. The DON stated he had reminded R37 he could not go because he had orders for no LOA, but stated the administrator, consultant administrator and the social worker had decided R37 could go anyway. The DON stated he had no idea where R37 had gotten methadone from. When interviewed on 5/12/14, at 1:35 p.m. contracted licensed social worker (CLSW)-A stated during a room search a quart bottle of ETOH had been found in R37's room and 3 plastic containers with the labels removed which nursing indicated were methadone containers. When interviewed on 5/12/14, at 1:52 p.m. the administrator stated he and CLSW-A were involved in R37's LOA. The administrator stated CLSW-A was under the impression R37 was allowed to go on a LOA, and stated R37 had returned with a card from Walgreens so they knew he hadn't followed his agreement to only go to the bank. The administrator stated the friend of R1 would not be able to take R37 on LOA again. The administrator stated he was not aware R37 had orders for no LOA and that he had believed CLSW-A and had not checked the chart himself.	{F 323}

{F 323}	Continued From page 184 The administrator stated he was also not aware of R1's relationship with the friend and that the DON had not told him about the order for no LOA or the relationship between R1 and the friend. Upon interview on 5/13/14, at 8:09 a.m. CLSW-A stated on 5/10/14, prior to R37 leaving on LOA she had been informed by nursing (she could not remember who) that R37 could leave the facility with supervision. CLSW-A reported she'd made it clear to the person taking R37 out, R1's friend, that R37 could only go to the bank and nowhere else. She stated she'd told R1's friend that R37 would try and talk him into going to the liquor store but that R37 could not go there. CLSW-A said R1's friend had reassured her he had been sober for ten years and would never take R37 to a liquor store. CLSW-A stated it was not until after R37 had left, that nursing (did not remember who) told her R37 had orders for "no LOA" and that R1's friend was a drug dealer. CLSW-A said it would have been nice to have known that information before she'd allowed R37 to go on a LOA. She stated she had not looked at R37's chart because she'd trusted nursing to know the correct information. She also stated she was aware R37 had been keeping ETOH under the edge of his mattress and she could not understand why nursing hadn't been finding the ETOH when they made the bed. When interviewed on 5/13/14, at 2:20 p.m. the administrator was asked about the discrepancy between what the DON reported had happened on 5/10/14 and what the administrator stated had happened and he verified he was not aware R37 had an order for no LOAs or aware that R1's friend was her drug dealer prior to having allowed R37 to leave with R1's friend on an LOA.	{F 323}

R129 was identified by the facility to require a staff member to be assigned to follow/accompany R129 one to one (1:1, to be within arms length at all times). R129 reported to the facility she obtained and consumed cocaine on 5/3/14. R129 obtained and consumed ETOH on 5/11/13, at 4:00 a.m. causing her to require hospitalization in the intensive care unit (ICU) and intubation (mechanical ventilator assisted breathing) for a blood ETOH level of .323.

The admission MDS dated 2/1/14, indicated R129 had a Brief Interview of Mental Status (BIMS, a tool to determine potential cognitive losses) score of 15, indicating R129 was cognitively intact. The MDS identified R129 was Independent with all activities of daily living (ADLs). The MDS identified R129 rejected cares and wandered 1-3 days during the assessment period. R129's CAA for mood state dated 2/7/14, identified R129 had poor judgement, impaired cognition and poor decision making and had diagnosis of "substance induced psychotic disorder, opiate dependence, and alcohol dependence." The CAA identified further diagnoses of hepatitis C, "Hx [history] of drug alcohol use" and depression. R129 was identified to be independent with ADLs. Although the CAAs identified R129 had a history of drug and ETOH dependence, the CAAs lacked documentation of interventions to promote sobriety while in the facility, such as but not limited to offering CD treatment.

The Vulnerable Adult Assessment dated 3/18/14, identified R129 had a history of ETOH abuse and identified R129 had, "Ongoing drug-seeking & over medication with additional Rx [prescriptions]." R129 was identified as being

{F 323}	Continued From page 186 susceptible to abuse "r/t [related to] substance use, varies" and required supervision with LOA from the facility. The assessment identified R129 had a behavior and history of rummaging through others belongings and "drug use." The assessment indicated R129 was placed on 1:1 due to rummaging in other resident rooms. R129's Smoking Evaluation dated 3/18/14, identified to "monitor for ETOH use or oversedation." The Pain Evaluation and Management Plan dated 5/1/14, identified R129 had chronic pain daily, identified a history of pain and drug seeking. "Resident is on a restricted recipient program due to drug seeking [a program where only one pharmacy may fill the prescriptions for narcotics, a program to potentially deter drug seeking behaviors]." The evaluation identified R129 had a history of "drug seeking" and indicated, "MD is aware of drug seeking behaviors and aware pain is not controlled. MD will not order any more pain medications for resident due to her drug seeking behaviors. Resident is on the restricted recipient program due to drug seeking." A Incident/Accident Report dated 5/3/14, at 11:00 p.m. indicated R129 "told the nurse that she took cocaine earlier during the shift." The note identified R129 to be "very sweaty, weak and tired" and "she looked very sleepy." The resident's pupils were "large and nonreactive to light." The note indicated the nurse asked R129 what she took and indicated R129 then "confessed" to taking cocaine. The report documentation indicated R129 was sent to the emergency room (ER), identified, "She said, 'I knowingly took cocaine'" and, "Resident has been	{F 323}

sent to ER. She will continue to be on 1:1 when she returns to the nursing home." The report identified R129 had a history of drug use, "resident is on a 1:1," "remains on a 1:1," and "Hx [history] drug seeking, receiving drugs from others." Although the incident occurred on 5/3/14, the form was signed by the DON on 5/5/14.

An Emergency Department Chart [a form from the ER] dated 5/3/14, identified R129 reported to have taken cocaine at the facility. The note indicated R129 took the cocaine to "help with the pain" in her abdomen. "Patient [R129] is triaged directly back to ED [emergency department]." The Clinician History of Present Illness section of the form identified R129 reported to hospital staff she snorted cocaine "5 hours ago." Although R129 was identified to go to the ER for a potential drug overdose, the Emergency Department Chart did not address the cocaine use and only addressed R129's pain. The labs indicated various pertinent laboratory values were checked by the ER, but lacked a toxicity screening for cocaine, drug or ETOH use. R129 was given two doses of Dilaudid (a narcotic pain medication) and returned to the facility at 6:00 a.m. with no new orders. The clinical record lacked evidence the administrator, or the State agency (SA) were notified of the incident. The clinical record lacked evidence of new interventions to address R129's report of drug use, such as CD treatment. In addition, the clinical record lacked evidence the use of cocaine by R129 was investigated to determine how the drug may have been obtained while the resident had a staff assigned to her 1:1.

A unlabeled typed page insert immediately in the front of R129's paper chart dated 4/15/14, indicated, "If Res goes to the Hospital for any

On 5/7/14, at 10:24 a.m. the ombudsman was contacted via telephone per an emailed request to be contacted by the surveyor. The ombudsman stated she had been informed by a nurse of the facility of "drug use" and "drugs shared with residents" at the facility "a couple days ago." The ombudsman stated rather than call the nurse back, she came to the facility "yesterday [5/6/14]," had spoken with various residents of the facility and communicated with the facility's management regarding drug, ETOH and discharge planning concerns. The ombudsman stated residents, facility staff and the ombudsman were "suspicious residents may be giving money or credit cards to another [resident] to go out and purchase things [alcohol and drugs] for them." The ombudsman stated the police had been notified and been to the facility "quite often." The ombudsman stated there were problems with residents who were chemically dependent, who were drinking in their rooms and facility staff were conducting room checks per shift and "finding empty alcohol [vodka] bottles" in resident rooms. The ombudsman stated residents had been found by facility staff to be "intoxicated" in the facility. The ombudsman specifically stated R129 was on a 1:1 and had "somehow" obtained and consumed and "illegal drug [cocaine]" in the facility. The ombudsman stated although the facility had employed "three temporary social workers," the ombudsman stated she felt "social services is overwhelmed" due to "no policies and	{F 323}

{F 323}	Continued From page 189 procedures in place." R129's care plan for safety/vulnerability dated 3/25/14, identified R129 was able to make her needs known, but was vulnerable due to her history of opioid abuse and drug seeking behavior. A care plan intervention dated as initiated 4/11/14, directed R129 required "1:1 supervision at all times to keep [R129] safe and prevent drug use" Additionally, the care plan directed, "1:1 to discuss CD concerns, encourage [R129] to consider going to a treatment facility." The care plan for mood/behavior dated 3/25/14, identified, "I have a history of opioid abuse and I exhibit drug seeking behavior as evidenced by attempting to see several different MD's to obtain prescription medication. I have a history of walking into other residents rooms and looking thru their personal belongings." Review of the undated Group 7 NA assignment sheets (forms carried by the NA staff for quick reference direction on the resident care plan) indicated R129 was continent, independent with ADLs and "1:1" in larger bold print. Nursing Progress Notes: - On 3/14/14, at 6:18 p.m. a note indicated R129 "had an appointment yesterday and was immediately transferred to the hospital." The note indicated "while on the way home [unclear on prior destination]" R129 "stopped at Cub foods" and picked up a prescription for eight tablets of Norco 5/325 mg [a narcotic and Tylenol pain medication]. The note indicated R129 "failed to alert staff and stated that there were no new orders." The hospital, oncall MD and triage nurse were called and updated on R129's "history of narcotic use."	{F 323}

{F 323}	Continued From page 190 - On 3/16/14, at 6:34 a.m. a note indicated R129 was "caught going through another resident's belonging." The note indicated a resident observed R129 "opening her purse. The note indicated R129 admitted going in the room but denied taking "any money." - On 3/17/14, at 3:34 p.m. a note indicated, "Resident still remains on 1:1 observation." Although the note identified R129 was assigned a 1:1 staff, the clinical record lacked documentation regarding starting 1:1 with the resident. At 10:17 p.m. a note indicated R129 "called on call [physician]," reported two incontinent episodes, her "lower extremities [sic] hurts" and edema. Staff encourage R129 to "sit and rest the leg" but R129 refused and stated the pain became "unbearable." R129 stated she wanted to go to the ER for evaluation and "called 911 herself." Although a previous note indicated R129 required a 1:1, the note indicated R129 would "take care of her own transportation to ER" and "left the facility" at 10:20 p.m. The note did not indicate if a staff person accompanied R129 to the appointment. - On 3/18/14, at 3:56 a.m. a note indicated R129 returned from the ER at 3:30 a.m. with "new order. No new concern at this time." At 2:31 a.m. a note indicated R129 reported to the business office manager she felt "depressed due to being on a 1:1." The concern was reported to social services and the nurse on duty. - On 3/20/14, at 10:08 a.m. the physician identified by R129 as her new primary care physician (PCP) was contacted regarding R129 living in a health care facility, that orders must be coordinated with the nursing home, gave update regarding R129 changing her PCP, trips to the ER and "drug seeking beh's [behaviors]." The note further indicated, "Transport informed to bring pt [patient] to/from the clinic and no other	{F 323}

stops to include the pharmacy." At 2:45 p.m. R129 "went for her appointment to her care provider today. At the appointment, resident was given script for Ambien (a hypnotic medication used to promote sleep). Resident said she filled the prescriptions at the pharmacy but she misplaced the pills. patient [sic] will be monitored for increased sedation." Although the previous note indicated the transportation company was notified of restrictions in R129's transport, the note identified R129 was still brought to the pharmacy. At 3:11 p.m. a note indicated R129 reported she "lost" the Ambien. The note indicated the "escort" assigned to go with R129 to the appointment, reported R129 "went to the pharmacy and filled her script." The escort reported R129 would not allow the staff to "see the script" or the filled prescription. "Per the escort [R129] went to the bathroom. On the ride home [R129] reported that she lost the bottle of pills. Upon return she reported that same story to this writer and requested that staff get a new script." The physician was contacted and verified a prescription for Ambien and R129 loosing the medication was reported. The physician denied taking R129 on as a PCP and referred the facility to R129's current PCP.

- On 3/28/14, at 11:52 a.m. a note indicated R129 met with social services and "Also spoke with resident regarding her drug seeking. She [R129] admits that she is addicted to pain medication." The note indicated R129 was scheduled to see psychologist and encouraged R129 to discuss her concerns and her "addiction."
- On 4/4/14, at 7:11 p.m. a note indicated R129 met with psychologist. The note indicated R129 met with DON and social worker after the appointment. The note indicated R129 "does not like being on 1:1's" and the DON "informed her

{F 323}	Continued From page 192 [R129] she was on 1:1's because of her frequent drug seeking." The note indicated R129 "admits that she has urges to seek medications to manager her pain" but "denies addiction." The note indicated "inpatient treatment" was discussed, such as drug and emotional counseling, R129 rejected the treatment. The note indicated the psychologist agreed with the need for treatment and "However, should resident continue to display behaviors of drug seeking and declines treatment a CD commitment maybe considered to be in her best interest." - On 4/7/14, at 10:47 a.m. the note identified R129 remained on 1:1 and R129 had requested to be taken off 1:1's. The note indicated R129 was on 1:1 "for going into other resident rooms." - On 5/4/2014 12:03 a.m. a note indicated R129 "told the nurse that she took cocaine earlier during this shift." The note recapitulated the data from the incident report dated 5/3/14. The note further indicated, "The nurse asked the resident what she had taken and where she got it from or [who] gave it to her. She took the nurse to [room number for R1]. She also report that the package that resident in room [R14's room] swallowed earlier was marijuana." R129 accepted to to to the ER for evaluation. "The nurse requested for toxicology screen and that a copy should be send [sic] to the nursing home per the administrator order." Although the note indicated R129 obtained cocaine from another resident and identified R129 involvement with a second resident and a different illegal drug, the clinical record lacked evidence law enforcement was notified, the clinical record lacked evidence a toxicology screen was obtained. Although R129 was identified to have a 1:1 assigned to follow her, the clinical record lacked evidence the incident of R129 obtaining and ingesting illegal	{F 323}

{F 323}	Continued From page 193 drugs was identified, reported to the administrator immediately, reported to the SA or investigated. In addition, the clinical record lacked evidence R129 was further evaluated for chemical dependency, had immediate changes or increases in monitoring to ensure her supervision and safety. At 7:23 a.m. a corporate nurse documented R129 approached the nurse and R129 "admitted to writer that she took drugs given to her by another resident in this building. She was able to verbalize insight related to why she regretted this choice." The note indicated R129 "remains on 1:1. 1:1 was present during this conversation." The clinical record lacked evidence 1:1 monitoring of R129 was reviewed after being identified to have accessed illegal drugs twice while on 1:1 monitoring. - On 5/4/13, at 12:12 p.m. a note indicated an attempt was made to notify R129's doctor regarding the incident from 5/3/14. The operator at the doctor's office informed writer that they are only accepting on-call emergencies. Staff will notify doctor in the morning of 5/5/14. Resident was returned from the hospital at 6:00 a.m. with no new orders. Although R129 had two doses of Dilaudid administered at the ER, R129 immediately requested pain medication upon return to the facility [the note was not closed or signed by the writer]. On 5/5/14, during the initial tour of the facility NA-K was observed to be sitting in a chair directly outside R129's room, the door was open and R129 was observed to be lying in bed, fully dressed with her eyes closed. NA-K stated she was assigned to be a 1:1 for R129. NA-K stated she needed to remain with R129 and the 1:1 was due to R129 going into "other resident rooms."	{F 323}

{F 323}	Continued From page 194 On 5/6/14, at 8:30 a.m. R129 was observed to have NA-M (1:1 staff) follow her down the hallway and out to the smoking patio. R129 retrieved a cigarette from her front pocket, lit the cigarette and replaced the lighter in the side pocket (right). NA-M stood on the side walk outside the designated smoking area with a large cinder landscape block planter between R129 and NA-M. NA-M remained out of arm's length from R129 and was observed to talk with the female staff monitoring the smoking area, looking away from R129. R129 stood with other residents and smoked her cigarette out of direct sight of NA-M. - At 8:33 a.m. R129 sat on a bench with another female resident on the other side of the smoking patio and out of sight of NA-M. NA-M stood on the edge of the cinder landscape block planter edge and chatted across the smoking area to the same female staff in the smoking area. NA-M was not near enough to R129 to interfere if concern. - At 8:37 a.m. staff spoke to each other and then NA-M turned his back on smokers (including R129) and spoke to a male in a car in the parking lot. NA-M then jumped down and entered the smoking area to speak to the female staff directly. NA-M was not within arms length or direct eye sight of R129. - At 8:38 a.m. R129 stood up and walked to the front entrance of the facility. NA-M jumped to catch up with R129 and followed directly behind into the facility. R129 then pushed the wheelchair of a male resident entering the building and walked rapidly down the hallway. - At 9:34 a.m. R129 was observed to push R62 in her wheelchair out of the facility and to the smoking patio. While pushing R62, R62 held out a cigarette and R129 took it out of R129's hand and tucked it into her own hand, concealing the	{F 323}

cigarette. NA-M followed behind R129 and did not appear to notice or intervene when R129 took the cigarette. NA-M immediately turned his back to R129 once on the smoking patio, applied a surgical mask and talked to the female staff assigned to monitor the smoking patio. Both staff had their backs to R129.
- At 9:35 a.m. the female staff pushed R22 back into the facility and pulled the smoking cart behind her. NA-M remained outside with R129 near the smoking patio watching a van in the parking area. NA-M had his back to R129 and was approximately 14 feet away from R129. Multiple other residents were observed to come and go from the smoking patio. R129 interacted freely with the other residents unsupervised.
- At 9:37 a.m. R117 was observed to come out of the facility, light his cigarette at the front entrance, jump up onto the cinder landscape block planter with ease, and walk across the top of the planters with a skipping gait. Neither the smoking monitor and another female staff in the area did not intervene. R117 was observed to speak briefly with the female smoking monitor, approach R36, pull out a large wad of cash and exchanged money with R36. R117 then went to R129 and R62. R117 remained with both residents smoking and talking. R129 sat on the edge of the cinder landscape block planter, NA-M was not within arms reach of R129, was not within eye site of R129 and was not supervising R129. NA-M remained with the other female staff, back to R129.
- At 9:40 a.m. R129 stood and pushed R62's wheelchair towards the front entrance of the facility. Although NA-M followed, NA-M did not come into arms reach of R129 until the front door of the facility. R129 was observed to push the wheelchair down the hallway with NA-M walking

{F 323}	Continued From page 196 beside (to the left) of R129. - At 10:19 a.m. R120 was observed to walk out of the facility and onto the designated smoking area. NA-M followed approximately ten feet behind outside, then stood on the sidewalk. NA-M then left the area and returned into the facility. R129 retried a cigarette from a pack. Multiple residents were observed to be coming out to smoke. The smoking monitor was on the patio but did not watch R129. R129 sat on planter side and spoke with R14. - At 10:23 a.m. NA-M returned to the smoking area from inside and immediately stood on sidewalk on other side of planter approximately 20 feet away from R129. NA-M made no attempt to make contact with R129, was not in arms reach of R129 and did not make eye contact with R129. NA-M spoke with the smoking monitor. - At 10:25 a.m. NA-M and R129 returned to the facility. NA-M walked to the left of R129 and within arms reach of R129 upon entering the building. Once in the building, NA-M remained in arms length while walking down the hallway towards the nursing desk. On 5/8/14, at 11:22 a.m. R129 was observed to be laying in bed, NA-E was observed to be making the roommate's bed. NA-E verified she was assigned to be the 1:1 with R129. NA-E offered to stand outside the door while R129 was interviewed and the door to the room was closed. R129 stated she was waiting for an apartment and verified she "snorted cocaine" on 5/3/14, and verified she reported it to facility staff. When asked when this occurred, R129 stated it was "on Saturday [5/3/14]." When asked where she snorted the cocaine, R129 stated "not in the facility," and explained she received and snorted the cocaine "down the block." When asked if she	{F 323}

received the cocaine from a resident (as indicated in the clinical record), R129 stated "someone from the street" gave it to her, but denied being able to remember their name, description, or gender. When asked how much cocaine she snorted, R129 stated "about $20 worth." When asked what happened after she reported the cocaine use to the facility, R129 stated, "They sent me to the hospital." and then stated, "They [facility staff] accused me of giving it to someone else." R129 explained she was accused of giving R14 cocaine on the same day. R129 stated the staff who accused her was the 1:1 staff assigned to her at the time. R129 stated the 1:1's name (NA-G) and explained the one to one was assigned to be with her at all times. When asked why she had a 1:1 assigned to her, R129 stated it was because she was accused of "rummaging" in other residents rooms and stated the 1:1 was assigned to be with her "since March." When asked where the 1:1 was when she received the cocaine from the person on the street, R129 shrugged looked up and away and stated, "I don't know. She wasn't with me." R129 verified she was "a recovering addict." When asked after snorting the cocaine, if the facility assisted her with rehabilitation or psychiatric services, R129 denied social services were offered including assistance with drug and ETOH treatment. R129 stated she would like to go to outpatient rehabilitation for drug addiction. R129 further added she was "not checked" for cocaine use at the emergency room of the hospital and stated the emergency room gave her two shots of dilaudid. R129 explained she "thought" that was going to happen, but she was "surprised" to have received doses of dilaudid. R129 appeared relaxed, but uncomfortable during the interview and was hesitant to answer questions and would

{F 323}	Continued From page 198 not make eye contact. On 5/8/14, at 11:30 p.m. NA-G verified their 1:1 responsibility was to remain at arms length with R129 at all times. On 5/8/14, at 11:41 a.m. NA-J verified she worked on R129's unit and stated she was not aware of ETOH or drugs being exchanged on "my shift," but stated she was aware of situation "weeks ago" when she came to work, she noticed R14 was not in his room. NA stated she asked where he was and a nurses aide "who was R129's 1:1" saw R129 go into R14's room and "exchange something." She stated she learned R14 was sent to the hospital for "eating something." Stated she had not witnessed any exchanges and stated if she saw any she'd report to the nurse. On 5/8/14, at 11:40 a.m. NA-S stated they had seen ETOH bottles in residents rooms and smelled ETOH on another resident and reported it to a nurse. NA-S was unclear when. NA-S stated they "Heard rumor" of a resident dealing drugs in the facility. NA-S further recalled seeing a resident with marijuana in January 2104 or February 2014. NA-S stated she "could smell it." NA-S further stated when she was assigned to be the smoking monitor, she heard residents talk about it. NA-S stated they believed R117 was a dealer. When asked why, NA-S stated R117 left the facility "a lot" and went to the gas station. NA-S further stated she believed R117 was talking money from residents to also "buy cigarettes." NA-S stated she was unclear what happened to the resident after she reported the marijuana, but stated the nurse was "agency" and told her the resident "could have it."	{F 323}

{F 323}	Continued From page 199 On 5/8/14, at 11:55 a.m. a housekeeper (H)-A was asked if they were aware of any residents drinking ETOH in the facility. H-A stated they had seen "empty pint bottles [vodka]" in the trash "by front doors." When asked the last time she found vodka bottles in the front trash, H-A stated, "A few months ago." H-A stated they would report any ETOH bottles found in the facility "and has." H-A was unclear which resident was drinking, but believed the pint bottles were placed in the front trash so they "wouldn't get caught." When asked if H-A knew where the ETOH bottles came from, H-A stated she was unclear, but thought they may have been provided by family. On 5/8/14, at 12:03 p.m. LPN-H stated she confiscated ETOH from R37. LPN-H verified ETOH was provided to R37 and suspected to other residents of the facility, but was unclear how the ETOH was provided to the resident. LPN-H verified R129 was on 1:1 and 1:1 should remain in arms reach of the resident. LPN-H was unaware R129 had obtained cocaine in the facility. On 5/8/14, at 12:10 p.m. the HUC stated she was aware of resident drug and ETOH use in the facility. HUC stated there was "always hearsay between residents they're selling [drugs and alcohol] to each other" included hearsay stories regarding heroin and cocaine "it's always stories." HUC stated she has put "a lot of time in" reporting to hospitals, clinics and ER if a resident was a "drug seeker" and on restrictive recipient program. HUC stated R129 was going to ER, calling herself and getting Ambien, oxycodone and "is happy after." HUC stated R129 "refuses to tell them the script." HUC stated she "goes to the	{F 323}

{F 323}	Continued From page 200	{F 323}		

social worker to report" these concerns and when R129 denied she had pills, "but I know she did get them." HUC stated "every week" R129 had picking a new doctor, stated R129 was not giving paperwork to physicians or altering the paperwork. HUC verified she was aware of residents consuming ETOH in the facility, verified she was aware of residents becoming intoxicated, but was unclear where the ETOH was coming from. "I feel like we're supposed to do something, 'cuz no one will take charge." HUC verified she was aware of R129 obtaining cocaine and going to the ER. Stated she was not clear if there was a toxicology screen, but stated she had asked for them in the past. HUC stated she and other facility staff believed R129's "son" (HUC made quoting gesture with both hands) was also R129's dealer and described him as a native man who R129 called her son, was at the facility at the time R129 snorted cocaine.

On 5/8/14, at 3:59 p.m. NA-F stated they were scheduled as the safety monitor in the facility. NA-F stated they were aware of a resident "caught with several bottles of vodka" in their room but denied knowing about drug use amongst residents in the facility. NA-F stated they would report any suspected drug and ETOH use to a supervisor or the charge nurse. NA-F verified R129 was assigned a 1:1 and the staff should remain in arms reach of R129.

Further review of the nursing progress notes indicated the following:
- On 5/9/14, at 7:31 p.m. the pharmacy was contacted regarding R129's Percocet (a narcotic pain medication) refills and determined R129's prescription had 110 Percocet tablets delivered and outlined the delivery dates and the amounts

{F 323}	Continued From page 201 provided. The note indicated R129 was informed of the information. - On 5/11/14, at 10:09 a.m. a note written by the HUC indicated NMMC called the facility "requesting" R129's medication administration records (MARs). The note indicated the RN from the hospital notified HUC R129 had been admitted to the ICU, had been intubated "due to acute alcohol intoxication." The note indicated R129's toxicology screen was "negative for drugs but positive for alcohol with a level of .323." Although R129 had a staff person assigned as 1:1, R129 obtained and ingested enough ETOH to be life threatening. Although the note identified the administrator was updated, the clinical record lacked evidence the State agency was immediately notified of the incident. The clinical record lacked documentation at the time of the incident, lacked pertinent assessment information such as vital signs at the time, descriptions of R129's symptoms, immediate determination of how, when or where R129 obtained the ETOH and/or if the assigned 1:1 was interviewed at the time. - On 5/11/14, at 10:55 a.m. a note written by the DON, recapitulated R129 was sent to the hospital, identified the time of transport as "around 4 am" on the night shift, and identified R129 was sent in "for intoxication." DON's note indicated R129 had "become weak" and needed to be lowered to the floor." The note indicated two LPNs were contacted and the NA staff assigned to the 1:1 was called. The note indicated the NA assigned to R129 "reported that resident has been in and out of [R14's room number] but did not notice any exchange of ETOH. She also reported that resident [R14] was upset because the 1:1 has to be in his room too while resident is visiting..." The note indicated R14 denied giving	{F 323}

{F 323}	Continued From page 202	{F 323}		

R129 ETOH, but "mentioned that resident had alcohol overnight." R14 denied knowledge of where R129 could have obtained her ETOH.
- On 5/11/14, at 2:49 p.m. a note written by DON indicated NMMC was contacted to receive updates on R129's status. The note indicated, "I also requested to have the resident undergo a chemical dependency assessment to ensure that the resident can be transferred to a residential chemical dependency facility as appropriate, considering the resident's recent hospital trip to the hospital for snorting cocaine."
- On 5/12/14, at 12:07 a.m. a late entry note (no indication for the date or time the late entry was for) indicated an NA staff "report to this writer that resident was in the bathroom longer than usual, came out and appeared drowsy, unsteady gait" and identified R129 was at risk for falling, was verbally aggressive to staff and R129 stated, "I'm drunk." The note indicated the room was checked and no evidence of ETOH was found. The note indicated R129 "threw herself to the floor" and was sent to the ER at 4:00 a.m.

On 5/12/14, at 10:26 a.m. DON verified had not read the plan of correction from the previous survey and and did not know what the plan was. Verified was not aware of policy, system or facility changes made as a result of the survey. DON reiterated he was "waiting for this [the survey]" to "blow over" and then he had plans to work on "problems" in the facility. DON stated he read the online public survey results for the facility from 2013 and stated he was not given an accurate picture of the facility problems. DON stated there was "no system for monitoring staff to ensure facility policies were followed."
- Was asked regarding R129 obtaining ETOH or drugs while on a 1:1, DON verified the

information was not documented in the clinical record. DON stated it was "because the LPN did not have access to document" and explained it was because she was "gone for a longer time." DON was unclear when the documentation was going to be completed, or why the LPN did not have access to computer documentation. DON verified the 1:1 should have been in arms length of R129 at all times. After surveyor explained observations of the 1:1 14-20 feet away from R129 outside the facility, DON stated the staff assigned to the 1:1 on 5/6/14, was "not compliant" with facility policy. DON was unclear on when to report to the administrator and stated he "believed it was within 24 hours," DON was unclear when to report to the State agency and verified he had not documented the investigation. When asked if DON had determined if R129 may have been neglected, having obtained both cocaine and ETOH while being assigned to be supervised by a facility staff person 1:1, DON stated he was concerned regarding the "safety component" and was not aware R129 was neglected. DON further stated he was "unaware how" R129 could have been neglected. DON was unclear how the resident obtained ETOH, but verified R129 was harmed by the incident.

On 5/12/14, at approximately 2:00 p.m. CLSW-A and CLSW-B both verified upon hire to the facility, they had been working on "re-writing care plans and discharge planning." CLSW-A stated there was a third social worker who no longer came to the facility and a part time social worker on evening who was "reducing her hours to once a week." Both verified they had not specifically worked with R129 for CD treatment and verified was last noted to be offered to R129 on 4/4/14. Both verified they should have revisited CD

treatment options after R129 reported cocaine use on 5/3/14. Both verified they did not know R129 was hospitalized for ETOH toxicity and expressed they "should have been notified." Both stated they were not in the facility over the past few days due to the facility not paying their company's bill. CLSW-B stated she was concerned for the residents of the facility and verified R129 should have been reassessed after obtaining cocaine. Both verified R129 was harmed. At 2:43 p.m. CLSW-A stated, "I cannot imagine how a resident who was on 1:1 would get that much ETOH in her system and when I got here on Sunday I came to the office to open the computer to see what happened and guess what, there was no nursing notes. I went outside to the desk and told the administrator and DON to get the nurse in to document and have the 1:1 fired. There are so many people here than I have seen on 1:1. For me 1:1 means the person needs to be somewhere else not at the nursing home."

R41:
The facility failed to provide supervision to prevent ingestion of alocholic substances, which resulted in actual harm to R41 on 5/1/14. While intoxicated the resident drove his motorized wheelchair (w/c) off the curb, fell over, sustained injury to his right forehead and right arm. R41 was hospitalized with low blood pressure, low magnesium and low potassium.

R41 was observed to sun himself in the facility driveway, outside of the front door and toward the public sidewalk on 5/5 at 2:09 p.m. and 5/6 at 10:46 a.m., 5/7 at 10:45 a.m., 5/8 at 2:15 p.m. , 5/9 at 3:00 p.m., 5/10 at 2:30 p.m. , 5/12 at 2:00 p.m., and 5/13/14 at 3:35 p.m.. On 5/11/14 at 11:15 a.m., R41 was observed to sun himself on

{F 323}	Continued From page 205 the smoking patio. All observations were unsupervised. R41 was admitted to the facility per the Admission Record dated 2/4/14, from another long term care facility. R41 had a history of bipolar disorder (a mood disorder with manic and depressed phases), schizophrenia and polyneuropathy in diabetes (nerve damage usually in the feet and legs that can create sensory, motor and bodily function problems). The admission MDS dated 2/17/14, indicated R41 had a BIMS score of 15/15, which indicated no cognitive impairment. A Patient Health Questionnaire (PHQ9 - detected depression) was completed and R41 had a score of 7/27, which indicated mild depression. R41 had verbal behaviors directed at others one to three days during the seven day look back period. R41 was dependent on staff and required total assistance of two persons and a mechanical lift for transfers and toileting; extensive assistance of two persons for bed mobility; extensive assistance of one person for personal hygiene, dressing. R41 was totally dependent on the electric, tilt in space, w/c for locomotion on and off the unit. The CAAs dated 2/17/14, indicated R41 would be referred to the house psychologist. An LOA Safety Assessment dated 2/10/14, indicated R41 was safe to leave the facility on unsupervised LOA, and left the facility daily on unsupervised LOA according to staff. A Vulnerable Adult Assessment dated 2/10/14, indicated the resident utilizes an electric w/c for ambulation. "Resident is OK to go on unsupervised LOA." A Smoking Evaluation dated	{F 323}

{F 323}	Continued From page 206 2/10/14, indicated independent with smoking and smoking materials. The care plan revised on 3/18/14, indicated R41 had impaired cognitive function or thought process related to personality disorders of bipolar and schizophrenia. R41 had a history of being verbally abusive to staff and other residents, and required assistance with ADLs, and was safe for unsupervised LOA. A Physician's Progress Note dated 4/15/14, indicated the visit was to establish primary care and recommend R41 for a psychiatry consult per R41's request. In addition, a recommendation was made by the physician for R41 to have a referral made to a pain clinic consult for chronic use of opiates (oxycodone) and morphine (both narcotics). The medical record lacked evidence that the physician's recommendations were scheduled and that R41 went to the consults. A progress note dated 5/1/14, at 3:05 p.m. revealed R41 was off the property in the neighborhood. He became intoxicated (on a LOA) in the neighborhood), when he returned to the facility he drove his electric w/c off the curb on the driveway to the facility. R41 was found lying on pavement on his right side and his speech was slurred, but R41 remained alert and oriented. "He stated his last drink was 5 minutes ago. He was incontinent of urine and had a laceration on his forehead, he complained of right arm pain." The physician was notified and 9-1-1 was called. R41 was transferred to NMMC for further evaluation. He was admitted to ICU with low blood pressure, low potassium and low magnesium. The medical record lacked evidence that the assessments were reviewed and/or revised for R41's LOA	{F 323}

{F 323}	Continued From page 207 status. On 5/1/14, the fall risk care plan was updated to include the fall on the driveway, but lacked mention of the causative factor of intoxication. On 5/5/14, at 1:43 p.m. R41 returned to facility. New diagnoses from the Intra-agency Transfer Form dated 5/5/14, included: fall, intoxication, and alcoholism. A Physician's Order on 5/5/14, included, "No longer okay to leave unsupervised LOA's." A WanderGuard (a personal alarm attached to resident to alert staff the resident attempted to leave the building) was ordered for the resident. The care plan revised on 3/18/14, lacked mention of supervised LOA. On 5/6/14, at 9:16 a.m. the facility met with resident to discuss the incident that occurred on 5/1/14, the facility obtained an order for supervised LOA. Resident stated he was drinking because he was depressed. The facility placed a WanderGuard on his w/c. Even though R41 had a WanderGuard placed on the w/c, R41 continued to remain at risk due to the facility, as the facility staff continued to silence the alarm at the front desk and let him out of facility. R41 continued to leave the facility and move about the property unsupervised. R41's medical record lacked evidence of any social service intervention at the facility for his depression and drinking related to depression which would include providing information such as AA or referral to any place for help or support. Even though the CAAs dated 2/17/14, indicated R41 was referred to a house psychologist, R41's medical record lacked any evidence R41 had seen the house psychologist.	{F 323}

{F 323}	Continued From page 208 R117: R117 was identified by the facility as questionably buying cigarettes and drugs, and selling within the facility. The facility failed to act upon allegations that R117 was bringing drugs, alcohol and cigarettes into the facility that caused actual harm and hospitalization to other residents. R117 was admitted to the facility 1/21/14, with admission diagnoses of cardiomyopathy (weakened heart muscle with decreased pumping ability), Atrial fibrillation (irregularly irregular heart beat that causes the heart chamber to be under filled when pumped and can lead to inadequate heart pump and life threatening blood clots in the heart), chronic Coumadin use (to thin the blood and prevent blood clots from forming) congestive heart failure (fluid buildup in the lungs or extremities due to poorly pumping heart), shortness of breath, hypertension (high blood pressure), anxiety, and depression. The admission MDS dated 2/3/14, indicated R117 had a BIMS score of 15/15, which depicted no cognitive impairment. R117 was independent with all activities of daily living and mobility. R117's LOA Safety Assessment dated 3/18/14, indicated the resident was assessed as appropriate to leave the facility unsupervised; a Smoking Assessment dated 3/18/14, indicated R117 was safe to smoke. A Vulnerable Adult assessment dated 3/18/14, indicated a recent history of resident to resident aggression, can be aggressive when confronted, had a history of substance abuse, but denied recent use, and was safe for unsupervised LOA. The care plan revised 4/27/14, indicated R117 did	{F 323}

{F 323}	Continued From page 209 exhibit verbal abuse/aggression towards staff. "Staff has reasonable cause to believe that Resident has brought alcohol & drugs into the facility for other Residents." R117 had displayed actual physical behaviors/physical fight with roommate. R117 would play music very loud and would not turn the music down which disrupted other residents. R117 often left the facility and did not return at said time. The interventions were R117 would cease bringing any type of alcoholic beverages or illegal drugs into the facility and would not exhibit threatening behavior toward staff or other residents. R117 would follow the facility policies and procedures R117 would return to facility at designated time or will call facility to report he would be late. "If Resident becomes disruptive, aggressive/not redirect able, threatening to others, 911 will be called." The progress notes were reviewed and noted: - On 2/12/14, at 9:11 p.m. a progress note indicated: Health status note: "resident signed out at 10:00 a.m. and wrote to be back at 6:00 p.m. tonight. Resident is not back yet. Resident did not leave number to call and does not have emergency contact person to call. Writer called 911 and reported him missing. Writer also notified administrator." - On 2/13/14 at 6:39 a.m. a progress note indicated, "Police took report during this shift about resident reported missing during the PM shift. Resident did (not) return to facility at this time. Will continue to search. Progress notes lacked documentation of R117 return to the facility." - On 2/16/14, 9:06 a.m. a progress note indicated, "resident was aggressive and verbally abusive to fellow resident that is his roommate, he was swearing at him, calling him the F word, told him	{F 323}

to get the F out of here, even went beyond and told him, there nothing wrong with you. Roommate said he gave a lot of trouble. A call was placed to administrator and DON we are continuing to monitor supervisor is aware."
- On 3/27/14 at 4:01 p.m. a progress note indicated, "Resident had a visit from his relocation worker today; he became upset and was yelling and swearing during their visit. Writer and environmental services director approached to follow up with him. He was not in his room; drug paraphernalia was on his dresser and removed room the room. Resident was found in the staff lounge and he was educated that he could eat his meal in the dining room with other residents, continued to refuse to leave and swore at relocation worker who called 911. Police arrived and took drug paraphernalia and spoke with resident. ...states he wants to be independent. Writer called Hennepin county adult protection services to express the concern about resident's behaviors and potential risk to others. They stated that they could not take a report unless actual harm occurs. Staff educated to call 911 and CEP [common entry point] should aggressive behaviors towards others occur. Resident is calm at this time."
- On 3/31/14, at 4:43 a.m. a progress note indicated, "AM nurse reported resident went out on LOA on 3/30/14, as usual. However, resident did not return to facility as required. About 02:00 a.m. Writer called police and made the report. Two police officers came to the facility and said the report should only be made after 24 hours."
- On 3/31/14, at 1:40 p.m. resident had still not returned from LOA on 3/30/14. "No phone numbers on file to try to reach resident."
- On 3/31/14, at 2:58 p.m. R117 just returned from LOA at 2:30 p.m. "Meeting held with resident

about LOA orders as resident does not have overnight LOA orders. Those present, Writer, Administrator, DON and NA-N, nurse. Discussed with resident that if he signs out he must return at said return time as facility is responsible for resident and cannot care for him if he is not here. Resident yelled out that he needs a safe discharge place and MD orders in order to d/c. Writer stated that is different from AMA as AMA means he is discharging himself without MD orders. Resident stated understanding. Discusses that if resident goes on LOA he must be back at midnight or he would be AMA d/c. Resident stated understanding."
- On 4/11/14, at 3:18 p.m. "Residents relocation worker met with him today. He is frustrated about the time that the relocation process is taking. He toured GRH [group residential housing] housing this past week, however, did not like the setting it was in. Relocation worker will be bringing resident to apply for his MN ID [identification] and social security card on Monday 4/14. Resident is working on applying for his birth certificate and has stated that he will do this independently. Relocation services continue to follow, social services continue to follow discharge planning."
- On 4/25/14, at 10:11 a.m. a progress note indicated, "Per staff, there is suspicion that Resident is bringing alcohol into facility for other Residents. LSW & Director of facility operations [DFO] met with Resident to report that due to the continuous suspicion of alcohol being brought into the building, we would be going through his things to check for any alcohol, drugs or other materials deemed unsafe in a Residents room due to the State & Federal safety guidelines. There were tools, power tools, exacto knives, multiple scissors & many other sharp objects that were gathered and placed in a duffle, which was

filled, taken to the Maintenance room to be inventoried and kept safe by the DFO. Resident made several sarcastic comments while we were in his room. Overall, he posed no problem and was not threatening in any way. Will continue to do random checks."
- On 4/26/14, (no time) a progress note indicated, officer from the Minneapolis Police department (MPD) came regarding the seven credit cards that were found in R117's room that were not his name. "Officer took the cards and will check to see if any of them had had any activity or been reported stolen."
- On 4/30/14, at 3:00 p.m. a Quarterly Social Service Assessment (progress note) indicated: Staff continues to provide cues and reminders as Resident does present with forgetfulness at times. Resident's relocation worker will continue to assist Resident in securing alternate placement in the community. Resident at times becomes frustrated over this d/t [due to] length of time it is taking. He has been assessed and may leave the facility unsupervised. Facility has reviewed requirements for unsupervised LOA with Resident and he is aware that if they are not followed that he may be required to only leave the facility with supervision. Resident has been assessed and is an independent smoker. Resident has a history of bringing in alcohol and drugs in to facility. Recently Resident was found to have numerous credit cards in his possession that were not his, police were notified and credit cards were confiscated.
- On 5/2/14, at 2:00 p.m. a progress note indicated, "Resident declined to come to the smokers meeting to be updated on the facility policy and procedure regarding smoking. Writer and administrator attempted to meet with resident to give resident a copy of the facility policy and

{F 323}	Continued From page 213 discuss the rules regarding smoking. Resident refused to meet, writer asked if a copy of the policy could be left with the resident, he stated 'no' Writer asked when a good time would be to come back, he stated "tomorrow" (which he also stated yesterday when he refused to come to the meeting). Writer expressed the importance of receiving the information today, he continued to decline. Writer informed him that not following the facility policy may result in losing his smoking privileges and could result in being given a discharge notice, writer again asked to meet or at least to leave the policy with him, he responded 'no.' Writer and administrator left, resident came out shortly after and began yelling about the noise in the hallway and receiving his mail. Writer attempted to approach resident but he walked away. Writer and administrator met with business office manager regarding his mail complaint, she stated that resident is waiting for his check and has been looking for it daily. She stated that his check usually comes on the 3rd of the month. She stated that she has informed him that he will receive his mail the day it comes." - On 5/5/14, at 3:55 p.m. a progress note indicated, "Writer was updated by NAR [nursing assistant registered] that this resident received money from another resident [#02445] to go by cigarette from the store. Writer approached this resident reminding him of the smoking rules. Resident told this writer that soon as he buys the cigarettes for resident [#02445], he will bring them and give it to the smoking NAR. Writer reminded resident that this was discussed in the meeting and was one of the items discouraged. Writer left resident and updated the Administrator about this incident. Administrator will follow-up. " - On 5/6/14, at 9:37 a.m. R117 was observed to come out of the facility, walked across the top of	{F 323}

{F 323}	Continued From page 214 the planters (jumped up with ease, skipping gait) and had lit his cigarette at the front entrance. Smoking monitor and a dietary manager (DM) did not intervene. R117 spoke with female staff, then went over to R36, exchanged money, and then went to talk with R129 (who had 1:1 staff that was standing 20 feet away from R129) and R91. [Note R117 pulled out a wad of cash, and R36 was observed to give him cash the smoke monitor and 1:1 staff did not observe the exchange]. R129 sat on planter and smoked with R91 and R117. R117 then returned to the building. - On 5/7/14, at 8:18 a.m. R37 was observed standing next to R117, who was sitting on the planter on the rear of the smoking patio. R37 had his wallet out and both R37 and R117 were watching the smoke monitor while R27 held his wallet open. R1 arrived back with the transport van and zoomed into the smoking patio at a high rate of speed on her motorized scooter, leaving her one to one staff behind. R37 handed R1 his wallet, (unable to determine if she took anything from it). R1 then handed the wallet back to R37. He whispered over to her. At 8:24 a.m. R37 again gave his wallet back to R1, (we were not able to see if she took anything from it), and she then reached down and put the wallet into his lower left leg pants pocket. - On 5/7/14, at 8:43 a.m. R1 stated "there were no smoking problems here until this thing started [referring to 1:1 for unsafe smoking and not following facility rules], I used to buy 50-60 packs of cigarettes a day for these guys and I never charged them a thing." "Now because I have a 1:1, R117 buys things and he charges them a pack of cigarettes just to walk down to that little store." R1 stated that "[R117] was also known to charge for getting drugs and alcohol." R1 turned to R9 (roommate) and stated, "Isn't that right!" R9	{F 323}

{F 323}	Continued From page 215 verified the statement was true. The facility identified R1 as known smoking issues and questionably drugs and the facility identified R9 as a known pot smoker. - On 5/7/14, at 1:15 p.m. a call was made to the MPD-A to see if the facility had reported suspected drug dealing. MPD-A stated the facility called today to report suspected drug dealing, but had not reported it between 3/18/14 (date of survey exit) and today (5/7/14). - On 5/8/14, at 2:38 a.m. a progress note indicated, "Resident left facility since morning of 5/7/14, and has not returned to facility. Time now is 02:40 the DON had been notified, 911 had been called, and they are on their way to come and do a missing persons report. There is no phone number on file to contact the resident. Will continue to update as time goes on." - On 5/8/14, at 6:30 a.m. "Resident is still not back to the facility. The police are aware, have made a police report, and have assigned a case number for missing person. Please call MPD-C at phone number 612-673-5303 as soon as resident return to facility." - On 5/8/13, at 3:35 p.m. the interdisciplinary team (IDT) met to discuss the elopement and issued a 30 day discharge notice, and supervised leave only. - On 5/9/14, at 10:34 a.m. R117 was observed back in the facility. At 11:22 a.m. no progress notes have been entered to acknowledge R117 was back in the facility. - On 5/9/13, at 10:38 a.m. (was added to the progress notes) "Resident returned to facility unharmed. Resident verbalizes that resident is OK and has been safe at Treasure Island Casino. Writer called primary care physician to update on residents return and request an order that states: Resident must be supervised on all LOA's except	{F 323}

Awaiting return call from clinic." - On 5/9/14, at 11:50 a.m. "Writer received a new order from PCP that resident cannot leave the facility unless supervised. Also resident can leave the facility unsupervised if going to a medical appointment. While writer was speaking to resident writer observed residents eyes were bulging and he had very rapid jaw movement. Resident appears to be under the influence of something. Writer placed another call to PCP office to inform MD that writer believes resident is under the influence. Writer also reported to nurse at PCP's office that resident has not taken any medications. Writer also asked resident if he would complete a toxicology screen and resident denied. Resident also denied any drug or alcohol use to writer. Writer is concerned of his safety. Awaiting response from MD office." - On 5/9/14, at 12:00 p.m. "writer spoke with nurse at PCP office and orders received to send resident to the emergency room at St. Joseph's office due to suspected drug use along with his heart conditions. Resident will be sent to St. Joseph's hospital." - On 5/9/14, at 12:23 p.m. two police cruisers (three officers) and an ambulance were observed to pull up to the facility and enter the building. The consultant administrator informed the surveyors that "R117 was being really unruly, had been out of the facility for several days and not been taking his medication (including Coumadin), stated his eyes are bulging and I am so concerned he is going to have a heart attack, he is refusing to do a tox [drug toxicity] screen here (urine drug screen). We have called the doctor and he said to transfer to the hospital for evaluation. The police have been called to back up EMS, since he is not cooperating."	{F 323}

{F 323}	Continued From page 217 - On 5/9/14, at 12:35 p.m. a progress note indicated: Paramedics and police arrived to facility to transport per MD orders. Resident was unwilling with the officers and refused to get on the gurney. Three police office had to physically walk resident out of the building. While resident was walking out resident continued to scream "I am leaving AMA, I am leaving AMA. Writer gave paramedics full report on resident's condition and the fact that resident has not taken Coumadin for three days with his Atrial fibrillation and congestive heart failure (CHF) condition. All medication sheets, Face Sheet, code status, and physician orders sent with paramedics. Writer called St. Joseph's ER and gave report and updated on status, along with requesting toxicology screen. - On 5/9/14, at 1:04 p.m. a social work progress note indicated, "Resident discharged from the facility against medical advice today; May 9th, 2014 at 12:45 p.m. Administrator informed writer that resident was threatening to leave AMA. Writer went to meet with resident to discuss his plan, where he was planning on going, and why. When writer approached, resident yelled 'Are you LSW-C?' Writer responded affirmatively, resident then yelled 'Why did you tell [R81], I was threatening him? He's my friend and I have the right to see him.' Writer informed resident that writer was not aware of what he was talking about, writer asked who [R81] was. [R117] walked away. Another social worker approached resident regarding his statement that he was leaving AMA. Social worker asked to talk with resident he yelled 'no' and slammed the door. Social worker knocked on the door and asked resident what his plans were, he again slammed the door. Writer and social worker were informed that resident appeared to be under the influence of a	{F 323}

substance and had been asked to have a tox-screen done, when he refused his MD gave an order for resident to be sent to St. Joseph's hospital (where his cardiologist is) so that he could be monitored given his heart condition and not knowing what substances he had ingested. The police and paramedics arrived to take the resident to the hospital, resident stated that he was leaving the facility AMA. The police asked him "you are leaving the facility against medical advice?" Resident stated "yes." Police and emergecnt medical technician (EMT) then stated that his doctor gave an order for him to be admitted to the hospital so they had to take him. Resident again refused. The police informed him that they had to take him. Resident was asked to sit on the gurney he refused multiple times, the police escorted him out of the building. They asked resident if he had any drugs on his person, he stated 'yes' in his back pocket. Residents person was searched, a wallet and a pack of cigarettes were removed from his back pockets. A rolled up bag was removed from his fleece jacket pocket and resident identified this as cocaine. As resident walked down the hall he continued to yell 'I am leaving AMA' Resident refused to sign the Release of Responsibility for Discharge Against Medical Advice form. While resident was threatening to leave AMA the administrator called adult protection to update them on the concern that resident was threatening to leave and we were not able to get the information about where he would be going. The adult protection worker stated that they could not take the report until resident actually left the building. Writer called adult protection at 12:50 PM stating that resident had discharged against medical advice at 12:45 PM. Writer informed them that resident had left via ambulance and

Provide diagnosis listing, doctors name and contact information, date of residents admission, that he had come to the facility after being evicted from a group home, that he had not provided the facility with an emergency contact (although he has a girlfriend in the community, her name and identifying information is unknown). Adult protection was also informed that resident had stated that he would not allow them to admit him to the hospital. Adult protection asked that a follow up be done with St. Joseph's hospital to determine if resident had been admitted and then to follow up with adult protection. Social services will continue to follow if resident was admitted to the hospital. All other social service interventions are discontinued at this time." - On 5/9/14, at 2:34 p.m. a progress note indicated: writer received a call from nurse at St. Joseph's hospital. Resident refused to do a toxicity sample at the hospital. Per nurse resident stated, 'It is not nobodies damn business.' Resident is going to be discharged from St. Joseph's. IDT team notified." - On 5/9/14, at 15:47 p.m. a progress note indicated, "writer called St. Joseph's hospital, they do not have any documentation of resident being there. Writer spoke with E.R. nurse; she confirmed that resident had come into the E.R. but left AMA at 2:35 p.m. The E.R. nurse did not know where resident went. Writer called Hennepin County Adult Protection and updated them with the above information." - On 5/9/14, at 6:27 p.m. a progress note indicated: R117 returned to facility at 6:20 p.m. "[R117] was visably [sic] under a mind altering substance [sic]. He was presenting with facial tics and iradic [sic] behavior. Police were notified and no trespassing notice form was completed by	{F 323}

{F 323}	Continued From page 220 MPD-D. Officer was also provided with plastic baggies containing drugs that were found on [R117]. [R117] had been advised that his belongings will be packed up and ready for pickup by 10 a.m. tomorrow. As [R117] chose to leave facility AMA early today. R117 also left AMA from ER. Officer advised [R117] that when he is ready to pick up his belongings he must call the police prior and an officer will accompany him to the facility to get his belongings. He is not allowed on Camden property and notice is valid for 1 (one) year. DON and administrator present." - On 5/10/14, at 12:25 p.m. R117 was observed sitting on the air conditioner at the building next door to the facility, facing the freeway frontage road. - On 5/10/14, at 12:58 p.m. the administrator stated R117 was issued a trespass order, and escorted by police to the NMMC ambulance yesterday and then had left AMA from the hospital. R117 was supposed to call the police that morning and be escorted to the facility to pick up his belongings. "But he had not yet called." On 5/12/14, at 1:37 p.m. interview with contracted social workers CLSW-A and CLSW-B Verified they had not been in the facility on Monday May 5th through Wednesday May 7th, because Videll Health Care was late with the payment to the agency Circle of Life (social work temporary agency). Their agency had been contracted to get the facility up to date with assessments and plans, and they had been trying to meet the residents and get the assessments completed. When interviewed on 5/12/14, at 2:43 p.m. CLSW-A stated there was alleged rumor that there had been an exchange with R1 and other resident who had been discharged from the	{F 323}

facility (R117) and had exchanged something with resident R129 who had been admitted to the hospital on 5/11/14, with alcohol intoxication with a level of 0.323. CLSW-A stated, "I have personally had to question the 1:1 staff here at the facility when I have seen them sitting outside the door when resident is in the room with the door shut. When I have asked 1:1 staff how they are monitoring the resident when sitting outside the door some have gotten argumentative and said the resident did not want them in the room and I have told them you are supposed to be at arm-length not behind but in-front to make sure nothing is exchanged. I cannot imagine how a resident who was on 1:1 would get that much alcohol in her system and when I got here on Sunday I came to the office to open the computer to see what happened and there were no nursing notes. I went outside to the desk and told the administrator and director of nursing to get the nurse in to document and have the 1:1 fired. There are so many people here than I have seen on 1:1 for me 1:1 means the person needs to be somewhere else not at the nursing home." Although the care plan had been updated on 4/11/14, by CLSW-C and on 4/27/14 by CLSW-A, R117 had not been offered services for his repeated aggressive and confrontational behaviors, or chemical dependency.

ELOPEMENT:
On 5/5/14, and 5/6/14, R13 was observed to be allowed to leave the facility unescorted to smoke in the designated smoking area. Although R13 had a WanderGuard applied, the WanderGuard alarm was disabled when R13 left the building. On 5/6/14, at 4:45 p.m. R13 was observed to have eloped from the facility and was observed

{F 323}	Continued From page 222 on the city sidewalk by the surveyor. Upon arrival to the facility on 5/5/14, at 1:35 p.m. R13 was observed to be out on the designated smoking area with four other residents and two facility staff. R13 was observed to be in a wheelchair with a half laptray on the left side of the wheelchair. R13 was observed to be smoking a cigarette independently. On 5/6/14, at 8:30 a.m. R13 was observed to wheel independently to the front door. A chirping sound was heard and R13 was observed to exit the facility and wheel herself backwards to the smoking patio. No staff escorted her. Seven residents were observed to be in the designated smoking area. R13 wheeled to the table under the arbor, was assisted to light a cigarette by the smoking monitor and smoked independently. - At 8:33 a.m. R13 remained on the smoking patio with four other residents smoking. - At 8:46 a.m. R13 extinguished her cigarette appropriately and wheeled herself back into the facility. A loud beeping noise was heard as R13 entered the facility. The sound was immediately silenced to a slight chirping sound. R13 wheeled into the facility and down the hallway. No staff escorted her. - At approximately 11:00 a.m. R13 was randomly observed to smoking in the designated smoking area, a male staff was observed to be monitoring the smokers. R13 was observed to complete smoking her cigarette at approximately 11:20 a.m. and wheel herself into the facility unescorted. The smoking monitor did not assist. A quiet chirping noise was heard as R13 entered the building. -At 4:45 p.m. R13 was observed by the surveyor to be at the end of the driveway in her wheelchair	{F 323}

wheeling with her feet towards the 49th Avenue North. R13 turned left upon reaching the sidewalk and began wheeling herself with difficulty towards 6th street. After a few feet, R13 mad a U-turn and began pushing herself backwards down the sidewalk. The street was observed to be busy with multiple cars driving rapidly The speed limit was 30 miles per hour (MPH). The smoking monitor was observed to be behind a pillar with his back to the street and R13.
- At 4:46 p.m. the front desk monitor (O)-C was notified by the surveyor of R13 observed on the city sidewalk. O-C verified R13 "could not" be on the sidewalk near the street unsupervised and immediately ran outside to R13. When O-C reached the resident, R13 was approximately 20 feet past the end of the driveway and half way to 6th street, wheeling backwards on the sidewalk facing oncoming traffic. O-C was observed to speak with R13 and after several minutes, wheeled her back into the facility. O-C could be heard to tell the smoking monitor to watch for residents eloping. O-C returned R13 to the facility.

R13's Diagnosis Report dated 2/4/09, indicated diagnoses to include hemiplegia affecting the dominant side, depressive disorder and cognitive deficits due to cerebrovascular disease.

The Vulnerable Adult Assessment dated 6/24/13, identified R13 had history of wandering into other residents rooms, history of unsafe smoking and taking other peoples belongings. The assessment identified R13 had cognitive deficits, short-term memory loss, impaired decision making and poor judgement. In addition, R13 was identified to require supervised LOAs (Leave of Absences) only and identified R13 had a past history of drug

{F 323}	Continued From page 224 abuse. LOA Safety Assessment dated 6/24/13, identified R13 had cognitive impairments related to dementia, and resident was unable to leave the facility unsupervised. A Camden Care Center Care Conference form dated 10/1/13, indicated, "[R13] propels herself independently in a wheelchair to all destinations within the building - at times she will propel herself backwards and needs frequent reminders to not do this. She has a history of wandering from the facility and thus wears a WanderGuard to alert staff if she attempts to leave the building. She also has a history of wandering into other resident rooms and taking their belongings, which can cause other residents to become frustrated with her so she needs frequent redirection." The Nursing Assessment Packet Review for the reference period 3/19 - 3/25/14, included a safety Risk (Fall) Assessment dated 3/19/14. The assessments did not address or review the need for a WanderGuard. R13's quarterly MDS dated 3/25/14, indicated R13 was cognitively intact, was identified to have no behavior problems, and required extensive assistance with ADLs. A Care Conference summary dated 4/10/14, and another Care Conference form (undated) did not address R13's use of a WanderGuard or elopement risk. R13's Physician's Order Sheet dated 4/16/14, directed to check R13's WanderGuard every shift beginning 9/19/13.	{F 323}

received that the resident attempted to leave the facility on Tuesday May 6 around 4 pm trying to get to her son, resident was found by the receptionist on the sidewalk, redirected back into the facility. Resident has her WanderGuard on. Receptionist [O-C] reported that the she reminded the resident that resident cannot leave the facility unsupervised, receptionist was educated that when residents with WanderGuard would like to get out of the building to smoke, the smoke monitor should be alerted. Son and daughter notified. Message left to NPs voicemail to update on resident. Although the note indicated a message was left for NP, the NP was not called until four days after the incident.

On 5/8/14, at 12:44 p.m. the administrator stated he was notified of the elopement on Tuesday "the next morning" but was unclear why it was not reported to him until then.

The SA form dated 5/8/14 (no time documented of report), indicated, "Report received that the resident attempted to leave the facility on Tuesday May 6 around 4 pm trying to get to her son, resident was found by the receptionist on the sidewalk."

On 5/9/14, at 11:00 a.m. R13 was observed to wheel herself backwards out of the facility through the front entrance. The WanderGuard did not sound. O-C was observed to be at the front desk and was observed to reach to the right. O-C verified she reached to silence the alarm for the WanderGuard. R13 was observed to exit the facility without staff and wheel without staff to the designated smoking area.
- At approximately 11:25 a.m. R13 was observed to wheel herself out of the designated smoking

area, push the handicapped switch to open both doors and wheel herself backwards into the facility. O-C was observed to silence the WanderGuard alarm (reach down to activate switch). R13 wheeled herself backwards down the hallway into the facility. At the time of the observation, O-C stated she disabled the WanderGuard alarm for residents who wanted to smoke in the designated smoking area. At not time during the observation, do O-C alert the smoking monitor or staff of R13 leaving the building.

On 5/9/14, at 1:11 p.m. RN-C stated she was in the room when O-C reported R13 had eloped. RN-C stated the announcement was made and RN-C, LPN-E, LPN-A and DM were present for the announcement. RN-C stated she did not report the concern as it was LPN-A's responsibility and verified R13 was assigned to her unit. RN-C stated LPN-E was not available for interview. RN-C stated if a resident was found to elope, the staff should try to locate the resident; notify the family and physician of the elopement and if the resident was not located to notify law enforcement. RN-C stated an incident report should have been completed. RN-C did not indicate when the administrator or SA would be notified. When asked if and when the administrator and SA should be notified for elopement, RN-C stated LPN-A was responsible and she "believed" she may have notified the administrator or SA. RN-C was unclear if that occurred and was unclear when to notify the administrator and SA. Information, including the incident report and notifications, were requested at the time of the interview.

On 5/9/14, at 1:26 p.m. RN-C verified no incident

report was completed regarding R13's elopement and provided a copy of the report to the State agency dated 5/8/14. RN-C stated the report was made "48 hours later." RN-C provided a copy of a corresponding nursing progress note dated 5/8/14. RN-C verified the clinical record did not indicate when the administrator or State agency was notified.

On 5/12/14, at 10:26 a.m. DON stated he was not in the facility at the time of the elopement and he was not informed until 5/8/14. DON explained the incident was not reported to the administrator or SA because he was not at the facility. DON was unclear who was assigned to report in his absence. DON confirmed R13 should not have left the facility unescorted and stated residents with WanderGuards were at risk for elopement and leaving the facility without supervision was a safety concern. When asked if staff knowingly allowing a resident with a WanderGuard to leave the facility unsupervised was potentially neglect, DON stated he was aware of a "safety component" but was unclear on if this was neglect. DON verified the incident was no thoroughly investigated. In addition, DON verified the details of the incident were not documented in the clinical record and should have been. DON verified R13 should have been evaluated for elopement risk after the incident.

On 5/12/14, at approximately 2:00 p.m. CLSW-A and CLSW-B stated they were not informed of R13's elopement on 5/6/14. Both verified they should have been informed so they could assess the resident.

According to the record, R116 eloped from the facility on 5/11/14, at 9:30 a.m., 11:30 a.m. and

{F 323}	Continued From page 229 11:52 a.m. while wearing a WanderGuard device which had been implemented to prevent the resident's elopement. Record review indicated R116 had been admitted to the facility on 1/20/14, with diagnoses of lung cancer with metastasis (cancer moving from one body organ to another) to the liver and the brain, metabolic encephalopathy (temporary or permanent damage to the brain that occurs when the liver cannot clear the toxins from the body), confusion and depression. The record also indicated R116 had Hospice services initiated on 1/21/14. On 4/15/14, at 10:49 p.m. a nursing progress note indicated, "Pt [patient] is declining. He is very weak and needs a lot of assistance." A progress note dated 5/5/14, indicated R116 had been outside with his son and the resident had experienced a fall. R116's son was present at fall. Hospice was notified of fall and a new wheelchair (W/C) was ordered for resident. Staff had also placed a WanderGuard on the resident's chair to alert staff when the resident wanted to go outside to maintain resident's safety. "Resident is allowed to go outside although staff needs to be alerted. Son is aware and in agreement with interventions. Nursing is to continue to monitor." Additionally, a draft progress note dated 5/5/14, at 10:47 p.m. indicated R116 had increased confusion. "He requested going the bank to complete his transaction that he began earlier. He was leaning down to the floor to pick up of stuff which was apparently not there (visual hallucination). He was ambulating around getting out of w/c. Towards the end of shift he was on	{F 323}

{F 323}	Continued From page 230 one to one rotation to prevent him from falling." A progress note dated 5/6/14, at 2:55 p.m. indicated R116 continued to sit at nursing station with staff due to attempts to self-transfer and unsteady gait. R116 was observed on 5/11/14, at 9:30 a.m. to be on the sidewalk west of the facility. The health unit coordinator (HUC) was bringing R116 back into the building. The HUC stated she "had found him as she was driving into work." The HUC stated R116 had a WanderGuard on and she was surprised to find him walking outside since he was not able to walk every day. The HUC said she had called the facility and alerted them to the fact that R116 had left the facility and requested someone bring a wheelchair (w/c) to help bring him back to the facility. NA-R and safety monitor/NA-O had also come outside to look for R116. Two other NA's NA-P and NA-Q came outside with a w/c to meet R116 and return him to the facility. On 5/11/14, at 10:38 a.m. a progress note indicated, "At 9:30 a.m. upon arrival to work this writer found R116 outside the facility walking down the sidewalk. When approached he stated 'I am going to visit a friend.' R116 currently has a WanderGuard and due to cognitive impairments is unable to leave the facility unattended. He was verbally resistant to returning to the building but was eventually returned with staff assist of three. Note resident left out a fire exit at the end of the hall. Staff was in route to locate whom ever had exited the building, the DON, administration, and social worker (SW) updated." R116's progress notes from 5/11/14, at 11:52	{F 323}

a.m. included: "Fire exit alarm again sounded at the end of the hallway. Staff immediately responded and found R116 outside. He again stated that he was going to visit a friend. This time he was verbally and physically resistant to returning to the building. Three staff were able to convince him to return in a w/c (wheelchair) due to unsteady/weak gait. DON, SW, and charge nurse notified. Call placed to son who was updated and encouraged to visit and offer support to R116 if able. Son voiced that he understands that this confusion and resistance is likely a direct result of the Cancer. Support provided via phone."

Additional Progress Notes dated 5/11/14, at 4:27 p.m. included, "At 0930 AM resident went out the fire exit and was walking down sidewalk. Staff intervened and resident was brought into facility. Resident stated he was going to visit a friend. At 11:30 [a.m.] resident left out another exit. Staff was with resident and brought resident into facility. Hospice, family and administration were notified. Resident's WanderGuard (departure alert system) was in place and functioning. Resident also placed on 15 minute checks. Hospice updated on increased confusion along with family. Family was here to visit resident."

The facility's HUC was interviewed on 5/12/14, at 10:00 a.m. and at that time the HUC verified R116 had eloped from the facility three times on 5/11/14. The HUC stated R116 had left the building without staff present at 9:30 a.m., 11:30 a.m. and 11:52 a.m.

Although the HUC verified the resident had eloped without staff presence, R116's Progress Notes had indicated staff were with the resident

{F 323}	Continued From page 232 at 11:30 a.m. On 5/11/14, at 10:07 a.m. the administrator was interviewed and stated the day staff, afternoon staff, and night staff had been educated on the immediate jeopardy for drugs and ETOH and elopement and he could not believe the fact that R116 had gone out the back door, and was able to leave the facility. The administrator stated the investigation so far, was that staff heard the back door open, went and looked but had not seen anyone, so they assumed it was staff. The administrator verified that there was no WanderGuard alarm on the back door. On 5/12/14, at 11:00 a.m. surveyors tested the key pad coded door which was locked, but noted that staff unlock the door and enter without regard to which residents are nearby. On 5/13/14, at 1:00 p.m. the consultant administrator stated the facility had checked the key pad coded door to the access hallway to the back exit, which was functional and also there was a WanderGuard system in place on the back door, which was functional, the facility had tested the doors and were not able to determine how the resident had gotten out of the facility by the back door. The facility Elopement policy dated 5/12, indicated... If exit seeking behavior is identified the licensed nurse immediately implements interventions to manage exit seeking behaviors. These interventions may include a personal security device such as a WanderGuard, or diversion activities. The interventions are documented on the care plan and the nursing assistance care plan. ...If the resident is not	{F 323}

{F 323}	Continued From page 233 located within 30 minutes, the Administrator or designee notifies the law enforcement officials, the corporate compliance officer and corporate director of clinical services. When the resident returned to the facility a physical assessment would be done, a thorough investigation of the event would be completed by the DON or designee. A factual account of the occurrence would be documented in the medical record, and the care plan would be reviewed and revised. The administrator of designee reports the event to the appropriate state agency (SA). R9 was not supervised during smoking, was keeping smoking materials and was an alleged "Pot smoker." On 5/6/14, at 7:40 a.m. R9 was observed smoking cigarettes out front on the designated smoking patio with no staff in attendance. On 5/6/14, at 8:56 a.m. R9 was observed wheeling herself to the front designated smoking area, she retrieved cigarettes and a lighter from her right sock and placed them on the table next to a covered ash tray. R9 then leaned to the table with her right elbow as she lit her cigarette and started to smoke. During observation, NA-B went over to the smoking cart to get a smoking apron, applied the apron on R9, and sat directly across from R9. -At 9:05 a.m. NA-B continued to watch R9 as she smoked. -At 9:08 a.m. R9 was observed wheeling herself into the building. No burn holes noted on the front of her shirt or clothing. On 5/6/14, at 10:05 a.m. R9 was observed wheeling herself out of the building as staff monitoring the smoking area was observed	{F 323}

{F 323}	Continued From page 234 applying a smoking apron, wheeled herself to the smoking area retrieved her cigarette and lighter from her socks as she was leaning far forward and continued to lit the cigarette and began to smoke. -At 10:11 a.m. R9 was still observed sitting on her w/c at the smoking area. At 10:14 a.m. R9 lit another cigarette leaned very far forward to retrieve and replace cigarettes in her socks and continued to lean forward multiple times as she smoked. -At 10:19 a.m. R9 returned back to the building. On 5/6/14, at 2:45 p.m. when interviewing R9 surveyor observed a cigarette box in each white sock on each inner leg. When R9 was asked why she was storing the cigarettes in the socks she stated "You can leave now, go now". Surveyor left the room as requested. When interviewed on 5/6/14, at 3:06 p.m., the DON stated he was not sure if R9 was supposed to be supervised during smoking, and indicated he had been given a list of smokers who required supervision just that day. Upon review of the list, the DON stated R9 was a supervised smoker which meant she should relinquish her cigarettes and lighter. DON stated R9 should not have had any tobacco products on her person, but did not have to wear an apron. Following the interview, the DON was observed to approach R9 at the smoking area and speak to her, and to return to tell the surveyor R9 had refused to give him the cigarettes she had in her socks. When interviewed on 5/6/14, at 3:12 p.m. NA-I (smoking monitor) verified after looking through the locked cigarette box on the cart R9 did not have cigarettes in box. NA-I stated he had been	{F 323}

working at the facility for a month and R9 had never had cigarettes in the locked box.

When interviewed on 5/6/14, at 3:20 p.m. the administrator, DON and LPN-A (the resident care manager for R9) all stated if a resident was a supervised smoker they were supposed to relinquish all smoking materials but many refused. They said they couldn't force them to do it as the residents were part of the supervised program. LPN-A further stated "They have been told that they have to do this and we had a meeting with all smokers last week. They were given a copy of the smoking policy by social services and were supposed to sign it, but some refused. We have told them the rules and when they are or aren't allowed to keep them [their cigarettes], but they don't care. [R9] should be in there, but she won't give them to us."

When interviewed on 5/6/14, at 3:25 p.m. the DON stated, "We have a smoking policy updated and it does include that they should relinquish, are still supervised, the smoking monitor makes sure they are safe with their usage, that is why they are out there and we are still keeping them safe, we have tried to get her lighter and cigarettes on repeated effort but have not been able to do so."

When interviewed on 5/6/14, at 3:43 p.m. LPN-A stated "Problem is if I took her cigarette and lighter, she would just get the cigarettes from somewhere else probably gives someone money to go buy a pack of cigarettes. We tried this morning to take them from her and she stated "I'm not giving them to you because you will sell them to another resident". LPN-A stated the policy had been explained and R9 had asked

what would happen if they did not abide and LPN-A had stated they were consequences. LPN-A further stated the NA who was monitoring the smoking had a book on the cart and documented when a resident refused or when they are not safe. When asked by surveyor if the smoking monitor had reported off to her LPN-A stated she was not sure maybe the social worker had been reported to.

When interviewed on 5/12/14, at 2:26 p.m. CLSW-A stated when R9's room had been searched on 4/23/14, R9's cigarette roller had been found on the roommate's side and had been taken out of the room and kept in the social service room and family had been called to get it but R9's family had been very upset about staff removing the roller from the room. Both CLSW-A and CLSW-B stated they were un-aware R9 was an alleged "Pot smoker" or had history of using per the Resident List Report dated 5/8/2014, provided by the administrator. Both indicated they had not received the list of all the residents who had been thought to have substance abuse issues.

When R9 was interviewed on 5/13/14, at 8:36 a.m., and asked whether she smoked "pot', R9 stated "It's a lie that I am using any pot" and kept repeating same statement to the surveyor.

R9's MDS dated 3/24/14, identified R9's diagnoses included schizophrenia, diabetes mellitus, orofacial dyskinesia, psychotic disorder, manic depression and chronic obstructive pulmonary disease. The MDS indicated R9 had no behaviors and had a BIMS score of 15 indicating intact cognition. In addition, the MDS indicated R9 received one person assist with

{F 323}	Continued From page 237 transfers, dressing, hygiene, and R9 was did not use any mobility devices yet R9 used a w/c during the course of the survey around and off the unit for mobility. The nutritional status Care Area Assessment dated 3/25/14,, had identified R9 had history of tobacco abuse. The smoking care plan dated 10/20/11, identified R9 was a smoker. Goal "[R9] will follow all guidelines regarding smoking at Camden Care Center, will remain safe while smoking." Care plan directed cigarettes and lighter will be kept at nursing station, and R9 was a supervised Smoker. Smoking Evaluation dated 10/7/13, indicated R9 was independent with smoking and smoking materials. After concern was brought to the facility attention on 5/6/14, another Smoking Safety Assessment was completed which indicated R9 was to remain as a supervised smoker, facility was to store tobacco products but may choose to wear apron or not. Progress Note dated 4/30/14, indicated the director of facility operations and two social workers had been to R9's room and a bottle of "Shout", raw tobacco and other materials (for the tobacco to be rolled) had been removed from the room and placed in the Administrator's office for the family to pick up when they visited. The undated and untitled list of Unsupervised and Supervised Smokers, revealed R9 was identified as a supervised smoker,did not need to wear a smoking apron, but was supposed to be within an arms distance from the smoking monitor. R14 was observed to ingest an unknown substance, was sent to the hospital and tested	{F 323}

positive for THC (the active substance in marijuana) on 5/3/14, R14 was not evaluated for substance abuse, assessed for safety or provided supervision to prevent potential future access to illegal drugs.

R14's admission record dated 1/14/14, indicated diagnoses to include depressive disorder, epilepsy and below the knew amputation. R14's significant change MDS dated 12/31/13, identified R14 had moderately impaired cognition, no mood problems and physical behavior symptoms towards others 1-3 days in the assessment period. The MDS indicated R14 required extensive assistance with most ADLs but was independent with locomotion on and off the unit and eating. The CAA were all dated 1/9/14; CAA for cognitive loss/dementia indicated R14 was able to understand and be understood. CAA for ADL function and rehab potential identified R14 had "alcohol abuse" and "alcohol induced dementia. CAAs did not identify any history of drug use.

R14's Vulnerable Adult care plan dated as revised on 4/26/14, indicated R14 had a "History of chemical abuse, including marijuana and heroin. The care plan goal indicated R14 would "remain safe and free from abuse/neglect." The care plan interventions indicated R14 refused all in-house and outside psychiatric services. The care plan identified R14 required supervision for LOA from the facility.

A nursing Progress Note dated 5/3/14, at 8:35 p.m. indicated a nursing assistant (NA) had reported to a nurse they saw R14 "put something" in a small plastic bag "possibly drug" at 8:30 p.m. The note indicated a nurse approached R14,

noted he had something in his mouth and asked the resident to "spit out" what was in his mouth. R14 refused to open his mouth, swallowed the content and then opened his mouth for the nurse. The note indicated R14 was "non-cooperative" and "attempted to hit the nurse with his fist." The note indicated the physician had been notified and R14 had been sent to the ER for evaluation.

A North Memorial Robbinsdale HUC Transfer Packet indicated the results of toxicology screen identified R14 was positive for "THC Metabolites [the active drug components of marijuana]" from the past 24 hours. The report identified the laboratory report had been obtained for R14 due to "drug ingestion."

Although the specific incident was documented on 5/3/14, the clinical record lacked documentation including, investigation of the incident to determine potential source(s) R14 may have obtained the illegal drug from, notification of law enforcement, any follow up assessment of R14's safety, an evaluation of R14's access to leave the facility, such as to smoke; documentation of how to prevent potential future instances of R14's illegal drug access and ingestion, monitoring of R14 and interdisciplinary involvement, such as medically related social services.

On 5/8/14, at 11:32 a.m. R14 was interviewed. R14 stated he did not recall the incident on 5/3/14. R14 stated his memory was poor due to being an "eplileptic." R14 denied awareness of illegal drug and ETOH activity in the facility. When asked what R14 would do if she observed illegal drug or ETOH activity in the facility, R14 stated he would "tell the resident not to do it," but would not

{F 323}	Continued From page 240 notifiy staff. When asked why he would not notify staff, R14 stated, "'Cause we all have enough troubles, if someone wants a little activity on the side, go for it!" On 5/12/14, at 10:26 a.m. the DON was interviewed, and verified there was no current system in place for monitoring staff to ensure facility policies were followed. DON was unclear on the specifics of R14's incident. On 5/12/14, at approximately 2:00 p.m. CLSW-A and CLSW-B both verified they were not aware or informed of R14 obtaining and ingesting an illegal drug. Both verified they were not notified R14 was sent to the hospital and had a positive toxicity screen for marijuana. Both CLSW's explained they would have assessed R14 and reviewed potential CD treatment options with R14. Both CLSWs expressed R14 may require increased supervision due to accessing an illegal drug and his history of chemical dependency. Both verified they had access to the computer clinical record, CLSW-A stated the facility lacked consistent documentation of incidents, interventions, assessments and follow up. R62 was identified by the facility to have past/recent substance abuse. R62 had diagnoses that included memory loss, dementia and cerebrovascular accident (CVA). The MDS did not address R62's substance abuse. The most recent cognitive loss/dementia CAA dated 9/11/13, lacked a comprehensive summary of the resident. Review of the quarterly MDS, dated 2/25/14, indicated R62 had moderate cognitive impairment. Review of facility progress note dated 1/24/14, at	{F 323}

{F 323}	Continued From page 241 17:03, indicated "a resident approached writer alerting us that another resident (res) is sitting outfront smoking marijuana. Writer went and found R62 smoking a joint. Writer told res that she'd have to put it out, and to consider this a warning. She was informed that the next time she will be discharged. Writer also asked res if she had anymore marijuana and she denied having any". Review of facility progress note dated 1/24/14, at 17:17, indicated "this writer with the Administrator approached this resident in her room to talk to her about her smoking weed-as per another resident who is a smoker too. Res agreed that she was smoking "weed" this afternoon at the smoking designated area. Writer told resident that the next time she is found smoking "weed" she will be discharged. Res verbalized understanding, and denied having anymore "weed" with her. Nursing will continue to monitor". Review of a Vulnerable Adult Assessment dated 3/18/14, identified R62 had "past/recent substance abuse" and a history of risky behaviors and being in an abusive relationship. R62 was identified to need supervised LOA except for appointments with scheduled transport. R62's care plan with revision date of 4/26/14, identified that R62 had no indications for displaying inappropriate behaviors, had a history of being in an abusive relationship, and had impaired cognitive function/dementia, evidenced by varying mental function, judgment deficit, dementia, 'ETOH" abuse and impaired decision making skills. The care plan did not address ETOH and/or drug abuse even though it was identified in the Vulnerable Adult Assessment and	{F 323}

participate in chemical dependency treatment. The facility Resident List Report, provided 5/8/14, at 11:00 a.m. identified R86 as a known pot smoker.

According to the Admission Record dated 3/16/13, R86 had been admitted to the facility with diagnoses including: hepatic encephalopathy (confusion related to liver failure) and cirrhosis of the liver and hepatomegaly (enlarged and fatty liver) alcoholic liver damage, thrombocytopenia and anemia (blood disorders related to clotting factors not supplied by the damaged liver, psychosis, drug abuse and drunkenness.

A care conference dated 1/2/13[sic] (2014), lacked mention of commitment to facility for chemical dependency and mental illness, or need for treatment when stable.

A progress note dated 2/24/14, at 4:38 a.m. " Resident had been very confused and having difficulty to settled down in bed. judgement [sic] has been non intact and appearing restless with a lot of tremor. He did attested [sic] to this writer that when he goes LOA he smokes marijuana but never drink ETOH at all. He state "If I drink I will die. " His platelet has been dangerously lower thus posing him at a risk for bleeding. Update DR smiley about resident change in condition, which then mandate this writer to send resident to the emergency for thorough evaluation at this time. Meanwhile, writer had been trying to touch base with family members but unable. We will continue to follow up with his condition. "

A progress note dated 2/24/14, indicated at 11:00 p.m. "Pt was found smoking 'pot' in his room. His roommate was in the room at that time. The

nurse discussed the disadvantages of smoking in the room including fire hazard. The administrator was informed via text messaging and incident report filled out."

A progress note dated 3/4/14, at 6:11 a.m. noted, " While executing an initial nursing rounds this shift, this writer smell and noted a medicine bottle fill up with marijuana. Upon conversation, this resident did urge this staff that; he was not going to smoke within this vicinity and he refused to surrender it to this writer, instead he affirmed to this writer that he was going to report it to the police. Added to that, he did want to have an extra oxycodone which had been previously discontinued. He had flexeral [sic]with some benefit noted. He want [sic] another sleeping pills at about 4 am. He had one sleeping pill at bedtime. Refused 50 mg of Trazodone [sic], he wanted 100 mg. Meanwhile we will continue to offer him support and encourage him with care and pain management protocol at this moment. "

An annual MDS dated 3/22/14, had a BIMS score of 15/15. R86 required setup for dressing and meals and was independent with all other cares. A vulnerable adult assessment dated 3/18/14, noted past and recent chemical abuse. R86 had fluctuating cognitive deficits related to liver damage, chemical use and needed supervised LOA due to fluctuating cognition and chemical use.

A smoking assessment dated 3/18/14, indicated reports of smoking marijuana outside, and recent drug use reported by resident.

A LOA safety assessment dated 3/18/14 indicated mental illness, fluctuating cognition related to liver

R86 needed supervised LOA due to fluctuating cognition and chemical use (no mention of committed to the facility related to substance abuse and mental illness. On 4/13/14, a care conference indicated: long term placement waiting for liver transplant. " Is aware of need to remain sober to stay on the (transplant) list. Does not want to go to treatment. Discussed AA (alcoholics anonymous), stated he has tried in the past. " The care plan dated 3/27/14, indicated: R86 was a vulnerable adult related to cognitive limitations, physical limitations, history of substance abuse past and recent, interventions included: Provide resident with treatment program information as needed and as requested. Resident has been assessed and is appropriate to leave facility for appointment with schedule transport. Resident has been assessed and may not leave this facility without supervision due to fluctuating cognition secondary to liver disease and substance abuse. R86 was committed to prevent exposure to ETOH and chemical substances of abuse. The facility lacked coordination of care between departments, and failed to provide an environment free of chemical/alcoholic substances, or to transfer R86 to a secured environment where appropriate care could be provided. R113 was a known alleged narcotic seller by the facility staff. On 5/12/14, at 12:36 a.m. R113 was observed ambulating across the nursing station with his walker as he conversed to both residents and	{F 323}

{F 323}	Continued From page 246 staff as he ambulated to his room down the hallway. On 5/12/14, at 1:53 p.m. R113 was observed sitting on his bed back facing the door and was observed rolling cigarettes using a cigarette roller. R113 asked if it was okay to continue to roll the cigarettes as surveyor talked to him. -At 1:54 p.m. R113 stated he knew exactly who started the rumor about the narcotics. R113 indicated he is currently trying to resolve his marriage and his wife who would not allow him to come out to her house for visits if she found out he had ETOH and drugs issues. R113 stated he remembered the incident when the therapy staff had intervened when he had been approached by another resident for cigarettes and he remembered being talked to by the administrator and social worker about the policy. R113 further stated he also took his medications in front of the nurses as he knew this was going to be a concern/issue and also indicated he knew of ETOH being used at the facility by other residents but because he was a recovered alcoholic he kept his nose out of all trouble to get back with his wife. When interviewed on 5/12/14, at 1:57 p.m. RN-A stated he always watched R113 take all his medications and made sure he swallowed them then took the medication cup out of the room. When interviewed on 5/12/14, at 2:18 p.m. both CLSW-A and CLSW-B stated they were not aware of R113 using any illicit drugs at the facility. CLSW-A stated she remembered talking to R113 for less than ten seconds when he had asked if he would continue to roll the cigarettes and had told him not to until he was told otherwise.	{F 323}

{F 323}	Continued From page 247 R113's significant MDS dated 2/14/14, indicated R113's diagnoses included acute ETOH hepatitis, ETOH withdrawal, ETOH dependence and insomnia. The ADL Functional/ Rehabilitation Potential CAA dated 2/14/14, indicated R113 had history of ETOH abuse. The mood/Behavior care plan dated 4/28/14, identified R113 had history of ETOH abuse, had history of depression and had recent amputation of toes due to frost bite. Resident List Report dated 5/8/2014, provided by the administrator indicated R113 was selling narcotics. Smoking Evaluation dated 3/17/14, indicated R113 had no history of unsafe smoking practices and was independent with smoking and smoking materials. Vulnerable Adult Assessment dated 3/17/14, indicated R113 had history of chemical abuse but no recent history. Physician order dated 4/21/14, indicated resident had three orders for Oxycodone (Narcotic pain medication) 1-3 tablets (5-15 mg) by mouth every four hours as needed (PRN), Oxycodone 0.5-1 tablets (5-10 mg) by mouth daily as needed for dressing changes only and Oxycodone 1 tablet (5 mg) by mouth daily as needed for physical therapy/occupational therapy (PT/OT) only. Progress Notes review revealed the following: -Progress note dated 4/24/14, indicated R113 was in therapy when another resident approached him and asked to buy rolled	{F 323}

{F 323}	Continued From page 248	{F 323}		

cigarettes from him. Therapist stopped transaction to check facility policy. R113 and therapist approached social services to ask about policy and were directed to the administrator but the administrator was unavailable and a note was left for administrator to please visit with R113 regarding policy. R113 was instructed not to sell any rolled cigarettes until cleared by administrator.
-Social Services Progress Note dated 5/2/14, indicated R113 had declined to attend the smokers meeting to be updated on the facility policy and procedure regarding smoking. The administrator and social worker had met with R113 and was given a copy of the facility policy and discussed the rules regarding smoking. R113 was also educated on rolling cigarettes for other residents and informed until further notice he could not be not allow to give, sell, trade, or buy cigarettes with other residents which R113 acknowledged.

R1 was not smoking at the designated area, was not wearing an apron, had known alleged drug involvement at the facility and was keeping her smoking materials.
On 5/5/14, at 1:50 p.m. during the initial tour R1 was observed to be assisted to light a cigarette while outside on the smoking patio. At 1:52 p.m. staff provided R1 with a smoking apron and attempted to apply but R1 was observed to shake head no. At 1:54 p.m. R1 still had no smoking apron applied but continue to smoke in the front designated smoking area and staff was within arms-length reach of R1.

On 5/7/14, at 7:34 a.m. R1 was observed with a lit cigarette right outside the front door with no smoking apron on. NA-E got into the front seat of

{F 329}	Continued From page 250 review, the facility failed to ensure target behavior and side effect monitoring, sleep monitoring, and parameters for use were in place for 7 of 7 residents reviewed for unnecessary medications. (R91, R36, R37, R89, R1, R113, R29). Findings include: R91 had physician orders for PRN Tylenol, Ibuprofen and Oxycodone (pain medications) without identified parameters for when to use which medication. Review of the Admission Record dated 5/9/14, indicated R91 was admitted on 10/9/13 with a diagnosis of osteoporosis. The significant change in status Minimum Data Set (MDS) dated 4/1/14, indicated R91 had frequent pain rated at a six. Review of the Physician's Order Sheet signed 4/18/14, included orders for Ibuprofen 600 milligrams (mg) every six hours PRN, Tylenol 650 mg every six hours PRN and Oxycodone 15 mg every six hours PRN all for pain and lacked parameters for use. Review of the Medication Administration Record (MAR) dated 4/1/2014-4/30/2014, revealed R91 did not receive any PRN Tylenol and Ibuprofen and received multiple doses of PRN Oxycodone. R36 had physician orders for PRN Tylenol and Oxycodone without identified parameters for when to use which medication. The Admission Record dated 4/28/14, indicated	{F 329}

{F 329}	Continued From page 251 R36 was admitted to the facility on 5/26/12 with diagnoses of femur fracture and alcoholic cirrhosis of the liver. The quarterly MDS dated 2/18/14, indicated R36 had occasional pain rated at a four. The Physician's Order Sheet dated 5/1/14, included orders for Tylenol 1000 mg three times a day (tid) as needed and Oxycodone 10 mg tid both for pain and lacked parameters for use. Review of the MAR dated 4/1/2014-4/30/2014, revealed R36 received Tylenol three times for pain rated at an eight and Oxycodone two times for pain rated at an eight. When interviewed on 5/7/14, at 1:51 p.m. registered nurse (RN)-A reported he would usually do a pain assessment for PRN pain medications and for a pain level below three he would not give Oxycodone. When interviewed on 5/7/14, at 1:56 p.m. the consultant pharmacist stated he would expect parameters written by the physician to clarify when to give which PRN pain medication. On 5/9/14, at 8:46 a.m. licensed practical nurse (LPN)-B was interviewed and stated when there is multiple PRN pain medications ordered, she would assess pain level and start with the lowest pain medication unless the resident's pain was "really bad" or something else worked for the resident. Upon interview on 5/12/14, at 9:40 a.m. RN-B stated she would start with Tylenol first and see if it works, then would document if it was ineffective	{F 329}

{F 329}	Continued From page 252 and then try Oxycodone unless there was a specific physician order. The facility Pain Management policy revised May 2013, lacked direction regarding parameters for PRN pain medication. R37 had physician orders for Seroquel (an antipsychotic medication) without adequate indications for use, without side effect and symptom monitoring and lacked evidence of a gradual dose reduction (GDR) or documentation of a clinical contraindication. The Admission Record dated 1/14/14, indicated R37 was admitted to the facility on 9/19/13. Diagnoses included altered mental status and alcoholism. The Psychotropic Drug Use Care Area Assessment (CAA) dated 10/7/13, indicated R37 was receiving antidepressant and antipsychotic medications; however, lacked a comprehensive assessment summary regarding the medications in use. A Psychotropic Medications care plan revised on 3/16/14, included Seroquel was used for psychoses and directed to monitor for side effects and consult with pharmacy and physician to consider dosage reduction when clinically appropriate. The Physician's Order Sheet dated 4/1/14, included orders for Seroquel 25 mg every bedtime and indicated the diagnosis was anxiety. Review of the Physician's Order Sheet dated	{F 329}

5/1/14, lacked a diagnosis for the medication. The Information and Consent for Psychotropic Medications dated 9/19/13 and 2/26/14, indicated the diagnosis to support use were "agitation/sleep."

A review of three undated Behavior/Intervention Monthly Flow Record, revealed R37 was monitored for number of hours of sleep and "yelling/striking." The records revealed R37 slept between six and eight hours on all nights recorded and yelling/striking behavior did not occur.

Physician and nurse practitioner notes dated 11/15/13, 1/8/14, 1/22/14, 2/5/14, 4/9/14 and 4/10/14, were reviewed and lacked a diagnosis of psychosis or a clinical contraindication to a gradual dose reduction.

When interviewed on 5/7/14, at 3:09 p.m. the consultant pharmacist (CP) stated side effects were supposed to be monitored as this was required by the regulation. CP further stated all behaviors have to be specific to the resident.

Upon interview on 5/12/14, at 3:57 p.m. the nurse practitioner (NP) stated R37 received Seroquel for psychosis, verbal outbursts and generalized anxiety which were mainly problematic when R37 was drinking. The NP stated she believed a different medication was used when R37 was in the hospital prior to admit and was unsuccessful because of liver disease. The NP stated she had not reviewed R37's medications because he had been in the hospital frequently and she tries to do dose reductions quarterly.

When interviewed on 5/13/14, at 8:46 a.m. LPN-A

{F 329}	Continued From page 254 stated the indication for use for Seroquel was not listed and she would have to check with the physician. LPN-A stated she was not sure what target behaviors were being monitored for Seroquel. LPN-A stated orthostatic blood pressures were recorded in the electronic record. After review of the Weights and Vitals Summary, LPN-A verified there were no orthostatic blood pressures recorded for R37 since December 2013. A call was placed to the CP on 5/13/14, at 10:01 a.m. to clarify adequate indications for use of antipsychotic medications, no return call was received. The facility Psychoactive Medication Management policy revised May 2013, directed the DNS [director of nursing services] or designee was responsible to ensure timely medical consultation when a psychoactive medication requires a medical review. R89 was not monitored for target behaviors to determine efficacy of Zyprexa (an antipsychotic medication). In addition, R89 was not monitored for potential side effect of orthostatic hypotension (a sudden drop in blood pressure with position change, such as standing or sitting up from a lying position). R89's admission MDS dated 12/28/13, indicated R89 was never or rarely understood, had short and long-term memory problems and R89 had moderately impaired decision making ability. The MDS identified R89 had hallucinations, delusions,	{F 329}

{F 329}	Continued From page 255	{F 329}		

and other behaviors concerns towards others. The CAA for ADL (activities of daily living) function/Rehabilitation Potential dated 1/3/14, identified R89's diagnoses to include altered mental status, cognitive impairment and weakness. The CAA identified R89 required staff assistance for ADLs, had no pain concerns, had a history of falls (but no falls in the facility) and was incontinent of bowel and bladder. The CAA for behaviors dated 1/3/14, indicated, "Resident exhibits behavioral symptoms and is cognitively not alert and orient [sic] when writer attempted to assess her. SS [social services] will care plan this matter accordingly." The CAA for falls, also dated 1/3/14, recapitulated the same information as the ADL CAA. The CAA for psychotropic drug use identified R89 used an antipsychotic and R89 had "hallucinations." Although the CAA identified the class of medication used and hallucinations, the CAA lacked identification of what the hallucinations were, what antipsychotic was used, and what target behaviors would be monitored. The CAA indicated, "Nurses will continue to assess for effectiveness of meds [medications] and side effects."

R89's care plan for psychotropic medications dated as revised on 1/5/14, identified R89 used Zyprexa related to "potential injury to self or others, dementia and agitation, pick [sic] disease." The care plan directed to administer the medication as ordered, monitor/document for side effects and effectiveness. The care plan directed to "discuss with MD [physician], family re [regarding] ongoing need for use of medication," directed to educate on risks and benefits of using Zyprexa, "Monitor/record occurrence of for target behavior such as agitation, inappropriate response to verbal communication, and

{F 329}	Continued From page 256	{F 329}		

document per facility protocol." The care plan lacked appropriate identification of a target behavior which warranted the use of an antipsychotic, such as hallucinations. Although the care plan directed to monitor for a target behavior, the care plan lacked indications for the ongoing use of Zyprexa.

A physician's Progress Note dated 2/12/14, identified R89 was seen for her first visit. The note indicated while in the hospital R89 had been on a high dose of Seroquel and switched to a low dose of Zyprexa. The note indicated R89's Zyprexa would be considered to be increased to 7.5 mg.

The Physician's Order Sheet dated 3/5/14, indicated R89 had olanzapine (Zyprexa) 5 mg ordered by mouth daily for diagnosis of atypical psychosis.

A Geriatric Services of Minnesota Progress Note dated 3/7/14, indicated R89 was seen by a nurse practitioner. The note identified R89 "appears to be distressed" and was noted to "sit/stand multiple times from wheelchair." The note indicated R89 received 5 mg of Zyprexa daily, "Staff have no reports of behavior changes, but note impulsivity" and identified R89 fell twice in February. The "Psych:" section indicated R89 was "Agitated w/ [with] worried look on face. Mumbling. Slight diaphoresis [sweating]." Continuation of the note indicated Zyprexa would be increased to 7.5 mg "due to continued agitation/impulsivity." A Physician's Order dated 3/7/14, indicated Zyprexa was increased to 7.5 mg by mouth daily and directed to add the diagnosis of schizophrenia.

{F 329}	Continued From page 257 Review of the clinical record, including interdisciplinary team (IDT) Progress Notes from admission to the time of survey indicated no behavioral concerns were documented, such as hallucinations, agitations symptoms or impulsivity. R89 had no IDT progress notes documented after 2/14/14. Although appropriate side effect monitoring was noted in the clinical record, such as labs and Abnormal Involuntary Movement Scale (AIMS) on 3/12/14, the clinical record lacked evidence of target behavior monitoring for the efficacy of Zyprexa. A social service progress note dated 3/26/14, at 3:00 p.m. indicated R89's behaviors were reviewed. "Quarterly Social Service Assessment-Care plan reviewed for changes in mood, behavior, and cognition and updated to reflect Resident's current status. Staff assessment for BIMS [brief interview of mental status, a tool used to measure cognition] and PHQ-9-OV [a tool used to measure potential depression] completed as Resident never or rarely understood questions being asked. Resident has severely impaired cognition r/t [related to] dementia. PHQ-9-OV assessment score of 0 out of 27 indicating no s/sx [signs or symptoms] of depression. Resident continues to receive Zyprexa 7.5 mg [milligrams] daily for dementia/schizophrenia which seems effective. No adverse reactions noted with use of psych med. Will continue to monitor for side effects and effectiveness. [name or R89's guardian], assists with all business and personal needs. Resident has been assessed and cannot leave the facility on an unsupervised LOA [leave of absence]. Resident and guardian have been invited to the upcoming care conference. Social services to continue to be available and assist in meeting the psychosocial needs of Resident."	{F 329}

{F 329}	Continued From page 259 since January. On 5/12/14, at 9:44 a.m. the director of nursing (DON) verified R89 should have been assessed for the use of antirollbacks and restraints. DON verified the facility identified target behaviors of agitation and restlessness were not resident specific. DON verified checking the orthostatic blood pressure should have been included in monitoring for side effects of the medication. The Psychoactive Medication Management policy dated as reviewed 5/2013, directed the IDT to identify residents whose behaviors may require the use of psychotropic medications, and identify the diagnosis and/or behavior that are "antecedent" for the psychoactive medication. The policy indicated the goal of the IDT was to assess/monitor the psychoactive drug use and "ensure residents are assessed/evaluated for dose reduction opportunities on an ongoing basis." Although the policy identified potential examples of behaviors which may require monitoring, the policy incorrectly identified diagnoses of "Agitation" and vague terms such as "Aggression" and "Socially inappropriate actions" as "behaviors." The policy lacked clear direction to determine resident specific target behaviors, and lacked clear direction on where to document target behaviors in the facilities clinical record. The policy lacked identification of the frequency of target behavior monitoring and frequency of the evaluation of the data. Consultant Pharmacist Recommendations for dated 4/17/14, identified Olanzapine 7.5 mg daily. The form indicated "also, we need to monitor these behaviors" after a list of potential target behaviors (none were checked). The Modifications as follows section indicated	{F 329}

{F 329}	Continued From page 260	{F 329}		

"Behavior monitoring implemented." The form was not signed or dated. The PharMerica Medication Regimen Review form indicated last review was on 5/7/14 and "No New Suggestions" were identified. On 4/17/14, the consultant pharmacist review indicated, "Suggest change Dx [diagnosis] to include supporting behavior patterns & then Monitor."

On 5/13/14, at 10:01 a.m. the consultant pharmacist was called and a message left. The consultant pharmacist did not return the call.

R1 was not monitored for potential side effects related to use of Trazodone and Venlafaxine (an anti-depressants) and Zolpidem (a hypnotic).

Findings include:

R1's diagnoses included insomnia, chronic pain, arthritis, osteoporosis, depression and diabetes mellitus obtained from the MDS dated 3/4/14. The Mood section of the MDS identified R1 as having symptoms "Feeling down, depressed, or hopeless, trouble falling or staying asleep, or sleeping too much, feeling tired or having little energy, poor appetite or overeating, feeling bad about yourself-or that you are a failure or have let yourself or your family down and thoughts that you would better off dead, or of hurting yourself in some way." The assessment indicated R1 had all the symptoms were nearly every day.

The CAA dated 12/10/13, indicated R1 used antidepressants, and sleep aides, and indicated staff would continue to monitor for effectiveness of the antidepressants and sleep aides as well as for side effects. In addition the CAA indicated R1 was at risk for adverse side effects. Care plan

{F 329}	Continued From page 261 dated 3/12/14, indicated R1 was on antidepressants: Trazodone and Effexor related to diagnoses of depression and insomnia. Goal "[R1] will be free from discomfort or adverse reactions related to antidepressant therapy ..." Care plan directed to administer antidepressant medications as ordered by physician, monitor and document side effects and effectiveness. Physician's Orders dated 2/26/14, indicated R1 received the following medication: -Trazodone 100 Milligrams (mg) by mouth at bedtime (HS) for insomnia -Venlafaxine (Effexor) 150 mg by mouth daily for depression - Zolpidem Tartrate 5 mg tablet by mouth at HS as needed for Insomnia "Do not exceed 5 mg dose." Review of the MARs dated 4/28/14, through 5/7/14, revealed R1's side effects monitoring was not be done. In addition review of Blank Flowsheet Report dated 5/5/14, and Behavior Monitoring Documentation dated 3/31/14, through 4/23/14, revealed R1 a sleep log had been initiated but was not being completed as indicated in the plan of correction. When interviewed on 5/7/14, at 1:40 p.m. RN-B stated she was not sure where medication side effects were documentation for anti-depressants and anti-psychotropic but indicated she would find out and get back. She showed the surveyor the "Red 3 ring binder East/West" which the staff were supposed to record the number of hours slept and the behaviors for each resident that had behavior monitoring. When interviewed on 5/7/14, at 1:48 p.m. LPN-E stated "We have not done this for all the residents just a few and currently we are going through as	{F 329}

{F 329}	Continued From page 262 we are auditing the psychotropic and including the side effects." Verified R1's MAR's lacked side effects monitoring as indicated in the plan of correction. When interviewed on 5/7/14, at 3:09 p.m. the consultant pharmacist stated side effects were supposed to be monitored and as this was required by the regulation. CP stated he had just not gotten to review R1's medications and record. CP went through R1's physician orders verified and indicated the medications that needed to be monitored for side effects. CP further stated if a resident sleep/Insomnia medications a sleep log or study needed to be completed and consistently. When interviewed on 5/9/14, at 2:03 p.m. DON stated monitoring of side effects should have been standard for residents who were taking antidepressants and anti-psychotropic. DON further stated currently was working on implementing all the interventions and monitoring and was including the night shift to do some of the monitoring such as the amount of hours slept among others. When interviewed on 5/12/14, at 12:52 p.m. LPN-A stated the nurses were supposed to make sure the documentation was completed and the resident care managers (RCM's) like her were supposed to oversee to make sure the documentation was done consistently. LPN stated there was no documentation on the monitoring of sleep hours after 4/28/14, through 5/5/14, because the forms did not have a place to document the number of hours slept and the facility had to create a new form which started on the 5/5/14, but was still not being completed consistently. The Psychoactive Medication Management policy dated as reviewed 5/2013, indicated the care plan	{F 329}

{F 329}	Continued From page 263 would identify side effects of the use of any psychoactive medications but lacked monitoring of side effects of anti-depressants and sleep study/logs for resident who were taking medication to aide sleep. R113 lacked parameters for as needed pain medication Oxycodone. R113's diagnoses include neuralgia neuritis and radiculitis, abnormal gait, acute alcohol hepatitis, alcohol dependence obtained from the significant MDS dated 2/14/14. Physician's Order dated 4/21/14, indicated resident had three orders for Oxycodone (Narcotic pain medication) 1-3 tablets (5-15 mg) by mouth every four hours as needed (PRN), Oxycodone 0.5-1 tablets (5-10 mg) by mouth daily as needed for dressing changes only and Oxycodone 1 tablet (5 mg) by mouth daily as needed for physical therapy/occupational therapy (PT/OT) only. R113's Medication Administration Record date 4/1/14, through 5/13/14, indicated R113 had received the medication on multiple occasions and all the orders lacked parameters for administering the different Oxycodone orders. R113's pain care plan dated 3/11/14, identified R113 had acute pain related to postoperative discomfort and had toes amputated secondary to burn from frost bite. Care plan directed to administer analgesia including Oxycodone as ordered. Pain Assessment dated 4/25/14, indicated R113 had pain daily and was predictable and the pain	{F 329}

{F 329}	Continued From page 264 did not prevent resident from doing or results in mood or behavior. The assessment indicated the pain was worse and/or breakthrough pain with therapy and dressing change. Summary indicated the pain was from the amputation sites to his both feet toes and was aggravated by therapy and wound care but was relieved by treating with PRN medications prior to treatment and resident reported current pain regime was effective. When interviewed on 5/13/14, agency LPN-G verified when reviewing R113's Medication Administration Record that the orders for Oxycodone did not have parameters for what to give with what pain rate. LPN stated R113 was on LOA but would look in his chart to make sure this was clarified by the provider. When interviewed on 5/13/14, at 9:34 a.m. LPN-E who also was also the resident care manager acknowledged R113 had orders without parameters. LPN-E further stated "We like to clarify and have parameters especially with new admissions. Will call and clarify and ask for parameters thank you." DON was not unavailable to interview on 5/13/14, regarding pain medication parameters. The facility pain management policy was requested on 5/13/14, at 11:30 a.m. but was not provided. R29 had physician orders for PRN morphine (pain medication) with no parameters for use, in addition no pain monitoring was completed.	{F 329}

{F 329}	Continued From page 265 Review of the Admission Record dated 4/28/14, indicated R29 was admitted on 1/15/14, with diagnoses that included chronic pain, diabetic polyneuropathy (nerve damage) and adult failure to thrive. The quarterly MDS dated 4/17/14, indicated R29 had frequent pain rated at a pain level of six. The CAA dated 1/28/14, indicated R29 "has chronic back pain, she gets Neurontin, OxyContin and oxycodone PRN, it has been effective at time". The CAA did not indicate diseases or conditions that may cause the pain, characteristics or frequency of the pain, but indicated it adversely affects mood. During observation on 5/12/14, at 9:10 a.m. R29 was observed to be very thin, awake in a darkened room, in bed and when surveyor asked to enter room, resident stated "no". During observation on 5/12/14, at 2:01 p.m. R29 was in darkened room, in bed sleeping. During observation on 5/13/14, at 850 a.m. R29 was observed lying in bed, dressed in a hospital gown in a darkened room. R29 stated "I am not doing well today, the pain is constant, the meds help for a while, then it starts again". R29 stated she does go to a pain clinic. Review of the physician's order sheet dated 5/9/14 included an order for morphine 30 mg four times daily as needed. Review of the MAR dated 4/1/14 to 5/31/14, revealed R29 received multiple doses of PRN morphine. Review of the pain evaluation and management plan dated 4/17/14, indicated R29 had occasional	{F 329}

{F 329}	Continued From page 266	{F 329}		

pain in back and feet, current pain regimen was effective and nursing would continue to monitor and update MD/NP as needed.

R29's care plan with revision date of 4/12/2014, identified R29 was on pain medication therapy due to foot surgery and chronic back pain. Interventions included: pain assessment per facility policy, administer medication as ordered and to frequently review for pain medication efficacy.

During an interview on 5/12/14 at 3:29 a.m., LPN-E stated that for R29, "some days are good, some days are bad, she is on quite a bit of meds for pain" and that on 5/9/14 R29's primary physician increased some meds, "that may be why she is sleepy". LPN-E stated R29 was not on her caseload, but she would have put short term implementations of pain monitoring in place when there is a change in meds. LPN-E verified that it looks like every three to four hours the morphine is given and that the order should be more specific "like every 4 or 6 hours [hrs]". LPN-E verified there was no pain monitoring being completed, "it must have fallen thru the cracks when we went from paper to the computer".

During an interview on 5/13/14, at 10:58 a.m. LPN-G stated he had not given any morphine yet today and would ask the resident if she has any pain. LPN-G further stated he would expect the order to be more specific such as "every 4 or 6 hrs" in addition to PRN, but would ask the nurse manager for more clarification.

Review of Medication Administration General Guidelines, section 7.1, page 3 of the facility Nursing Care Center Pharmacy Policy &

{F 353}	Continued From page 268	{F 353}		

section, the facility must designate a licensed nurse to serve as a charge nurse on each tour of duty.

This REQUIREMENT is not met as evidenced by:
Based on observation, interview and document review, the facility failed to provide adequate staff to meet the individual needs for safety, supervision and care for 13 of 44 residents reviewed during the revisit (R22, R129, R1, R41, R37, R13, R86, R116, R36, R117, R9, R14, R62). In addition, the facility did not retain the required staff schedule and was not able to provide documentation of staff schedules from 3/18/14 through 4/5/14. This had the potential to affect each of the 67 residents who resided at the facility.

Findings include:

The facility has started using agency staff, licensed nursing and nursing assistants (NA) from Soul Care LLC 1521 Como Ave Southeast Minneapolis, 55414. On 5/6/14, orientation was requested for any agency staff that has worked since the last survey. A review of the orientation files verified that the facility did not ensure staff had background checks, and had received the required tuberculin skin testing (TST).

A review of the facility schedules dated from 4/5/14 through 5/17/14, indicated the facility staffing plan called for on the day shift: two licensed nurses with 13 nursing assistant (NA's); on the evening shift: two licensed nurses with 13 NA's and on the night shift: two licensed nurses with 6 NA's.

hospital that the resident had alcohol and methadone (a drug he had not been prescribed) in his system. The administrator stated the 1:1 staff assigned to R37 should have been able to prevent him from obtaining and consuming alcohol and methadone.

On 5/11/14, at 10:55 a.m. the administrator notified surveyors he had not been notified that R129 was sent to emergency room, at 4:00 a.m., after she had reported to a staff member that she was intoxicated. A blood alcohol level was determined to be .323 (more than three times the legal limit) and R129 was in the intensive care unit, intubated and assisted to breath by a mechanical ventilator. The administrator stated the 1:1 staff assigned to R129 should have been able to prevent her from obtaining and consuming alcohol. After investigation it was noted by contracted licensed social work (CLSW)-A that R1 accelerated away from her 1:1 staff at a high rate of speed in her electric w/c and was able to make an exchange with R117 (a former resident), R1 and R129 were noted to make an exchange later in R129's room, both had 1:1 staff who did not report the exchange, and failed to protect the residents on 1:1 observation.

A special Staffing - One to One Assignment policy dated May 2012 and revised May 2013 included: one to one staffing assignments are in place based on an assessed need until appropriate permanent alternative arrangements can be made reasons may include, but are not limited to: treat of suicide by a resident, altered mentation that may dislodge treatment lines or devices, escalating exit seeking behavior, altered cognition in an agitated state that is not easily redirected., or not respected the boundaries of

{F 353}	Continued From page 273 other residents. The procedure stated "to keep the one to one within arm's reach at all times. (if not suicidal may have visual privacy for toileting). Alternatives to one to one assignment are investigated as timely as possible. (alternative care setting, medical evaluation), family or responsible party are notified to see if they are available to provide this heightened level of supervision. Documentation of the one to one assignment is made in the clinical record; appropriate care plan/review/revision is made during the one to one assignment. IDT [interdisciplinary team] will meet to determine the appropriateness of removing a one to one and under what circumstances it may be reinitiated." The one to one staff, and safety monitor were not effective in preventing residents from obtaining and consuming drugs and alcohol within the facility, the facility lacked an analysis of that staffing failure and lacked additional interventions to safe guard residents. Refer to F224: the facility failed to provide adequate supervision to residents for that had alleged drug and alcohol use for 3 of 11 residents (R37, R129, R117). In addition, the facility failed to provide adequate supervision to residents to prevent elopement from the facility for 1 of 3 residents (R116). In addition, to the resident(s) in IJ, the facility failed to ensure adequate supervision was provided to prevent elopement for 1 of 3 residents (R13). These facility failures resulted in Immediate Jeopardy (IJ) issues at F323 related to the failure of the facility to supervise the residents for the alleged drug and alcohol use and elopement. This had the potential to affect all 67 residents in the facility.	{F 353}

{F 412}	Continued From page 275 This REQUIREMENT is not met as evidenced by: Based on observation, interview and document review, the facility failed to ensure 2 of 2 residents (R9, R36) received assistance to obtain dentures or coordinate dental care services for dental follow up, and to get new dentures when his dentures were missing in the sample reviewed for dental status. Findings include: R36 was observed without dentures during the survey conducted on the following dates and times: - On 3/10/14, from 11:30 a.m. until approximately 8:30 p.m., - On 3/11/14, from 8:00 a.m. until 5:00 p.m.; - On 3/12/14, from 6:45 a.m. until 5:30 p.m.; - On 3/13/14, from 6:45 a.m. until 4:00 p.m.; - On 3/14/14, from 7:00 a.m. to 5:15 p.m. When asked on 3/11/14, at 11:11 a.m. if he had tooth problems, gum problems, mouth sores, or denture problems R36 stated, "I have missing teeth, they are in storage and the guardian won't get them." The Oral Health Plan & Consent Form dated 5/31/12, indicated both R36 and his guarantor had signed the form authorizing Apple Tree to provide routine care including comprehensive and periodic oral evaluations. The Minimum Data Set (MDS) 3.0 Oral/Dental Assessment Form dated 6/11/12, indicated R36 had no natural teeth or tooth fragment(s) (edentulous); maintained oral care independently and R36 had reported he had dentures at home not at the facility.	{F 412}

Dental Progress notes dated 10/9/12, noted R36 had refused to be seen as he did not have his dentures with him and wanted to be rescheduled for next time when he had his dentures with him.

Dental Progress notes dated 10/23/12, indicated R36 did not want to be seen as he did not have his dentures with him and did not want the dentist to look at his gums.

The dental care plan dated 6/14/13, identified R36 had oral/dental health problems (edentulous) related to natural teeth missing. The care plan directed "Conduct oral assessment/evaluation per facility protocol; Coordinate arrangements for dental care, transportation as needed/as ordered and provide mouth care ..."

The Camden Care Center Quarterly Care Conference summary dated 9/17/13, written by nutrition & culinary indicated R36 had upper and lower dentures but stated that they were at home and had reported he was able to chew adequately without dentures and did not want a mechanically textured diet.

R36's quarterly MDS dated 2/18/14, indicated R36's Brief Interview for Mental Status (BIMS) score of 13 out of 15 which noted R36 was cognitively intact. The MDS also indicated R36 received limited assistance of one person with hygiene which included brushing teeth. In addition the MDS was void of any oral concerns.

The Care Conference Summary dietary assessment dated 3/4/14, noted had no teeth or dentures and is able to chew adequately without his teeth and noted weight as stable.

{F 412}	Continued From page 278 could not be found. On 3/14/14, at 12:14 a.m. during a phone interview R36's guarantor indicated R36 did not have dentures and the facility had not asked him to inquire if he was able to locate his old dentures or get fitted new ones. The most recent Care Area Assessment (CAA) was requested but was not provided on 3/18/14, at 10:15 a.m. and the policy for dental was requested but was never provided. The facility plan of correction indicated by 4/28/14, social service and nursing would coordinate getting R36 fitted with dentures and these activities would be clearly documented in the clinical record to include any and all communication with the guardian. Review of R36's record on 5/7/14, at 1:50 p.m. lacked evidence of a dental visit. When interviewed on 5/7/14, at 2:10 p.m. the health unit coordinator (HUC) stated reported she had spoken to R36 and he stated his dentures were in a storage locker and he did not want new ones and stated the information was in the progress notes. The HUC was again interviewed on 5/8/14, at 8:17 a.m. and she stated she was unable to locate any documentation regarding her conversation with R36 regarding his dentures and she verified she had not offered R36 a routine dental exam. At 2:32 p.m. the HUC reported R36 had agreed to a dental visit and would be scheduled for one. When interviewed on 5/13/14, at 2:29 p.m. licensed practical nurse (LPN)-E stated the facility did not have a dental policy and the corporate consultant stated it was on a case by case basis. The facility Medical Services policy dated May	{F 412}

{F 412}	Continued From page 279 2012, indicated the social services director or designee was responsible to arrange dental services to meet the needs of the residents. R9 had a dental exam on 2/27/14, which indicated that more dental treatment was needed, however had not received dental follow up as recommended. The annual MDS dated 10/11/13, did not identify R9 had any dental issues or problems with teeth. The significant MDS dated 3/24/14, indicated R9 had no cognitive impairment and required one person assist of staff with personal hygiene. Review of R9's care plan dated 4/10/12, indicated R9 "has dental needs" and listed interventions of "Resident has natural teeth. Has some missing teeth. Resident will be seen annually or as needed. Nursing to notify dentist of any dental concerns. Resident has been seen by In-House Dental for their dental needs." The careplan indicated R9 had diagnoses that included schizophrenia, diabetes mellitus, and orofacial dyskinesia. Review of In House Senior Services, LLC (limited liability company) Patient Progress Notes dated 2/27/14, outlined a treatment plan that included "Pt [patient] has several retained root tips and a couple fractured crowns. #23 and #25 are quite mobile, but they do not bother pt. These should be extracted when they become symptomatic. #31 and #12 should be restored. #9 should be attempted to be restored, though because gingiva has already grown into the cavity, it may not be successful. Res was cooperative, though has difficult time holding her mouth still, and her tongue is very active."	{F 412}

This REQUIREMENT is not met as evidenced by:
Based on interview and document review, the consultant pharmacist failed to identify lack of medication parameters for as needed (PRN) pain medications for 2 of 7 residents (R91, R36), failed to identify a lack of adequate indication for use, resident specific target behaviors and monitoring for antipsychotic medication for 2 of 7 residents (R37, R89) and failed to identify a lack of side effect monitoring and sleep monitoring for antidepressant medications for 1 of 7 residents (R1) reviewed for unnecessary medications.

Findings include:

R91's Admission Record dated 5/9/14, indicated R91 was admitted on 10/9/13, with a diagnosis of osteoporosis.

Review of the Medication Regimen Reviews (MRR) for R91 from 10/17/13 through 5/7/14, lacked evidence the missing parameters for PRN pain medications were identified.

Review of the Medication Administration Record (MAR) dated 4/1/14 through 4/30/14, revealed R91 did not receive any PRN Tylenol (a mild amalgesic) and Ibuprofen (an anti-inflammatory medication) and received multiple doses of PRN Oxycodone (a narcotic).

Review of the Physician's Order Sheet signed 4/18/14, included orders for Ibuprofen 600 milligrams (mg) every six hours PRN, Tylenol 650 mg every six hours PRN and Oxycodone 15 mg

{F 428}	Continued From page 282 every six hours PRN all for pain. R91 had orders for multiple PRN pain medications which lacked parameters for use. R36's Admission Record dated 4/28/14, indicated R36 was admitted to the facility on 5/26/12, with diagnoses of femur fracture and alcoholic cirrhosis of the liver. Review of the MRR for R36 from 4/22/13 through 5/6/14, lacked evidence the missing parameters for PRN pain medications were identified. Review of the MAR dated 4/1/14 through 4/30/14, revealed R36 received Tylenol three times for pain rated at an eight and Oxycodone two times for pain rated at an eight. The Physician's Order Sheet dated 5/1/14, included orders for Tylenol 1000 mg three times a day (TID) as needed and Oxycodone 10 mg TID, both for pain, and lacked parameters for use. R36 had orders for multiple PRN pain medications which lacked parameters for use. R37's Admission Record dated 1/14/14, indicated R37 was admitted to the facility on 9/19/13. Diagnoses included altered mental status and alcoholism. Review of the MRR for R37 on 11/14/13, indicated R37 was taking Seroquel for psychosis, however lacked direction for target behavior monitoring. Review of the MRRs from 9/25/13-4/18/14, revealed the CP failed to identify the need for a gradual dose reduction or	{F 428}

{F 428}	Continued From page 283 documentation of the clinical contraindication. Physician and Nurse Practitioner (NP) Notes dated 11/15/13, 1/8/14, 1/22/14, 2/5/14, 4/9/14 and 4/10/14, were reviewed and lacked a diagnosis of psychosis or a clinical contraindication to a gradual dose reduction. The Physician's Order Sheet dated 4/1/14, included orders for Seroquel 25 mg every bedtime and indicated the diagnosis was anxiety. A review of three undated Behavior/Intervention Monthly Flow Record, revealed R37 was monitored for number of hours of sleep and "yelling/striking." The records revealed R37 slept between six and eight hours on all nights recorded and yelling/striking behavior did not occur. R37 received Seroquel (an antipsychotic medication) daily without adequate indication for use, monitoring or an attempt at a gradual dose reduction. When interviewed on 5/7/14, at 1:56 p.m. the consultant pharmacist (CP) stated he would expect parameters written by the physician to clarify when to give which PRN pain medication. When interviewed on 5/7/14, at 3:09 p.m. the CP stated side effects were supposed to be monitored as this was required by the regulation. CP further stated all behaviors have to be specific to the resident. A call was placed to the CP on 5/13/14, at 10:01 a.m. to clarify adequate indications for use of antipsychotic medications, no return call was received.	{F 428}

{F 428}	Continued From page 284 The consultant pharmacist did not identify the lack of monitoring for resident specific target behaviors and the lack of orthostatic hypotension side effect monitoring for R89's use of Zyprexa (an antipsychotic medication). R89's admission Minimum Data Set (MDS) dated 12/28/13, indicated R89 was never or rarely understood had short and long-term memory problems and R89 had moderately impaired decision making ability. The MDS identified R89 had hallucinations, delusions, and other behavior concerns towards others. The Care Area Assessment (CAA) for ADL (activities of daily living) function/Rehabilitation Potential dated 1/3/14, identified R89's diagnoses to include altered mental status, cognitive impairment and weakness. The CAA identified R89 required staff assistance for ADLs, had no pain concerns, had a history of falls (but no falls in the facility) and was incontinent of bowel and bladder. The CAA for behaviors dated 1/3/14, indicated, "Resident exhibits behavioral symptoms and is cognitively not alert and orient [sic] when writer attempted to assess her. SS [social services] will care plan this matter accordingly." The CAA for falls, also dated 1/3/14, recapitulated the same information as the ADL CAA. The CAA for psychotropic drug use identified R89 used an antipsychotic and R89 had "hallucinations." Although the CAA identified the class of medication used and hallucinations, the CAA lacked identification of what the hallucinations were, what antipsychotic was used, and what target behaviors would be monitored. The CAA indicated, "Nurses will continue to assess for effectiveness of meds [medications] and side effects." R89's care plan for psychotropic medications	{F 428}

{F 428}	Continued From page 285 dated as revised on 1/5/14, identified R89 used Zyprexa related to "potential injury to self or others, dementia and agitation, pick [sic] disease." The care plan directed to administer the medication as ordered, monitor/document for side effects and effectiveness. The care plan directed to "discuss with MD [physician], family re [regarding] ongoing need for use of medication," directed to educate on risks and benefits of using Zyprexa, "Monitor/record occurrence of for target behavior such as agitation, inappropriate response to verbal communication, and document per facility protocol." The care plan lacked appropriate identification of a target behavior which warranted the use of an antipsychotic, such as hallucinations. Although the care plan directed to monitor for a target behavior, the care plan lacked indications for the ongoing use of Zyprexa. A physician's Progress Note dated 2/12/14, identified R89 was seen for her first visit. The note indicated while in the hospital R89 had been on a high dose of Seroquel and switched to a low dose of Zyprexa. The note indicated R89's Zyprexa would be considered to be increased to 7.5 mg. The Physician's Order Sheet dated 3/5/14, indicated R89 had olanzapine (Zyprexa) 5 mg ordered by mouth daily for diagnosis of atypical psychosis. A Geriatric Services of Minnesota Progress Note dated 3/7/14, indicated R89 was seen by a nurse practitioner. The note identified R89 "appears to be distressed" and was noted to "sit/stand multiple times from wheelchair." The note indicated R89 received 5 mg of Zyprexa daily,	{F 428}

{F 428}	Continued From page 286	{F 428}		

"Staff have no reports of behavior changes, but note impulsivity" and identified R89 fell twice in February. The "Psych:" section indicated R89 was "Agitated w/ [with] worried look on face. Mumbling. Slight diaphoresis [sweating]." Continuation of the note indicated Zyprexa would be increased to 7.5 mg "due to continued agitation/impulsivity." A Physician's Order dated 3/7/14, indicated Zyprexa was increased to 7.5 mg by mouth daily and directed to add the diagnosis of schizophrenia.

Review of the clinical record, including interdisciplinary team (IDT) Progress Notes from admission to the time of survey indicated no behavioral concerns were documented, such as hallucinations, agitation symptoms or impulsivity. R89 had no IDT progress notes documented after 2/14/14. Although appropriate side effect monitoring was noted in the clinical record, such as labs and Abnormal Involuntary Movement Scale (AIMS) on 3/12/14, the clinical record lacked evidence of target behavior monitoring for the efficacy of Zyprexa.

A social service progress note dated 3/26/14, at 3:00 p.m. indicated R89's behaviors were reviewed. "Quarterly Social Service Assessment-Care plan reviewed for changes in mood, behavior, and cognition and updated to reflect Resident's current status. Staff assessment for BIMS [brief interview of mental status, a tool used to measure cognition] and PHQ-9-OV [a tool used to measure potential depression] completed as Resident never or rarely understood questions being asked. Resident has severely impaired cognition r/t [related to] dementia. PHQ-9-OV assessment score of 0 out of 27 indicating no s/sx [signs or symptoms] of depression. Resident

continues to receive Zyprexa 7.5 mg daily for dementia/schizophrenia which seems effective. No adverse reactions noted with use of psych med. Will continue to monitor for side effects and effectiveness. [name or R89's guardian], assists with all business and personal needs. Resident has been assessed and cannot leave the facility on an unsupervised LOA [leave of absence]. Resident and guardian have been invited to the upcoming care conference. Social services to continue to be available and assist in meeting the psychosocial needs of Resident." Although the clinical record lacked evidence of target behavior monitoring, the note identified Zyprexa "seems effective."

The Care Conference Summary dated 4/10/14, indicated R89 was "Stable, no mood concerns at this time" and "reviewed medications." The concerns and/or Complaints section indicated, "As agitation increases family notes that her breathing gets heavy. Dislikes walking by family would like to see her walk more."

The Information and Consent for Psychotropic Medications dated 4/29/14, indicated Zyprexa was administrated for diagnosis of Schizophrenia.

On 5/5/14, at approximately 1:40 p.m. R89 was observed to be lying in bed, eyes closed. R89 did not rouse to knock or surveyor announcement at the door.

Review of the Behavior Monthly Flowsheet for May 2014 indicated R89 was monitored for restlessness and anxiety, but lacked resident specific target behavior monitoring. The monitoring was initiated on 5/5/14. The clinical record lacked evidence resident specific target

{F 428}	Continued From page 288 behavior monitoring was completed for R89. On 5/12/14, at 9:24 a.m. the licensed practical nurse (LPN)-E verified the target behaviors were diagnoses and were not resident specific. LPN-E verified target behavior monitoring was only implemented on 5/5/14. LPN-E stated "the other way of monitoring wasn't working" and stated the form was changed. LPN-E verified R89's target behaviors were not assessed or re-evaluated. LPN-E verified no orthostatic blood pressures were checked on R89 since January. On 5/12/14, at 9:44 a.m. the director of nursing (DON) verified the facility identified target behaviors of agitation and restlessness were not resident specific. DON verified checking the orthostatic blood pressure should have been included in monitoring for side effects of the medication. The Psychoactive Medication Management policy dated as reviewed 5/2013, directed the IDT to identify residents whose behaviors may require the use of psychotropic medications, and identify the diagnosis and/or behavior that are "antecedent" for the psychoactive medication. The policy indicated the goal of the IDT was to assess/monitor the psychoactive drug use and "ensure residents are assessed/evaluated for dose reduction opportunities on an ongoing basis." Although the policy identified potential examples of behaviors which may require monitoring, the policy incorrectly identified diagnoses of "Agitation" and vague terms such as "Aggression" and "Socially inappropriate actions" as "behaviors." The policy lacked clear direction to determine resident specific target behaviors, and lacked clear direction on where to document	{F 428}

{F 428}	Continued From page 289 target behaviors in the facilities clinical record. The policy lacked identification of the frequency of target behavior monitoring and frequency of the evaluation of the data. Consultant Pharmacist Recommendations for dated 4/17/14, identified Olanzapine 7.5 mg daily. The form indicated "also, we need to monitor these behaviors" after a list of potential target behaviors (none were checked). The Modifications as follows section indicated "Behavior monitoring implemented." The form was not signed or dated. The PharMerica Medication Regimen Review form indicated last review was on 5/7/14 and "No New Suggestions" were identified. On 4/17/14, the consultant pharmacist review indicated, "Suggest change Dx [diagnosis] to include supporting behavior patterns & then Monitor." On 5/13/14, at 10:01 a.m. the CP was called and a message left. The consultant pharmacist did not return the call. The consultant pharmacist did not identify monitoring of R1's side effects for Trazodone and Venlafaxine (Effexor-both anti-depressants) and sleep monitoring was lacking. R1's diagnoses included insomnia, chronic pain, arthritis, osteoporosis, depression and diabetes mellitus obtained from the MDS dated 3/4/14. The Mood section of the MDS identified R1 as having symptoms "Feeling down, depressed, or hopeless, trouble falling or staying asleep, or sleeping too much, feeling tired or having little energy, poor appetite or overeating, feeling bad about yourself-or that you are a failure or have let yourself or your family down and thoughts that	{F 428}

{F 428}	Continued From page 290 you would better off dead, or of hurting yourself in some way." The assessment indicated R1 had all the symptoms were nearly every day. The CAA dated 12/10/13, indicated R1 used antidepressants, and sleep aides, and indicated staff would continue to monitor for effectiveness of the antidepressants and sleep aides as well as for side effects. In addition the CAA indicated R1 was at risk for adverse side effects. Care plan dated 3/12/14, indicated R1 was on antidepressants: Trazodone and Effexor related to diagnoses of depression and insomnia. Goal "[R1] will be free from discomfort or adverse reactions related to antidepressant therapy ..." Care plan directed to administer antidepressant medications as ordered by physician, monitor and document side effects and effectiveness. Physician's Orders dated 2/26/14, indicated R1 received the following medication: -Trazodone 100 mg by mouth at bedtime (HS) for insomnia -Venlafaxine (Effexor) 150 mg by mouth daily for depression - Zolpidem Tartrate 5 mg tablet by mouth at HS as needed for Insomnia "Do not exceed 5 mg dose." Review of the Monthly Medication Regimen (MMR) from 3/18/14 forward, revealed the consultant pharmacist had reviewed R1's medications, both were undated and unsigned. The MMR's failed to identify side effects monitoring, and sleep monitoring were lacking, as indicated in the plan of correction dated 4/28/14. Review of the MARs dated 4/28/14, through 5/7/14, revealed R1's side effects monitoring was not be done. In addition review of Blank	{F 428}

{F 428}	Continued From page 291 Flowsheet Report dated 5/5/14, and Behavior Monitoring Documentation dated 3/31/14, through 4/23/14, revealed R1 a sleep log had been initiated but was not being completed as indicated in the plan of correction. When interviewed on 5/7/14, at 1:40 p.m. registered nurse (RN)-B stated she was not sure where medication side effects were documentation for anti-depressants and anti-psychotropic but indicated she would find out and get back. She showed the surveyor the "Red 3 ring binder East/West" which the staff were supposed to record the number of hours slept and the behaviors for each resident that had behavior monitoring. When interviewed on 5/7/14, at 1:48 p.m. LPN-E stated "We have not done this for all the residents just a few and currently we are going through as we are auditing the psychotropic and including the side effects." Verified R1's MAR's lacked side effects monitoring as indicated in the plan of correction. When interviewed on 5/7/14, at 3:09 p.m. the consultant pharmacist stated side effects were supposed to be monitored and as this was required by the regulation. CP stated he had just not gotten to review R1's medications and record. CP went through R1's physician orders verified and indicated the medications that needed to be monitored for side effects. CP further stated if a resident sleep/Insomnia medications a sleep log or study needed to be completed and consistently. When interviewed on 5/9/14, at 2:03 p.m. DON stated monitoring of side effects should have been standard for residents who were taking antidepressants and anti-psychotropic. DON further stated currently was working on	{F 428}

{F 428}	Continued From page 292 implementing all the interventions and monitoring and was including the night shift to do some of the monitoring such as the amount of hours slept among others. When interviewed on 5/12/14, at 12:52 p.m. LPN-A stated the nurses were supposed to make sure the documentation was completed and the resident care managers (RCM's) like her were supposed to oversee to make sure the documentation was done consistently. LPN stated there was no documentation on the monitoring of sleep hours after 4/28/14, through 5/5/14, because the forms did not have a place to document the number of hours slept and the facility had to create a new form which started on the 5/5/14, but was still not being completed consistently. R113 CP failed to identify lack of parameters for as needed pain medication. Physician order dated 4/21/14, indicated resident had three orders for Oxycodone (Narcotic pain medication) 1-3 tablets (5-15mg) by mouth every four PRN, Oxycodone 0.5-1 tablets (5-10 mg) by mouth daily as needed for dressing changes only and Oxycodone 1 tablet (5 mg) by mouth daily as needed for physical therapy/occupational therapy (PT/OT) only. When interviewed on 5/13/14, agency LPN-G verified when reviewing R113's Medication Administration Record that the orders for Oxycodone did not have parameters for what to give with what pain rate. LPN stated R113 was on LOA but would look in his chart to make sure this was clarified by the provider.	{F 428}

{F 428}	Continued From page 293 When interviewed on 5/13/14, at 9:34 a.m. LPN-E who also was also the resident care manager acknowledged R113 had orders without parameters. LPN-E further stated "We like to clarify and have parameters especially with new admissions. Will call and clarify and ask for parameters thank you." R113's diagnoses include neuralgia neuritis and radiculitis, abnormal gait, acute alcohol hepatitis, alcohol dependence obtained from the significant MDS dated 2/14/14. R113's Medication Administration Record date 4/1/14, through 5/13/14, indicated R113 had received the medication on multiple occasions and all the orders lacked parameters for administering the different Oxycodone orders. The PharMerica Medication Regimen Review completed by the CP monthly dated 4/18/14, and two other times after which were signed but undated did not identify R113's physician orders lacked the parameters. R113's pain care plan dated 3/11/14, identified R113 had acute pain related to postoperative discomfort and had toes amputated secondary to burn from frost bite. Care plan directed to administer analgesia including Oxycodone as ordered. On 5/7/14, at 1:56 p.m. CP stated he would expect parameters written by the physician to clarify when to give which medication.	{F 428}

{F 431}	Continued From page 299 R66's MDS dated 3/25/14, indicated R66 was cognitively intact. The MDS did not indicate R66 was a diabetic. However, the MDS did indicate R66 received insulin injections in the past seven days. According to the drug package insert by Dispensing Solutions, Inc. last revised: 9/20/11, "Once you take your SoloStar® out of cool storage, for use or as a spare, you can use it for up to 28 days. During this time it can be safely kept at room temperature up to 86°F (30°C). Do not use it after this time. SoloStar® in use must not be stored in a refrigerator. Do not use SoloStar® after the expiration date printed on the label of the pen or on the carton. " RN-B verified the findings at the time of the observation and stated the medications should have open dates. RN-B verified the expired medication was used "today." The second drawer of the south treatment cart was observed to have a buildup of potential pulverized medication debris in the corners of the drawer. The third drawer was observed to contain a plastic bin containing various tubes of topical medications for different residents. Some tubes were observed to be stored in zip lock bags with labels. All topical medication tubes in the bin had been used. Topical medications in the bin not in zip lock bags were observed to be in contact with each other. The topical medications not stored separately included a tube of unlabeled Dimethicone Skin no label (barrier ointment). R22's tube of Capsaicin 0.25% Cream (used to	{F 431}

observation. LPN-F was unclear on medication cart cleaning and stated she, does "not have time to get her medication pass done" due to it being "too heavy." LPN-F explained she had too many other responsibilities such as taking blood sugars, administering insulin verified she did not clean the medication cart. Although LPN-F stated she worked for the agency, LPN-F stated she usually worked on the North Medication cart and had worked in the facility for several weeks.

EAST MEDICATION CART
At 9:39 a.m. the second drawer was observed to have two white half tablets loose in the bottom of the drawer.

On 5/7/14, at 11:45 a.m. LPN-E verified she was in charge of the North Unit and stated the medication carts were "a mess" and stated she believed all the carts were newer and cleaned by "the pharmacy" last week. LPN-E was unclear on the cleaning schedule of the medication carts. LPN-E stated before there was trained medication aide (TMA) responsible for the cart and a nurse responsible for the treatment cart. Explained there were "fifteen different hands" in each cart and they were not being kept clean.
-At 12:00 p.m. LPN-E observed the medication carts with surveyor and verified the findings. LPN-E stated it was a new medication cart. LPN-C was present at the time of the observation and stated the medication cart was "not new." LPN-E verified eye drops, Advair Diskus inhalers, and insulin required open dates.

On 5/7/14, at 1:26 p.m. LPN-A verified she was in charge of the West and East units. LPN-A stated she had not completed any cleaning audits for the medication carts and did not know if audits were

completed. LPN-A stated she did not know the audit or cleaning schedules for the carts. LPN-A was unclear what the facility system was to ensure the medication carts were kept clean. LPN-A further stated she was unclear who was responsible for cleaning the medication carts and was unclear on the policy for medication cart cleaning.

On 5/8/14, at 4:21 p.m. the consulting administrator stated the facility did not have a policy or a procedure for medication cart cleaning and verified the carts should have been cleaned. The consulting administrator stated the facility was "not allowed to write policies," but could write a "procedure."

A PharMerica 3.7 Medications and Medication Labels policy dated 9/2010, directed multi-dose vials "shall be labeled to assure product integrity, considering the manufacturers' specifications. (Example: Modified expiration dates upon opening the multi-dose vial.)" The policy further identified all medications should have a pharmacy affixed label.

The PharMerica 4.1 Storage of Medication policy dated 9/2010, directed to store eye, internally administered, oral inhalation, nasal, oral and topical medications separately.

Medications carts were left unlock and un-supervised.
South Hallway Medication cart
On 5/5/14, at 1:39 p.m. observed the key lock to the nursing medication cart to be fully extended in the unlocked position on the South unit. Two residents were observed to wheel by the cart and no staff was in the hallway. RN-B, was observed

{F 465}	Continued From page 307 by: Based on observation, interview and document review, the facility failed to ensure resident room carpets for 3 of 3 residents (R22, R56, R33) and an E-Z stand (a mechanical stand used for transfers) were kept in good repair, clean and in a sanitary manner. Findings include: A tour of the facility was conducted on 5/9/14, at 8:59 a.m. through 10:05 a.m. with the director of facility operations (DFO) and the following concerns were identified: Carpets: On 5/9/14, R22's portion of the room was observed. The carpet had large dark brown stain/spots from the bed to the dresser. DFO verified the carpet was not clean and stated, "I think it is filthy and trashed." R22's annual Minimum Data Set (MDS) dated 4/10/14, indicated R22 had moderate impaired cognition, required assist of one staff with walking in the room and transfer needs. R22 used both the walker and wheelchair (w/c) for mobility in his room. On 5/7/14, at 7:59 a.m. R22's carpet was observed to have dark brown spots/stain on the carpet around the bed area and to the entrance of the room. On 5/9/14, at 9:34 a.m. DFO verified R22's carpet was not clean stated "Again this is one of the rooms that I would like to have a deep cleaning and was hoping the cleaning of the carpet would have been done after pest control was here yesterday."	{F 465}

{F 465}	Continued From page 308	{F 465}		

R56 was bedfast in the room. When R56's room was observed on 5/9/14, at 8:59 a.m. the carpet had several dark, black ground-in spots and stained red around the bed.

R56's annual MDS dated 2/25/14, indicated R56 required extensive to total assistance with activities of daily living (ADLs) including transfers, was bed bound, used a w/c for mobility and had intact cognition.

On 5/9/14, at 9:30 a.m. DFO verified the carpet in R56's room was not clean and stated, "It needs to be deep cleaned."

R33
On 5/6/14, at 9:00 a.m. surveyor noticed a strong malodorous urine smell coming out of R33's room and the carpet observed to have dark brown large stain/spots from the bed to the radiator and on the area between the foot of bed and dresser (walk area). During observation a housekeeping staff was observed standing outside R33's room but was cleaning the next room.

On 5/9/14, at 9:38 a.m. DFO verified the smell stated, "It's very strong and this is another room that needs to have the carpet cleaned or replaced." DFO stated, "We were supposed to get the air freshener's from Ameri-Pride today but they were supposed to be delivered on Friday." DFO further stated the carpet cleaning company had been to the facility recently and cleaned the common areas. The DFO knew the contract was expired and directed questions to the administrator.

{F 465}	Continued From page 309 R33's quarterly MDS 2/20/14, indicated intact cognition, required limited assistance with ADLs, had impairment to both lower extremities and used a walker and w/c for mobility. R33's also received a diuretic. Mechanical lift: E-Z stand handle did not have a cleanable surface. On 5/9/14, at 9:05 a.m. the E-Z stand was observed stored on the alcove on the West Hall and the left bar was observed to have vinyl peeling off exposing the foam underneath. The cracked vinyl was covered with gray duct tape and at the end the tape was exposing the sticky side of the tape making it not a cleanable surface. When interviewed on 5/9/14, at 9:07 a.m. DFO verified stated, "I was told by the vice president to put the duct tape over for now and I have a bid for cushions and guard and am waiting." When interviewed on 5/9/14, at 8:38 a.m. the administrator stated there is a carpet cleaning plan with a contractor who would be coming in to clean a couple rooms at a time. Administrator further stated, "We are going to order replacement parts for the E-Z stand, we had been told that the duct tape was sufficient." Review of the w/c cleaning schedule for Maintenance dated May 2014 indicated R36's w/c had not been cleaned. The Wheelchairs To Pull For Night Washing sheets dated 5/1/14, through 5/9/14, also indicated R36's w/c had not been cleaned.	{F 465}

{F 469}	Continued From page 312 pests including ants and indicated four rooms on the south hall were treated as well as the exterior of the south wing. A policy regarding pest control was requested and the director of facility operations stated the facility did not have a policy.	{F 469}		
{F 490} SS=F	483.75 EFFECTIVE ADMINISTRATION/RESIDENT WELL-BEING A facility must be administered in a manner that enables it to use its resources effectively and efficiently to attain or maintain the highest practicable physical, mental, and psychosocial well-being of each resident. This REQUIREMENT is not met as evidenced by: An immediate jeopardy related to administrative failures was identified during the revisit survey on 5/12/14. The immediate jeopardy began on 5/10/14 and was removed on 5/21/14. However, non-compliance remained at the lower severity level of F (wide spread with no actual harm). Based on observation, interview and document review, the administrator failed to provide adequate supervision and oversight for residents who had known drug and alcohol (ETOH) use for 2 of 11 residents (R37, R129). In addition, the administrator failed to provide adequate supervision to residents to prevent elopement from the facility for 1 of 3 residents (R116). These administrative failures resulted in Immediate Jeopardy (IJ) issues being identified at F490. In addition to the IJ issues, the facility was not administered in a manner to maintain compliance	{F 490}

{F 490}	Continued From page 313 with other regulations specific to meet the needs of residents for 15 of 40 residents (R34, R129, R37, R116, R41, R70, R13, R117, R62, R56, R123, R22, R1, R36, R9) reviewed for various deficient practices; 3 of 5 employees (E1, E2, E3) reviewed whose annual evaluations were not completed; 1 of 5 nursing assistants (NA-Z) did not meet the required inservice hours; 5 of 11 employees (RN-C, RN-D, LPN-A, NA-U, NA-Q) did not have current license verification. These administrative failures had the potential to affect all residents of the facility. The following deficiency was cited during a revisit conducted on 5/13/14, and was the basis for an IJ to resident's health and safety. The IJ began on 5/10/14, when R37 was admitted to the hospital for acute alcohol intoxication requiring medical treatment including intubation to assist with breathing. The administrator, consulting administrator, and director of nursing (DON) were notified of the IJ on 5/12/14, at 3:15 p.m. The IJ was not removed by exit of the 5/13/14 survey. Findings include: On 5/9/14, the facility had been informed of serious and immediate safety and supervision issues related to a lack of adequate supervision for residents, specifically related to resident's with known drug and alcohol use issues, and elopements. The facility had been informed these issues constituted an immediate jeopardy situation. Although, the facility was aware of the serious implications on 5/9/14, the facility did not identify and implement interventions to protect	{F 490}

residents from potential harm. On 5/10/14 and 5/11/14, two residents were hospitalized for drug and/or alcohol intoxication. In addition, on 5/11/14, a vulnerable resident was able to elope from the facility on three separate occasions without staff present even though the facility had implemented a WanderGuard device.

Refer to F223: the facility failed to ensure 1 of 1 resident (R34) was free from verbal and physical abuse.

Refer to F224: the facility neglected to provide adequate supervision to residents who had a known history of drug and alcohol use resulting in medical treatment, including hospitalization, for 2 of 11 residents (R37, R129) reviewed. In addition, the facility failed to implement adequate interventions to prevent elopements for 1 of 3 residents (R116) who eloped from the facility with a WanderGuard (a system to alert staff when a resident leaves the facility) in place. This lack of supervision caused an IJ situation for R37, R129 and R116.

Refer to F225: the facility failed to ensure incidents of potential abuse, neglect and mistreatment were immediately reported to the administrator and State agency (SA) for 7 of 7 residents (R129, R37, R116, R41, R10, R70, and R13).

Refer to F226: the facility failed to ensure the facility reported allegations of potential abuse/neglect immediately to the administrator and State agency (SA) and to thoroughly investigate potential situations of abuse/neglect/elopement for 4 of 5 residents (R37, R129, R13, and R116); the facility failed to

{F 490}	Continued From page 317 to affect all 67 residents in the facility. A letter was provided to surveyors on 5/19/14 by an employee who wished to remain anonymous. The letter indicated that as of that date, the President and CEO of Videll Healthcare was informing employees that their healthcare benefits had ended on March 17, 2014. The letter stated that the LLC (limited liability company) would make an accounting of the monies deducted from individual checks and put together a plan to return the money as soon as possible. The letter encouraged staff to go the the healthcare.gov/marketplace to register for insurance. The letter further stated Videll continues to work with the insurer to put an alternative solution together. This letter had also been posted at the employee time clock. The IJ that began on 5/10/14, was removed on 5/21/14, when the facility had implemented an IJ removal plan which included the development and/or revision of policies related to obtaining a drug and alcohol free facility and policies related to prevention of elopements. The facility initiated assessments for reisdents who had been identified at risk for drug/alcohol issues and elopements; The facility also developed a system for investigation of ongoing incidents; Staff were educated to their responsibilities for how to supervise, care for and protect residents; Direct care staff and licensed nursing staff were interviewed and were able to explain their responsibilities for identification of residents who were elopement risk. Administration convened an interdisciplinary team meeting to discuss and determine how to effectively monitor resident safety and care needs, and how to prevent any future occurrence of such serious and immediate	{F 490}

{F 492}	Continued From page 320 verified the above-named supplemental staff are employed by Soul Care and that the same staff had been reporting for work at the facility. He further verified all of the findings pertaining to TB screening dates and procedures for the employees named. On 5/13/24, 10:27 a.m. LPN-A, nurse manager, stated the staffing agency would provide to the facility the TB screening records of staff coming to work. LPN-A stated that it was human resources (HR's) responsibility to keep track of the records and to keep the files for the facility. On 5/13/14, at 10:55 a.m., the consultant administrator verified the list of supplemental staff provided to surveyors was current, and the staff had been working at the facility. The consultant administrator stated that supplemental staff was not treated any differently from regular facility staff with regard to TB screening. She stated Soul Care provided the TB screening records of supplemental staff, and if staff were found positive for the TST results, they should have been required to undergo assessments for current TB symptoms, should have had CXR and physician's visit indicating employees were clear from tuberculosis. The consultant administrator stated HR was responsible to keep track of pool staff records and to report to the director of nursing and the administrator if issues were identified. The Clinical and Operations Manual dated 5/2012, directed the facility to administer a 2-step PPD (purified protein derivative used to do a TST) to all employees and that documented copies were to be kept in the employees' file records.	{F 492}

These had the potential to affect all 67 residents residing in the facility. Refer to F500: the facility failed to have contracted social services available on 5/5/14, 5/6/14, and 5/7/14, because they had not paid the bill to the agency. Refer to F520: the facility did not ensure the quality committee met as required, and did not identify quality concerns, and did not develop/implement policies and systems to ensure quality of life and quality of care for 13 of 67 (R34, R37, R129, R116, R41, R10, R70, R13, R117, R62, R9, R56, R123) residents residing in the facility and 3 of 5 employees (E1,E2,E3) reviewed during the initial survey and 5 of 11 employees RN-C, RN-D, LPN-A, NA-U, NA-Q) reviewed during the revisit. This had the potential to affect all 67 residents in the facility. The facility failed to pay vendors in a timely manner: On 5/8/14, at 2:00 p.m. the health unit coordinator (HUC) and licensed practical nurse (LPN)-E stated that the contracted social workers were not onsite yet that week at Camden Videll Health Care, because the bill had not been paid. The administrator stated the social work agency was Circle of Life Aging Services. On 5/12/14, 1:18 p.m. Circle of Life, Aging	{F 493}

{F 493}	Continued From page 326 Services (contracted social service) an interview with owner who stated, "I get paid every two weeks, two out of three invoices have been paid, and one invoice was paid late. I have a 3rd day clause in my contact; the facility gets 30 days after 3rd day. I received one payment four days late. The first invoice dated April 4th, and they paid on May 8th, and the second invoice dated April 17th, which they paid that one on time. They paid those two invoices and one outstanding invoice $9,048, not due yet. The owner stated "the reason you did not see social workers at the facility last week was because they did not pay their invoice on Monday, May 5th, Tuesday, May 6th, and Wednesday, May 7th. The facility had social workers scheduled, but due to not paying their bill, the social workers were not provided." For a few days getting ready for your return increased amount of social workers to facility to three FTE's [full time equivalents] three social worker's in a day for a few days, but otherwise approved for two FTE. I have three covering for two FTE equivalents, two were part time and job share. And approval has been given for some overtime to be utilized. The contract is open ended to have social workers here, contract states to have a two week notice when wanting to end services. Going forward would have to check with Videll Health Care corporate executive vice president [EVP]; I would assume they would continue with two full time equivalents." A letter provided to surveyors on 5/19/14 identified that as of that date, the President and CEO of Videll Healthcare sent a letter to the employees that their healthcare benefits had ended on March 17, 2014. The letter stated that the LLC (limited liability company) would make an accounting of the monies deducted from	{F 493}

licensed practical nurse (LPN)-A, NA-U, NA-Q) reviewed during the revisit. This had the potential to affect all 67 residents in the facility.

Findings include:

Refer to F223: the facility failed to ensure one of one resident (R34) was free of abuse.

Refer to F224: an Immediate Jeopardy (IJ) was identified at F224 for neglect of care for R37 and R129, when residents were able to access drugs and alcohol and required hospitalization after the Immediate Jeopardy at F323 had been identified on 5/9/14.

Refer to F225: the facility failed to ensure incidents of potential abuse, neglect and mistreatment were immediately reported to the administrator and State agency (SA) for 7 of 7 residents (R129, R37, R116, R41, R10, R70, and R13).

Refer to F226: the facility failed to ensure the facility reported allegations of potential abuse/neglect immediately to the administrator and State agency (SA) and to thoroughly investigate potential situations of abuse/neglect/elopement for 4 of 5 residents (R37, R129, R13, and R116); the facility failed to screen new employees for reference checks, back ground studies and license/certification verification for 5 of 5 newly hired employees (RN-C, RN-D, LPN-A, NA-U, NA-Q).

Refer to F250: the facility failed to aggressively identify, assess, determine interventions and implement the interventions for medically-related social services, and pursue the provision of these

Ms. Catherine Scoville, Administrator
Camden Care Center
512 49th Avenue North
Minneapolis, MN 55430

Dear Ms. Scoville:

SUBJECT: NOTICE OF IMMEDIATE IMPOSITION OF REMEDIES
Cycle Start Date: March 18, 2014

SURVEY RESULTS
On March 11, 2014, a Life Safety Code survey and on March 18, 2014, a health survey were completed at Camden Care Center by the Minnesota Department of Health (MDH) to determine if your facility was in compliance with the Federal requirements for nursing homes participating in the Medicare and Medicaid programs. These surveys revealed that your facility was not in substantial compliance and found the most serious deficiencies to place the health and safety of your residents in immediate jeopardy. These deficiencies were cited as follows, including the level of scope and severity (S/S):

- F223 -- S/S: J -- 483.13(b), 483.13(c)(1)(i) -- Free From Abuse/involuntary Seclusion
- F323 -- S/S: K -- 483.25(h) -- Free Of Accident Hazards/supervision/devices

In addition, the following cited deficiencies constitute substandard quality of care, and an extended survey was performed:

- F223 -- S/S: J -- 483.13(b), 483.13(c)(1)(i) -- Free From Abuse/involuntary Seclusion;
- F226 -- S/S: F -- 483.13(c) -- Develop/implment Abuse/neglect, Etc Policies;
- F323 -- S/S: K -- 483.25(h) -- Free Of Accident Hazards/supervision/devices

Surveyors found a situation of immediate jeopardy to resident health and safety that was removed on March 18, 2014. However, they also found that your facility continued to not be in substantial compliance with Federal requirements as a result of uncorrected deficiencies. These deficiencies are as follows:

- F155 -- S/S: D -- 483.10(b)(4) -- Right To Refuse; Formulate Advance Directives
- F157 -- S/S: D -- 483.10(b)(11) -- Notify Of Changes (injury/decline/room, Etc)
- F174 -- S/S: D -- 483.10(k),(l) -- Right To Telephone Access With Privacy
- F176 -- S/S: D -- 483.10(n) -- Resident Self-Administer Drugs If Deemed Safe
- F204 -- S/S: D -- 483.12(a)(7) -- Preparation For Safe/orderly Transfer/dischrg
- F221 -- S/S: D -- 483.13(a) -- Right To Be Free From Physical Restraints
- F225 -- S/S: E -- 483.13(c)(1)(ii)-(iii), (c)(2) - (4) -- Investigate/report Allegations/individuals
- F226 -- S/S: F -- 483.13(c) -- Develop/implment Abuse/neglect, Etc Policies
- F241 -- S/S: D -- 483.15(a) -- Dignity And Respect Of Individuality
- F247 -- S/S: E -- 483.15(e)(2) -- Right To Notice Before Room/roommate Change
- F250 -- S/S: E -- 483.15(g)(1) -- Provision Of Medically Related Social Service
- F253 -- S/S: E -- 483.15(h)(2) -- Housekeeping & Maintenance Services
- F257 -- S/S: D -- 483.15(h)(6) -- Comfortable & Safe Temperature Levels

- F258 -- S/S: D -- 483.15(h)(7) -- Maintenance Of Comfortable Sound Levels
- F272 -- S/S: D -- 483.20(b)(1) -- Comprehensive Assessments
- F275 -- S/S: D -- 483.20(b)(2)(iii) -- Comprehensive Assess At Least Every 12 Months
- F279 -- S/S: E -- 483.20(d), 483.20(k)(1) -- Develop Comprehensive Care Plans
- F280 -- S/S: D -- 483.20(d)(3), 483.10(k)(2) -- Right To Participate Planning Care-Revise Cp
- F282 -- S/S: D -- 483.20(k)(3)(ii) -- Services By Qualified Persons/per Care Plan
- F283 -- S/S: E -- 483.20(l)(1)&(2) -- Anticipate Discharge: Recap Stay/final Status
- F309 -- S/S: D -- 483.25 -- Provide Care/services For Highest Well Being
- F312 -- S/S: D -- 483.25(a)(3) -- Adl Care Provided For Dependent Residents
- F314 -- S/S: G -- 483.25(c) -- Treatment/svcs To Prevent/heal Pressure Sores
- F319 -- S/S: D -- 483.25(f)(1) -- Tx/svc For Mental/psychosocial Difficulties
- F328 -- S/S: D -- 483.25(k) -- Treatment/care For Special Needs
- F329 -- S/S: E -- 483.25(l) -- Drug Regimen Is Free From Unnecessary Drugs
- F353 -- S/S: E -- 483.30(a) -- Sufficient 24-Hr Nursing Staff Per Care Plans
- F385 -- S/S: E -- 483.40(a) -- Residents' Care Supervised By A Physician
- F386 -- S/S: E -- 483.40(b) -- Physician Visits - Review Care/notes/orders
- F387 -- S/S: E -- 483.40(c)(1)-(2) -- Frequency & Timeliness Of Physician Visit
- F412 -- S/S: D -- 483.55(b) -- Routine/emergency Dental Services In Nfs
- F425 -- S/S: D -- 483.60(a),(b) -- Pharmaceutical Svc - Accurate Procedures, Rph
- F428 -- S/S: E -- 483.60(c) -- Drug Regimen Review, Report Irregular, Act On
- F431 -- S/S: F -- 483.60(b), (d), (e) -- Drug Records, Label/store Drugs & Biologicals
- F441 -- S/S: D -- 483.65 -- Infection Control, Prevent Spread, Linens
- F465 -- S/S: E -- 483.70(h) -- Safe/functional/sanitary/comfortable Environ
- F490 -- S/S: F -- 483.75 -- Effective Administration/resident Well-Being
- F493 -- S/S: F -- 483.75(d)(1)-(2) -- Governing Body-Facility Policies/appoint Admn
- F497 -- S/S: E -- 483.75(e)(8) -- Nurse Aide Perform Review-12 Hr/yr Inservice
- F500 -- S/S: F -- 483.75(h) -- Outside Professional Resources-Arrange/agrmnt
- F501 -- S/S: F -- 483.75(i) -- Responsibilities Of Medical Director
- F514 -- S/S: F -- 483.75(l)(1) -- Res Records-Complete/accurate/accessible
- F520 -- S/S: F -- 483.75(o)(1) -- QAA Committee-Members/meet Quarterly/plans

The State advised you of the deficiencies noted above and provided you with a copy of the survey reports (CMS-2567).

SUMMARY OF ENFORCEMENT REMEDIES
As a result of the survey findings, and as authorized by the Centers for Medicare & Medicaid Services (CMS), the MDH notified you on April 4, 2014, of the imposition of the following remedies, as well as your appeal rights:

- State Monitoring effective April 13, 2014

The State survey agency notified you they were recommending that the CMS impose additional remedies. We concur with the State's recommendation and are imposing the following remedies:

- Discretionary Denial of Payment for New Medicare and Medicaid Admissions effective April 29, 2014
- See Civil Money Penalty below

The authority for the imposition of remedies is contained in subsections 1819(h) and 1919(h) of the Social Security Act ("Act") and Federal regulations at 42 CFR Subpart F, Enforcement of Compliance for Long-Term Care Facilities with Deficiencies.

DENIAL OF PAYMENT FOR NEW ADMISSIONS
Denial of payment for all new Medicare admissions is imposed effective April 29, 2014. This action is taken pursuant to Section 1819(h)(2)(B) of the Social Security Act. We are notifying the National Government Services that the denial of payment for all new Medicare admissions is effective on April 29, 2014. We are further notifying the State Medicaid agency that they must also deny payment for all new Medicaid admissions effective April 29, 2014 pursuant to Section 1919(h)(2)(A) of the Social Security Act and Federal regulations at 42 CFR Section

488.417(a).

You should notify all Medicare and Medicaid residents admitted on or after this date of the restriction. The remedy must remain in effect until your facility has been determined to be in substantial compliance or your provider agreement is terminated. Please note that the denial of payment for new Medicare admissions includes Medicare beneficiaries enrolled in managed care plans. It is your obligation to inform Medicare managed care plans contracting with your facility of this denial of payment for new admissions.

TERMINATION
If your facility has not attained substantial compliance by August 18, 2014, your Medicare and Medicaid participation will be terminated effective with that date. This action is mandated by the Act at Sections 1819(h)(2)(C) and 1919(h)(3)(D) and Federal regulations at 42 CFR Sections 488.412 and 488.456.

We are required to provide the general public with notice of an impending termination and will publish a notice in a local newspaper prior to the effective date of termination. If termination goes into effect, you may take steps to come into compliance with the Federal requirements for long term care facilities and reapply to establish your facility's eligibility to participate as a provider of services under Title XVIII of the Social Security Act. Should you seek re-entry into the Medicare program, the Federal regulation at 42 CFR Section 489.57 will apply.

CIVIL MONEY PENALTY
The State Agency recommended the imposition of a CMP. We concur that a CMP is warranted. Thus, we are imposing the following CMP:

- Federal Civil Money Penalty of $6,300.00 per day for nine (9) days beginning March 9, 2014 and continuing through March 17, 2014 for a total of $56,700.00
- Federal Civil Money Penalty of $250.00 per day beginning March 18, 2014

The CMP continues to accrue at the amount of $250.00 until you have made the necessary corrections to achieve substantial compliance with the participation requirements, or your provider agreement is terminated. However, the amount of the CMP may be increased or decreased if we find that the noncompliance changes.

If you believe that you have documented evidence that should be considered in establishing the amount of the CMP, the following documents should be submitted to this office within fifteen (15) days from the receipt of this notice:

- Written, dated request specifying the reason financial hardship is alleged
- List of the supporting documents submitted
- Current balance sheet
- Current income statements
- Current cash flow statements
- Most recent full year audited financial statements prepared by an independent accounting firm, including footnotes
- Most recent full year audited financial statements of the home office and/or related entities, prepared by an independent accounting firm, including footnotes
- Disclosure of expenses and amounts paid/accrued to the home office and/or related entities
- Schedule showing amounts due to/from related companies or individuals included in the balance sheets. The schedule should list the names of related organizations or persons and indicate where the amounts appear on the balance sheet (e.g., Accounts Receivable, Notes Receivable, etc.)
- If the nursing home requests an extended payment schedule of more than twelve (12) months duration, the provider must submit a letter from a financial institution denying the provider’s loan request for the amount of the CMP

The CMP is due and payable and may be placed in escrow account fifteen days after one of the following, whichever occurs first:
- The date on which an Independent IDR process is completed, if applicable or
- The date which is 90 calendar days after the date of the notice of imposition of the civil money penalty.

CMP REDUCED IF HEARING WAIVED

If you waive your right to a hearing, in writing, within 60 calendar days from receipt of this notice, the amount of your CMP will be reduced by thirty-five percent (35%). To receive this reduction, the written waiver should be sent to the Centers for Medicare & Medicaid Services, Division of Survey and Certification, 233 North Michigan Avenue, Suite 600, Chicago, Illinois 60601-5519. The failure to request a hearing within 60 calendar days from your receipt of this notice does not constitute a waiver of your right to a hearing for purposes of the 35% reduction.

Any subsequent survey that results in a finding of continued noncompliance may affect the CMP. If, based on the new finding, the previously imposed CMP amount is continued or the CMP amount is changed, and you choose not to accept the new finding, it will be necessary for you to submit an additional request for a hearing on the subsequent survey finding. Alternatively, you may submit a written waiver of your right to a hearing on the subsequent survey finding.

A CMP case number will be assigned to your case only when the final CMP is due and payable. At that time you will receive a notice from this office with the CMP case number and payment instructions. Prior to the assignment of a CMP case number, you must ensure that your facility's name, CMS Certification Number (CCN), and the enforcement cycle start date appear on any correspondence pertaining to this CMP.

- Your CMS Certification Number (CCN) is 245544.
- The start date for this cycle is March 18, 2014.

NURSE AIDE TRAINING PROHIBITION

Federal law, as specified in the Social Security Act at §1819(f)(2)(B) and §1919(f)(2)(B), prohibits approval of nurse aide training and competency evaluation programs and nurse aide competency evaluation programs offered by, or in, a facility which, within the previous two years, has operated under a §1819(b)(4)(C)(ii)(II) or §1919(b)(4)(C)(ii) waiver (i.e., waiver of full-time registered professional nurse); has been subject to an extended or partial extended survey as a result of a finding of substandard quality of care; has been assessed a total civil money penalty of not less than $5,000; has been subject to a denial of payment, the appointment of a temporary manager or termination; or, in the case of an emergency, has been closed and/or had its residents transferred to other facilities.

Because the facility was subject to an extended survey, this provision is applicable to your facility. Therefore, Camden Care Center is prohibited from offering or conducting a Nurse Aide Training and/or Competency Evaluation Program (NATCEP) for two years from March 18, 2014. You will receive further information regarding this from the State agency. Further, this prohibition remains in effect for the specified period even though selected remedies may be rescinded at a later date if your facility attains substantial compliance. However, under Public Law 105-15, you may contact the State agency and request a waiver of this prohibition if certain criteria are met.

APPEAL RIGHTS

The State survey agency previously advised of your right to appeal the noncompliance that resulted in the finding of SQC which resulted in the loss of NATCEP approval. Please refer to that notice and note the deadline for that appeal. As of this date, we have not received a request for a hearing.

This formal notice imposed:

- Federal Civil Money Penalty effective March 9, 2014

If you disagree with the findings of noncompliance which resulted in this imposition, you or your legal representative may request a hearing before an administrative law judge of the Department of Health and Human Services, Departmental Appeals Board (DAB). Procedures governing this process are set out in Federal regulations at 42 CFR Section 498.40, et. seq. A written request for a hearing must be filed no later than 60 days from the date of receipt of this notice. Such a request should be made to:

Department of Health and Human Services
Departmental Appeals Board, MS 6132

Civil Remedies Division
Attention: Karen R. Robinson, Director
330 Independence Avenue, SW
Cohen Building, Room G-644
Washington, D.C. 20201

It is important that you send a copy of your request to our Chicago office to the attention of Jan Suzuki. Failure to do so could result in our office proceeding with collection of the CMP.

A request for a hearing should identify the specific issues and the findings of fact and conclusions of law with which you disagree, including a finding of substandard quality of care, if applicable. It should also specify the basis for contending that the findings and conclusions are incorrect. You do not need to submit records or other documents with your hearing request. The DAB will issue instructions regarding the proper submittal of documents for the hearing. The DAB will also set the location for the hearing. Counsel may represent you at a hearing at your own expense.

INFORMAL DISPUTE RESOLUTION

The State agency offered you an opportunity for informal dispute resolution (IDR) following its survey visits. A request for IDR will not delay the effective date of any enforcement action. However, IDR results will be considered when applicable.

INDEPENDENT INFORMAL DISPUTE RESOLUTION (INDEPENDENT IDR)

In accordance with §488.431, when a civil money penalty subject to being collected and placed in an escrow account is imposed, you have one opportunity to question cited deficiencies through an Independent IDR process. You may also contest scope and severity assessments for deficiencies which resulted in a finding of SQC or immediate jeopardy. To be given such an opportunity, you are required to send your written request, along with the specific deficiencies being disputed, and an explanation of why you are disputing those deficiencies (or why you are disputing the scope and severity assessments of deficiencies which have been found to constitute SQC or immediate jeopardy) to: www.health.state.mn.us/divs/fpc/profinfo/ltc/ltc_idr.cfm. This request must be sent within 10 calendar days of receipt of this offer. An incomplete Independent IDR process will not delay the effective date of any enforcement action.

CONTACT INFORMATION

If you have any questions regarding this matter, please contact Jan Suzuki, Program Representative, at (312) 886-5209. Information may also be faxed to (443) 380-6602. All correspondence should be directed to Jan Suzuki in our Chicago office.

Sincerely,

On 05/13/14, a Post Certification Revisit (PCR) was completed by the Minnesota Department of Health and on 05/01/14, the Minnesota Department of Public Safety completed a PCR. Based on these PCRs, it has been determined that the facility has not achieved substantial compliance pursuant to the 03/18/14 extended survey. Refer to the CMS 2567 (for health), CMS 2567B for both health and life safety code. Post certification revisit to fallow.

MINNESOTA MDH DEPARTMENT OF HEALTH

Protecting, Maintaining and Improving the Health of Minnesotans

FedEx Tracking Number 8047 7140 3710

June 2, 2014

Mr. Leah Killian-Smith, Administrator
Camden Care Center
512 49th Avenue North
Minneapolis, Minnesota 55430

RE: Project Number S5544023

Dear Ms. Smith:

On April 4, 2014, we informed you that the following enforcement remedy was being imposed:

- State Monitoring effective April 13, 2014. (42 CFR 488.422)

On April 11, 2014, the Centers for Medicare and Medicaid Services (CMS) informed you that the following enforcement remedies were being imposed:

- Civil money penalty for the deficiency cited at: F223 at a S/S level of J (42 CFR 488.430 through 488.444)

- Civil money penalty for the deficiency cited at: F226, at a S/S level of F (42 CFR 488.430 through 488.444)

- Civil money penalty for the deficiency cited at: F314, at a S/S level of G (42 CFR 488.430 through 488.444)

- Civil money penalty for the deficiency cited at: F323, at a S/S level of K (42 CFR 488.430 through 488.444)

- Optional Denial of Payment for New Medicare and Medicaid Admissions, effective April 24, 2014 (42 CFR 488.417 (b))

- Discretionary termination of your provider agreement, effective August 18, 2014 (42 CFR 488.412 and 488.456)

- Mandatory Denial of Payment for New Medicare and Medicaid admissions, effective June 18, 2014. (42 CFR 488.417 (b))

Federal law, as specified in the Act at Sections 1819(f)(2)(B) and 1919(f)(2)(B), prohibits approval of nurse assistant training programs offered by, or in, a facility which, within the previous two years, has been subject to an extended or partial extended survey as a result of a finding of substandard quality of care. Therefore, Camden Care Center is prohibited from offering or conducting a Nurse Assistant Training / Competency Evaluation Programs (NATCEP) or Competency Evaluation Programs for two years effective March 18, 2014. This prohibition remains in effect for the specified period even though substantial compliance is attained. Under Public Law 105-15 (H. R. 968), you may request a waiver of this prohibition if certain criteria are met. Please contact the Nursing Assistant Registry at (800) 397-6124 for specific information regarding a waiver for these programs from this Department.

This was based on the deficiencies cited by this Department for an extended survey completed on March 18, 2014. Conditions in the facility at the time of the extended survey constituted both Substandard Quality of Care (SQC) and Immediate Jeopardy (IJ) to resident health or safety. The extended survey found the most serious deficiencies in your facility to be a pattern of deficiencies that constituted immediate jeopardy (Level K), whereby corrections were required.

On May 13, 2014, the Minnesota Department of Health completed a Post Certification Revisit (PCR) to verify if your facility had achieved and maintained compliance with federal certification deficiencies issued pursuant to an extended survey, completed on March 18, 2014. During our PCR, a partial extended survey was conducted and determined conditions of both SQC and IJ to resident health or safety continue to exist in the facility. The most serious deficiencies at the time of the May 13, 2014 visit were found to be a pattern of deficiencies that constituted immediate jeopardy (Level K), whereby corrections are required.

REMOVAL OF IMMEDIATE JEOPARDY

We verified, on May 21, 2014, that the conditions resulting in our notification of Immediate Jeopardy (IJ) pursuant to our PCR/Partial extended survey completed on May 13, 2014, for reissued deficiencies cited at F250, F323 and an additional deficiency cited at F224, have been removed.

The deficiencies not corrected at the time of the May 13, 2014 revisit are as follows:

F0157 -- S/S: D -- 483.10(b)(11) -- Notify Of Changes (injury/decline/room, Etc)
F0221 -- S/S: D -- 483.13(a) -- Right To Be Free From Physical Restraints
F0223 -- S/S: D -- 483.13(b), 483.13(c)(1)(i) -- Free From Abuse/involuntary Seclusion
F0225 -- S/S: E -- 483.13(c)(1)(ii)-(iii), (c)(2) - (4) -- Investigate/report Allegations/individuals
F0226 -- S/S: E -- 483.13(c) -- Develop/implment Abuse/neglect, Etc Policies
F0250 -- S/S: H -- 483.15(g)(1) -- Provision Of Medically Related Social Service
F0275 -- S/S: D -- 483.20(b)(2)(iii) -- Comprehensive Assess At Least Every 12 Months
F0280 -- S/S: D -- 483.20(d)(3), 483.10(k)(2) -- Right To Participate Planning Care-Revise Cp
F0282 -- S/S: D -- 483.20(k)(3)(ii) -- Services By Qualified Persons/per Care Plan
F0309 -- S/S: D -- 483.25 -- Provide Care/services For Highest Well Being
F0314 -- S/S: D -- 483.25(c) -- Treatment/svcs To Prevent/heal Pressure Sores
F0319 -- S/S: D -- 483.25(f)(1) -- Tx/svc For Mental/psychosocial Difficulties
F0323 -- S/S: K -- 483.25(h) -- Free Of Accident Hazards/supervision/devices

F0329 -- S/S: E -- 483.25(l) -- Drug Regimen Is Free From Unnecessary Drugs
F0353 -- S/S: F -- 483.30(a) -- Sufficient 24-Hr Nursing Staff Per Care Plans
F0412 -- S/S: D -- 483.55(b) -- Routine/emergency Dental Services In Nfs
F0428 -- S/S: E -- 483.60(c) -- Drug Regimen Review, Report Irregular, Act On
F0431 -- S/S: E -- 483.60(b), (d), (e) -- Drug Records, Label/store Drugs & Biologicals
F0465 -- S/S: E -- 483.70(h) -- Safe/functional/sanitary/comfortable Environ
F0490 -- S/S: J -- 483.75 -- Effective Administration/resident Well-Being
F0493 -- S/S: F -- 483.75(d)(1)-(2) -- Governing Body-Facility Policies/appoint Admn
F0497 -- S/S: C -- 483.75(e)(8) -- Nurse Aide Perform Review-12 Hr/yr Inservice
F0500 -- S/S: D -- 483.75(h) -- Outside Professional Resources-Arrange/agrmnt
F0514 -- S/S: E -- 483.75(l)(1) -- Res Records-Complete/accurate/accessible
F0520 -- S/S: F -- 483.75(o)(1) -- Qaa Committee-Members/meet Quarterly/plans

In addition, at the time of this revisit, we identified the following deficiencies:

F0224 -- S/S: J -- 483.13(c) -- Prohibit Mistreatment/neglect/misappropriatn
F0274 -- S/S: D -- 483.20(b)(2)(ii) -- Comprehensive Assess After Significant Change
F0469 -- S/S: D -- 483.70(h)(4) -- Maintains Effective Pest Control Program
F0492 -- S/S: E -- 483.75(b) -- Comply With Federal/state/local Laws/prof Std
F0499 -- S/S: D -- 483.75(g) -- Employ Qualified Ft/pt/consult Professionals
F0502 -- S/S: D -- 483.75(j)(1) -- Administration

The most serious deficiencies in your facility at the May 13, 2014 revisit were found to be a pattern of deficiencies that constituted immediate jeopardy (Level K) as evidenced by the attached CMS-2567, whereby corrections are required.

As a result that your facility has not obtained substantial compliance at the Post Certification Revisit (PCR) completed on May 13, 2014. The Category 1 remedy of State monitoring, effective April 13, 2014, will remain in effect.

In addition, this Department is recommending to the CMS Region V Office the following actions related to the remedies outlined in their letter of April 11, 2014:

- Civil money penalty for the deficiency cited at: F223, at a S/S level of D, remain in effect. (42 CFR 488.430 through 488.444)

- Civil money penalty for the deficiency cited at: F226, at a S/S level of E, remain in effect .(42 CFR 488.430 through 488.444)

- Civil money penalty for the deficiency cited at: F314, at a S/S level of D, remain in effect .(42 CFR 488.430 through 488.444)

- Civil money penalty for the deficiency cited at: F323, at a S/S level of K, remain in effect. (42 CFR 488.430 through 488.444)

- Optional Denial of Payment for New Medicare and Medicaid Admissions, effective April 24, 2014, remain in effect. (42 CFR 488.417 (b))

- Discretionary termination of your provider agreement, effective August 18, 2014, remain in effect. (42 CFR 488.412 and 488.456)

- Mandatory Denial of Payment for New Medicare and Medicaid admissions, effective June 18, 2014, remain in effect. (42 CFR 488.417 (b))

Also, the CMS Region V Office notified you in their letter of April 11, 2014, in accordance with Federal law, as specified in the Act at Section 1819(f)(2)(B)(iii)(I)(b) and 1919(f)(2)(B)(iii)(I)(b), your facility is prohibited from conducting Nursing Aide Training and/or Competency Evaluation Programs (NATCEP) for two years from March 18, 2014.

Furthermore, we are recommending to CMS Region V office the following additional remedy for imposition:

- Civil money penalty for the deficiency cited at: F490, at a S/S level of J (at the time of the PCR) (42 CFR 488.430 through 488.444)

This letter provides important information regarding your response to these deficiencies and addresses the following issues:

Removal of Immediate Jeopardy - date the Minnesota Department of Health verified that the conditions resulting in our notification of immediate jeopardy have been removed;

No Opportunity to Correct - the facility will have remedies imposed immediately after a determination of noncompliance has been made;

Remedies - the type of remedies that would remain in effect with the authorization of the Centers for Medicare and Medicaid Services (CMS);

Substandard Quality of Care - means one or more deficiencies related to participation requirements under 42 CFR § 483.13, resident behavior and facility practices, 42 CFR § 483.15, quality of life, or 42 CFR § 483.25, quality of care that constitute either immediate jeopardy to resident health or safety; a pattern of or widespread actual harm that is not immediate jeopardy; or a widespread potential for more than minimal harm, but less than immediate jeopardy, with no actual harm;

Appeal Rights - the facility rights to appeal imposed remedies;

Plan of Correction - when a plan of correction will be due and the information to be contained in that document;

Potential Consequences - the consequences of not attaining substantial compliance 5

months after the survey date; and

<u>Informal Dispute Resolution</u> - your right to request an informal reconsideration to dispute the attached deficiencies.

Please note, it is your responsibility to share the information contained in this letter and the results of this visit with the President of your facility's Governing Body.

SUBSTANDARD QUALITY OF CARE

Your facility's deficiencies with §483.13, Resident Behavior and Facility Practices regulations, §483.15, Quality of Life and §483.25, Quality of Care has been determined to constitute substandard quality of care as defined at §488.301. Sections 1819(g)(5)(C) and 1919(g)(5)(C) of the Social Security Act and 42 CFR 488.325(h) require that the attending physician of each resident who was found to have received substandard quality of care, as well as the State board responsible for licensing the facility's administrator, be notified of the substandard quality of care. **<u>If you have not already provided the following information, you are required to provide to this agency within ten working days of your receipt of this letter the name and address of the attending physician of each resident found to have received substandard quality of care.</u>**

Please note that, in accordance with 42 CFR 488.325(g), your failure to provide this information timely will result in termination of participation in the Medicare and/or Medicaid program(s) or imposition of alternative remedies.

Federal law, as specified in the Act at Sections 1819(f)(2)(B) and 1919(f)(2)(B), prohibits approval of nurse assistant training programs offered by, or in, a facility which, within the previous two years, has been subject to an extended or partial extended survey as a result of a finding of substandard quality of care. Therefore, Camden Care Center is prohibited from offering or conducting a Nurse Assistant Training / Competency Evaluation Programs (NATCEP) or Competency Evaluation Programs for two years effective March 18, 2014. This prohibition remains in effect for the specified period even though substantial compliance is attained. Under Public Law 105-15 (H. R. 968), you may request a waiver of this prohibition if certain criteria are met. Please contact the Nursing Assistant Registry at (800) 397-6124 for specific information regarding a waiver for these programs from this Department.

Enclosed is a copy of the CMS-2567 (Statement of Deficiencies) and Post Certification Revisit Form, (CMS-2567B) from this visit.

APPEAL RIGHTS

Pursuant to the Federal regulations at 42 CFR Sections 498.3(b)(13)(2) and 498.3(b)(15), a finding of substandard quality of care that leads to the loss of approval by a Skilled Nursing Facility (SNF) of its NATCEP is an initial determination. In accordance with 42 CFR part 489 a provider dissatisfied with an initial determination is entitled to an appeal. If you disagree with the findings of substandard quality of care which resulted in the conduct of an extended survey and the subsequent loss of approval to conduct or be a site for a NATCEP, you or your legal representative may request a hearing before an

administrative law judge of the Department of Health and Human Services, Department Appeals Board. Procedures governing this process are set out in Federal regulations at 42 CFR Section 498.40, et. Seq. A written request for a hearing must be filed no later than 60 days from the date of receipt of this letter. Such a request may be made to the Centers for Medicare and Medicaid Services (formerly Health Care Financing Administration) at the following address:

Department of Health and Human Services
Departmental Appeals Board, MS 6132
Civil Remedies Division
Attention: Karen R. Robinson, Director
330 Independence Avenue, SW
Cohen Building, Room G-644
Washington, DC 20201

A request for a hearing should identify the specific issues and the findings of fact and conclusions of law with which you disagree. It should also specify the basis for contending that the findings and conclusions are incorrect. You do not need to submit records or other documents with your hearing request. The Departmental Appeals Board (DAB) will issue instructions regarding the proper submittal of documents for the hearing. The DAB will also set the location for the hearing, which is likely to be in Minnesota or in Chicago, Illinois. You may be represented by counsel at a hearing at your own expense.

DEPARTMENT CONTACT

Questions regarding this letter and all documents submitted as a response to the resident care deficiencies (those preceded by a "F" tag), i.e., the plan of correction should be directed to:

Gloria Derfus, Unit Supervisor
Minnesota Department of Health
P.O. Box 64900
St. Paul, Minnesota 55164-0900
Email: gloria.derfus@state.mn.us
Telephone: (651) 201-3792
Fax: (651) 201-3790

PLAN OF CORRECTION (PoC)

A PoC for the deficiencies must be submitted within **ten calendar days** of your receipt of this letter. Your PoC must:

- Address how corrective action will be accomplished for those residents found to have been affected by the deficient practice;

- Address how the facility will identify other residents having the potential to be affected by the same deficient practice;

- Address what measures will be put into place or systemic changes made to ensure that the deficient practice will not recur;

- Indicate how the facility plans to monitor its performance to make sure that solutions are sustained. The facility must develop a plan for ensuring that correction is achieved and sustained. This plan must be implemented, and the corrective action evaluated for its effectiveness. The plan of correction is integrated into the quality assurance system;

- Include dates when corrective action will be completed. The corrective action completion dates must be acceptable to the State. If the plan of correction is unacceptable for any reason, the State will notify the facility. If the plan of correction is acceptable, the State will notify the facility. Facilities should be cautioned that they are ultimately accountable for their own compliance, and that responsibility is not alleviated in cases where notification about the acceptability of their plan of correction is not made timely. The plan of correction will serve as the facility's allegation of compliance; and,

- Include signature of provider and date.

The state agency may, in lieu of a revisit, determine correction and compliance by accepting the facility's PoC if the PoC is reasonable, addresses the problem and provides evidence that the corrective action has occurred.

If an acceptable PoC is not received within 10 calendar days from the receipt of this letter, we will recommend to the CMS Region V Office that one or more of the following remedies be imposed:

• Optional denial of payment for new Medicare and Medicaid admissions (42 CFR 488.417 (a));

• Per day civil money penalty (42 CFR 488.430 through 488.444).

Failure to submit an acceptable PoC could also result in the termination of your facility's Medicare and/or Medicaid agreement.

PRESUMPTION OF COMPLIANCE - CREDIBLE ALLEGATION OF COMPLIANCE

The facility's PoC will serve as your allegation of compliance upon the Department's acceptance. In order for your allegation of compliance to be acceptable to the Department, the PoC must meet the criteria listed in the plan of correction section above. You will be notified by the Minnesota Department of Health, Licensing and Certification Program staff, if your PoC for their respective deficiencies (if any) is acceptable.

VERIFICATION OF SUBSTANTIAL COMPLIANCE

Upon receipt of an acceptable PoC, a revisit of your facility will be conducted to verify that substantial compliance with the regulations has been attained. The revisit will occur after the date you identified that compliance was achieved in your plan of correction.

If substantial compliance has been achieved, certification of your facility in the Medicare and/or Medicaid program(s) will be continued and we will recommend that the remedies imposed be discontinued effective the date of the on-site verification. Compliance is certified as of the date of the second revisit or the date confirmed by the acceptable evidence, whichever is sooner.

FAILURE TO ACHIEVE SUBSTANTIAL COMPLIANCE BY THE FIFTH MONTH AFTER THE LAST DAY OF THE SURVEY

We will also recommend to the CMS Region V Office and/or the Minnesota Department of Human Services that your provider agreement be terminated by August 18, 2014 (five months after the identification of noncompliance) if your facility does not achieve substantial compliance. This action is mandated by the Social Security Act at Sections 1819(h)(2)(C) and 1919(h)(3)(D) and Federal regulations at 42 CFR Sections 488.412 and 488.456.

INFORMAL DISPUTE RESOLUTION

In accordance with 42 CFR 488.331, you have one opportunity to question cited deficiencies through an informal dispute resolution process. You are required to send your written request, along with the specific deficiencies being disputed, and an explanation of why you are disputing those deficiencies, to:

Nursing Home Informal Dispute Process
Minnesota Department of Health
Division of Compliance Monitoring
P.O. Box 64900
St. Paul, Minnesota 55164-0900

This request must be sent within the same ten days you have for submitting a PoC for the cited deficiencies. All requests for an IDR or IIDR of federal deficiencies must be submitted via the web at: http://www.health.state.mn.us/divs/fpc/profinfo/ltc/ltc_idr.cfm

You must notify MDH at this website of your request for an IDR or IIDR within the 10 calendar day period allotted for submitting an acceptable plan of correction. A copy of the Department's informal dispute resolution policies are posted on the MDH Information Bulletin website at: http://www.health.state.mn.us/divs/fpc/profinfo/infobul.htm

Please note that the failure to complete the informal dispute resolution process will not delay the dates specified for compliance or the imposition of remedies.

Feel free to contact me if you have questions related to this letter.

Sincerely,

Mark Meath

Re: Camden Care Center

Dear Ms. Derfus:

Attached please find Camden Care Center's credible allegation of compliance for the survey exit date of May 13, 2014. You can reach me with any questions or concerns at 612-529-7747 x201 or leah.smith@pathwayhealth.com . Thank you in advance for your consideration.

Respectfully submitted,

Leah Killian-Smith
Interim Executive Director

{F 000}	INITIAL COMMENTS An onsite resurvey was conducted on May 5, 6, 7, 8, 9, 10, 11, 12, and 13, 2014, to determine compliance with Federal deficiencies issued during a recertification survey exited on March 18th, 2014. An IJ at F224 began on 5/10/14, when R37 was admitted to the hospital following the use of illicit drugs while in the facility and was identified on 5/12/14. The administrator, consulting administrator, and director of nursing (DON) were notified of the IJ at 3:15 p.m. on 5/12/14. The IJ was not removed by the exit date of the survey. An IJ at F323 began on 5/1/14, when R41 drove an electric wheelchair off the sidewalk at the facility while intoxicated, requiring medical treatment with hospitalization and was identified on 5/9/14. The administrator, consulting administrator, and director of nursing (DON) were notified of the IJ on 5/9/14, at 2:14 p.m. The administrator, consulting administrator and DON were informed of additional components to the IJ related to R13 and R116's elopement behaviors, at 3:15 p.m. on 5/12/14. The IJ was not removed by the exit date of the survey. An IJ at F490 began on 5/10/14, when R37 was admitted to the hospital for acute alcohol intoxication requiring medical treatment including intubation to assist with breathing. The administrator, consulting administrator, and director of nursing (DON) were notified of the IJ on 5/12/14, at 3:15 p.m. The IJ was not removed by the exit date of the survey. An extended survey was conducted by the	{F 000}	Approved MK on 6/24/2014

{F 157}	Continued From page 2 the address and phone number of the resident's legal representative or interested family member. This REQUIREMENT is not met as evidenced by: Based on observation, interview and document review, the facility failed to ensure the physician and family member(s) was promptly notified for 1 of 1 resident (R13) observed to elope from the building during the survey on 5/6/14. Findings include: On 5/5/14, and 5/6/14, R13 was observed to be allowed to leave the facility unescorted to smoke in the designated smoking area. Although R13 had a WanderGuard applied, the WanderGuard alarm was disabled when R13 exited the building. On 5/6/14, at 4:45 p.m. R13 was observed to have eloped from the facility and was observed on the city sidewalk by the surveyor. Upon arrival to the facility on 5/5/14, at 1:35 p.m. R13 was observed to be out on the designated smoking area with four other residents and two facility staff. R13 was observed to be in a wheelchair with a half lap tray on the left side of the wheelchair. R13 was observed to be smoking a cigarette independently. On 5/6/14, at 8:30 a.m. R13 was observed to wheel independently to the front door. A chirping sound was heard and R13 was observed to exit the facility and wheel herself backwards to the smoking patio. No staff escorted her. Seven residents were observed to be in the designated smoking area. R13 wheeled to the table under the arbor, was assisted to light a cigarette by the	{F 157}

smoking monitor and smoked independently.
- At 8:33 a.m. R13 remained on the smoking patio with four other residents smoking.
- At 8:46 a.m. R13 extinguished her cigarette appropriately and wheeled herself back into the facility. A loud beeping noise was heard as R13 entered the facility. The sound was immediately silenced to a slight chirping sound. R13 wheeled into the facility and down the hallway. No staff escorted her.
- At approximately 11:00 a.m. R13 was randomly observed to be smoking in the designated smoking area, a male staff was observed to be monitoring the smokers. R13 was observed to finish smoking her cigarette at approximately 11:20 a.m. and wheel herself into the facility unescorted. The smoking monitor did not assist. A quiet chirping noise was heard as R13 entered the building.
-At 4:45 p.m. R13 was observed by the surveyor to be at the end of the driveway in her wheelchair using her feet to propel the wheelchair towards 49th Avenue North. R13 turned left upon reaching the sidewalk and began wheeling herself with difficulty towards 6th street. After a few feet, R13 made a U-turn and began pushing herself backwards down the sidewalk. The street was observed to be busy with multiple cars driving rapidly (posted speed limit was 30 miles per hour). The smoking monitor was observed to be behind a pillar with his back to the street and R13.
- At 4:46 p.m. the front desk monitor (O)-C was notified by the surveyor that R13 had been observed on the city sidewalks. O-C verified R13 "could not" be on the sidewalk near the street unsupervised and immediately ran outside to R13. When O-C reached the resident, R13 was approximately 20 feet past the end of the

driveway and half way to 6th street, wheeling backwards on the sidewalk facing oncoming traffic. O-C was observed to speak with R13 and after several minutes, assisted her to wheel back to the facility. O-C could be heard to tell the smoking monitor to watch for residents eloping. O-C returned R13 to the facility.

R13's Diagnosis Report dated 2/4/09, identified diagnoses to include hemiplegia affecting the dominant side, depressive disorder and cognitive deficits due to cerebrovascular disease.

The Vulnerable Adult Assessment dated 6/24/13, identified R13 had a history of wandering into other resident's rooms, history of unsafe smoking and taking other peoples' belongings. The assessment identified R13 had cognitive deficits, short-term memory loss, impaired decision making and poor judgment. In addition, the assessment indicated R13 was required to have supervised LOAs (Leave of Absences) only, and that R13 had a past history of drug abuse.

A LOA Safety Assessment dated 6/24/13, identified R13 had cognitive impairments related to dementia, and that the resident was unable to leave the facility unsupervised.

A Camden Care Center Care Conference form dated 10/1/13, included; "[R13] propels herself independently in a wheelchair to all destinations within the building - at times she will propel herself backwards and needs frequent reminders to not do this. She has a history of wandering from the facility and thus wears a WanderGuard to alert staff if she attempts to leave the building. She also has a history of wandering into other resident rooms and taking their belongings, which

can cause other residents to become frustrated with her so she needs frequent redirection."

The Nursing Assessment Packet Review for the reference period 3/19 through 3/25/14, included a safety Risk (Fall) Assessment dated 3/19/14. The assessments did not address or review the need for a WanderGuard.

R13's quarterly Minimum Data Set (MDS) dated 3/25/14, indicated R13 was cognitively intact, was identified to have no behavior problems, and required extensive assistance with activities of daily living (ADLs).

A Care Conference summary dated 4/10/14, and another Care Conference form (undated) did not address R13's use of a WanderGuard or elopement risk.

R13's Physician's Order Sheet dated 4/16/14, directed to check R13's WanderGuard every shift beginning 9/19/13.

The Behavior Monitoring Documentation form (undated) identified R13's target behavior was, "Wandering into other resident rooms" and indicated appropriate interventions such as assist resident to attend activities, assist resident to the bathroom if needed, anticipate needs, visit with resident if she needs help. Dated as reviewed last on 4/23 (no year).

R13's Vulnerable Adult care plan dated 4/28/14, indicated R13 had a history of elopement. The goal identified R13 would remain safe at Camden Care Center. An intervention dated 10/7/11, indicated, "WanderGuard in place." An intervention dated as initiated 3/16/12, directed,

{F 157}	Continued From page 6 "Resident has been assessed and may not leave this facility without supervision." An undated Group 5 assignment sheet (a form carried by nursing assistant staff for quick reference to care plan needs) identified R13 had a WanderGuard. The clinical record lacked evidence R13's elopement was documented including date, time, location, and those involved. The clinical record lacked evidence R13 was evaluated for elopement risk after being found to elope, or R13's physician was notified at the time of the incident. The clinical record lacked evidence the administrator or State agency were notified of the incident. In addition, the clinical record lacked evidence the elopement was thoroughly investigated, including interview with staff present at the time of the elopement. A nursing progress note for R13 written by administration on 5/8/14, at 9:04 a.m., "Report received that the resident attempted to leave the facility on Tuesday May 6 around 4 p.m. trying to get to her son, resident was found by the receptionist on the sidewalk, redirected back into the facility. Resident has her WanderGuard on. The receptionist [O-C] reported that the she reminded the resident that resident cannot leave the facility unsupervised; receptionist was educated that when residents with WanderGuard would like to get out of the building to smoke, the smoke monitor should be alerted. Son and daughter notified. Message left to NPs [nurse practitioner] voicemail to update on resident." Although the note indicated a message had been left for the NP, the NP and family member(s) were not called until three days after the incident.	{F 157}

{F 157}	Continued From page 7 On 5/9/14, at 11:00 a.m. R13 was observed to wheel herself backwards out of the facility through the front entrance. The WanderGuard did not sound. O-C was observed to be at the front desk and was observed to reach to the right. O-C verified she reached to silence the alarm for the WanderGuard. R13 was observed to exit the facility without staff and wheel without staff to the designated smoking area. - At approximately 11:25 a.m. R13 was observed to wheel herself out of the designated smoking area, push the handicapped switch to open both doors and wheel herself backwards into the facility. O-C was observed to silence the WanderGuard alarm (reach down to activate switch). R13 wheeled herself backwards down the hallway into the facility. At the time of the observation, O-C stated she disabled the WanderGuard alarm for residents who wanted to smoke in the designated smoking area. At no time during the observation, did O-C alert the smoking monitor or staff of R13 leaving the building. On 5/9/14, at 1:11 p.m. registered nurse (RN)-C stated she was in the room when O-C had reported R13 had eloped. RN-C stated the announcement was made and RN-C, licensed practical nurse (LPN)-E, LPN-A and dietary manager (DM) was present for the announcement. RN-C stated she had not reported the concern as it was LPN-A's responsibility and verified R13 was assigned to her unit. RN-C stated LPN-E was not available for interview. RN-C stated if a resident was found to elope, the staff should try to locate the resident; and would be responsible to notify the family and physician regarding the elopement.	{F 157}

{F 221} SS=D	483.13(a) RIGHT TO BE FREE FROM PHYSICAL RESTRAINTS The resident has the right to be free from any physical restraints imposed for purposes of discipline or convenience, and not required to treat the resident's medical symptoms. This REQUIREMENT is not met as evidenced by: Based on observation, interview and document review, the facility failed to ensure 1 of 1 resident (R89) reviewed for restraint, was free of physical restraints while directly supervised by staff during meals. Findings include: On 5/7/14, at 8:28 a.m. R89 was observed to be at a meal in her wheelchair (W/C) with the right break locked. Anti-rollbacks (devices which engage and keep wheelchair from rolling back when a resident stands) were observed to be applied to the back of the W/C. A nursing assistant (NA)-V was observed to be sitting directly to R89's left and assisted R89 to eat. When asked why the W/C brake was locked, NA-V stated "we lock one brake," and verified the left brake was unlocked. NA-V explained "brakes" needed to be locked "to protect her [R89]." NA-V further explained R89 needed to protect from "falling." NA-V was unclear why the left brake was left unlocked. The right side of the W/C was observed to be flush to the table. During the observation, R89 was observed to stand repeatedly, had worried expression on her face and repeated in an anxious voice, "I gotta go!" On 5/8/14, at approximately 8:30 a.m. R89 was	{F 221}		7/6/14

{F 221}	Continued From page 9	{F 221}		

observed to be at the dining room table in the same location. R89 was observed to have both W/C brakes locked; the anti-rollback device remained appropriately applied to the W/C. R89 attempted to stand multiple times, appeared worried when standing, then immediately sat back down.
- From 8:30 a.m. until 9:40 a.m. R89 remained at the breakfast meal. NA-V was observed to provide R89 her breakfast, set up the breakfast and sit directly next to R89 and assist her to eat. At no time were W/C brakes unlocked. R89 was observed to stand repeatedly throughout the meal, pushing back slightly with her legs as she stood. The W/C was flush to the top of the table, preventing R89 from leaving the table.

The Admission Nursing Assessment dated 12/23/13, identified R89 had no visual, or hearing impairments, and she was alert to person, place, family and self only. The assessment identified "right side weakness." Although the assessment identified R89 arrived to the facility in a wheelchair, the assessment did not identify the use of a W/C and had "N/A [non-applicable]" written by hand in the section. Review of the clinical record lacked evidence R89 was assessed for restraints.

R89's admission Minimum Data Set (MDS) dated 12/28/13, indicated R89 was never or rarely understood had short and long-term memory problems and R89 had moderately impaired decision making ability. The MDS identified R89 had hallucinations, delusions, and other behavior concerns towards others. The MDS indicated R89 required limited physical assistance from staff to walk; extensive physical assistance from staff for transferring, bed mobility, locomotion and toilet

{F 221}	Continued From page 10	{F 221}		

use. The MDS identified R89 did not have steady balance when attempting to move from seated to standing position and R89 had impairment of the lower extremity on one side. The MDS did not identify R89 used a restraint.

The Care Area Assessment (CAA) for activities of daily living (ADLs) Function/Rehabilitation Potential dated 1/3/14, identified R89's diagnoses to include altered mental status, cognitive impairment and weakness. The CAA identified R89 required staff assistance for ADLs, had no pain concerns, had a history of falls (but no falls in the facility) and was incontinent of bowel and bladder. The CAA for behaviors dated 1/3/14, indicated, "Resident exhibits behavioral symptoms and is cognitively not alert and orient [sic] when writer attempted to assess her. SS [social services] will care plan this matter accordingly." The CAA for falls, also dated 1/3/14, recapitulated the same information as the ADL CAA.

The Admission Record dated 1/23/14, identified R89 had diagnoses to include difficulty walking, essential hypertension and Picks disease.

The clinical record lacked evidence R89 had been assessed for restraint use, including locked W/C brakes and having the W/C pushed flush to the table.

R89's care plan dated as last reviewed on 3/28/14, identified R89 was at risk for falls related to confusion, dementia, psychotropic drug use and Picks disease. The care plan directed to provide a "safe environment for the resident." The care plan did not identify or direct to lock R89's brakes, did not identify the use of a restraint and

{F 221}	Continued From page 11	{F 221}		

did not include direction to place R89 against a desk or table. The care plan was updated on 4/30/14, to include, "Anti-roll back brakes installed onto wheelchair to prohibit wheelchair from rolling backwards when resident offloads independently. Least restrictive safety device while in wheelchair."

On 5/12/14, at 9:24 a.m. the licensed practical nurse (LPN)-E stated R89 "was not restrained" and stated "anti-rollback brakes were placed on the wheelchair." LPN-E stated R89's W/C was "looked at by therapies" and therapies had assessed R89 for the use of the anti-rollbacks on the W/C. LPN-E was unclear whether the locking of R89's W/C brakes had been assessed as a form of restraint.
- At 9:28 a.m. LPN-E stated the therapy department had only made a "recommendation" and since R89 was not on the therapy case load, they "didn't document the evaluation." LPN stated direct care staff had been "educated" not to lock R89's brakes or restrain her against a desk or table. LPN-E verified if R89 was directly supervised by a staff person, the W/C brakes should not have been locked.

On 5/12/14, at 9:44 a.m. the director of nursing (DON) verified R89 should have been assessed for the use of anti-rollbacks and the use of potential restraints, such as having both brakes locked and the W/C pushed flush to a table. DON repeatedly stated he thought "physical therapy assessed the use of the anti-rollbacks" but was unclear if R89 was assessed for restraints. DON verified therapy assessments should have been documented in R89's clinical record.

On 5/12/14, at 12:28 p.m. the physical therapy

{F 221}	Continued From page 12	{F 221}		

assistant and rehab manager (PTA), occupational therapist (OT), and physical therapist (PT) were interviewed together in the therapy gym. All denied having assessed R89 for the use of the anti-rollbacks, W/C brake locking, or restraints. PTA stated the anti-rollbacks had been an idea that had been "brought up" in the morning meeting as "a way to keep her [R89] safe without locking the brakes." The OT stated therapy staff had "helped maintenance order the device," and stated since maintenance had not seen the device before, therapy staff had assisted him to "apply it." The PT stated no therapy staff had actually assessed R89 because there was no "physician's order" and because R89 "was not on case load." All therapists verified they would not "assess" a resident without a physician's order and stated they were unclear when they should "get involved." All verified they were employees of Videll Healthcare Limited Liability Company (LLC), but then stated, "The facility doesn't have polices to let us know our responsibilities."

On 5/12/14, at 12:23 p.m. R89 was observed to be in her W/C at the lunch meal. NA-V was observed seated directly to the left of R89. NA-V was interacting with R89 before the meal. R89 was observed to have the W/C pushed up flush against the table and both W/C brakes were observed to be locked which caused R89 to be restrained. The left anti-rollback arm was observed to be twisted off R89's left W/C tire (rendering the anti-rollback ineffective). The surveyor alerted NA-V to the anti-rollback being ineffective.
- At 12:26 p.m. R89 was observed to be provided her meal. NA-V setup the meal and remained with R89. R89 was observed to remain in the dining room throughout the meal with the brakes

{F 221}	Continued From page 13 locked. NA-V sat next to R89 until approximately 1:20 p.m. NA-V then unlocked both brakes and wheeled R89 away from the table and into the activity room on the South unit. On 5/13/14, at 9:03 a.m. LPN-E verified R89 should not have been restrained at the table while supervised during the meal. The facility's Restrictive Device Management Policy dated as reviewed 5/2013, identified residents should be assessed for the need for a restrictive device during the admission process and identified restrictive devices such as a lap buddy and non-releasing seat belt. The policy did not identify other potential restrictive devices, such as the practice of locking a resident's W/C brakes, seating a resident up against a table or denying access to parts of the resident's body. The policy identified the "least restrictive" device should be used and identified a care plan should be developed by the interdisciplinary team to address the device. The policy indicated the DON or designee was responsible for ensuring residents were assessed for restrictive devices and for ensuring the device was checked each shift and released according to physician's orders. The policy did not address the release of restraint devices, such as releasing the restraint every two hours, during supervised activities, or while the resident was supervised at a meal.	{F 221}		
{F 223} SS=D	483.13(b), 483.13(c)(1)(i) FREE FROM ABUSE/INVOLUNTARY SECLUSION The resident has the right to be free from verbal, sexual, physical, and mental abuse, corporal punishment, and involuntary seclusion.	{F 223}		7/6/14

{F 223}	Continued From page 16	{F 223}		

requested. The Incident/Accident Report lacked any additional investigation into the incident.

A Progress Note dated 5/9/14, indicated R34 reported she did not like R36 because "he is an old drunk." The note indicated R34 had agreed to stay away from R36 and that R34 had stated she was used to handling old drunks, and had showed staff an old scar she reported was from when her late husband broke her leg.

When interviewed on 5/7/14, at 2:41 p.m. R34 stated R36 called her names "all the time." When asked how being called names made her feel, R34 stated she had filed a police report because R36 had "assaulted her" two nights ago. When asked what she meant by assaulted, R34 stated R36 waited until nobody was around and then pushed her. R34 reported the director of operations helped her file a police report. Review of the medical records for R34 and R36, lacked documentation regarding the incident which was allegedly reported on 5/5/14, and lacked indication of how R34 would be protected from R36.

When interviewed on 5/7/14, at 3:10 p.m. the director of operations reported he was aware of the incident which had occurred during the evening of 5/5/14, and confirmed he'd helped R34 call the police. During the interview, the administrator stated he was aware of the incident and that it had been reported to him on 5/6/14. The administrator reported R34 and R36 "spar all the time."

Upon interview on 5/8/14, at 11:36 a.m. the director of nursing (DON) reported he had received the Incident/Accident Report on 5/8/14.

The DON stated he was not sure whether the incident was reportable because it had occurred on 5/5/14, and it was a "resident to resident altercation."

The director of operations was interviewed on 5/12/14, at 9:20 a.m. and stated R34 was very upset about the incident from 5/5/14, and had wanted the police called because it was not the first time, and that R34 had felt assaulted and wanted to press charges.

Upon interview on 5/12/14, at 9:24 a.m. the administrator stated the incident on 5/5/14, had been reported to the state agency and that he would provide documentation regarding the report made.

R34 was interviewed on 5/12/14, at 1:31 p.m., R34 stated R36 was abusive to her every day but that she'd heard he had gotten sent to another nursing home. R34 stated she felt what R36 was doing to her was both verbal and physical abuse.

When interviewed on 5/12/14, at 1:52 p.m. the administrator and consultant administrator reported R34 and R36 have had an ongoing fight going on. The administrator stated R34 and R36 allege physical things and then change their stories. The consultant administrator stated that although the police had been called regarding the incident on 5/5/14, R36 had denied it happened and R34 had no visible injuries noted. The administrator stated when allegations of abuse are made, an incident report was to be filled out and a supervisor consulted to determine whether a report was needed. The administrator said the residents would be separated, an assessment would be made, the incident would be reported to

the Common Entry Point (CEP) if appropriate, would be presented at their stand-up meeting the next day, and an investigation would be started. The administrator stated incidents were reported to the administrator, DON or CLSW but verified, "that system has not always been working." The administrator stated the incident form 5/5/14, had not been reported to the State Agency (SA) or to the CEP and acknowledged things needed to be reported right away and then investigated.

Minneapolis Police Department officer (MPD)-E was interviewed on 5/12/14, at 3:38 p.m. and confirmed the police department had come to the facility regarding the incident between R34 and R36 on 5/5/14. MPD-E stated the facility was aware the residents called each other names and stated it was a facility problem.

The facility Prohibition of Abuse, Neglect, Mistreatment, and Misappropriation of Resident Property policy dated May 2012, indicated staff must not permit "anyone" to engage in verbal or physical abuse. The policy indicated the facility would implement policies and procedures to ensure that residents are not subjected to abuse by staff, other residents, volunteers, consultants, family members and others who may have unsupervised access to residents. The definition of verbal abuse was described in the policy as, "the use of oral, written, or gestured language that willfully includes disparaging and derogatory terms to residents or their families, or within hearing distance, regardless of their age, ability to comprehend or disability." The policy indicated the facility would protect residents from harm during the investigation and would "report allegations to the state survey and certification agency and any other state agencies pursuant to

{F 223}	Continued From page 19 state regulations."	{F 223}		
F 224 SS=J	483.13(c) PROHIBIT MISTREATMENT/NEGLECT/MISAPPROPRIATN The facility must develop and implement written policies and procedures that prohibit mistreatment, neglect, and abuse of residents and misappropriation of resident property. This REQUIREMENT is not met as evidenced by: Based on observation, interview and document review, the facility neglected to provide adequate supervision to residents who had a known history of drug and alcohol use resulting in medical treatment, including hospitalization, for 2 of 11 residents (R37, R129) reviewed. In addition, the facility failed to implement adequate interventions to prevent elopements for 1 of 3 residents (R116) who eloped from the facility with a WanderGuard (a system to alert staff when a resident leaves the facility) in place. This lack of supervision caused an immediate jeopardy situation for R37, R129 and R116. The IJ began on 5/10/14, when R37 was admitted to the hospital following the use of illicit drugs while in the facility and was identified on 5/12/14. The administrator, consulting administrator, and director of nursing (DON) were notified of the IJ at 3:15 p.m. on 5/12/14. The immediate jeopardy was not removed by the exit date of the survey. Findings include:	F 224		7/6/14

F 224	Continued From page 20 On 5/9/14, the facility had been informed of serious and immediate safety of the residents related to lack of adequate supervision for alleged drug and alcohol use and elopement. Although, the facility was aware of the serious implications on 5/9/14, the facility did not identify and implement interventions to protect the residents from potential harm. On 5/10/14 and 5/11/14, two residents were hospitalized for drug and alcohol abuse. In addition, on 5/11/14, one resident had eloped from the facility three times with a WanderGuard on and no staff were present. R37's Admission Record dated 1/14/14, indicated R37 was admitted to the facility on 9/19/13, with diagnoses which included altered mental status, and personal history of alcoholism. According to documented progress notes, R37 had been found with ETOH/vodka on 2/21/14, 2/22/14, 2/27/14, 3/2/14, 4/13/14, 4/23/14, 4/24/14, 4/25/14, 5/3/14, 5/5/14, 5/6/14, 5/7/14, 5/9/14 and 5/10/14. The record also indicated R37 had required hospitalizations related to the use of alcohol and or drugs on 2/22/14, 4/23/14, and 5/10/14. During observations of R37 the following was observed: -On 5/5/14, at 2:53 p.m. R37 was observed approaching a white minivan parked in front of the facility. - On 5/6/14, at 1:30 p.m. R37 was observed staggering down the hallway with the health unit coordinator (HUC) and in a loud voice stated he was "crazy". - On 5/6/14, 2:02 p.m. R37 went outside without shoes on. Two staff stopped him at the nursing station and sent him back to his room for shoes. R37 left his room and went directly outside	F 224

without shoes on again, walked to the smoking patio and returned to the facility.
- On 5/7/14, at 8:18 a.m. R37 was observed standing next to R117 on the smoking patio with his wallet out. Another resident (R1) arrived and R37 handed his wallet to her. Surveyor was unable to see whether R1 took anything from the wallet before she handed it back to R37. R37 was observed to lean close to R1 and speak to her and gave her his wallet back. At 8:24 a.m. R1 put R37's wallet back in his left rear pant pocket.
- On 5/8/14, at 11:48 a.m. R37 was observed in bed with his back to the door. R37 rolled over and looked at surveyor and rolled back towards the wall. R37 stated he did not want to talk now and would talk in an hour or two.
- On 5/8/14, at 3:46 p.m. an attempt was made to interview R37 and he refused.
- On 5/9/14, at 7:23 a.m. R37 was observed coming out of his room, stated he did not feel good and was going to see if there was any coffee. At 7:28 a.m. R37 was observed coming from the West hallway. R37 was then observed to push another resident back down the West hallway and was observed outside room 186 R9. There was no staff with R37 when he was observed. When R37 returned to the nursing station, he told the HUC he had gotten cigarettes from R9. The HUC asked R37 if he was alone and R37 responded that he was and she asked him where his partner was. Nursing assistant (NA)-L approached R37 and stated she was with him today. NA-L verified she was assigned to provide the 1:1 for R37.
- On 5/10/14, at 1:07 p.m. R37 was observed being taken out of the facility to an ambulance.

The Nutritional Status Care Area Assessments (CAAs) dated 9/26/13, indicated R37 was at risk

for impaired nutritional status due to chronic ETOH abuse and cirrhosis. Review of the Cognitive Loss/Dementia, Mood State, Behavioral Symptoms and Psychotropic Drug Use CAAs dated 10/7/13, revealed a lack of a summary regarding the triggered areas.

The Progress Notes were reviewed and the following was noted:
- On 5/2/14, R37 removed the WanderGuard (departure alert system) and refused a new one to be placed.
- On 5/3/14, R37 was walking in the hallway "wobbling" and requested staff give him a shower at 3:00 a.m. R37 was unable to maintain his balance and appeared "intoxicated." Two almost empty bottles of vodka were found in his room.
- On 5/5/14, at 3:53 p.m. R37 had exhibited signs of intoxication with an unsteady/staggering gait, slurred speech, odor of alcohol and unkempt appearance. R37 was noted to have continually gone outside, stated he had called a limousine and was going to Las Vegas.
- On 5/5/14, at 4:56 p.m. R37 had slurred speech, smelled of ETOH and had a staggering gait.
- On 5/5/14, at 10:25 p.m. R37 was "intoxicated" and was found with an almost empty bottle of vodka.
- On 5/6/14, a notation had been made indicating it was a late entry for 5/5/14, at 6:00 p.m., the note indicated R37 was noted walking outside towards the back of the building. R37 was noted to be walking alone with a staggering gait. When approached by staff, R37 stated he was going to Las Vegas. No odor of ETOH was noted and when asked what he had been doing to become so impaired, R37 reported he had gotten cocaine and heroin from another resident and confirmed he had been injecting the drugs. Several

F 224	Continued From page 23 scattered purple bruises were noted on his forearms. At 1:55 a.m. indicated R37 reported his heart was thumping out of his chest and was found to have a blood pressure of 168 /118 with a pulse of 118. At 4:37 a.m. indicated R37 exited his room without clothing and had a strong odor of ETOH on his breath. Four empty bottles and one unopened bottle of ETOH were found in R37's room and were removed by staff. Also noted R37 started having tremors and palpitations with increased pulse and blood pressure due to ETOH withdrawal and demanded medications. - On 5/7/14, at 12:04 p.m. indicated R37 was exhibiting signs and symptoms of intoxication as evidenced by odor of ETOH, unsteady/slow/staggering gait, slurred speech, confusion and unkempt appearance. A pattern of missed pain clinic appointments due to intoxication was noted and indicated further appointments would not be made due to ongoing intoxication and inability to follow through with appointments. In addition, R37 had a full bottle of vodka and refused to give the bottle to staff. The note indicated the administrator directed if R37 was unwilling to willingly give staff the ETOH bottle, it was ok for the resident to keep the ETOH and if he became drunk or disruptive to call the police and have him taken to detox. - On 5/8/14, at 3:42 p.m. indicated R37 was placed on one to one (1:1) [to be within arm's length at all times] observation related to incidences of getting intoxicated. - On 5/9/14, indicated R37 "was clearly intoxicated." An empty pint bottle of vodka was found in his room and was noted as the third empty pint bottle taken from R37's room in a 48 hour span of time. - On 5/10/14, indicated R37 was observed giving	F 224

his credit card to R117 on 5/9/14. A second note indicated R37 returned from leave of absence (LOA) accompanied by a friend of another resident (R1). R37 was observed to be shaky and verbalized he was unsteady on his feet. R37 was noted to have shakiness, profuse sweating, and sluggish pupils. R37 was noted to have a blood pressure of 178/130 and a pulse of 120s to 140s.
- On 5/11/14, indicated R37 had a drug screen positive for methadone at the hospital. R37 did not have a prescription for methadone.

The Physician's Orders and Nurse Practitioners (NP) Orders were reviewed and the following was noted:
- On 1/8/14, included a diagnosis of ETOH abuse noted to have also occurred in the facility.
- On 2/5/14, indicated R37 recently had a bottle of ETOH hidden in his pillow case and was noted to smell of ETOH.
- On 2/28/14, directed to discharge R37 to another facility (that allowed drinking).
- On 3/5/14, directed "do not call on-call MD [physician] or NP after hours if resident is intoxicated unless he is medically compromised. Allow resident to go to bed [and] sleep."
- On 4/9/14, indicated R37 was hospitalized from 4/1/14 from 4/8/14, with respiratory distress and pneumonia with pleural effusions requiring chest tube placement, treated for sepsis and required thoracentesis. A NP note dated 4/9/14, indicated R37 required ongoing Kristalose and Mag-ox for chronic cirrhosis.
- On 4/10/14, included diagnoses of chemical dependency, hepatic cirrhosis, and chronic pain.
- On 4/24/14, included "place wander guard [sic] for res. [resident] safety" and "pursue guardianship." A second order dated 4/24/14, indicated NP was aware of R37's ETOH, to

F 224	Continued From page 25 encourage R37 not to use and if R37 appeared intoxicated it was ok to administer all medications as ordered. - On 5/6/14, directed to recheck R37's blood pressure in one hour, call NP if diastolic blood pressure was greater than 100, give Ativan 0.5 milligrams (mg) orally every six hours as needed times three days for withdrawal symptoms (tremors, shaking, and increased heart rate) and a urine toxicology screen. - On 5/7/14, directed no LOA-supervised or other. Also, the NP included an order for a WanderGuard to check placement every shift for elopement even though R37 had cut off the WanderGuard on 5/2/14, and refused to have a new one placed. A Clinical Summary dated 2/3/14, indicated "refer to chemical dependency counselor and pain psychologist." A prescription dated 2/3/14, ordered a behavioral health evaluation for diagnostic evaluation and treatment recommendations for R37. A Physician Visit/Progress Note written by a licensed drug and alcohol counselor (LADC) dated 2/13/14, indicated R37 had been referred for assessment of behavioral health, chemical dependency and pain, and included an order/comment of "strongly recommend a full psychiatric assessment" within 60 days to evaluate medications and therapy. The medical record lacked evidence of the psychiatric assessment having been completed. R37's care plan was reviewed and noted the following: - The vulnerable adult care plan revised on 3/5/14, indicated R37 may leave to go to medical	F 224

F 224	Continued From page 26 appointments without supervision but was not safe to go on other unsupervised LOAs. - The depression care plan dated 3/11/14, included ETOH abuse and directed to arrange psych services as needed. - A behavioral symptoms care plan revised on 3/16/14, indicated ETOH consumption and concealing ETOH in room with a goal to have fewer episodes of ETOH abuse per week. The interventions included; encourage attending Alcoholics Anonymous (AA) or other substance abuse support programs, assisting with arrangements as needed, may go to medical/dental appointments unsupervised and no other unsupervised LOA. - A risk for elopement related to ETOH abuse and psychoses care plan revised 3/16/14, noted a history of returning to facility after unsupervised LOA displaying signs of ETOH consumption and/or with a supply of ETOH. The goal included R37 would not to leave facility unattended unless a medical appointment and R37's safety will be maintained. The interventions indicated R37 cut off the WanderGuard and refused to have another one placed and was placed on 15 minute checks. Check room if suspected ETOH. - A Mood/Behavior care plan initiated on 4/23/14, indicated R37 had a history of ETOH abuse and actively drank at the facility. The care plan noted R37 was sent to detox on 4/23/14, due to being very intoxicated. The goal indicated R37 would like to stop drinking ETOH with an intervention to check room daily for ETOH and check R37 for signs of intoxication. - An at risk for adverse reaction from medications related to ETOH care plan dated 4/25/14, indicated NP was aware of R37's ETOH use, nursing staff to encourage to restrain from using ETOH and if R37 appeared intoxicated it was ok	F 224

to administer medications. Another intervention dated 5/8/14, included 1:1 supervision due to ETOH abuse and intoxication.

A Vulnerable Adult Assessment dated 3/16/14, indicated R37 had both past and recent substance abuse, was not safe for unsupervised LOA except to appointments and had significant ETOH use when out on unsupervised LOA.

The quarterly Minimum Data Set (MDS) dated 3/18/14, indicated R37's cognitive skills for daily decision making was independent with consistent/reasonable decisions.

A Resident Refusal of Medical Treatment Form dated 5/5/14, indicated R37 was "wander guarded [sic]" to the facility for resident safety related to history of ETOH abuse, staggering gait and slurred speech. With the risks of refusal noted as facility wouldn't be aware if R37 left with potential for fall risk and injury off facility grounds with no one to provide aid.

A letter dated 5/10/14, indicated the resident had received a first offense of the facility's smoking policy as R37 reported to staff he had gotten cigarettes from R9.

On 5/8/14, at 11:51 a.m. licensed practical nurse (LPN)-B stated she was aware R37 had a doctor's order and can drink as long as there are no behaviors and if behaviors occur she can call detox. LPN- B stated she did not know where R37 had obtained the ETOH from.

The safety monitor, NA-M was interviewed on 5/8/14, at 11:55 a.m. and stated he has not seen R37 exchange money for ETOH, and stated he

has heard about exchanges but could not remember who he'd heard about it from.

The HUC was interviewed on 5/8/14, at 12:15 p.m. and stated "it's a nightmare; [R37] is drunk every day." She stated she had her suspicions about where the ETOH was coming from but when she asked R37 he refused to tell her. The HUC said R37 had told her he had given his credit card to R117 to buy things for him. The HUC stated R37 was drunk every day when she left and was drunk when she came in on 5/8/14. She reported that on 5/5/14, or 5/6/14, she had observed R37 in the parking lot, and had been told there was nothing they could do about it by the facility administrator. She said she'd requested assistance from the operations director to get R37 back in the building. The HUC reported she had requested that the safety monitor put R37 on every 15 minute checks but knew that was not enough. She stated other residents were on 1:1 for drug use and wanted to know what the facility was going to do to keep R37 safe. The HUC stated "we're not doing [R37] any justice" and "it's a shitty plan to keep people on 1:1 forever."

On 5/10/14, at 1:30 p.m. the administrator stated R37 had been taken to the hospital for delirium tremens (DTs-a severe form of ETOH withdrawal that involves sudden and severe mental or nervous system changes).

On 5/12/14, at 8:59 a.m. registered nurse (RN)-B and licensed practical nurse (LPN)-A stated R37 had gone to the bank with a friend on 5/10/14, and were not sure if the 1:1 had gone to the bank or not and would have to check.

The DON was interviewed on 5/12/14, at 9:05 a.m. and stated a "guy named [friend-A]" who is a friend of R1 went with R37 to the bank. The DON stated both the administrator and the consultant administrator were aware that friend-A was a friend of R1. The DON stated the 1:1 had refused to go to the bank with R37 and that friend-A had signed R37 out. The DON said the consultant administrator had been going to go with R37 and friend-A to the bank until it was decided the facility was not comfortable with her going with to the bank either. The DON stated he had reminded R37 he could not go because he had orders for no LOA and the administrator, consultant administrator and the social worker decided R37 could go anyway. The DON stated he had no idea where R37 had gotten methadone from.

When interviewed on 5/12/14, at 1:35 p.m. contracted licensed social worker (CLSW)-A stated during a room search a quart bottle of ETOH and three plastic containers with the labels removed, which nursing indicated were methadone containers, had been found in R37's room.

When interviewed on 5/12/14, at 1:52 p.m. the administrator stated he and CLSW-A were involved in R37's LOA. The administrator stated CLSW-A was under the impression R37 was allowed to go on LOA and that R37 had returned with a card from Walgreens so they knew he had not followed his agreement to only go to the bank. The administrator stated friend-A would not be able to take R37 on LOA again. The administrator stated he was not aware R37 had orders for no LOAs and he believed CLSW-A had not checked the chart. The administrator stated he was also not aware of friend-A's relationship with R1 and

stated the DON had not told him about the order for no LOA and friend-A's relationship with R1.

Upon interview on 5/13/14, at 8:09 a.m. CLSW-A stated on 5/10/14, prior to R37 having left on LOA, she was told by nursing (she could not remember who) that R37 could leave the facility with supervision. She reported she made it clear to friend-A that R37 could only go to the bank and nowhere else. She stated she told friend-A that R37 would try and talk him into going to the liquor store and that she'd told friend-A that R37 could not go there. CLSW-A said friend-A had reassured her he had been sober for ten years and would never take R37 to a liquor store. The CLSW-A stated after R37 left, nursing (did not remember who) told her R37 had orders for no LOA and had informed her that friend-A was R1's drug dealer. CLSW-A stated it would have been nice to know the information before she had allowed R37 to go on a LOA. She stated she had not looked at R37's chart because she trusted nursing knew the correct information. She also stated R37 had been keeping ETOH under the edge of his mattress and she could not understand why nursing did not find the ETOH when they made the bed.

When interviewed on 5/13/14, at 2:20 p.m. the administrator was asked about the discrepancy between what the DON reported had happened on 5/10/14, and what the administrator stated had happened and he verified he was not aware R37 had an order for no LOAs and friend-A's relationship with R1 prior to R37 being allowed to leave on LOA.

R129 was identified by the facility to have a history of drug seeking and ETOH dependency. Although the facility had determined R129 required a 1:1 staff member since at least 3/18/14, according to a Vulnerable Adult (VA) assessment, the appropriate supervision was not implemented and/or effective.

According to review of the progress notes in R129's record, on 5/3/14, R129 had reported to the facility that she had obtained and consumed cocaine. The documentation indicated R129 had a staff assigned as a 1:1 at the time of the incident.
An Incident/Accident Report dated 5/3/14, at 11:00 p.m. indicated R129 "told the nurse that she took cocaine earlier during the shift." The note identified R129 to be "very sweaty, weak and tired" and "she looked very sleepy." The resident's pupils were "large and nonreactive to light." The note indicated the nurse asked R129 what she had taken and indicated R129 then "confessed" to having taken cocaine. The report documentation indicated R129 had been sent to the emergency room (ER) and included, "She said, 'I knowingly took cocaine'.. Resident has been sent to ER. She will continue to be on 1:1 when she returns to the nursing home." The report identified R129 had a history of drug use, "resident is on a 1:1...remains on a 1:1," and "Hx [history] drug seeking, receiving drugs from others."

A North Memorial Medical Center (NMMC) Emergency Department (ER/ED) note dated 5/3/14, identified R129 had reported she'd taken cocaine at the nursing home. The ER note indicated R129 had taken the cocaine to "help with the pain" in her abdomen. "Patient [R129] is

F 224	Continued From page 32	F 224		

triaged directly back to ED." The Clinician History of Present Illness section of the form identified R129 had reported to hospital staff she had snorted cocaine "5 hours ago."
On 5/11/14, at 4:00 a.m. the progress notes indicated R129 had obtained and consumed a life threatening amount of ETOH, causing her to require hospitalization in an intensive care unit (ICU) with subsequent intubation (mechanical ventilator assisted breathing) as a result of a blood ETOH level of 0.323. (According to Minnesota Statute 169A.20, 0.08 is considered impaired for driving). A 1:1 staff was supposed to have been in place at the time of the incident.

The resident's record included a note documented by the facility's HUC on 5/11/14, at 10:09 a.m. which indicated NMMC had called the facility "requesting" R129's medication administration records (MARs). The note indicated the registered nurse (RN) from the hospital had notified the HUC that R129 had been admitted to the ICU, and had been intubated "due to acute alcohol intoxication." The note indicated R129's toxicology screen was "negative for drugs but positive for alcohol with a level of 0.323."

The record also included a note documented by the director of nursing (DON) on 5/11/14, at 10:55 a.m. The DON's note recapitulated R129 had been sent to the hospital, identified the time of transport as "around 4 a.m." on the night shift, and identified R129 had been sent in "for intoxication." The DON's note indicated R129 had "become weak" and needed to be lowered to the floor." The note indicated two licensed practical nurses (LPNs) were contacted and the nursing assistant (NA) staff assigned to the 1:1 was called. The note indicated the NA assigned to

R129 "reported that resident has been in and out of [R14's room number] but that she had not noticed any exchange of alcohol. She also reported that resident [R14] was upset because the 1:1 has to be in his room too while resident [R129] is visiting." In addition, the DON's documentation indicated R14 had denied giving or knowing how R129 had obtained the ETOH, and documented R14 had "mentioned that resident had alcohol overnight."

An additional progress note, dated 5/11/14, at 2:49 p.m. had been written by the DON indicating NMMC had been contacted to request updates on R129's status. The note indicated, "I also requested to have the resident undergo a chemical dependency assessment to ensure that the resident can be transferred to a residential chemical dependency facility as appropriate, considering the resident's recent hospital trip to the hospital for snorting cocaine."

Additional record review revealed an admission MDS dated 2/1/14, that indicated R129 had a BIMS score of 15, indicating R129 was cognitively intact. The MDS identified R129 was independent with all ADLs. The MDS identified R129 rejected cares and wandered one to three days during the assessment period. R129's comprehensive assessment analysis (CAA) for mood state dated 2/7/14, identified R129 as having intact cognition, with poor decision making and as having diagnoses of "substance induced psychotic disorder, opiate dependence, and ETOH dependence." The CAA identified further diagnoses of hepatitis C, "Hx [history] of drug ETOH use" and depression. Although the CAAs identified R129 had a history of drug and ETOH dependence, the CAA lacked documentation of

F 224	Continued From page 34 interventions to promote sobriety while in the facility, such as but not limited to offering chemical dependency (CD) treatment. A Vulnerable Adult Assessment dated 3/18/14, identified R129 had a history of ETOH abuse and identified R129 had, "Ongoing drug-seeking & over medication with additional Rx [prescriptions]." R129 was identified as being susceptible to abuse "r/t [related to] substance use, varies" and required supervision with LOA from the facility. The assessment identified R129 had behaviors including a history of rummaging through others' belongings and "drug use." The assessment indicated R129 had been placed on 1:1 due to rummaging in other resident rooms. R129's care plan for safety/vulnerability dated 3/25/14, identified R129 was able to make her needs known, but was vulnerable due to her history of opioid abuse and drug seeking behavior. A care plan intervention dated as initiated 4/11/14, directed R129 required "1:1 supervision at all times to keep [R129] safe and prevent drug use" Additionally, the care plan directed, "1:1 to discuss CD concerns, encourage [R129] to consider going to a treatment facility." The care plan for mood/behavior dated 3/25/14, identified, "I have a history of opioid abuse and I exhibit drug seeking behavior as evidenced by attempting to see several different MD's to obtain prescription medication. I have a history of walking into other residents rooms and looking thru their personal belongings." Review of the undated Group 7 NA assignment sheets (forms carried by the NA staff for quick reference direction on the resident care plan) indicated R129 was continent, independent with ADLs and required a "1:1" which was spelled out in large	F 224

F 224	Continued From page 35 bold print. On 5/12/14, at 10:26 a.m. DON was interviewed about R129 having obtained ETOH and/or drugs while on a 1:1. The DON verified the 1:1 should have been within arm's length of R129 at all times. The DON denied having any knowledge of how R129 had obtained ETOH. On 5/13/14, at 2:21 p.m. the administrator stated during interview that the facility lacked a system to ensure residents on 1:1 were supervised to ensure they were not neglected. The administrator verified a thorough investigation regarding resident access to illegal drugs while R129 was on 1:1 should have been completed and documented thoroughly. The administrator verified 1:1 staffing was a short term solution and was not a viable long-term intervention to address R129's drug seeking and ETOH use. On 5/12/14, at 2:43 p.m. contracted licensed social worker (CLSW)-A stated, "I cannot imagine how a resident who was on 1:1 would get that much alcohol in her system and when I got here on Sunday I came to the office to open the computer to see what happened and guess what, there was no nursing notes. I went outside to the desk and told the administrator and director of nursing to get the nurse in to document and have the 1:1 fired. There are so many people here than I have seen on 1:1. For me 1:1 means the person needs to be somewhere else not at the nursing home." The Special Staffing - One to One Assignment policy dated as reviewed 5/2013, indicate 1:1 staffing may be assigned "under special circumstances," must be prior authorized by the	F 224

Director of Clinical Services (DCS) and "One to One staffing assignments are not permanent but rather in place based on assessed need until appropriate permanent alternative arrangements can be made." The reasons identified for the 1:1 staffing included threat of suicide, altered mentation that may "dislodge treatment lines and devices," escalating exit seeking behavior, altered cognition in an agitated state that "is not easily redirected" and "does not respect boundaries of other residents." The procedure directed to assess the resident, DON and administrator to agree 1:1 was necessary and consult DCS; instruct staff assigned to 1:1 the purpose of assignment, and directed to keep resident at "arm's length at all times." The procedure indicated if resident was not suicidal, privacy with toileting could be provided. The procedure directed to document the 1:1 assignment in the clinical record and revise the care plan.

The facility Drug and Alcohol Free Facility Care Environment-Camden Specific effective 5/11/14, directed:

"If staff have reasonable suspicion that a resident has used, has in their possession, or has distributed to other residents in the facility ETOH, street drugs, or other pharmacological substances not prescribed by treating physician the facility staff, under the direction of administration, shall:

· Search the residents room and remove such substances
· Notify the physician and obtain an order for blood and urine drug testing
· Notify the family and/or responsible party of the event

If the tests return positive the resident with the

If ETOH, street drugs, or pharmacologic substances are found not prescribed by a physician during a room search the resident will be immediately discharged for placing the population at risk for abuse. If the substances found during a room search are suspected of being illegal the police will be notified." The facility's Prohibition of Abuse, Neglect, Mistreatment, and Misappropriation of Resident Property policy reviewed January 2013, defined neglect as "The failure to provide goods or services necessary to avoid physical harm, mental anguish, or mental illness." Under item 6, the policy directed; "Supervisors will immediately intervene, correct, and report identified situations where abuse, neglect or misappropriation of resident property is at risk for occurring." The policy also included "Neglect means a failure to provide a vulnerable adult with necessary food, clothing, shelter, health care, or supervision." Appendix A of the policy included examples of neglect including: "Failure of a caregiver to provide a resident with (or the absence or likelihood of absence of) care or services (e.g. food, clothing, shelter, health care or supervision) which are reasonable and necessary to obtain or maintain the vulnerable adult's physical or mental health or safety." According to the record, R116 eloped from the facility on 5/11/14, at 9:30 a.m., 11:30 a.m. and 11:52 a.m. while wearing a WanderGuard device	F 224

F 224	Continued From page 38	F 224		

which had been implemented to prevent the resident's elopement.

Record review indicated R116 had been admitted to the facility on 1/20/14, with diagnoses of lung cancer with metastasis (cancer moving from one body organ to another) to the liver and the brain, metabolic encephalopathy (temporary or permanent damage to the brain that occurs when the liver cannot clear the toxins from the body), confusion and depression. The record also indicated R116 had Hospice services initiated on 1/21/14.

On 4/15/14, at 10:49 p.m. a nursing progress note indicated, "Pt [patient] is declining. He is very weak and needs a lot of assistance."

A progress note dated 5/5/14, indicated R116 had been outside with his son and the resident had experienced a fall. R116's son was present at fall. Hospice was notified of fall and a new wheelchair (W/C) was ordered for resident. Staff had also placed a WanderGuard on the resident's chair to alert staff when the resident wanted to go outside to maintain resident's safety. "Resident is allowed to go outside although staff needs to be alerted. Son is aware and in agreement with interventions. Nursing is to continue to monitor."

Additionally, a draft progress note dated 5/5/14, at 10:47 p.m. indicated R116 had increased confusion. "He requested going the bank to complete his transaction that he began earlier. He was leaning down to the floor to pick up of stuff which was apparently not there (visual hallucination). He was ambulating around getting out of w/c. Towards the end of shift he was on one to one rotation to prevent him from falling."

F 224	Continued From page 39	F 224		

A progress note dated 5/6/14, at 2:55 p.m. indicated R116 continued to sit at nursing station with staff due to attempts to self-transfer and unsteady gait.

R116 was observed on 5/11/14, at 9:30 a.m. to be on the sidewalk west of the facility. The health unit coordinator (HUC) was bringing R116 back into the building. The HUC stated she "had found him as she was driving into work." The HUC stated R116 had a WanderGuard on and she was surprised to find him walking outside since he was not able to walk every day. The HUC said she had called the facility and alerted them to the fact that R116 had left the facility and requested someone bring a wheelchair (w/c) to help bring him back to the facility. NA-R and safety monitor/NA-O had also come outside to look for R116. Two other NA's NA-P and NA-Q came outside with a w/c to meet R116 and return him to the facility.

On 5/11/14, at 10:38 a.m. a progress note indicated, "At 9:30 a.m. upon arrival to work this writer found R116 outside the facility walking down the sidewalk. When approached he stated 'I am going to visit a friend.' R116 currently has a WanderGuard and due to cognitive impairments is unable to leave the facility unattended. He was verbally resistant to returning to the building but was eventually returned with staff assist of three. Note resident left out a fire exit at the end of the hall. Staff was in route to locate whom ever had exited the building, the DON, administration, and social worker (SW) updated."

R116's progress notes from 5/11/14, at 11:52 a.m. included: "Fire exit alarm again sounded at

the end of the hallway. Staff immediately responded and found R116 outside. He again stated that he was going to visit a friend. This time he was verbally and physically resistant to returning to the building. Three staff were able to convince him to return in a w/c (wheelchair) due to unsteady/weak gait. DON, SW, and charge nurse notified. Call placed to son who was updated and encouraged to visit and offer support to R116 if able. Son voiced that he understands that this confusion and resistance is likely a direct result of the Cancer. Support provided via phone."

Additional Progress Notes dated 5/11/14, at 4:27 p.m. included, "At 0930 AM resident went out the fire exit and was walking down sidewalk. Staff intervened and resident was brought into facility. Resident stated he was going to visit a friend. At 11:30 [a.m.] resident left out another exit. Staff was with resident and brought resident into facility. Hospice, family and administration were notified. Resident's WanderGuard (departure alert system) was in place and functioning. Resident also placed on 15 minute checks. Hospice updated on increased confusion along with family. Family was here to visit resident."

The facility's HUC was interviewed on 5/12/14, at 10:00 a.m. and at that time the HUC verified R116 had eloped from the facility three times on 5/11/14. The HUC stated R116 had left the building without staff present at 9:30 a.m., 11:30 a.m. and 11:52 a.m.

Although the HUC verified the resident had eloped without staff presence, R116's Progress Notes had indicated staff were with the resident at 11:30 a.m.

F 224	Continued From page 41 On 5/11/14, at 10:07 a.m. the administrator was interviewed and stated the day staff, afternoon staff, and night staff had been educated on the immediate jeopardy for drugs and ETOH and elopement and he could not believe the fact that R116 had gone out the back door, and was able to leave the facility. The administrator stated the investigation so far, was that staff heard the back door open, went and looked but had not seen anyone, so they assumed it was staff. The administrator verified that there was no WanderGuard alarm on the back door. On 5/12/14, at 11:00 a.m. surveyors tested the key pad coded door which was locked, but noted that staff unlock the door and enter without regard to which residents are nearby. On 5/13/14, at 1:00 p.m. the consultant administrator stated the facility had checked the key pad coded door to the access hallway to the back exit, which was functional and also there was a WanderGuard system in place on the back door, which was functional, the facility had tested the doors and were not able to determine how the resident had gotten out of the facility by the back door. The facility Elopement policy dated 5/12, indicated... If exit seeking behavior is identified the licensed nurse immediately implements interventions to manage exit seeking behaviors. These interventions may include a personal security device such as a WanderGuard, or diversion activities. The interventions are documented on the care plan and the nursing assistance care plan. ...If the resident is not located within 30 minutes, the Administrator or	F 224

F 224	Continued From page 42 designee notifies the law enforcement officials, the corporate compliance officer and corporate director of clinical services. When the resident returned to the facility a physical assessment would be done, a thorough investigation of the event would be completed by the DON or designee. A factual account of the occurrence would be documented in the medical record, and the care plan would be reviewed and revised. The administrator of designee reports the event to the appropriate state agency (SA). On 5/7/14, at 10:02 a.m. the ombudsman was interviewed. The ombudsman stated she wanted to be sure the state agency surveyors were aware that resident's of the facility were purchasing ETOH and drugs. The ombudsman reported she believed residents were giving other residents money and credit cards to go out and purchase things for them. She reported a resident with chemical dependency problems had been drinking, room checks were being completed and staff were finding ETOH bottles. In addition the ombudsman reported R37 had been found intoxicated several times and she was involved in discussing abuse prevention planning and the effects of ETOH on R37's medications. She reported the physician was encouraging discharge planning to a facility that allowed drinking. She also indicated a number of residents were accessing illegal drugs at the facility. The ombudsman reported she had been at the facility on 5/6/14, to discuss the concerns. The ombudsman stated the police had been notified and had been to the facility "quite often". She also stated she was aware R129 was on a 1:1 and had somehow obtained and consumed an "illegal drug [cocaine]" in the facility.	F 224

{F 225}	Continued From page 45 R129: An Incident/Accident Report dated 5/3/14, at 11:00 p.m. indicated R129 had "told the nurse that she took cocaine earlier during the shift." The report described R129 as "very sweaty, weak and tired" and "looked very sleepy." R129's pupils were described as "large and nonreactive to light." The report also indicated the nurse had asked R129 what she'd taken and R129 had "confessed" to having taken cocaine. The form indicated the resident was sent to the emergency room, "She said, 'I knowingly took cocaine...Resident has been sent to ER [emergency room]. She will continue to be on 1:1 [one to one, in arms reach at all times] when she returns to the nursing home." The report identified R129 had a history of drug use, "resident is on a 1:1," "remains on a 1:1," and "Hx [history] drug seeking, receiving drugs from others." The form was signed by the director of nursing (DON) and dated as 5/5/14. The clinical record lacked evidence the administrator and SA were immediately notified, and lacked evidence the incident had been thoroughly investigated. R37: An Incident/Accident Report dated 5/5/14, at 5:00 p.m. indicated R37 had reported "4 staff members were in his room today" and "a female staff person came out of bathroom & grabbed his arms, causing reddish purplish areas on bilateral [upward pointing arrow] extremities." The report indicated R37 had refused vitals, had a reddish/purple mark on the left superior (upper arm) measuring 2.5 cm (centimeters) x 2.0 cm, a mark on the left inferior (lower arm) 5.75 cm x 2.25 cm., a mark on the right superior/forearm, 6 cm x 8 cm, and on the right hand measuring 4 cm x 3 cm. The report indicated the physician had been notified on 5/5/14, at 5:30 p.m. The form	{F 225}

{F 225}	Continued From page 46 also indicated after R37 had reported after he had been grabbed by staff, he had "then told writer that he jumped off roof." The documentation on the form included, "Resident has slurred speech, staggering gait, & smelled of alcohol." The form indicated the "allegations unsubstantiated." "Resident encouraged to tell a nurse if situation happens again right away. Resident appears intoxicated, with an inconsistent story. Reddened areas appear that they have scratches & chaffing on them." Although R37 made an allegation of abuse, the clinical record lacked evidence the administrator or SA had been immediately notified. And although the report identified R37 had changed the story and identified evidence of potential intoxication, the clinical record lacked documented evidence the allegation had been thoroughly investigated. The report identified R37 was potentially intoxicated, however the clinical record lacked evidence of any screening to determine whether R37 had received alcohol (ETOH). R116 had eloped and the facility did not report to the administrator or SA in a timely manner. R116 was observed on 5/11/14, at 9:30 a.m. to be on the sidewalk west of the facility. The health unit coordinator (HUC) was bringing R116 back into the building. The HUC stated she "had found him as she was driving into work." The HUC stated R116 had a WanderGuard on and she was surprised to find him walking outside since he was not able to walk every day. The HUC said she had called the facility and alerted them to the fact that R116 had left the facility and requested someone bring a wheelchair (w/c) to help bring him back to the facility. NA-R and safety monitor/NA-O had also come outside to look for	{F 225}

{F 225}	Continued From page 47 R116. Two other NA's NA-P and NA-Q came outside with a w/c to meet R116 and return him to the facility. On 5/11/14, at 10:38 a.m. a progress note indicated, "At 9:30 a.m. upon arrival to work this writer found R116 outside the facility walking down the sidewalk. When approached he stated 'I am going to visit a friend.' R116 currently has a WanderGuard and due to cognitive impairments is unable to leave the facility unattended. He was verbally resistant to returning to the building but was eventually returned with staff assist of three. Note resident left out a fire exit at the end of the hall. Staff was in route to locate whom ever had exited the building, the DON, administration, and social worker (SW) updated." R116's progress notes from 5/11/14, at 11:52 a.m. included: "Fire exit alarm again sounded at the end of the hallway. Staff immediately responded and found R116 outside. He again stated that he was going to visit a friend. This time he was verbally and physically resistant to returning to the building. Three staff were able to convince him to return in a w/c (wheelchair) due to unsteady/weak gait. DON, SW, and charge nurse notified. Call placed to son who was updated and encouraged to visit and offer support to R116 if able. Son voiced that he understands that this confusion and resistance is likely a direct result of the Cancer. Support provided via phone." Additional Progress Notes dated 5/11/14, at 4:27 p.m. included, "At 0930 AM resident went out the fire exit and was walking down sidewalk. Staff intervened and resident was brought into facility.	{F 225}

{F 225}	Continued From page 48 Resident stated he was going to visit a friend. At 11:30 [a.m.] resident left out another exit. Staff was with resident and brought resident into facility. Hospice, family and administration were notified. Resident's WanderGuard (departure alert system) was in place and functioning. Resident also placed on 15 minute checks. Hospice updated on increased confusion along with family. Family was here to visit resident." The facility's HUC was interviewed on 5/12/14, at 10:00 a.m. and at that time the HUC verified R116 had eloped from the facility three times on 5/11/14. The HUC stated R116 had left the building without staff present at 9:30 a.m., 11:30 a.m. and 11:52 a.m. Although the HUC verified the resident had eloped without staff presence, R116's Progress Notes had indicated staff were with the resident at 11:30 a.m. On 5/12/14, at 10:14 a.m. (more than 24 hours after the first elopement) the DON was interviewed. The DON stated he had not reported R116's elopement because his understanding was that he had 24 hours to report. The DON stated he had wanted to investigate the issue and speak to the administrator, and was still working on the report. The DON verified he was not aware of the Federal regulations which included immediate reporting. The DON verified he was not aware that a resident who exited the building unsupervised while wearing a WanderGuard, without staff knowledge, could constitute elopement and potential neglect of care. On 5/12/14, at approximately 11:30 a.m. a report was made to the Office of Health Facility	{F 225}

{F 225}	Continued From page 49 Complaints (OHFC) regarding the 9:30 a.m. elopement on 5/11/14. No reports were made to the SA for the additional elopements at 11:30 a.m. and 11:52 a.m. R41: An Incident/Accident Report for R41 dated 5/1/14, at 3:05 p.m. indicated R41 had returned from a leave of absence and "apparently drove off curb [in a motorized wheelchair]." The report indicated R41 was found lying on the pavement on his right side. R41 was identified to have slurred speech, but identified he was alert and oriented. The report indicated R41 had sustained a laceration on his forehead and had complained of arm pain. The report also indicated 9-1-1 had been called and R41 had been transferred to North Memorial hospital. Documentation on the Incident/Accident report indicated R41 had stated he had been drinking alcohol and his "last drink [was] about 5 min (minutes) ago.'" "Requested order for no unsupervised LOA's [leave of absence] from physician." R41 was identified to not be wearing a seat belt in the wheelchair. The clinical record lacked evidence the administrator and SA were immediately notified of the incident which required medical attention. The clinical record also lacked evidence the incident had been thoroughly investigated. R70: An Incident/Accident Report for R70 dated 4/28/14, at 6:30 a.m. indicated R70's right arm had been pulled on when staff had helped R70 get up from a sitting position. R70 had subsequently complained of pain and an ice pack had been applied. The report indicated no swelling was observed and R70 was able to move the right arm, but had slight pain. The report also included, "Resident hurt self during cares" and indicated occupational therapy orders had been	{F 225}

obtained for activities of daily living (ADLs) and pain. The incident lacked identification of potential problems with transfer assistance and did not indicate whether staff may have been transferring the resident incorrectly or whether the plan of care had been followed in order to rule out neglect of care. The clinical record lacked evidence the administrator and SA were immediately notified of the incident, and lacked evidence the incident had been thoroughly investigated to rule out potential neglect.

R13: A nursing progress note for R13 written by administration on 5/8/14, at 9:04 a.m. included, "Report received that the resident attempted to leave the facility on Tuesday May 6 around 4 p.m. trying to get to her son, resident was found by the receptionist on the sidewalk, redirected back into the facility. Resident has her WanderGuard on. Receptionist [O-C] reported that the she reminded the resident that resident cannot leave the facility unsupervised; receptionist was educated that when residents with WanderGuard would like to get out of the building to smoke, the smoke monitor should be alerted. Son and daughter notified.

On 5/8/14, at 12:44 p.m. the administrator was interviewed and stated he had not been notified of R13's alleged elopement 5/6/14 until Tuesday "the next morning." The administrator stated he was unclear why it had not been reported to him until then.

A SA report form dated 5/8/14 (no time documented on report) included, "Report received that the resident attempted to leave the facility on Tuesday May 6 around 4 p.m. trying to get to her son, resident was found by the

{F 225}	Continued From page 51 receptionist on the sidewalk." The clinical record lacked evidence R13's elopement was clearly documented, including date, time, location, and those involved. The clinical record lacked evidence R13 was evaluated for elopement risks after having eloped. The clinical record also lacked evidence the administrator or SA had been immediately informed of the incident, or that the elopement was thoroughly investigated, including interview with staff present at the time of the elopement. R14: A Minnesota Department of Health OHFC (office of health facility complaints) report form dated 5/4/14, identified R129 had "handed popcorn [a slang name for a drug identified also as weed] that is wrapped in tissue paper to R14." R14 was asked to hand it back but refused. R14 was observed to put something in his mouth and swallowed. The report indicated, "Suspected that the item is not anything that is edible." The physician was notified, and R14 was ordered to go to the emergency room (ER), 9-1-1 was called and the police arrived. R14 was taken to North Memorial Hospital. Although the report indicated the SA had been notified, the clinical record lacked evidence the administrator was immediately notified, and the report form lacked documentation of the date, time and location of the incident. R66: An OHFC report form indicated a report had been submitted regarding R66 on 4/30/14. The report indicated a NA was given a hand written letter from R66 that indicated the resident would not give the NA "$500" unless the NA could prove "that she [the NA] is being stalked [the NA had alleged she was being stalked and had asked	{F 225}

{F 225}	Continued From page 52 R66 for money]." The DON had documented that the nursing assistant (NA) had denied taking or asking for money, but had admitted she was being stalked and had stated all staff knew it "including the residents." Although this alleged incident of potential financial exploitation had occurred on 4/28/14, it had not been reported to the SA until 4/30/14. In addition, the clinical record lacked evidence the administrator had been immediately notified. On 5/9/14, at 1:43 p.m. the licensed practical nurse (LPN) manager-E stated the administrator should be immediately notified of all incidents in the facility and stated when the new incident report form was implemented, the new form did not include identification of when the administrator or SA was notified. On 5/13/14, at 2:21 p.m. the administrator verified he had not been immediately notified of the above incidents and stated the DON was developing a "log" to keep track of when he was notified. The administrator stated he'd thought the SA had been immediately notified. The facility's policy, Prohibition of Abuse, Neglect, Mistreatment, and Misappropriation of Resident Property dated as reviewed 1/2013, included: "Each resident has the right to be free from mistreatment, neglect, abuse, involuntary seclusion and misappropriation of property. Videll Healthcare, LLC facilities have zero--tolerance for abuse, neglect, mistreatment, and/or misappropriation of resident property. Staff must not permit anyone to engage in verbal, mental, sexual, or physical abuse, neglect, mistreatment, or misappropriation of resident property. interviewed and stated he had not been notified of R13's alleged elopement 5/6/14 until Tuesday "the next morning." The administrator stated he was unclear why it had not been reported to him until then.

A SA report form dated 5/8/14 (no time documented on report) included, "Report received that the resident attempted to leave the facility on Tuesday May 6 around 4 p.m. trying to get to her son, resident was found by the receptionist on the sidewalk."

The clinical record lacked evidence R13's elopement was clearly documented, including date, time, location, and those involved. The clinical record lacked evidence R13 was evaluated for elopement risks after having eloped. The clinical record also lacked evidence the administrator or SA had been immediately informed of the incident, or that the elopement was thoroughly investigated, including interview with staff present at the time of the elopement.

On 5/9/14, at 1:43 p.m. LPN-E stated the administrator should be immediately notified of all incidents in the facility and stated when the new incident report form was implemented, the form did not identify when the administrator or SA was notified.

On 5/12/14, at 10:26 a.m. director of nursing (DON) stated he was not in the facility at the time of R13's elopement and had not been informed until 5/8/14. The DON explained the incident was not reported to the administrator or SA because he was not at the facility. DON was unclear who was assigned to report in his absence. DON confirmed R13 should not have left the facility

unescorted and stated residents with a WanderGuard were at risk for elopement and leaving the facility without supervision was a safety concern. The DON also verified the incident had not been thoroughly investigated.

R41: An Incident/Accident Report for R41 dated 5/1/14, at 3:05 p.m. indicated R41 had returned from a leave of absence and "apparently drove off curb [in a motorized wheelchair]." The report indicated R41 was found lying on the pavement on his right side. R41 was identified to have slurred speech, but identified he was alert and oriented. The report indicated R41 had sustained a laceration on his forehead and had complained of arm pain. The report also indicated 9-1-1 had been called and R41 had been transferred to North Memorial hospital. Documentation on the Incident/Accident report indicated R41 had stated he had been drinking alcohol and his "last drink [was] about 5 min (minutes) ago."' "Requested order for no unsupervised LOA's [leave of absence] from physician." R41 was identified to not be wearing a seat belt in the wheelchair. The clinical record lacked evidence the administrator and SA were immediately notified of the incident which required medical attention. The clinical record also lacked evidence the incident had been thoroughly investigated.

R70: An Incident/Accident Report for R70 dated 4/28/14, at 6:30 a.m. indicated R70's right arm had been pulled on when staff had helped R70 get up from a sitting position. R70 had subsequently complained of pain and an ice pack had been applied. The report indicated no swelling was observed and R70 was able to move the right arm, but had slight pain. The report also included, "Resident hurt self during cares" and

indicated occupational therapy orders had been obtained for activities of daily living (ADLs) and pain. The incident lacked identification of potential problems with transfer assistance and did not indicate whether staff may have been transferring the resident incorrectly or whether the plan of care had been followed in order to rule out neglect of care. The clinical record lacked evidence the administrator and SA were immediately notified of the incident, and lacked evidence the incident had been thoroughly investigated to rule out potential neglect.

R14: A Minnesota Department of Health OHFC (office of health facility complaints) report form dated 5/4/14, identified R129 had "handed popcorn [a slang name for a drug identified also as weed] that is wrapped in tissue paper to R14." R14 was asked to hand it back but refused. R14 was observed to put something in his mouth and swallowed. The report indicated, "Suspected that the item is not anything that is edible." The physician was notified, and R14 was ordered to go to the emergency room (ER), 9-1-1 was called and the police arrived. R14 was taken to North Memorial Hospital. Although the report indicated the SA had been notified, the clinical record lacked evidence the administrator was immediately notified, and the report form lacked documentation of the date, time and location of the incident.

R66: An OHFC report form indicated a report had been submitted regarding R66 on 4/30/14. The report indicated a NA was given a hand written letter from R66 that indicated the resident would not give the NA "$500" unless the NA could prove "that she [the NA] is being stalked [the NA had alleged she was being stalked and had asked

{F 226}	Continued From page 61 R66 for money]." The DON had documented that the nursing assistant (NA) had denied taking or asking for money, but had admitted she was being stalked and had stated all staff knew it "including the residents." Although this alleged incident of potential financial exploitation had occurred on 4/28/14, it had not been reported to the SA until 4/30/14. In addition, the clinical record lacked evidence the administrator had been immediately notified. On 5/9/14, at 1:43 p.m. the licensed practical nurse (LPN) manager-E stated the administrator should be immediately notified of all incidents in the facility and stated when the new incident report form was implemented, the new form did not include identification of when the administrator or SA was notified. R116 had eloped and the facility did not report to the administrator or SA in a timely manner. R116 was observed on 5/11/14, at 9:30 a.m. to be on the sidewalk west of the facility. The health unit coordinator (HUC) was bringing R116 back into the building. The HUC stated she "had found him as she was driving into work." The HUC stated R116 had a WanderGuard on and she was surprised to find him walking outside since he was not able to walk every day. The HUC said she had called the facility and alerted them to the fact that R116 had left the facility and requested someone bring a wheelchair (w/c) to help bring him back to the facility. NA-R and safety monitor/NA-O had also come outside to look for R116. Two other NA's NA-P and NA-Q came outside with a w/c to meet R116 and return him to the facility.	{F 226}

{F 226}	Continued From page 62	{F 226}		

On 5/11/14, at 10:38 a.m. a progress note indicated, "At 9:30 a.m. upon arrival to work this writer found R116 outside the facility walking down the sidewalk. When approached he stated 'I am going to visit a friend.' R116 currently has a WanderGuard and due to cognitive impairments is unable to leave the facility unattended. He was verbally resistant to returning to the building but was eventually returned with staff assist of three. Note resident left out a fire exit at the end of the hall. Staff was in route to locate whom ever had exited the building, the DON, administration, and social worker (SW) updated."

R116's progress notes from 5/11/14, at 11:52 a.m. included: "Fire exit alarm again sounded at the end of the hallway. Staff immediately responded and found R116 outside. He again stated that he was going to visit a friend. This time he was verbally and physically resistant to returning to the building. Three staff were able to convince him to return in a w/c (wheelchair) due to unsteady/weak gait. DON, SW, and charge nurse notified. Call placed to son who was updated and encouraged to visit and offer support to R116 if able. Son voiced that he understands that this confusion and resistance is likely a direct result of the Cancer. Support provided via phone."

Additional Progress Notes dated 5/11/14, at 4:27 p.m. included, "At 0930 AM resident went out the fire exit and was walking down sidewalk. Staff intervened and resident was brought into facility. Resident stated he was going to visit a friend. At 11:30 [a.m.] resident left out another exit. Staff was with resident and brought resident into facility. Hospice, family and administration were

{F 226}	Continued From page 63 notified. Resident's WanderGuard (departure alert system) was in place and functioning. Resident also placed on 15 minute checks. Hospice updated on increased confusion along with family. Family was here to visit resident." The facility's HUC was interviewed on 5/12/14, at 10:00 a.m. and at that time the HUC verified R116 had eloped from the facility three times on 5/11/14. The HUC stated R116 had left the building without staff present at 9:30 a.m., 11:30 a.m. and 11:52 a.m. Although the HUC verified the resident had eloped without staff presence, R116's Progress Notes had indicated staff were with the resident at 11:30 a.m. On 5/12/14, at 10:14 a.m. (more than 24 hours after the first elopement) the DON was interviewed. The DON stated he had not reported R116's elopement because his understanding was that he had 24 hours to report. The DON stated he had wanted to investigate the issue and speak to the administrator, and was still working on the report. The DON verified he was not aware of the Federal regulations which included immediate reporting. The DON verified he was not aware that a resident who exited the building unsupervised while wearing a WanderGuard, without staff knowledge, could constitute elopement and potential neglect of care. On 5/12/14, at approximately 11:30 a.m. a report was made to the Office of Health Facility Complaints (OHFC) regarding the 9:30 a.m. elopement on 5/11/14. No reports were made to the SA for the additional elopements at 11:30 a.m. and 11:52 a.m.	{F 226}

{F 226}	Continued From page 64 On 5/13/14, at 2:21 p.m. the administrator verified he had not been immediately notified of the above incidents and stated the DON was developing a "log" to keep track of when he was notified. The administrator stated he'd thought the SA had been immediately notified. EMPLOYEE SCREENING: On 5/12/14, at 10:00 a.m. the employee files were reviewed and the following was observed: Licensure verification: Licensed practical nurse (LPN)-A's employee file folder lacked verification of the LPN's license. The administrator verified at 12:45 p.m. there had been no proof of nursing licensure obtained for LPN-A from the Minnesota Board of Nursing. Registered nurse (RN)-C's employee personnel file indicated RN-c had been hired on 4/8/14, and that a back ground study request had been submitted on 4/8/14, however there were no results yet. In addition, no licensure verification completed, only a copy of a license with expiration of 10/4/13. Background study: RN-D's file indicated RN-D had been hired 4/16/14, and that a background Study Request had been submitted on 4/14/14. However, the background study incorrectly indicated NA-U's background study information. Nursing assistant (NA)-U's file was reviewed and was found to include a statement that NA-U had a Minnesota Department of Human Services Background Study (MN DHS BS) form dated 5/25/14, which indicated NA-U "cannot provide	{F 226}

{F 226}	Continued From page 65	{F 226}		

Qualified Professional or Personal Care Assistance services in the personal care program under Minnesota Health Care Programs." The administrator verified that NA-U could not provide care but had been providing care unsupervised, from 4/23/14, through 5/12/14.

NA-U had RN-D's BS in NA-U's employee file. Also, RN-D's BS was in NA-U's employee folder. RN-D's BS indicated that RN-D could not perform cares unsupervised. However, during the survey the administrator obtained the blue BS form which indicated RN-D could perform cares unsupervised.

NA-Q was hired on 3/6/14. The facility received a yellow MN DHS BS on 3/10/14, which indicated NA-Q "cannot provide Qualified Professional or Personal Care Assistance services in the personal care program under Minnesota Health Care Programs." The white BS computer genreated copy request indicated the form was submitted on 3/6/14, and passed as of 3/10/14, however the employee file lacked the information as the facility provided the information during survey. The facility did not have system in place to ensure BS were being monitored for the employees ability to work unsupervised.

Reference checks:
RN-C was hired on 4/8/14, and no reference checks had been completed.

RN-D was hired 4/16/14, and no reference checks, could be located in the employee file.

LPN-A's file lacked a hire date and no reference checks were completed as the facility policy had

{F 226}	Continued From page 66 directed staff to complete. NA-W hired 4/23/14, had no reference check completed. On 5/12/14, at 12:35 p.m. the administrator stated the human resources (HR) person was in charge of doing license verifications and background checks for new employees. The administrator further stated the HR person had been terminated two weeks ago and no one else had been designated to follow-up on background checks that had been flagged. The administrator acknowledged the facility had not ensured tracking for new employees' license verification and background checks. On 5/13/14, at 8:10 a.m. NA-U verified during interview that she was a NA and had started orientation on 4/23/14. When asked if she worked under supervision, NA-U stated she had received "a couple of days training" and had started working on her own on 4/28/14. On 5/13/14, at 9:00 a.m. LPN-A verified her start date was 4/2/14. LPN-A stated her days were "sporadic" for a few weeks, but stated she had been working full time on her own since 4/16/14.	{F 226}		
{F 250} SS=H	483.15(g)(1) PROVISION OF MEDICALLY RELATED SOCIAL SERVICE The facility must provide medically-related social services to attain or maintain the highest practicable physical, mental, and psychosocial well-being of each resident.	{F 250}		7/6/14

{F 250}	Continued From page 67 This REQUIREMENT is not met as evidenced by: Based on observation, interview and document review, the facility failed to aggressively identify, assess, determine interventions and implement the interventions for medically-related social services, and pursue the provision of these services for residents known to provide and use illegal drugs and alcohol in the facility for 4 of 11 residents (R129, R86, R41, R37) who sustained harm due to lack of social services interventions; for 5 of 11 residents (R14, R56, R117, R62, R9) for alleged substance abuse, and for 2 of 11 residents (R13, R103) who allegedly eloped from the facility. Findings include: Alleged substance abuse: On 5/8/14, at 8:02 a.m. a list of residents allegedly bringing drugs and alcohol (ETOH) into the facility, as well as a list of residents known to use drugs or alcohol in the facility was requested. A list provided by the administrator at 11:00 a.m. included R129, R86, R41, R37, R14, R56, R117, R62 and R9 as alleged substance users. R129 was not provided consistent medically related social services to address ongoing drug seeking behaviors and sustained harm. Although R129 was assigned a one to one (1:1) as of 3/14, the clinical record lacked evidence of social service assessment and interventions. On 5/3/14, R129 reported to facility staff, that she had obtained and consumed cocaine while under 1:1 supervision. On 5/11/14, at 4:00 a.m. R129 had obtained and consumed ETOH while supervised 1:1 by facility staff. This resulted in harm when R129 required hospitalization in an intensive care	{F 250}

{F 250}	Continued From page 68 unit (ICU) where she was intubated (mechanical ventilator assisted breathing) for a blood ETOH level of 0.323. R129's admission Minimum Data Set (MDS) dated 2/1/14, revealed a Brief Interview of Mental Status (BIMS--a tool to determine cognitive status) score of 15, indicating the resident was cognitively intact. In addition, it was noted R129 was independent with all activities of daily living (ADLs), rejected cares, and wandered 1-3 days during the assessment period. R129's Care Area Assessment (CAA) for mood state dated 2/7/14, identified R129 displayed poor judgment, and had impaired cognition and poor decision making skills. The CAA identified diagnoses including "substance induced psychotic disorder, opiate dependence, and alcohol dependence," as well as hepatitis C, "Hx [history] of drug alcohol use" and depression. Although the history of drug and ETOH dependence was identified, the CAAs lacked documentation of interventions to promote sobriety, such as but not limited to offering chemical dependency (CD) treatment. The Vulnerable Adult Assessment (VAA) dated 3/18/14, identified R129 had a history of ETOH abuse and "Ongoing drug-seeking & over medication with additional Rx [prescriptions]." R129 was identified as being susceptible to abuse related to substance use and required supervision with leaves of absence (LOAs) from the facility. It was noted R129 had a history of rummaging through others belongings and "drug use," and 1:1 staffing was initiated due to rummaging in other resident rooms. R129's Smoking Evaluation dated 3/18/14, directed staff to "monitor for ETOH use or over	{F 250}

{F 250}	Continued From page 69 sedation." A Pain Evaluation and Management Plan dated 5/1/14, identified R129 had daily chronic pain, and a history of pain and seeking drugs. "Resident is on a restricted recipient program [where only one pharmacy may fill narcotic prescriptions to deter drug seeking behavior] due to drug seeking...MD [medical doctor] is aware of drug seeking behaviors and aware pain is not controlled. MD will not order any more pain medications for resident due to her drug seeking behaviors. Resident is on the restricted recipient program due to drug seeking." An Incident/Accident Report dated 5/3/14, at 11:00 p.m. indicated R129 "told the nurse that she took cocaine earlier during the shift." R129 was described as "very sweaty, weak and tired...she looked very sleepy," and pupils were "large and nonreactive to light." When the nurse asked the resident what she'd taken, she "confessed" to taking cocaine. The report noted, "She said, 'I knowingly took cocaine'...Resident has been sent to ER [emergency room]. She will continue to be on 1:1 when she returns to the nursing home." The resident's history of drug use and receipt of drugs from others was noted, as well as the fact that the resident had current 1:1 staffing. Although the incident occurred on 5/3/14, the form was signed by the director of nursing (DON) on 5/5/14. An Emergency Department Chart [from the hospital ER] dated 5/3/14, identified R129 reported to have taken cocaine while residing at the facility to "help with the pain" in her abdomen. "Patient [R129] is triaged directly back to ED [emergency department]." The Clinician History of	{F 250}

{F 250}	Continued From page 70	{F 250}		

Present Illness section of the form identified R129 reported to hospital staff she snorted cocaine '"5 hours ago."' Although R129 was identified as requiring the ER for a potential drug overdose, the Emergency Department Chart did not address the cocaine use, only pain. The laboratory (lab) reports indicated various pertinent lab values were checked, but lacked a toxicity screening for cocaine, drug or alcohol use. R129 was given two doses of Dilaudid (narcotic pain medication) and returned to the facility at 6:00 a.m. with no new orders. The clinical record lacked evidence the administrator, or the designated State agency (SA) were notified of the incident. The clinical record lacked evidence of new interventions to address R129's report of drug use, such as CD treatment. In addition, the clinical record lacked evidence the use of cocaine by R129 was investigated to determine how the drug had been obtained while the resident had 1:1 staff supervision.

A unlabeled typed page insert in the front of R129's paper chart dated 4/15/14, read "If Res [resident] goes to the Hospital for any reason she is to go to St. Joes [sic] Hospital Only per primary care MD and the MN [Minnesota] restricted recipient program...All scripts [prescriptions] no matter where they come from must be approved by [MD's name] or their on call MD."

On 5/7/14, at 10:24 a.m. the a return call was made to the ombudsman who had requested contact. The ombudsman stated she had been informed by a nurse of the facility of "drug use" and "drugs shared with residents" at the facility "a couple days ago." The ombudsman stated rather than call the nurse back, she visited the facility on 5/6/14, and spoke with various residents as well

{F 250}	Continued From page 71 as management staff regarding drug, alcohol and discharge planning concerns. The ombudsman, facility staff, and residents were "suspicious residents may be giving money or credit cards to another [resident] to go out and purchase things [cigarettes, alcohol and drugs] for them." The ombudsman stated the police had been notified and responded "quite often." Allegedly residents who were chemically dependent were drinking in their rooms and facility staff were conducting room checks each shift and "finding empty alcohol [vodka] bottles" in resident rooms, and residents had been found "intoxicated." The ombudsman specifically reported R129 had 1:1 staffing, yet had "somehow" obtained and consumed an illegal drug (cocaine). Although the facility had employed "three temporary social workers, social services is overwhelmed" due to "no policies and procedures in place." R129's care plan for safety/vulnerability dated 3/25/14, identified the resident was able to make her needs known, but was vulnerable due to her history of opioid abuse and drug seeking behavior. A care plan intervention dated 4/11/14, directed staff to provide "1:1 supervision at all times to keep [R129] safe and prevent drug use" Additionally, the care plan directed, "1:1 to discuss CD concerns, encourage [R129] to consider going to a treatment facility." The care plan for mood/behavior dated 3/25/14, identified, "I have a history of opioid abuse and I exhibit drug seeking behavior as evidenced by attempting to see several different MD's to obtain prescription medication. I have a history of walking into other residents rooms and looking thru [sic] their personal belongings." Review of the undated Group 7 nursing assistant	{F 250}

{F 250}	Continued From page 72 (NA) assignment sheet (for quick reference guide providing care-related direction) indicated R129 was independent with ADLs and "1:1" was noted in larger bold print. Pertinent Nursing Progress Notes read as follows: 1) On 3/14/14, at 6:18 p.m. R129 "had an appointment yesterday and was immediately transferred to the hospital...while on the way home [unclear on prior destination] stopped at Cub foods" and picked up a prescription for eight tablets of Norco 5/325 milligrams (mg) (a narcotic and Tylenol pain medication)...failed to alert staff and stated that there were no new orders." The hospital, on call MD and triage nurse were updated on R129's "history of narcotic use." 2) On 3/16/14, at 6:34 a.m. R129 was "caught going through another resident's belonging...opening her purse." The note indicated R129 admitted going in the room but denied taking "any money." 3) On 3/17/14, at 3:34 p.m. "Resident still remains on 1:1 observation." Although the note identified R129 was assigned a 1:1 staff, the record lacked documentation when the 1:1 staffing was initiated. At 10:17 p.m. "called on call [physician]," reported two incontinent episodes, "lower extremities [sic] hurts" and edema (abnormal build up of fluid in the tissues). Was encouraged to "sit and rest the leg" but refused and reported the pain was "unbearable." R129 wanted to be evaluated at the hospital, and "called 911 herself." Although a previous note indicated R129 required 1:1 staffing, it was noted R129 planned to "take care of her own transportation to ER...left the facility" at 10:20 p.m. The note did not indicate if a staff person accompanied R129 to the appointment.	{F 250}

{F 250}	Continued From page 73 4) On 3/18/14, at 3:56 a.m. R129 returned from the ER at 3:30 a.m. with a "New order. No new concern at this time." At 2:31 a.m. R129 reported to the business office manager she felt "depressed due to being on a 1:1." The concern was reported to social services and the nurse on duty. 5) On 3/20/14, at 10:08 a.m. the physician R129 identified as her new primary care physician (PCP) was contacted to inform the provider R129 lived in a health care facility, and orders needed to be coordinated with the facility. The PCP was provided an update regarding R129 changing her PCP, trips to the ER and drug seeking behavior. The note further indicated, "Transport informed to bring pt [patient] to/from the clinic and no other stops to include the pharmacy." At 2:45 p.m. R129 "Went for her appointment to her care provider today. At the appointment, resident was given script for Ambien (hypnotic used to promote sleep). "Resident said she filled the prescriptions at the pharmacy but she misplaced the pills. Patient will be monitored for increased sedation." Although the previous note indicated the transportation company was directed not to make any stops during transport, R129 had been brought to the pharmacy. At 3:11 p.m. a note indicated R129 reported she "lost" the Ambien. The note indicated the "escort" assigned to go with R129 to the appointment, reported R129 "went to the pharmacy and filled her script." The escort reported R129 would not allow the staff to "see the script" or the filled prescription. "Per the escort [R129] went to the bathroom. On the ride home [R129] reported that she lost the bottle of pills. Upon return she reported that same story to this writer and requested that staff get a new script." The physician was contacted and verified a prescription had been written and a report the	{F 250}

{F 250}	Continued From page 74	{F 250}		

script was lost had been reported by R129. The physician denied taking R129 on as a patient, however, and referred the facility to R129's current PCP.
6) On 3/28/14, at 11:52 a.m. R129 met with social services and "Also spoke with resident regarding her drug seeking. [R129] admits that she is addicted to pain medication." The note indicated R129 was scheduled to see psychologist and encouraged R129 to discuss her concerns and her "addiction."
7) On 4/4/14, at 7:11 p.m. R129 met with psychologist, as well as the DON and social worker after the appointment. The note indicated R129 "does not like being on 1:1's...informed her she was on 1:1's because of her frequent drug seeking...admits that she has urges to seek medications to manager her pain...denies addiction." Inpatient treatment was discussed such as drug and emotional counseling, which R129 rejected. The note indicated the psychologist agreed with the need for treatment, "However, should resident continue to display behaviors of drug seeking and declines treatment a CD commitment maybe considered to be in her best interest."
8) On 4/7/14, at 10:47 a.m. R129 remained, but requested she be removed from 1:1 supervision, which was noted as required "for going into other resident rooms."
9) On 5/4/14 12:03 a.m. R129 "told the nurse that she took cocaine earlier during this shift." The note recapitulated the data from the incident report dated 5/3/14. "The nurse asked the resident what she had taken and where she got it from or [who] gave it to her. She took the nurse to [R1's room number]. She also report that the package that resident in room [R14's room] swallowed earlier was marijuana." R129 accepted

{F 250}	Continued From page 75	{F 250}		

to to the ER for evaluation. "The nurse requested for toxicology screen and a copy should be send [sic] to the nursing home per the administrator order." Although the note indicated R129 obtained cocaine from another resident and identified R129's involvement with a second resident and a different illegal drug, the clinical record lacked evidence law enforcement was notified,and toxicology screening was obtained. Although R129 had an assigned 1:1, the record lacked evidence as to how the resident obtained and ingested the drugs, the incident was not immediately reported to the administrator and SA, nor was it investigated. In addition, the record lacked evidence R129 had received a CD evaluation or were immediate changes made in the monitoring and supervision provided for the resident's safety. At 7:23 a.m. a corporate nurse documented R129 approached the nurse and "admitted to writer that she took drugs given to her by another resident in this building. She was able to verbalize insight related to why she regretted this choice...remains on 1:1. 1:1 was present during this conversation." The clinical record lacked evidence 1:1 monitoring of R129 was reviewed after being identified to have accessed illegal drugs twice while on 1:1 monitoring.

10) On 5/4/13, at 12:12 p.m. an attempt was made to notify R129's doctor regarding the incident from 5/3/14. The operator at the doctor's office informed writer that they were only accepting on-call emergencies. Staff would notify doctor the morning of 5/5/14. The resident returned from the hospital at 6:00 a.m. with no new orders. Although R129 had two doses of Dilaudid administered at the ER, she immediately requested pain medication upon return to the facility (the note was not closed or signed by the

{F 250}	Continued From page 76 writer). On 5/5/14, during the initial tour of the facility NA-K was observed to be sitting in a chair directly outside R129's room. The door was open and R129 was dressed and was lying in bed with her eyes closed. NA-K reported she was assigned as a 1:1 for R129. NA-K stated she needed to remain with R129 and the 1:1 was due to R129 going into "other resident rooms." The following day at 8:30 a.m. NA-M (1:1 staff) followed R129 down the hallway and out to the smoking patio. R129 retrieved a cigarette from her front pocket, lit the cigarette and replaced the lighter in the side pocket (right). NA-M stood on the side walk outside the designated smoking area with a large cinder landscape block planter between R129 and NA-M. NA-M remained out of arm's length and looking in the opposite direction from R129 and talked with another staff person in the smoking area. R129 stood with other residents and smoked out of direct sight of NA-M. At 8:33 a.m. R129 sat on a bench with another resident on the other side of the smoking patio and out of sight of NA-M. NA-M stood on the edge of the cinder landscape block planter edge and chatted across the smoking area to the same staff person. NA-M was not near enough to R129 to intervene should there have been a concern. At 8:37 a.m. staff spoke to each other and then NA-M turned his back on all smokers (including R129) and spoke to a male who was in a car in the parking lot. NA-M then jumped down and entered the smoking area to speak to the staff directly. NA-M was not within arm's length or direct eye sight of R129. At 8:38 a.m. R129 stood up and walked to the front entrance of the facility. NA-M jumped to catch up with R129 and followed	{F 250}

directly behind her into the facility. R129 then pushed the wheelchair of a male resident entering the building and walked rapidly down the hallway. At 9:34 a.m. R129 pushed R62 in her wheelchair out of the facility and onto the smoking patio. R62 held out a cigarette for R129 ask she pushed the chair, and R129 concealed the cigarette. NA-M followed behind R129 and did not appear to notice or intervene when R129 took the cigarette. NA-M immediately turned his back to R129 once on the smoking patio, applied a surgical mask and talked to the female staff assigned to monitor the smoking patio. Both staff had their backs to R129. At 9:35 a.m. a staff pushed R22 back into the facility and pulled the smoking cart behind her. NA-M remained outside with R129 near the smoking patio watching a van in the parking area. NA-M had his back to R129 and was approximately 14 feet away from R129. Multiple other residents were observed to come and go from the smoking patio. R129 interacted freely with the other residents who were unsupervised. At 9:37 a.m. R117 came out of the facility, lit a cigarette at the front entrance, jumped up onto the cinder landscape block planter with ease, and walked across the top of the planters with a skipping gait. Neither the smoking monitor nor another female staff in the area intervened. R117 was observed to speak briefly with the female smoking monitor, approached R36, pulled out a large wad of cash and exchanged money with R36. R117 then went to R129 and R62. R117 remained with both residents smoking and talking. R129 sat on the edge of the cinder landscape block planter. NA-M was not within arms reach nor eyesight of R129, and was not supervising the resident. NA-M remained with the other female staff, with his back to R129. At 9:40 a.m. R129 stood and pushed R62's

wheelchair towards the front entrance of the facility. Although NA-M followed, NA-M did not come into arms reach of R129 until the front door of the facility. R129 pushed the wheelchair down the hallway with NA-M walking beside R129. At 10:19 a.m. R120 walked out to the designated smoking area. NA-M followed approximately ten feet behind outside, then stood on the sidewalk. NA-M then left the area and returned into the facility. R129 retrieved a cigarette from a pack. Multiple residents were observed to be coming out to smoke. The smoking monitor was on the patio but did not watch R129. R129 sat on planter side and spoke with R14. At 10:23 a.m. NA-M returned to the smoking area from inside and immediately stood on sidewalk on other side of planter approximately 20 feet away from R129. NA-M made no attempt to make eye contact with R129 and was not in arms reach as he spoke with the smoking monitor. At 10:25 a.m. NA-M and R129 went inside with NA-M walking within arms reach of the resident.

On 5/8/14, at 11:22 a.m. R129 was observed lying in bed, NA-E was making the roommate's bed. NA-E verified she was assigned to be the 1:1 with R129. NA-E offered to stand outside the door while R129 was interviewed and the door to the room was closed. R129 stated she was waiting for an apartment and verified she "snorted cocaine" on 5/3/14, which she had reported to facility staff. When asked when this occurred, R129 stated it was "on Saturday" (5/3/14)." When asked where she snorted the the cocaine, R129 replied, "not in the facility...down the block." When asked if she received the cocaine from another resident (as indicated in the clinical record), R129 stated "someone from the street" gave it to her, but denied being able to remember

the person's name, description, or gender. R129 said she snorted "about $20 worth." When asked what happened then R129 stated, "They sent me to the hospital...They accused me of giving it to someone else." R129 explained she was accused of giving R14 cocaine on the same day by the 1:1 assigned to her that day. R129 stated the 1:1's name (NA-G) who was to be with her at all times. She said the reason for the 1:1 was because she was accused of "rummaging" in other residents rooms. R129 reported she had a 1:1 was assigned to be with her "since March." When asked where the 1:1 was when she received the cocaine from the person on the street, R129 shrugged looked up and away and stated, "I don't know. She wasn't with me." R129 said she was "a recovering addict," but denied social services had been provided by facility staff, including assistance to obtain CD treatment. R129 stated she would like to go to outpatient rehabilitation for drug addiction. R129 further added she was "not checked" for cocaine use at the ER, but was given two shots of Dilaudid. R129 explained she "thought" that was going to happen, yet admitted she was "surprised" to have received the narcotic pain medication. Although R129 was relaxed during the interview, she was hesitant to answer some questions and did not make eye contact.

On 5/8/14, at 11:30 p.m. NA-G verified the responsibility of the 1:1 staff was to remain at arms length with R129 at all times.

On 5/8/14, at 11:41 a.m. NA-J verified she worked on R129's unit and stated was unaware of alcohol or drugs were being exchanged on "my shift," but stated was aware of situation "weeks ago" when she came to work and noticed R14 was not in his room. NA stated she asked where

he was and a NA "who was [R129's] 1:1" saw R129 go into R14's room and "exchange something." She stated she learned R14 was sent to the hospital for "eating something." Stated had not witnessed any exchanges and stated if she had she would have reported it to the nurse.

On 5/8/14, at 11:40 a.m. NA-S reported seeing alcohol bottles in residents' rooms and smelled alcohol on a resident and reported it to a nurse, but was unclear when it had occurred. NA-S "heard rumor" of a resident dealing drugs in the facility, and recalled seeing a resident with marijuana in January or February, and "could smell it." NA-S further stated when she was assigned to be the smoking monitor, she overheard residents talk about it. NA-S believed R117 was a drug dealer, as the resident left the facility "a lot" and went to the gas station. NA-S further stated she believed R117 was talking money from residents to also "buy cigarettes." NA-S stated she was unclear what happened to the resident after she reported the marijuana, but stated the nurse was from an "agency" and told her the resident "could have it."

On 5/8/14, at 11:55 a.m. housekeeper (H)-A when asked, reported she had seen "empty pint bottles" of vodka in the trash by the front doors. The last time had been, "a few months ago," and she had reported any bottles she found. " H-A was unsure which resident was drinking, but believed the pint bottles were placed in the front trash so they "wouldn't get caught." When asked if H-A knew how the bottles had been obtained, she was unsure, but thought they may have been brought in by family members.

On 5/8/14, at 12:03 p.m. LPN-H stated she had

{F 250}	Continued From page 81 confiscated alcohol from R37. LPN-H verified alcohol was provided to R37 and suspected to other residents of the facility, as well, but it was unclear how it was being provided. LPN-H verified R129 was on 1:1 which meant within arms reach. LPN-H was unaware R129 had obtained cocaine in the facility. On 5/8/14, at 12:10 p.m. the health unit coordinator (HUC) stated she was aware of resident drug and alcohol use in the facility. The HUC stated there was "always hearsay between residents...their selling [drugs and alcohol] to each other...it's always stories," including hearsay stories regarding heroin and cocaine. The HUC had put "a lot of time in" reporting to hospitals, clinics and ER if a resident was a "drug seeker" and on restrictive recipient program, and R129 was going to ER, calling herself and getting Ambien, oxycodone and "is happy after." R129 "refuses to tell" about the prescriptions, and the HUC went to the social worker to report these concerns. R129 denied having pills, "but I know she did get them...every week" R129 was finding a new doctor, and not providing the correct paperwork, or altering paperwork. The HUC was aware residents consumed alcohol in the facility, and some became intoxicated, however, it was unclear how they had obtained it. "I feel like we're supposed to do something, 'cuz no one will take charge." The HUC was aware R129 obtained cocaine and was sent to the ER, but was unsure if a toxicology screen had been done, although she had asked for them in the past. The HUC said she and other staff believed R129's (making quotation gestures) "son" was R129's dealer, and described him as a man she referred to as her son, who was at the facility at the time the resident snorted the cocaine.	{F 250}

{F 250}	Continued From page 82 Further review of the nursing progress notes also revealed indicated the following: 1) On 5/9/14, at 7:31 p.m. the pharmacy was contacted regarding R129's Percocet (narcotic pain medication) refills and determined 110 Percocet tablets had been delivered and outlined the delivery dates and the amounts provided. The note indicated R129 was informed of the information. 2) On 5/11/14, at 10:09 a.m. a note written by the HUC indicated North Memorial Medical Center (NMMC) called "requesting" R129's Medication Administration Records (MARs). The note indicated the RN from the hospital notified HUC R129 had been admitted to the ICU, had been intubated "due to acute alcohol intoxication." R129's toxicology screen was "negative for drugs but positive for alcohol with a level of .323." Although R129 had a staff person assigned as 1:1, R129 had been able to obtain and ingest a life threatening amount of alcohol. Although the administrator was updated, the clinical record lacked evidence the SA was also immediately notified of the incident. The record lacked documentation at the time of the incident, as well as pertinent assessment information such as vital signs and symptom descriptions. In addition, the record lacked evidence of an immediate determination of how, when or where R129 obtained the alcohol and/or if the assigned 1:1 was interviewed at the time. 2) On 5/11/14, at 10:55 a.m. a note written by the DON, recapitulated R129 was sent to the hospital, identified the time of transport as "around 4 am" on the night shift, and identified R129 was sent in "for intoxication." R129 had "become weak" and needed to be lowered to the floor." Two LPNs were contacted and the NA staff	{F 250}

assigned to the 1:1 was called. The NA assigned to R129 "reported that resident has been in and out of [R14's room number] but did not notice any exchange of alcohol. She also reported that resident [R14] was upset because the 1:1 has to be in his room too while resident is visiting...." R14 denied giving R129 alcohol, but "mentioned that resident had alcohol overnight." R14 denied knowledge of where R129 could have obtained the alcohol.
3) On 5/11/14, at 2:49 p.m. a note written by DON indicated NMMC was contacted to receive updates on R129's status. "I also requested to have the resident undergo a chemical dependency assessment to ensure that the resident can be transferred to a residential chemical dependency facility as appropriate, considering the resident's recent hospital trip to the hospital for snorting cocaine."
4) On 5/12/14, at 12:07 a.m. a late entry note (no indication for the date or time the late entry was for) indicated an NA staff "report to this writer that resident was in the bathroom longer than usual, came out and appeared drowsy, unsteady gait." R129 was identified at risk for falling, was verbally aggressive to staff and stated, "'I'm drunk.'" The room was checked and no evidence of alcohol was found. R129 "threw herself to the floor" and was sent to the ER at 4:00 a.m.

On 5/12/14, at approximately 2:00 p.m. contracted licensed social workers (CLSW)-A and CLSW-B both verified upon hire to the facility, they had been working on "re-writing care plans and discharge planning." CLSW-A stated there was a third social worker who no longer came to the facility and a part time social worker on evening that was "reducing her hours to once a week." Both verified they had not specifically

worked with R129 regarding CD treatment and verified was last offered to R129 on 4/4/14 and had not revisited CD treatment options after R129 reported cocaine use on 5/3/14. Neither was aware R129 had been hospitalized for alcohol toxicity and said they "should have been notified." CLSW-A and B had not worked the previous few days, as facility had not paid the contracted company's bill. CLSW-B expressed concern for the residents, and said R129 should have been reassessed after she had obtained and used cocaine, and both SWs felt R129 had been harmed. At 2:43 p.m. CLSW-A stated, "I cannot imagine how a resident who was on 1:1 would get that much alcohol in her system and when I got here on Sunday I came to the office to open the computer to see what happened and guess what, there was no nursing notes. I went outside to the desk and told the administrator and DON to get the nurse in to document and have the 1:1 fired. There are so many people here than I have seen on 1:1. For me 1:1 means the person needs to be somewhere else not at the nursing home."

R86 was committed as mentally ill and chemically dependent per Hennepin County Commitment papers dated 3/12/13, to include admission to a nursing home for rehabilitation and when completed and/or mentally stable, again participate in chemical dependency treatment. The facility Resident List Report, provided 5/8/14, at 11:00 a.m. identified R86 as a known pot smoker. R86 was placed at harm as R86 was hospitalized due to alleged substance abuse. On 3/16/13, R86 was admitted to the facility per the Admission Record. Diagnoses include hepatic encephalopathy (confusion related to liver failure) and cirrhosis of the liver and hepatomegaly (enlarged and fatty liver) alcoholic liver damage,

lacked review of facilities own progress notes, which verified substance abuse, and failed to provide an environment free of chemical/alcoholic substances, or to transfer R86 to a secured environment where appropriate care could be provided.

R41:
The facility failed to provide supervision to prevent ingestion of alcoholic substances, which resulted in actual harm to R41 on 5/1/14. While intoxicated the resident drove his motorized wheelchair (w/c) off the curb, fell over, sustained injury to his right forehead and right arm. R41 was hospitalized with low blood pressure, low magnesium and low potassium.

R41 was observed to sun himself in the facility driveway, outside of the front door and toward the public sidewalk on 5/5 at 2:09 p.m. and 5/6 at 10:46 a.m., 5/7 at 10:45 a.m., 5/8 at 2:15 p.m., 5/9 at 3:00 p.m., 5/10 at 2:30 p.m., 5/12 at 2:00 p.m., and 5/13/14 at 3:35 p.m. On 5/11/14, at 11:15 a.m., R41 was observed to sun himself on the smoking patio. All observations were unsupervised.

R41 was admitted to the facility per the Admission Record dated 2/4/14, from another long term care facility. R41 had a history of bipolar disorder (a mood disorder with manic and depressed phases), schizophrenia and polyneuropathy in diabetes (nerve damage usually in the feet and legs that can create sensory, motor and bodily functional problems).

The admission MDS dated 2/17/14, indicated R41 had a BIMS score of 15/15 which indicated no cognitive impairment. A Patient Health

Questionnaire (PHQ9 - detects depression) was completed and R41 had a score of 7/27, which indicated mild depression. R41 had verbal behaviors directed at others one to three days during the seven day look back period. R41 was dependent on staff and required total assistance of two persons and a mechanical lift for transfers and toileting; extensive assistance of two persons for bed mobility; extensive assistance of one person for personal hygiene, dressing. R41 was totally dependent on the electric, tilt in space, w/c for locomotion on and off the unit. The CAAs dated 2/17/14, indicated R41 would be referred to the house psychologist.

An LOA Safety Assessment dated 2/10/14, indicated R41 was safe to leave the facility on unsupervised LOA, and left the facility daily on unsupervised LOA according to staff.

A Vulnerable Adult Assessment dated 2/10/14, indicated the resident utilizes an electric w/c for ambulation. "Resident is OK to go on unsupervised LOA." A Smoking Evaluation dated 2/10/14, indicated independent with smoking and smoking materials.

The care plan revised on 3/18/14, indicated R41 had impaired cognitive function or thought process related to personality disorders of bipolar and schizophrenia. R41 had a history of being verbally abusive to staff and other residents, and required assistance with ADLs, and was safe for unsupervised LOA.

A Physician's Progress Note dated 4/15/14, indicated the visit was to establish primary care and recommend R41 for a psychiatry consult per R41's request. In addition, a recommendation

was made by the physician for R41 to have a referral made to a pain clinic consult for chronic use of opiates (oxycodone) and morphine (both narcotics). The medical record lacked evidence that the physician's recommendations were scheduled and that R41 went to the consults.

A progress note dated 5/1/14, at 3:05 p.m. revealed R41 was off the property in the neighborhood. He became intoxicated (on a LOA in the neighborhood), when he returned to the facility he drove his electric w/c off the curb on the driveway to the facility. R41 was found lying on pavement on his right side and his speech was slurred, but R41 remained alert and oriented. "He stated his last drink was 5 minutes ago. He was incontinent of urine and had a laceration on his forehead, he complained of right arm pain." The physician was notified and 911 was called. R41 was transferred to NMMC for further evaluation. He was admitted to ICU with low blood pressure, low potassium and low magnesium. The medical record lacked evidence that the assessments were reviewed and/or revised for R41's LOA status. On 5/1/14, the fall risk care plan was updated to include the fall on the driveway, but lacked mention of the causative factor of intoxication.

On 5/5/14, at 1:43 p.m. R41 returned to facility. New diagnoses from the Intra-agency Transfer Form dated 5/5/14, included: fall, intoxication, and alcoholism. A Physician's Order on 5/5/14, included, "No longer okay to leave unsupervised LOA's." A WanderGuard was ordered for the resident. The care plan revised on 3/18/14, lacked mention of supervised LOA.

On 5/6/14, at 9:16 a.m. the facility met with

{F 250}	Continued From page 93	{F 250}		

resident to discuss the incident that occurred on 5/1/14, the facility obtained an order for supervised LOA. Resident stated he was drinking because he was depressed. The facility placed a WanderGuard on his w/c.

Even though R41 had a WanderGuard placed on the w/c, R41 continued to remain at risk due to the facility, as the facility staff continued to silence the alarm at the front desk and let him out of facility. R41 continued to leave the facility and move about the property unsupervised. R41's medical record lacked evidence of any social service intervention at the facility for his depression and drinking related to depression which would include providing information such as alcoholics anonymous (AA) or referral to any place for help or support. Even though the CAAs dated 2/17/14, indicated R41 was referred to a house psychologist, R41's medical record lacked any evidence R41 had seen the house psychologist.

The medical record lacked evidence that social service intervention had been put into place since his last MDS dated 2/10/14 was completed. The MDS depicted R41 as having depression was identified at 7 out 15. The Care Area Assessments indicated he would be seeing the house psychologist and R41 had not been seen by the house psychologist. The medical record also lacks any staff intervention for providing information for his drinking such as like AA and referral to any place for help. Therefore, he was still drinking for depression and left the facility unsupervised. R41 remains at harm.

The Temporary Social Work Contract dated 3/15/14, indicated services provided included: 1.

Facilitate discharge planning. 5. Communicate with resident families as needed during the course of providing stoical services and discharge planning. 6. Facilitate admissions if required. R37's Progress Notes indicated R37 had been found with alcohol/vodka on 2/21/14, 2/22/14, 2/27/14, 3/2/14, 4/13/14, 4/23/14, 4/24/14, 4/25/14, 5/3/14, 5/5/14, 5/6/14, 5/7/1, 5/9/14 and 5/10/14. R37 was hospitalized 2/22/14, 4/23/14 and 5/10/14, related to alcohol/drug use. The Admission Record dated 1/14/14, indicated R37 was admitted to the facility on 9/19/13, with diagnoses which included altered mental status, and personal history of alcoholism. Observations of R37 revealed the following: -On 5/5/14, at 2:53 p.m. R37 was observed approaching a white minivan parked in front of the facility. - On 5/6/14, at 1:30 p.m. R37 was observed staggering down the hallway with the HUC and in a loud voice stated he was crazy. - On 5/6/14, 2:02 p.m. R37 went outside without shoes on. Two staff stopped him at the nursing station and sent him back to his room for shoes. R37 left his room and went directly outside without shoes on again, walked to the smoking patio and returned to the facility. - On 5/7/14, at 8:18 a.m. R37 was observed standing next to R117 on the smoking patio with his wallet out. Another resident (R1) arrived and R37 handed his wallet to her. Surveyor was unable to see if R1 took anything from the wallet before she handed it back to R37. R37 was observed to lean close to R1 and talk to her and	{F 250}

gave her his wallet back. At 8:24 a.m. R1 put R37's wallet back in his left pants pocket.
- On 5/8/14, at 11:48 a.m. R37 was observed in bed with his back to the door. R37 rolled over and looked at surveyor and rolled back towards the wall. R37 stated he did not want to talk now and would talk in an hour or two.
- On 5/8/14, at 3:46 p.m. an attempt was made to interview R37 and he refused.
- On 5/9/14, at 7:23 a.m. R37 was observed coming out of his room, stated he did not feel good and was going to see if there was any coffee. At 7:28 a.m. R37 was observed coming from the West hallway. R37 was then observed to push another resident back down the West hallway and was observed outside room 186 R9. There was no staff with R37 when he was observed. When R37 returned to the nursing station, he told the HUC he had gotten cigarettes from R9. The HUC asked R37 if he was alone and R37 responded that he was and she asked him where his partner was. NA-L approached R37 and stated she was with him today. NA-L verified she was providing 1:1 for R37.
- On 5/10/14, at 1:07 p.m. R37 was observed being taken to an ambulance. R37 was animated and chatting with the medics. Staff reported that was how you know R37 was intoxicated, when he was friendly and chatting.

The Nutritional Status CAAs dated 9/26/13, indicated R37 was at risk for impaired nutritional status due to chronic ETOH abuse and cirrhosis. Review of the Cognitive Loss/Dementia, Mood State, Behavioral Symptoms and Psychotropic Drug Use CAAs dated 10/7/13, revealed a lack of a summary regarding the triggered areas.

The Progress Notes were reviewed and the

{F 250}	Continued From page 96 following was noted: - On 5/2/14, indicated R37 removed the wander guard and refused a new one to be placed. - On 5/3/14, indicated R37 was walking in the hallway "wobbling" and requested staff give him a shower at 3:00 a.m. R37 was unable to maintain his balance and appeared "intoxicated." Two almost empty bottles of vodka were found in his room. - On 5/5/14, at 3:53 p.m. indicated R37 had exhibited signs of intoxication with an unsteady/staggering gait, slurred speech, odor of alcohol and unkempt appearance. R37 was noted to have continually gone outside, stated he had called a limo and was going to Las Vegas. - On 5/5/14, at 4:56 p.m. indicated R37 had slurred speech, smelled of alcohol and had a staggering gait. - On 5/5/14, at 10:25 p.m. indicated R37 was "intoxicated" and was found with an almost empty bottle of vodka. - On 5/6/14, which indicated it was a late entry for 5/5/14, at 6:00 p.m. indicated R 37 was noted walking outside towards the back of the building. R37 was noted to be walking alone with a staggering gait. When approached by staff, R37 stated he was going to Las Vegas. No odor of alcohol was noted and when asked what he had been doing to become so impaired, R37 reported he had gotten cocaine and heroin from another resident and confirmed he had been injecting the drugs. Several scattered purple bruises were noted on his forearms. At 1:55 a.m. indicated R37 reported his heart was thumping out of his chest and was found to have a blood pressure of 168 /118 with a pulse of 118. At 4:37 a.m. indicated R37 exited his room without clothing and had a strong odor of alcohol on his breath. Four empty bottles and one unopened bottle of alcohol were	{F 250}

found in R37's room and were removed by staff. Also noted R37 started having tremors and palpitations with increased pulse and blood pressure due to alcohol withdrawal and demanded medications.
- On 5/7/14, at 12:04 p.m. indicated R37 was exhibiting signs and symptoms of intoxication as evidenced by odor of alcohol, unsteady/slow/staggering gait, slurred speech, confusion and unkempt appearance. A pattern of missed pain clinic appointments due to intoxication was noted and indicated further appointments would not be made due to ongoing intoxication and inability to follow through with appointments. In addition, R37 had a full bottle of vodka and refused to give the bottle to staff. The note indicated the administrator directed if R37 was unwilling to willingly give staff the alcohol bottle, it was ok for the resident to keep the alcohol and if he became drunk or disruptive to call the police and have him taken to detox.
- On 5/8/14, at 3:42 p.m. indicated R37 was placed on 1:1 observation related to incidences of getting intoxicated.
- On 5/9/14, indicated R37 "was clearly intoxicated." An empty pint bottle of vodka was found in his room and was noted as the third empty pint bottle taken from R37's room in a 48 hour span of time.
- On 5/10/14, indicated R37 was observed giving his credit card to R117 on 5/9/14. A second note indicated R37 returned from LOA accompanied by a friend of another resident (R1). R37 was observed to be shaky and verbalized he was unsteady on his feet. R37 was noted to have shakiness, profuse sweating, and sluggish pupils. R37 was noted to have a blood pressure of 178/130 and a pulse of 120s to 140s.
- On 5/11/14, indicated R37 had a drug screen

{F 250}	Continued From page 98 positive for methadone at the hospital. R37 did not have a prescription for methadone. The Physician's Orders and NP Orders were reviewed and the following was noted: - On dated 1/8/14, included a diagnosis of alcohol abuse noted to have also occurred in the facility. - On 2/5/14, indicated R37 recently had a bottle of alcohol hidden in his pillow case and was noted to smell of alcohol. - On 2/28/14, directed to discharge R37 to another facility (that allowed drinking). - On 3/5/14, directed "do not call on-call MD or NP after hours if resident is intoxicated unless he is medically compromised. Allow resident to go to bed [and] sleep." - On 4/9/14, indicated R37 was hospitalized from 4/1/14 from 4/8/14, with respiratory distress and pneumonia with pleural effusions requiring chest tube placement, treated for sepsis and required thoracentesis. A NP note dated 4/9/14, indicated R37 required ongoing Kristalose and Mag-ox for chronic cirrhosis. - On 4/10/14, included diagnoses of chemical dependency, hepatic cirrhosis, and chronic pain. - On 4/24/14, included "place wander guard [sic] for res. [resident] safety" and "pursue guardianship." A second order dated 4/24/14, indicated NP was aware of R37's alcohol, to encourage R37 not to use and if R37 appeared intoxicated it was ok to administer all medications as ordered. - On 5/6/14, directed to recheck R37's blood pressure in one hour, call NP if diastolic blood pressure was greater than 100, give Ativan 0.5 mg orally every six hours as needed times three days for withdrawal symptoms (tremors, shaking, and increased heart rate) and a urine toxicology screen.	{F 250}

{F 250}	Continued From page 99 - On 5/7/14, directed no LOA-supervised or other. Also, the NP included an order for a WanderGuard to check placement every shift for elopement even though R37 had cut off the WanderGuard on 5/2/14, and refused to have a new one placed. A Clinical Summary dated 2/3/14, indicated "refer to chemical dependency counselor and pain psychologist." A prescription dated 2/3/14, ordered a behavioral health evaluation for diagnostic evaluation and treatment recommendations for R37. A Physician Visit/Progress Note written by a licensed drug and alcohol counselor (LADC) dated 2/13/14, indicated R37 was referred to assess behavioral health, chemical dependency and pain and included an order/comment of "strongly recommend a full psychiatric assessment" within 60 days to evaluate medications and therapy. The medical record lacked evidence of the psychiatric assessment having been completed. R37's care plan was reviewed and noted the following: - The vulnerable adult care plan revised on 3/5/14, indicated R37 may leave to go to medical appointments without supervision and was not safe to go on other unsupervised LOAs. - The depression care plan dated 3/11/14, included alcohol abuse and directed to arrange psych services as needed. - A behavioral symptoms care plan revised on 3/16/14, indicated alcohol consumption and concealing alcohol in room with a goal to have fewer episodes of alcohol abuse per week. The interventions included; encourage attending AA or	{F 250}

{F 250}	Continued From page 100 other substance abuse support programs, assisting with arrangements as needed, may go to medical/dental appointments unsupervised and no other unsupervised LOA. - A risk for elopement related to alcohol abuse and psychoses care plan revised 3/16/14, noted a history of returning to facility after unsupervised LOA displaying signs of alcohol consumption and/or with a supply of alcohol. The goal included R37 would not to leave facility unattended unless a medical appointment and R37's safety will be maintained. The interventions indicated R37 cut off the wander guard and refused to have another one placed and was placed on 15 minute checks. Check room if suspected alcohol. - A Mood/Behavior care plan initiated on 4/23/14, indicated R37 had a history of alcohol abuse and actively drank at the facility. The care plan noted R37 was sent to detox on 4/23/14, due to being very intoxicated. The goal indicated R37 would like to stop drinking alcohol with an intervention to check room daily for alcohol and check R37 for signs of intoxication. - An at risk for adverse reaction from medications related to alcohol care plan dated 4/25/14, indicated NP was aware of R37's alcohol, nursing staff to encourage to restrain from using alcohol and if R37 appeared intoxicated it was ok to administer medications. Another intervention dated 5/8/14, included 1:1 supervision due to alcohol abuse and intoxication. A Vulnerable Adult Assessment dated 3/16/14, indicated R37 had both past and recent substance abuse, was not safe for unsupervised LOA except to appointments and had significant alcohol use when out on unsupervised LOA. The quarterly MDS dated 3/18/14, indicated	{F 250}

{F 250}	Continued From page 101 R37's cognitive skills for daily decision making was independent with consistent/reasonable decisions. A Resident Refusal of Medical Treatment Form dated 5/5/14, indicated R37 was "wander guarded [sic]" to the facility for resident safety related to history of alcohol abuse, staggering gait and slurred speech. With the risks of refusing noted as facility wouldn't be aware if R37 left with potential for fall risk and injury off facility grounds with no one to provide aid. A letter dated 5/10/14, indicated a first offense of the facility smoking policy as R37 reported to staff he had gotten cigarettes from R9. On 5/7/14, at 10:02 a.m. the ombudsman was interviewed and wanted to know if surveyors were aware of residents purchasing alcohol and drugs. Reported she believed residents were giving other residents money and credit cards to go out and purchase things for them. She reported a resident with chemical dependency problems had been drinking, room checks were being completed and staff was finding alcohol bottles. Reported R37 was being found intoxicated and she was involved in discussing abuse prevention planning if intoxicated and the effects of alcohol on R37's medications. She reported the physician was encouraging discharge planning to a facility that allowed drinking. She also indicated a number of residents were accessing illegal drugs at the facility. The ombudsman reported she had been at the facility on 5/6/14, to discuss the concerns. On 5/7/14, at 10:05 a.m. the administrator stated the ombudsman was called 5/6/14, to speak with	{F 250}

the facility regarding R37 giving his credit card to R117 to purchase alcohol and R37 had been "drunk for days."

On 5/8/14, at 11:51 a.m. LPN-B stated she was aware R37 had a doctor's order and can drink as long as there are no behaviors and if behaviors occur she can call detox. LPN-B stated she did not know where R37 got alcohol from.

The safety monitor, NA-M was interviewed on 5/8/14, at 11:55 a.m. and stated he has not seen R37 exchange money or alcohol and stated he has heard about exchanges but could not remember who he heard it about.

The HUC was interviewed on 5/8/14, at 12:15 p.m. and stated "it's a nightmare; [R37] is drunk every day." She stated she had her suspicions about where the alcohol was coming from but when she asked R37 he refused to tell her. R37 told her he had given his credit card to R117 to buy things for him. The HUC stated R37 was drunk every day when she left and was drunk when she came in on 5/8/14. She reported that on 5/5/14 or 5/6/14, she had observed R37 in the parking lot, was told there was nothing they could do by the facility administrator and requested assistance from the operations director to get R37 back in the building. The HUC reported she had requested the safety monitor to put R37 on every 15 minute checks but knew that was not enough. She stated other residents were on 1:1 for drug use and wanted to know what the facility was going to do to keep R37 safe. The HUC stated "we're not doing [R37] any justice" and "it's a shitty plan to keep people on 1:1 forever."

On 5/10/14, at 1:19 p.m. the consultant

administrator was approached after several staff reported they had not been informed of the immediate jeopardy (IJ) that was called on 5/9/14, at 2:02 p.m. The consultant administrator stated she wanted the administrator to indicate why staff was not informed of the IJ and asked "are we in trouble?" The administrator approached and stated, yesterday when the IJ was called, by the time we were done with a meeting with our boss, the nurse managers had gone for the day. The administrator stated he thought they would come up with a plan and would have an all staff meeting 5/10/14, to inform staff of the IJ. The administrator further stated a meeting was scheduled at 1:45 p.m. and verified staff had not been informed of the IJ.

On 5/10/14, at 1:30 p.m. the administrator stated R37 had been taken to the hospital for delirium tremens (DTs-a severe form of alcohol withdrawal that involves sudden and severe mental or nervous system changes).

On 5/12/14, at 8:59 a.m. RN-B and LPN-A stated R37 had gone to the bank with a friend on 5/10/14, and were not sure if the 1:1 had gone to the bank or not and would have to check.

The DON was interviewed on 5/12/14, at 9:05 a.m. and stated a "guy named [friend-A]" who is a friend of R1 went with R37 to the bank. The DON stated both the administrator and the consultant administrator were aware that friend-A was a friend of R1. The DON stated the 1:1 refused to go to the bank with R37 and friend-A signed R37 out. The consultant administrator was going to go with R37 and friend-A to the bank until it was decided the facility was not comfortable with her going with to the bank either. The DON stated he

reminded R37 he could not go because he had orders for no LOA and the administrator, consultant administrator and the social worker decided R37 could go anyway. The DON stated he had no idea where R37 had gotten methadone from.

When interviewed on 5/12/14, at 1:35 p.m. CLSW-A stated during a room search a quart bottle of alcohol had been found in R37's room and three plastic containers with the labels removed which nursing indicated were methadone containers.

When interviewed on 5/12/14, at 1:52 p.m. the administrator stated he and CLSW-A were involved in R37's LOA. The administrator stated SW-A was under the impression R37 was allowed to go on LOA and R37 returned with a card from Walgreens so they knew he had not followed his agreement to only go to the bank. The administrator stated friend-A would not be able to take R37 on LOA again. The administrator stated he was not aware R37 had orders for no LOAs and he believed CLSW-A and had not checked the chart. The administrator stated he was also not aware of friend-A's relationship with R1 and the DON had not told him about the order for no LOA and friend-A's relationship with R1.

Upon interview on 5/13/14, at 8:09 a.m. CLSW-A stated on 5/10/14, prior to R37 leaving on LOA she was told by nursing (she could not remember who) that R37 could leave the facility with supervision. She reported she made it clear to friend-A that R37 could only go to the bank and nowhere else. She stated she told friend-A that R37 would try and talk him into going to the liquor store and R37 could not go there. Friend-A

reassured her he had been sober for ten years and would never take R37 to a liquor store. The SW-A stated after R37 left, nursing (did not remember who) told her R37 had orders for no LOA and friend-A was R1's drug dealer. She stated it would have been nice to know the information before she had allowed R37 to go on a LOA. She stated she had not looked at R37's chart because she trusted nursing knew the correct information. She also stated R37 had been keeping alcohol under the edge of his mattress and she could not understand why nursing did not find the alcohol when they made the bed. R37 remained at harm as he did not receive the requested services to assist him with the self-reported drug/ETOH abuse.

R14 was not provided medically-related social services to address known illegal drug use in the facility as recently as 5/3/14.

R14's admission record dated 1/14/14, indicated diagnoses to include depressive disorder, epilepsy and below the knee amputation. R14's significant change MDS dated 12/31/13, identified R14 had moderately impaired cognition, no mood problems and physical behavior symptoms towards others one to three days in the assessment period. The MDS indicated R14 required extensive assistance with most ADLs but was independent with locomotion on and off the unit and eating. The CAA was all dated 1/9/14; CAA for cognitive loss/dementia indicated R14 was able to understand and be understood. CAA for ADL function and rehab potential identified R14 had "alcohol abuse" and "alcohol induced dementia. The CAAs did not identify any history of drug use.

{F 250}	Continued From page 106 R14's Vulnerable Adult care plan dated as revised on 4/26/14, defied R14 had a "History of chemical abuse, including marijuana and heroin. The care plan goal indicated R14 would "remain safe and free from abuse/neglect." The care plan interventions indicated R14 refused all in-house and outside psychiatric services. The care plan identified R14 required supervision for LOA from the facility. A nursing Progress Note dated 5/3/14, at 8:35 p.m. indicated a NA reported to a nurse they saw R14 "put something" in a small plastic bag "possibly drug" at 8:30 p.m. The note indicated a nurse approached R14, noted he had something in his mouth and asked the resident to "spit out" what was in his mouth. R14 refused to open his mouth, swallowed the content and then opened his mouth for the nurse. The note indicated R14 was "non-cooperative" and "attempted to hit the nurse with his fist." The note indicated the physician was notified and R14 was sent to the ER for evaluation. A North Memorial Robbinsdale HUC Transfer Packet indicated the results of toxicology screen identified R14 was positive for "THC Metabolites [the active drug components of marijuana]" from the past 24 hours. The report identified R14 had the lab for "drug ingestion." Although the specific incident was documented on 5/3/14, the clinical record lacked documentation including, but not limited to: immediate notification of the administrator and SA, thorough investigation of the incident to determine potential source(s) R14 may obtained the illegal drug from, notification of law enforcement, follow up assessment of R14's	{F 250}

safety, evaluation of R14's access to leave the facility, such as to smoke; documentation of how they would prevent potential future instances of R14's illegal drug access and ingestion, monitoring of R14 and interdisciplinary involvement, such as medically-related social services.

On 5/8/14, at 11:32 a.m. R14 was interviewed. R14 stated he did not recall the incident on 5/3/14. R14 stated his memory was poor due to being an "epileptic." R14 denied awareness of illegal drug and alcohol activity in the facility. When asked what R14 would do if she observed illegal drug or alcohol activity in the facility, R14 stated he would "tell the resident not to do it," but would not notify staff. When asked why he would not notify staff, R14 stated, "'Cause we all have enough troubles, if someone wants a little activity on the side, go for it!"
On 5/12/14, at 10:26 a.m. the DON was interviewed, verified had not read the plan of correction and did not know what the plan was. DON verified he was not aware of changes made and reiterated he was "waiting for this [the survey]" to "blow over" and then he had plans to work on "problems" in the facility. Stated he read the survey results from 2013 and stated he was not given an accurate picture of the facility problems. Verified there was no system for monitoring staff to ensure facility policies were followed. DON was unclear on the specifics of R14's incident.

On 5/12/14, at approximately 2:00 p.m. CLSW-A and CLSW-B both verified they were not aware or informed of R14 obtaining and ingesting an illegal drug. Both verified they were not notified R14 was sent to the hospital and had a positive toxicity

{F 250}	Continued From page 108 screen for marijuana. Both CLSW's explained they would have assessed R14 and reviewed potential CD treatment options with R14. Both CLSWs expressed R14 may require increased supervision due to accessing an illegal drug and his history of chemical dependency. Both verified they had access to the computer clinical record, CLSW-A stated the facility lacked consistent documentation of incidents, interventions, assessments and follow up. R56 had conflicting advanced directives dated 4/21/14 and 4/26/14, in her record. Review of the hospice Team Care Plan dated 5/7/14, indicated R56 signed onto hospice on 4/21/14, with a diagnosis of chronic liver disease with a prognosis of less than six months to live. A Provider Orders for Life Sustaining Treatment (POLST) dated 4/21/14, indicated R56's cardiopulmonary resuscitation status (CPR) status was DNR/Do Not Attempt Resuscitation (Allow Natural Death) and goals of treatment were noted as Comfort Care. The POLST dated 4/21/14, was signed by R56's husband. A POLST dated 4/26/14, indicated R56's CPR status was CPR/Attempt to Resuscitate, directed to Limit Interventions and Treat Reversible Conditions and included interventions and treatments of intravenous (IV)/intramuscularly (IM) antibiotic treatment and IV fluid administration. The POLST dated 4/26/14, was signed by R56. The annual MDS dated 2/24/14, included a Brief Interview of Mental Status Score (BIMS) of 15	{F 250}

{F 250}	Continued From page 109 (cognitively intact). Review of the facility care plan dated 4/23/14, indicated R56 was DNR/do not intubate (DNI), comfort cares and was receiving hospice services, medical directives would be honored with an intervention to coordinate care with hospice. Review of the hospice care plan dated 5/7/14, indicated R56 was DNR with an intervention of "DO NOT RESUSCITATE." A Physician's Order dated 4/18/14, directed ok for hospice to evaluate and treat and ok for in-house psych to see. A nurse practitioner progress note dated 4/30/14, noted a diagnosis of end stage liver disease, now on hospice secondary to decline in condition. A Residential Communication Note from hospice dated 5/12/14, indicated a message was left with the hospice social worker to call the facility social worker regarding POLST. A Progress Notes dated 5/12/14, indicated CLSW-B spoke with R56 about her POLST. R56 reported to CLSW-B she wanted to be DNR/comfort cares and that was also what her husband wanted. CLSW-B indicated she placed the correct POLST information in the advanced directives section of the medical record. A Progress Notes dated 5/12/14, indicated CLSW-B spoke with R56's husband regarding the POLST and hospice. R56's husband stated to CLSW-B the POLST should be DNR/comfort cares.	{F 250}
