On 5/12/14, at 2:43 p.m. contracted licensed social worker (CLSW)-A stated, " I cannot imagine how a resident who was on 1:1 would get that much alcohol in her system and when I got here on Sunday I came to the office to open the computer to see what happened and guess what, there was no nursing notes. I went outside to the desk and told the administrator and director of nursing to get the nurse in to document and have the 1:1 fired. There are so many people here than I have seen on 1:1. For me 1:1 means the person needs to be somewhere else not at the nursing home. "

The Special Staffing - One to One Assignment policy dated as reviewed 5/2013, indicate 1:1 staffing may be assigned "under special circumstances," must be prior authorized by the Director of Clinical Services (DCS) and "One to One staffing assignments are not permanent but rather in place based on assessed need until appropriate permanent alternative arrangements can be made." The reasons identified for the 1:1 staffing included threat of suicide, altered mentation that may "dislodge treatment lines and devices," escalating exit seeking behavior, altered cognition in an agitated state that "is not easily redirected" and "does not respect boundaries of other residents." The procedure directed to assess the resident, DON and administrator to agree 1:1 was necessary and consult DCS; instruct staff assigned to 1:1 the purpose of assignment, and directed to keep resident at "arm's length at all times." The procedure indicated if resident was not suicidal, privacy with toileting could be provided. The procedure directed to document the 1:1 assignment in the clinical record and revise the care plan.

Progress notes indicated R37 had been found with alcohol/vodka on 2/21/14, 2/22/14, 2/27/14, 3/2/14, 4/13/14, 4/23/14, 4/24/14, 4/25/14, 5/3/14, 5/5/14, 5/6/14, 5/7/1, 5/9/14 and 5/10/14. R37 was hospitalized 2/22/14, 4/23/14 and 5/10/14, related to alcohol/drug use. The Admission Record dated 1/14/14, indicated R37 was admitted to the facility on 9/19/13, with diagnoses which included altered mental status, and personal history of alcoholism.

Observations of R37 revealed the following:
-On 5/5/14, at 2:53 p.m. R37 was observed approaching a white minivan parked in front of the facility.
- On 5/6/14, at 1:30 p.m. R37 was observed staggering down the hallway with the health unit coordinator (HUC) and in a loud voice stated he was crazy.
- On 5/6/14, 2:02 p.m. R37 went outside without shoes on. Two staff stopped him at the nursing station and sent him back to his room for shoes. R37 left his room and went directly outside without shoes on again, walked to the smoking patio and returned to the facility.
- On 5/7/14, at 8:18 a.m. R37 was observed standing next to R117 on the smoking patio with his wallet out. Another resident (R1) arrived and R37 handed his wallet to her. Surveyor was unable to see if R1 took anything from the wallet before she handed it back to R37. R37 was observed to lean close to R1 and talk to her and gave her his wallet back. At 8:24 a.m. R1 put R37's wallet back in his left pants pocket.
- On 5/8/14, at 11:48 a.m. R37 was observed in bed with his back to the door. R37 rolled over and looked at surveyor and rolled back towards the wall. R37 stated he did not want to talk now and would talk in an hour or two.
- On 5/8/14, at 3:46 p.m. an attempt was made to interview R37 and he refused.
- On 5/9/14, at 7:23 a.m. R37 was observed coming out of his room, stated he didn't feel good and was going to see if there was any coffee. At 7:28 a.m. R37 was observed coming from the West hallway. R37 was then observed to push another resident back down the West hallway and was observed outside room 186 R9. There was no staff with R37 when he was observed. When R37 returned to the nursing station, he told the HUC he had gotten cigarettes from R9. The HUC asked R37 if he was alone and R37 responded that he was and she asked him where his partner was. NA-L approached R37 and stated she was with him today. NA-L verified she was providing 1:1 for R37.
- On 5/10/14, at 1:07 p.m. R37 was observed being taken to an ambulance. R37 was animated and chatting with the medics. Staff reported that was how you know R37 is intoxicated, when he was friendly and chatting.

The Nutritional Status Care Area Assessments (CAAs) dated 9/26/13, indicated R37 was at risk for impaired nutritional status due to chronic ETOH abuse and cirrhosis. Review of the Cognitive Loss/Dementia, Mood State, Behavioral Symptoms and Psychotropic Drug Use CAAs dated 10/7/13, revealed a lack of a summary regarding the triggered areas.

The progress Notes were reviewed and the following was noted:
- On 5/2/14, indicated R37 removed the wander guard and refused a new one to be placed.
- On 5/3/14, indicated R37 was walking in the hallway "wobbling" and requested staff give him a shower at 3:00 a.m. R37 was unable to maintain his balance and appeared "intoxicated." Two almost empty bottles of vodka were found in his room.
- On 5/5/14, at 3:53 p.m. indicated R37 had exhibited signs of intoxication with an unsteady/staggering gait, slurred speech, odor of alcohol and unkempt appearance. R37 was noted to have continually gone outside, stated he had called a limo and was going to Las Vegas.
- On 5/5/14, at 4:56 p.m. indicated R37 had slurred speech, smelled of alcohol and had a staggering gait.
- On 5/5/14, at 10:25 p.m. indicated R37 was "intoxicated" and was found with an almost empty bottle of vodka.
- On 5/6/14, which indicated it was a late entry for 5/5/14 at 6:00 p.m. indicated R 37 was noted walking outside towards the back of the building. R37 was noted to be walking alone with a staggering gait. When approached by staff, R37 stated he was going to Las Vegas. No odor of alcohol was noted and when asked what he had been doing to become so impaired, R37 reported he had gotten cocaine and heroin from another resident and confirmed he had been injecting the drugs. Several scattered purple bruises were noted on his forearms. At 1:55 a.m. indicated R37 reported his heart was thumping out of his chest and was found to have a blood pressure of 168 /118 with a pulse of 118. At 4:37 a.m. indicated R37 exited his room without clothing and had a strong odor of alcohol on his breath. Four empty bottles and one unopened bottle of alcohol were found in R37's room and were removed by staff. Also noted R37 started having tremors and palpitations with increased pulse and blood pressure due to alcohol withdrawal and demanded medications.
- On 5/7/14, at 12:04 p.m. indicated R37 was exhibiting signs and symptoms of intoxication as evidenced by odor of alcohol, unsteady/slow/staggering gait, slurred speech, confusion and unkempt appearance. A pattern of missed pain clinic appointments due to intoxication was noted and indicated further appointments would not be made due to ongoing intoxication and inability to follow through with appointments. In addition, R37 had a full bottle of vodka and refused to give the bottle to staff. The note indicated the administrator directed if R37 was unwilling to willingly give staff the alcohol bottle, it was ok for the resident to keep the alcohol and if he became drunk or disruptive to call the police and have him taken to detox.
- On 5/8/14, at 3:42 p.m. indicated R37 was placed on 1:1 observation related to incidences of getting intoxicated.
- On 5/9/14, indicated R37 "was clearly intoxicated." An empty pint bottle of vodka was found in his room and was noted as the third empty pint bottle taken from R37's room in a 48 hour span of time.
- On 5/10/14, indicated R37 was observed giving his credit card to R117 on 5/9/14. A second note indicated R37 returned from LOA accompanied by a friend of another resident (R1). R37 was observed to be shaky and verbalized he was unsteady on his feet. R37 was noted to have shakiness, profuse sweating, sluggish pupils and was noted to have a blood pressure of

178/130 and a pulse of 120s to 140s.
- On 5/11/14, indicated R37 had a drug screen positive for methadone at the hospital. R37 did not have a prescription for methadone.

The Physician's orders and Nurse Practitioners orders were reviewed and the following was noted:
- On dated 1/8/14, included a diagnosis of alcohol abuse noted to have also occurred in the facility.
- On 2/5/14, indicated R37 recently had a bottle of alcohol hidden in his pillow case and was noted to smell of alcohol.
- On 2/28/14, directed to discharge R37 to another facility (that allowed drinking).
- On 3/5/14, directed "do not call on-call MD [physician] or NP after hours if resident is intoxicated unless he is medically compromised. Allow resident to go to bed [and] sleep."
- On 4/9/14, indicated R37 was hospitalized from 4/1/14 from 4/8/14, with respiratory distress and pneumonia with pleural effusions requiring chest tube placement, treated for sepsis and required thoracentesis. A NP note dated 4/9/14, indicated R37 required ongoing Kristalose and Mag-ox for chronic cirrhosis.
- On 4/10/14, included diagnoses of chemical dependency, hepatic cirrhosis, and chronic pain.
- On 4/24/14, included "place wander guard [sic] for res. [resident] safety" and "pursue guardianship." A second order dated 4/24/14, indicated NP was aware of R37's alcohol, to encourage R37 not to use and if R37 appeared intoxicated it was ok to administer all medications as ordered.
- On 5/6/14, directed to recheck R37's blood pressure in one hour, call NP if diastolic blood pressure was greater than 100, give Ativan 0.5 milligrams orally every six hours as needed times three days for withdrawal symptoms (tremors, shaking, and increased heart rate) and a urine toxicology screen.
- On 5/7/14, directed no LOA-supervised or other. Also, the NP included an order for a Wanderguard to check placement every shift for elopement even though R37 had cut off the Wanderguard on 5/2/14, and refused to have a new one placed.

A Clinical Summary dated 2/3/14, indicated "refer to chemical dependency counselor and pain psychologist." A prescription dated 2/3/14, ordered a behavioral health evaluation for diagnostic evaluation and treatment recommendations for R37.

A Physician Visit/Progress Note written by a licensed drug and alcohol counselor (LADC) dated 2/13/14, indicated R37 was referred to assess behavioral health, chemical dependency and pain and included an order/comment of "strongly recommend a full psychiatric assessment" within 60 days to evaluate medications and therapy. The medical record lacked evidence of the psychiatric assessment having been completed.

R37's care plan was reviewed and noted the following:
- The vulnerable adult care plan revised on 3/5/14, indicated R37 may leave to go to medical appointments without supervision and was not safe to go on other unsupervised LOAs.
- The Depression care plan dated 3/11/14, included alcohol abuse and directed to arrange psych services as needed.
- A behavioral symptoms care plan revised on 3/16/14, indicated alcohol consumption and concealing alcohol in room with a goal to have fewer episodes of alcohol abuse per week.

The interventions included; encourage attending AA or other substance abuse support programs, assisting with arrangements as needed, may go to medical/dental appointments unsupervised and no other unsupervised LOA.
- A risk for elopement related to alcohol abuse and psychoses care plan revised 3/16/14, noted a history of returning to facility after unsupervised LOA displaying signs of alcohol consumption and/or with a supply of alcohol. The goal included R37 would not to leave facility unattended unless a medical appointment and R37's safety will be maintained. The interventions indicated R37 cut off the wander guard and refused to have another one placed and was placed on 15 minute checks. Check room if suspected alcohol.
- A Mood/Behavior care plan initiated on 4/23/14, indicated R37 had a history of alcohol abuse and actively drank at the facility. The care plan noted R37 was sent to detox on 4/23/14, due to being very intoxicated. The goal indicated R37 would like to stop drinking alcohol with an intervention to check room daily for alcohol and check R37 for signs of intoxication.
- An at risk for adverse reaction from medications related to alcohol care plan dated 4/25/14, indicated NP was aware of R37's alcohol, nursing staff to encourage to restrain from using alcohol and if R37 appeared intoxicated it was ok to administer medications. Another intervention dated 5/8/14, included 1:1 supervision due to alcohol abuse and intoxication.

A Vulnerable Adult Assessment dated 3/16/14, indicated R37 had both past and recent substance abuse, was not safe for unsupervised LOA except to appointments and had significant alcohol use when out on unsupervised LOA.

The quarterly Minimum Data Set (MDS) dated 3/18/14, indicated R37's cognitive skills for daily decision making was independent with consistent/reasonable decisions.

A Resident Refusal of Medical Treatment Form dated 5/5/14, indicated R37 was "wander guarded [sic]" to the facility for resident safety related to history of alcohol abuse, staggering gait and slurred speech. With the risks of refusing noted as facility wouldn't be aware if R37 left with potential for fall risk and injury off facility grounds with no one to provide aid.

A letter dated 5/10/14, indicated a first offense of the facility smoking policy as R37 reported to staff he had gotten cigarettes from R9.

On 5/7/14, at 10:02 a.m. the ombudsman was interviewed and wanted to know if surveyors were aware of residents purchasing alcohol and drugs. Reported she believed residents were giving other residents money and credit cards to go out and purchase things for them. She reported a resident with chemical dependency problems had been drinking, room checks were being completed and staff was finding alcohol bottles. Reported R37 was being found intoxicated and she was involved in discussing abuse prevention planning if intoxicated and the effects of alcohol on R37's medications. She reported the physician was encouraging discharge planning to a facility that allowed drinking. She also indicated a number of residents were accessing illegal drugs at the facility. The ombudsman reported she had been at the facility on 5/6/14, to discuss the concerns.

On 5/7/14, at 10:05 a.m. the administrator stated the ombudsman was called 5/6/14, to speak with the facility regarding R37 giving his credit card to R117 to purchase alcohol and R37 had been "drunk for days."

On 5/8/14, at 11:51 a.m. licensed practical nurse (LPN)-B stated she was aware R37 had a doctor's order and can drink as long as there are no behaviors and if behaviors occur she can call detox. LPN- B stated she did not know where R37 got alcohol from.

The safety monitor, nursing assistant (NA)-M was interviewed on 5/8/14, at 11:55 a.m. and stated he has not seen R37 exchange money or alcohol and stated he has heard about exchanges but could not remember who he heard it about.

The HUC was interviewed on 5/8/14, at 12:15 p.m. and stated "it's a nightmare; [R37] is drunk every day." She stated she had her suspicions about where the alcohol was coming from but when she asked R37 he refused to tell her. R37 told her he had given his credit card to R117 to buy things for him. The HUC stated R37 was drunk every day when she left and was drunk when she came in on 5/8/14. She reported that on 5/5/14 or 5/6/14, she had observed R37 in the parking lot, was told there was nothing they could do by the facility administrator and requested assistance from the operations director to get R37 back in the building. The HUC reported she had requested the safety monitor to put R37 on every 15 minute checks but knew that was not enough. She stated other residents were on 1:1 for drug use and wanted to know what the facility was going to do to keep R37 safe. The HUC stated "we're not doing [R37] any justice" and "it's a shitty plan to keep people on 1:1 forever."

On 5/10/14, at 1:19 p.m. the consultant administrator was approached after several staff reported they had not been informed of the immediate jeopardy (IJ) that was called on 5/9/14, at 2:02 p.m. The consultant administrator stated she wanted the adminstrator to indicate why staff was not informed of the IJ and asked "are we in trouble?" The administrator approached and stated, yesterday when the IJ was called, by the time we were done with a meeting with our boss, the nurse managers had gone for the day. The administrator stated he thought they would come up with a plan and would have an all staff meeting 5/10/14, to inform staff of the IJ. The administrator further stated a meeting was scheduled at 1:45 p.m. and verified staff had not been informed of the IJ.

On 5/10/14, at 1:30 p.m. the administrator stated R37 had been taken to the hospital for DTs.

On 5/12/14, at 8:59 a.m. registered nurse (RN)-B and LPN-A stated R37 had gone to the bank with a friend on 5/10/14, and were not sure if the 1:1 had gone to the bank or not and would have to check.

The director of nursing (DON) was interviewed on 5/12/14, at 9:05 a.m. and stated a "guy named [friend-A]" who is a friend of R1 went with R37 to the bank. The DON stated both the administrator and the consultant administrator were aware that friend-A was a friend of R1. The DON stated the 1:1 refused to go to the bank with R37 and friend-A signed R37 out. The consultant administrator was going to go with R37 and friend-A to the bank until it was decided the facility was not comfortable with her going with to the bank either. The DON stated he reminded R37 he could not go because he had orders for no LOA and the administrator, consultant administrator and the social worker decided R37 could go anyway. The DON stated he had no idea where R37 had gotten methadone from.

When interviewed on 5/12/14, at 1:35 p.m. SW-A stated during a room search a quart bottle of alcohol had been found in R37's room and three plastic containers with the labels removed which nursing indicated were methadone containers.

When interviewed on 5/12/14, at 1:52 p.m. the administrator stated he and social worker (SW)-A were involved in R37's LOA. The administrator stated SW-A was under the impression R37 was allowed to go on LOA and R37 returned with a card from Walgreens so they knew he had not followed his agreement to only go to the bank. The administrator stated friend-A would not be able to take R37 on LOA again. The administrator stated he was not aware R37 had orders for no LOAs and he believed SW-A and had not checked the chart. The administrator stated he was also not aware of friend-A's relationship with R1 and the DON had not told him about the order for no LOA and friend-A 's relationship with R1.

Upon interview on 5/13/14, at 8:09 a.m. SW-A stated on 5/10/14, prior to R37 leaving on LOA she was told by nursing (she could not remember who) that R37 could leave the facility with supervision. She reported she made it clear to friend-A that R37 could only go to the bank and nowhere else. She stated she told friend-A that R37 would try and talk him into going to the liquor store and R37 could not go there. Friend-A reassured her he had been sober for ten years and would never take R37 to a liquor store. The SW-A stated after R37 left, nursing (did not remember who) told her R37 had orders for no LOA and friend-A was R1's drug dealer. She stated it would have been nice to know the information before she had allowed R37 to go on a LOA. She stated she had not looked at R37's chart because she trusted nursing knew the correct information. She also stated R37 had been keeping alcohol under the edge of his mattress and she could not understand why nursing did not find the alcohol when they made the bed.

When interviewed on 5/13/14, at 2:20 p.m. the administrator was asked about the discrepancy between what the DON reported had happened on 5/10/14, and what the administrator stated had happened and he verified he was not aware R37 had an order for no LOAs and friend-A's relationship with R1 prior to R37 being allowed to leave on LOA.

The facility Special Staffing-One to One Assignment reviewed May 2013, directed "One to one assignment keeps a resident at arm's length at all times."

The facility Drug and Alcohol Free Facility Care Environment-Camden Specific effective 5/11/14, directed "If staff have reasonable suspicion that a resident has used, has in their possession, or has distributed to other residents in the facility alcohol, street drugs, or other pharmacologic substances not prescribed by treating physician the facility staff, under the direction of administration, shall:

- Search the residents room and remove such substances
- Notify the physician and obtain an order for blood and urine drug testing
- Notify the family and/or responsible party of the event

If the tests return positive the resident with the positive results will be immediately discharged for placing the resident population at risk for abuse. If alcohol, street drugs, or pharmacologic substances are found not prescribed by a physician during a room search the resident will be immediately discharged for placing the population at risk for abuse. If the substances found during a room search are suspected of being illegal the police will be notified."

The facility Prohibition of Abuse, Neglect, Mistreatment, and Misappropriation of Resident Property policy reviewed January 2013, defined neglect as "The failure to provide goods or services necessary to avoid physical harm, mental anguish, or mental illness. "Under item 6, the policy directed; "Supervisors will immediately intervene, correct, and report identified situations where abuse, neglect or misappropriation of resident property is at risk for occurring." The policy included a definition of criminal crime neglect as "A caregiver or operator who intentionally neglects a vulnerable adult or knowingly permits conditions to exist that result in the abuse or neglect of a vulnerable adult is guilty of a gross misdemeanor. Neglect means a failure to provide a vulnerable adult with necessary food, clothing, shelter, health care, or supervision. "Appendix A included examples of neglect as "Failure of a caregiver to provide a resident with (or the absence or likelihood of absence of) care or services (e.g. food, clothing, shelter, health care or supervision) which are reasonable and necessary to obtain or maintain the vulnerable adult's physical or mental health or safety."

F323 K

Based on observation, interview and document review, the facility failed to ensure adequate supervision was provided to prevent potential injury from alcohol and drug use for 4 residents (R37, R41, R117, R129). In addition, the facility failed to ensure residents were supervised adequately to prevent elopement for 2 residents (R13 and R116). This resulted in an Immediate Jeopardy (IJ) situation being identified for these residents on 5/9/14, at 2:03 p.m.

Findings include:

Review of the progress notes indicated R37 had been found with alcohol/vodka on 2/21/14, 2/22/14, 2/27/14, 3/2/14, 4/13/14, 4/23/14, 4/24/14, 4/25/14, 5/3/14, 5/5/14, 5/6/14, 5/7/1, 5/9/14 and 5/10/14. R37 was hospitalized 2/22/14, 4/23/14 and 5/10/14, related to alcohol/drug use. The Admission Record dated 1/14/14, indicated R37 was admitted to the facility on 9/19/13, with diagnoses which included altered mental status, and personal history of alcoholism.

Observations of R37 revealed the following:
-On 5/5/14, at 2:53 p.m. R37 was observed approaching a white minivan parked in front of the facility.
- On 5/6/14, at 1:30 p.m. R37 was observed staggering down the hallway with the health unit coordinator (HUC) and in a loud voice stated he was crazy.
- On 5/6/14, 2:02 p.m. R37 went outside without shoes on. Two staff stopped him at the nursing station and sent him back to his room for shoes. R37 left his room and went directly outside without shoes on again, walked to the smoking patio and returned to the facility.
- On 5/7/14, at 8:18 a.m. R37 was observed standing next to R117 on the smoking patio with his wallet out. Another resident (R1) arrived and R37 handed his wallet to her. Surveyor was unable to see if R1 took anything from the wallet before she handed it back to R37. R37 was observed to lean close to R1 and talk to her and gave her his wallet back. At 8:24 a.m. R1 put R37 ' s wallet back in his left pants pocket.
- On 5/8/14, at 11:48 a.m. R37 was observed in bed with his back to the door. R37 rolled over and looked at surveyor and rolled back towards the wall. R37 stated he did not want to talk now and would talk in an hour or two.

- On 5/8/14, at 3:46 p.m. an attempt was made to interview R37 and he refused.
- On 5/9/14, at 7:23 a.m. R37 was observed coming out of his room, stated he didn ' t feel good and was going to see if there was any coffee. At 7:28 a.m. R37 was observed coming from the West hallway. R37 was then observed to push another resident back down the West hallway and was observed outside room 186 R9. There was no staff with R37 when he was observed. When R37 returned to the nursing station, he told the HUC he had gotten cigarettes from R9. The HUC asked R37 if he was alone and R37 responded that he was and she asked him where his partner was. NA-L approached R37 and stated she was with him today. NA-L verified she was providing 1:1 for R37.
- On 5/10/14, at 1:07 p.m. R37 was observed being taken to an ambulance. R37 was animated and chatting with the medics. Staff reported that was how you know R37 is intoxicated, when he was friendly and chatting.

The Nutritional Status Care Area Assessments (CAAs) dated 9/26/13, indicated R37 was at risk for impaired nutritional status due to chronic ETOH abuse and cirrhosis. Review of the Cognitive Loss/Dementia, Mood State, Behavioral Symptoms and Psychotropic Drug Use CAAs dated 10/7/13, revealed a lack of a summary regarding the triggered areas.

The progress Notes were reviewed and the following was noted:
- On 11/26/13, noted CD treatment/AA was discussed and R37 had participated in AA services in the past which he was successful with three years of sobriety before recent relapse. The note indicated nursing had reported two episodes of alcohol intoxication while in the nursing home since the last visit and R37 acknowledged the report to be accurate. The assessment/plan included social worker to assist with available CD services, R37 stated he was open to CD services and no alcohol use with nursing to monitor. The NP indicated there were " clear dependency concerns."
- On 1/8/14, indicated alcohol abuse which had also occurred in the facility.
- On 2/21/14, indicated R37 had been drinking vodka and a finished bottle was found. R37 was observed to be distributing money to staff and residents. When R37 noticed he had no money to buy vodka, he went to the automatic teller machine (ATM) machine to get money. The note indicated staff was concerned about his safety and judgment. On 2/21/14, at 7:07 a.m. indicated R37 was handing out his money to " anyone who would listen " and staff took $116.00 dollars from him and locked it up.
- On 2/22/14, at 10:14 p.m. indicated R37 called 911 and sent himself to the hospital. It was noted R37 had been drinking during the a.m. shift and was drunk. The a.m. shift took a bottle of vodka from him. R37 asked the p.m. shift to return the vodka or pay him $25.00.
- On 2/27/14, at 1:13 p.m. indicated R37 wanted to leave on an LOA, was advised he could not go on unsupervised LOA and left the facility.
- On 2/27/14, at 10:07 p.m. indicated R37 was " drunk " and had a blood pressure of 147/105.
- On 3/2/14, indicated R37 was " drunk " and was noted to have a blood pressure of 176/98 and a pulse of 99.
- On 4/1/14, indicated R37 had complained of shortness of breath and chest pain with a blood pressure of 146/102 and a pulse of 109 and was sent to the hospital.
- On 4/13/14, indicated R37 " seemed intoxicated " and one full bottle of vodka and one quarter full bottle were removed from the room.
- On 4/23/14, at 3:44 a.m. indicated R37 was shouting and yelling and appeared intoxicated. One empty bottle of vodka and one 75% emptied were found in R37 ' s room. At 12:04 p.m.

staff checked R37 ' s room and found two empty bottles in his room. Staff discussed discharge plans and R37 reported he wanted to stay and the facility and was told it was not ok to drink alcohol at the facility. R37 was offered a transfer to a facility that allowed drinking and he declined. At 3:13 p.m. R37 approached staff and appeared to be intoxicated with slurred speech and smelled of alcohol. R37 stated he would like to get help to have alcohol removed from his body. Staff called 911 and police escorted R37 to detox.
- On 4/24/14, at 9:30 a.m. indicated R37 reported chest pain and shortness of breath. R37 was noted to have a blood pressure of 162/103 and a pulse of 88 and was noted to smell of alcohol.
At 12:01 p.m. indicated R37 approached staff and " again was clearly intoxicated." Social worker (SW)-A and a police officer entered R37 ' s room and found an empty vodka bottle under the mattress. The officer told staff he could not remove the resident from the building because R37 was not disturbing anyone and was not aggressive or assertive in any way.
A facility Progress Notes dated 4/25/14, at 3:40 a.m. indicated R37 was observed walking into and out of another resident (R117) room and " seemed to be like an exchanged of some transactions." The note indicated staff believed this was a trade and staff would need to monitor R37 for alcohol consumption. " A few hours later " R37 was shouting and appeared " intoxicated " and a 75% emptied bottle of vodka was found in R37 ' s room.
- On 4/25/14, at 9:58 a.m. noted R37 " was clearly inebriated ", had slurred speech and could barely wake up. R37 refused to provide his resource where he continued to get alcohol.
- On 4/25/14, at 3:24 p.m. indicated staff reported R37 appeared intoxicated, was outside swaying back and forth, was very talkative with staff and smelled like he had alcohol on his breath.
- On 5/2/14, indicated R37 removed the wander guard and refused a new one to be placed.
- On 5/3/14, indicated R37 was walking in the hallway " wobbling " and requested staff give him a shower at 3:00 a.m. R37 was unable to maintain his balance and appeared " intoxicated." Two almost empty bottles of vodka were found in his room.
- On 5/5/14, at 3:53 p.m. indicated R37 had exhibited signs of intoxication with an unsteady/staggering gait, slurred speech, odor of alcohol and unkempt appearance. R37 was noted to have continually gone outside, stated he had called a limo and was going to Las Vegas.
- On 5/5/14, at 4:56 p.m. indicated R37 had slurred speech, smelled of alcohol and had a staggering gait.
- On 5/5/14, at 10:25 p.m. indicated R37 was " intoxicated " and was found with an almost empty bottle of vodka.
- On 5/6/14, which indicated it was a late entry for 5/5/14 at 6:00 p.m. indicated R 37 was noted walking outside towards the back of the building. R37 was noted to be walking alone with a staggering gait. When approached by staff, R37 stated he was going to Las Vegas. No odor of alcohol was noted and when asked what he had been doing to become so impaired, R37 reported he had gotten cocaine and heroin from another resident and confirmed he had been injecting the drugs. Several scattered purple bruises were noted on his forearms. At 1:55 a.m. indicated R37 reported his heart was thumping out of his chest and was found to have a blood pressure of 168 /118 with a pulse of 118. At 4:37 a.m. indicated R37 exited his room without clothing and had a strong odor of alcohol on his breath. Four empty bottles and one unopened bottle of alcohol were found in R37 ' s room and were removed by staff. Also noted R37 started having tremors and palpitations with increased pulse and blood pressure due to alcohol withdrawal and demanded medications.
- On 5/7/14, at 12:04 p.m. indicated R37 was exhibiting signs and symptoms of intoxication

as evidenced by odor of alcohol, unsteady/slow/staggering gait, slurred speech, confusion and unkempt appearance. A pattern of missed pain clinic appointments due to intoxication was noted and indicated further appointments would not be made due to ongoing intoxication and inability to follow through with appointments. In addition, R37 had a full bottle of vodka and refused to give the bottle to staff. The note indicated the administrator directed if R37 was unwilling to willingly give staff the alcohol bottle, it was ok for the resident to keep the alcohol and if he became drunk or disruptive to call the police and have him taken to detox.
- On 5/8/14, at 3:42 p.m. indicated R37 was placed on 1:1 observation related to incidences of getting intoxicated.
- On 5/9/14, indicated R37 " was clearly intoxicated." An empty pint bottle of vodka was found in his room and was noted as the third empty pint bottle taken from R37 ' s room in a 48 hour span of time.
- On 5/10/14, indicated R37 was observed giving his credit card to R117 on 5/9/14. A second note indicated R37 returned from LOA accompanied by a friend of another resident (R1). R37 was observed to be shaky and verbalized he was unsteady on his feet. R37 was noted to have shakiness, profuse sweating, sluggish pupils and was noted to have a blood pressure of 178/130 and a pulse of 120s to 140s.
- On 5/11/14, indicated R37 had a drug screen positive for methadone at the hospital. R37 did not have a prescription for Methadone.

The Physician ' s orders and Nurse Practitioners orders were reviewed and the following was noted:
- On dated 1/8/14, included a diagnosis of alcohol abuse noted to have also occurred in the facility.
- On 2/5/14, indicated R37 recently had a bottle of alcohol hidden in his pillow case and was noted to smell of alcohol.
- On 2/28/14, directed to discharge R37 to another facility (that allowed drinking).
- On 3/5/14, directed " do not call on-call MD [physician] or NP after hours if resident is intoxicated unless he is medically compromised. Allow resident to go to bed [and] sleep."
- On 4/9/14, indicated R37 was hospitalized from 4/1/14 from 4/8/14, with respiratory distress and pneumonia with pleural effusions requiring chest tube placement, treated for sepsis and required thoracentesis. A NP note dated 4/9/14, indicated R37 required ongoing Kristalose and Mag-ox for chronic cirrhosis.
- On 4/10/14, included diagnoses of chemical dependency, hepatic cirrhosis, and chronic pain.
- On 4/24/14, included " place wander guard [sic] for res. [resident] safety " and " pursue guardianship." A second order dated 4/24/14, indicated NP was aware of R37 ' s alcohol, to encourage R37 not to use and if R37 appeared intoxicated it was ok to administer all medications as ordered.
- On 5/6/14, directed to recheck R37 ' s blood pressure in one hour, call NP if diastolic blood pressure was greater than 100, give Ativan 0.5 milligrams orally every six hours as needed times three days for withdrawal symptoms (tremors, shaking, and increased heart rate) and a urine toxicology screen.
- On 5/7/14, directed no LOA-supervised or other. Also, the NP included an order for a Wanderguard to check placement every shift for elopement even though R37 had cut off the Wanderguard on 5/2/14, and refused to have a new one placed.

A Clinical Summary dated 2/3/14, indicated " refer to chemical dependency counselor and

pain psychologist." A prescription dated 2/3/14, ordered a behavioral health evaluation for diagnostic evaluation and treatment recommendations for R37.

A Physician Visit/Progress Note written by a licensed drug and alcohol counselor (LADC) dated 2/13/14, indicated R37 was referred to assess behavioral health, chemical dependency and pain and included an order/comment of " strongly recommend a full psychiatric assessment " within 60 days to evaluate medications and therapy. The medical record lacked evidence of the psychiatric assessment having been completed.

R37's care plan was reviewed and noted the following:
- The vulnerable adult care plan revised on 3/5/14, indicated R37 may leave to go to medical appointments without supervision and was not safe to go on other unsupervised LOAs.
- The Depression care plan dated 3/11/14, included alcohol abuse and directed to arrange psych services as needed.
- A behavioral symptoms care plan revised on 3/16/14, indicated alcohol consumption and concealing alcohol in room with a goal to have fewer episodes of alcohol abuse per week. The interventions included; encourage attending AA or other substance abuse support programs, assisting with arrangements as needed, may go to medical/dental appointments unsupervised and no other unsupervised LOA.
- A risk for elopement related to alcohol abuse and psychoses care plan revised 3/16/14, noted a history of returning to facility after unsupervised LOA displaying signs of alcohol consumption and/or with a supply of alcohol. The goal included R37 would not to leave facility unattended unless a medical appointment and R37 ' s safety will be maintained. The interventions indicated R37 cut off the wander guard and refused to have another one placed and was placed on 15 minute checks. Check room if suspected alcohol.
- A Mood/Behavior care plan initiated on 4/23/14, indicated R37 had a history of alcohol abuse and actively drank at the facility. The care plan noted R37 was sent to detox on 4/23/14, due to being very intoxicated. The goal indicated R37 would like to stop drinking alcohol with an intervention to check room daily for alcohol and check R37 for signs of intoxication.
- An at risk for adverse reaction from medications related to alcohol care plan dated 4/25/14, indicated NP was aware of R37 ' s alcohol, nursing staff to encourage to restrain from using alcohol and if R37 appeared intoxicated it was ok to administer medications. Another intervention dated 5/8/14, included 1:1 supervision due to alcohol abuse and intoxication.

A Vulnerable Adult Assessment dated 3/16/14, indicated R37 had both past and recent substance abuse, was not safe for unsupervised LOA except to appointments and had significant alcohol use when out on unsupervised LOA.

The quarterly Minimum Data Set (MDS) dated 3/18/14, indicated R37 ' s cognitive skills for daily decision making was independent with consistent/reasonable decisions.

Review of the Interagency Transfer Orders dated 4/1/14, included Non-Hospital Problems of alcohol intoxication and alcohol withdrawal noted 9/23/13, and substance abuse noted 2/23/14.

A Care Conference Summary dated 4/1/14, indicated a discharge plan of " discharge to a facility that allows drinking, he declined, has been sober since." The summary indicated R37

had a history of drinking and bringing alcohol in the building or going on unsupervised LOA and R37 had stayed in the building with no alcohol use since 3/3/14.

A Resident Refusal of Medical Treatment Form dated 5/5/14, indicated R37 was " wander guarded [sic]" to the facility for resident safety related to history of alcohol abuse, staggering gait and slurred speech. With the risks of refusing noted as facility wouldn ' t be aware if R37 left with potential for fall risk and injury off facility grounds with no one to provide aid.

A letter dated 5/10/14, indicated a first offense of the facility smoking policy as R37 reported to staff he had gotten cigarettes from R9.

On 5/7/14, at 10:02 a.m. the ombudsman was interviewed and wanted to know if surveyors were aware of residents purchasing alcohol and drugs. Reported she believed residents were giving other residents money and credit cards to go out and purchase things for them. She reported a resident with chemical dependency problems had been drinking, room checks were being completed and staff was finding alcohol bottles. Reported R37 was being found intoxicated and she was involved in discussing abuse prevention planning if intoxicated and the effects of alcohol on R37 ' s medications. She reported the physician was encouraging discharge planning to a facility that allowed drinking. She also indicated a number of residents were accessing illegal drugs at the facility. The ombudsman reported she had been at the facility on 5/6/14, to discuss the concerns.

On 5/7/14, at 10:05 a.m. the administrator stated the ombudsman was called 5/6/14, to speak with the facility regarding R37 giving his credit card to R117 to purchase alcohol and R37 had been " drunk for days."

On 5/8/14, at 11:51 a.m. licensed practical nurse (LPN)-B stated she was aware R37 had a doctor ' s order and can drink as long as there are no behaviors and if behaviors occur she can call detox. LPN- B stated she did not know where R37 got alcohol from.

The safety monitor, nursing assistant (NA)-M was interviewed on 5/8/14, at 11:55 a.m. and stated he has not seen R37 exchange money or alcohol and stated he has heard about exchanges but could not remember who he heard it about.

The HUC was interviewed on 5/8/14, at 12:15 p.m. and stated " it ' s a nightmare; [R37] is drunk every day." She stated she had her suspicions about where the alcohol was coming from but when she asked R37 he refused to tell her. R37 told her he had given his credit card to R117 to buy things for him. The HUC stated R37 was drunk every day when she left and was drunk when she came in on 5/8/14. She reported that on 5/5/14 or 5/6/14, she had observed R37 in the parking lot, was told there was nothing they could do by the facility administrator and requested assistance from the operations director to get R37 back in the building. The HUC reported she had requested the safety monitor to put R37 on every 15 minute checks but knew that was not enough. She stated other residents were on 1:1 for drug use and wanted to know what the facility was going to do to keep R37 safe. The HUC stated " we ' re not doing [R37] any justice " and " it ' s a shitty plan to keep people on 1:1 forever."

On 5/10/14, at 1:30 p.m. the administrator stated R37 had been taken to the hospital for DTs.

Upon interview on 5/12/14, at 8:59 a.m. registered nurse (RN)- B and LPN-A stated R37 had gone to the bank with a friend on 5/10/14, and were not sure if the 1:1 had gone to the bank or not and would have to check.

The director of nursing (DON) was interviewed on 5/12/14, at 9:05 a.m. and stated a "guy named [friend of R1]" who is a friend of R1 went with R37 to the bank. The DON stated both the administrator and the consultant administrator were aware that other-J was a friend of R1. The DON stated the 1:1 refused to go to the bank with R37 and other-J signed R37 out. The consultant administrator was going to go with R37 and other-J to the bank until it was decided the facility was not comfortable with her going with to the bank either. The DON stated he reminded R37 he could not go because he had orders for no LOA and the administrator, consultant administrator and the social worker decided R37 could go anyway. The DON stated he had no idea where R37 had gotten methadone from.

When interviewed on 5/12/14, at 1:35 p.m. SW-A stated during a room search a quart bottle of alcohol had been found in R37 ' s room and 3 plastic containers with the labels removed which nursing indicated were methadone containers.

When interviewed on 5/12/14, at 1:52 p.m. the administrator stated he and social worker (SW)-A were involved in R37 ' s LOA. The administrator stated SW-A was under the impression R37 was allowed to go on LOA and R37 returned with a card from Walgreens so they knew he hadn ' t followed his agreement to only go to the bank. The administrator stated other-J would not be able to take R37 on LOA again. The administrator stated he was not aware R37 had orders for no LOAs and he believed SW-A and had not checked the chart. The administrator stated he was also not aware of other-J's relationship with R1 and the Don had not told him about the order for no LOA and other-J's relationship with R1.

Upon interview on 5/13/14, at 8:09 a.m. SW-A stated on 5/10/14, prior to R37 leaving on LOA she was told by nursing (she could not remember who) that R37 could leave the facility with supervision. She reported she made it clear to other-J that R37 could only go to the bank and nowhere else. She stated she told other-J that R37 would try and talk him into going to the liquor store and R37 could not go there. other-J reassured her he had been sober for ten years and would never take R37 to a liquor store. The SW- stated after R37 left, nursing (did not remember who) told her R37 had orders for no LOA and other-J was R1 ' s drug dealer. She stated it would have been nice to know the information before she had allowed R37 to go on a LOA. She stated she had not looked at R37 ' s chart because she trusted nursing knew the correct information. She also stated R37 had been keeping alcohol under the edge of his mattress and she could not understand why nursing didn ' t find the alcohol when they made the bed.

When interviewed on 5/13/14, at 2:20 p.m. the administrator was asked about the discrepancy between what the DON reported had happened on 5/10/14 and what the administrator stated had happened and he verified he was not aware R37 had an order for no LOAs.

Although R129 was identified by the facility to require a staff member to be assigned to follow/accompany R129 one to one (1:1, to be within arms length at all times); R129 reported to the facility she obtained and consumed cocaine on 5/3/14. R129 obtained and consumed

alcohol on 5/11/13, at 4:00 a.m. causing her to require hospitalization in the intensive care unit (ICU) and intubation (mechanical ventilator assisted breathing) for a blood alcohol level of .323.

The admission Minimum Data Set (MDS) dated 2/1/14, indicated R129 had a Brief Interview of Mental Status (BIMS, a tool to determine potential cognitive losses) score of 15, indicating R129 was cognitively intact. The MDS identified R129 was Independent with all activities of daily living (ADLs). The MDS identified R129 rejected cares and wandered 1-3 days during the assessment period. R129's Care Area Assessment (CAA) for mood state dated 2/7/14, identified R129 had poor judgement, impaired cognition and poor decision making and had diagnosis of "substance induced psychotic disorder, opiate dependence, and alcohol dependence." The CAA identified further diagnoses of hepatitis C, "Hx [history] of drug alcohol use" and depression. R129 was identified to be independent with activities of daily living (ADLs). Although the CAAs identified R129 had a history of drug and alcohol dependence, the CAAs lacked documentation of interventions to promote sobriety while in the facility, such as but not limited to offering chemical dependency (CD) treatment.

The Vulnerable Adult Assessment dated 3/18/14, identified R129 had a history of alcohol abuse and identified R129 had, "Ongoing drug-seeking & over medication with additional Rx [prescriptions]." R129 was identified as being susceptible to abuse "r/t [related to] substance use, varies" and required supervision with LOA (leave of absence) from the facility. The assessment identified R129 had a behavior and history of rummaging through others belongings and "drug use." The assessment indicated R129 was placed on 1:1 due to rummaging in other resident rooms.

R129's Smoking Evaluation dated 3/18/14, identified to "monitor for ETOH [alcohol] use or oversedation." The North Memorial Medical Center lab report indicated a Drug Screen was completed, identified the use of Morphine, Oxycodone, effexor, Soma, Tylenol, desmethylvenlafaxine. The clinical record lacked documented verbiage regarding the circumstances of the drug screen.

The Pain Evaluation and Management Plan dated 5/1/14, identified R129 had chronic pain daily, identified a history of pain and drug seeking. "Resident is on a restricted recipient program due to drug seeking [a program where only one pharmacy may fill the prescriptions for narcotics, a program to potentially deter drug seeking behaviors]." The evaluation identified R129 had a history of "drug seeking" and indicated, "MD is aware of drug seeking behaviors and aware pain is not controlled. MD will not order any more pain medications for resident due to her drug seeking behaviors. Resident is on the restricted recipient program due to drug seeking."

A Incident/Accident Report dated 5/3/14, at 11:00 p.m. indicated R129 "told the nurse that she took cocaine earlier during the shift." The note identified R129 to be "very sweaty, weak and tired" and "she looked very sleepy." The resident's pupils were "large and nonreactive to light." The note indicated the nurse asked R129 what she took and indicated R129 then "confessed" to taking cocaine. The report documentation indicated R129 was sent to the emergency room (ER), identified, "She said, 'I knowingly took cocaine'" and, "Resident has been sent to ER [emergency room]. She will continue to be on 1:1 when she returns to the nursing home." The report identified R129 had a history of drug use, "resident is on a 1:1,"

"remains on a 1:1," and "Hx [history] drug seeking, receiving drugs from others." Although the incident occurred on 5/3/14, the form was signed by the director of nursing (DON) on 5/5/14.

An Emergency Department Chart [a form from the ER] dated 5/3/14, identified R129 reported to have taken cocaine at the facility. The note indicated R129 took the cocaine to "help with the pain" in her abdomen. "Patient [R129] is triaged directly back to ED [emergency department or ER]." The Clinician History of Present Illness section of the form identified R129 reported to hospital staff she snorted cocaine "5 hours ago." Although R129 was identified to go to the ER for a potential drug overdose, the Emergency Department Chart did not address the cocaine use and only addressed R129's pain. The labs indicated various pertinent laboratory values were checked by the ER, but lacked a toxicity screening for cocaine, drug or alcohol use. R129 was given two doses of dilaudid (a narcotic pain medication) and returned to the facility at 6:00 a.m. with no new orders. The clinical record lacked evidence the administrator, or the State agency were notified of the incident. The clinical record lacked evidence of new interventions to address R129's report of drug use, such as CD treatment. In addition, the clinical record lacked evidence the use of cocaine by R129 was investigated to determine how the drug may have been obtained while the resident had a staff assigned to her 1:1.

A unlabeled typed page insert immediately in the front of R129's paper chart dated 4/15/14, indicated, "If Res [resident] goes to the Hospital for any reason she is to go to St. Joes [sic] Hospital Only per primary care MD [medical doctor] and the MN [Minnesota] restricted recipient program" and further directed "all scripts [prescriptions] no matter where they come from must be approved by [MD's name] or their oncall MD."

On 5/7/14, at 10:24 a.m. the ombudsman was contacted via telephone per an emailed request to be contacted by the surveyor. The ombudsman stated she had been informed by a nurse of the facility of "drug use" and "drugs shared with residents" at the facility "a couple days ago." The ombudsman stated rather than call the nurse back, she came to the facility "yesterday [5/6/14]," had spoken with various residents of the facility and communicated with the facility's management regarding drug, alcohol and discharge planning concerns. The ombudsman stated residents, facility staff and the ombudsman were "suspicious residents may be giving money or credit cards to another [resident] to go out and purchase things [alcohol and drugs] for them." The ombudsman stated the police had been notified and been to the facility "quite often." The ombudsman stated there were problems with residents who were chemically dependent, who were drinking in their rooms and facility staff were conducting room checks per shift and "finding empty alcohol [vodka] bottles" in resident rooms. The ombudsman stated residents had been found by facility staff to be "intoxicated" in the facility. The ombudsman specifically stated R129 was on a 1:1 and had "somehow" obtained and consumed and "illegal drug [cocaine]" in the facility. The ombudsman stated although the facility had employed "three temporary social workers," the ombudsman stated she felt "social services is overwhelmed" due to "no policies and procedures in place."

R129's care plan for safety/vulnerability dated 3/25/14, identified R129 was able to make her needs known, but was vulnerable due to her history of opioid abuse and drug seeking behavior. A care plan intervention dated as initiated 4/11/14, directed R129 required "1:1 supervision at all times to keep Gail safe and prevent drug use" Additionally, the care plan directed, "1:1 to discuss CD concerns, encourage [R129] to consider going to a treatment

facility." The care plan for mood/behavior dated 3/25/14, identified, "I have a history of opioid abuse and I exhibit drug seeking behavior as evidenced by attempting to see several different MD's to obtain prescription medication. I have a history of walking into other residents rooms and looking thru their personal belongings."

Review of the undated Group 7 nursing assistant (NA) assignment sheets (forms carried by the NA staff for quick reference direction on the resident care plan) indicated R129 was continent, independent with ADLs and "1:1" in larger bold print.

Nursing Progress Notes:
- On 3/14/14, at 6:18 p.m. a note indicated R129 "had an appointment yesterday and was immediately transferred to the hospital." The note indicated "while on the way home [unclear on prior destination]" R129 "stopped at Cub foods" and picked up a prescription for eight tablets of Norco 5/325 milligrams [a narcotic and Tylenol pain medication]. The note indicated R129 "failed to alert staff and stated that there were no new orders." The hospital, oncall MD and triage nurse were called and updated on R129's "history of narcotic use."
- On 3/16/14, at 6:34 a.m. a note indicated R129 was "caught going through another resident's belonging." The note indicated a resident observed R129 "opening her purse. The note indicated R129 admitted going in the room but denied taking "any money."
- On 3/17/14, at 3:34 p.m. a note indicated, "Resident still remains on 1:1 observation." Although the note identified R129 was assigned a 1:1 staff, the clinical record lacked documentation regarding starting 1:1 with the resident. At 10:17 p.m. a note indicated R129 "called on call [physician]," reported two incontinent episodes, her "lower extremities [sic] hurts" and edema. Staff encourage R129 to "sit and rest the leg" but R129 refused and stated the pain became "unbearable." R129 stated she wanted to go to the ER for evaluation and "called 911 herself." Although a previous note indicated R129 required a 1:1, the note indicated R129 would "take care of her own transportation to ER" and "left the facility" at 10:20 p.m. The note did not indicate if a staff person accompanied R129 to the appointment.
- On 3/18/14, at 3:56 a.m. a note indicated R129 returned from the ER at 3:30 a.m. with "new order. No new concern at this time." At 2:31 a.m. a note indicated R129 reported to the business office manager she felt "depressed due to being on a 1:1." The concern was reported to social services and the nurse on duty.
- On 3/20/14, at 10:08 a.m. the physician identified by R129 as her new primary care physician (PCP) was contacted regarding R129 living in a health care facility, that orders must be coordinated with the nursing home, gave update regarding R129 changing her PCP, trips to the ER and "drug seeking beh's [behaviors]." The note further indicated, "Transport informed to bring pt [patient] to/from the clinic and no other stops to include the pharmacy." At 2:45 p.m. R129 "went for her appointment to her care provider today. At the appointment, resident was given script for Ambien (a hypnotic medication used to promote sleep). Resident said she filled the prescriptions at the pharmacy but she misplaced the pills. patient [sic] will be monitored for increased sedation." Although the previous note indicated the transportation company was notified of restrictions in R129's transport, the note identified R129 was still brought to the pharmacy. At 3:11 p.m. a note indicated R129 reported she "lost" the Ambien. The note indicated the "escort" assigned to go with R129 to the appointment, reported R129 "went to the pharmacy and filled her script." The escort reported R129 would not allow the staff to "see the script" or the filled prescription. "Per the escort [R129] went to the bathroom. On the ride home [R129] reported that she lost the bottle of pills. Upon return she reported that same story to this writer and requested that staff get a new script." The physician was

contacted and verified a prescription for Ambien and R129 loosing the medication was reported. The physician denied taking R129 on as a PCP and referred the facility to R129's current PCP.
- On 3/28/14, at 11:52 a.m. a note indicated R129 met with social services and "Also spoke with resident regarding her drug seeking. She [R129] admits that she is addicted to pain medication." The note indicated R129 was scheduled to see psychologist and encouraged R129 to discuss her concerns and her "addiction."
- On 4/4/14, at 7:11 p.m. a note indicated R129 met with psychologist. The note indicated R129 met with DON and social worker after the appointment. The note indicated R129 "does not like being on 1:1's" and the DON "informed her [R129] she was on 1:1's because of her frequent drug seeking." The note indicated R129 "admits that she has urges to seek medications to manager her pain" but "denies addiction." The note indicated "inpatient treatment" was discussed, such as drug and emotional counseling, R129 rejected the treatment. The note indicated the psychologist agreed with the need for treatment and "However, should resident continue to display behaviors of drug seeking and declines treatment a CD commitment maybe considered to be in her best interest."
- On 4/7/14, at 10:47 a.m. the note identified R129 remained on 1:1 and R129 had requested to be taken off 1:1's. The note indicated R129 was on 1:1 "for going into other resident rooms."
- On 5/4/2014 12:03 a.m. a note indicated R129 "told the nurse that she took cocaine earlier during this shift." The note recapitulated the data from the incident report dated 5/3/14. The note further indicated, "The nurse asked the resident what she had taken and where she got it from or [who] gave it to her. She took the nurse to [room number for R1]. She also report that the package that resident in room [R14's room] swallowed earlier was marijuana." R129 accepted to to to the ER for evaluation. "The nurse requested for toxicology screen and that a copy should be send [sic] to the nursing home per the administrator order." Although the note indicated R129 obtained cocaine from another resident and identified R129 involvement with a second resident and a different illegal drug, the clinical record lacked evidence law enforcement was notified, the clinical record lacked evidence a toxicology screen was obtained. Although R129 was identified to have a 1:1 assigned to follow her, the clinical record lacked evidence the incident of R129 obtaining and ingesting illegal drugs was identified, reported to the administrator immediately, reported to the State agency or investigated. In addition, the clinical record lacked evidence R129 was further evaluated for chemical dependency, had immediate changes or increases in monitoring to ensure her supervision and safety. At 7:23 a.m. a corporate nurse documented R129 approached the nurse and R129 "admitted to writer that she took drugs given to her by another resident in this building. She was able to verbalize insight related to why she regretted this choice." The note indicated R129 "remains on 1:1. 1:1 was present during this conversation." The clinical record lacked evidence 1:1 monitoring of R129 was reviewed after being identified to have accessed illegal drugs twice while on 1:1 monitoring.
- On 5/4/13, at 12:12 p.m. a note indicated an attempt was made to notify R129's doctor regarding the incident from 5/3/14. The operator at the doctor's office informed writer that they are only accepting on-call emergencies. Staff will notify doctor in the morning of 5/5/14. Resident was returned from the hospital at 6:00 a.m. with no new orders. Although R129 had two doses of dilaudid administered at the ER, R129 immediately requested pain medication upon return to the facility [the note was not closed or signed by the writer].

On 5/5/14, during the initial tour of the facility NA-K was observed to be sitting in a chair

directly outside R129's room, the door was open and R129 was observed to be lying in bed, fully dressed with her eyes closed. NA-K stated she was assigned to be a 1:1 for R129. NA-K stated she needed to remain with R129 and the 1:1 was due to R129 going into "other resident rooms."

On 5/6/14, at 8:30 a.m. R129 was observed to have NA-M (1:1 staff) follow her down the hallway and out to the smoking patio. R129 retrieved a cigarette from her front pocket, lit the cigarette and replaced the lighter in the side pocket (right). NA-M stood on the side walk outside the designated smoking area with a large cinder landscape block planter between R129 and NA-M. NA-M remained out of arms length from R129 and was observed to talk with the female staff monitoring the smoking area, looking away from R129. R129 stood with other residents and smoked her cigarette out of direct sight of NA-M.
- At 8:33 a.m. R129 sat on a bench with another female resident on the other side of the smoking patio and out of sight of NA-M. NA-M stood on the edge of the cinder landscape block planter edge and chatted across the smoking area to the same female staff in the smoking area. NA-M was not near enough to R129 to interfere if concern.
- At 8:37 a.m. staff spoke to each other and then NA-M turned his back on smokers (including R129) and spoke to a male in a car in the parking lot. NA-M then jumped down and entered the smoking area to speak to the female staff directly. NA-M was not within arms length or direct eye sight of R129.
- At 8:38 a.m. R129 stood up and walked to the front entrance of the facility. NA-M jumped to catch up with R129 and followed directly behind into the facility. R129 then pushed the wheelchair of a male resident entering the building and walked rapidly down the hallway.
- At 9:34 a.m. R129 was observed to push R62 in her wheelchair out of the facility and to the smoking patio. While pushing R62, R62 held out a cigarette and R129 took it out of R129's hand and tucked it into her own hand, concealing the cigarette. NA-M followed behind R129 and did not appear to notice or intervene when R129 took the cigarette. NA-M immediately turned his back to R129 once on the smoking patio, applied a surgical mask and talked to the female staff assigned to monitor the smoking patio. Both staff had their backs to R129.
- At 9:35 a.m. the female staff pushed R22 back into the facility and pulled the smoking cart behind her. NA-M remained outside with R129 near the smoking patio watching a van in the parking area. NA-M had his back to R129 and was approximately 14 feet away from R129. Multiple other residents were observed to come and go from the smoking patio. R129 interacted freely with the other residents unsupervised.
- At 9:37 a.m. R117 was observed to come out of the facility, light his cigarette at the front entrance, jump up onto the cinder landscape block planter with ease, and walk across the top of the planters with a skipping gait. Neither the smoking monitor and another female staff in the area did not intervene. R117 was observed to speak briefly with the female smoking monitor, approach R36, pull out a large wad of cash and exchanged money with R36. R117 then went to R129 and R62. R117 remained with both residents smoking and talking. R129 sat on the edge of the cinder landscape block planter, NA-M was not within arms reach of R129, was not within eye site of R129 and was not supervising R129. NA-M remained with the other female staff, back to R129.
- At 9:40 a.m. R129 stood and pushed R62's wheelchair towards the front entrance of the facility. Although NA-M followed, NA-M did not come into arms reach of R129 until the front door of the facility. R129 was observed to push the wheelchair down the hallway with NA-M walking beside (to the left) of R129.
- At 10:19 a.m. R120 was observed to walk out of the facility and onto the designated

smoking area. NA-M followed approximately ten feet behind outside, then stood on the sidewalk. NA-M then left the area and returned into the facility. R129 retried a cigarette from a pack. Multiple residents were observed to be coming out to smoke. The smoking monitor was on the patio but did not watch R129. R129 sat on planter side and spoke with R14.
- At 10:23 a.m. NA-M returned to the smoking area from inside and immediately stood on sidewalk on other side of planter approximately 20 feet away from R129. NA-M made no attempt to make contact with R129, was not in arms reach of R129 and did not make eye contact with R129. NA-M spoke with the smoking monitor.
- At 10:25 a.m. NA-M and R129 returned to the facility. NA-M walked to the left of R129 and within arms reach of R129 upon entering the building. Once in the building, NA-M remained in arms length while walking down the hallway towards the nursing desk.

On 5/8/14, at 11:22 a.m. R129 was observed to be laying in bed, NA-E was observed to be making the roommate's bed. NA-E verified she was assigned to be the 1:1 with R129. NA-E offered to stand outside the door while R129 was interviewed and the door to the room was closed. R129 stated she was waiting for an apartment and verified she "snorted cocaine" on 5/3/14, and verified she reported it to facility staff. When asked when this occurred, R129 stated it was "on Saturday [5/3/14]." When asked where she snorted the cocaine, R129 stated "not in the facility," and explained she received and snorted the cocaine "down the block." When asked if she received the cocaine from a resident (as indicated in the clinical record), R129 stated "someone from the street" gave it to her, but denied being able to remember their name, description, or gender. When asked how much cocaine she snorted, R129 stated "about $20 worth." When asked what happened after she reported the cocaine use to the facility, R129 stated, "They sent me to the hospital." and then stated, "They [facility staff] accused me of giving it to someone else." R129 explained she was accused of giving R14 cocaine on the same day. R129 stated the staff who accused her was the 1:1 staff assigned to her at the time. R129 stated the 1:1's name (NA-G) and explained the one to one was assigned to be with her at all times. When asked why she had a 1:1 assigned to her, R129 stated it was because she was accused of "rummaging" in other residents rooms and stated the 1:1 was assigned to be with her "since March." When asked where the 1:1 was when she received the cocaine from the person on the street, R129 shrugged looked up and away and stated, "I don't know. She wasn't with me." R129 verified she was "a recovering addict." When asked after snorting the cocaine, if the facility assisted her with rehabilitation or psychiatric services, R129 denied social services were offered including assistance with drug and alcohol treatment. R129 stated she would like to go to outpatient rehabilitation for drug addiction. R129 further added she was "not checked" for cocaine use at the emergency room of the hospital and stated the emergency room gave her two shots of dilaudid. R129 explained she "thought" that was going to happen, but she was "surprised" to have received doses of dilaudid. R129 appeared relaxed, but uncomfortable during the interview and was hesitant to answer questions and would not make eye contact.

On 5/8/14, at 11:30 p.m. NA-G verified their 1:1 responsibility was to remain at arms length with R129 at all times.

On 5/8/14, at 11:41 a.m. NA-J verified she worked on R129's unit and stated she was not aware of alcohol or drugs being exchanged on "my shift," but stated she was aware of situation "weeks ago" when she came to work, she noticed R14 was not in his room. NA stated she asked where he was and a nurses aide "who was R129's 1:1" saw R129 go into

R14's room and "exchange something." She stated she learned R14 was sent to the hospital for "eating something." Stated she had not witnessed any exchanges and stated if she saw any she'd report to the nurse.

On 5/8/14, at 11:40 a.m. NA-S stated the had seen alcohol bottles in residents' rooms and smelled alcohol on another resident and reported it to a nurse. NA-S was unclear when. NA-S stated they "Heard rumor" of a resident dealing drugs in the facility. NA-S further recalled seeing a resident with marijuana in January or February. NA-S stated she "could smell it." NA-S further stated when she was assigned to be the smoking monitor, she heard residents talk about it. NA-S stated they believed R117 was a dealer. When asked why, NA-S stated R117 left the facility "a lot" and went to the gas station. NA-S further stated she believed R117 was talking money from residents to also "buy cigarettes." NA-S stated she was unclear what happened to the resident after she reported the marijuana, but stated the nurse was "agency" and told her the resident "could have it."
On 5/8/14, at 11:55 a.m.. a housekeeper (H)-A was asked if they were aware of any residents drinking alcohol in the facility. H-A stated they had seen "empty pint bottles [vodka]" in the trash "by front doors." When asked the last time she found vodka bottles in the front trash, H-A stated, "A few months ago." H-A stated they would report any alcohol bottles found in the facility "and has." H-A was unclear which resident was drinking, but believed the pint bottles were placed in the front trash so they "wouldn't get caught." When asked if H-A knew where the alcohol bottles came from, H-A stated she was unclear, but thought they may have been provided by family.
On 5/8/14, at 12:03 p.m. LPN-H stated she confiscated alcohol from R37. LPN-H verified alcohol was provided to R37 and suspected to other residents of the facility, but was unclear how the alcohol was provided to the resident. LPN-H verified R129 was on 1:1 and 1:1 should remain in arms reach of the resident. LPN-H was unaware R129 had obtained cocaine in the facility.
On 5/8/14, at 12:10 p.m. the health unit coordinator (HUC) stated she was aware of resident drug and alcohol use in the facility. HUC stated there was "always hearsay between residents they're selling [drugs and alcohol] to each other" included hearsay stories regarding heroin and cocaine "it's always stories." HUC stated she has put "a lot of time in" reporting to hospitals, clinics and ER if a resident was a "drug seeker" and on restrictive recipient program. HUC stated R129 was going to ER, calling herself and getting Ambien, oxycodone and "is happy after." HUC stated R129 "refuses to tell them the script." HUC stated she "goes to the social worker to report" these concerns and when R129 denied she had pills, "but I know she did get them." HUC stated "every week" R129 had picking a new doctor, stated R129 was not giving paperwork to physicians or altering the paperwork. HUC verified she was aware of residents consuming alcohol in the facility, verified she was aware of residents becoming intoxicated, but was unclear where the alcohol was coming from. "I feel like we're supposed to do something, 'cuz no one will take charge." HUC verified she was aware of R129 obtaining cocaine and going to the ER. Stated she was not clear if there was a toxicology screen, but stated she had asked for them in the past. HUC stated she and other facility staff believed R129's "son" (HUC made quoting gesture with both hands) was also R129's dealer and described him as a native man who R129 called her son, was at the facility at the time R129 snorted cocaine.

On 5/8/14, at 3:59 p.m. NA-F stated they were scheduled as the safety monitor in the facility. NA-F stated they were aware of a resident "caught with several bottles of vodka" in their room

but denied knowing about drug use amongst residents in the facility. NA-F stated they would report any suspected drug and alcohol use to a supervisor or the charge nurse. NA-F verified R129 was assigned a 1:1 and the staff should remain in arms reach of R129.

Further review of the nursing progress notes indicated the following:
- On 5/9/14, at 7:31 p.m. the pharmacy was contacted regarding R129's Percocet (a narcotic pain medication) refills and determined R129's prescription had 110 Percocet tablets delivered and outlined the delivery dates and the amounts provided. The note indicated R129 was informed of the information.
- On 5/11/14, at 10:09 a.m. a note written by the health unit coordinator (HUC) indicated North Memorial Medical Center (NMMC) called the facility "requesting" R129's medication administration records (MARs). The note indicated the registered nurse (RN) from the hospital notified HUC R129 had been admitted to the ICU, had been intubated "due to acute alcohol intoxication." The note indicated R129's toxicology screen was "negative for drugs but positive for alcohol with a level of .323." Although R129 had a staff person assigned as 1:1, R129 obtained and ingested enough alcohol to be life threatening. Although the note identified the administrator was updated, the clinical record lacked evidence the State agency was immediately notified of the incident. The clinical record lacked documentation at the time of the incident, lacked pertinent assessment information such as vital signs at the time, descriptions of R129's symptoms, immediate determination of how, when or where R129 obtained the alcohol and/or if the assigned 1:1 was interviewed at the time.
- On 5/11/14, at 10:55 a.m. a note written by the DON, recapitulated R129 was sent to the hospital, identified the time of transport as "around 4 am" on the night shift, and identified R129 was sent in "for intoxication." DON's note indicated R129 had "become weak" and needed to be lowered to the floor." The note indicated two licensed practical nurses (LPNs) were contacted and the NA staff assigned to the 1:1 was called. The note indicated the NA assigned to R129 "reported that resident has been in and out of [R14's room number] but did not notice any exchange of alcohol. She also reported that resident [R14] was upset because the 1:1 has to be in his room too while resident is visiting..." The note indicated R14 denied giving R129 alcohol, but "mentioned that resident had alcohol overnight." R14 denied knowledge of where R129 could have obtained her alcohol.
- On 5/11/14, at 2:49 p.m. a note written by DON indicated NMMH was contacted to receive updates on R129's status. The note indicated, "I also requested to have the resident undergo a chemical dependency assessment to ensure that the resident can be transferred to a residential chemical dependency facility as appropriate, considering the resident's recent hospital trip to the hospital for snorting cocaine."
- On 5/12/14, at 12:07 a.m. a late entry note (no indication for the date or time the late entry was for) indicated an NA staff "report to this writer that resident was in the bathroom longer than usual, came out and appeared drowsy, unsteady gait" and identified R129 was at risk for falling, was verbally aggressive to staff and R129 stated, "I'm drunk." The note indicated the room was checked and no evidence of alcohol was found. The note indicated R129 "threw herself to the floor" and was sent to the ER at 4:00 a.m.

On 5/12/14, at 10:26 a.m. DON verified had not read the plan of correction from the previous survey and and did not know what the plan was. Verified was not aware of policy, system or facility changes made as a result of the survey. DON reiterated he was "waiting for this [the survey]" to "blow over" and then he had plans to work on "problems" in the facility. DON stated he read the online public survey results for the facility from 2013 and stated he was not

given an accurate picture of the facility problems. DON stated there was "no system for monitoring staff to ensure facility policies were followed."
- Was asked regarding R129 obtaining alcohol or drugs while on a 1:1, DON verified the information was not documented in the clinical record. DON stated it was "because the LPN did not have access to document" and explained it was because she was "gone for a longer time." DON was unclear when the documentation was going to be completed, or why the LPN did not have access to computer documentation. DON verified the 1:1 should have been in arms length of R129 at all times. After surveyor explained observations of the 1:1 14-20 feet away from R129 outside the facility, DON stated the staff assigned to the 1:1 on 5/6/14, was "not compliant" with facility policy. DON was unclear on when to report to the administrator and stated he "believed it was within 24 hours," DON was unclear when to report to the State agency and verified he had not documented the investigation. When asked if DON had determined if R129 may have been neglected, having obtained both cocaine and alcohol while being assigned to be supervised by a facility staff person 1:1, DON stated he was concerned regarding the "safety component" and was not aware R129 was neglected. DON further stated he was "unaware how" R129 could have been neglected. DON was unclear how the resident obtained alcohol, but verified R129 was harmed by the incident.

On 5/12/14, at approximately 2:00 p.m. contracted licensed social workers (CLSW)-A and CLSW-B both verified upon hire to the facility, they had been working on "re-writing care plans and discharge planning." SW-A stated there was a third social worker who no longer came to the facility and a part time social worker on evening who was "reducing her hours to once a week." Both verified they had not specifically worked with R129 for chemical dependency (CD) treatment and verified was last noted to be offered to R129 on 4/4/14. Both verified they should have revisited CD treatment options after R129 reported cocaine use on 5/3/14. Both verified they did not know R129 was hospitalized for alcohol toxicity and expressed they "should have been notified." Both stated they were not in the facility over the past few days due to the facility not paying their company's bill. SW-B stated she was concerned for the residents of the facility and verified R129 should have been reassessed after obtaining cocaine. Both verified R129 was harmed. At 2:43 p.m. CLSW-A stated, " I cannot imagine how a resident who was on 1:1 would get that much alcohol in her system and when I got here on Sunday I came to the office to open the computer to see what happened and guess what, there was no nursing notes. I went outside to the desk and told the administrator and DON to get the nurse in to document and have the 1:1 fired. There are so many people here than I have seen on 1:1. For me 1:1 means the person needs to be somewhere else not at the nursing home. "

The Special Staffing - One to One Assignment policy dated as reviewed 5/2013, indicate 1:1 staffing may be assigned "under special circumstances," must be prior authorized by the Director of Clinical Services (DCS) and "One to One staffing assignments are not permanent but rather in place based on assessed need until appropriate permanent alternative arrangements can be made." The reasons identified for the 1:1 staffing included threat of suicide, altered mentation that may "dislodge treatment lines and devices," escalating exit seeking behavior, altered cognition in an agitated state that "is not easily redirected" and "does not respect boundaries of other residents." The procedure directed to assess the resident, DON and administrator to agree 1:1 was necessary and consult DCS; instruct staff assigned to 1:1 the purpose of assignment, and directed to keep resident at "arm's length at all times." The procedure indicated if resident was not suicidal, privacy with toileting could be

provided. The procedure directed to document the 1:1 assignment in the clinical record and revise the care plan.

On 5/5/14, and 5/6/14, R13 was observed to be allowed to leave the facility unescorted to smoke in the designated smoking area. Although R13 had a wanderguard applied, the wanderguard alarm was disabled when R13 left the building. On 5/6/14, at 4:45 p.m. R13 was observed to have eloped from the facility and was observed on the city sidewalk by the surveyor.

Upon arrival to the facility on 5/5/14, at 1:35 p.m. R13 was observed to be out on the designated smoking area with four other residents and two facility staff. R13 was observed to be in a wheelchair with a half laptray on the left side of the wheelchair. R13 was observed to be smoking a cigarette independently.

On 5/6/14, at 8:30 a.m. R13 was observed to wheel independently to the front door. A chirping sound was heard and R13 was observed to exit the facility and wheel herself backwards to the smoking patio. No staff escorted her. Seven residents were observed to be in the designated smoking area. R13 wheeled to the table under the arbor, was assisted to light a cigarette by the smoking monitor and smoked independently.
- At 8:33 a.m. R13 remained on the smoking patio with four other residents smoking.
- At 8:46 a.m. R13 extinguished her cigarette appropriately and wheeled herself back into the facility. A loud beeping noise was heard as R13 entered the facility. The sound was immediately silenced to a slight chirping sound. R13 wheeled into the facility and down the hallway. No staff escorted her.
- At approximately 11:00 a.m. R13 was randomly observed to smoking in the designated smoking area, a male staff was observed to be monitoring the smokers. R13 was observed to complete smoking her cigarette at approximately 11:20 a.m. and wheel herself into the facility unescorted. The smoking monitor did not assist. A quiet chirping noise was heard as R13 entered the building.
-At 4:45 p.m. R13 was observed by the surveyor to be at the end of the driveway in her wheelchair wheeling with her feet towards the 49th Avenue North. R13 turned left upon reaching the sidewalk and began wheeling herself with difficulty towards 6th street. After a few feet, R13 mad a U-turn and began pushing herself backwards down the sidewalk. The street was observed to be busy with multiple cars driving rapidly 30+ miles per hour (MPH). The smoking monitor was observed to be behind a pillar with his back to the street and R13.
- At 4:46 p.m. the front desk monitor (O)-C was notified by the surveyor of R13 observed on the city sidewalk. O-C verified R13 "could not" be on the sidewalk near the street unsupervised and immediately ran outside to R13. When O-C reached the resident, R13 was approximately 20 feet past the end of the driveway and half way to 6th street, wheeling backwards facing oncoming traffic. O-C was observed to speak with R13 and after several minutes, wheeled her back into the facility. O-C could be heard to tell the smoking monitor to watch for residents eloping. O-C returned R13 to the facility.

R13's Diagnosis Report dated 2/4/09, indicated diagnoses to include hemiplegia affecting the dominant side, depressive disorder and cognitive deficits due to cerebrovascular disease.

The Vulnerable Adult Assessment dated 6/24/13, identified R13 had history of wandering into other residents rooms, history of unsafe smoking and taking other peoples belongings. The

assessment identified R13 had cognitive deficits, short-term memory loss, impaired decision making and poor judgement. In addition, R13 was identified to require supervised LOAs (Leave of Absences) only and identified R13 had a past history of drug abuse.

LOA Safety Assessment dated 6/24/13, identified R13 had cognitive impairments related to dementia, and resident was unable to leave the facility unsupervised.

A Camden Care Center Care Conference form dated 10/1/13, indicated, "[R13] propels herself independently in a wheelchair to all destinations within the building - at times she will propel herself backwards and needs frequent reminders to not do this. She has a history of wandering from the facility and thus wears a wanderguard to alert staff if she attempts to leave the building. She also has a history of wandering into other resident rooms and taking their belongings, which can cause other residents to become frustrated with her so she needs frequent redirection."

The Nursing Assessment Packet Review for the reference period 3/19 - 3/25/14, included a safety Risk (Fall) Assessment dated 3/19/14. The assessments did not address or review the need for a wanderguard.

R13's quarterly Minimum Data Set (MDS) dated 3/25/14, indicated R13 was cognitively intact, was identified to have no behavior problems, and required extensive assistance with activities of daily living (ADLs).

A Care Conference summary dated 4/10/14, and another Care Conference form (undated) did not address R13's use of a wanderguard or elopement risk.

R13's Physician's Order Sheet dated 4/16/14, directed to check R13's wanderguard every shift beginning 9/19/13.

The Behavior Monitoring Documentation form (undated) identified R13's target behavior was, "Wandering into other resident rooms" and indicated appropriate interventions such as assist resident to attend activities, assist resident to the bathroom if needed, anticipate needs, visit with resident if she needs help. Dated as reviewed last on 4/23 (no year).

R13's Vulnerable Adult care plan dated 4/28/14, identified she had a history of elopement. The goal identified R13 would remain safe at Camden Care Center. An intervention dated 10/7/11, indicated, "Wanderguard in place." An intervention dated as initiated 3/16/12, directed, "Resident has been assessed and may not leave this facility without supervision.

An undated Group 5 assignment sheet (a form carried by nursing assistant staff for quick reference to care plan needs) identified R13 had a wanderguard.

The clinical record lacked evidence R13's elopement was documented, including dated, time, location, and those involved. The clinical record lacked evidence R13 was evaluated for elopement risk after being found to elope, or R13's physician was notified at the time of the incident. The clinical record lacked evidence the administrator or State agency were notified of the incident. In addition, the clinical record lacked evidence the elopement was thoroughly investigated, including interview with staff present at the time of the elopement.

A nursing progress note for R13 written by administration on 5/8/14, at 9:04 a.m., "Report received that the resident attempted to leave the facility on Tuesday May 6 around 4 pm trying to get to her son, resident was found by the receptionist on the sidewalk, redirected back into the facility. Resident has her WanderGuard on. Receptionist [O-C] reported that the she reminded the resident that resident cannot leave the facility unsupervised, receptionist was educated that when residents with WanderGuard would like to get out of the building to smoke, the smoke monitor should be alerted. Son and daughter notified. Message left to NPs [nurse practitioner] voicemail to update on resident. Although the note indicated a message was left for NP, the NP was not called until four days after the incident.

On 5/8/14, at 12:44 p.m. the administrator stated he was notified of the elopement on Tuesday "the next morning" but was unclear why it was not reported to him until then.

The State agency form dated 5/8/14 (no time documented of report), indicated, "Report received that the resident attempted to leave the facility on Tuesday May 6 around 4 pm trying to get to her son, resident was found by the receptionist on the sidewalk."

On 5/9/14, at 11:00 a.m. R13 was observed to wheel herself backwards out of the facility through the front entrance. The wanderguard did not sound. O-C was observed to be at the front desk and was observed to reach to the right. O-C verified she reached to silence the alarm for the wanderguard. R13 was observed to exit the facility without staff and wheel without staff to the designated smoking area.
- At approximately 11:25 a.m. R13 was observed to wheel herself out of the designated smoking area, push the handicapped switch to open both doors and wheel herself backwards into the facility. O-C was observed to silence the wanderguard alarm (reach down to activate switch). R13 wheeled herself backwards down the hallway into the facility. At the time of the observation, O-C stated she disabled the wanderguard alarm for residents who wanted to smoke in the designated smoking area. At not time during the observation, do O-C alert the smoking monitor or staff of R13 leaving the building.

On 5/9/14, at 1:11 p.m. RN-C stated she was in the room when O-C reported R13 had eloped. RN-C stated the announcement was made and RN-C, LPN-E, LPN-A and dietary manager (DM) were present for the announcement. RN-C stated she did not report the concern as it was LPN-A's responsibility and verified R13 was assigned to her unit. RN-C stated LPN-E was not available for interview. RN-C stated if a resident was found to elope, the staff should try to locate the resident; notify the family and physician of the elopement and if the resident was not located to notify law enforcement. RN-C stated an incident report should have been completed. RN-C did not indicate when the administrator or State agency (SA) would be notified. When asked if and when the administrator and SA should be notified for elopement, RN-C stated LPN-A was responsible and she "believed" she may have notified the administrator or SA. RN-C was unclear if this occurred and was unclear when to notify the administrator and SA. Information, including the incident report and notifications, were requested at the time of the interview.

On 5/9/14, at 1:26 p.m. RN-C verified no incident report was completed regarding R13's elopement and provided a copy of the report to the State agency dated 5/8/14. RN-C stated the report was made "48 hours later." RN-C provided a copy of a corresponding nursing

progress note dated 5/8/14. RN-C verified the clinical record did not indicate when the administrator or State agency was notified.

On 5/12/14, at 10:26 a.m. DON stated he was not in the facility at the time of the elopement and he was not informed until 5/8/14. DON explained the incident was not reported to the administrator or SA because he was not at the facility. DON was unclear who was assigned to report in his absence. DON confirmed R13 should not have left the facility unescorted and stated residents with wanderguards were at risk for elopement and leaving the facility without supervision was a safety concern. When asked if staff knowingly allowing a resident with a wanderguard to leave the facility unsupervised was potentially neglect, DON stated he was aware of a "safety component" but was unclear on if this was neglect. DON verified the incident was no thoroughly investigated. In addition, DON verified the details of the incident were not documented in the clinical record and should have been. DON verified R13 should have been evaluated for elopement risk after the incident.

On 5/12/14, at approximately 2:00 p.m. contracted licensed social workers (CLSW)-A and CLSW-B stated they were not informed of R13's elopement on 5/6/14. Both verified they should have been informed so they could assess the resident.

The Videll Healthcare LLC Elopement policy dated as effective 5/2012, identified, "Videll Healthcare LLC facilities shall provide a save environment for resident who are assessed at risk for elopement." The policy defined elopement as "'when a resident leaves the premises or a safe area without authorization (i.e., an order for discharge or leave of absence) and/or any necessary supervision to do so.'" The procedure directed if exit seeking behavior was identified to immediately implement interventions to "manage exit seeking behaviors" such as applying "personal security devices such as WanderGuard..." The procedure to directed to complete a "thorough" investigation of the event, document a factual account of the occurrence in the medical record and to update/complete an elopement risk evaluation. Although the policy included pertinent direction for searching if a resident eloped, the policy did not address risks such as smoking and access to the designated smoking area.

On 5/12/14, at 10:26 a.m. the director of nursing (DON) was interviewed, verified had not read the plan of correction and did not know what the plan was. DON verified he was not aware of changes made and reiterated he was "waiting for this [the survey]" to "blow over" and then he had plans to work on "problems" in the facility. Stated he read the survey results from 2013 and stated he was not given an accurate picture of the facility problems. Verified there was no system for monitoring staff to ensure facility policies were followed.

The facility failed to provide supervision to prevent ingestion of alcoholic substances, which resulted in actual harm to R41 on 5/1/14. While intoxicated the resident drove his motorized wheelchair (w/c) off the curb, fell over, sustained injury to his right forehead and right arm. R41 was hospitalized with low blood pressure, low magnesium and low potassium.

R41 was observed to sun himself in the facility driveway, outside of the front door and toward the public sidewalk on 5/5 at 2:09 p.m. and 5/6 at 10:46 a.m., 5/7 at 10:45 a.m., 5/8 at 2:15 p.m , 5/9 at 3:00 p.m., 5/10 at 2:30 p.m. , 5/12 at 2:00 p.m., and 5/13/14 at 3:35 p.m.. On 5/11/14 at 11:15 a.m., R41 was observed to sun himself on the smoking patio. All observations were unsupervised.

R41 was admitted to the facility per the Admission Record dated 2/4/14, from another long term care facility. R41 had a history of bipolar disorder (a mood disorder with manic and depressed phases), schizophrenia and polyneuropathy in diabetes (nerve damage usually in the feet and legs that can create sensory, motor and bodily function problems).

The admission Minimum Data Set (MDS) dated 2/17/14, indicated R41 had a Brief Interview for Mental Status (BIMS) score of 15/15, which indicated no cognitive impairment. A Patient Health Questionnaire (PHQ9 - detects depression) was completed and R41 had a score of 7/27, which indicated mild depression. R41 had verbal behaviors directed at others one to three days during the seven day look back period. R41 was dependent on staff and required total assistance of two persons and a mechanical lift for transfers and toileting; extensive assistance of two persons for bed mobility; extensive assistance of one person for personal hygiene, dressing. R41 was totally dependent on the electric, tilt in space, w/c for locomotion on and off the unit. The Care Area Assessments (CAAs) dated 2/17/14, indicated R41 would be referred to the house psychologist.

An LOA (leave of absence) Safety Assessment dated 2/10/14, indicated R41 was safe to leave the facility on unsupervised LOA, and left the facility daily on unsupervised LOA according to staff.

A Vulnerable Adult Assessment dated 2/10/14, indicated the resident utilizes an electric w/c for ambulation. " Resident is OK to go on unsupervised LOA. " A Smoking Evaluation dated 2/10/14, indicated independent with smoking and smoking materials.

The care plan revised on 3/18/14, indicated R41 had impaired cognitive function or thought process related to personality disorders of bipolar and schizophrenia. R41 had a history of being verbally abusive to staff and other residents, and required assistance with activities of daily living (ADLs), and was safe for unsupervised LOA.

A Physician ' s Progress Note dated 4/15/14, indicated the visit was to establish primary care and recommend R41 for a psychiatry consult per R41 ' s request. In addition, a recommendation was made by the physician for R41 to have a referral made to a pain clinic consult for chronic use of opiates (oxycodone) and morphine (both narcotics). The medical record lacked evidence that the physician ' s recommendations were scheduled and that R41 went to the consults.

A progress note dated 5/1/14, at 3:05 p.m. revealed R41 was off the property in the neighborhood. He became intoxicated (on a leave of absence (LOA) in the neighborhood), when he returned to the facility he drove his electric w/c off the curb on the driveway to the facility. R41 was found lying on pavement on his right side and his speech was slurred, but R41 remained alert and oriented. " He stated his last drink was 5 minutes ago. He was incontinent of urine and had a laceration on his forehead, he complained of right arm pain " The physician was notified and 911 was called. R41 was transferred to North Memorial Medical Center (NMMC) for further evaluation. He was admitted to intensive care unit (ICU) with low blood pressure, low potassium and low magnesium. The medical record lacked evidence that the assessments were reviewed and/or revised for R41 ' s LOA status. On 5/1/14, the fall risk care plan was updated to include the fall on the driveway, but lacked

mention of the causative factor of intoxication.

On 5/5/14, at 1:43 p.m. R41 returned to facility. New diagnoses from the Intra-agency Transfer Form dated 5/5/14, included: fall, intoxication, and alcoholism. A Physician ' s Order on 5/5/14, included, "No longer okay to leave unsupervised LOA's. " A WanderGuard (a personal alarm attached to resident to alert staff the resident attempted to leave the building) was ordered for the resident. The care plan revised on 3/18/14, lacked mention of supervised LOA.

On 5/6/14, at 9:16 a.m. the facility met with resident to discuss the incident that occurred on 5/1/14, the facility obtained an order for supervised LOA. Resident stated he was drinking because he was depressed. The facility placed a WanderGuard on his w/c.

Even though R41 had a WanderGuard placed on the w/c, R41 continued to remain at risk due to the facility, as the facility staff continued to silence the alarm at the front desk and let him out of facility. R41 continued to leave the facility and move about the property unsupervised. R41 ' s medical record lacked evidence of any social service intervention at the facility for his depression and drinking related to depression which would include providing information such as alcoholics anonymous (AA) or referral to any place for help or support. Even though the CAAs dated 2/17/14, indicated R41 was referred to a house psychologist, R41 ' s medical record lacked any evidence R41 had seen the house psychologist.

On 5/8/14 at 8:02 a.m. a list of residents who were alleged to bring drugs and alcohol into the facility, and a list of residents known to take drugs or alcohol in the facility was requested and provided by administration at 11:00 a.m. on 5/8/14. The facility identified R117 as questionably buying cigarettes and drugs, and selling within the facility.

R117 the facility failed to act upon allegations that R117 was bringing drugs, alcohol and cigarettes into the facility that caused actual harm and hospitalization to other residents. In addition the facility failed to prevent R117 from obtaining credit cards of vulnerable adults within the facility.

R117 was admitted to the facility 1/21/14, with admission diagnoses of cardiomyopathy (weakened heart muscle with decreased pumping ability), Atrial fibrillation (irregularly irregular heart beat that causes the heart chamber to be under filled when pumped and can lead to inadequate heart pump and life threatening blood clots in the heart), chronic Coumadin use (to thin the blood and prevent blood clots from forming) congestive heart failure (fluid buildup in the lungs or extremities due to poorly pumping heart), shortness of breath, hypertension (high blood pressure), anxiety, and depression.

The admission MDS dated 2/3/14, indicated: a BIMS score of 15/15, no cognitive impairment. R117 was independent in all cares and with mobility. CAAs dated 2/3/14 were triggered for falls, nutritional status, dental care, and psychotropic medications.

The care plan dated 1/27/14, and last revised 4/27/14, indicated: R117 does exhibit verbal abuse / aggression towards staff. He seemingly has a very loud voice and difficulty speaking in a calm, non-threatening manner. Staff has reasonable cause to believe that Resident has

brought alcohol & drugs into the facility for other Residents. R117 has actual physical behaviors/ physical fight with roommate r/t Poor impulse control, anger, depression. Often R117 will play music very loud and will not turn music down which disrupts other residents. R117 often leaves the facility and does not return at said time Interventions: Resident will cease bringing any type of alcoholic beverages or illegal drugs into the facility. Resident will not exhibit threatening behavior toward staff or other Residents, will follow the facility policies & procedures: Re: (not all inclusive)Playing his music so loud that it is disruptive to others; returning to facility at designated time or will call facility to report he will be late, will not physically threaten or harm anyone. If Resident becomes disruptive, aggressive/not redirect able, threatening to others, 911 will be called. If Resident becomes verbally aggressive, staff will walk away and return when Resident has calmed down.
Resident has a history of verbal & physical aggression toward other Residents & staff. He chooses to not list anyone as an emergency contact or Health Care Agent. He was evicted from his Group Home, therefore has no place to go if discharged, working with relocation to plan for a safe discharge. Vulnerable adult: resident is a VA due to history of homelessness. Anxiety CHF, HTN, and mood disorder. He chooses not to list anyone in case of an emergency or to designate anyone to be his health care agent. Was evicted from his last place of residence-the reason is unclear from history. He has a history of drug use. Intervention: If there is any indication of resident bringing alcohol or drugs into the facility, at any time. A room search will be completed by 2 staff persons. Resident has been assessed and is appropriate to leave the facility on an unsupervised LOA. R117 was unable to self-medicate due to drug seeker behaviors, street drug use, and poor choices.

R117 a LOA Safety Assessment dated 3/18/14, indicated the resident was assessed as appropriate to leave the facility unsupervised, a Smoking Assessment dated 3/18/14, indicated R117 was safe to smoke. A Vulnerable Adult assessment dated 3/18/14, indicated a recent history of resident to resident aggression, can be aggressive when confronted, had a history of substance abuse, but denied recent use, and was safe for unsupervised LOA.
On 2/12/14, at 9:11 p.m. a progress note indicated: Health status note: resident signed out at 10:00 a.m. and wrote to be back at 6:00 p.m. tonight. Resident is not back yet. Resident did not leave number to call and does not have emergency contact person to call. Writer called 911 and reported him missing. Writer also notified administrator.
2/13/14 at 6:39 a.m. a progress note indicated: Police took report during this shift about resident reported missing during the PM shift. Resident did (not) return to facility at this time. Will continue to search. Progress notes lacked documentation of R117 return to the facility.
2/16/14, 9:06 a.m. a progress note indicated: resident was aggressive and verbally abusive to fellow resident that is his roommate, he was swearing at him, calling him the F word, told him to get the F out of here, even went beyond and told him, there nothing wrong with you. Roommate said he gave a lot of trouble. A call was placed to administrator and DON we are continuing to monitor supervisor is aware.
3/27/14 at 16:01, a progress note indicated: resident had a visit from his relocation worker today; he became upset and was yelling and swearing during their visit. Writer and environmental services director approached to follow up with him. He was not in his room; drug paraphernalia was on his dresser and removed room the room. Resident was found in the staff lounge and he was educated that he could eat his meal in the dining room with other residents, continued to refuse to leave and swore at relocation worker who called 911. Police arrived and took drug paraphernalia and spoke with resident. ...states he wants to be independent. Writer called Hennepin county adult protection services to express the concern

about resident ' s behaviors and potential risk to others. They stated that they could not take a report unless actual harm occurs. Staff educated to call 911 and CEP should aggressive behaviors towards others occur. Resident is calm at this time.
On 3/31/14 at 04:43 a progress note indicated: AM nurse reported resident went out on LOA on 3/30/14, as usual. However, resident did not return to facility as required. About 02:00 a.m. writer called police and made the report. Two police officers came to the facility and said the report should only be made after 24 hours. On 3/31/14, at 13:40 resident had still not returned from LOA on 3/30/14. No phone numbers on file to try to reach resident.
On 3/31/14 at 2:58 R117 just returned from LOA at 2:30 p.m. Meeting held with resident about LOA orders as resident does not have overnight LOA orders. Those present, Writer, Administrator, DON and NA-N, nurse. Discussed with resident that if he signs out he must return at said return time as facility is responsible for resident and cannot care for him if he is not here. Resident yelled out that he needs a safe discharge place and MD orders in order to d/c. Writer stated that is different from AMA as AMA means he is discharging himself without MD orders. Resident stated understanding. Discusses that if resident goes on LOA he must be back at midnight or he would be AMA d/c. Resident stated understanding
On 4/11/14 at 15:18, Residents relocation worker met with him today. He is frustrated about the time that the relocation process is taking. He toured GRH housing this past week, however, did not like the setting it was in. Relocation worker will be bringing resident to apply for his MN ID and social security card on Monday 4/14. Resident is working on applying for his birth certificate and has stated that he will do this independently. Relocation services continue to follow, social services continue to follow discharge planning.
On 4/25/14 at 10:11 a progress note indicated: Per staff, there is suspicion that Resident is bringing alcohol into facility for other Residents. LSW & Director of facility operations (DFO) met with Resident to report that due to the continuous suspicion of alcohol being brought into the building, we would be going through his things to check for any alcohol, drugs or other materials deemed unsafe in a Residents room due to the State & Federal safety guidelines. There were tools, power tools, exacto knives, multiple scissors & many other sharp objects that were gathered and placed in a duffle, which was filled, taken to the Maintenance room to be inventoried and kept safe by the DFO. Resident made several sarcastic comments while we were in his room. Overall, he posed no problem and was not threatening in any way. Will continue to do random checks.
On 4/26/14, a progress note indicated: officer from MPD came regarding the 7 credit cards found in resident ' s room that were not his name. Officer took the cards and will check to see if any of them had had any activity or been reported stolen.
On 4/30/14, at 3:00 p.m. a Quarterly Social Service Assessment (progress note) indicated: Staff continues to provide cues and reminders as Resident does present with forgetfulness at times. Resident's relocation worker will continue to assist Resident in securing alternate placement in the community. Resident at times becomes frustrated over this d/t length of time it is taking. He has been assessed and may leave the facility unsupervised. Facility has reviewed requirements for unsupervised LOA with Resident and he is aware that if they are not followed that he may be required to only leave the facility with supervision. Resident has been assessed and is an independent smoker. Resident has a history of bringing in alcohol and drugs in to facility. Recently Resident was found to have numerous credit cards in his possession that were not his, police were notified and credit cards were confiscated.
ON 5/2/14, at 2:00 p.m. a progress note indicated: Resident declined to come to the smokers meeting to be updated on the facility policy and procedure regarding smoking. Writer and administrator attempted to meet with resident to give resident a copy of the facility

policy and discuss the rules regarding smoking. Resident refused to meet, writer asked if a copy of the policy could be left with the resident, he stated "no" Writer asked when a good time would be to come back, he stated "tomorrow" (which he also stated yesterday when he refused to come to the meeting). Writer expressed the importance of receiving the information today, he continued to decline. Writer informed him that not following the facility policy may result in losing his smoking privileges and could result in being given a discharge notice, writer again asked to meet or at least to leave the policy with him, he responded "no." Writer and administrator left, resident came out shortly after and began yelling about the noise in the hallway and receiving his mail. Writer attempted to approach resident but he walked away. Writer and administrator met with business office manager regarding his mail complaint, she stated that resident is waiting for his check and has been looking for it daily. She stated that his check usually comes on the 3rd of the month. She stated that she has informed him that he will receive his mail the day it comes.
5/5/14, at 15:55 a progress note indicated: Writer was updated by NAR that this resident received money from another resident (#02445) to go by cigarette from the store. Writer approached this resident reminding him of the smoking rules. Resident told this writer that soon as he buys the cigarettes for resident #02445, he will bring them and give it to the smoking NAR. Writer reminded resident that this was discussed in the meeting and was one of the items discouraged. Writer left resident and updated the Administrator about this incident. Administrator will follow-up.
On 5/6/14, at 9:37 a.m. R117 was observed to come out of the facility, walked across the top of the planters (jumped up with ease, skipping gait) and had lit his cigarette at the front entrance. Smoking monitor and a dietary manager (DM) did not intervene. R117 spoke with female staff, then went over to R36, exchanged money, and then went to talk with R129 (who had 1:1 staff that was standing 20 feet away from R129) and R91. [Note R117 pulled out a wad of cash, and R36 was observed to give him cash the smoke monitor and 1:1 staff did not observe the exchange]. R129 sat on planter and smoked with R91 and R117. R117 then returned to the building.
On 5/6/14, at 10:41 a.m. Michael observed to walk back to the smoking area from the street sidewalk. (it was unknown how R117 exited the building).
On 5/7/14, at 8:18 a.m. R37 was observed standing next to R117, who was sitting on the planter on the rear of the smoking patio. R37 had his wallet out and both R37 and R117 were watching the smoke monitor while R27 held his wallet open. R1 arrived back with the transport van and zoomed into the smoking patio at a high rate of speed on her motorized scooter, leaving her one to one staff behind. R37 handed R1 his wallet, (we were not able to see if she took anything from it). R1 then handed the wallet back to R37. He whispered over to her. At 8:24 a.m. R37 again gave his wallet back to R1, (we were not able to see if she took anything from it), she then reached down and put the wallet into his lower left leg pants pocket.

ON 5/7/14, at 843 R1 stated "there were no smoking problems here until this thing started (referring to 1:1 for unsafe smoking and not following facility rules), I used to buy 50-60 packs of cigarettes a day for these guys and I never charged them a thing." "Now because I have a 1:1, R117 buys things and he charges them a pack of cigarettes just to walk down to that little store." R1 stated that R117 was also known to charge for getting drugs and alcohol. R1 turned to R9 (roommate) and stated isn't that right! R9 versified the statement was true. The facility identified R1 as known smoking issues and questionably drugs and the facility identified R9 as a known pot smoker.

On 5/7/14, at 9:27 p.m. R117 lit his cigarette as he walked out the front door (non-smoking area), then sauntered to the smoking patio.

On 5/7/14, at 1:15 p.m. a call was made to the Minneapolis Police Department (MPD)-A to see if the facility had reported suspected drug dealing. MPD-A stated the facility called today to report suspected drug dealing, but had not reported it between 3/18/14 (date of survey exit) and today (5/7/14).

5/8/14, at 02:28 a.m. an administrative progress note indicated: Call received from NA-N that resident was not in his room. He was reported to have left during the AM shift, and has indicated that he will be coming back by 9:00 pm last night. NA-A was told to have the nurse documents this, and call 911 to report. Will follow up in the AM.
5/8/14, at 02:38 a.m. a progress note indicated: Resident left facility since morning of 5/7/14, and has not returned to facility. Time now is 02:40 the DON had been notified, 911 had been called, and they are on their way to come and do a missing persons report. There is no phone number on file to contact the resident. Will continue to update as time goes on.
5/8/14, 02:38 a.m. a progress note indicated: It is 5/8/14, 06:30, resident is still not back to the facility. The police are aware, have made a police report, and have assigned a case number for missing person. Please call MPD-C at phone number 612-673-5303 as soon as resident return to facility.
On 5/8/13, at 3:35 p.m. the interdisciplinary team (IDT) met to discuss the elopement and issued a 30 day discharge notice, and supervised leave only.
5/9/14, at 10:34 a.m. R117 was observed back in the facility. At 11:22 a.m. no progress notes have been entered to acknowledge R117 was back in the facility.
A note dated 5/9/13, at 10:38 (was added to the progress notes) Resident returned to facility unharmed. Resident verbalizes that resident is OK and has been safe at Treasure Island Casino. Writer called primary care physician (PCP) to update on residents return and request an order that states: Resident must be supervised on all LOA's except medical appointments. Awaiting return call from clinic.
On 5/9/14, at 11:50 Writer received a new order from PCP that resident cannot leave the facility unless supervised. Also resident can leave the facility unsupervised if going to a medical appointment. While writer was speaking to resident writer observed residents eyes were bulging and he had very rapid jaw movement. Resident appears to be under the influence of something. Writer placed another call to PCP office to inform MD that writer believes resident is under the influence. Writer also reported to nurse at PCP's office that resident has not taken any medications. Writer also asked resident if he would complete a toxicology screen and resident denied. Resident also denied any drug or alcohol use to writer. Writer is concerned of his safety. Awaiting response from MD office.
On 5/9/14, at 12:00 p.m. writer received spoke with nurse at PCP office and orders received to send resident to the emergency room at St. Joseph ' s office due to suspected drug use along with his heart conditions. Resident will be sent to St. Joseph ' s hospital.
On 5/9/14 at 12:23 p.m. two police cruisers (3 officers) and an ambulance were observed to pull up to the facility and enter the building. The consultant administrator informed the surveyors that R117 was being really unruly, had been out of the facility for several days and not been taking his medication (including Coumadin), stated his eyes are bulging and I am so concerned he is going to have a heart attack, he is refusing to do a tox screen here (urine

drug screen). We have called the doctor and he said to transfer to the hospital for evaluation. The police have been called to back up EMS, since he is not cooperating.
On 5/9/14, at 12:32 p.m. R117 was escorted out of the facility by two police officer holding his arms, the EMS (emergency medical services) gurney followed behind. The gurney was put back into ambulance. The police searched R117 and removed a package from his pocket, he then got into the rig at 12:35. Rig pulled away at12:37 p.m.
On 5/9/14 at 12:35 p.m. a progress note indicated: Paramedics and police arrived to facility to transport per MD orders. Resident was unwilling with the officers and refused to get on the gurney. Three police office had to physically walk resident out of the building. While resident was walking out resident continued to scream "I am leaving AMA, I am leaving AMA. Writer gave paramedics full report on resident ' s condition and the fact that resident has not taken Coumadin for three days with his Atrial fibrillation and CHF condition. All medication sheets, Face Sheet, code status, and physician orders sent with paramedics. Writer called St. Joseph ' s ER and gave report and updated on status, along with requesting toxicology screen.
5/9/14, at 1:04 p.m. a social work progress note indicated: Resident discharged from the facility against medical advice today; May 9th, 2014 at 12:45 p.m. Administrator informed writer that resident was threatening to leave AMA. Writer went to meet with resident to discuss his plan, where he was planning on going, and why. When writer approached resident yelled "Are you LSW-C?" Writer responded affirmatively, resident then yelled "Why did you tell R81, I was threatening him? He's my friend and I have the right to see him." Writer informed resident that writer was not aware of what he was talking about, writer asked who R 81 was. R117 walked away. Another social worker approached resident regarding his statement that he was leaving AMA. Social worker asked to talk with resident he yelled "no" and slammed the door. Social worker knocked on the door and asked resident what his plans were, he again slammed the door. Writer and social worker were informed that resident appeared to be under the influence of a substance and had been asked to have a tox- screen done, when he refused his MD gave an order for resident to be sent to St. Joseph's hospital (where his cardiologist is) so that he could be monitored given his heart condition and not knowing what substances he had ingested. The police and paramedics arrived to take the resident to the hospital, resident stated that he was leaving the facility AMA. The police asked him "you are leaving the facility against medical advice?" resident stated "yes." Police and EMT then stated that his doctor gave an order for him to be admitted to the hospital so they had to take him. Resident again refused. The police informed him that they had to take him. Resident was asked to sit on the gurney he refused multiple times, the police escorted him out of the building. They asked resident if he had any drugs on his person, he stated "yes" in his back pocket. Residents person was searched, a wallet and a pack of cigarettes were removed from his back pockets. A rolled up bag was removed from his fleece jacket pocket and resident identified this as cocaine. As resident walked down the hall he continued to yell "I am leaving AMA" Resident refused to sign the Release of Responsibility for Discharge Against Medical Advice form. While resident was threatening to leave AMA the administrator called adult protection to update them on the concern that resident was threatening to leave and we were not able to get the information about where he would be going. The adult protection worker stated that they could not take the report until resident actually left the building. Writer called adult protection at 12:50 PM stating that resident had discharged against medical advice at 12:45 PM. Writer informed them that resident had left via ambulance and was being sent to St. Joseph's hospital in St. Paul. Provide diagnosis listing, doctors name and contact information, date of residents admission, that he had come to the facility after being evicted from a group home, that he had not provided the facility with an

emergency contact (although he has a girlfriend in the community, her name and identifying information is unknown). Adult protection was also informed that resident had stated that he would not allow them to admit him to the hospital. Adult protection asked that a follow up be done with St. Joseph's hospital to determine if resident had been admitted and then to follow up with adult protection. Social services will continue to follow if resident was admitted to the hospital. All other social service interventions are discontinued at this time.
5/9/14, at 2:34 a progress note indicated: writer received a call from nurse at St. Joseph's hospital. Resident refused to do a toxicity sample at the hospital. Per nurse resident stated" It is not nobodies damn business". Resident is going to be discharged from St. Joseph's. IDT team notified.
5/9/14, at 15:47 p.m. a progress note indicated: writer called St. Joseph's hospital, they do not have any documentation of resident being there. Writer spoke with E.R. nurse; she confirmed that resident had come into the E.R. but left AMA at 2:35 p.m. The E.R. nurse did not know where resident went. Writer called Hennepin County Adult Protection and updated them with the above information.
5/9/14, at 6:27 p.m. a progress note indicated: R117 returned to facility at 6:20 p.m. R117 was visably [sic] under a mind altering substance [sic]. He was presenting with facial tics and iradic [sic] behavior. Police were notified and no trespassing notice form was completed by MPD-D. Officer was also provided with plastic baggies containing drugs that were found on R117. R117 had been advised that his belongings will be packed up and ready for pickup by 10 a.m. tomorrow. As R117 chose to leave facility AMA early today. R117 also left AMA from ER. Officer advised R117 that when he is ready to pick up his belongings he must call the police prior and an officer will accompany him to the facility to get his belongings. He is not allowed on Camden property and notice is valid for 1 (one) year. DON and administrator present.
5/9/14, at 6:43 p.m. an administrator progress note indicated: Resident was on LOA and did not return at stated return time. Staff called police and reported him missing on 5/8/14. Resident returned today and appeared to be under the influence with eyes bulging and rapid mouth contortions. Concern for resident's health due to extended LOA without medication and that there were other drugs in his system. Nursing asked Resident for toxicology screen and resident refused. See nursing notes regarding subsequent DC summary and AMA. Resident left emergency room AMA and returned to this facility and was advised he had been discharged. Police were again called as R117 would not leave premises and was issued a trespass notice.
On 5/10/14 at 12:25 R117 was observed sitting on the air conditioner at the building next door to the facility, facing the freeway frontage road.
On 5/10/14 at 1258 the administrator stated that R117 was issued a trespass order, and escorted by police to the NMMC ambulance yesterday and then had left AMA from the hospital. He was supposed to call the police this morning and be escorted to the facility to pick up his belongings. But he had not yet called.
When interviewed on 5/12/14, at 2:43 p.m. contracted social worker (LSW)-A stated there was alleged rumor that there had been an exchange with R1 and other resident who had been discharged from the facility (R117) and had exchanged something with resident R129 who had been admitted to the hospital on 5/11/14, with alcohol intoxication with a level of 0.323. LSW-A stated I have personally had to question the 1:1 staff here at the facility when I have seen them sitting outside the door when resident is in the room with the door shut. When I have asked 1:1 staff how they are monitoring the resident when sitting outside the door some have gotten argumentative and said the resident did not want them in the room

and I have told them you are supposed to be at arm-length not behind but in-front to make sure nothing is exchanged. I cannot imagine how a resident who was on 1:1 would get that much alcohol in her system and when I got here on Sunday I came to the office to open the computer to see what happened and there were no nursing notes. I went outside to the desk and told the administrator and director of nursing to get the nurse in to document and have the 1:1 fired. There are so many people here than I have seen on 1:1 for me 1:1 means the person needs to be somewhere else not at the nursing home.
R116, with a WanderGuard (a personal alarm that would alert staff when the resident left through the doors) was able to elope from the facility on 5/11/14, at 9:30 a.m. and according to staff two more times at 11:30 and 11:52. The facility consistently allowed residents with WanderGuard's to exit the building by silencing the alarm, and so lacked a system to immediately search for missing residents when the WanderGuard alarm sounded. R116 had a significant decline in cognitive abilities, and it was unknown if he could have found his way back to the facility if the HUC had not seen him eloping while driving into work.

R116 was admitted to the facility on 1/20/14, with diagnoses of lung cancer with metastasis (cancer moving from one body organ to another) to the liver and the brain, metabolic encephalopathy (temporary or permanent damage to the brain that occurs when the liver cannot clear the toxins from the body), confusion and depression.

R116 signed on to Hospice 1/21/14, was independent in self cares, transfers, and mobility. A Brief Inventory for Mental Status (BIMS) was completed and R116 ' s score was 15/15 which depicted R116 to be cognitively intact. However, since R116 had a hospice recommendation R116 had an expected decline in cognitive and functional status.

The admission MDS dated 2/17/14, indicated a BIMS score of 15/15, which showed no cognitive deficit, and a PHQ9 score of 4, which indicated minimal depression. R116 was independent in bed mobility, transfers, toileting, dressing, locomotion on an off the unit and required supervision for personal hygiene. The CAA worksheet dated 2/2/14, were triggered for vision, falls, activities of daily living, nutritional status, pressure ulcer potential, and psychotropic drug use. No referrals were made.

On 4/15/14, at 10:49 p.m. a nursing progress note indicated, " Pt is declining. He is very weak and needs a lot of assistance. "
The care plan 5/2/14, indicated cognition intact, and independent with activities of daily living, with the potential to decline in cognition and function related to terminal diagnosis. R116 was diagnosed with depression and alcohol abuse and alcohol dependence, paranoid state, and an episode of smoking in his room.

A draft progress note (a electronic progress note that was not in date sequence due to lack of completion) and stays dated 5/2/14, at 9:14 p.m. " Resident was found by nursing assistant (NA) drinking Listerine mouthwash in his room. Amount consumed is unknown. Empty Listerine bottle removed from room and dumped. " Writer explained the risks of drinking Listerine to resident's health. " Res states "I know, it kinda helps with my throat. Resident seems to be more confused while narrating this to the writer. "

A progress note dated 5/5/14, R116 was outside with his son and the resident had a fall. R116 ' s Son was present at fall. Hospice was notified of fall and a new wheelchair (W/C)

was ordered for resident. Writer also placed a WanderGuard on resident to alert staff when resident wants to go outside to maintain resident ' s safety. " Resident is allowed to go outside although staff needs to be alerted. Son is aware and in agreement with interventions. Nursing is to continue to monitor. "

A draft progress note dated 5/5/14, at 10:47 p.m. indicated R116 had increased confusion. " He requested going the bank to complete his transaction that he began earlier. He was leaning down to the floor to pick up of stuff which was apparently not there (visual hallucination). He was ambulating around getting out of w/c. Towards the end of shift he was on one to one rotation to prevent him from falling. "

A progress note dated 5/6/14, at 2:55 p.m. indicated R116 continued to sit at nursing station with staff due to attempts to self-transfer and unsteady gait.

A progress note dated 5/8/14, at 3:12 p.m. indicated, " Two packets of cigarettes and a lighter are found in resident's room. His room smelled smoke as if he has been smoking there. The cigarettes have been taken from him, and put in the lock box. He has been reminded that he cannot smoke in his room, only at the designated smoking areas of the facility. "

A progress note dated 5/8/14, at 12:53 P.M. " Resident came to his care conference today, Resident has impaired cognitive abilities; he did not recall the meeting with this writer and the administrator last week regarding the smoking policy. This policy was reviewed with him during the care conference again. He was also informed that he may lose his smoking privileges if he continues to be noncompliant with the smoking policy. Writer asked if he would agree to routine room checks to ensure he did not have cigarettes or lighters. Given his altered cognitive state he does not have the ability to remember the smoking policy and rules. He will be reminded and checked regularly to maintain his and others safety and to allow him to continue to smoke. Resident ' s son has also been updated on the smoking policy and will receive a copy of the smoking policy so he is aware of the facilities policy and procedure. "

On 5/11/14, at 9:30 a.m. the health unit coordinator (HUC) was observed walking R116 back toward the rear of the facility on the sidewalk. The HUC stated she had found R116, as she was driving into work. R116 had a WanderGuard on and she was surprised to find him walking outside since he was not able to walk every day. The HUC had called the facility and alerted them to the fact that R116 had left the facility and requested someone bring a w/c to help bring him back to the facility. Nursing assistant (NA)-R and safety monitor/NA-O had also come outside to look for R116. Two other NA's NA-P and NA-Q came outside with a w/c to meet R116 and return him to the facility.

On 5/11/14, at 10:38 a.m. a progress note indicated, " At 9:30 a.m. upon arrival to work this writer found R116 outside the facility walking down the sidewalk. When approached he stated 'I am going to visit a friend." R116 currently has a WanderGuard [sic] and due to cognitive impairments is unable to leave the facility unattended. He was verbally resistant to returning the building but was eventually returned with staff assist of three. Note resident left out a fire exit at the end of the hall. Staff was in route to locate whom ever had exited the building, the DON, Administration, and social work (SW) updated. "
On 5/11/14, at 11:52 a.m. a progress note indicated: "Fire exit alarm again sounded at the

end of the hallway. Staff immediately responded and found R116 outside. He again stated that he was going to visit a friend. This time he was verbally and physically resistant to returning to the building. Three staff were able to convince him to return in a w/c due to unsteady/weak gait. DON, SW, and charge nurse notified. Call placed to son who was updated and encouraged to visit and offer support to R116 if able. Son voiced that he understands that this confusion and resistance is likely a direct result of the Cancer. Support provided via phone."
- At 3:18 p.m. a progress note indicated: "R116's family was in to provide support today after episodes of elopement. Hospice was called; RN was updated regarding elopements, increased confusion, anxiety and restlessness. RN will update the Primary nurse in the am. R116 has been placed on 30 minute checks, staff alerted to residents increased confusion and elopements. R116 was given PRN Ativan (an anti-anxiety medication) that has been effective for anxiety/restless with no further elopement attempts."
- At 3:40 p.m. per interdisciplinary team (IDT) "resident will be on 15 minute checks VS 30 minute checks"
On 5/11/14, at 4:27 p.m. a progress note revealed, "At 0930 AM resident went out the fire exit and was walking down sidewalk. Staff intervened and resident was brought into facility. Resident stated he was going to visit a friend. At 11:30 resident left another exit. Staff was with resident and brought resident into facility. Hospice, family and administration were notified. Resident ' s WanderGuard was in place and functioning. Resident also placed on 15 minute checks. Hospice updated on increased confusion along with family. Family was here to visit resident. "
On 5/11/14, at 10:07 a.m. the administrator was interviewed and stated the day staff, afternoon staff, and night staff had been educated on the immediate jeopardy for drugs and alcohol and elopement and he could not believe the fact that R116 had gone out the back door, and was able to leave the facility. The administrator stated the investigation so far, was that staff heard the back door open, went and looked but had not seen anyone, so they assumed it was staff. The administrator verified that there was no WanderGuard alarm on the back door.

On 5/12/14, at 10:14 a.m. (more than 24 hours after the first elopement event) the director of nursing (DON) was interviewed and stated he had not made a report of the elopement of R116; his understanding was that he had 24 hours to report. He wanted to investigate and talk to the administrator and was still working on the report. The DON verified that he was not aware that federal regulations state immediate reporting. The DON verified that he was not aware that a resident with a WanderGuard exiting the building unsupervised was considered elopement.

On 5/12/14, at 11:00 a.m. surveyors tested the key pad coded door which was locked, but noted that staff unlock the door and enter without regard to which residents are nearby.

On 5/12/14, at approximately 11:30 a.m. a report was made to the Office of Health Facility Complaints (OHFC) regarding the 9:30 a.m. elopement on 5/11/14. No reports were made for the additional elopements.

On 5/13/14, at 1:00 p.m. the consultant administrator stated the facility had checked the key pad coded door to the access hallway to the back exit, which was functional and also there was a WanderGuard system in place on the back door, which was functional, the facility had

tested the doors and were not able to determine how the resident had gotten out of the facility by the back door.

The facility Elopement policy dated 5/12, indicated... If exit seeking behavior is identified the licensed nurse immediately implements interventions to manage exit seeking behaviors. These interventions may include a personal security device such as a WanderGuard, or diversion activities. The interventions are documented on the care plan and the nursing assistance care plan. ...If the resident is not located within 30 minutes, the Administrator or designee notifies the law enforcement officials, the corporate compliance officer and corporate director of clinical services. When the resident returned to the facility a physical assessment would be done, a thorough investigation of the event would be completed by the DON or designee. A factual account of the occurrence would be documented in the medical record, and the care plan would be reviewed and revised. The administrator of designee reports the event to the appropriate state agency (SA).

F490 K

Based on observation, interview and document review, the faciliy failed to ensure systems were in place to support patient care, supervise staff, and monitor the plan of correction from the survey exit date 3/18/14. An Immediate Jeopardy was identified at F323 on 5/9/14, at 2:03 p.m. for lack of supervision and resident drug and alcohol use for R37, R129, R41, R117, and lack of supervision with resulting elopement for R13. At 2:14 p.m. the administrator, consultant administrator and DON were notified of the Immediate Jeopardy. On 5/12/14, at 2:51 p.m. the administrator and consultant administrator were notified that R116 was added to the Immediate Jeopardy at elopement (F323). In addition they were informed an Immediate Jeopardy was being identified at F224 for neglect of care for R37 and R129, and that an Immediate Jeopardy was being identified at F490 for administration failure to act upon the immediate jeopardy notification from 5/9/14, to educate staff, develop a plan, and ensure systems were in place, that may have prevented the neglect of care for R129 and R37 that occurred on 5/11/14.
An onsite revist survey was conducted 5/5/14-5/13/13, the plan of correction POC with the latest completion date of 4/28/14, had not been fully implemented and 33 federal deficiencies were re-issued, with 25 state licensing tags and 3 Immediate Jeopardies identified at F323, F224, F490.
On 5/7/14, at 12:59 p.m. The director of facility operations (DFO), stated last Wednesday, three employees were told by administator and consultant administrator that it was a crisis to get the medical records room reorganized and they stayed until 3:00 a.m. to complete it.
On 5/7/14 at 2:10 p.m. an Officer MPLS PD, badge 7312, squad 432 4th precinct. Spoke with facility who identified residents who were suspected of criminal activity. The officer reviewed observations by surveyors. And stated the CRT team (undercover) would be doing the investigation. In the future information about the investigation could be obtained by calling 612-673-5704 and asking for the safe unit (who could provide information of what the outcome of this report was. For copies of police reports call 612-673-2961.
On 5/8/14 at 8:02 a.m. a list of residents who were alleged to bring drugs and alcohol into the facility, and a list of residents known to take drugs or alcohol in the facility was requested and provided by administration at 11:00 a.m. on 5/8/14. The facility identified R117, R1, R81, and R113 as questionably buying cigarettes, alcohol and drugs, and selling the substances within the facility. In addition the facility identifed residents known to ingest illegal or contraband

substances within the faciilty as R9, R129, R1, R117, R62, R86, R115, R14, R41, R81, R113, R37.

On 5/12/14, the administrator and consultant administrator acknowledged they were not aware of the two additional elopements for R116 that had occurred on Saturday 5/11/14. The administrator verifed he had not been called and stated he did understand the seriousness of the situation, and they would act accordingly.

At the time of the extended standard survey completed 03/18/14, the facility was not in substantial compliance with the participation requirements and the conditions in the facility constituted both substandard quality of care and immediate jeopardy to resident health or safety. This survey found the most serious deficiencies in your facility to be a pattern of deficiencies that constituted immediate jeopardy (Level K) whereby corrections were required. See CMS-2567 for survey results. Post Certification Revisit to follow.

MINNESOTA
MDH
DEPARTMENT OF HEALTH

Protecting, Maintaining and Improving the Health of Minnesotans

Electronically Delivered: April 4, 2014

Ms. Noreen Cochran, Administrator
Camden Care Center
512 49th Avenue North
Minneapolis, Minnesota 55430

RE: Project Number S5544023

Dear Ms. Cochran:

On March 18, 2014, an extended survey was completed at Camden Care Center by the Minnesota Departments of Health and Public Safety to determine if your facility was in compliance with Federal participation requirements for skilled nursing facilities and/or nursing facilities participating in the Medicare and/or Medicaid programs.

Your facility was not in substantial compliance with the participation requirements and the conditions in your facility constituted **both substandard quality of care and immediate jeopardy** to resident health or safety. This survey found the most serious deficiencies in your facility to be a pattern of deficiencies that constituted immediate jeopardy (Level K) whereby corrections were required. A copy of the Statement of Deficiencies (CMS-2567) is enclosed.

This letter provides important information regarding your response to these deficiencies and addresses the following issues:

Removal of Immediate Jeopardy - date the Minnesota Department of Health verified that the conditions resulting in our notification of immediate jeopardy have been removed;

No Opportunity to Correct - the facility will have remedies imposed immediately after a determination of noncompliance has been made;

Remedies - the type of remedies that will be imposed with the authorization of the Centers for Medicare and Medicaid Services (CMS);

Substandard Quality of Care - means one or more deficiencies related to participation requirements under 42 CFR § 483.13, resident behavior and facility practices, 42 CFR § 483.15, quality of life, or 42 CFR § 483.25, quality of care that constitute either immediate jeopardy to resident health or safety; a pattern of or widespread actual harm that is not immediate jeopardy; or a widespread potential for more than minimal harm, but less than immediate jeopardy, with no actual harm;

Appeal Rights - the facility rights to appeal imposed remedies;
Plan of Correction - when a plan of correction will be due and the information to be contained in that document;

Potential Consequences - the consequences of not attaining substantial compliance 6 months after the survey date; and

Informal Dispute Resolution - your right to request an informal reconsideration to dispute the attached deficiencies.

Please note, it is your responsibility to share the information contained in this letter and the results of this visit with the President of your facility's Governing Body.

REMOVAL OF IMMEDIATE JEOPARDY

We verified, on March 16, 2014, that the conditions resulting in our notification of immediate jeopardy for deficiency cited at F323 have been removed. We also verified, on March 18, 2014, that the conditions resulting in our notification of immediate jeopardy for deficiency cited at F223 have been removed. Therefore, we will notify the CMS Region V Office that the recommended remedy of termination of your facility's Medicare and Medicaid provider agreement not be imposed.

DEPARTMENT CONTACT

Questions regarding this letter and all documents submitted as a response to the resident care deficiencies (those preceded by a "F" tag), i.e., the plan of correction should be directed to:

Gloria Derfus, Unit Supervisor
Minnesota Department of Health

NO OPPORTUNITY TO CORRECT - REMEDIES

CMS policy requires that facilities will not be given an opportunity to correct before remedies will be imposed when immediate jeopardy has been identified. Your facility meets this criterion. Therefore, this Department is imposing the following remedy:

- State Monitoring effective April 9, 2014. (42 CFR 488.422)

In addition, the Department recommended the enforcement remedies listed below to the CMS Region V Office for imposition:

- Civil money penalty for the deficiency cited at: F223 at a S/S of J (42 CFR 488.430 through 488.444)

- Civil money penalty for the deficiency cited at: F226, at a S/S level of F (42 CFR 488.430 through 488.444)

- Civil money penalty for the deficiency cited at: F314, at a S/S level of G (42 CFR 488.430 through 488.444)

- Civil money penalty for the deficiency cited at: F323, at a S/S level of K (42 CFR 488.430 through 488.444)

- Optional Denial of Payment for New Admissions (DPNA) effective April 24, 2014 (42 CFR 488.417 (b))

- Discretionary termination of your provider agreement effective August 18, 2014 (42 CFR 488.412 and 488.456)

The CMS Region V Office will notify you of their determination regarding our recommendations and your appeal rights.

SUBSTANDARD QUALITY OF CARE

Your facility's deficiencies with §483.13, Resident Behavior and Facility Practices regulations, §483.15, Quality of Life and §483.25, Quality of Care has been determined to constitute substandard quality of care as defined at §488.301. Sections 1819(g)(5)(C) and 1919(g)(5)(C) of the Social Security Act and 42 CFR 488.325(h) require that the attending physician of each resident who was found to have received substandard quality of care, as well as the State board responsible for licensing the facility's administrator, be notified of the substandard quality of care. <u>If you have not already provided the following information, you are required to provide to this agency within ten working days of your receipt of this letter the name and address of the attending physician of each resident found to have received substandard quality of care.</u>

Please note that, in accordance with 42 CFR 488.325(g), your failure to provide this information timely will result in termination of participation in the Medicare and/or Medicaid program(s) or imposition of alternative remedies.

Federal law, as specified in the Act at Sections 1819(f)(2)(B) and 1919(f)(2)(B), prohibits approval of nurse assistant training programs offered by, or in, a facility which, within the previous two years, has been subject to an extended or partial extended survey as a result of a finding of substandard quality of care. Therefore, Camden Care Center is prohibited from offering or conducting a Nurse Assistant Training / Competency Evaluation Programs (NATCEP) or Competency Evaluation Programs for two years effective March 18, 2014. This prohibition remains in effect for the specified period even though substantial compliance is attained. Under Public Law 105-15 (H. R. 968), you may request a waiver of this prohibition if certain criteria are met. Please contact the Nursing Assistant Registry at (800) 397-6124 for specific information regarding a waiver for these programs from this Department.

APPEAL RIGHTS

Pursuant to the Federal regulations at 42 CFR Sections 498.3(b)(13)(2) and 498.3(b)(15), a finding of substandard quality of care that leads to the loss of approval by a Skilled Nursing Facility (SNF) of its NATCEP is an initial determination. In accordance with 42 CFR part 489 a provider dissatisfied with an initial determination is entitled to an appeal. If you disagree with the findings of substandard quality of care which resulted in the conduct of an extended survey and the subsequent loss of approval to conduct or be a site for a NATCEP, you or your legal representative may request a hearing before an administrative law judge of the Department of Health and Human Services, Department Appeals Board. Procedures governing this process are set out in Federal regulations at 42 CFR Section 498.40, et. Seq.

A written request for a hearing must be filed no later than 60 days from the date of receipt of this letter. Such a request may be made to the Centers for Medicare and Medicaid Services (formerly Health Care Financing Administration) at the following address:

Department of Health and Human Services
Departmental Appeals Board, MS 6132
Civil Remedies Division
Attention: Karen R. Robinson, Director
330 Independence Avenue, SW
Cohen Building, Room G-644
Washington, DC 20201

A request for a hearing should identify the specific issues and the findings of fact and conclusions of law with which you disagree. It should also specify the basis for contending that the findings and conclusions are incorrect. You do not need to submit records or other documents with your hearing request. The Departmental Appeals Board (DAB) will issue instructions regarding the proper submittal of documents for the hearing. The DAB will also set the location for the hearing, which is likely to be in Minnesota or in Chicago, Illinois. You may be represented by counsel at a hearing at your own expense.

ELECTRONIC PLAN OF CORRECTION (ePoC)

An ePoC for the deficiencies must be submitted within **ten calendar days** of your receipt of this letter. Your ePoC must:

- Address how corrective action will be accomplished for those residents found to have been affected by the deficient practice;

- Address how the facility will identify other residents having the potential to be affected by the same deficient practice;

- Address what measures will be put into place or systemic changes made to ensure that the deficient practice will not recur;

- Indicate how the facility plans to monitor its performance to make sure that solutions are sustained. The facility must develop a plan for ensuring that correction is achieved and sustained. This plan must be implemented, and the corrective action evaluated for its

effectiveness. The plan of correction is integrated into the quality assurance system;

- Include dates when corrective action will be completed. The corrective action completion dates must be acceptable to the State. If the plan of correction is unacceptable for any reason, the State will notify the facility. If the plan of correction is acceptable, the State will notify the facility. Facilities should be cautioned that they are ultimately accountable for their own compliance, and that responsibility is not alleviated in cases where notification about the acceptability of their plan of correction is not made timely. The plan of correction will serve as the facility's allegation of compliance; and,

- Submit electronically to acknowledge your receipt of the electronic 2567, your review and your ePoC submission.

If an acceptable ePoC is not received within 10 calendar days from the receipt of this letter, we will recommend to the CMS Region V Office that one or more of the following remedy be imposed:

• Per day civil money penalty (42 CFR 488.430 through 488.444).

Failure to submit an acceptable ePoC could also result in the termination of your facility's Medicare and/or Medicaid agreement.

PRESUMPTION OF COMPLIANCE - CREDIBLE ALLEGATION OF COMPLIANCE

The facility's ePoC will serve as your allegation of compliance upon the Department's acceptance. In order for your allegation of compliance to be acceptable to the Department, the PoC must meet the criteria listed in the plan of correction section above. You will be notified by the Minnesota Department of Health, Licensing and Certification Program staff and/or the Department of Public Safety, State Fire Marshal Division staff, if your ePoC for their respective deficiencies (if any) is acceptable.

VERIFICATION OF SUBSTANTIAL COMPLIANCE

Upon receipt of an acceptable ePoC, a revisit of your facility will be conducted to verify that substantial compliance with the regulations has been attained. The revisit will occur after the date you identified that compliance was achieved in your plan of correction.

If substantial compliance has been achieved, certification of your facility in the Medicare and/or Medicaid program(s) will be continued and we will recommend that the remedies imposed be discontinued effective the date of the on-site verification. Compliance is certified as of the latest correction date on the approved ePoC, unless it is determined that either correction actually occurred between the latest correction date on the ePoC and the date of the first revisit, or correction occurred sooner than the latest correction date on the ePoC.

FAILURE TO ACHIEVE SUBSTANTIAL COMPLIANCE BY THE THIRD OR FIFTH MONTH AFTER THE LAST DAY OF THE SURVEY

If substantial compliance with the regulations is not verified by June 18, 2014 (three months after the identification of noncompliance), the CMS Region V Office must deny payment for new admissions as mandated by the Social Security Act (the Act) at Sections 1819(h)(2)(D) and 1919(h)(2)(C) and Federal regulations at 42 CFR Section 488.417(b). This mandatory denial of payments will be based on the failure to comply with deficiencies originally contained in the Statement of Deficiencies, upon the identification of new deficiencies at the time of the revisit, or if deficiencies have been issued as the result of a complaint visit or other survey conducted after the original statement of deficiencies was issued. This mandatory denial of payment is in addition to any remedies that may still be in effect as of this date.

We will also recommend to the CMS Region V Office and/or the Minnesota Department of Human Services that your provider agreement be terminated by August 18, 2014 (five months after the identification of noncompliance) if your facility does not achieve substantial compliance. This action is mandated by the Social Security Act at Sections 1819(h)(2)(C) and 1919(h)(3)(D) and Federal regulations at 42 CFR Sections 488.412 and 488.456.

INFORMAL DISPUTE RESOLUTION

In accordance with 42 CFR 488.331, you have one opportunity to question cited deficiencies through an informal dispute resolution process. You are required to send your written request, along with the specific deficiencies being disputed, and an explanation of why you are disputing those deficiencies, to:

Nursing Home Informal Dispute Process
Minnesota Department of Health
Division of Compliance Monitoring
P.O. Box 64900
St. Paul, Minnesota 55164-0900

This request must be sent within the same ten days you have for submitting an ePoC for the cited deficiencies. All requests for an IDR or IIDR of federal deficiencies must be submitted via the web at: http://www.health.state.mn.us/divs/fpc/profinfo/ltc/ltc_idr.cfm

You must notify MDH at this website of your request for an IDR or IIDR within the 10 calendar day period allotted for submitting an acceptable plan of correction. A copy of the Department's informal dispute resolution policies are posted on the MDH Information Bulletin website at: http://www.health.state.mn.us/divs/fpc/profinfo/infobul.htm

Please note that the failure to complete the informal dispute resolution process will not delay the dates specified for compliance or the imposition of remedies.

Questions regarding all documents submitted as a response to the Life Safety Code deficiencies (those preceded by a "K" tag), i.e., the plan of correction, request for waivers, should be directed to:

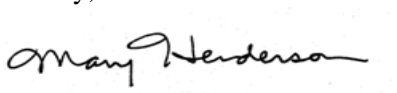
Mr. Patrick Sheehan, Supervisor
Health Care Fire Inspections
State Fire Marshal Division

444 Cedar Street, Suite 145
St. Paul, Minnesota 55101-5145

Telephone: (651) 201-7205
Fax: (651) 215-0541

Feel free to contact me if you have questions.

Sincerely,



Mary Henderson, Program Assurance Supervisor

F 000	INITIAL COMMENTS The facility's electronic plan of correction (ePOC) will serve as your allegation of compliance upon the Department's acceptance. Because you are enrolled in ePOC, your signature is not required at the bottom of the first page of the CMS-2567 form. Your electronic submission of the POC will be used as verification of compliance. Upon receipt of an acceptable electronic POC, an on-site revisit of your facility may be conducted to validate that substantial compliance with the regulations has been attained in accordance with your verification. An extended survey was conducted by the Minnesota Department of Health on 3/10/14 through 3/18/14. The survey resulted in an Immediate Jeopardy (IJ) at F223 related to the facility's failure to protect a resident from willful abuse by another resident which resulted in the high potential for harm or death. For F323 related to the facility's failure to supervise residents with unsafe smoking, which resulted in the high potential for harm or death. Facility staff had been notified of the IJ's on 3/12/14, at 5:00 p.m. The IJ was removed on 3/16/14, at 12:17 p.m. however non-compliance remained at the scope and severity E, a pattern with no actual harm, with the potential for more than minimal harm. For F323 on 3/13/14, at 1:50 p.m. failure to safely use a mechanical lift device was added to the IJ at F323. The IJ was removed on 3/16/14, at 12:17 p.m. however non-compliance remained at the scope and severity E, a pattern with no actual	F 000	This Plan of Correction is submitted as required under Federal and State regulations and statutes applicable to long-term care providers. This plan of correction does not constitute an admission of liability on the part of the facility, and such liability is hereby denied. The submission of this plan does not constitute agreement by the facility that the surveyor's findings or conclusions are accurate, that the findings constitute deficiency, or that the scope and severity regarding the deficiency are correctly applied. Please accept this plan of correction as our credible allegation of compliance. Our compliance will be achieved by the dated identified on the plan of correction.

F 155 SS=D	483.10(b)(4) RIGHT TO REFUSE; FORMULATE ADVANCE DIRECTIVES The resident has the right to refuse treatment, to refuse to participate in experimental research, and to formulate an advance directive as specified in paragraph (8) of this section. The facility must comply with the requirements specified in subpart I of part 489 of this chapter related to maintaining written policies and procedures regarding advance directives. These requirements include provisions to inform and provide written information to all adult residents concerning the right to accept or refuse medical or surgical treatment and, at the individual's option, formulate an advance directive. This includes a written description of the facility's policies to implement advance directives and applicable State law. This REQUIREMENT is not met as evidenced by: Based on observation, interview and document	F 155	F 155 Sampled resident R11 is no longer in the building. For all residents at the facility, they will be allowed to exercise their right to refuse treatment of all kind. The facility has a policy titled "*Resident Refusal of Medical Treatment*". This policy was effective 06/2012.This policy will be made operational for all residents at the facility that refuse medical treatment. Additionally, the facility has a form "Resident Refusal of Medical Treatment Form" that documents the risks of refusing medical treatment. The use of this form or a comparable form in PCC (PointClick Care) will be used to document risk vs benefit discussions with the resident and IDT.

F 155	Continued From page 2 review, the facility failed to consistently inform 1 of 1 resident (R11) of the risks and benefits associated with refusal of all activities of daily living (ADLs), range of motion (ROM), physician visits, therapies, assessments and interventions. Findings include: On 3/11/14, at 9:48 a.m. during the initial stage one interview R11 stated, "I don't like people." R11 further verified he did not allow facility staff to assist him with ADLs, bathing or ROM. R11 verified he had a contracture of his left hand. R11 stated he did not take showers. - At 10:12 a.m. surveyor asked to see R11's left hand. R11 was observed to have a contracture of the left arm, wrist and hand. R11 stated the contracture was due to an aneurysm and stroke. Stated he "didn't let them [facility staff] touch it" and only allowed staff he "trusted" to cut the nails (of the contracted hand, to prevent the nails from growing into the skin of the hand). R11 stated he cleaned his left hand (inside the contracture, to prevent potential breakdown) under the faucet with running water, but was unclear on how frequently he cleaned the left hand. R11 verified he did not allow staff to monitor the skin of his hand for potential breakdown. - At 12:32 p.m. R11's hair was observed to be long, uncombed and appeared to be unwashed. R11 wore a dark colored baseball cap. R11's nails were long on the right hand with dark colored debris observed under the nails. R11 was observed to be wearing a dark colored coat, t-shirt and dark sweat pants. On 3/13/14, from 8:00 a.m. to 9:00 a.m. R11 was observed to be wearing the same baseball cap, t-shirt, dark colored sweat pants and coat as the	F 155	Clinical record audits to ensure the appropriate management of residents refusing medical treatment will be conducted for a random sampling of residents on a monthly basis for 6 months. The results of these audits will be reviewed by the DON and facility Administrator. Both will sign off on the audits. The audits will be reported to the QA committee monthly X6 for review and further intervention as found necessary. Responsible: Administrator, DON, licensed staff, social services Compliance date: 4/28/2014

F 155	Continued From page 3	F 155		

initial interview. R11 appeared to have unwashed, uncombed hair. At no time during the observation were staff observed to approach R11 and offer assistance with grooming or range of motion. During the observations, R11 was observed to be in bed and fully dressed in the same clothing.

On 3/13/14, at 9:42 a.m. a nursing assistant (NA)-M stated R11 "refuses everything." NA-M explained "today was [R11's] shower day" and stated R11 refused the shower. NA-M stated when staff re-approach R11, he was verbally abusive and verified he would make derogatory statements to staff. NA-M stated staff was expected to "re-approach" R11. "We usually come back and ask, but he always refuses." NA-M was unclear how R11 was bathed/cleaned and explained staff usually took care of R11 on the evening shift.

On 3/13/14, at 10:00 a.m. NA-E stated R11 "refused all cares" and stated she went back to R11 to re-approach if there was a refusal. NA-E stated she offered all means of bathing (shower, bed bath, tub bath) and R11 refused "all." NA-E explained she then reported refusals to the nurse and documented "refused" on the shower sheet. NA-E was unclear if risks of his frequent refusals were explained to R11.

R11's Medicine Admission History and Physical dated 12/31/13, included information regarding R11 prior to admission to the facility. The form identified R11 had a chronic problem with homelessness and R11 had "lost his medical respite bed at Harbor Lights [a shelter facility for the homeless] due to refusal to shower in their facilities." The form indicated R11's left sided spasticity was "Worse since he has not taken any

F 155	Continued From page 4 of his medications since 12/24" and directed to resume baclofen (a muscle relaxer used to treat muscle symptoms). The Admission Record indicated R11 was admitted to the facility on 12/31/13. A Therapy Screening Form dated 1/2/14, indicated R11 was screened upon admission to the facility. The form indicated R11's ADL's, and mobility were impaired. The form indicated R11 "declines" splint/orthotic. The "Comments" section of the form indicated, "Pt [patient/R11] repeatedly declined offer of therapy services, stating he doesn't like people. Declines needing or wanting help for any ADL's, waiting for electronic scooter to arrive, is independent with manual w/c [wheelchair]. Requests not to have therapy services, no orders requested." The form indicated therapy services for physical therapy, occupational therapy, or speech therapy was "Refused." Although the form was dated 1/2/14, at the top of the form, the bottom of the form was signed by a therapist and dated for 3/11/14. The screening form indicated R11 was identified to refuse care and services shortly after admission. R11's admission Minimum Data Set (MDS) dated 1/6/14, indicated R11 was cognitively intact, had a mood problem of feeling tired, and had no behavior problems. The MDS indicated R11 was independent with bed mobility, transferring, locomotion on the unit and eating; required supervision with locomotion off the unit, dressing and toilet use; R11 was identified as requiring extensive physical assistance from staff for personal hygiene. The Care Area Assessment	F 155

F 155	Continued From page 5 (CAA) for nutrition dated 1/7/14, identified diagnoses of spastic hemiplegia on left side, history of alcohol abuse and congestive heart failure. The CAA identified R11 had "no upper teeth and few lower teeth" and, "He does not wish to receive a mechanically altered diet." The CAA for ADL Functional/Rehabilitation Potential dated 1/13/14, identified the CAA was triggered due to R11's need for supervision with ADLs. The CAA identified R11 had left sided hemiplegia due to a history of cerebrovascular accident (CVA, stroke). The CAA identified R11's other pertinent diagnoses to include altered mental status, and homelessness. The CAA identified R11 "was eval [evaluated] for therapy" and refused. The CAA identified R11 was continent of bowel and bladder, had no skin issues or falls. The CAA for falls and pressure ulcers (both dated 1/13/14), recapitulated the same data as ADL CAA. Although R11 initially refused therapies upon admission, and was identified to refuse therapy in the CAAs, the MDS did not identify refusal of care behaviors. Although the behavior of refusing therapies was identified in the CAA, the clinical record lacked evidence R11 was provided documented risk benefit information associated with refusals. The Social Services Comprehensive Assessment Packet dated 1/13/14, included: a LOA (leave of absence) Safety Assessment, Smoking Assessment and Vulnerable Adult Assessment dated 1/2/14. No behaviors of refusing cares were identified in the assessments. The Vulnerable Adult Assessment appeared incomplete. Although R11 was identified to have refused to take showers at the homeless shelter (resulting in R11 losing a respite bed there) and R11 had behaviors of not taking medications such	F 155

F 155	Continued From page 7 dated 1/8/14, and an identified problem for risk for impaired nutrition dated as revised on 3/12/14. Neither care plan focuses addressed R11's refusals of care or behaviors. The clinical record lacked evidence R11 had care plans developed (including goals and interventions) to address: R11's identified behaviors of refusals/rejection of cares. In addition, R11 lacked a care plan to address the risks of refusals of care, such as potential increase in contracture due to refusals of therapies and/or range of motion, potential development of skin issues due to refusal of bathing/personal hygiene/grooming and skin assessments/evaluations and refusals of doctor visits. Review of the IDT Progress Notes from 12/31/13, through 3/17/13, indicated the following: - On 12/31/13, an admission note at 10:47 p.m. identified R11 was admitted to the facility, identified R11 was cognitively intact, continent of bowel and bladder, and transferred independently. A note at 11:53 p.m. identified R11 was able to make changes in body position when in bed to "release pressure." Although R11 had left sided weakness and a contracture of left arm and lower leg, the note incorrectly identified R11 was "able to independently walk to and from toilet." - On 1/1/14, a Late Entry note at 3:43 a.m. indicated R11 refused three attempts at a "body audit" and indicated R11 stated, "'I do not have anything on my skin, no wound.'" At 1:43 p.m. a note identified R11 required one staff physical assist with ADLs. At 10:20 p.m. a note identified R11 "refused make change of clothes and went to bed with his street clothes." - On 1/2/14, at 6:29 a.m. a note identified, "Resident vehemently refused vital sign to be	F 155

F 155	Continued From page 8 obtained, even when reapproached. Noted some blood show on his nares but he adamantly rejected nursing intervention, instead he placed a tissue papper [sic] in the nose, he refused to use 4x4 [gauze]. We will continue to encourage with care and support at this moment." At 10:13 p.m. a not indicated, "Resident refused cares and re-approached throughout the shift but he refused stating to be left alone." - On 1/4/14, a note at 10:40 p.m. indicated R11 refused "all attempts for the vital signs to be taken and cares to be provided." The note identified R11 "Requires help with ADLs but refuses." Although a behavior of refusing/rejecting cares was voiced by R11, the note indicated, "No behavioral problems noted." - On 1/20/14, at 3:16 p.m. a social services note indicated SSD met with R11 and discussed R11's discharge plan to remain in the facility "short term [sic]." The note identified R11 had determined his stay was short-term and identified R11 "is homeless" but would "like to find placement." The note indicated SSD would assist with discharge planning. - On 2/4/14, at 12:54 p.m. a social services note indicated the county public health nurse and SSD met with R11 regarding relocation options. At that time the note indicated R11 would "like to return to the streets when it gets warmer outside." R11 refused assistance from both. The note identified SSD "explained the risks of returning to the streets." - On 2/5/14, at 11:01 p.m. R11 was identified to be abusive to staff "using N-word to the nursing staff." The note indicated staff attempted to speak with R11, but R11 cursed at staff, refused to allow staff to assist with cutting his nails "stating he [would] look for qualified person to cut his finger nails." F 155	Continued From page 10 Refused" for 16 out of 18 opportunities. - "Personal Hygiene: Self Performance - How resident maintains personal hygiene, including combing hair, brushing teeth, shaving, applying makeup, washing/drying face and hands (Excludes baths and showers)" indicated "Resident Refused" eight times, "Not applicable" two times, "Independent - No help or staff oversight at any time" eight times out of 18 opportunities. The clinical record lacked evidence R11's consistent refusals documented in care tracker and the IDT Progress Notes were identified and evaluated. In addition, the clinical record lacked evidence R11 was informed of the specific risks associated with consistent refusals of cares, rejection of therapies and rejection of physician's visits. On 3/14/14, at 11:20 a.m. a physical therapist (PT)-J verified R11 refused therapy. PT-J stated risks and a benefit were provided to R11, but was unclear on documentation of the risk/benefits. On 3/14/14, at 10:41 a.m. social service designee, (SSD) stated she was not aware of R11 refusing any or all cares. SSD stated R11 was "easy to communicate with" and her first impression of R11 was he "wouldn't refuse." SSD further stated she "believes if [R11] was re-approached [when refusing]," R11 would "go for it." SSD stated facility staff should have been reporting the refusals to her and stated she would then have "approached and explained the risks and benefits" to R11. SSD stated she reviewed the (interdisciplinary team, IDT) progress notes, but stated the behaviors were not appropriately being documented in the clinical record. SSD	F 155

F 155	Continued From page 11 stated "documentation was missing" and there "wasn't appropriate documentation [on behaviors]." SSD stated it was "very important for staff to document" and further stated she "relied heavily" on the documentation. SSD stated she was "not closely interactive with residents and staff." SSD verified she had access to "PCC [Point Click Care, the electronic medical record or EMR], and stated she did not know the NA staff documented R11's refusals daily "at the kiosks [in Care Tracker]." SSD stated she did not have access to the "kiosk" or Care Tracker. When asked about R11's discharge plan, SSD stated, "When [R11] came, I did my psychosocial assessment, offered him services." Although SSD stated she was unaware of R11's refusal, R11 was "easy to communicate with" and R11 would "go for it" if re-approached during a refusal of a care or treatment, SSD stated, "He [R11] refused services and said he was going to back to the streets." SSD confirmed she was aware of R11's unsafe discharge plan and stated she "referred him to the county for relocation services." SSD further verified her awareness of R11's refusals and stated the "Public health nurse attempted to visit with him, he refused for the moment." The clinical record lacked evidence of SSD's psychosocial assessment. On 3/13/14, at 2:24 p.m. the licensed practical nurse (LPN)-D verified there was no monitoring for behaviors towards staff, such as refusal/rejection of cares. On 3/13/14, at 2:37 p.m. a facility staff member (O)-E verified there were no physician's visits for R11 in the clinical record. O-E stated R11 refused referrals to "Indian services," cardiology and the medical director. O-E stated R11 had expressed	F 155

F 155	Continued From page 12 he was in the facility until the weather warmed, then he "planned to return to the streets." On 3/13/14, at 2:40 p.m. LPN-D stated monitoring for refusal of care was in the NA "kiosks" and documented in "Care Tracker [a computer based data collection tool for the electronic medical record]" and should report the refusals of care to the nurse. LPN-D verified refusals should be documented in the clinical record. LPN-D was unclear on evaluation of the refusals or explanation of risks and benefits associated with specific refusals. On 3/18/14, at approximately 2:05 p.m. the director of nursing (DON) verified the clinical record lacked evidence R11 was provided with specific risks information regarding refusals of all cares, treatments, therapies and physician's visits. DON verified documented risk benefit information should have been provided. The Resident Refusal of Medical Treatment policy dated as effective 6/2012, indicated when a resident refused medical treatment, the resident (and family/representative and/or guardian) will be fully informed of the risk vs. benefit of such a refusal. The procedure indicated when a resident refused medical treatment, a meeting with the resident (family or legal representative) including the attending physician and representative(s) from the facility shall be held. The intent of the meeting was to discuss all of the risks and benefits, ensure resident/representative were "totally educated," that the rationale was comprehended by all parties, and all relevant parties were totally informed of the risks associated with the refusal. The policy indicated the meeting and discussion should include	F 155

F 157	Continued From page 15 merged into one large area. LPN-A felt they were related to incontinence or potentially from sitting on the area and getting pinched. LPN-A was observed to apply Remedy Calazime (a type of antifungal barrier ointment) around the open areas. LPN-A said the open areas on the scrotum would be reported to hospice and the director of nursing (DON), but did not indicate she would contact family regarding the change in status. On 3/13/14, at 7:56 a.m. R64 was assisted with cares by nursing assistant (NA)-D. The observation noted two open areas on the bottom of R64's scrotum; NA-D stated he had told the nurse about those. On 3/13/14, at 8:55 a.m. LPN-D was interviewed and reported any skin conditions should be documented on the wound flow sheet. LPN-D stated LPN-A had those documents. On 3/13/14, at 9:11 a.m. LPN-A said that R64's bath was scheduled yesterday and there should have been a skin audit done. LPN-A began flipping through a three-ring binder with the skin audit sheets, and commented to LPN-D that she needed to complete her documentation on the skin conditions. Several skin audit sheets were observed with LPN-D's signature but no documentation on the skin was recorded on the forms. On 3/14/14, at 10:34 a.m. the director of nursing (DON) observed R64's open areas with the surveyor. The DON stated they appear to be pressure related, and might be aggravated by incontinence. The DON would classify the sites as two separate stage II pressure ulcers (a type of pressure ulcer characterized by partial	F 157	Clinical record audits will be conducted for sampled resident R64 and for a random sampling of residents on a monthly basis for 6 months. The results of these audits will be reviewed by the DON and facility Administrator. Both will sign off on the audits. The audits will be reported to the QA committee monthly X6 for review and further intervention as found necessary. Responsible: Administrator, DON, licensed staff Compliance date: 4/28/2014

F 157	Continued From page 16 thickness loss of dermis presenting as a shallow open ulcer with a red pink wound bed, without slough - may also present as an intact or open/ruptured serum-filled or serosanguineous filled blister). Hospice LPN-F was also present at that time and concurred with the DON's impression. LPN-F confirmed that R64's brief was soiled with urine, and registered nurse (RN)-D stated the resident had not been repositioned since before breakfast. The DON stated the measurement of the first area was 2.5 cm x 1 cm with clearly defined borders that were irregular in shape. The second area had measurements of 1.5 cm x 2.4 cm. The wound bases were noted to be whitish in color, a change from the previous observation that morning. On 3/13/14, at 1:25 p.m. R64 was transferred by NA-A and NA-D into bed using the standing lift. R64 was noted to have two open areas on the scrotum; NA-D said he informed a nurse of the open areas last week. Review of the nursing progress notes and skin documentation worksheets for the previous week did not identify the open areas, or any physician or family contact regarding their presence or condition. On 3/13/14, at 1:32 p.m. LPN-D was informed of the skin areas by surveyor staff and looked at the sites. LPN-D said they thought they were from incontinence of bladder. Two distinct irregularly shaped, elongated open areas with a pinkish-red wound base were observed. There was a superficial loss of skin over the areas. Nursing progress notes for 3/13/14, revealed no documentation regarding LPN-D's observations of the area, or any follow up measures or assessment of the areas.	F 157

F 167	Continued From page 19 not accessible to residents in wheelchairs or the public without asking facility staff for assistance. On 3/17/14, at 1:13 p.m. the director of nursing (DON) verified the Federal and State survey results were not accessible to residents in wheelchairs and could not be accessed without asking staff. The DON stated the facility lacked a policy for posting the most recent Federal and State survey results.	F 167		
F 174 SS=D	483.10(k),(l) RIGHT TO TELEPHONE ACCESS WITH PRIVACY §483.10(k) Telephone The resident has the right to have reasonable access to the use of a telephone where calls can be made without being overheard. §483.10(l) Personal Property The resident has the right to retain and use personal possessions, including some furnishings, and appropriate clothing, as space permits, unless to do so would infringe upon the rights or health and safety of other residents. This REQUIREMENT is not met as evidenced by: Based on observation, interview and document review, the facility failed to ensure 1 of 2 residents (R38) in the sample (but had the potential to affect 8 of 84 residents whose family did their laundry) reviewed for personal property whose clothing was not handled, not stored in a clean and sanitary manner. Findings include: On 3/12/14, at 12:42 p.m. family member (F)-A	F 174	F 174 For sampled resident R38 and for all residents that identify the facility to do the resident personal laundry, the facility shall ensure the laundry is done in a timely fashion. The laundry will be done in a manner to keep the clothes clean and well maintained. For sampled resident R38, the laundry issues was discussed. The facility offered to replace the damaged clothing and the family declined. A follow up meeting was held with the family. They estimated a cost of $177 to replace the clothing. The family was given a check for $177 to replace the damaged clothing.

F 174	Continued From page 20 approached the surveyors and stated he had been to the administrator office but had not seen anyone and wanted to show one of the surveyors something in R38's room. On 3/12/14, at 12:44 p.m. upon entering the R38's room there was an open clear plastic bag half filled with clothing sitting on the floor of the closet. As surveyor approached the closet there was a strong musty smell emanating from the plastic bag. -At 12:47 p.m. F-A stated he usually visited R38 one to two times per week and he was responsible for doing her laundry. He had been out of town due to other family issues and had asked licensed practical nurse (LPN)-A before leaving town in 1/23/14, to do R38's laundry while he was gone, but that was never followed up as requested even with phone calls when he was out of town to make sure R38 was taken care of. F-A added he had been out of town again in 12/13 and the same thing had happened. On 3/12/14, at approximately 1:00 p.m. F-A came to the surveyors carrying a clear plastic bag with clothing stated he wanted to show the surveyor how his mother's clothes that had not been laundered look. He opened and pulled the plastic bag back and in the bag was a pair of black slack and a pair of white socks. The clothing was observed to have multiple fuzzy white circular growths all over the black pants and both the stockings and pants had a strong musty smell. F-A stated, "Look at these clothes with all the mold growing in them." R38's care plan dated 9/27/11, identified R38 had an activity of daily living (ADL's) self-care performance deficit related to dementia, muscular	F 174	The facility has a policy titled *"Laundry Services."* The facility administrator, the laundry services staff, and the laundry manager shall ensure this policy is operational. Staff inservice will take place. These inservice records will be reviewed by the QA committee. At admission, the facility shall determine who will do the residents personal laundry. This record will be kept in a log book and reviewed and updated regularly by the laundry manager. This log book will be discussed at the QA committee monthly X6 for review and additional intervention as deemed necessary. The log will then be reviewed quarterly by the QA committee. F 174	Continued From page 21 wasting, delusions, osteoarthritis, osteoporosis and indicated R38 was on hospice. Goal "Will have daily needs met..." The care plan directed nursing to provide cares, services according to resident needs and plan of care. In addition, R38's cognitive function identified R38 with an alteration in decision making, confusion, impaired thought processes, difficulty with decision making, impaired communication and indicated R38 required staff assistance with ADLs. Goal "R38 will have basic needs met on a daily basis..." R38's diagnoses included Alzheimer's disease, senile osteoporosis, muscular wasting and disuse atrophy, macular degeneration of retina, Parkinsonism, and cataract obtained from the Minimum Data Set (MDS) dated 1/29/14. In addition, the MDS indicated R38 required total physical dependence of one staff with ADLs. R38 was depicted as being totally incontinent of both bladder and bowel. The Cognitive Loss/Dementia Care Area Assessment (CAA) dated 2/10/14, identified R38 had decreased ability to make self-understood. The CAA for urinary incontinence dated 2/10/14, revealed R38 to be incontinent of both bowel and bladder and the plan was to "continue the same care." When interviewed on 3/14/14, at 8:48 a.m. LPN-A stated F-A had called stating he was out of town and had requested to have R38's laundry to be done by the facility until he returned. LPN-A was not sure about the exact date when F-A had requested. LPN-A acknowledged she had not documented the phone call in R38's medical record. LPN-A further stated she had gone to the	F 174

F 174	Continued From page 22 laundry supervisor (LS) and had told her to do the laundry and LS stated it was okay. -At 8:50 a.m. LPN stated one day she had realized LS was not working but had approached another laundry staff who had separated with the facility and had ask her to make sure she grabbed the laundry until further notice. LPN-A stated LS should have verified before stopping to do the laundry or should have continued until she had been told otherwise. LPN-A stated she was disappointed at how the whole situation had turned out. When interviewed on 3/14/14, at 2:38 p.m. LS stated she had been asked by LPN-A to do R38's laundry but had thought it was only one time and she never went back to check R38's room to see if the laundry was being done. She further stated "When I saw the clothes the other day they were moldy and I felt really bad and even I offered F-A to do the laundry but he declined." When interviewed on 3/17/14, at 8:12 a.m. the director of nursing (DON) stated there was miscommunication between laundry and when LPN-A had told LS as she thought it was a onetime thing only but never followed up before stopping to do it. She further stated when the laundry piled up someone should have said something or brought it to someone's attention.	F 174		
F 176 SS=D	483.10(n) RESIDENT SELF-ADMINISTER DRUGS IF DEEMED SAFE An individual resident may self-administer drugs if the interdisciplinary team, as defined by §483.20(d)(2)(ii), has determined that this practice is safe.	F 176	F 176 For sampled resident R36 and for all residents who wish to self-administer treatments and/or medication, the resident will be assessed for the safe ability to self-administer. The activity will be cared planned. Storage of supplies will be addressed.

F 176	Continued From page 23 This REQUIREMENT is not met as evidenced by: Based on observation, interview, and document review, the facility failed to ensure self-administered medications were safely administered for 1 of 1 resident (R36) observed to self-administer medications (SAM). Findings include: On 3/11/14, at 9:36 a.m. during a random observation R36 showed surveyor he was holding his vitamin and potassium tablets (supplement replacements) in his hand. Upon looking, four and a half (4 1/2) tablets were observed in his left hand. When interviewed on 3/11/14, at 9:39 a.m. trained medication aide (TMA)-C stated R36 took the big ones back to his room to take with pop but the Lasix (medication used to treat excessive fluid accumulation and swelling of the body caused by heart failure) and Methadone (a narcotic pain medication) he took them in front of her. The quarterly Minimum Data Set (MDS) dated 2/18/14, identified R36 had diagnoses including hypertension, anemia, peripheral vascular disease (PVD), chronic pain and delirium/confusion state. In addition, the MDS indicated R36's Brief Interview for Mental Status (BIMS-tool used to measure cognition) had a score of 13 which noted cognitively intact. The care plan dated 6/14/12, indicated R36 had declined to self-medicate. The care plan directed "Nursing to store, administer and document all medications daily as ordered." In addition, the	F 176	The facility does have a policy titled "Self Administration of Treatment" that was effective 05/2012 and reviewed again on 05/2013. This policy shall be made operational for all residents in the facility. Additionally, the facility does have a policy titled "Self Administration of Medication" and has a specific self administration of medication form that was effective 05/2012 and reviewed again on 05/2013. These policies will be made full operational in the facility. All residents that engage in self-administration of treatments and/or medication will be assessed initially on admission and reassessed at least quarterly with MDS assessment and PRN based on clinical judgment and/or change in medical condition. Staff will be educated about the safe self-administration of treatments by residents and will ensure they are thoroughly aware of who does and does not self-administer treatments. This inservice will be reviewed by the QA committee.

F 204	Continued From page 26 diagnoses to include cellulitis and abscess of leg, diabetes, morbid obesity, history of alcohol abuse, homelessness and bipolar disorder which were obtained from the Discharge Health & Physical Progress Note dated 6/27/13. R100 was discharged from the facility of 10/30/13, to the homeless shelter where she had resided prior to the hospital admsission. The hospital History and Physical dated 6/25/13, noted R100 to be a type II diabetic that had poor insight to the disease process and was poorly controlled. R100 had fasting blood sugars over 200. The hospital indicated they were going to recheck the A1C (A1C is a test that measures a person's average blood glucose level over the past two to three months); however, no lab results for the A1C were found in the medical record from either the hosiptial or the facility. The Progress Notes for R100 were reviewed from admission to 10/30/13, only once did the facility try to explain the benefits of the blood sugars per the Progress Notes on 9/22/13. The Progress Notes lacked evidence of the risks versus benefits of taking all of the prescribed medication. The medical lacked evidence that R100 had been offered, provided orientation and facility staff reviewed discharge instructions with her prior to discharging her. Review of Physician Orders dated 6/27/13 through 10/29/13, lacked evidence that a physician's order had been obtained to discharge R100 from the facility. The Medication Administration record (MAR) dated 6/27/13 through 10/30/13, were reviewed. The MAR noted R100's blood sugars ranged from	F 204	Staff will be inserviced about the policies. These inservice records will be reviewed by the QA committee for further action as deemed appropriate. All new discharge records will be audited for sufficient discharge planning and documentation as well as the documentation of a discharge summary X6 months. The results of these audits will be reported to the QA committee for review and further action as deemed appropriate. F 204	Continued From page 27 112 to 275. The Nursing Comprehensive Assessment Packet Admission dated 6/28/13 through 7/1/13, revealed the facility did not assess R100's non-compliance with blood sugars and medications. The Nutritional Assessment 7/4/13 and 10/3/13, revealed the registered dietician only discussed the "risks of excess weight" and that "the resident expressed an understanding." R100's Physician's Orders Sheet dated 10/22/13, revealed R100 recieved Glipizide and Metformin (both diabetes medications) that were prescribed once and twice daily respectively and was to have the blood sugars checked at alternating times twice a day. R100's physician wrote an order for the staff to monitor her oral medication intake as R100 would spit out the medication. Staff were to ensure the resident had swallowed the medication and not spit out the medication. R100's medical record lacked evidence the facility had provided sufficient preparation, orientation on monitoring her blood sugars to be aware of signs and symptoms of hypoglycemia (low blood sugar) and hyperglycemia (high blood sugar) and administering her medications. The medical record also lacked evidence of the staff informing R100 of the importance of taking all of her as prescribed medication to maintain blood sugar within the normal range. On 3/17/14, at 10:00 a.m. the director of nursing (DON) stated, "Discharge planning was not being done by designated social worker; she thought she only needed to call relocation services."	F 204	F 204 Sampled resident R100 is no longer a resident at the facility. For all residents who have anticipated discharges, the facility shall ensure sufficient preparation for discharge providing for a safe discharge plan. Additionally, the facility shall ensure that all discharge planning is thoroughly documented. For residents were a discharge is not anticipated, the facility shall ensure that a discharge summary is completed in a timely manner by the appropriate IDT members and placed in the closed record. F 221	Continued From page 29 addition, the facility failed to ensure the restraint was the least restrictive and clinical indications for the use of the restraint. Findings include: During the initial stage one observation on 3/10/14, at 6:09 p.m. R89 was observed to be in a wheelchair behind the nursing station with both brakes locked and the wheelchair arm rests push flush against the top of a desk (located directly in the center of the nursing station). The wheelchair was observed to be pushed against the desk, created a space R89 was observed to not be able to get out of. R89 was unable to answer surveyor initial probe questions at the time of the observation. R89 made nonsensical statements in response. R89 was observed to attempt to stand twice. Although a registered nurse (RN)-F was observed to be on the phone in direct line of sight of R89 at the nursing station and other staff was in and out of the area, no staff redirected or assisted R89 when she attempted to stand. R89's facial expression appeared to be troubled and anxious when she attempted to stand. R89 appeared unsteady with each attempt to stand. - At 6:12 p.m. a nursing assistant (NA)-N provided graham crackers to R89 and left the area. Four staff was observed in the area behind the nursing desk at that time. R89 sat and ate the crackers quietly. NA-N returned and then handed a glass of amber colored juice to R89 and stood next to her. R89's wheelchair brakes remained locked and the arm rests remained flush against the top of the desk. - At 6:15 p.m. RN-N left the nursing station and NA-N remained standing next to R89. R89 calmly drank juice, ate graham crackers and made not attempts to stand. At that time, three facility staff	F 221	The facility does have a policy titled, "Restrictive Device Management" and a "Restrictive Device Assessment Form and Consent" that were initiated 05/2012, reviewed 05/2013. This policy has been reviewed and revised. The revision now addresses locking a wheelchair as a restrictive device and it addresses the need for the care plan to articulate the frequently of releasing a restrictive device. Staff will be inserviced about the policy. These inservice records will be reviewed by the QA committee for further action as deemed appropriate.

F 221	Continued From page 31 to walk a few steps and "fall." LPN-G explained R89 required supervision due to her attempts to walk and she would "lift up the whole table" when she attempted to stand. LPN-G explained staff needed to provide "one to one" with the resident at times and that was why staff needed to sit next to her. LPN-G further stated, "On my shift, I monitor her closely due to this." On 3/11/14, at 2:48 p.m. R89's guardian (O)-Q was contacted via telephone and verified she was the first contact for R89. When asked if R89 had been restrained, the guardian stated R89 was not restrained and verified she was not notified of any potential restraints. The guardian stated she was not aware of any recent falls. On 3/13/14, at 7:45 a.m. R89 was observed to be up and dressed, seated in a wheelchair near a medication cart in the hallway. R89 was confused and asked if she could "come with us." R89 attempted to raise herself partially in the wheelchair. Both brakes were locked and no staff was near the area. R89 rose slightly off wheelchair seat and immediately sat back down. - At 8:10 a.m. R89 was wheeled off the unit. - At 8:21 a.m. R89 was observed to be seated at the same long breakfast table and in the same spot at the table. Both R89's wheelchair brakes were locked, R89 was observed to make continuous attempts to stand by raising herself off the seat of the wheelchair, while pushing up with both hands against the armrests. The armrests were up against the top of the table and created a space R89 potentially could not get out of. - At 8:28 a.m. a divided plate with bowl was delivered by a cook (CK)-A to R89. Female staff (O)-R sat with R89 and assisted her to eat. The wheelchair brakes remained locked; R89	F 221

F 221	Continued From page 32 remained up to the table. - At 8:36 a.m. O-R stood and left R89, then approached the kitchen door, made a request and return to assisting R89. R89 made no attempts to stand. O-R interacted with R89 directly and appropriately. R89 remained in O-R's line of sight the entire time. - At 8:45 a.m. R89's brakes were unlocked and R89 was wheeled out of the dining area by O-R. At no time while R89 was supervised were R89's brakes unlocked. On 3/13/14, at approximately 9:50 a.m. NA-M stated since she has cared for R89, R89 had not fallen in her care. NA-M verified she locked the brakes on R89's wheelchair, even if she was sitting with the resident. NA-M stated, "When you're with her, you always have to lock the breaks." NA-M stated locking the brakes was a means to prevent falls and verified R89 was at times brought behind the nursing station, brakes locked and pushed up to the nursing desk. During monitoring observations on 3/15/14, at 10:21 a.m. R89 was observed to be in her wheelchair behind the nursing station. Both wheelchair brakes were locked and the wheelchair was pushed up flush to the desk in the center of the nurses' station. No staff was observed behind the desk. - At approximately 10:22 a.m. RN-B was observed to sit at a computer and type, and then answer the telephone. RN-B had their back to R89. R89 was noted to have nothing on the desk (such as a snack, fluids or a magazine); RN-B did not interact with R89. A restorative aide passed through the nursing station and stated "Hey [R89's name]!" and entered a door at the back of the nursing station. R89 lifted her bottom up off	F 221

F 221	Continued From page 33 the chair several times at irregular intervals. R89 stated, "Is he gonna come back? I gotta go home, I can't move this thing." R89 appeared anxious with a worried expression on her face, R89 pushed up with her hands and arms against the armrests and back against the wheelchair. RN-B made to attempts to assist or redirect R89. - At 10:25 a.m. the director of nursing (DON) came into the nursing station area and spoke with RN-B. Both had their backs turned to R89. DON then approached R89, patted her on the back and said, "Can I bring you to the lounge?" DON then stated to NA-A, "She [R89] shouldn't be back here." NA-A unlocked both brakes and wheeled R89 away from the desk, out of the nursing station area and into the lounge (the television (TV)/activity room off the South unit). The large TV was on and approximately five other residents were in the room. R89 was wheeled to the far wall near the window and faced towards the TV. Both brakes were locked and NA-A left the room. - At 10:33 a.m. RN-B was observed to be supervising the lounge and activity, adjusting positioning of legs of other residents in the lounge. R89 was observed to push herself up off of the wheelchair seat two times, and then sat and looked at the TV calmly, arms crossed across her chest. Both brakes remained locked. The Admission Nursing Assessment dated 12/23/13, identified R89 had no visual, or hearing impairments, and she was alert to person, place, family and self only. The assessment identified "right side weakness." Although the assessment identified R89 arrived to the facility in a wheelchair, the assessment did not identify the use of a wheelchair and had "N/A [non-applicable]" written by hand in the section. Review of the clinical record lacked evidence R89	F 221

F 221	Continued From page 34 was assessed for restraints. R89's admission Minimum Data Set (MDS) dated 12/28/13, indicated R89 was never or rarely understood, had short and long-term memory problems and R89 had moderately impaired decision making ability. The MDS identified R89 had hallucinations, delusions, and other behavior concerns towards others. The MDS indicated R89 required limited physical assistance from staff to walk; extensive physical assistance from staff for transferring, bed mobility, locomotion and toilet use. The MDS identified R89 did not have steady balance when attempting to move from seated to standing position and R89 had impairment of the lower extremity on one side. The MDS did not identify R89 used a restraint. The Care Area Assessment (CAA) for ADL (activities of daily living) function/Rehabilitation Potential dated 1/3/14, identified R89's diagnoses to include altered mental status, cognitive impairment and weakness. The CAA identified R89 required staff assistance for ADLs, had no pain concerns, had a history of falls (but no falls in the facility) and was incontinent of bowel and bladder. The CAA for behaviors dated 1/3/14, indicated, "Resident exhibits behavioral symptoms and is cognitively not alert and orient [sic] when writer attempted to assess her. SS [social services] will care plan this matter accordingly." The CAA for falls, also dated 1/3/14, recapitulated the same information as the ADL CAA. R89's care plan identified R89 was at risk for falls related to confusion, dementia, psychotropic drug use and Picks disease. The care plan directed to provide a "safe environment for the resident." The	F 221

F 221	Continued From page 35 care plan did not identify or direct to lock R89's brakes, did not identify the use of a restraint and did not include direction to place R89 against a desk or table. The Admission Record dated 1/23/14, identified R89 had diagnoses to include difficulty walking, essential hypertension and Picks disease. On 3/15/14, at 1:00 p.m. DON and administrator were notified of observations of R89 restrained behind the nursing desk on 3/10/14 and on 3/15/14, as well as observations of R89 restrained at the meal table while supervised on 3/11/14 and on 3/13/14. DON stated residents should not be behind the nursing desk, and verified R89 should not have been restrained when attended/supervised by staff. DON verified R89 was at increased risk for injury and R89 should have been assessed for restraints. DON verified locking the brakes and pushing the wheelchair flush to a table or desk, and preventing R89 from moving away from the table or desk, would be considered a restraint. The facility's Restrictive Device Management Policy dated as reviewed 5/2013, identified residents should be assessed for the need for a restrictive device during the admission process and identified restrictive devices such as a lapbuddy and non-releasing seat belt. The policy did not identify other potential restrictive devices, such as the practice of locking the brakes, pushing a resident against a table or denying access to parts of the resident's body. The policy identified the "least restrictive" device should be used and identified a care plan should be developed by the interdisciplinary team to address the device. The policy indicated the DNS	F 221

F 223	Continued From page 37 harm with potential for more than minimum harm. Findings include: According to review of R56's medical record, and interview, R56 had reported to facility staff that R63 had caused emotional, physical and verbal abuse. However, the facility failed to investigate and intervene to protect R56 from the alleged physical, verbal and emotional abuse. R56 was observed and the following was noted: - On 3/11/14, at 1:54 p.m. R63 was observed to have yelled at R56 repeatedly and called her a liar. Registered nurse (RN)-B was immediately notified of R63 yelling at R56. He said "ok" and did not leave the desk. - On 3/11/14, at 4:00 p.m. R56 had to be approached five different times to get an interview completed due to R63 not allowing R56 talk without R63 becoming upset. R63 pointed at R56 and stated "You better not talk." - On 3/12/14, at 8:00 a.m. upon entering R56's room for an interview, R56 pointed towards R63 and stated to the surveyor, "Maybe you should come back." At that time R63 started to yell at R56 in a loud and angry tone of voice, "You're already here, I'm gonna leave!" R63 looked at R56 and said, "Oh, Girl you better keep your mouth shut!" R63's facial expression was angry and tone of voice was low and deep. R56 rolled her eyes and R56 recoiled back into the bed as if to guard herself at the time R63 made the verbal threat. - On 3/12/14, at 8:10 a.m. R56 stated during an interview with the surveyor, that her roommate (R63) was verbally abusive and caused her to be very afraid. R56 stated that on Sunday (3/9/14) R63 had slammed the foot of R56's bed with her	F 223	The facility has a policy "Prohibition of Abuse, Neglect, Mistreatment, and Misappropriation of Resident Property". This policy was effective May 2012 and reviewed May 2013. This policy covers procedure on investigating any allegation of abuse, neglect, mistreatment, including injuries of unknown source, and/or misappropriation of resident property. The procedure also includes that the facility protects residents from harm during the investigation. The facility has a policy "Resident Abuse/Neglect follow up". This policy was effective May 2012 and reviewed May 2013. This policy covers procedure on assessing and evaluating for any negative outcomes to the resident following an allegation of abuse. F 223	Continued From page 39 support" meant. The medical record lacked evidence of how the facility had intervened to keep R56 safe from R63's physical, verbal, and emotional abuse. The medical record lacked any evidence of the SSD having met with R56 prior to her becoming a roommate with R63 on 3/5/14, to discuss the new roommate and/or since to discuss any issues with adjustment to the room. R56's care plan dated 3/14/14, had a focus area initiated 3/6/13 indicating R56 had a "need for adjustment", with interventions in place to indicate R56 required social worker (SW) interventions due to her "recent admission to facility". The interventions noted the SW was to visit monthly and as needed (PRN), introduce self to others, encourage R56 to attend activities and the SW would make outside referrals to mental health professional(s) as needed. In addition there was another focus area initiated 3/6/13, with target date of 3/17/14, which indicated R56 was a "vulnerable adult related to physical limitations." The goal was to ensure R56 was "safe within Camden Care Center at all times" and the interventions included, "Nursing to provide cares, services according to resident needs, POS [Physician's orders] and POC [plan of care]," "Assistance in case of emergency" and "Vulnerable adult assessment per facility policy." The Vulnerable Adult Assessment (VAA) dated 11/21/13, indicated R56 had physical limitations which made the resident susceptible to abuse. The physical limitations include wheelchair (w/c) bound and history of hip fracture. The form also identified R56 did not "have a history of any type of abuse towards others or self-abuse." The VAA was updated on 2/20/14, and noted the VAA was still current with no changes.	F 223

F 223	Continued From page 43 conducted with the SSD (social services director). She indicated R56 and R63 became roommates on 3/5/14, as both women were private pay and could not afford to pay the private pay fee for a private room. The SSD indicated she was first made aware of the 3/9/14, altercation during the Monday morning report meeting on 3/10/14. The SSD revealed she did speak with R63 and stated, "[R63] is used to being in her own room. She did warn us, I would not be able to get along with a roommate. 'I was brought into a private room and will not be able to get along.'" The SSD was not aware of R63's "I now know what murder feels like." and was aware of the police being called on 3/9/14. The SSD expected the staff to inform her of any situation that needed her attention. SSD stated she did meet with R63 on 3/11/14, and R63 stated "things were getting better, they are avoiding communicating with each other and talking to each other." The SSD did not put any interventions into place for the altercations between the two roommates and she was unaware if nursing had put any interventions in place to prevent the emotional, physical and verbal abuse of R63 towards R56. The medical record lacked evidence of the communication between R63 and the SSD as the SSD did not document any of the follow up conversations. It could not be determined whether R63 had received the monthly SW visits as indicated on the care plan revised 4/18/12. R56 had not received the monthly visits by the SSD as directed by the care plan nor was R56's care plan revised to reflect a new roommate and the need for a new adjustment period for the new roommate. On 3/12/14, at 2:46 p.m. licensed practical nurse (LPN)-A and the administrator were interviewed	F 223

F 223	Continued From page 44 regarding the altercation between R56 and R63. The administrator was not aware of the incident that took place on 3/9/14, and was not aware that the police came. LPN-A was aware and stated she'd informed the SSD about the incident. Neither party was aware of the police recommendation to separate the women, and both acknowledged no interventions were put into place to protect R56 from R63. Neither party was aware of R63's comment on 3/11/14, "I now know what murder feels like." Both parties acknowledged they would have expected staff to report that incident to them. On 3/12/14, at 2:53 p.m. the DON was interviewed. The DON indicated she was not made aware of the 3/9/14, altercation between R56 and R63. She also indicated she did not know the police had come that morning or the recommendation of separating the women. The DON was unaware of the R63's abusive remark to R56 "I now know what murder feels like." The DON admitted there have been no interventions put into place since 3/9/14, to monitor R63's abusive verbal and emotional behavior towards R56. On 3/13/14, at 3:30 p.m. the DON reported she was not aware that R63 was verbally aggressive towards R56 during observations that a.m. She reported the facility had received an order for a 72 hour hold for R63. On 3/14/14, at 10:56 a.m. nursing assistant (NA)-B stated they had never heard of any altercations between R56 and R63. NA-B further commented R63 just moved to that room recently.	F 223

F 223	Continued From page 45 The undated Behavior Monitoring procedure directed staff to report all incidents of abusive behavior, such as physical, verbal, theft, etc. The staff was to report to the supervisor immediately. New behaviors were to be reported to the nurse for appropriate follow up. The procedure indicated the nurse and social worker were to review the information weekly and follow up as needed. The IJ that began on 3/9/14, was removed on 3/18/14, at 1:00 p.m., when the facility had implemented an IJ removal plan that included: review and revision of the abuse prevention plan, training was provided to all staff on each shift prior to resident contact, the facility initiated a thorough investigation of ongoing incidents that involved R56 and R63, and R63 was transferred to an inpatient acute care hospital for behavioral assessment. In addition, direct care staff and licensed nursing staff were interviewed and were able to explain their responsibility for identification of incidents of potential mistreatment; internal reporting; resident protection, investigation and external reporting as defined in the facility's revised Abuse Prevention Plan, the plan included how the facility would monitor for resident to resident physical, verbal and emotional abuse. Although the IJ was removed, noncompliance remained at the lower scope and severity (s/s) of a D.	F 223		
F 225 SS=E	483.13(c)(1)(ii)-(iii), (c)(2) - (4) INVESTIGATE/REPORT ALLEGATIONS/INDIVIDUALS The facility must not employ individuals who have been found guilty of abusing, neglecting, or mistreating residents by a court of law; or have had a finding entered into the State nurse aide	F 225

F 225	Continued From page 46 registry concerning abuse, neglect, mistreatment of residents or misappropriation of their property; and report any knowledge it has of actions by a court of law against an employee, which would indicate unfitness for service as a nurse aide or other facility staff to the State nurse aide registry or licensing authorities. The facility must ensure that all alleged violations involving mistreatment, neglect, or abuse, including injuries of unknown source and misappropriation of resident property are reported immediately to the administrator of the facility and to other officials in accordance with State law through established procedures (including to the State survey and certification agency). The facility must have evidence that all alleged violations are thoroughly investigated, and must prevent further potential abuse while the investigation is in progress. The results of all investigations must be reported to the administrator or his designated representative and to other officials in accordance with State law (including to the State survey and certification agency) within 5 working days of the incident, and if the alleged violation is verified appropriate corrective action must be taken. This REQUIREMENT is not met as evidenced by: Based on observation, interview and document review, the facility failed to immediately notify the administrator and the State agency (SA) of allegations of abuse, neglect and mistreatment for 2 of 4 residents (56, R63) for resident to	F 225	Sampled residents R21 and 63 are no longer at the facility. For sampled residents F56, 62, 71, 17 and for all residents at the facility, the facility shall ensure that allegations of abuse are investigated and reported. The facility administrator must be notified as well as the state agency and all other state and/or law enforcement agencies as directed by the Vulnerable Adults act. The facility has a policy titled "Abuse Neglect Prohibition" that was effective 05/2012 and reviewed 7/2013. Additionally, the facility has now written an additional policy titled "Vulnerable Adult Act – Camden Specific" to ensure the specifics of the MN VA Act are thoroughly addressed and part of the facility policies. Facility staff were educated about the policies and are able to verbalize their responsibilities during events of alleged/potential or real abuse. All incidents of abuse are reported and discussed at daily stand up meeting. For sampled resident R21, the facility will complete an Elopement assessment. The IDT will meet to develop a care plan for elopement based on this assessment.

F 225	Continued From page 47 resident abuse and for 4 of 5 residents (R21, R62, R71, R17) in the sample reviewed for abuse prohibition. These practices had the potential to affect all 84 residents residing in the facility. Findings include: The facility failed to immediately notify the administrator and the SA of allegations of abuse, neglect, and/or mistreatment for incidents involving R21, R62, R71, R17, R56 and R63. Review of the facility's Resident Accident/Incident Reports, as well as allegations of abuse/neglect and mistreatment reported to the SA and the individual resident clinical records indicated the following: NEGLECT - ELOPEMENT A Resident Accident/Incident Report dated 7/1/13, indicated at 12:00 a.m. the police were notified and a missing person report was filed regarding R21. R21 had not been seen since the "Pm [sic] (evening) shift" and was "not back at the facility before midnight." The report indicated staff had not "heard from [R21] until now (1:45am)." - At 2:54 a.m. a note attached to the form indicated the police came to the facility and left contact info and wanted to be updated when resident came back to facility. - At 9:11 a.m. a note indicated the police were notified R21 was in the facility. The report indicated R21 refused to have family notified and indicated the physician was notified. Although the report was checked that the administrator was notified, the report had no date or time of the notification. A copy of R21's incident report dated 7/1/13, was	F 225	The RCMs will randomly audit clinical records of residents identified at risk for elopement to ensure the assessment is accurate, the care plan is appropriate and that any incidents of elopement are identified, reported, documented and that appropriate follow up is completed. The results of these audits will be reported to the QA committee for review and further action as indicated. This process will be ongoing. For sampled resident R21 a vulnerable adult assessment was completed. The IDT developed/reviewed the care plan for appropriateness. Social services has done follow up to ensure there are no residual emotional, psychological, or physical issues related to the reported "mugging" incident. On an annual basis, staff will be educated/refreshed related to the abuse and the vulnerable adult policy. Responsible: Administrator, DON, RCM, appropriate IDT members, clinical staff, social services, all staff Compliance date: 4/28/2014

F 225	Continued From page 48 requested from the facility, but not provided. The LOA (leave of absence) Safety Assessment dated 1/23/13, identified R21 did not have cognitive impairment and indicated R21 was assessed and "appropriate to leave the facility unsupervised." The signature section for R21 was blank. The Vulnerable Adult Assessment dated 1/23/13, identified R21 had a history of alcoholism, but contradicted the LOA Safety Assessment by identifying R21 as having cognitive deficits related to "Dementia & hx [history] of TBI [traumatic brain injury]." The quarterly Minimum Data Set (MDS) dated 7/24/13, indicated R21 had moderate cognitive impairment and was independent with most Activities of Daily Living (ADLs). A Resident Information form dated as printed 3/18/14, indicated R21's diagnoses included alcoholism, epilepsy with recurrent seizure, and dementia. A Minnesota Department of Health (MDH) Incident Report - Investigative Report Submission Completed form indicated a report was submitted to the SA on 7/2/13, for R21's elopement incident on 7/1/13. The report recapitulated R21 was identified on rounds to not be in the facility. The SA report also indicated the police department was notified and R21 returned to the facility on 1:45 a.m. The report indicated the SA was not notified until 7/2/13, the fax transmission verification report indicated fax was sent at 4:45 p.m. The clinical record lacked documentation of the elopement on 7/1/13. The interdisciplinary team (IDT) Progress Notes, contradicted the incident report and indicated a missing person report was filed on 7/2/13, and recapitulated the incident	F 225

F 225	Continued From page 49 identified on the Accident/Incident report form and MDH Incident Report on 7/1/13. The undated Investigation Follow Up CEP (Common Entry Point) Report had initials in the administrator notification section, but lacked a date or time when the administrator was notified of the elopement. Although the report identified an investigation was "completed" and reviewed by the administrator on 7/1/13, the SA was not notified until 7/2/13, at 4:45 p.m. Further review of R21's IDT Progress Notes indicated: - On 7/20/13, a note written at 12:55 p.m. indicated "At 12:55 a.m., police came to the facility to gather patient information and immediately after they left, resident returned to the building." The note indicated R21 "could not say where he went but repeatedly said I live here." The note indicated R21 was "drunk and also refused body audit to be done. Will continue to monitor." - At 10:37 p.m. the note indicated, "Okay to hold medications tonight, and resume tomorrow morning due to intoxication." - At 10:43 p.m. the note indicated R21 continued to appear "intoxicated" due to "slash speech," unsteady gait and "smell with alcohol." The note indicated the on-call physician was notified and orders were given to hold medications "until tomorrow." - At 11:45 p.m. the note indicated, "Resident was unaccounted-for during the shift head-count at 11:15 p.m. Search for the resident was initiated in and around the building but was unsuccessful. At 11:45 pm, 911 Call placed to report the resident missing. Writer was told during the previous shift report resident was intoxicated. Search for the	F 225

F 225	Continued From page 50 resident continues." - The next entry in the IDT Progress Notes was on 7/22/13, at 9:21 a.m. and was regarding R21's "insurance not covering" a medication. An entry regarding R21 actually being in the facility was not noted in the Progress Notes until 10/3/13. The clinical record lacked evidence of when and where R21 was located after he was identified to be missing on 7/20/13. The clinical record lacked evidence of the date, time, location of R21 when found, R21's mentation and status when located, the circumstances of R21 leaving the facility (such as R21's reason for leaving), immediate notification of the administrator and immediate reporting to the SA. In addition, the clinical record lacked evidence of further assessment of R21's LOA Safety, Vulnerability and assessment of R21's known behavior of drinking and intoxication after 7/20/13. ABUSE - MUGGING A facility Resident Accident/Incident Report for R21 dated 10/3/13, indicated time of incident "Unknown." The report indicated the location of the incident was "outside the facility." R21 reported the incident happened before lunch and "4 blackmen mugged him" when walking to the store to buy cigarettes. R21 sustained a skin tear to the bridge of his nose and the skin tear was cleansed and a Band-Aid was applied. Although R21 reported a crime, R21 "declined incident report to police." The report indicated the physician and family were notified (no date or time). The administrator was notified on 10/3/13 (no time of notification). A copy of the Resident Accident/Incident Report dated 10/3/13, was requested but not provided by the facility.	F 225

F 225	Continued From page 51 An IDT Progress Note dated 10/3/13, at 9:51 p.m. recapitulated the incident and indicated facility staff asked R21 "if the police need to be called and report, resident declined and said there is no need to report to the police." The note indicated the skin tear was "0.5 and 0.2 cm [centimeters]." The note indicated the administrator was notified, but lacked a time for the notification. The clinical record lacked evidence the SA was immediately notified of the incident. MISTREATMENT and/or ABUSE - RESIDENT TO RESIDENT Seperate Resident Accident/Incident Reports for R62 and R71, dated for 10/18/13 at 9:00 p.m., identified R62 was noted to "engage in an argument with roommate [R71]" and identified the argument was about R71 "bumping into her [R62's] bed" when R71 backed the wheelchair into her room space. The report indicated R62 "ended up hitting roommate [R71]" on the right cheek. R71 sustained no injuries. The immediate action taken section indicated, "Writer talked to both roommates to calm them." The report was checked to indicate the physician was notified, and checked to indicate the administrator was notified, but had no date of the notification. The report did not indicate the SA was notified. The 30-day MDS (minimum data set) assessment dated 10/2/13, identified R62 had moderate cognitive impairment, mood problems and no behavior problems. The MDS indicated R62 required limited assistance with walking and locomotion on the unit. R62's Resident Information sheet dated 1/14/14, indicated R62's diagnoses included memory loss and dementia. R71's quarterly MDS dated 7/31/13, identified	F 225

F 225	Continued From page 52 R71 was cognitively intact, had mood problems and physical behavior symptoms directed towards others occurring four to six days, but not daily. R71 was independent with locomotion, did not walk and required extensive assistance with all other ADLs. R71's Resident Information sheet dated 2/25/14, indicated R71's diagnoses included hemiplegia and depressive disorder. A MDH Incident Report - Investigative Report Submission Completed form indicated the SA was notified of the resident to resident abuse incident on 10/19/13 (the day after the incident). The report indicated both residents were "counseled" on sharing living space and agreed to get along in a more civilized manner. R71 was educated as to how to maneuver her wheelchair in a safe manner without bumping into furniture. The Investigation Follow Up CEP (common entry point) Report (undated), indicated the administrator was notified of the altercation on 10/19/13, in the "AM [no specific time]" by a "nurse at Videll [the facility]." Two Resident Accident/Incident Reports for R62 and R71 dated for 11/22/13, 9:30 a.m. indicated loud voices were heard coming from R62's room, "Writer saw this resident [R62] hitting her roommate [R71] in the face." The report indicated R71 sustained no injuries, both residents were separated and a "police report was done." The immediate action section of the report indicated, "Resident [R62] was moved to different room." The report was checked to indicate the physician and family were notified. The administrator notification section was not checked and indicated the administrator was not notified. The report did not indicate if the SA was notified. The clinical record lacked evidence the administrator	F 225

F 225	Continued From page 53 and the SA were notified of the altercation. According to medical record review, and interview, R56 had reported to facility staff that R63 had caused R56 emotional, physical and verbal abuse. However, the facility failed to investigate and intervene to protect R56 from the alleged physical, verbal and emotional abuse. R56 was observed and the following was noted: - On 3/11/14, at 1:54 p.m. R63 was observed to have yelled at R56 repeatedly and called her a liar. Registered nurse (RN)-B was immediately notified of R63 yelling at R56. He said "ok" and did not leave the desk. - On 3/11/14, at 4:00 p.m. R56 had to be approached five different times to get an interview completed due to R63 not allowing R56 talk without R63 becoming upset. R63 pointed at R56 and stated "You better not talk." - On 3/12/14, at 8:00 a.m. upon entering R56's room for an interview, R56 pointed towards R63 and stated to the surveyor, "Maybe you should come back." At that time R63 started to yell at R56 in a loud and angry tone of voice, "You're already here, I'm gonna leave!" R63 looked at R56 and said, "Oh, Girl you better keep your mouth shut!" R63's facial expression was angry and tone of voice was low and deep. R56 rolled her eyes and R56 recoiled back into the bed as if to guard herself at the time R63 made the verbal threat. - On 3/12/14, at 8:10 a.m. R56 stated during an interview with the surveyor, that her roommate (R63) was verbally abusive and caused her to be very afraid. R56 stated that on Sunday (3/9/14) R63 had slammed the foot of R56's bed with her hand, and had told her she knew "what murder feels like." R56 stated the police had been called	F 225

F 225	Continued From page 55 keep R56 safe from R63's physical, verbal, and emotional abuse. The medical record lacked any evidence of the SSD having met with R56 prior to her becoming a roommate with R63 on 3/5/14, to discuss the new roommate and/or since to discuss any issues with adjustment to the room. R56's care plan dated 3/14/14, had a focus area initiated 3/6/13 indicating R56 had a "need for adjustment", with interventions in place to indicate R56 required social worker (SW) interventions due to her "recent admission to facility". The interventions noted the SW was to visit monthly and as needed (PRN), introduce self to others, encourage R56 to attend activities and the SW would make outside referrals to mental health professional(s) as needed. In addition there was another focus area initiated 3/6/13, with target date of 3/17/14, which indicated R56 was a "vulnerable adult related to physical limitations." The goal was to ensure R56 was "safe within Camden Care Center at all times" and the interventions included, "Nursing to provide cares, services according to resident needs, POS [Physician's orders] and POC [plan of care]," "Assistance in case of emergency" and "Vulnerable adult assessment per facility policy." The Vulnerable Adult Assessment (VAA) dated 11/21/13, indicated R56 had physical limitations which made the resident susceptible to abuse. The physical limitations include wheelchair (w/c) bound and history of hip fracture. The form also identified R56 did not "have a history of any type of abuse towards others or self-abuse." The VAA was updated on 2/20/14, and noted the VAA was still current with no changes. R56's most recent Minimum Data Set (MDS)	F 225

F 225	Continued From page 56 dated 2/20/14, identified R56 as being cognitively intact with a Brief Interview for Mental Status (BIMS) score of 15. R56 was totally dependent upon staff for transfers and bed mobility. behaviors directed towards staff only, no delusions, Patient Health Questionnaire (PHQ)-9 was 12 which noted moderate depression (PHQ-9 scores of 5, 10, 15, and 20 represented mild, moderate, moderately severe, and severe depression, respectively). R56's diagnoses included arthritis, cancer, and Parkinson's. The MDS also noted R56 received no antipsychotic medication. The Physician's Orders dated 3/5/14, indicated R56 had a lung mass was to see a pulmonologist. Also according R56's Physician's Orders R56 received Morphine Sulfate for pain twice a day, Lasix for edema twice a day, oral inhalers for breathing, and lactulose for liver disease. R63's record was reviewed. It was determined R63 was aware of the facility's policy for abuse as R63 had signed the Acknowledgement of Vulnerable Adult and Abuse Prevention Policies on 10/5/11. The Acknowledgement form read, "Camden Care Center strives to support and protect all of our residents. To ensure our resident's needs are met, we have established Vulnerable Adult and Abuse Prevention Policies. All residents have the right to report concerns or suspected abuse without fear of retaliation." R63's care plan last reviewed 2/16/14, included a focus area for R63 which indicated the resident needed an "opportunity to express feelings/ concerns regarding placement/life situations. [R63] tends to keep to herself. [R63] has a dx [diagnosis] of depression." The interventions	F 225

F 225	Continued From page 57 included encourage R63 to attend activities, refer to outside mental health professional(s), and remind R63 of the positives in life and to have the SW visit monthly and PRN. The care plan had not been updated with the room change and the addition of a roommate as of 3/5/14, nor was the care plan revised to reflect the physical, verbal and emotional abuse towards R56. A Care Conference Quarterly note dated 10/22/13, depicted R63 as having behaviors which included "becomes irritated with staff at times, barricades herself in her room with boxes, she also isolates her self [sic] in her room." The continued to note R63 "is very sensitive to noise and that causes 'nausea'." The note revealed R63 independent in ambulation to all destinations. R63's most recent quarterly MDS dated 1/8/14, noted R56's diagnoses included dementia with behavioral disturbances, anxiety, psychotic disorder, and depression. The MDS identified R63 as being cognitively intact with a BIMS score of 15. R63's PHQ-9 was 10 which noted moderate depression. According to the MDS, R63 had trouble sleeping, had a poor appetite, had little interest, trouble concentrating, felt tired, and felt down. R63 was depicted as having no behaviors. R63's last comprehensive assessment was dated 10/10/12. R63's medical record lacked a current comprehensive assessment that would have identified her current functional capacity and develop a current care plan with interventions to care for R63. R63's Progress Notes were reviewed from 9/27/13, going forward and the following was noted: - On 3/9/14, at 5:34 a.m. noted staff was aware	F 225

F 225	Continued From page 58 that R63 had threatened R56. "She [R63] stated 'I will kill you now', and she pounded very hard on her bed. This resident verbally attacked this writer for changing her room where she was having a good slumber. Updated the authority for a threatening comment directed towards coresident. We will continue to monitor the situation closely and vigilantly at this moment." - On 3/9/14, at 12:50 p.m. noted R63 was "not fine with present roommate and room environment. according to her [R63], her roommate is very in appropriate, like to put call light on, turn television loud, and calling nar [nursing assistant/registered] in the room to assist her with cares etc." The police had been called previously and resident needed to be separated before something happen [sic] beyond our reach." The note indicated the facility staff was going to monitor the situation every 15 minutes, however, the medical record lacked evidence of the monitoring. R63 was unavailable for interview related to the untoward behavior towards R56 as R63 was transferred out of the building on the evening of 3/13/14. On 3/12/14, at 1:50 p.m. the Minneapolis Police Department was called. In speaking with the support technician, he indicated no official report had been filed. The comments on a report made by the officer who came to the facility on 3/9/14, at 5:34 a.m. recommended the facility separate the two women (R56 and R63) as "they were irritable and could not tolerate each other." On 3/12/14, at 2:37 p.m. an interview was conducted with the SSD (social services director). She indicated R56 and R63 became roommates	F 225

F 225	Continued From page 59 on 3/5/14, as both women were private pay and could not afford to pay the private pay fee for a private room. The SSD indicated she was first made aware of the 3/9/14, altercation during the Monday morning report meeting on 3/10/14. The SSD revealed she did speak with R63 and stated, "[R63] is used to being in her own room. She did warn us, I would not be able to get along with a roommate. 'I was brought into a private room and will not be able to get along.'" The SSD was not aware of R63's "I now know what murder feels like." and was aware of the police being called on 3/9/14. The SSD expected the staff to inform her of any situation that needed her attention. SSD stated she did meet with R63 on 3/11/14, and R63 stated "things were getting better, they are avoiding communicating with each other and talking to each other." The SSD did not put any interventions into place for the altercations between the two roommates and she was unaware if nursing had put any interventions in place to prevent the emotional, physical and verbal abuse of R63 towards R56. The medical record lacked evidence of the communication between R63 and the SSD as the SSD did not document any of the follow up conversations. It could not be determined whether R63 had received the monthly SW visits as indicated on the care plan revised 4/18/12. R56 had not received the monthly visits by the SSD as directed by the care plan nor was R56's care plan revised to reflect a new roommate and the need for a new adjustment period for the new roommate. On 3/12/14, at 2:46 p.m. licensed practical nurse (LPN)-A and the administrator were interviewed regarding the altercation between R56 and R63. The administrator was not aware of the incident	F 225

F 225	Continued From page 60 that took place on 3/9/14, and was not aware that the police came. LPN-A was aware and stated she'd informed the SSD about the incident. Neither party was aware of the police recommendation to separate the women, and both acknowledged no interventions were put into place to protect R56 from R63. Neither party was aware of R63's comment on 3/11/14, "I now know what murder feels like." Both parties acknowledged they would have expected staff to report that incident to them. On 3/12/14, at 2:53 p.m. the DON was interviewed. The DON indicated she was not made aware of the 3/9/14, altercation between R56 and R63. She also indicated she did not know the police had come that morning or the recommendation of separating the women. The DON was unaware of the R63's abusive remark to R56 "I now know what murder feels like." The DON admitted there have been no interventions put into place since 3/9/14, to monitor R63's abusive verbal and emotional behavior towards R56. The DON verified R63's verbal, physical and emotional abuse was not immediately reported to the administrator nor was it thoroughly investigated, and R56 was not protected from R63's abusive behavior INJURY OF UNKNOWN ORIGIN A Resident Accident/Incident Report for R17 dated 12/14/13, at 5:00 a.m. indicated nursing assistant staff had "noted bruise on resident." The report identified R17 was "alert" and "oriented." The report indicated the bruise measured 5 centimeters (cm) by 4 cm, was "redden" in color and was located on the forehead. The report indicated the cause of the bruise was unknown.	F 225

F 225	Continued From page 61 R17 stated "I bumped it." The report was checked to indicate the physician and R17's daughter were notified. The administrator notification section was unchecked and indicated the administrator was not notified. The report did not indicate the SA was notified. Although the Resident Accident/Incident Report identified R17 was alert and oriented, the Quarterly MDS dated 12/12/13, indicated R17 was never rarely understood, could not complete the BIMS and had severe cognitive impairment. The MDS indicated R17 had no mood problems, experienced hallucinations and delusions, and required limited to extensive assistance from staff for all ADLs. The clinical record lacked evidence R17's injury was reported immediately to the administrator and the SA, and lacked evidence the injury was thoroughly investigated to rule out abuse, neglect or mistreatment. On 3/18/14, at 2:06 p.m. the DON verified the administrator should have been notified immediately for allegations of mistreatment, abuse, elopements, injuries of unknown origin, and alleged neglect. The DON verified either she or the administrator should notify the SA immediately when such reports were received. The Elopement policy dated as effective 5/2012, defined elopment as "'when a resident leaves the premises or a safe area without authorization (i.e., an order for discharge or leave of absence) and/or any necessary supervision to do so.'" The procedure identified residents were assessed at admission to identify risk for elopement and additional risk assessments at least quarterly	F 225

F 226	Continued From page 65 - An addendum at the end of the policy indicated, "State of Minnesota" and, "The facility reports any reported, suspected, and/or validated occurrences of abuse/neglect or injuries of unknown source immediately to the administrator and to state agencies as required by individual state regulations." The policy did not identify the office of health facility complaints (OHFC), online reporting or Common Entry Point (CEP). ALLEGATION OF ABUSE According to medical record review, and interview, R56 had reported to facility staff that R63 had caused R56 emotional, physical and verbal abuse. However, the facility failed to investigate and intervene to protect R56 from the alleged physical, verbal and emotional abuse. R56 was observed and the following was noted: - On 3/11/14, at 1:54 p.m. R63 was observed to have yelled at R56 repeatedly and called her a liar. Registered nurse (RN)-B was immediately notified of R63 yelling at R56. He said "ok" and did not leave the desk. - On 3/11/14, at 4:00 p.m. R56 had to be approached five different times to get an interview completed due to R63 not allowing R56 talk without R63 becoming upset. R63 pointed at R56 and stated "You better not talk." - On 3/12/14, at 8:00 a.m. upon entering R56's room for an interview, R56 pointed towards R63 and stated to the surveyor, "Maybe you should come back." At that time R63 started to yell at R56 in a loud and angry tone of voice, "You're already here, I'm gonna leave!" R63 looked at R56 and said, "Oh, Girl you better keep your mouth shut!" R63's facial expression was angry and tone of voice was low and deep. R56 rolled	F 226	The facility will randomly conduct interviews with staff on duty to ensure they understand the Abuse Prohibition Policy and their responsibilities outlined in the policy. The results of these audits will be reported to the QA committee for review and further action as recommended. This is an ongoing process. For sampled employee files LPN-G and F, for NA-A, K, D, and I, the appropriate background checks will be completed prior to first day of employment. All new hire employee files will be audited monthly to ensure all the appropriate background and licensure/certification checks are completed. The results of this audit will be reported to the QA committee for review and further action as recommended. This is an ongoing process. The facility developed a policy "Vulnerable Adult Act – Camden Specific" to ensure that all aspects of the Minnesota VA Act are a part of the facility abuse prohibition protocol including completing and phoning in a CEEP report. Staff are educated in the policy and are able to verbalize their responsibilities as outlined in this policy.

F 226	Continued From page 67 bedfast for the past one to two months. R56's Progress Notes were reviewed from 1/25/14, going forward to 3/14/14. On 3/14/14, the notes indicated the social services designee (SSD) had met with R56 "as a follow up to provide an ongoing support." There was no supporting evidence regarding what "ongoing support" meant. The medical record lacked evidence of how the facility had intervened to keep R56 safe from R63's physical, verbal, and emotional abuse. The medical record lacked any evidence of the SSD having met with R56 prior to her becoming a roommate with R63 on 3/5/14, to discuss the new roommate and/or since to discuss any issues with adjustment to the room. R56's care plan dated 3/14/14, had a focus area initiated 3/6/13 indicating R56 had a "need for adjustment", with interventions in place to indicate R56 required social worker (SW) interventions due to her "recent admission to facility". The interventions noted the SW was to visit monthly and as needed (PRN), introduce self to others, encourage R56 to attend activities and the SW would make outside referrals to mental health professional(s) as needed. In addition there was another focus area initiated 3/6/13, with target date of 3/17/14, which indicated R56 was a "vulnerable adult related to physical limitations." The goal was to ensure R56 was "safe within Camden Care Center at all times" and the interventions included, "Nursing to provide cares, services according to resident needs, POS [Physician's orders] and POC [plan of care]," "Assistance in case of emergency" and "Vulnerable adult assessment per facility policy." The Vulnerable Adult Assessment (VAA) dated	F 226

F 226	Continued From page 68 11/21/13, indicated R56 had physical limitations which made the resident susceptible to abuse. The physical limitations include wheelchair (w/c) bound and history of hip fracture. The form also identified R56 did not "have a history of any type of abuse towards others or self-abuse." The VAA was updated on 2/20/14, and noted the VAA was still current with no changes. R56's most recent Minimum Data Set (MDS) dated 2/20/14, identified R56 as being cognitively intact with a Brief Interview for Mental Status (BIMS) score of 15. R56 was totally dependent upon staff for transfers and bed mobility. behaviors directed towards staff only, no delusions, Patient Health Questionnaire (PHQ)-9 was 12 which noted moderate depression (PHQ-9 scores of 5, 10, 15, and 20 represented mild, moderate, moderately severe, and severe depression, respectively). R56's diagnoses included arthritis, cancer, and Parkinson's. The MDS also noted R56 received no antipsychotic medication. The Physician's Orders dated 3/5/14, indicated R56 had a lung mass was to see a pulmonologist. Also according R56's Physician's Orders R56 received Morphine Sulfate for pain twice a day, Lasix for edema twice a day, oral inhalers for breathing, and lactulose for liver disease. R63's record was reviewed. It was determined R63 was aware of the facility's policy for abuse as R63 had signed the Acknowledgement of Vulnerable Adult and Abuse Prevention Policies on 10/5/11. The Acknowledgement form read, "Camden Care Center strives to support and protect all of our residents. To ensure our resident's needs are met, we have established	F 226

F 226	Continued From page 69 Vulnerable Adult and Abuse Prevention Policies. All residents have the right to report concerns or suspected abuse without fear of retaliation." R63's care plan last reviewed 2/16/14, included a focus area for R63 which indicated the resident needed an "opportunity to express feelings/ concerns regarding placement/life situations. [R63] tends to keep to herself. [R63] has a dx [diagnosis] of depression." The interventions included encourage R63 to attend activities, refer to outside mental health professional(s), and remind R63 of the positives in life and to have the SW visit monthly and PRN. The care plan had not been updated with the room change and the addition of a roommate as of 3/5/14, nor was the care plan revised to reflect the physical, verbal and emotional abuse towards R56. A Care Conference Quarterly note dated 10/22/13, depicted R63 as having behaviors which included "becomes irritated with staff at times, barricades herself in her room with boxes, she also isolates her self [sic] in her room." The continued to note R63 "is very sensitive to noise and that causes 'nausea'." The note revealed R63 independent in ambulation to all destinations. R63's most recent quarterly MDS dated 1/8/14, noted R56's diagnoses included dementia with behavioral disturbances, anxiety, psychotic disorder, and depression. The MDS identified R63 as being cognitively intact with a BIMS score of 15. R63's PHQ-9 was 10 which noted moderate depression. According to the MDS, R63 had trouble sleeping, had a poor appetite, had little interest, trouble concentrating, felt tired, and felt down. R63 was depicted as having no behaviors. R63's last comprehensive assessment	F 226

F 226	Continued From page 70 was dated 10/10/12. R63's medical record lacked a current comprehensive assessment that would have identified her current functional capacity and develop a current care plan with interventions to care for R63. R63's Progress Notes were reviewed from 9/27/13, going forward and the following was noted: - On 3/9/14, at 5:34 a.m. noted staff was aware that R63 had threatened R56. "She [R63] stated 'I will kill you now', and she pounded very hard on her bed. This resident verbally attacked this writer for changing her room where she was having a good slumber. Updated the authority for a threatening comment directed towards coresident. We will continue to monitor the situation closely and vigilantly at this moment." - On 3/9/14, at 12:50 p.m. noted R63 was "not fine with present roommate and room environment. according to her [R63], her roommate is very in appropriate, like to put call light on, turn television loud, and calling nar [nursing assistant/registered] in the room to assist her with cares etc." The police had been called previously and resident needed to be separated before something happen [sic] beyond our reach." The note indicated the facility staff was going to monitor the situation every 15 minutes, however, the medical record lacked evidence of the monitoring. R63 was unavailable for interview related to the untoward behavior towards R56 as R63 was transferred out of the building on the evening of 3/13/14. On 3/12/14, at 1:50 p.m. the Minneapolis Police Department was called. In speaking with the	F 226

F 226	Continued From page 71 support technician, he indicated no official report had been filed. The comments on a report made by the officer who came to the facility on 3/9/14, at 5:34 a.m. recommended the facility separate the two women (R56 and R63) as "they were irritable and could not tolerate each other." On 3/12/14, at 2:37 p.m. an interview was conducted with the SSD (social services director). She indicated R56 and R63 became roommates on 3/5/14, as both women were private pay and could not afford to pay the private pay fee for a private room. The SSD indicated she was first made aware of the 3/9/14, altercation during the Monday morning report meeting on 3/10/14. The SSD revealed she did speak with R63 and stated, "[R63] is used to being in her own room. She did warn us, I would not be able to get along with a roommate. 'I was brought into a private room and will not be able to get along.'" The SSD was not aware of R63's "I now know what murder feels like." and was aware of the police being called on 3/9/14. The SSD expected the staff to inform her of any situation that needed her attention. SSD stated she did meet with R63 on 3/11/14, and R63 stated "things were getting better, they are avoiding communicating with each other and talking to each other." The SSD did not put any interventions into place for the altercations between the two roommates and she was unaware if nursing had put any interventions in place to prevent the emotional, physical and verbal abuse of R63 towards R56. The medical record lacked evidence of the communication between R63 and the SSD as the SSD did not document any of the follow up conversations. It could not be determined whether R63 had received the monthly SW visits as indicated on the care plan revised 4/18/12. R56 had not	F 226

F 226	Continued From page 72 received the monthly visits by the SSD as directed by the care plan nor was R56's care plan revised to reflect a new roommate and the need for a new adjustment period for the new roommate. On 3/12/14, at 2:46 p.m. licensed practical nurse (LPN)-A and the administrator were interviewed regarding the altercation between R56 and R63. The administrator was not aware of the incident that took place on 3/9/14, and was not aware that the police came. LPN-A was aware and stated she'd informed the SSD about the incident. Neither party was aware of the police recommendation to separate the women, and both acknowledged no interventions were put into place to protect R56 from R63. Neither party was aware of R63's comment on 3/11/14, "I now know what murder feels like." Both parties acknowledged they would have expected staff to report that incident to them. On 3/12/14, at 2:53 p.m. the DON was interviewed. The DON indicated she was not made aware of the 3/9/14, altercation between R56 and R63. She also indicated she did not know the police had come that morning or the recommendation of separating the women. The DON was unaware of the R63's abusive remark to R56 "I now know what murder feels like." The DON admitted there have been no interventions put into place since 3/9/14, to monitor R63's abusive verbal and emotional behavior towards R56. The DON verified R63's verbal, physical and emotional abuse was not immediately reported to the administrator nor was it thoroughly investigated, and R56 was not protected from R63's abusive behavior. F 226	Continued From page 73 The facility did not complete the required screening of new employees. The Prohibition of Abuse, Neglect, Mistreatment, and Misappropriation of Resident Property policy dated as last reviewed on 1/2013, directed, "1. All potential employees will be screened prior to their first day of employment for a history of abuse, neglect, or mistreatment of residents or at risk elders." The policy indicated screening included, but was not limited to: license verification for licensed health care professionals, State and National registry search for all NAs, criminal background check, and a "minimum of 2 professional references." Review of the newly hired employee files indicated the following: - The New Hire and File Folder Set-up indicated a LPN-G was hired on 11/22/13. A Study Request was made on the date of hire, the Background Study Clearance (criminal background check) dated 11/25/13, and indicated LPN-G was cleared three days after hire. The Licensure Verification form indicated LPN-G's license was verified on 11/29/13, eight days after hire. A copy of the Background Study Clearance was requested from the facility, but not provided. - The New Employee Hire and File Folder Set-up indicated a NA-A was hired on 12/24/13. A Study Request Information form indicated the request for a background study was made on 12/24/13 (date of hire). The Background Study Clearance dated 12/26/13, indicated NA-A was cleared two days after hire. The Nurse Aide Registry form indicated a confirmation was requested on 12/24/13 (date of hire). The Reference Check form was blank. A copy of the Nurse Aide Registry form and reference check form were	F 226

F 226	Continued From page 74 requested from the facility, but not provided. - The New Hire and File Folder Set-up indicated LPN-F was hired on 3/6/14. A Study Request Information form and the Licensure Verification form both indicated the requests were made on the date of hire. There was no reference checks completed. - The New Employee Hire and File Folder Set-up indicated NA-K was hired on 3/6/14. The Study Request and Facility Inquiry form (for NA registry check) were both dated for the day of hire. The file lacked a Background Study Clearance form. The Reference Check form was blank. - The New Employee Hire and File Folder Set-up indicated NA-D was hired on 4/16/13. The Study Request was dated as submitted 4/17/13 (day after hire), and the Background Study Clearance indicated NA-D was cleared on 4/19/13 (four days after hire). The Facility Inquiry for nursing assistant registry check was made on 4/16/13. The Reference Checks form dated 4/17/13, indicated NA-D references were signed and dated as checked. NA-D's New Employee Orientation check list was half blank, incomplete and dated for 4/17/13 (the day after hire). - The New Employee Hire and File Folder Set-up indicated NA-I was hired on 5/1/13. The Background Study Clearance dated 5/6/13, indicated NA-I's background study was cleared five days after hire. Although the Reference Checks form was dated 4/18/13, the form lacked a signature of which staff checked the references. A copy of the Background Study Clearance was requested, but not provided by the facility. The employee screening indicated employee background check requests, licensure and registry checks were consistently submitted either the day of hire or submitted after the day of hire;	F 226

F 226	Continued From page 75 reference checks were inconsistently completed. All of the above staff had the capability to work on all units of the story facility. On 3/17/14, at 10:37 a.m. the director of nursing (DON) stated she was unclear which facility staff was delegated responsibility to ensure screening of new employees because the role had changed. DON stated her expectation was for new employee screening requests to be made prior to the date of hire. DON verified references should have been checked and stated she "recently noted" the new employees were "completing the reference check forms themselves" and verified the form was not completed by the facility staff. DON verified the form did not include a signature or date of when the reference(s) were actually checked or verified, confirmed the form did not identify who was completing the reference check, how the reference was checked (such as via telephone call or letter) and/or who was contacted. DON further verified the reference checks were "already stapled to the application" and "that was perhaps why" they were completed by the applicant. DON confirmed the date of hire was the first day of employment, the date of orientation was the first day of work and verified the facility policy was not followed. REPORTING The facility failed to immediately notify the administrator and the SA of allegations of abuse, neglect, and/or mistreatment for incidents involving R21, R62, R71, and R17 as directed by the policy. Review of the facility's Resident Accident/Incident Reports, as well as allegations of abuse/neglect and mistreatment reported to the SA and the	F 226

A MDH Incident Report - Investigative Report Submission Completed form indicated the SA was notified of the resident to resident abuse incident on 10/19/13 (the day after the incident). The Investigation Follow Up CEP Report (undated), indicated the administrator was notified of the altercation also on 10/19/13, in the "AM [no specific time]."

Two Resident Accident/Incident Reports for R62 and R71 dated for 11/22/13, 9:30 a.m. indicated loud voices were heard coming from R62's room, "Writer saw this resident [R62] hitting her roommate [R71] in the face." The report indicated R71 sustained no injuries, both residents were separated and a "police report was done." The report was checked to indicate the physician and family were notified. The administrator notification section was not checked and indicated the administrator was not notified. The report did not indicate if the SA was notified. The clinical record lacked evidence the administrator and the SA were notified of the altercation.

ABUSE - INJURY OF UNKNOWN ORIGIN
A Resident Accident/Incident Report dated 12/14/13, at 5:00 a.m. indicated nursing assistant staff "noted bruise on resident [R17]." The report identified R17 was "alert" and "oriented." The report indicated the bruise measured 5 cm by 4 cm, was "redden" in color and was located on the forehead. The report indicated the cause of the bruise was unknown. R17 stated "I bumped it." The administrator notification section was unchecked and indicated the administrator was not notified. The report did not indicate the SA was notified.

F 226	Continued From page 80 The clinical record lacked evidence R17's injury was reported immediately to the administrator, immediately reported to the SA and lacked evidence the injury was thoroughly investigated to rule out abuse, neglect or mistreatment. On 3/18/14, at 2:06 p.m. DON verified the administrator should have been notified immediately for allegations of abuse, elopements, injuries of unknown origin, and neglect. DON verified either she or the administrator should notify the SA immediately. DON verified the policy was not operationalized. TIMELY REPORTING AN INVESTIGATION TO SA: The facility failed to report an investigation to the SA for R117's allegation of witnessing another resident in the facility punched in the knuckles on 2/8/14. On 3/10/14, at 3:58 p.m. R117 stated he had seen another resident in the facility abused, punched in the knuckles over the weekend, the DON was notified and stated that story was familiar to her, but had happened prior to the last weekend. At 7:00 p.m. the DON provided the SA report, which indicated the alleged event had occurred on 2/8/14, was reported to the facility and the SA on 2/8/14, and was not able to be substantiated by the facility, by physical assessment, nor supported by the family. R117 was admitted to the facility on 1/21/14, with diagnoses of severe cardiomyopathy (weakened heart muscle), congestive heart failure (fluid buildup in the extremities or lungs), cardiac dysrhythmias (abnormally conducted heat beats), depression and anxiety. F 241 SS=D	The admission MDS dated 2/3/13, indicated R117 was cognitively intact and was independent in all cares. R117 was awaiting relocation services to find independent living placement. The final investigative report was submitted on 2/16/13, three days after the required five day deadline for submission on 2/13/14. 483.15(a) DIGNITY AND RESPECT OF INDIVIDUALITY The facility must promote care for residents in a manner and in an environment that maintains or enhances each resident's dignity and respect in full recognition of his or her individuality. This REQUIREMENT is not met as evidenced by: Based on observation, interview and document review, the facility failed to provide care and services in a dignified manner for 1 of 2 residents (R38) whose living environment was permeated by an overwhelming urine odor from clothing soiled by urine and that was stored in the closet. Findings include: On 3/12/14, at 12:42 p.m. Family member (F)-A approached the surveyors and stated he had been to the administrator office but had not seen anyone and wanted to show one of the surveyors something in R38's room. F-A's facial expression was teary-eyed and had a look of disbelief. On 3/12/14, at 12:44 p.m. upon entering the R38's room observed an open clear plastic bag	F 241	F 241 For sampled resident F38 and for all residents at the facility, the facility shall ensure that cares and services are delivered in a dignified manner. Additionally, the facility shall ensure the residents do not experience a malodorous environment is free for prolonged periods of time. For sampled resident R38, the laundry issues was discussed. The facility offered to replace the damaged clothing and the family declined. A follow up meeting was held with the family. They estimated a cost of $177 to replace the clothing. The family was given a check for $177 to replace the damaged clothing. The facility has a policy titled "Laundry Services." The facility administrator, the laundry services staff, and the laundry manager shall ensure this policy is operational.

F 241	Continued From page 82 half filled with clothing sitting on the floor of the closet. As surveyor approached the closet there was a strong musty and ammonia smell emanating from the plastic bag. F-A stood by the closet and the bag of clothes. F-A threw his hands in the air, appeared distressed, weepy and his face was dripping of sweat as he stated "I just want them to treat my mother with dignity the facility gets paid a lot of money monthly and I expect her to receive quality care. She was a good mother and my mother was a clean woman and if she would be able to say something now she would be humiliated if she saw her clothes like this." -At 12:47 p.m. F-A stated he usually visited R38 once to twice per week and he was responsible for doing the her laundry but he had been out of town due to other family issues and had asked licensed practical nurse (LPN)-A before leaving town in 1/23/14, to do R38's laundry while he was gone but that was never followed up as requested even with phone calls when he was out of town to make sure R38 was taken care of. F-A added he had been out of town again in 12/13 and the same thing had happened. On 3/12/14, at approximately1:00 p.m. F-A came into the Parlor Room carrying a clear plastic bag with clothing stated he wanted to show the surveyors how R38's mothers clothes that had not been laundered looked. He opened and pulled the plastic bag back and in the bag was a pair of black slack and a pair of white socks. The black pants was observed to have multiple circular patches of fuzzy white growth build up with a strong ammonia smell emanating from the bag (the windows were immediately opened to diffuse the odor). F-A stated "Look at these clothes with all of the mold growing in them." F-A	F 241	Staff inservice will take place. These inservice records will be reviewed by the QA committee. At admission, the facility shall determine who will do the residents personal laundry. This record will be kept in a log book and reviewed and updated regularly by the laundry manager. This log book will be discussed at the QA committee monthly X6 for review and additional intervention as deemed necessary. The log will then be reviewed quarterly by the QA committee. Additionally, the facility has titled, "Housekeeping Services." The facility administrator and the housekeeping supervisor shall ensure this policy is operational. The facility has a policy titled, "Care Standards" and references national resources for these

F 241	Continued From page 83 appeared distress, weepy and shaky as surveyor assisted him to put the clothing in another clear plastic bag and was redirected to show the clothing to facility staff and stated he was going to show the clothing to the administrator but had been told she was not at the facility at the time. R38's care plan for cognitive function dated 9/27/11, identified R38 with an alteration in decision making, confusion, impaired thought processes, difficulty with decision making, impaired communication and indicated R38 required staff assistance with activities of daily living (ADLs). Goal "Will have daily needs met..." The care plan directed staff would provide supportive assistance that promotes resident comfort and dignity. R38's diagnoses included Alzheimer's disease, senile osteoporosis, muscular wasting and disuse atrophy, macular degeneration of retina, Parkinsonism, and cataract obtained from the Minimum Data Set (MDS) dated 1/29/14. In addition, the MDS indicated R38 required total physical dependence of one staff with ADLs. R38 was depicted as being totally incontinent of both bladder and bowel. The Cognitive Loss/Dementia Care Area Assessment (CAA) dated 2/10/14, identified R38 had decreased ability to make self-understood. The CAA for urinary incontinence dated 2/10/14, revealed R38 to be incontinent of both bowel and bladder and the plan was to "continue the same care." When interviewed on 3/14/14, at 8:48 a.m. LPN-A stated the F-A had called stating he was out of town and had requested to have R38's laundry to	F 241	standards. This policy was effective 05/2012 and was reviewed on 05/2013. Care and services provided in a dignified manner is addressed in these national resources. The facility also has a policy titled, "Activities of Daily Living." This policy was effective 05/2012 and was reviewed on 05/2013. The delivery of care and services provided in a dignified manner is addressed in this policy. Finally, the facility has a policy titled, "Dignity and Privacy" in the Social Services section of the policy and procedure manual. This policy was effective 6/2012 and was reviewed 05/2013. Staff will be inserviced about the policies. These inservice records will be reviewed by the QA committee for further action as deemed appropriate. The administrator, DON, RCM, or other designated leadership staff, shall randomly observe the delivery of care and services to ensure it is delivered in a dignified manner. These audits will be conducted weekly X6 months. The results of these audits will be reported to the QA committee for review and further action as deemed appropriate. Responsible: Administrator, DON, RCM, appropriate IDT members, clinical staff Compliance date: 4/28/2014

F 247	Continued From page 85 by: Based on interview and document review, the facility failed to provide the appropriate notices of roommate changes for 3 of 4 residents (R36, R56, R9) who experienced changes. Findings include: R36 had a change in roommate on unknown date and was not provided prior notice. A review of R36's most recent Brief Inventory for Mental Status (BIMS-tool used to measure cognition) obtained from the quarterly Minimum Data Set (MDS) dated 2/18/14, noted a score of 13 indicating intact cognition. During interview on 3/11/14, at 11:16 a.m. when asked if he had received a notice prior to his current roommate moving in R36 stated he was never informed of R67 moving in which had been approximately six months ago. On 3/17/14, 2:20 p.m. the social service designee (SSD) stated when she had talked to R67 he had told her he had been in the room for six months. She verified the both R36 and R67 medical records lacked any documentation on notification for the roommate change. SSD stated there was a form filled out usually with all the room changes and the form would be signed by the director of nursing (DON) and administrator. The form would also be reviewed with the resident's involved who were involved and the form would be given to the director of facility operations who in turn assisted with re-locating the residents. SSD further stated she was not working at the facility and would not know where any one that information would be documented but there was a three-ring binder where all the forms would be kept in the	F 247	R36 followed up with on 4/16/2014 and R36 states satisfaction with roommate he received on 4/4/2014. R56 followed up with on 4/1614 and she currently does not have a roommate and states she feels safe now that R63 is no longer her roommate and has been discharged. The facility has a roommate notification policy. This policy will be followed with each resident room change. Each resident will be notified prior to receiving a new roommate and will be introduced to new roommate. This notification will be documented in Point Click Care in a progress note. Clinical audits will be completed to ensure proper notification of new roommates. Staff will randomly audit chart monthly for six months. F 250 SS=E	483.15(g)(1) PROVISION OF MEDICALLY RELATED SOCIAL SERVICE The facility must provide medically-related social services to attain or maintain the highest practicable physical, mental, and psychosocial well-being of each resident. This REQUIREMENT is not met as evidenced by: Based on observation, interview and document review, the facility failed to provide medically related social services related to discharge for 1 of 4 residents (R100) reviewed for abrupt/rapid discharge. In addition, the facility failed to provide medically related social services for 3 of 3 residents (R11, R56, R63) for refusals of care and to address roommate behaviors. Findings include: R100 was not provided medically-related social services for behavioral symptoms. R100 was admitted to the facility on 6/27/13, with admitting diagnoses bipolar disorder, history of alcohol abuse and homelessness obtained from the Discharge Health & Physical Progress Note dated 6/27/13. R100 was discharged from the facility of 10/30/13. When interviewed on 3/17/14, at 10:00 a.m.	F 250	F 250 Provision of Medically Related Social Service Resident R 100 has been discharged from the facility. The facility has a policy "Discharge Summary" effective May 2012, reviewed June 2013. This policy states that a discharge summary will be completed by the interdisciplinary team when a discharge is anticipated. Social services ensures that each member of the IDT completes a summary of the discharge plans. In the event that a discharge is not anticipated, each member of the IDT will complete a summary in a timely manner. Summaries may be completed on a discharge summary form or in PointClick Care. The administrator or designee will ensure that the facility follows the policy as applicable. The procedure includes: the discharge summary will include a recapitulation of the resident's stay and status; social services reviews the resident's social, emotional and mental status as well as any significant events or changes during their stay; social services will also address emotional issues and recommended interventions, community/ agency resources to be utilized after discharge, cognitive impairments (including resulting problems and means of supporting), and relationship issues and methods of addressing.

F 250	Continued From page 89 director of nursing (DON) stated "Discharge planning was not being done by social service designee (SSD); she thought she only needed to call relocation services." When interviewed on 3/18/14, at 2:10 p.m. DON stated all the residents with pending discharge were supposed to have an order obtained for discharge from the physician which would be documented in the clinical record, the family or legal representative would be updated on the discharge and when discharging from the facility the location of discharge would be documented in the clinical record. Behavioral Contract dated 9/24/13, indicated "R100 will not use derogatory language towards other residents while living at Videll Healthcare Camden. Resident will not call other residents or staff names. R100 will not threaten others and will not yell at roommate. If R100 does not comply with this behavior contract, she will be given a 30 day discharge notice, or if there are any immediate threats to the safety or health of other residents- R100 may receive an immediate discharge notice." On 9/30/13, R100 was given a letter to notify her she would be discharged from the facility effective 10/30/13, to a location of her choosing. The notice indicated "If you haven't chosen a residence by 10/30/13, you will be discharged to your previous residence..." The notice indicated R100 had no skilled nursing need; had behavior problems at the facility; she had signed a behavior contract that she did not comply with and R100 had been informed upon receiving and signing behavior contract that non-compliance would result in a 30 day discharge notice.	F 250	The facility has a policy "Post-Discharge Plan" effective May 2012, reviewed May 2013. This policy states that the post-discharge plan of care is developed and provided to the resident/family/ responsible party for all anticipated discharges. The procedure states: the post discharge plan is developed for all anticipated discharges to a private residence or another nursing care facility; the care plan is developed with the resident and family as appropriate (the family or responsible party should give the facility at least 72 hours notice to ensure an adequate discharge plan is developed); the post-discharge plan will include: description of the residents/family's preferences for care, description of how the resident/family will access and pay for services; description of how the care should be coordinated if continuing treatment involves multiple caregivers; a description of specific resident needs after discharge (including personal care, sterile dressings, PT/OT, etc.), and description of how the resident and family need to prepare for the discharge. Social service will review the plan with the resident/ family 24 hours before the discharge is to occur. A copy of the post-discharge plan is provided to the resident, the receiving facility, and a copy is maintained in the resident's clinical record.

F 250	Continued From page 90 During review of the Progress Notes dated 7/1/13 through 10/30/13, R100 had behavior episodes documented twenty one times. The medical record lacked follow up documentation that the SSD had followed up with R100's behaviors and arranged for necessary services to address the problem. During further Progress Notes review the following were revealed: -Progress Notes dated 10/4/13, indicated SSD had documented she had contacted a relocation agency that was assisting with housing for R100. In the Progress Notes, SSD had expressed concerns of R100's increase behaviors and the agency contact staff had stated that the agency had also suspected similar findings that R100 was on denial for her mental illness and was outright refusing to take medications to treat the mental illness diagnosis. -Progress Notes dated 10/30/13, indicated "Social Services has attempted over the last thirty days to work with resident and talk about progress, but she has refused all communications ..." No documentation in the medical chart as evidence for the attempts. Later the same day another Progress Note indicated "Resident observed leaving the facility with all her belongings." No documentation of location where R100 was going to or any attempts that may have been made to assist with discharge transfer. On 3/17/14, at 3:00 p.m. facility discharge policy was requested but was not provided. R11 was not provided medically related social services to address behaviors of refusal/rejection of cares, or calling staff derogatory names.	F 250	The facility has a policy "Against Medical Advice (AMA)-Discharge" effective May 2012, reviewed May 2013. This policy states that if a resident wishes to leave the facility against medical advice, the staff will immediately notify the physician and facility administrator. The procedure includes: the director of nursing or designee discussed the risks of leaving AMA with resident and/or resident representative and documents this discussion in the progress notes; the director of nursing or designee notifies the attending physician, Administrator, and social services director of request and reasons for self-discharge; the director of nursing or designee ensures the resident/legal representative signs the AMA form (if they refuse to sign, the DON or designee writes refused to sign and the form is signed by two clinical staff as witnesses); the AMA form is kept in the residents medical record; the director of nursing or designee completed the recapitulation of stay and it is mailed to the resident/responsible party. Audits will be completed monthly for 6months by social services, DON, or Administrator to ensure accurate documentation is completed for all discharges. Resident R11 has been discharged from the facility.

F 250	Continued From page 91 On 3/11/14, at 9:48 a.m. during the initial stage one interview R11 stated, "I don't like people" and his roommate "wakes him up at night screaming." R11 further verified he did not allow facility staff to assist him with activities of daily living, bathing or range of motion. R11 verified he had a contracture of his left hand. R11 stated he did not take showers "due to pain" on his left side and the facility staff did not offer bed baths. R11 explained he was not aware if he could take a tub bath. - At 10:12 a.m. surveyor asked to see R11's left hand. R11 was observed to have a contracture of the left arm, wrist and hand. R11 stated the contracture was due to an aneurysm and stroke. Stated he "didn't let them [facility staff] touch it" and only allowed staff he "trusted" to cut the nails (of the contracted hand). R11 stated he cleaned his left hand (inside the contracture, to prevent potential breakdown) under the faucet with running water, but was unclear on how frequently he cleaned the left hand. R11 verified he did not allow staff to monitor the skin of his hand for potential breakdown. - At 12:32 p.m. R11's hair was observed to be long, uncombed and appeared to be unwashed. R11 wore a dark colored baseball cap. R11's nails were long on the right hand with dark colored debris observed under the nails. R11 was observed to be wearing a dark colored coat, t-shirt and dark sweat pants. On 3/13/14, from 8:00 a.m. to 9:00 a.m. R11 was observed to be wearing the same baseball cap, t-shirt, dark colored sweat pants and coat as the initial interview. R11 appeared to have unwashed, uncombed hair. At no time during the observation were staff observed to approach R11 and offer	F 250	The facility has a policy "Resident Refusal of Medical Treatment" effective June 2012. Policy states that a residents right to refuse treatment will be respected. When a refusal occurs resident and their family member/contact/ guardian will be fully informed of the risk vs. benefit of such a refusal so they may make an informed decision. This discussion will be documented and will include: the residents condition; acknowledging that the facility provided comprehensive information regarding the residents condition and that everyone understands; comprehensive explanation of the benefits of the recommended treatment; comprehensive information regarding risk associated with refusal of recommended interventions; list of the risks, potential negative outcomes and impact on the health, well-being and quality of life of the resident; understanding of the risks and potential negative outcomes; informed decision; signature of the family member authorize to act on the resident's behalf, witness and date; and instructions regarding rescinding the refusal. Refusals will be reviewed at least quarterly. Audits will be completed monthly for 6months by social services, DON, or Administrator to ensure accurate documentation is completed for all formal refusals of medical treatment. Audits will be completed monthly for 6 months to ensure therapy documentation is complete.

F 250	Continued From page 92 assistance with grooming or range of motion. During the observations, R11 was observed to be in bed and fully dressed in the same clothing. On 3/13/14, at 9:42 a.m. a nursing assistant (NA)-M stated R11 "refuses everything." NA-M explained "today was [R11's] shower day" and stated R11 refused the shower. NA-M stated when staff approach R11, he was verbally abusive and verified he would make derogatory statements to staff. NA-M stated staff was expected to "reapproach" R11. "We usually come back and ask, but he always refuses." NA-M was unclear how R11 was bathed/cleaned and explained staff usually took care of R11 on the evening shift. On 3/13/14, at 10:00 a.m. NA-E stated R11 "refused all cares" and stated she went back to R11 to reapproach if there was a refusal. NA-E stated she offered all means of bathing (shower, bed bath, and tub bath) and R11 refused "all." NA-E explained she then reported refusals to the nurse and documented "refused" on the shower sheet. NA-E stated R11 refused the shower because it "hurt him." NA-E was unclear if risks of his frequent refusals were explained to R11. Review of R11's undated NA group sheet (an assignment sheet used by NA staff to identify individual resident care needs) indicated R11's "Bath Day" was Thursday morning, he required one staff assist for toileting and dressing; as needed assistance with grooming, was non ambulatory, independent with transfers and "Resident is prejudiced. Please alert Nurse if behaviors present." R11's Medicine Admission History and Physical	F 250	The facility has a policy "Behavior Management" effective November 2011, reviewed January 2013. The policy states that behavior management is an interdisciplinary process including: identifying residents whose behaviors may pose a risk to self or others; developing individual and practical care strategies based on assessed needs; implementing the behavior management program; and ongoing assessment, monitoring, and evaluation of the effectiveness of the behavior management program including the effectiveness of psychoactive drugs. The procedure states that behavior assessment begins during the pre-admission process, the resident is assessed by a licensed nurse and/or social service director for behavior management issues during the admission/ re-admission process, the interdisciplinary team evaluates and documents the behavior(s) determining whether or not the behavior(s) rise to the level of being a "problem" requiring attention. The IDT evaluates the cause(s) of behaviors to minimize drug use as much as possible and when necessary. The IDT strives at all times to use the least amount of medication to help manage the behavior. Based on the IDT analysis of the behavior issues, an individualize care plan is developed to accommodate and/or manage the residents behavior. The director of nursing or designee is responsible to ensure behavior assessments are completed timely and that behavior care plans and nursing assistant care plans are

F 250	Continued From page 93 dated 12/31/13, included information regarding R11 prior to admission to the facility. The form identified R11 had a chronic problem with homelessness and R11 had "lost his medical respite bed at Harbor Lights [a shelter facility for the homeless] due to refusal to shower in their facilities." The form indicated R11's left sided spasticity was "Worse since he has not taken any of his medications since 12/24" and directed to resume baclofen. The Admission Record indicated R11 was admitted to the facility on 12/31/13. A Therapy Screening Form dated 1/2/14, indicated R11 was screened upon admission to the facility. The form indicated R11's activities of daily living (ADLs), and mobility were impaired. The cognition section was left blank; communication and swallowing were not impaired and none of the identified concerns were a "change" in R11's condition. The "Other Impairments" section of the form indicated R11 "denied" problems with pain, falls, pressure sores/open areas, and denied a "decline in ROM [range of motion]." The form indicated R11 "declines" splint/orthotic. The "Comments" section of the form indicated, "Pt [patient/R11] repeatedly declined offer of therapy services, stating he doesn't like people. Declines needing or wanting help for any ADL's, waiting for electronic scooter to arrive, is independent with manual w/c [wheelchair]. Requests not to have therapy services, no orders requested." The form indicated therapy services for physical therapy, occupational therapy, or speech therapy was "Refused." Although the form was dated 1/2/14, at the top of the form, the bottom of the form was signed by a therapist and dated for 3/11/14. The	F 250	reviewed at least quarterly. The director of nursing or designee is responsible to ensure a behavior tracking log is initiated on all behaviors identified for management. Audits will be completed monthly for 6months by social services, DON, or Administrator to ensure accurate documentation is completed for behavior management care plans and behavior management log. Audits will be completed monthly for six months to ensure that all range of motion assessments are complete. Audits will be completed monthly for six months by social services and nursing to ensure all care plans are complete and accurate. Resident R111 has been discharged from the facility. The facility has a policy "Prohibition of Abuse, Neglect, Mistreatment, and Misappropriation of Resident Property." This Policy was effective May 2012. This policy covers procedure of

F 250	Continued From page 94 screening form indicated R11 was identified to refuse care and services shortly after admission. R11's admission Minimum Data Set (MDS) dated 1/6/14, indicated R11 was cognitively intact, had a mood problem of feeling tired, and had no behavior problems. The MDS indicated R11 was independent with bed mobility, transferring, locomotion on the unit and eating; required supervision with locomotion off the unit, dressing and toilet use; R11 was identified as requiring extensive physical assistance from staff for personal hygiene. The Care Area Assessment (CAA) for nutrition dated 1/7/14, identified diagnoses of spastic hemiplegia on left side, history of alcohol abuse and congestive heart failure. The CAA identified R11 had "no upper teeth and few lower teeth" and, "He does not wish to receive a mechanically altered diet." The CAA for ADL Functional/Rehabilitation Potential dated 1/13/14, identified the CAA was triggered due to R11's need for supervision with ADLs. The CAA identified R11 had left sided hemiplegia due to a history of cerebrovascular accident (CVA, stroke). The CAA identified R11's other pertinent diagnoses to include altered mental status, and homelessness. The CAA identified R11 "was eval [evaluated] for therapy" and refused. The CAA identified R11 was continent of bowel and bladder, had no skin issues or falls. The CAA for falls and pressure ulcers (both dated 1/13/14), recapitulated the same data as ADL CAA. Although R11 initially refused therapies upon admission, and was identified to refuse therapy in the CAAs, the MDS and did not identify refusal of care behaviors. Although the behavior of refusing therapies was identified in the CAA, the clinical record lacked evidence R11 was assessed for refusals and interventions were developed to	F 250	educating staff and residents on abuse and neglect prevention, reporting, and facility follow up. The policy covers procedure on investigating any allegation of abuse, neglect, mistreatment, including injuries of unknown source, and/or misappropriate of resident property. The procedure also includes that the facility protects residents from harm during the investigation. The facility has a policy "Resident Abuse/Neglect follow up." This policy was effective May 2012. This policy covers procedure on assessing and evaluating for any negative outcomes to the resident following an allegation of abuse. The facility has a roommate notification policy. This policy will be followed with each resident room change. Each resident will be notified prior to receiving a new roommate and will be introduced to new roommate. This notification will be documented in point click care in a progress note. Clinical audits will be completed to ensure proper notification of new roommates. Staff will randomly audit chart monthly for six months.

F 250	Continued From page 95 address potential risks of associated with refusing therapy, such as but not limited to, the left sided contracture getting worse, or skin breakdown of the left hand. The Social Services Comprehensive Assessment Packet dated 1/13/14, included: a LOA (leave of absence) Safety Assessment, Smoking Assessment and Vulnerable Adult Assessment dated 1/2/14. No behaviors of refusing cares were identified in the assessments. The Vulnerable Adult Assessment appeared incomplete. Although R11 was identified to have refused to take showers at the homeless shelter (resulting in R11 losing a respite bed there) and R11 had behaviors of not taking medications such as baclofen, the assessment didn't identify R11 had any behaviors, such as calling staff derogatory names and refusal/rejection of cares. The clinical record did not identify a potential risk factor for R11 vulnerability. The Safety Risk (Fall) Assessment dated 1/4/14, indicated, "Resident does display behaviors calling staff 'Niggers', refuses cares and treatments. Nsg [nursing] to continue to monitor & update." Although the assessment identified abusive behaviors towards staff and refusals of care, the clinical record lacked evidence R11 was monitored for the behaviors. The undated Range of Motion Assessment identified "complete impairment" of R11's arm, hand, leg and foot on the left side. Review of R11's Weekly Audit (an evaluation of a residents' skin to identify potential changes, such as pressure ulcers or skin breakdown of the left contracted hand) form dated for both "12/31" and	F 250	Resident R56 reports that she is no longer afraid since R63 no longer lives at the facility. Resident R63 has discharged from the facility. Audits will be completed monthly for six months by social services to ensure that all vulnerable adult assessments and social service documentation is complete. F 250	Continued From page 96 "1/01" indicated "Refuses body audit." The audit dated 1/9/14, and 1/16/14, both indicated R11 refused his bath/shower. Although R11 was admitted to the facility on 12/31/13, and R11 was scheduled for showers/baths weekly, the clinical record lacked evidence facility staff attempted to reapproach R11 for bathing after 1/16/14. The clinical record lacked evidence R11 was evaluated/assessed by a nurse practitioner or physician within the required time frames. R11's care plan only had a focus for activities dated 1/8/14, and an identified problem for risk for impaired nutrition dated as revised on 3/12/14. Neither care plan focuses addressed R11's concerns with roommate, refusals of care nor behaviors of calling staff derogatory names. The clinical record lacked evidence R11 had care plans developed (including goals and interventions) to address his clinically related social service needs, such as, but not limited to: R11's identified behaviors of refusals/rejection of cares, R11's identified behavior of calling staff derogatory names, and identification of R11's increased vulnerability due to physical limitations and individual psychosocial needs (such as a history of homelessness). In addition, R11 lacked a care plan to address the risks of refusals of care, such as potential increase in contracture due to refusals of therapies and/or range of motion, potential development of skin issues due to refusal of bathing/personal hygiene/grooming and skin assessments/evaluations and refusals of doctor visits. Review of the IDT Progress Notes from 12/31/13, through 3/17/13, indicated the following: - On 12/31/13, an admission note at 10:47 p.m.	F 250

F 250	Continued From page 102 R111 stated his roommate called him a "nigger" and "we got into it." When ask if he reported the incident and what happened, R111 stated, "They [the facility staff] told me if I don't like it, I should have to move." R111 stated he "doesn't want to move" because he was admitted to the room first and R111 "didn't cause the problem." R111 stated he and his roommate were on "non speaking terms right now." R111 stated the incident occurred the prior week. R111 further stated "he [the roommate] came to move in here" and the roommate was the cause of the problem. R111 described feeling "penalized" for what "he did." Stated he feels like it's more of a "punishment" to have to move and to remain in the room with roommate and not a "solution." R111 stated he hoped it was the "last time" the roommate called him a name. R111's Admission Record dated 1/10/14, identified diagnoses to include head injury and depressive disorder. The admission MDS dated 12/23/13, indicated R111 was cognitively intact; had mood concerns of: feeling down/depressed, trouble falling asleep, trouble concentrating, and feeling tired. The MDS identified R111 had no behavioral concerns and required physical assistance from staff for transferring, toilet use, personal hygiene, dressing and locomotion on and off the unit. The CAA for pressure ulcers dated 12/26/13, identified R111's closed head injury was "following an assault." The CAA for ADL Functional /Rehabilitation Potential dated 12/27/13, identified R111 was able to voice his needs and identified R111's specific ADL needs. The CAA for psychotropic drug use dated 12/27/13, identified R111 had vision impairment due to diabetes mellitus diagnosis and from the assault. Review of R111's care plan revealed	F 250

F 250	Continued From page 103 appropriate care plan development. A copy of the care plan requested and not provided by the facility. Review of the IDT Progress Notes indicated on 3/6/14, at 12:06 a.m. a note identified R111 had "an argument with his roommate. According to his roommate the television (TV) was loud. He was very upset with his roommate for calling him the 'N' word. The nurse filled out an incident report. The administrator and DON were [sic] informed via text messag [sic]." Although the note identified an incident report, the facility lacked evidence of the notification or incident report. On 3/14/14, at 9:40 a.m. the LPN-A stated she was not aware of R111 being called derogatory name and stated "social services should be handling it." LPN-A stated room changes "are done by social services." When asked regarding determining who should move when roommates report behavioral problems, LPN-A stated staff report the behavior to the social service designee and determine "who is the best to move." LPN-A further stated, "Our policy has been, the complainer is the one to move." On 3/14/14, at 10:59 a.m. SSD stated she was aware of a verbal altercation and stated she was notified by night shift. SSD stated she "met with both" residents separately the next morning and offered for R111 to switch rooms. SSD stated R111 refused to change rooms due to his potential discharge "next week." SSD stated R111 expressed he would keep to himself and "avoid the roommate." SSD stated she spoke with the roommate and believed the residents were friends and was "shocked" that the altercation had occurred. SSD stated she believed the	F 250

F 250	Continued From page 104 roommate had just had a left below the knee amputation, was going through a rough time, lost all his belongings and he "took his frustrations out on [R111] due to the TV volume being too high." SSD stated she did not document the conversation and verified the roommate calling R111 a derogatory name would be considered verbal abuse. The Room and/or Roommate Change policy dated December 2013, directed "Residents are notified in advance of a new roommate." The policy indicated the social service director or designee was responsible to ensure a resident was informed of a new roommate, documentation in the clinical record would be completed indicating reasons for the move, residents/family input, agreement of resident/family, adjustment to the change in roommate would be monitored and documented in the clinical record and the residents care plan would be updated. R56 had verbalized to facility staff recurrent fear from R63, and the facility did not take adequate precautions to protect R56 from the alleged physical, verbal and emotional abuse. R56 was observed and the following was noted: - On 3/11/14, at 1:54 p.m. R63 was observed to have yelled at R56 repeatedly and called her a liar. Registered nurse (RN)-B was immediately notified of R63 yelling at R56. He said "ok" and did not leave the desk. - On 3/11/14, at 4:00 p.m. R56 had to be approached five different times to get the interview completed due to R63 would not let R56 talk without becoming upset. R63 pointed at R56 and stated "You better not talk." - On 3/12/14, at 8:10 a.m. R56 stated roommate	F 250

F 250	Continued From page 105 was verbally abusive. R63 stated R63 slammed the foot of R56's bed with her hand and told her she knew "what murder feels like." That incident had happened on 3/9/14, and the police were called. - On 3/12/14, at 8:11 a.m. when R56 reported the incident to facility staff they told her to keep stuff on her bed. R56 did not make noise. - On 3/12/14, at 8:14 a.m. the facility still did not investigate or identify the emotional, physical or verbal abuse towards R56 from R63. - On 3/12/14, at 8:23 a.m. R56 was again interviewed and stated "I'm so glad she's not here." - On 3/12/14, at 1:53 p.m. R56 reported she "feels like s**t" when R63 verbally abused her and reported she was afraid of R63. - On 3/13/14, at 7:40 a.m. observed in room 147A in bed. - On 3/13/14, at 9:54 a.m. resident observed in bed 147A. R63 was in 147B. Maintenance staff was in the room setting up headphones with the TV and the activity director was sitting outside the room. At the start of the interview with R56, roommate (R63) yelled with an angry voice "Oh God" and R63 got up and left the room. The activity director went down the hall with her. - On 3/14/14, at 8:12 a.m. R56 observed in her bed. R56 stated they took her (R63) away last night and felt safer now. R56 reported she had been bedfast for the past one to two months. The care plan dated 3/6/13, indicated R56 needed social services (SW) due to recent admission to facility. The interventions noted the SW was to visit monthly and as needed (PRN), introduce self to others, encourage R56 to attend activities and the SW would make outside referrals to mental health professionals as	F 250

needed. The medical record lacked evidence of how the facility intervened on keeping R56 safe from R63's physical, verbal, and emotional abuse. The medical record lacked any evidence of the SSD meeting with R56 to discuss the new roommate and/or adjustment of the room.

The care plan revised 4/21/13, incorrectly identified R56 as short stay resident to the facility and identified R56 as a vulnerable adult related to (r/t) physical limitations. The goal was to ensure R56 was safe within Camden Care Center and the interventions included "Nursing to provide cares, services according to resident needs, POS [Physician's orders] and POC [plan of care]," "Assistance in case of emergency" and "Vulnerable adult assessment per facility policy."

The Vulnerable Adult Assessment (VAA) dated 11/21/13, indicated R56 had physical limitations which made the resident susceptible to abuse. The physical limitations include wheelchair (w/c) bound and history of hip fracture. The form also identified R56 did not "have a history of any type of abuse towards others or self-abuse." The VAA was updated on 2/20/14, and noted the VAA was still current with no changes.

R56's progress notes were reviewed from 1/25/14, going forward to 3/14/14. On 3/14/14, the social worker designee met with R56 "as a follow up to provide an ongoing support." There was no supporting evidence of as to what "ongoing support" meant.

R56's most recent MDS dated 2/20/14, identified R56 as being cognitively intact with a Brief Interview for Mental Status (BIMS) score of 15. R56 was totally dependent upon staff for transfers

F 250	Continued From page 107 and bed mobility. behaviors directed towards staff only, no delusions, Patient Health Questionnaire (PHQ)-9 was 12 which noted moderate depression (PHQ-9 scores of 5, 10, 15, and 20 represented mild, moderate, moderately severe, and severe depression, respectively). R56's diagnoses included arthritis, cancer, and Parkinson's. R63 was aware of the facility policy for abuse as R63 had signed the Acknowledgement of Vulnerable Adult and Abuse Prevention Policies on 10/5/11. The form read, "Camden Care Center strives to support and protect all of our residents. To ensure our resident's needs are met; we have established Vulnerable Adult and Abuse Prevention Policies. All residents have the right to report concerns or suspected abuse without fear of retaliation." R63's care plan dated 4/18/12, noted R63 needed an "opportunity to express feelings/ concerns regarding placement/life situations. [R63] tends to keep to herself. [R63] has a dx [diagnosis] of depression." The interventions included encourage R63 to attend activities, refer to outside mental health professionals, and remind R63 of the positives in life and to have the social worker visit monthly and PRN. The care plan had not been updated with the room change and the addition of a roommate as of 3/5/14, and nor was the care plan revised to reflect the physical, verbal and emotional abuse towards R56. R63's Progress Notes were reviewed from 9/27/13, going forward and the following was noted: - On 3/9/14, at 5:34 a.m. noted staff was aware	F 250

F 250	Continued From page 108 that R63 had threatened R56. "She [R63] stated 'I will kill you now', and she pound very hard on her bed. This resident verbally attack this writer for changing her room where she was having a good slumber. Updated the authority for a threatening comment directed towards coresident. We will continue to monitor the situation closely and vigilantly at this moment." - On 3/9/14, at 12:50 p.m. noted R63 was "not fine with present roommate and room environment. according to her [R63] , her roommate is very in appropriate , like to put call light on, turn television loud, and calling nar [nursing assistant/registered] in the room to assist her with cares etc." The police had been called previously and 'resident needed to be separated before something happen [sic] beyond our reach." The note indicated the facilitystaff was going to monitor the situation every 15 minutes, however, the medical record lacked evidence of the monitoring. A Care Conference Quarterly note dated 10/22/13, depicted R63 as having behaviors which included "becomes irritated with staff at times, barricades herself in her room with boxes, she also isolates herself in her room." The continued to note R63 "is very sensitive to noise and that causes 'nausea'." The note revealed R63 independent in ambulation to all destinations. R63's most recent MDS dated 1/8/14, noted R56's diagnoses included dementia with behavioral disturbances, anxiety, psychotic disorder, and depression. The MDS identified R63 as being cognitively intact with a BIMS score of 15. R63's PHQ-9 was 10 which noted moderate depression. According to the MDS, R63 had trouble sleeping, had a poor appetite, had	F 250

F 250	Continued From page 109	F 250		

little interest, trouble concentrating, felt tired, and felt down. R63 was depicted as having no behaviors.

R63 was unavailable for interview for the untoward behavior towards R56 as R63 was transferred out of the building on the evening of 3/13/14.

On 3/12/14, at 2:37 p.m. an interview was conducted with the SSD. She indicated R56 and R63 became roommates on 3/5/14, as both women were private pay and could pay the private pay fee for the private room. The SSD indicated she was made aware of the 3/9/14, altercation in the Monday morning report meeting on 3/10/14. The SSD revealed she did speak with R63 and stated, "[R63] used to being in her own room. She did warn us, I would not be able to get along with a roommate. 'I was brought into a private room and will not be able to get along.'" The SSD was not aware of R63's "I now know what murder feels like." and was aware of the police being called on 3/9/14. The SSD expected the staff to inform her of any situation that needed her attention. SSD stated she did meet with R63 on 3/11/14, and R63 stated "things were getting better, they are avoiding communicating with each other and talking to each other." The SSD did not put any interventions into place for the altercations between the two roommates and she was unaware if nursing had put any interventions in place to prevent the emotional, physical and verbal abuse of R63 towards R56. The medical record lacked evidence of the communication between R63 and the SSD as the SSD did not document any of the follow up conversations. It could not be determined if R63 received the monthly SW visits as indicated on the care plan

F 250	Continued From page 110 revised 4/18/12, nor could it be determined if R63 adjusted to the new room and roommate as the medical record lacked evidence any SW intervention for the adjustment other than one visit on 3/11/14. On 3/17/14, at 10:00 a.m. the DON stated discharge planning was not done by SSD, she thought she only needed to call relocation services. - At 11:40 a.m. The administrator and corporate interim administrator (CIA) were interviewed regarding the SSD: what training/orientation was provided so that she could successfully carry out the job? The administrator stated, "When I started here with SSD, I asked CIA if she was being supervised." CIA stated, "I told you she was, because the corporate social workers (CSW) was going to mentor her." The administrator stated, "When corporate came into town on 2/11/14, both of the two (facility owner and CSW) were here, and I asked when are you going to counsel SSD? The CSW acted like she did not know what was happening and stated, 'I can't supervise her.' The facility owner stopped the conversation and stated 'you will supervise her.' It was very alarming to me, a new social worker (without a mentor)." CIA stated, "When I got here in November she was already hired and here." The administrator stated a social worker was so essential to proper discharge planning, and "I was downright angry that she was not supervised, and mentored. My regional administrator stated he had hired her with the understanding that CSW was going to be her supervisor." The undated Social Services/Social Work job description identified, "The social worker will work	F 250

F 253	Continued From page 112 Findings include: R11's motorized wheelchair was observed to be in ill repair. On 3/11/14, at 10:15 a.m. R11's motorized wheelchair was observed to have vinyl ripped and a large chunk of foam exposed on the back left side of the seat and the left side of the head rest. The back aspect of the left arm rest was observed to be peeling up. R11 stated the motorized wheelchair and standard wheelchair next to the bed were his personal property. R11's admission Minimum Data Set (MDS) dated 1/6/14, indicated R11 had intact cognition, had functional limitation of the lower extremity on one side, R11 was identified as un-steady and needed assist of one for surface to surface transfers, which included transfers from bed to wheelchair. On 3/17/14, at 10:03 a.m. during the environment tour the director of facility operations (DFO) verified the findings and stated the motorized wheelchair was R11's personal property. DFO stated he had not been informed the wheelchair needed any maintenance follow up. DFO stated because the motorized wheelchair was R11's property, the designated social worker should work with the outside vendor to repair it. DFO stated he was going to let the social worker know immediately. R36's wheelchair was not kept clean. On 3/11/14, at 4:20 p.m. R36's entire wheelchair frame was observed to be heavily soiled. R36's quarterly MDS dated 12/18/14, indicated	F 253	All wheelchairs used by residents in the facility will be cleaned and inspected for maintenance. A record of this cleaning and maintenance inspection will be reported to the QA committee for review and further recommendation as indicated. Weekly audits for maintenance and cleanliness will be conducted on random wheelchairs in use. This audit will be done for 6 months. The results of these random audits will be reported to the QA committee for review and further recommendation as indicated. A record of wheelchair cleaning will be kept in a log. This log will be reviewed by the facility administrator on a weekly basis. The log will be presented to the QA committee for review and further recommendation as indicated. Responsible: Administrator, Maintenance Compliance date: 4/28/2014

F 257	Continued From page 115 temperature levels. Facilities initially certified after October 1, 1990 must maintain a temperature range of 71 - 81° F This REQUIREMENT is not met as evidenced by: Based on observation, interview and document review, the facility failed to maintain comfortable room temperatures for 2 of 9 residents (R1, R9) in the sample reviewed with complaints of cold rooms. Findings include: R1 and R9, roommates in the same room, expressed concerns with the room temperature and comfort. R1 was interviewed on 3/11/14, at 11:31 a.m. and stated, "It's either too hot or cold. It's [the temperature] not well regulated." R1's most recent Brief Interview for Mental Status (BIMS-tool used to measure cognition) dated 3/4/14, noted a score of 15 indicating R1 was cognitively intact. R9 was interviewed on 3/11/14, at 1:20 p.m. and stated, "It is too hot or too cold sometimes." R9's most recent BIMS dated 1/8/14, noted a score of 15 indicating R9 was cognitively intact. On 3/17/14, at 11:22 a.m. upon entering room with the surveyor, the director of facility operations (DFO) verified the room felt cold and stated the temperature was set at 55 degrees Fahrenheit (°F). On 3/17/14, at 11:23 p.m. DFO stated the heat	F 257	that resident room temperatures are kept between 71 and 81 degrees F. Maintenance identified to the surveyor during the survey the fan control was not functioning in the room where residents R1 and R9 reside. The fan control will be repaired or replaced. Will be done B/4 4-28-14 A digital temperature gun was purchased by the facility and ambient temperatures will be checked randomly by maintenance. This random check will be done weekly on all 4 hallways. A log of this random ambient temperature check will be kept. This log will be reviewed by the administrator. Additionally, this log will be reviewed by the QA committee regularly for additional recommendation as necessary. Responsible: Administrator, Maintenance Compliance date: 4/28/2014

F 257	Continued From page 116 control was working, but not the fan control. DFO stated he was not aware of the problem, and verified it was not identified or logged in the maintenance log. DFO unscrewed the part and further stated the bracket was not working and added, "It needs a new whole control." The Home Like Environment policy dated August 2013, directed "Videll Healthcare, LLC facilities shall provide a safe, clean, comfortable, and homelike environment."	F 257		
F 258 SS=D	483.15(h)(7) MAINTENANCE OF COMFORTABLE SOUND LEVELS The facility must provide for the maintenance of comfortable sound levels. This REQUIREMENT is not met as evidenced by: Based on observation and interview, the facility failed to ensure comfortable sound levels were maintained for 2 of 5 residents (R113, R36) who lived in different hallways. In addition, the facility failed to ensure comfortable sound level concerns brought up at the Resident council Meetings which had the potential to affect all 84 residents residing at the facility. Findings include: R113 on 3/11/14, at 9:03 a.m. during interview expressed there was a noise problem especially at night from some residents yelling and staff being loud either across or down the hallways. R113 further stated "Maybe that is how they are I just shut the door."	F 258	F 258 For sampled residents R113 and 36 and for all residents at the facility, the facility shall ensure the noise level is comfortable. Comments in the Resident Council Minutes about noise issues will be responded to timely by the facility administrator. During shift change, facility leadership will be visible to ensure staff attend to shift change activities and that noise levels are comfortable. Staff will be educated regarding their responsibility to maintain comfortable noise levels in the facility at all times. Documentation of this education will be provided to the QA committee for review and further recommendation as indicated.

F 258	Continued From page 117 On 3/17/14, at 11:34 a.m. R113 stated the noise level was fine at the time but at times was an issue and he knew better to shut the door. R113's most recent Brief Inventory for Mental Status (BIMS-tool used to measure cognition) obtained from the significant Minimum Data Set (MDS) dated 2/14/14, noted a score of 15 out of possible 15 which indicated intact cognition. R36 On 3/11/14, at 10:40 a.m. during interview R36 stated "At around 2:30 p.m. by the medication cart about seven aides would be standing and they were loud. It was also noisy at night a couple of aides and residents won't stop talking." R36's most recent BIMS obtained from the quarterly MDS dated 2/18/14, noted a score of 13 which indicated intact cognition. On 3/17/14, at 10:59 a.m. when asked about the noise R36 stated there was noise in the hallway was worse especially during the afternoon shift change. On 3/17/14, at 11:01 a.m. the director of facility operations stated the noise concern had been brought up on the stand up meetings several times and thought director of nursing (DON) and administrator were the two handling it as some residents had been very vocal about the noise levels on numerous occasion including some that had been discharged from the facility. During review of the Resident Council Meeting Minutes the following was revealed: -Meeting Minutes dated 10/28/13, indicated staff	F 258	The facility administrator shall ensure that issues raised by the Resident Council about noise levels are addressed timely and that follow up is given back to the Resident Council. This will be ongoing. Complaints risen at Resident Council about noise levels will be reported to the QA committee for review and further recommendation as indicated. This will be ongoing. Responsible: Administrator and all facility staff Compliance date: 4/28/2014

F 272	Continued From page 119 The facility must conduct initially and periodically a comprehensive, accurate, standardized reproducible assessment of each resident's functional capacity. A facility must make a comprehensive assessment of a resident's needs, using the resident assessment instrument (RAI) specified by the State. The assessment must include at least the following: Identification and demographic information; Customary routine; Cognitive patterns; Communication; Vision; Mood and behavior patterns; Psychosocial well-being; Physical functioning and structural problems; Continence; Disease diagnosis and health conditions; Dental and nutritional status; Skin conditions; Activity pursuit; Medications; Special treatments and procedures; Discharge potential; Documentation of summary information regarding the additional assessment performed on the care areas triggered by the completion of the Minimum Data Set (MDS); and Documentation of participation in assessment.	F 272	F 272 For sampled resident R91 and for all residents at the facility, the facility shall ensure assessments are completed. These assessments will be thorough and accurate. Assessments will be completed at the time of admission as outlined in the MDS manual, according to PPS protocol, and at the discretion of the clinical staff based on clinical observations and/or change in medical status. Behavior assessments are part of this assessment process. The facility has a policy titled, "Behavior Management" that was effective 11/2011 and reviewed 01/2013. This policy addresses the specific need for behavior assessments. As outlined in the facility policy, after assessments are completed, the IDT will meet to discuss the assessment and create a care plan. If behavior management is a part of that care planning process, target behaviors that are identified will be tracked on a behavior tracking sheet/log.

F 272	Continued From page 120 This REQUIREMENT is not met as evidenced by: Based on observation, interview and document review, the facility did not comprehensively assess behaviors1 of 1 resident (R91) identified as having concerns related to mood and aggressive behavior. Findings include: On 3/13/14, at 9:00 through 9:47 a.m. R91 was observed resting in bed with covers on her. R91 was being delivered supplemental oxygen to her through a nasal cannula. R91 nodded off during conversation with surveyor and did not respond to some questions. R91 flinched her shoulders twice and reported she had a lot of pain in her knees. R91 reported she was very depressed from living at the facility and wanted to go home. R91 explained she felt no one cared for her at the facility because, even though she was sick and in pain, no one came to check on her. R91 explained she had been prescribed antibiotics and pain medications by a physician yesterday but she did not take them because she did not trust the physician knew her well enough to prescribe meds to her. R91 recounted how she was upset because a staff member lied to her yesterday about canceling a ride to the store for her. R91 reported it made her "angry" and "rude" when staff lied to her. R91 reported she planned on spending the rest of the day resting in bed and did not think any staff would assist her with any cares today. R91's admission Minimum Data Set (MDS), dated 10/15/13, indicated the potential for moderate depression due to self-reported symptoms of little interest or pleasure in doing things, feeling down	F 272	Sampled resident R91 will be assessed related to behavior management issues. The IDT will meet to review the assessment and a behavior management care plan will be initiated. Identified target behaviors will be tracked on a behavior tracking sheet/log. This behavior management assessment and the behavior management care plan will be reviewed/revised at least quarterly with the MDS process. New behaviors that are problematic will be assessed immediately and appropriate care plan interventions identified as indicated. The DNS and/or RCM will audit sampled resident R91 monthly X6 to ensure behavior management assessments and target behavior

F 272	Continued From page 121 depressed or hopeless, trouble falling asleep or sleeping too much, feeling tired or having little energy and poor appetite or overeating. The MDS revealed R91 displayed verbal and physical aggression one to three days during the seven day observation period. R91's quarterly MDS, dated 1/9/14, indicated a potential for mild depression, with R91 reporting the same symptoms in addition to moving or speaking slow or being fidgety. The MDS noted verbal and physical aggression towards others occurred four to six days during the seven day observation period. Both the 10/15/13 and 1/9/14, MDS indicated R91 rejected evaluation or care on one to three days during the seven day observation period. R91's Brief Interview for Mental Status (BIMS) on her admission and quarterly MDS dated 10/15/13 and 1/9/14 indicated she was cognitively intact. R91's Care Area Assessments, dated 10/22/13, for Mood, Cognitive Loss/Dementia, Behavior, and Psychosocial Well Being included the same summary statement under the Care Plan Considerations section: "Resident has some behavior r/t [related] medical Dx [diagnosis]. Staff will monitor her behavior and ensure pt [patient] needs are met and she is safe." The sections for input from resident and family or representatives for resident were all left blank; despite R91's BIMS score indicating she was cognitively intact. Each care area assessment noted a referral to another discipline in the health care team (such as social services, medical or mental health professionals) was not necessary. The assessment did not include a thorough analysis including: specific behaviors exhibited by R91, what medical or mental health concerns would	F 272	tracking is being completed as outlined in the care plan. Additionally the medical record will be audited for thoroughness and accuracy of the behavior assessment. The results of this audit will be reported to the QA committee for review and further recommendation as indicated. The DNS/RCM will randomly audit 6 resident records who are receiving behavior management intervention and targeted behavior tracking to ensure assessments are completed and that behavior tracking is being completed. These audits will be done for 6 months. The results of these audits will be reported to the QA committee for review and further recommendation as indicated. F 272	Continued From page 122 impact care, triggers to behaviors, events immediately prior to behavior, consequences of behavior or tactics known to decrease or minimize behavior. R91's current care plan, last reviewed 1/30/14, did not include problems, goals or interventions related to R91's mood, rejection of evaluation or care and verbal and physical aggression. On 3/14/14, at 2:14 p.m. the social service designee (SSD) reported the care area assessments for R91 were completed prior to her employment at the facility. SSD reported the care area assessments were not comprehensive, did not identify what behaviors were occurring, causative factors or how best to help. SSD reported she was not aware R91 exhibited verbal and physical aggression or rejection of cares. Surveyor requested any other documentation of behavior or mood assessments, not included in the care area assessments. None was provided. SSD confirmed R91's care plan did not address her aggressive behaviors or rejection of evaluation or care. On 3/14/14, at 3:53 p.m. R91's nursing assistant (NA)-G reported R91 rejected cares because she valued her privacy and wanted to do as much as she could herself. NA-G reported R91 at times cussed at staff, called them unkind names or threatened to get them fired. NA-G reported R91 has said unkind statements to her roommates. NA-G explained R91 could be intrusive to her roommate's privacy during cares because she thought her roommate was her daughter. NA-G explained R91's behavior varied throughout the day and that at times she was very kind. NA-G was not aware of any physical aggression	F 272

F 275 SS=D	483.20(b)(2)(iii) COMPREHENSIVE ASSESS AT LEAST EVERY 12 MONTHS A facility must conduct a comprehensive assessment of a resident not less than once every 12 months. This REQUIREMENT is not met as evidenced by: Based on interview and document review, the facility did not comprehensively assess 1 of 1 resident (R63) who required a comprehensive assessment at 366 days. Findings include: R63's most recent Minimum Data Set (MDS) dated 1/8/14, noted R63's diagnoses included dementia with behavioral disturbances, anxiety, psychotic disorder, and depression. The MDS identified R63 as being cognitively intact with a Brief Interview for Mental Status (BIMS - a tool used to determine cognitive levels) score of 15. R63's Patient Health Questionnaire (PHQ)-9 was 12 which noted moderate depression (PHQ-9 scores of 5, 10, 15, and 20 represented mild, moderate, moderately severe, and severe depression, respectively). According to the MDS, R63 had trouble sleeping, had a poor appetite, had little interest, trouble concentrating, felt tired, and felt down. R63 was depicted as having no behaviors. However, looking at R63's MDS history it was noted that R63 had four consecutive quarterly MDS and the medical record lacked evidence of	F 275	F 275 Sampled resident R63 is no longer at the facility. The facility uses PointClick Care for MDS scheduling, tracking, and completion. The MDS due in October 2013 showed in PCC that it was "ACCEPTED". Communication from CMS to the facility indicated the initial submission was not accepted. The facility opened the MDS and resubmitted the MDS which was then accepted by CMS. A validation report is available for review. For all residents at the facility, the facility shall ensure that MDS assessments are completed and submitted according to timelines outlined in the MDS manual. Validations reports of submission and CMS acceptance will be kept by the MDS coordinator. These validation reports will be presented to the QA committee regularly for review and further recommendation as indicated. Responsible: Administrator, MDS coordinator Compliance date: 4/28/2014

F 275	Continued From page 124 an annual comprehensive assessment that had been completed which would have identified the resident's functional capacity and health status. R63's MDS history was as follows: - Annual comprehensive assessment completed on 10/10/12, and - quarterly assessment completed 1/9/13, 4/10/13, 7/11/13, and 1/8/14. The October 2013 MDS manual revision directed "each facility must use its State-specified RAI [resident assessment instrument] (which includes the MDS, utilization guidelines and the CAAs [Care Area Assessments]) to assess newly admitted residents, conduct an annual reassessment and assess those residents who experience a significant change in status. The facility is responsible for addressing all needs and strengths of residents regardless of whether the issue is included in the MDS or CAAs. The scope of the RAI does not limit the facility's responsibility to assess and address all care needed by the resident." The comprehensive assessment was to be completed done within 366 calendar days of the last comprehensive assessment. R63 went 522 days (at time of exit) without a comprehensive assessment that would have identified her current functional capacity and develop a current care plan with interventions to care for R63. On 3/12/14, at 3:01 p.m. an interview with the director of nursing (DON) was conducted. The DON revealed assessments were not accurate and update and so we have started to redo all of them. Only six to seven residents have been completed. We have not been able to get the whole team together to talk about all of it.	F 275

F 279	Continued From page 127 teeth and few lower teeth" and, "He does not wish to receive a mechanically altered diet." - The CAA for ADL Functional/Rehabilitation Potential dated 1/13/14, identified the CAA was triggered due to R11's need for supervision with ADLs. The CAA identified R11 had left sided hemiplegia due to a history of cerebrovascular accident (CVA, stroke). The CAA identified R11's other pertinent diagnoses to include altered mental status, and homelessness. The CAA identified R11 "was eval [evaluated] for therapy" and refused. The CAA identified R11 was continent of bowel and bladder, had no skin issues or falls. - The CAA for falls and pressure ulcers (both dated 1/13/14), recapitulated the same data as ADL CAA. R11's care plan only had a focus for activities dated 1/8/14, and an identified problem for risk for impaired nutrition dated as revised on 3/12/14. Neither care plan focuses addressed R11's concerns with roommate, refusals of care nor behaviors of calling staff derogatory names. The clinical record lacked evidence R11 had care plans developed (including goals and interventions) to address his clinically related social service needs, such as, but not limited to: R11's identified behaviors of refusals/rejection of cares, R11's identified behavior of calling staff derogatory names, and identification of R11's increased vulnerability due to physical limitations and individual psychosocial needs (such as a history of homelessness). In addition, R11 lacked a care plan to address the risks of refusals of care, such as potential increase in contracture due to refusals of therapies and/or range of motion, potential development of skin issues due to refusal of bathing/personal hygiene/grooming	F 279

F 279	Continued From page 128 and skin assessments/evaluations and refusals of doctor visits. R111's care plan did not address the respiratory interventions for use of a CPAP. On 3/11/14, at 6:34 p.m. R111 indicated to surveyor the staff did not clean the machine "CPAP." On 3/13/14, at 11:30 a.m. the CPAP mask and tubing were observed lying on the floor next to R111's bed with creamy white build up in the inside of the mask and around the seams. On 3/14/14, at 11:28 a.m. the CPAP mask and tubing were both again observed lying on the floor slightly under the bed but visible. The mask observed to have a thick creamy build up on the inside and the seams. R111's Admission Record dated 1/10/14, identified diagnoses to include head injury and depressive disorder. The admission MDS dated 12/23/13, indicated R111 was cognitively intact and had a diagnoses of asthma. The CAAs did not identify the use of a CPAP machine. The clinical record lacked a comprehensive care plan to address the use of the CPAP, including monitoring of respiratory status, cleaning. A copy of the care plan was requested, but not provided by the facility. R117 was admitted to the facility on 1/21/14, per the Admission Sheet, with diagnoses of severe cardiomyopathy (weakened heart muscle),	F 279

F 279	Continued From page 129 congestive heart failure (fluid buildup in the extremities or lungs), cardiac dysrhythmias (abnormally conducted heat beats), depression and anxiety. R117's admission MDS dated 1/27/14, indicated R117 was cognitively intact and was independent in all activities of daily living. R117 was awaiting relocation services to find independent living placement. R117 was observed on 3/10/14, at 3:30 p.m. to self-isolate in his room, listen to loud music and not interact with others in the facility, he did not greet peers or staff. On 3/11/14, at 2:00 p.m. R117 was observed outside smoking, he did not join the group that was outside on the designated smoking patio, but instead choose to isolate himself by sitting on the planter by the front door (not a designated smoking area). On 3/12/14, at 10:30 a.m. R117 was observed to sit on the planter and smoke (not a designated smoking area), he stared at the ground and did not interact or socialize with the residents on the nearby designated smoking patio. On 3/13/14, at 9:29 a.m. the resident went out to smoke, he had the cigarette and lighter in his hand, he lit the cigarette immediately when he went out the door (not a designated smoking area, and sat on the planter by the drive way (not a designated smoking area). A review of the medical record revealed that R 117 had triggered the CAAs for falls, dental care, and psychotropic drug use. The falls CAA identified R117 received an antidepressant, a diuretic, had cardiac problems, psychiatric problems, anxiety disorder, impaired cognition and depression. The facility identified the falls	F 279

F 279	Continued From page 130 would be addressed on the care plan. The dental CAA noted R117 had broken or loosely fitting, full or partial denture and decreased mobility. The facility identified the dental would be addressed on the care plan. The psychotropic drug use CAA identified R117 was on psychotropic medications for treatable medical conditions of heart disease. The facility identified the psychotropic drug use would be addressed on the care plan. The temporary care plan dated 1/21/14, was requested and not provided. The care plan dated 2/16/14, was requested and not provided, but upon review of the electronic care plan indicated lacked a comprehensive care plan related to the CAA areas triggered of falls, dental care and psychotropic drug use. On 3/11/14, at 8:00 a.m. the director of nursing (DON) was interviewed and stated R117 did not have a comprehensive care plan. R103 was admitted to the facility 7/29/13, discharged to the hospital on 1/2/14, and was re-admitted on 1/3/14, with diagnoses related to injuries from a motor vehicle accident (MVA), lung contusion (a bruise of the lung tissue from impact), Open fractures of left femur (hip bone) (a fractured bone that protrudes through the skin), right femur, left tibia (leg bone), right tibia, right forearm per the Admission sheet. The quarterly MDS dated 1/16/14, revealed a Brief Interview of Mental Status (BIMS) score of 15/15 indicated R103 was cognitively intact. A Patient Depression Questionnaire (PHQ9) score of 7, indicating mild depression, R103 required supervision and physical assist of one for bed	F 279

F 279	Continued From page 131 mobility and transfers, dressing and toilet use; required supervision and set up for locomotion on the unit and off the unit; was independent in personal hygiene, ambulating in room and in hallway and eating. CAAs dated 8/9/13, triggered for ADLs, urinary incontinence, psychosocial wellbeing, activities, dental care and pain. All of the areas identified were to be care planned. The care plan dated 8/9/13, was created by the MDS nurse. The care plan only addressed R103's dental needs. The care plan lacked evidence of interventions for urinary incontinence, ADLs, psychosocial wellbeing, and pain. R1 did not have a comprehensive developed since admission. R1 was admitted to the facility on 11/30/13, per the Admission sheet, with diagnoses including Insomnia, chronic pain, arthritis, osteoporosis, depression, chronic obstructive pulmonary disease (COPD), hypertension, cardiovascular disease, neuropathy in diabetes, bladder spasms, gastric esophageal reflux disease, muscle spasms, and diabetes mellitus obtained from the MDS dated 12/6/13. Physician's Orders dated 2/26/14, indicated R1 received the following medications: -Trazodone 300 milligrams (mg) by mouth at bedtime (HS) for insomnia -Effexor 150 mg by mouth daily for depression -Ambien 5 mg by mouth at HS as needed (PRN) for insomnia -Benadryl 25 mg 2 capsules (caps) by mouth every 4 to 6 hours prn for itching -Atarax 25 mg 2 caps by mouth every 6 hours prn for itching	F 279

F 279	Continued From page 133 record were for activities and nutrition. When interviewed on 3/14/14, at 8:14 a.m. the DON stated every resident should have a temporary care plan until the main care plan was developed. She verified R1 lacked a temporary care plan and that the care plan in the record dated 3/13/14, had been developed two days after a concern had been brought to the facility attention. On 3/13/14, at 4:24 p.m. the DON stated the facility was aware assessments and care plans were not done well or at all. DON stated the facility had started to get everyone together to work on the care plans. The DON verified that many of the care plans were not developed properly, or not developed at all, or were overdue. The DON stated, "The process was to print out everyone's care plan, circled and made notes on what doesn't seem right on the care plan. every department was supposed to go back to their department and review. After a portion was done, we realized we needed to narrow our focus to get the work done, so we focused on residents who elope from the facility or smoke first. We re-did a safety assessment, the originals are in the chart, but I have not yet had time to cut and paste into the care plans. yet. Right now we are trying to get them back into the chart. Currently the care plans are kept in the nursing office, so right now none of the nurses on the floor write on care plans, we are attempting to get them back into the charts, so staff can update them." F 280	Continued From page 134 incapacitated under the laws of the State, to participate in planning care and treatment or changes in care and treatment. A comprehensive care plan must be developed within 7 days after the completion of the comprehensive assessment; prepared by an interdisciplinary team, that includes the attending physician, a registered nurse with responsibility for the resident, and other appropriate staff in disciplines as determined by the resident's needs, and, to the extent practicable, the participation of the resident, the resident's family or the resident's legal representative; and periodically reviewed and revised by a team of qualified persons after each assessment. This REQUIREMENT is not met as evidenced by: Based on observation, interview and document review, the facility failed to revise the care plan to implement smoking interventions for 1 of 3 residents (R36) reviewed for unsafe smoking and non-placement of a Wanderguard (an alert system to notify staff when a resident had left the building); and the facility failed to revise the care plan for 1 of 1 resident (R75) who received Hospice services. Findings include: Smoking: R36 was observed to have multiple cigarette burn holes on his clothing on 3/11/14. The facility did not revise the care plan or identify the burn holes in his clothing, nor other smoking safety concerns	F 280	For sampled resident R36 and for all residents the facility shall ensure care plans are updated according to OBRA and MDS timeliness and PRN as care planning needs are identified by facility staff. For sampled residents R36 the clinical record and MDS will be reviewed to ensure all assessments have been completed. IDT shall meet to review and/or revise the comprehensive care plan to ensure the care plan appropriately addresses all of the residents needs including but not necessarily limited to smoking and smoking safety, use of a Wander Guard bracelet, and hospice service. The comprehensive care plans for R36 will be audited monthly to ensure it remains current and up to date or is revised as necessary. The results of these audits will be reported to the QA committee for review and further recommendation as indicated.

F 280	Continued From page 135 related to R36 smoking unsupervised and independently. R36's smoking observations were as follows: - On 3/10/14, at 1:00 p.m. R36 was observed to be smoking unsupervised in the front designated smoking area. R36 was observed to propel his wheelchair (w/c) independently, while smoking. No smoking apron was observed on R36 or in the smoking area. -On 3/11/14, at 11:18 a.m. R36 reported he was assessed for smoking, stated the staff came and watched him light up and watched him smoke. R36 stated the burn hole in his new glove was from a month ago. R36 stated he had never needed a smoking apron or any other smoking interventions. - At 1:27 p.m. R36 was observed to be smoking unsupervised in the front designated smoking area. R36 was observed to propel his w/c independently while smoking with an approximately one inch long cigarette ash. No smoking apron was observed in the area. R36 was observed to have burn holes on his left glove, on the left chest of the coat and the right thigh of R36's pants. R36 stated the burn occurred "one month ago [2/2014]" from "sleeping" with the cigarette in his hand. R36 further stated the gloves were newly purchased and the burn hole on the pants was "old." R36 stated, "I'm getting careless." - On 3/12/14, at 7:45 a.m. R36 was observed to be propelling the w/c to enter the building of the facility from the front designated smoking area while holding a cigarette in his mouth. The cigarette was observed to have an approximate one inch long ash. R36 was observed to notice	F 280	Additionally a random sampling of comprehensive care plans shall be audited monthly to ensure they are current and up to date based on the current assessments and that appropriate revisions are made as indicated. The results of these audits will be reported to the QA committee monthly x 6 months for review and further recommendation as indicated. Responsible: Administrator, DNS, MDS coordinator, RCM, Clinical Liaison Compliance date: 4/28/2014

F 280	Continued From page 137 an inch long ash. R36 was sleeping in the w/c. The director of nursing (DON) was summoned by the surveyor and notified of the observation. DON immediately started a conversation with R36, picked up the smoking apron and folded it. R36 was finished smoking at that time. R36's Admission Record dated 5/26/12, indicated R36 diagnoses included respiratory abnormalities, altered mental status and muscle weakness. A Camden Care Center Smoking Contract dated 5/31/12, was signed by R36's guarantor and read as follows: - "I have received a copy of the Camden Care Center Smoking Policy/Procedure and agree to comply with all the rules set by this policy." - "I understand that smoking is NEVER allowed in resident rooms or anywhere inside the building." - "I understand that smoking is ONLY allowed in designated smoking areas." - "I understand that failure to comply with the Camden Care Center Smoking Policy/procedure may result in a 30 day discharge notice from the facility." The care plan lacked evidence the smoking interventions were ever put into place. R36's Smoking Evaluation dated 5/28/13, was completed by social services. Although the evaluation indicated R36 had a history of unsafe smoking practices, the evaluation lacked explanation as to what those unsafe practices were. The evaluation indicated R36 was cognitively intact, and had no behaviors. Although the evaluation had identified unsafe smoking practices in the past, the evaluation indicated R36 understood the safe storage of smoking	F 280

F 280	Continued From page 138 materials, understood where smoking was allowed, and was deemed an independent smoker. R36's three consecutive Smoking Evaluations dated 8/29/13, 11/17/13, and for 2/18/14, all noted no changes from the Smoking Evaluation on 5/28/13. The unsafe smoking history still remained undetermined and all four assessments indicated R36 was deemed an safe smoker. The Nursing Assessment Packet Review for the reference period of 2/12/ (no year) through 2/18/ (no year) lacked any documentation of the safety risks regarding R36's smoking. A behavior contract was signed on 6/6/13, which indicated R36 would not drink alcohol while residing in the facility and would follow all policies in the facility. The contract specified the smoking policy and identified R36 would "only smoke on the back patio of the facility." The care plan was not revised for the smoking contract as R36 smoked in the front of the building unsupervised. The Camden Care Center Quarterly Care Conference summary for R36 was noted to be written by nursing and dated 9/17/13. The summary indicated R36 was assessed by the licensed nurse and deemed to be an independent smoker, risks versus benefits were explained, and R36 refused a smoking cessation program. However, a care conference summary written by social worker designee indicated, "[R36] requires supervision with smoking; however he does not follow it. [R36] has had difficulty following facility policy for smoking in designated area of back patio of facility, but over the last quarter he has improved greatly." The Camden Care Center Quarterly Care Conference summary dated	F 280

F 280	Continued From page 139 11/26/13, documentation was unchanged from the 9/17/13, care conference note. - During the survey, R36 was never observed to be smoking in the supervised smoking area on the back patio. R36 was always observed to smoke in the designated "unsupervised" smoking area in the front and to the side of the building. It could not be determined if R36 was deemed a safe smoker as the summary from nursing conflicted with the summary from the social worker. R36's most current quarterly Minimum Data Set (MDS) dated 2/18/14, indicated R36 had no behaviors and had a Brief Interview for Mental Status (BIMS) score of 13 which noted R36 was cognitively intact. The MDS also indicated R36 received one person assist with transfers, dressing, hygiene, and R36 used a wheelchair for mobility. The smoking care plan dated 2/18/14, identified R36 as an independent smoker, and indicated R36 would remain safe while smoking and would follow all guidelines regarding smoking. The care plan also identified R36 was directed to smoke only in the designated areas and would not smoke around those with oxygen. The care plan conflicted with the social worker designee's summary dated 2/18/14, which indicated R36 was an unsafe smoker and needed supervision. On 3/12/14, at 3:01 p.m. DON and administrator were interviewed. DON verified she was aware of the burn holes in R36's coat. DON stated she was told in the interdisciplinary team (IDT) "all that stuff is old that's he's got." The administrator stated, "He has new gloves in his closet, glove burn happened one month ago." and verified she	F 280

F 280	Continued From page 140 was informed "the aides know about it." The administrator stated R36 just liked the old coat and stated the new coat was "just put on." The administrator stated R36 was given a discharge notice in June of last year. The administrator verified assessments were not accurate or up to date and stated the facility had started to redo all of the assessments. The administrator indicated the social worker designee (SWD) was not trained on how to do the assessments and no plan had been identified to ensure R36's safety. On 3/13/14, at 2:17 p.m. during an environmental tour the administrator verified the facility had two resident smoking areas. The administrator verified the area in the front of the building to the left of the entrance to the facility was designated as unsupervised. The second resident smoking area was located adjacent to the dining room and designated as the supervised smoking area. Wanderguard: R36's guardian requested a Wanderguard be applied to R36 "to prevent him from leaving the facility." The care plan printed 2/16/14, indicated on 5/27/13, R36's guardian requested a Wanderguard be applied. R36's Wanderguard applied was on 11/28/12. On 6/2/13, the Wanderguard was "cut off" by R36 and he refused it. The care plan still noted the Wanderguard as an intervention and the Wanderguard was "not effective at this time." R36's care plan was not revised to indicate R36 did not have a personal alert system to alert staff	F 280

F 280	Continued From page 141 when he left the building. R75's care plan regarding Hospice and resuscitation status after Hospice was initiated on 5/3/13 was not revised. The care plan reflected neither enrollment in Hospice, nor coordination of Hospice care. The Admission Sheet dated 10/15/11, indicated R75 was admitted to the facility on the same day with diagnoses to include end stage chronic obstructive pulmonary disease (COPD) with 10 to 15 liters of continuous oxygen, chronic pain, and methadone use for history of drug dependence. The Care Area Assessments (CAA) for nutrition dated 5/12/13, indicated R75 had a recent hospitalization for COPD and was currently on Hospice care for end stage COPD. The nursing care plan dated 9/2/13, indicated R75 was a full code and would receive all life sustaining measures in case of medical emergency. The care plan indicated nursing was to implement all life sustaining measures in case of medical emergency. The care plan lacked coordination of Hospice cares that were identified in the CAAs dated 5/12/13. A quarterly Minimum Data Set (MDS) dated 2/17/14, indicated R75 was cognitively intact, mildly depressed, and required an extensive one person physical assist for bed mobility, transfers, dressing, toileting, and personal hygiene. A review of the Physician Orders signed 3/10/14, indicated physician order for R75's advanced directives to be Do Not Resuscitate (DNR), Do	F 280

F 280	Continued From page 142 Not Intubate (DNI) and R75 was enrolled as a Hospice care patient. On 3/13/14, at 4:24 p.m. the director of nursing (DON) verified the care plan for R75 was not revised to include the change in R75's advanced directives, Hospice enrollment and coordination of R75's Hospice care. The policy for care planning was requested and not provided.	F 280		
F 282 SS=D	483.20(k)(3)(ii) SERVICES BY QUALIFIED PERSONS/PER CARE PLAN The services provided or arranged by the facility must be provided by qualified persons in accordance with each resident's written plan of care. This REQUIREMENT is not met as evidenced by: Based on observation, interview and document review, the facility failed to monitor for target behaviors for the use of Zyprexa as directed by the care plan for 1 of 1 resident (R89); the facility failed to ensure self-administered medications were safely administered for 1 of 1 resident (R36) observed to self-administer medications (SAM); the facility failed to ensure 1 of 3 residents (R41) who did not receive medications as care planned for six days; the facility failed to ensure 1 of 3 residents (R64) was not provided assistance with repositioning, transfers and nail care as directed by the care plan. Findings include:	F 282	F 282 For sampled residents R89, 36, 41, 64 and for all residents the comprehensive care plan will be followed as initiated, reviewed, and/or revised by the IDT. For sampled resident R89 and for all residents with target behaviors, the target behaviors will be tracked as outlined in the comprehensive care plan. All care plans for residents with target behaviors will be reviewed/audited by the appropriate IDT member for appropriate target behavior identification and comprehensive care plan interventions. Updates and/or changes will be made based on current evaluation of the effectiveness of the interventions.

F 282	Continued From page 143 R89 was not monitored for target behaviors as directed by the care plan. R89's care plan for psychotropic medications dated as revised on 1/5/14, identified R89 used Zyprexa related to "potential injury to self or others, dementia and agitation, pick [sic] disease." The care plan directed to administer the medication as ordered, monitor/document for side effects and effectiveness. The care plan directed to "discuss with MD [physician], family re [regarding] ongoing need for use of medication," directed to educate on risks and benefits of using Zyprexa, "Monitor/record occurrence of for target behavior such as agitation, inappropriate response to verbal communication, and document per facility protocol." The care plan lacked appropriate identification of a target behavior which warranted the use of an antipsychotic, such as hallucinations. Although the care plan directed to monitor for a target behavior, the care plan lacked indications for the ongoing use of Zyprexa. Review of the clinical record indicated R89 was not monitored for target behaviors. On 3/13/14, at 2:24 p.m. the licensed practical nurse (LPN)-D verified there was no target behavior monitoring for Zyprexa and stated there "should be." LPN-D was unclear on what target behaviors to monitor for R89. On 3/14/14, at approximately 9:40 a.m. the geriatric nurse practitioner (GNP) stated she would expect the facility to monitor for efficacy of the medication and be looking for things like increased somnolence, decreased delusions. When asked if she directed the facility to monitor	F 282	Additionally, the facility has a policy titled, "C.A.R.E. Team Meeting: Clinical At Risk Resident Evaluation Team Meeting." This policy was effective 05/2012 and reviewed 05/2013. It outlines weekly meetings that are to be held to review specific residents at risk. Behavior Management is an area of clinical risk. These meetings are now initiated again at the facility and once every month residents with targeted behaviors are reviewed by the IDT. During this meeting target behaviors are reviewed, interventions evaluated for effectiveness, and care plans are reviewed and revised/updated. A log will be kept from each CARE meeting related to behavior management. This log will be presented to the QA committee for review and further recommendation as indicated. This will be an ongoing audit and QA review process. For sampled resident R36, the IDT will review the self-administration of medication assessment to ensure it is current and accurate. The IDT will review and revise as appropriate

F 282	Continued From page 144 for behaviors or gave suggestions of target behaviors, GNP stated she did not direct monitoring for target behaviors because "they were usually identified on behavior sheets." On 3/14/14, at 10:51 a.m. the director of nursing (DON) verified target behaviors should have been monitored as directed by the care plan. SAM: On 3/11/14, at 9:36 a.m. during a random observation R36 showed surveyor he was holding his vitamin and potassium tablets (supplement replacements) in his hand. Upon looking, four and a half (4 1/2) tablets were observed in his left hand. When interviewed on 3/11/14, at 9:39 a.m. trained medication aide (TMA)-C stated R36 took the big ones back to his room to take with pop but the Lasix (medication used to treat excessive fluid accumulation and swelling of the body caused by heart failure) and Methadone (a narcotic pain medication) he took them in front of her. The care plan dated 6/14/12, indicated R36 had declined to self-medicate. The care plan directed "Nursing to store, administer and document all medications daily as ordered." in addition the care plan directed a self-medication assessment to be completed per facility policy. The care plan was not followed for R36's SAM. Physician's Orders dated 3/5/14, did not identify if R36 could SAM which included oral medications after set-up. The undated Assessment For Self-Administration Of Medications indicated R36 did not wish to self-administer medications and would not be set up with medications in envelop with designated dispensing times if he went on	F 282	the comprehensive care plan related to the self-administration of medication and ensure the care plan is implemented. The Resident Care Manager(s) or DON will do a monthly audit x6 of residents who self-administer medication to ensure the assessments are present and accurate and that the care plan is current and being followed. The results of this audit will be reviewed by the facility administrator and then presented to the QA committee for review and further recommendation as indicated. For sampled resident R64, the resident MDS section related to ADLs and mobility will be reviewed to ensure it is accurate. The IDT will review the MDS and make appropriate referrals to PT/OT as indicated to improve mobility. The IDT will formulate a comprehensive care plan and ensure that it is implemented. For all residents with mobility issues, the care plans will be audited to ensure they reflect an accurate assessment. Referrals to PT/OT will be made if appropriate to improve ADL function. The IDT will formulate a comprehensive care plan and ensure that it is implemented.

F 282	Continued From page 145 leave of absence. In addition, the Nursing Assessment Packet Review Quarterly reference period 2/12/ (no year), through 2/18/ (no year), under Self Administration of Medications had indicated "no" changes to SAM assessment. When interviewed on 3/14/14, 3:32 p.m. LPN-A stated she would expect a resident to have an assessment, a physician's order and an updated care plan if the resident had been determined to be able to self-administer medications. On 3/18/14, at 8:25 a.m. the DON stated she expected staff to stay and watch all residents take their pills if they did not have an order to SAM after set up. DON further stated if residents were considered to be appropriate to SAM that would be addressed in the care plan and an assessment would have been completed by the interdisciplinary team to reflect it all in the order which would be listed below the medication in the Medication Administration record (MAR). On 3/18/14, at 2:30 p.m. the policy was requested but was not provided. The facility failed to ensure R41 received medications as care planned for six days. The current physician orders, dated 2/4/14, directed staff to administer "Morphine Sulfate ER Tablet [Extended Release] 30MG [milligrams] Give 30MG orally at bedtime for pain give at HS only" R41's pain care plan, dated 2/17/14, informed staff "Pain: has chronic pain r/t [related to] osteoarthroses, peripheral neuropathy, Chronic	F 282	The Resident Care Manager(s) or DON will do a monthly audit x6 of residents who have mobility issues to ensure the assessments are present and accurate and that the care plan is current and being followed. The results of this audit will be reviewed by the facility administrator and then presented to the QA committee for review and further recommendation as indicated. For sampled resident R41 the care plan will be reviewed related to the administration of medications. The IDT will ensure that appropriate diagnoses exist for all prescribed medications. The IDT will ensure the care plan is initiated relative to these medication interventions. The Resident Care Manager(s) or DON will do a monthly audit x6 of residents who have medications identified in the care plan to ensure the medication regimen is still ordered and that the care plan is current and being followed. The results of this audit will be reviewed by the facility administrator and then presented to the QA committee for review and further recommendation as indicated. F 282	Continued From page 148 sheet, dated 1/14/14, included senile dementia uncomplicated, diabetes, essential hypertension, senility without mention of psychosis, muscle weakness generalized and difficulty in walking. R64 was admitted on 1/5/10. Nailcare: On 3/12/14, at 7:52 a.m. R64 was noted to have approximately ½ inch long fingernails on both hands. On 3/13/14, at 7:56 a.m. nursing assistant (NA)-D was completing a.m. cares on R64. - At 8:23 a.m. NA-D stated he would tell the nurse if a resident had long nails and the resident was diabetic. He said R64 was diabetic. - At 8:31 a.m. R64 was wheeled out into the hallway and taken to the dining room for breakfast. - At 9:11 a.m. LPN-A said that diabetic resident nails should be trimmed on bath days. LPN-A said R64's bath was yesterday and nurses should be checking R64's fingernails on the bath day. - At 9:18 a.m. LPN-B viewed R64's fingernails. LPN-B said they were "very long." When surveyor staff asked about the procedure for cutting R64's nails, LPN-B replied "Well, the daughter is here every day, I don't know if she didn't see that or what." Surveyor staff asked to clarify if it would be the daughter's responsibility to cut R64's nails, LPN-B replied "Like I said she is here every day." R64 was not provided with assistance to complete grooming (trimming of fingernails) as directed by the care plan. An observation of a.m. cares on 3/14/14, at 7:22 a.m. revealed LPN-A told NA-D he needed to cut R64's nails today, R64 was "not diabetic." R64 was noted to be cooperative throughout that	F 282

F 282	Continued From page 150 NA-B and NA-C said R64 was unsafe in anything else but the EZ-stand. - At 11:10 a.m. NA-B and NA-C obtained LPN-B to assist. LPN-B came to the room, placed R64's hands on the handles, and covered R64's left hand with his hand to maintain placement. NA-B and NA-C began to stand R64 and R64 began to slide out of the EZ stand harness, surveyor staff intervened and asked NA-B and NA-C to place the wheelchair underneath R64 to prevent them falling onto the floor. The belt of the EZ-stand sling was noted to be very loose around R64's waist. - At 11:17 a.m. NA-B and NA-C stated they used the resident group lists for special information about residents, however neither NA staff member had the group list on their person at this time. NA-B and NA-C were unable to state R64 could use a Hoyer lift for transfers if they were resistive, as directed by the care plan. - At 1:25 p.m. NA-A and NA-D were attempting to transfer R64 into bed from the wheelchair using the standing lift. NA-D began to lift the resident, and surveyor staff intervened to tell NA-A and NA-D the resident was not hooked to the lift on one side. Additionally, R64 was not holding onto the lift handles at first, and began to hang onto the lift frame and not the handles. NA-A and NA-D completed the remainder of the transfer with the EZ-stand. NA-D said the usual practice was to lie R64 down after lunch, the usual practice was not to reposition R64 every two hours, as the care plan directed. NA-D did not follow the care plan for safe transfers. The plan of care dated 11/14/11, indicated R41 was at risk for falls and needed assist with transfers. The interventions directed the staff to follow the falls/safety policy and protoclol.	F 282

F 283	Continued From page 152 R100) reviewed for closed records. Findings include: During the stage one closed record review the discharged resident records did not contain a recapitulation of the residents' stay, or summary of resident cares and treatments while in the facility. Discharges occurred between 10/31/14, through 2/14/14, were as follows: R78 was admitted to the facility 11/26/13, and discharged to the community 12/20/13. R32 was admitted to the facility 10/30/13, and discharged to the community 11/18/13. R107 was admitted to the facility 10/17/13, and discharged to the community 1/17/14. R42 was admitted to the facility 9/26/13, and discharged to the community 10/15/13. R108 was admitted to the facility 10/30/13, and discharged to the community 11/13/13. R48 was admitted to the facility 11/4/13, and discharged to the community 11/26/13. R109 was admitted to the facility 10/31/13, and discharged to the community 11/22/13. R114 was admitted to the facility 12/27/13, and discharged undocumented 1/31/14. R82 was admitted to the facility 11/08/13, and had a quarterly review on 2/13/14, eloped on 3/10/14, returned on 3/13/14, collapsed and was taken to acute care hospital. Discharges and readmissions were not reflected in the Minimum Data Set (MDS) entry/discharge records. R110 was admitted to the facility 11/15/13, and discharged to the community 12/30/13. R79 was admitted to the facility 1/23/14, and discharged to the community 2/14/14	F 283	The facility has a policy titled, "Transfer Discharge" that was effective 05/2012, reviewed 05/2013, and is now revised as of 04/2014. The revision clearly directs that a transfer/discharge recapitulation (discharge summary) shall be completed by the IDT with anticipated and/or unanticipated discharges timely. This revised policy is available to the facility on the facilities remote desktop. Additionally, the facility has a policy titled, "Nursing Documentation" that was effective 05/2012 and reviewed on 05/2013. This policy has direction to refer to AHIMA as an authoritative resource for all aspects of documentation in the long term care setting. All clinical records for anticipated and/or unanticipated discharges shall be audited by the Resident Care Manager and/or DON for completeness. This audit is completed weekly on all discharges for the previous week. The results of this audit are reviewed by the administrator. The audit results are reported to the QA committee for review and further recommendation as appropriate. These audits will be ongoing.

F 312	Continued From page 157 This REQUIREMENT is not met as evidenced by: Based on observation, interview and document review, the facility failed to provide assistance with nail care for 1 of 3 residents (R64) in the sample who was dependent on staff for grooming. Findings include: On 3/12/14, at 7:52 a.m. R64 was noted to have approximately ½ inch long fingernails on both hands. An observation of a.m. cares on 3/14/14, at 7:22 a.m. revealed licensed practical nurse (LPN)-A told nursing assistant (NA)-D he needed to cut R64's nails today, R64 was "not diabetic." R64 was noted to be cooperative throughout that episode of care and began to verbalize a little with staff towards the end of the observation. An observation on 3/14/14, at 3:19 p.m. (at the end of NA-D's shift) revealed R64 had not yet been assisted with nail care and R64's fingernails were still untrimmed. R64's care plan, dated 11/14/11, revealed R64 had a self-care performance deficit and required extensive assistance of one for grooming. R64's current diagnoses according to the face sheet, with a revised date of 1/14/14, included senile dementia uncomplicated, diabetes, essential hypertension, senility without mention of psychosis, muscle weakness generalized and difficulty in walking. R64 was admitted on 1/5/10.	F 312	The facility has a policy titled, "Activities of Daily Living." This policy was effective 05/2012 and was reviewed 05/2013. The policy does address hygiene but has now been revised to specifically address nail care and nail care for the diabetic resident. For sampled resident R61, finger nail hygiene and length will be assessed during scheduled baths. Since the resident is diabetic the finger nails will be filed rather than clipped. The comprehensive care plan for sampled resident R61 will be reviewed to ensure it contacts accurate direction related to the level of ADL assist required for nail care and all ADL areas. The assessed level of assist required for ADLs will be reviewed at least quarterly based on the MDS schedule. Additionally the comprehensive care plan will be reviewed and revised as indicated on this same time line. At the discretion of the clinical staff additional assessments related to ADL assist will be carried out based on clinical judgment and/or change in medical condition. Comprehensive care plans will be reviewed and revised based on these discretionary assessments.

F 314	Continued From page 161 the scrotum. There were no documentation notes that the open areas had been reported to a physician or family. In addition, the chart lacked assessment documentation to define risk factors for development of pressure ulcers and the rationale for the current repositioning schedule. The facility nursing assistant (NA) worksheet for the south hallway, undated, indicated R64 should be checked and changed every two hours and PRN (as needed). Additionally, the worksheet indicated R64 was an EZ-stand with assistance of two staff, OK to use Hoyer lift if resistive; wheelchair, non-ambulatory. On 3/13/14, at 7:56 a.m. R64 was observed to have been assisted with cares by nursing assistant (NA)-D. The surveyor observed two open areas on the bottom of R64's scrotum. NA-D stated during the observation that he had told the nurse about the openings. After the surveyor inquired about the open areas, NA-D applied Remedy Calazime (a type of antifungal barrier cream) to the sites. NA-D applied a clean incontinent brief. NA-D proceeded to dress R64's lower extremities and left the room briefly to obtain assistance to transfer R64 into their wheelchair. On 3/13/14 at 8:19 a.m., R64 was observed to be assisted by NA-D and NA-B into their wheelchair, which was observed to have a thin cloth covering over a mesh-webbing type seat. NA-D and NA-B used a standing lift to complete the transfer. No pressure redistribution cushion was present in R64's wheelchair. Continuous observations of the resident from the time of the transfer into their wheelchair at 8:19 a.m. through 11:00 a.m. on 3/13/14, revealed that R64 was not	F 314	Responsible: Administrator, DON, RCM, IDT Compliance date: 4/28/2014

F 314	Continued From page 162 repositioned by facility staff. During interview with licensed practical nurse (LPN)-D on 3/13/14, at 8:55 a.m., LPN-D reported that any skin conditions should be documented on the wound flow sheets and stated LPN-A had those documents. At 9:11 a.m. LPN-A was interviewed and stated that R64's bath was scheduled yesterday and that there should have been a skin audit done. At that time, LPN-A began flipping through a three-ring binder with the skin audit sheets, and commented to LPN-D (also present) that she needed to complete her documentation on the skin conditions. Several skin audit sheets were observed with LPN-D's signature but no documentation of the skin condition was recorded on the forms. A skin audit sheet dated 3/14/14 by LPN-C, (LPN-A stated this should have been dated 3/12/14), indicated R64's skin to the coccyx and perineum was intact. LPN-A said any areas other than pressure ulcers would be documented in the progress notes on the electronic chart. On 3/13/14, at 11:00 a.m. LPN-B was observed to ask two nursing assistants, NA-C and NA-B, to reposition R64. At 11:05 a.m., two hours and 46 minutes after R64 had last been transferred into his chair, NA-C and NA-B attempted to assist R64 into bed utilizing the standing lift. R64 was unable to hold onto the lift handles and pulled his hands away from the lift. LPN-B entered the room and attempted to assist, however staff were unsuccessful as R64 could not hang onto the standing lift handles. R64 remained in the wheelchair. During an additional observation, at 1:25 p.m. on 3/13/14 NA-A and NA-D again attempted to	F 314

F 314	Continued From page 163 transfer R64 into bed using the standing lift. R64 initially had difficulty holding onto the lift handles and then began to hold onto the lift frame long enough for R64 to be moved from the wheelchair into bed. R64 was noted to have two open areas on the scrotum. NA-D told the surveyor he had seen the open areas and informed a nurse of the areas, stating this had happened a week ago. NA-D further said the usual facility practice was not to reposition R64 every two hours, but that R64 was usually laid down after lunch. At 1:32 p.m., the surveyor informed LPN-D of the open areas on R64's scrotum. LPN-D went with the surveyor to observe the areas, and said she thought they were from incontinence of bladder. Two distinct irregularly shaped, elongated open areas with a pinkish-red wound base were observed. There was a superficial loss of skin over the areas. On 3/14/14, at 7:22 a.m. licensed practical nurse (LPN)-A was observed to measure the open areas on R64's scrotum. LPN-A identified them as a single 4 centimeter (cm) x 2 cm superficial area, LPN-A said they were two areas that looked like they had merged into one large area. LPN-A felt they were related to incontinence or potentially from sitting on the area and getting pinched. LPN-A was observed to apply Remedy Calazime (a type of antifungal barrier ointment) around the open areas. A skin audit sheet documented by LPN-C dated 3/14/14, (which LPN-A indicated should have been dated 3/12/14), indicated R64's skin on the coccyx and perineum was intact. LPN-A said any areas other than pressure ulcers would be documented in the progress notes on the electronic chart. Review of R64's progress note documentation identified a lack of wound documentation or any progress	F 314

F 314	Continued From page 164 notes indicating the presence of open areas on the scrotum. A progress note entered by LPN-A dated 3/14/14, at 8:06 a.m. revealed R64's hospice agency had been informed of the open areas to R64's scrotum to inquire into treatment. Nursing progress notes by LPN-D dated 3/14/14, at 8:47 a.m. revealed an order was received for a physical therapy evaluation and treatment for proper transfers and a topical cream for R64's open areas. On 3/14/14, at 10:34 a.m. the director of nursing (DON) observed R64's open areas with the surveyor. The DON stated the open areas appeared to be pressure related, and might be aggravated by incontinence. The DON stated she would classify the sites as two separate stage II pressure ulcers (a type of pressure ulcer characterized by partial thickness loss of dermis presenting as a shallow open ulcer with a red pink wound bed, without slough - may also present as an intact or open/ruptured serum-filled or serosanguineous filled blister). The DON stated the measurement of the first area was 2.5 cm x 1 cm with clearly defined borders that were irregular in shape. The second area had measurements of 1.5 cm x 2.4 cm. The wound bases were noted to be whitish in color, a change from the previous observation that morning. Hospice LPN-F was also present at that time and concurred with the DON's impression. LPN-F confirmed that R64's brief was soiled with urine, and registered nurse (RN)-D who was also in the room, stated the resident had not been repositioned since before breakfast. RN-D confirmed that R64 typically does not lie down until after lunch and stayed in the wheelchair until	F 314

F 314	Continued From page 165 then. The DON asked hospice LPN-F about the resident's wheelchair cushion, indicating it felt "pretty firm." LPN-F said she thought the chair was pressure redistributing, but would check on the literature from the manufacturer. The DON said R64 needed to be repositioned at a minimum now of hourly and new assessments needed to be started. The hospice agency medical supplier's information on the wheelchair, entitled Benefits of the "Judy" Chair, undated, indicated the wheelchair provided superior pressure mapping to that of similar wheelchairs, however did not specify the seat of the chair in and of itself constituted a pressure redistribution device. The facility policy entitled Skin Integrity Management, dated 5/12, directed skin integrity risk assessments should be completed on admission and at least quarterly. The policy further directed that the director of nursing services (DNS) was responsible to ensure a valid skin at risk tool is used (Braden Scale or Norton Plus Pressure Scale is required). The policy further identified the goal of any skin integrity process is to provide safe and effective care to prevent and/or treat pressure sores or skin issues, maintain function and improve quality of life. F 319	Continued From page 166 This REQUIREMENT is not met as evidenced by: Based on observation, interview and document review, the facility did not ensure treatment and services were provided to aid in healthy adjustment to living in the facility for 1 of 1 resident (R91) identified as having concerns related to mood and aggressive behavior. Findings include: On 3/13/14, at 9:00 through 9:47 a.m. R91 was observed resting in bed with covers on her. R91 was being delivered supplemental oxygen to her through a nasal cannula. R91 nodded off during conversation with surveyor and did not respond to some questions. R91 flinched her shoulders twice and reported she had a lot of pain in her knees. R91 reported she was very depressed from living at the facility and wanted to go home. R91 explained she felt no one cared for her at the facility because, even though she was sick and in pain, no one came to check on her. R91 explained she had been prescribed antibiotics and pain medications by a physician yesterday but she did not take them because she did not trust the physician knew her well enough to prescribe meds to her. R91 recounted how she was upset because a staff member lied to her yesterday about canceling a ride to the store for her. R91 reported it made her "angry" and "rude" when staff lied to her. R91 reported she planned on spending the rest of the day resting in bed and did not think any staff would assist her with any cares today. R91's admission Minimum Data Set (MDS), dated	F 319	The facility has a policy titled, "Behavior Management" that was effective 05/2012 and was reviewed 05/2013. Additionally the facility has a policy titled, "CARE Team Meeting" that was effective 05/2012 and reviewed 05/2013. Both of these policies will be made operational at the facility. Behavior Management is an area of clinical risk. These meetings are now initiated again at the facility and once every month residents with targeted behaviors, such as depression and aggressive behaviors, are reviewed by the IDT. During this meeting target behaviors are reviewed, comprehensive care plan interventions evaluated for effectiveness, and care plans are reviewed and revised/updated. A log will be kept from each CARE meeting related to behavior management. This log will be presented to the QA committee for review and further recommendation as indicated. This will be an ongoing audit and QA review process.

F 319	Continued From page 167 10/15/13, indicated the potential for moderate depression due to self-reported symptoms of little interest or pleasure in doing things, feeling down depressed or hopeless, trouble falling asleep or sleeping too much, feeling tired or having little energy and poor appetite or overeating. The MDS revealed R91 displayed verbal and physical aggression one to three days during the seven day observation period. R91's quarterly MDS, dated 1/9/14, indicated a potential for mild depression, with R91 reporting the same symptoms in addition to moving or speaking slow or being fidgety. The MDS noted verbal and physical aggression towards others occurred four to six days during the seven day observation period. Both the 10/15/13 and 1/9/14, MDS indicated R91 rejected evaluation or care on one to three days during the seven day observation period. R91's Brief Interview for Mental Status (BIMS) on her admission and quarterly MDS dated 10/15/13 and 1/9/14 indicated she was cognitively intact. R91's Care Area Assessments, dated 10/22/13, for Mood, Cognitive Loss/Dementia, Behavior, and Psychosocial Well Being included the same summary statement under the Care Plan Considerations section: "Resident has some behavior r/t [related] medical Dx [diagnosis]. Staff will monitor her behavior and ensure pt [patient] needs are met and she is safe." The sections for input from resident and family or representatives for resident were all left blank; despite R91's BIMS score indicating she was cognitively intact. Each care area assessment noted a referral to another discipline in the health care team (such as social services, medical or mental health professionals) was not necessary. The	F 319	For sampled resident R91, a thorough and complete behavior management assessment shall be completed. Additionally, a thorough and complete Social Services assessment shall be completed. Based on these assessments, the IDT shall develop a comprehensive care plan related to behavior management and the resident's ability to make a healthy adjustment to living in a facility. Additional behavior management assessments for sampled resident R91 will be done at least quarterly based on MDS schedule or more frequently at the discretion of the clinical staff based on clinical judgment and/or change in medical condition. The Resident Care Manager(s) or DON will do a monthly audit x6 of residents with behavior management issues to ensure the assessments are present and accurate and that the care plan is current and being followed. The results of this audit will be reviewed by the facility administrator and then presented to the QA committee for review and further recommendation as indicated.

F 319	Continued From page 168 assessment did not include a thorough analysis including: specific behaviors exhibited by R91, what medical or mental health concerns would impact care, triggers to behaviors, events immediately prior to behavior, consequences of behavior or tactics known to decrease or minimize behavior. R91's current care plan, last reviewed 1/30/14, did not include problems, goals or interventions related to R91's mood, rejection of evaluation or care and verbal and physical aggression. On 3/14/14, at 2:14 p.m. the social service designee (SSD) reported the care area assessments for R91 were completed prior to her employment at the facility. SSD reported the care area assessments were not comprehensive, did not identify what behaviors were occurring, causative factors or how best to help. SSD reported she was not aware R91 exhibited verbal and physical aggression or rejection of cares. Surveyor requested any other documentation of behavior or mood assessments, not included in the care area assessments. None was provided. SSD confirmed R91's care plan did not address her aggressive behaviors or rejection of evaluation or care. On 3/14/14, at 3:53 p.m. R91's nursing assistant (NA)-G reported R91 rejected cares because she valued her privacy and wanted to do as much as she could herself. NA-G reported R91 at times cussed at staff, called them unkind names or threatened to get them fired. NA-G reported R91 has said unkind statements to her roommates. NA-G explained R91 could be intrusive to her roommate's privacy during cares because she thought her roommate was her daughter. NA-G	F 319	Social Services shall conduct a monthly audit X6 of residents with behavior management issues to ensure they are making a healthy adjustment to facility living. The results of this audit will be reviewed by the facility administrator and then presented to the QA committee for review and further recommendation as indicated. F 323	Continued From page 170 for transfers) for 1 of 2 residents (R64) in the sample. This practice resulted in an IJ which was identified on 3/13/14, and the administrator and DON were notified of this IJ on 3/13/14, at 1:50 p.m. Although the IJ was removed on 3/16/14, at 12:17 p.m. non-compliance remained at the lower scope and severity (s/s) of an E. Findings include: R36 was observed with multiple cigarette burn holes on his clothing on 3/11/14. The facility did not identify that or other safety concerns related to the resident independently smoking unsupervised. R36 was observed to smoke unsafely on 3/11/14, 3/12/14, and on 3/13/14. R36's smoking observations were as follows: On 3/10/14, at 1:00 p.m. R36 was observed to be smoking unsupervised in the front designated smoking area. R36 was observed to propel his wheelchair (w/c) independently, while smoking. No smoking apron was observed on R36 or in the smoking area. On 3/11/14, at 11:18 a.m. R36 was interviewed and he reported he had been assessed for smoking. He stated the staff came and watched him light up and watched him smoke. R36 stated the burn hole in his new glove was from a month ago. R36 stated he had never needed a smoking apron or any other smoking interventions. On 3/11/14 at 1:27 p.m. R36 was observed to be smoking unsupervised in the front designated smoking area. R36 was observed to propel his w/c independently while smoking with an approximately one inch long cigarette ash. No smoking apron was observed in the area. R36	F 323	Members of the Interdisciplinary team (IDT) provided additional staff training on the new smoking monitor to staff 3/14/2014. Staff that were not present for this training will not assume any smoking monitor responsibilities until documented training is provided by a member of the IDT. The IDT members include the Administrator, DON, Care Managers, Director of Dietary, MDS Coordinator, Social Worker, or corporate staff. The IDT reviewed smoking assessments and related care plans for all residents by 3/15/2014. Inaccurate or incomplete assessments and documentation were completed or revised, then reviewed by the IDT by 3/15/2014. Care plans were updated accordingly by 3/15/2014. Updated information regarding smokers has been made available to staff, including the smoking monitor.

F 323	Continued From page 172 smoking area with a smoking apron on. R36 was observed to have papers in his hand. At 9:50 a.m. R36 was overheard by the surveyor to inform another resident the facility had given him [R36] a copy of the smoking policy. At 9:54 a.m. R36 was observed to remove the smoking apron, threw it to the ground while stating "F###!" loudly. R36 immediately lit a cigarette. At 10:04 a.m. R36 picked up the smoking apron and wheeled back into the building. In a loud voice R36 stated, "Here! I'm going to give that to you [and threw the smoking apron on the reception desk]." R36 then stated, "I cannot safely roll with that on." On 3/13/14, at 3:35 p.m. R36 was observed to be in the front designated smoking area without the smoking apron on and was unsupervised. The smoking apron was lying next to R36. R36 had a lit cigarette with an inch long ash. R36 was sleeping in the w/c. The DON was summoned by the surveyor and notified of the observation. The DON immediately started a conversation with R36, picked up the smoking apron and folded it. R36 finished smoking at that time. R36's record was reviewed. The Admission Record dated 5/26/12, indicated R36's diagnoses included respiratory abnormalities, altered mental status and muscle weakness. A Camden Care Center Smoking Contract dated 5/31/12, was signed by R36's guarantor and included: - "I have received a copy of the Camden Care Center Smoking Policy/Procedure and agree to comply with all the rules set by this policy." - "I understand that smoking is NEVER allowed in resident rooms or anywhere inside the building." - "I understand that smoking is ONLY allowed in	F 323	**EZ Stand** As of 3/13/14 there were four residents, Which include resident AB, on the resident EZ Stand list. All four residents were reassessed on 3/14/14 by an RN and Occupational Therapist. Two residents assessments changed to a Hoyer Lift and two residents, AB is one of them, remained with the need for the EZ Stand. Care plans were updated by the RN on the four residents and RN communicated the change to the nurse overseeing the resident's direct care. Staff training on the EZ Stand was complete on 3/15/14 by physical and occupational therapists. Resident assessment auditing will be completed monthly x 12 and random staff competence of EZ Stand use will be completed by the DON weekly x 12. It is the responsibility of the DON to ensure that the EZ Stand use by staff is safe for residents. All notes on the EZ Stand random checks by the DON will be reviewed during quarterly QA meetings.

F 323	Continued From page 173 designated smoking areas." - "I understand that failure to comply with the Camden Care Center Smoking Policy/procedure may result in a 30 day discharge notice from the facility." The care plan lacked evidence the smoking interventions were ever put into place. R36's Smoking Evaluation dated 5/28/13, was completed by social services. Although the evaluation indicated R36 had a history of unsafe smoking practices, the evaluation lacked explanation as to what those unsafe practices were. The evaluation indicated R36 was cognitively intact, and had no behaviors. Although the evaluation had identified unsafe smoking practices in the past, the evaluation indicated R36 understood the safe storage of smoking materials, understood where smoking was allowed, and was deemed an independent smoker. R36's three consecutive Smoking Evaluations dated 8/29/13, 11/17/13, and for 2/18/14, all noted no changes from the Smoking Evaluation on 5/28/13. The unsafe smoking history still remained undetermined and all four assessments indicated R36 was deemed an safe smoker. The Nursing Assessment Packet Review for the reference period of 2/12/ (no year) through 2/18/ (no year) lacked any documentation of the safety risks regarding R36's smoking. The care plan dated 2/16/14, indicated on 5/27/13, R36's guardian requested a WanderGuard (departure from facility alert system) be applied to R36 "to prevent him from leaving the facility" and alerting staff R36 went out of the building, to smoke. The care plan indicated	F 323

F 323	Continued From page 174 R36 had a WanderGuard applied on 11/28/12, then on 6/2/13, the care plan indicated R36 refused the WanderGuard and it had been "cut off " by R36. The care plan still indicated the WanderGuard as an intervention and further indicated the WanderGuard was "not effective at this time." A behavior contract had been signed by R36 on 6/6/13, which indicated R36 would not drink alcohol while residing in the facility and would follow all policies in the facility. The contract specified the smoking policy and identified R36 would "only smoke on the back patio of the facility." The care plan was not revised for the smoking contract as R36 smoked in the front of the building unsupervised. Record review indicated that on 6/18/13, a letter had been presented by the facility to R36 to notify R36 he would be discharged in 30 days effective 6/18/13, for non-compliance with the facility's smoking policy, for non-compliance with the facility's (alcohol) drinking policy and non-compliance with other facility policies. However, the medical record lacked any evidence of why the facility had not discharged R36. Nursing notes documented on the Camden Care Center Quarterly Care Conference summary for R36 dated 9/17/13, indicated R36 had been assessed by the licensed nurse and deemed to be an independent smoker, risks versus benefits had been explained, and R36 had refused a smoking cessation program. The care conference summary written by the social worker designee on 11/26/13, indicated, "[R36] requires supervision with smoking; however he does not follow it. [R36] has had difficulty following facility	F 323

F 323	Continued From page 175 policy for smoking in designated area of back patio of facility, but over the last quarter he has improved greatly." During the survey, R36 was never observed to be smoking in the supervised smoking area on the back patio. R36 was always observed to smoke in the designated "unsupervised" smoking area in the front and to the side of the building. It could not be determined if R36 was deemed a safe smoker as the summary from nursing conflicted with the summary from the social worker. R36's most current quarterly Minimum Data Set (MDS) dated 2/18/14, indicated R36 had no behaviors and had a Brief Interview for Mental Status (BIMS) score of 13 which noted R36 was cognitively intact. The MDS also indicated R36 received one person assist with transfers, dressing, hygiene, and R36 used a wheelchair for mobility. R36's smoking care plan dated 2/18/14, identified R36 as an independent smoker, and indicated R36 would remain safe while smoking and would follow all guidelines regarding smoking. The care plan also indicated R36 was directed to smoke only in the designated areas and would not smoke around those with oxygen. The care plan conflicted with the social worker designee's most current summary dated 2/18/14, which indicated R36 was an unsafe smoker and needed supervision. The Physician's Order sheet signed by the geriatric nurse practitioner dated 3/5/14, indicated R36 received the following medications: -Methadone 10 milligrams (mg) twice a day (BID) for vascular pain. The package insert from Lake	F 323

F 323	Continued From page 176 Erie Medical DBA Quality Care Products dated 10/2013, noted, "Patients receiving other opioid analgesics, general anesthetics, phenothiazines, other tranquilizers, sedatives, hypnotics or other CNS [central nervous system] depressants (including alcohol) concomitantly with methadone may experience respiratory depression, hypotension, profound sedation, or coma." -Zolpidem (Ambien) 10 mg daily at bedtime insomnia. The package insert from "ECR Pharmaceuticals" last revised 5/7/13 noted, "Zolpimist [Zolpidem], like other sedative-hypnotic drugs, has central nervous system (CNS) depressant effects. Co-administration with other CNS depressants (e.g., benzodiazepines, opioids, tricyclic antidepressants, alcohol) increases the risk of CNS depression." -Oxycodone 10 mg three times a day (TID) for pain. The package insert from St. Mary's Medical Park Pharmacy last revised 1/10/13 noted, "CNS Depressants: Patients receiving narcotic analgesics, general anesthetics, phenothiazines, other tranquilizers, sedative-hypnotics or other CNS depressants (including alcohol) concomitantly with oxycodone hydrochloride tablets may exhibit an additive CNS depression. Interactive effects resulting in respiratory depression, hypotension, profound sedation, or coma may result if these drugs are taken in combination with the usual dosage of oxycodone hydrochloride tablets." R36's medical record lacked evidence of an assessment in regards to R36's medications as a safety risk for R36's unsafe smoking, as R36 was observed to be sleeping (dozing) while smoking on 3/12/14, at 1:58 p.m. On 3/12/14, at 2:35 p.m. the laundry supervisor	F 323

F 323	Continued From page 177 was interviewed and stated she had "noticed a couple [burn holes] and tried to get rid of them [clothing that had burn holes] last year." The laundry supervisor stated they let facility staff know about the burn holes, but "they are already aware of it." When the surveyor clarified who "They" were, the laundry supervisor stated "the nursing department and the aides." On 3/12/14, at 3:01 p.m. the DON and administrator were interviewed. The DON verified she was aware of the burn holes in R36's coat. The DON stated she was told in the interdisciplinary team (IDT) "all that stuff is old that's he's got." The administrator stated, "He has new gloves in his closet, glove burn happened one month ago." The administrator also verified she had been informed "the aides know about it." The administrator stated R36 just liked the old coat and stated the new coat was "just put on." The administrator stated R36 was given a discharge notice in June of last year. The administrator verified assessments were not accurate or up to date and stated the facility had started to redo all of the assessments. The administrator indicated the social worker designee (SSD) was not trained on how to do the assessments and no plan had been identified to ensure R36's safety. On 3/13/14, at 10:12 a.m. the DON stated R36 was one of the "IJs" and R36 had been given a 30 day notice due to his refusal to comply with smoking restrictions. The DON also stated R36 should wear a smoking apron, required supervised smoking, and R36 did not want to comply. On 3/13/14, at 2:17 p.m. during an environmental	F 323

F 323	Continued From page 178 tour the administrator verified the facility had two resident smoking areas. The first was the designated as an unsupervised smoking area located in the front of the building, to the left of the entrance to the facility. The second area was designated as a supervised resident smoking area located adjacent to the dining room. On 3/14/14, at 10:56 a.m. a nursing assistant (NA)-B indicated R36 was independent with dressing and staff only assisted him with his incontinent products. NA-B indicated they had never noticed burn holes in R36's clothing and stated they would let the nurse know right away about any burn holes. On 3/14/14, at 11:21 a.m. the physical therapist (O)-J stated she had noticed burn holes in R36's clothes and had noticed "more [burn holes]" recently. O-J did not recall if she had reported the burn holes to nursing. During an interview on 3/14/14 at 12:14 p.m., the guardian for R36 verified they were not aware of burn holes from unsafe smoking in R36's clothing and stated R36 had money to purchase new clothing. The guardian stated "burn holes in his [R36's] clothing would be a health and safety issue." R1 was observed to smoke unsafely on 3/12/14, 3/13/14, and on 3/14/14; the clinical record lacked development of a smoking care plan and Smoking Contract to potentially ensure safe smoking. In addition, R1 received multiple medications and unknown extra doses of Methadone (a synthetic opioid used to treat moderate to severe pain. Also used together with medical supervision and counseling to treat narcotic drug addiction, with a potential side	F 323

F 323	Continued From page 179	F 323		

effect of sedation), which potentially contributed to excessive sedation and observations of unsafe smoking. In addition, R1 was observed to provide smoking materials to other residents in the unsupervised smoking area.

R1's smoking observations were as follows:
On 3/12/14, at 12:52 p.m. R1 was observed sitting on a motorized wheelchair (w/c) and smoking in the designated unsupervised smoking area outside the front of the facility. R1 was observed to be falling asleep while smoking as she held a lit cigarette with her right hand.
- At 12:53 p.m. R1 was observed to doze off with her eyes closed, and her head jerking up and down. R1 then spontaneously woke up, looked at the lit cigarette, then shortly after appeared to fall asleep and spontaneously wake up. At the time of the observation, the surveyor alerted a licensed practical nurse (LPN)-D of the safety concern. LPN-D went outside spoke briefly with R1, and retrieved R1 back into the building.
- At 1:03 p.m. surveyor observed R1 sitting on her bed. R1 stated she was tired "all the time" and had told the facility staff of feeling tired. R1 stated she thought the tired feeling was related to her "Hepatitis-C." R1 stated she was waiting for a particular medicine to address the Hepatitis-C. R1 verified she had burn holes on her clothing and stating the burn holes were from her cigarette, "The ashes flicking off." R1 further stated she had never had a burn from the smoking. R1 acknowledged she had neuropathy and stated being tired was just not working with her smoking at times. R1 declined the surveyor's request to observed the clothing stored in the closet for burn holes.
- At 2:29 p.m. R1 was observed on the motorized w/c outside in the designated smoking area. R1

removed a cigarette pack from her pocket, removed the wrapper, her eyes closed, her head drooped and she stopped all movements. R1's head jerked and then she continued to take out a lighter, her head was observed to droop and her eyes closed for several seconds. R1's head then suddenly jerked up, R1 lit her cigarette and proceeded to smoke as her eyes remained closed, holding the cigarette in her right hand.
- At 2:34 p.m. a male resident walked to R1 with a cigarette in his mouth, R1 retrieved a lighter, handed it to him. The male resident lit his cigarette and both residents remained next to each other talking. R1's eyes were observed to droop while she spoke with the male resident, her head jerked up as if she was suddenly being awaken. R1 was observed to have approximately half (1/2) inch long ash on the held lit cigarette. At the time of the observation, the lit cigarette and ash were held over a faux fur leopard print blanket folded over her lap (a potentially flammable cloth).
- At 2:35 p.m. R1 rested the right hand holding the cigarette on her lap, leaned forward and spoke to the male resident.
- At 2:36 p.m. R1's head slowly drooped, and R1 was observed to be leaning far forward in the w/c. R1's chin drooped onto her chest, her head bobbed and jerking as R1 tried to keep her eyes open and appeared to struggle to remain awake.
- At 2:38 p.m. R1 rested both hands in her lap (lit cigarette remained in her hand), her chin drooped against her chest, then lifted the cigarette and held it at face level; R1's head drooped, her eyes closed. The ash length had increased to approximately an inch long.
- At 2:39 p.m. the male resident got up and walked away. R1 spontaneously turned the motorized wheelchair around in circle, faced the

the Methadone Clinic and if there was potential R1 was accessing more drugs, DON stated R1 was getting medical transportation and added, "I don't believe so, they are fast trips to the Methadone Clinic."

On 3/13/14, at 9:23 a.m. a registered nurse (RN)-C stated she was the only one doing all the MDS assessments for all the residents in the building and she had not developed a nursing care plan for R1 to address smoking. RN-C verified the temporary care plan had not been developed and stated, "The temporary care plan is supposed to be completed a few days after admission and the comprehensive care plan one by twenty one days after a resident is admitted to the facility."

On 3/18/14, at 8:25 a.m. DON stated the facility had just learned R1 was going to another Pain Clinic (located in Eagan, Minnesota) and was receiving additional Methadone. DON verified R1 went to this clinic twice a week. DON stated the Methadone doses (unclear on the dose)received from the Pain Clinic was in addition to receiving 100 milligrams (mg) of Methadone six times per week from a different Methadone Clinic (located in Minneapolis, Minnesota).

On 3/18/14, at 8:28 a.m. R1 approached and requested to speak to the surveyors. When asked about the Pain Clinic, R1 stated she was going to another clinic because it provided other services such as therapy, acupuncture and massage. R1 was hesitate to answer when asked if she was receiving any pain medications at the clinic and immediately changed the subject. R1 stated, "I relapsed three years ago and I now go to the Methadone Clinic (in Minneapolis) to receive my

F 323	Continued From page 184 medication there daily." On 3/18/14, at 8:40 a.m. an other staff (O)-E stated during a telephone conversation, the transportation driver had reported in addition to the six times the driver was bringing R1 to the Methadone Clinic, the driver was also transporting R1 to another Pain Clinic two times a week on "Tuesday and Thursday afternoon." O-E stated they contacted the physician at the Pain Clinic in Eagan via telephone. O-E stated the physician was not aware R1 was going to the Methadone Clinic in Minneapolis daily. O-E stated the physician would not have known R1 was receiving "Liquid Methadone," and liquid methadone was not listed on the Narcotic Registry. R1's admission MDS dated 12/6/13, indicated R1 had diagnoses to include insomnia, chronic pain, and traumatic brain injury. The MDS indicated R1 had no behaviors and had a BIMS score of 15 which noted R1 was cognitively intact. The MDS indicated R1 required supervision with dressing, eating, toilet use and personal hygiene. Additionally the MDS indicated R1 was independent with locomotion on and off the unit, she used a wheelchair for mobility. R1 did not have a temporary nor a comprehensive care plan developed since being admitted at the facility on 11/30/13. R1's medical record lacked evidence of a Camden Care Center Smoking Contract, when a copy of a contract was requested on 3/12/14, at 3:12 p.m. from the social worker designee (SSD), a copy of the contract was not provided. F 323	Continued From page 185 A Smoking Evaluation dated 12/2/13, indicated R1 had no history of unsafe smoking practice, was able to utilize a lighter/matches safely, was able to safely handle lit smoking material; R1 was identified as cognitively intact, had no behaviors, understood the safe storage of smoking materials. The evaluation indicated R1 understood where smoking was allowed and was deemed an independent smoker. The next Smoking Evaluation dated 3/4/14, noted there were no changes from the 12/2/13, and R1 was deemed a safe smoker. Physician's Orders dated 2/26/14, indicated R1 received the following medications: -Methadone 100 mg daily for pain; -Trazadone (an antidepressant used to treat insomnia with potential side effects of dizziness and drowsiness) 300 mg at bedtime for insomnia; -MS (morphine sulfate, a narcotic used for pain with potential side effect of drowsiness) Contin 15 mg at bedtime for muscle spasms; -Venlafaxine (Effexor, an serotonin-norepinephrine reuptake inhibitor [SNRI] antidepressant with potential side effects of dizziness and drowsiness) 150 mg daily for depression; -Gabapentin (Neurontin, an antiseizure drug also used to treat pain with potential side effects of dizziness, drowsiness or sleepiness) 800 mg three times daily (TID) for neuropathy related to diabetes mellitus; -Zolpidem (Ambien, a sedative drug used to treat insomnia and known to cause sleepiness) 5 mg at bedtime as needed (PRN) for insomnia; -Oxycodone (a narcotic used to treat pain and known to have potential side effects of dizziness and drowsiness) 30 mg three times daily as needed for pain;	F 323

-Diphenhydramine (Benadryl, an antihistimine drug used for treatment of allergic symptoms such as itching with potential side effects of dizziness and drowsiness) 125 mg 2 caps by mouth every 4-6 hours as needed for itching;
- Hydroxyzine (Atarax, an antihistimine drug used to treat allergic type symptoms such as itching with potential side effects of dizziness and drowsiness) 25 mg two caps by mouth every six hours prn (as needed) for itching.

A Medication Review Communication dated and signed on 3/17/14 (after concerns of potential medications causing the observed sedation while smoking were brought to the facility's attention), by the consultant pharmacist indicated R1's medications such as Trazadone, Gabapentin, Ambien, Atarax and Venlafaxine would decrease alertness, increase confusion, cause sedation, and dizziness.

A Physician Progress Notes dated 12/10/13, revealed R1 was on resumed as needed Zolpidem (Ambien) 5 mg related to complaints with difficulty sleeping despite a substantial dose of Trazadone. The Physician Progress Notes further indicated R1 had been cautioned to watch for excessive sedation and falls.

R22 was unsupervised and lacked a smoking apron during observations of R22 smoking on 3/11/14, 3/12/14, 3/13/14, and 3/14/14; R22 was observed to have possession of smoking materials throughout all observations and was observed to have multiple burn holes in his clothing.

R22's smoking observations were as follows:

F 323	Continued From page 187 On 3/11/14, at 11:34 a.m. R22 was observed leaving the building in his motorized scooter wearing a light weight blue jacket. - At 11:37 a.m. R22 was observed parking his motorized scooter outside in the front designated unsupervised smoking area. R22 then took a cigarette and lighter out of a black glove and R22 lit the cigarette. R22 was not wearing a smoking apron and was unsupervised. - At 11:42 a.m. R22 was observed return to the building and to his room. On 3/12/14, at 1:15 p.m. R22 was observed to be smoking in front designated unsupervised smoking area. R22 was observed steering his motorized scooter while holding a lit cigarette in his mouth. R22 nearly hit a pool in front, the cigarette ash was noted to be approximately half (1/2) inch long. No smoking apron was observed on R22 or available in the unsupervised smoking area. On 3/13/14, from 8:15 a.m. to 8:46 a.m. R22 was observed in the dining room (DR) sitting on a regular straight back chair eating breakfast. R22 was wearing a gray half sweater and blue sweat pants. Both were observed to have burn holes at the front. - At 9:10 a.m. R22 was observed to leave the DR and go back to his room. R22 was observed watching television while lying in his bed. R22's legs were observed to dangle on the edge of bed. Several burn holes were observed in his sweater and pants. The black glove holding the cigarettes and lighter was observed to be lying on the seat of the motorized scooter. - At 11:10 a.m. R22 was observed to drive the motorized scooter out of his room and exit the building. R22 was observed to sit in his scooter in	F 323

the front designated unsupervised smoking area. R22 retrieved his cigarette and lighter from a black glove, lit his cigarette and started smoking. R22 did not wear an apron and was unsupervised as he smoked.
- At 1:30 p.m. R22 was observed outside in the front designated unsupervised smoking area smoking a cigarette. R22 did not wear a smoking apron. R22 was observed to hit a bench while maneuvering his motorized scooter as he was smoking the cigarette. The heavy blue jacket R22 was wearing was observed to have several burn holes to both sides of the jacket zip line.
- At 2:15 p.m. R22 was observed outside in the designated unsupervised smoking area smoking sitting on his scooter and smoking a cigarette.

On 3/14/14, at 12:12 p.m. was observed outside at the front designated unsupervised smoking area. R22 retrieved his cigarettes and lighter from the black glove then a staff applied a smoking apron and remained in the area supervising R22.
- At 12:23 a.m. R22 returned to the building. The black glove with the cigarette and light in side was observed to be on R22's lap. R22 drove his motorized scooter down the hallway passing several facility staff and eventually entered his room.

On 3/14/14, at 3:39 p.m. the SSD verified R22's Smoking Evaluation was not in the clinical record, but stated since R22 had been at the facility since 2011, it would be downstairs in his social service thinned chart and needed to go get it.

On 3/14/14, at 3:43 p.m. SSD returned with the Smoking Evaluation dated 4/17/12. SSD stated she had not looked at it prior to completing the Smoking Assessment dated 1/9/14, but had

F 323	Continued From page 189	F 323		

thought if there were changes another assessment would have been completed by the previous social service person. SSD verified according to the assessment dated 4/17/12, R22 was supposed to be a supervised smoker and smoking materials were to be secured by staff. SSD verified the assessment indicated R22 had a history of smoking in inappropriate places, such as his room and dining room. SSD verified R22 was currently considered an independent smoker and kept his own smoking materials with him. Although the assessment dated 4/17/12, contradicted, SSD verified the care plan dated 11/1/12, identified R22 as an independent smoker. SSD verified there was no other comprehensive assessment of R22's smoking ability.

On 3/17/14, at 8:19 a.m. the DON stated she believed there was a more recent smoking assessment. DON stated the assessment should not have been thinned in the from the clinical record and SSD should have looked back to see what the previous assessment directed, prior to completing the smoking assessment on 1/9/14.

On 3/17/14, at 9:11 a.m. RN-C was questioned regarding updating R22's care plan. RN-C stated she had updated R22's smoking care plan on 3/16/14, to reflect R22 required supervision with smoking and verified the prior care plan identified R22 was an independent smoker.

Review of R22's medical record indicated the following:
R22's Smoking Evaluation dated 4/17/12, revealed R22 had a known history of smoking in inappropriate places such as dining room and his room; would forget to verbalize that smoking was

not allowed in the room; did not always pay attention to smoking materials; had smoked in a non-smoking areas and had lit his lighter in his room. Based upon the evaluation, the recommendation was made R22 required supervision with smoking and smoking materials were to be secured by staff.

The Smoking Assessment signed and dated on 1/9/14, and 10/17/13, indicated there were "no" changes noted to R22's Smoking Evaluation. The Assessment noted a statement, "I have read and reviewed the most recent Smoking Assessment and find it current and up to date."

The Quarterly Care Conference nursing note dated 10/17/13, identified R22 was a smoker; he and his son had received copy of the Camden Care Center Smoking policy and a smoking contract had been signed. The note indicated Risks and benefits of smoking had been reviewed with both R22 and his son. The note indicated R22 had been offered a smoking cessation program, but had declined. In addition, a social services note for the same date indicated R22 was an independent smoker.

R22's quarterly MDS dated 1/9/14, identified R22's diagnoses included peripheral vascular disease (PVD) and chronic obstructive pulmonary disease (COPD). The MDS indicated R22 had no behaviors and had a BIMS score of 10 indicating moderately impaired cognition. In addition, the MDS indicated R22 received one person assist with transfers, dressing, hygiene, and R22 used a wheelchair and walker for mobility.

R22's care plan dated 11/1/12, indicated R22 was a smoker with the goal, "[R22] Will follow all

F 323	Continued From page 191 guidelines regarding smoking at Camden Care Center, will remain safe while smoking." The care plan also indicated R22 was independent with smoking and had been offered smoking cessation program, but did not wish to quit smoking at the time. The undated and untitled list of Independent & Supervised Smokers list revealed R36, R1 and R22 were all identified as independent smokers. On 3/14/14, at 8:15 a.m. when asked about how residents were generally assessed to consider them either an independent or supervised smoker, SSD stated, "We would review the residents' diagnoses, health and cognitive status, and ask questions if the resident had a history of unsafe smoking. With the assessment each resident is supposed to verbalize they understand how to use smoking materials and how to safely store them." In addition, SSD stated all residents were offered assistance to quit smoking; SSD stated all residents understood they "are not supposed to share smoking materials or offer to store smoking materials for other residents." "If a nursing staff noticed any resident was not able to hold a cigarette right or had a burn holes on their clothing, facility staff would let nursing staff know so they can be supervised or use a smoking apron; we explain the policy and safety reasons to all the residents. If the resident refused to follow the smoking policy, they are given a thirty day notice indicating non-compliance and would be discharged from the facility." On 3/14/14, at 8:24 a.m. when SSD was asked if she was aware of burn holes in R36's, R1's and R22's clothing SSD stated she was not aware. SSD stated since the unsafe smoking concern	F 323

had been brought to the attention of the facility, "every hour" there was a staff person in the designated smoking areas supervising residents. SSD stated "nobody checked the clothing for burn holes." SSD further stated all the independent smoking residents would be observed for burn holes when they were assisted with cares and laundry would report burn holes to her. When asked what the facility would do when a resident was "deemed" to be a unsafe smoker, the SSD stated nursing staff would review smoking assessments and make the necessary adjustments to care plan. SSD stated staff would be informed of the change immediately. SSD also stated, "Aprons are for those residents on supervised smoking and smoking was only to be at the front designated smoking area."

The facility Accidents/Incidents Management policy dated January 2013, directed, "It is the goal of the facility to provide safe, protected and monitored environments for all who enter the facility property. The reporting of incidents is a method to track and trend unsafe situations that may result in harm. Accidents do not have to result in injury to require reporting."

The facility Smoking Policy dated as revised on 1/2014, directed, "2. All smokers shall be assessed related to smoking safety at the time of admission and then at least quarterly as outlined by OBRA [Omnibus Budget Reconciliation Act] assessment timeframe's."; "7. Residents who smoke shall wear a smoking apron if they are found not to be safe (i.e. drop lit cigarette or do not handle the ashes properly. a. If clothing is found to have cigarette burn holes the smoker must wear an apron to protect themselves from burns. 8. All smoking materials will be stored in a

secure area to ensure they are kept safe. Based on the individual resident smoking safety assessment facility staff shall determine the most appropriate method to secure storage."; "10. All smoking sessions will be supervised by facility staff members only."
R64 was observed to be transferred in an unsafe manner with an EZ-Stand mechanical lift on 3/13/14, at 11:05 a.m. The surveyor had to intervene during the transfer to prevent a potential fall and/or injury when R64 began to slide through the lift harness.

R64's record was reviewed. The Face Sheet dated 1/14/14, indicated R64 was admitted to the facility on 1/5/10, with diagnoses including senile dementia, essential hypertension, and lack of coordination.

R64's annual MDS dated 1/30/14, identified R64's cognitive skills for daily decision making were severely impaired and R64 was rarely/never understood. R64's transfer ability was scored as total dependence with a two person assist. Additionally, the MDS identified R64 as not steady, only able to stabilize with staff assistance when moving from seated to standing positions, and surface to surface transfer (transfer between bed and chair or wheelchair). R64's Care Area Assessment (CAA) for falls, dated 1/30/14, identified risk of falls related to difficulty maintaining sitting balance and impaired balance during transitions.

R64's ADL Self-care Performance Care Plan, dated 11/14/11, revealed R64 required assistance of two staff and an EZ-stand (a type of standing lift) for transfers and a hoyer (full body lift) if the resident was weak or too combative to be moved.

F 323	Continued From page 194	F 323		

The undated facility nursing assistant worksheet for the south hallway indicated R64 required a check and change every two hours and as needed. Additionally, the worksheet indicated R64 required transfer assistance with an EZ-stand and two staff. The worksheet also directed to use a hoyer lift if R64 was resistive. The worksheet identified R64 used a wheelchair and was non-ambulatory.

On 3/13/14, at 8:19 a.m. NA-D and NA-B assisted R64 with a transfer in an EZ Way stand lift (a type of standing lift that uses a harness underneath the arms that attaches via loops to a mechanical lift, and is also secured around the resident's waist with a safety belt to raise the resident from a sitting to standing position). R64 was unable to hold onto the EZ Way stand lift handles. NA-D repeatedly tried to reapply R64's hands to the lift. The safety belt was noted to be loosely secured around R64's waist, with visible slack in the belt.
- At 11:05 a.m. NA-C and NA-B were observed to prepare to lift R64 out of his wheelchair for repositioning. During the transfer, R64 pulled their hands away from the EZ-stand handles, with the left hand becoming wedged between the handle of the EZ-stand and the frame of the lift. NA-C and NA-B lowered R64 back down into the wheelchair to free his hand. NA-B stated the resident "does this [won't hold onto the lift] a lot." NA-B and NA-C tried to manually place R64's hands on the handles and R64 was unable. NA-B and NA-C said R64 was unsafe in anything else but the EZ-stand.
- At 11:10 a.m. NA-B and NA-C obtained a licensed practical nurse (LPN)-B to assist. LPN-B came to the room and placed R64's hands on the handles, covering R64's left hand with his hand to maintain placement. NA-B and NA-C began to lift

the machine to stand R64; R64 immediately began to slide out of the EZ-stand harness. The surveyor immediately intervened to stop the transfer, immediately asked NA-B and NA-C to place the wheelchair underneath R64 to prevent them falling onto the floor. The belt of the EZ Way stand sling was noted to be very loose around R64's waist.
- At 11:17 a.m. NA-B and NA-C were removing the EZ-stand equipment from R64's room and said they were going to put R64 in the day room as he was still uncooperative. NA-B stated she had worked at the facility for about six months and had received training on the lift when she started. NA-C said she had worked in the facility for five months and had "never" been trained on use of the lift. NA-C verified she had been using the lift to transfer residents since hire. Neither NA-B nor NA-C were able to state if the belt should have been tightened as R64 was moved to a standing position. NA-B and NA-C stated they used the resident group lists for special information about residents, however neither NA staff member had the group list on their person at the time of the transfer observation. NA-B and NA-C were unable to state if R64 could use a hoyer lift if he was resistive.

On 3/13/14, at 11:38 a.m. NA-A revealed she had worked in the facility about three months, and stated she was trained by another aide "on the floor [while on the job]" on the proper use of the EZ Way stand lift. NA-A added she would ensure the resident was holding the handles of the lift securely and that the belt was tightened so it was not loose with transfers.

NA-C's training log revealed she received EZ Way stand training on 10/31/13. There was no

F 323	Continued From page 196 return demonstration of safe operation of the lift identified on the training form. On 3/13/14, at 1:19 p.m. NA-E stated she was trained on the use of the EZ Way stand lift prior to working on the floor. NA-E stated she would not lift someone who could not consistently hang on. NA-E stated if a resident could not bear weight and could not stand, she would get a third person to transfer them, and did not identify the use of a Hoyer or full body lift as a potential option. On 3/13/14, at 1:25 p.m. NA-D and NA-A were transferring R64 from the wheelchair into bed. NA-D began to lift the resident with the EZ Way stand. At the time of the observation, the surveyor immediately intervened to tell NA-D and NA-A that R64 was not hooked to the lift underneath the right arm. R64 was observed to have only one side of the sling hooked to the lift machine. Although the safety strap around R64's waist was secured, R64 was not holding onto the lift. R64 then began to hang onto the lift frame and not the handles. R64 was placed in bed with the standing lift after correction. NA-B's and NA-D's training logs were reviewed and revealed they had EZ Way stand training checked off on their files, no return demonstration was documented. On 3/13/14, at 2:10 p.m. the DON said she would check on that information (regarding a return demonstration), no further information was provided. DON showed surveyor staff the EZ Way stand operator's instructions that were part of the general orientation information manual. The EZ Way stand Operator's Instructions dated	F 323

F 323	Continued From page 197 3/11/09, revealed the safety strap should have been securely fastened around the patient's (resident's) torso prior to the patient being lifted. The harness should be secured by the same color loop to the lift on both sides of the harness. Additionally, the user's manual revealed patients should be able to bear some weight, have upper body strength (i.e. be able to sit on the side of the bed unattended), and be able to follow simple commands. If a patient does not meet each of these three criteria, the EZ Lift total body lift must be used. A warning box on page two of the operator ' s manual indicated - Warning: For safe operation of the EZ Way stand, the stand must be used by trained personnel in accordance with the operator's manual, video and training checklist to avoid injury to the patient. An EZ Way stand Competency Checklist was included in the manual on page 12. Evidence of the checklist being completed was not present in NA-B, NA-C or NA-D's training files. Incident reports were reviewed for the last year for R64 and did not reveal any falls from the EZ stand lift. On 3/13/14, at 2:23 p.m. occupational therapist (OTR)-C stated they screened every resident for therapy with each quarterly MDS. OTR-C stated this new process was started about a month and a half ago. OTR-C stated any documentation regarding transfer/lift assessments would be under the therapy section of the chart, much of their resident information prior to September 2013 was lost due to changes in software programs. OTR-C reviewed R64's chart and showed surveyor the last assessment from therapy done on 6/28/13. OTR-C stated the evaluation was done per family request due to	F 323

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (EACH DEFICIENCY MUST BE PRECEDED BY FULL REGULATORY OR LSC IDENTIFYING INFORMATION)	ID PREFIX TAG	PROVIDER'S PLAN OF CORRECTION (EACH CORRECTIVE ACTION SHOULD BE CROSS-REFERENCED TO THE APPROPRIATE DEFICIENCY)	(X5) COMPLETION DATE
F 323	Continued From page 198 transferring difficulty. The evaluation recommended at that time to use the EZ stand for transfers as R64 was unsafe with one or two person transfers. OTR-C indicated to use the EZ stand, a resident should be able to bear at least partial weight and consistently be able to follow instructions enough to hang onto the handles. OTR-C stated "it would be a concern" if the resident was unable to follow these instructions. On 3/14/14, at 7:28 a.m. LPN-A was assisting NA-D to get R64 up in the EZ Way stand. R64 was physically assisted to a sitting position by LPN-A and NA-D. R64 was hooked up to the EZ-stand with the loops secured on the first black loop to the lift underneath each arm, as well as the safety strap secured about the waist. R64 was unable to hold onto the EZ- stand handles despite cueing from LPN-A and manual placement of R64's hands on the lift. LPN-A indicated at this time she was "not comfortable with this, he cannot hold onto the handles." LPN-A stopped the transfer at that point and had NA-D get a full body lift, stating to NA-D "we can always upgrade, but we cannot downgrade" referring to transfer lift equipment. LPN-A physically supported R64 while waiting for NA-D to return with the full body lift machine, as R64 was not capable of sitting on the side of the bed alone without falling. LPN-A additionally told NA-D he needed to get his transfer belt on "that is part of your uniform." NA-D did not have the transfer belt on his person. R64 was then assisted into the wheelchair with a full body lift, and exhibited no behaviors or resistance with the transfer. LPN-A said she was going to contact therapy regarding the resident's transfers, and stated "he really hasn't had a decline" and remarked he had "always been like this, unable to follow	F 323

F 323	Continued From page 199	F 323		

instructions." She further commented she did not know why they (therapy) had him using the EZ Way stand when he could not cooperate and was going to get an order for a therapy evaluation for R64.

Nursing progress notes by LPN-A dated 3/14/14, at 8:06 a.m. revealed R64 was unable to safely complete an EZ-Stand transfer, "Writer stopped the transfer and completed a hoyer transfer." Nursing progress notes by LPN-D dated 3/14/14, at 8:47 a.m. revealed an order was received for physical therapy evaluation and treatment for proper transfers.

The IJ that began on 3/12/14, at 5:00 p.m. was removed on 3/16/14, at 12:17 p.m. when the facility had implemented an IJ removal plan that included: The initiation of thorough investigations of ongoing incidents that involved R36, R1, R22 and R64; Re-assessments had been completed for smoking safety for residents who smoke; Staff were educated to the facility's smoker and safety monitoring systems; Staff had received education and conducted return demonstration for proper lift use; The staff were able to describe the job duties of the of smoke monitor and safety monitor, and were aware a smoking blanket and fire extinguisher were present whenever residents were outside smoking. Direct care staff and licensed nursing staff were interviewed and were able to explain their responsibilities for identification of incidents of potential accidents regarding improper safety during smoking and improper use of the mechanival lift/stand as defined in the removal plan. Although the IJ was removed on 3/16/14, non-compliance remained at the lower scope and severity (s/s) of an E.

F 328 F 328 SS=D	Continued From page 200 483.25(k) TREATMENT/CARE FOR SPECIAL NEEDS The facility must ensure that residents receive proper treatment and care for the following special services: Injections; Parenteral and enteral fluids; Colostomy, ureterostomy, or ileostomy care; Tracheostomy care; Tracheal suctioning; Respiratory care; Foot care; and Prostheses. This REQUIREMENT is not met as evidenced by: Based on observation, interview and document review, the facility failed to ensure the continuous positive airway pressure (CPAP-breathing machine that provides a continuous supply of air which is positively pressurized) and mask were cleaned and stored properly. In addition, the facility failed to address the use of the CPAP and monitoring of respiratory status in the comprehensive care plan for 1 of 1 resident (R111) reviewed for respiratory concerns. Findings Include: On 3/11/14, at 6:34 p.m. R111 indicated to surveyor the staff did not clean the machine "CPAP." On 3/13/14, at 11:30 a.m. the CPAP mask and tubing were observed lying on the floor next to R111's bed with creamy white build up in the inside of the mask and around the seams.	F 328 F 328	F 328 For sampled resident R111 and for all residents assessed to receive treatment or care for special needs, the facility shall ensure proper treatment is received. These special care needs include but are not limited to the use of CPAP. The facility has a policy titled, "Care Standards" that was effective 05/2012 and was reviewed 05/2013. This policy has been reviewed and revised to specifically reflect direction to special treatment and care services. Also, an authoritative resource has been added related to respiratory care. This policy is now available to the facility on the remote desktop. Additionally the facility has a policy titled, "CARE Team Meeting" that was effective 05/2012 and reviewed 05/2013. Both of these policies will be made operational at the facility. Special treatment or care needs may be reviewed in a CARE Team Meeting at the discretion of the IDT. These meetings are now initiated again at the facility and once every month A log will be kept from each CARE meeting related to special treatment or care needs. This log will be presented to the QA committee for review and further recommendation as indicated. This will be an ongoing audit and QA review process.

F 328	Continued From page 201 On 3/14/14, at 11:28 a.m. the CPAP mask and tubing were both again observed lying on the floor slightly under the bed but visible. The mask observed to have a thick creamy build up on the inside and the seams. R111's Admission Record dated 1/10/14, identified diagnoses to include head injury and depressive disorder. The admission Minimum Data Set (MDS) dated 12/23/13, indicated R111 was cognitively intact and had a diagnoses of asthma. The Care Area Assessments (CAAs) did not identify the use of a CPAP machine. When interviewed on 3/14/14, at 11:37 a.m. licensed practical nurse (LPN)-C stated the nursing assistants (NA's) are supposed to set the mask and tubing on the side table. LPN-C demonstrated how it should be stored and disconnected the mask from the tubing after applying gloves stated she was going to wash it and described the substance in the mask as "Gunk and dirt." LPN-C expressed that she had not worked in that side of the facility and verified there were no cleaning instructions in the Treatment Administration Record (TAR) and neither in the care plan. LPN-C further explained the procedure for cleaning the mask using warm water with soap then air dry the mask at R111's bedside. Physician's orders dated as printed on 3/17/14, indicated R111 used a CPAP. The clinical record lacked a comprehensive care plan to address the use of the CPAP, including monitoring of respiratory status, cleaning. A copy of the care plan was requested, but not provided	F 328	For sampled resident R111, a thorough and complete assessment shall be completed related to respiratory needs and treatments. Based on this assessments, the IDT shall develop a comprehensive care plan related to respiratory special care needs. The comprehensive care plan shall also address the care and maintenance of special treatment/needs equipment related to respiratory care. Additional assessments for sampled resident R111 will be done at least quarterly based on MDS schedule or more frequently at the discretion of the clinical staff based on clinical judgment and/or change in medical condition. The Resident Care Manager(s) or DON will do a monthly audit x6 of residents with special care needs/treatment to ensure the assessments are present and accurate and that the care plan is current and being followed. The results of this audit will be reviewed by the facility administrator and then presented to the QA committee for review and further recommendation as indicated. Responsible: Administrator, DON, RCM, Social Service if appropriate, IDT Compliance date: 4/28/2014

F 329	Continued From page 208 dose of Zyprexa. The note indicated R89's Zyprexa would be considered to be increased to 7.5 mg. The Physician's Order Sheet dated 3/5/14, indicated R89 had olanzapine (Zyprexa) 5 mg ordered by mouth daily for diagnosis of atypical psychosis. A Geriatric Services of Minnesota Progress Note dated 3/7/14, indicated R89 was seen by a nurse practitioner. The note identified R89 "appears to be distressed" and was noted to "sit/stand multiple times from wheelchair." The note indicated R89 received 5 mg of Zyprexa daily, "Staff have no reports of behavior changes, but note impulsivity" and identified R89 fell twice in February. The "Psych:" section indicated R89 was "Agitated w/ [with] worried look on face. Mumbling. Slight diaphoresis [sweating]." Continuation of the note indicated Zyprexa would be increased to 7.5 mg "due to continued agitation/impulsivity." A Physician's Order dated 3/7/14, indicated Zyprexa was increased to 7.5 mg by mouth daily and directed to add the diagnosis of schizophrenia. Review of the clinical record, including interdisciplinary team (IDT) Progress Notes from admission to the time of survey indicated no behavioral concerns were documented, such as hallucinations, agitations symptoms or impulsivity. R89 had no IDT progress notes documented after 2/14/14. Although appropriate side effect monitoring was noted in the clinical record, such as labs and Abnormal Involuntary Movement Scale (AIMS) on 3/12/14, the clinical record lacked evidence of target behavior monitoring for the efficacy of Zyprexa. F 329	Continued From page 209 On 3/13/14, at 2:24 p.m. the LPN-D verified there was no target behavior monitoring for Zyprexa and stated there "should be." LPN-D was unclear on what target behaviors to monitor for R89. On 3/14/14, at 8:57 a.m. the DON verified the facility did not have psychiatric services and stated they "signed the contract yesterday." ACP (associate clinic of psychology) was unclear when they would be starting. DON verified target behaviors should be monitored for the use of Zyprexa. On 3/14/14, at 9:27 a.m. LPN-A stated she was unclear why the Zyprexa was increased and unclear on the indications for the use of the medication. LPN-A verified the facility lacked a system to ensure target behavior monitoring was in place for antipsychotic medications. On 3/14/14, at approximately 9:40 a.m. the geriatric nurse practitioner (GNP) verified R89's Zyprexa was increased due to increased delusions and agitation. GNP stated R89's agitation was evidenced by diaphoretic symptom, R89 unable to relax, and increased falling. GNP stated she would expect the facility to monitor for efficacy of the medication and be looking for things like increased somnolence, decreased delusions. GNP stated R89 had been on Seroquel before and was hospitalized (before admission) for too much Seroquel and "that was how she was started on Zyprexa." GNP stated she has observed R89's behavior improve since the increase. When asked if she directed the facility to monitor for behaviors or gave suggestions of target behaviors, GNP stated she did not direct monitoring for target behaviors	F 329

F 329	Continued From page 210 because "they were usually identified on behavior sheets." On 3/14/14, at 10:51 a.m. when asked regarding determining behavior monitoring for resident, DON stated nursing staff along with the social worker would create a behavior plan for the resident. DON verified there was no behavior plan in place for R89. The Psychoactive Medication Management policy dated as reviewed 5/2013, directed the IDT to identify residents whose behaviors may require the use of psychotropic medications, and identify the diagnosis and/or behavior that are "antecedent" for the psychoactive medication. The policy indicated the goal of the IDT was to assess/monitor the psychoactive drug use and "ensure residents are assessed/evaluated for dose reduction opportunities on an ongoing basis." Although the policy identified potential examples of behaviors which may require monitoring, the policy incorrectly identified diagnoses of "Agitation" and vague terms such as "Aggression" and "Socially inappropriate actions" as "behaviors." The policy lacked clear direction to determine resident specific target behaviors, and lacked clear direction on where to document target behaviors in the facilities clinical record. The policy lacked identification of the frequency of target behavior monitoring and frequency of the evaluation of the data. R1 was not being monitored for potential side effects, sleep patterns and mood monitoring related to use of Trazodone and Venlafaxine (anti-depressants) and Ambien (Zolpidem-sedative used for short term treatment of insomnia). F 329	Continued From page 211 R1 was observed on 3/12/14 and 3/13/14, outside in the front designated smoking area sitting on a motorized wheelchair (w/c) smoking and dozing off with her head and chin drooping and jerking up and down. During observations R1 appeared to be struggling to keep her eyes open. On 3/12/14, at 1:03 p.m. R1 was observed sitting on her bed stated she was tired "All the time" and had told the facility staff but thought it was related to her "Hepatitis-C" which she was waiting for a particular medicine. R1 verified she had burn holes on her clothing stating from her cigarette "The ashes flicking off." R1 further stated she had never had a burn from the smoking but acknowledged she had neuropathy and being tired was just not working with her smoking at times. R1's diagnoses included insomnia, chronic pain, arthritis, osteoporosis, depression and diabetes mellitus obtained from the MDS dated 12/6/13. The Mood section of the MDS identified R1 as having symptoms "Feeling down, depressed, or hopeless, trouble falling or staying asleep, or sleeping too much, feeling tired or having little energy, poor appetite or overeating, feeling bad about yourself-or that you are a failure or have let yourself or your family down and thoughts that you would better off dead, or of hurting yourself in some way." The assessment indicated R1 all the symptoms were nearly every day. The CAA dated 12/10/13, indicated R1 used antidepressants, and sleep aides, and indicated staff would continue to monitor for effectiveness of the antidepressants and sleep aides as well as for side effects. In addition the CAA indicated R1	F 329

F 329	Continued From page 212 was at risk for adverse side effects. No temporary and comprehensive care plans developed on medications since R1 had been admitted to facility on 11/30/13. Physician's Orders dated 2/26/14, indicated R1 received the following medication: -Trazodone 300 mg by mouth at bedtime (HS) for insomnia -Venlafaxine (Effexor) 150 mg by mouth daily for depression -Zolpidem (Ambien) 5 mg by mouth at HS as needed (PRN) for insomnia Review of the Monthly Pharmacist Review Medication Regimen last reviewed 3/7/14, indicated "NO New Suggestions." Medication Review Communication dated and signed on 3/17/14, by the pharmacist indicated these medications Trazodone, Gabapentin, Ambien, Atarax and Venlafaxine would decrease alertness, increase confusion, cause sedation, and dizziness. The review was completed after the concern of R1 being sedated had been brought to the facility attention after numerous observations. When interviewed on 3/13/14, at 9:44 a.m. the LPN-D stated if a resident was on sleep aides and an antidepressant behavior or mood monitoring was supposed to be documented in the "Red book." LPN-D went over the "Red book" and the medical record verified documentation was lacking. On 3/13/14, at 10:02 a.m. LPN-D approached surveyor stated she had looked in R1's record over again but had not found any information on	F 329

F 329	Continued From page 213 monitoring of side effects, behavior/mood, sleep patterns for the antidepressants, and hypnotics. LPN-D further stated she was going to start the documentation/monitoring. When interviewed on 3/13/14, at 10:23 a.m. social services designee (SSD) stated she was responsible to check with resident's regarding the mood and how they were feeling but at the same time since nursing was providing the resident's direct care the staff needed to monitor the side effects and behaviors or mood for all medications R1 was taking including the antidepressants and sleep aides. She further stated " I would check with R1 occasionally as she is alert and able to verbalize how she felt." When interviewed on 3/14/14, at 4:00 p.m. the facility medical director (MD) stated R1's side effects, mood and sleep patterns should have been monitored since R1's antidepressant and sleep aides had been increased. In addition MD stated R1 needed to go back to see the prescribing physician to re-evaluate the effectiveness of dosage increase. When interviewed on 3/17/14, at 8:17 a.m. the DON stated sleep monitoring and target behavior/mood monitoring should have been documented. She expected the consultant pharmacist (CP) to have alerted the facility that these pieces were lacking during monthly review. When interviewed on 3/17/13, at 1:11 p.m. about best practice; monitoring of sleep patterns and side effects the consultant pharmacist (CP) stated "I feel cornered by the surveyors asking me questions about residents which I don't have direct access to their information and I don't feel	F 329

F 329	Continued From page 214 comfortable." On 3/17/14, at 12:13 p.m. facility policy for side effects and behavior/mood monitoring was requested but was not provided. The facility did comprehensively assess behaviors and develop non pharmacological interventions related to depression and anxiety for R91, prescribed both anti-depressant and anti-anxiety medications. R91's care area assessments dated 10/22/13, for Mood, Cognitive Loss/Dementia, Behavior, and Psychosocial Well Being included the same summary statement under the Care Plan Considerations section: "Resident has some behavior r/t [related] medical Dx [diagnosis]. Staff will monitor her behavior and ensure pt [patient] needs are met and she is safe." The assessment did not include a thorough analysis including: specific behaviors exhibited by R91 were to be monitored, causative factors and health diagnoses related to display of behaviors and what interventions have been most effective. R91's current care plan, last reviewed 1/30/14, did not include non-pharmacological interventions related to R91's behaviors related to mood or anxiety. The care plan did identify "Psychotropic drug use: resident uses anti-depression (Prozac) and antianxiety (Buspar) R/t [related to] Dx [diagnosis] of depressant and anxiety" with an intervention to "Observe change in behavior and memory." Review of Medication Administration Record For March 2014 revealed R91 was being administered Buspirone HCL [an anti-anxiety	F 329

F 329	Continued From page 215 agent] 17.5 MG twice daily for "anxiety", Mirtazapine [an anti-depressant] 30 MG at night time for "depression", Prozac [an anti-depressant] 30 MG every day for "depression", and Ativan [a benzodiazepines anti-anxiety agent] 1 MG twice daily as needed for "agitation". R91 had used the as needed Ativan twelve times from 3/1/14 to 3/17/14. A review behavior intervention monthly flow record for January, February and March 2014, revealed behavior monitoring for sad facial expression and hours of sleep. A review of progress notes for January, February and March 2014 revealed no notes regarding behavior monitoring related to anxiety or depression. On 3/14/14, at 2:14 p.m. the SSD reported the care area assessments for R91 were completed prior to her employment at the facility. SSD reported the care area assessments were not comprehensive, did not identify what behaviors were occurring. SSD confirmed R91's care plan did not address her mood or anxiety issues. On 3/17/14 at 11:37 a.m. LPN-D reported the facility had not been monitoring for behaviors related to the use of buspirone. She said she would check how the facility was monitoring behaviors related to the use of as needed Ativan. No further information was provided. The Videll Healthcare, LLC policy on Psychoactive Medication Management, last reviewed on 5/2013, directed staff "1. Psychoactive medication management begins during the pre-admission process. Key data points to gather include but are not necessarily limited to: a. Admission information. b. Diagnosis	F 329

F 353	Continued From page 217 and psychosocial well-being of each resident, as determined by resident assessments and individual plans of care. The facility must provide services by sufficient numbers of each of the following types of personnel on a 24-hour basis to provide nursing care to all residents in accordance with resident care plans: Except when waived under paragraph (c) of this section, licensed nurses and other nursing personnel. Except when waived under paragraph (c) of this section, the facility must designate a licensed nurse to serve as a charge nurse on each tour of duty. This REQUIREMENT is not met as evidenced by: Based on observation, interview, and document review, the facility did not provide sufficient staff to ensure residents received care per the care plans. This had the potential to affect all 49 of 84 residents who are consistently dependent for cares, and 2 of 2 residents (R11, R41) who occasionally need assistance for cares in the facility. Findings include: During the survey conducted on the following dates and times: - On 3/10/14, from 11:30 a.m. until approximately 8:30 p.m., - On 3/11/14, from 8:00 a.m. until 5:00 p.m.; - On 3/12/14, from 6:45 a.m. until 5:30 p.m.;	F 353	F 353 For sampled residents R11 and 41 and for all residents in the facility, the facility shall ensure adequate staffing of licensed and certified care staff to meet the assessed needs of the residents. The facility has a DON that is on duty a minimum of Monday through Friday. The RN DON has 24/7/265 responsibility for the facility in concert with the facility Administrator. Additionally, the day shift is now staffed with 2 licensed nurses in the role of Resident Care Manager. An RN is hired working in the role of Clinical Nurse Liaison. The evening shift has an RN Resident Care Manager now. As ancillary responsibilities, one RCM will be responsible for tracking infection control, one RCM will be responsible for clinical orientation, and one RCM will be responsible for clinical inservice education. All of these ancillary responsibilities are under the direct supervision of the DON in concert with the facility administrator. The night shift has both an RN and an LPN permanent assigned to that shift.

F 353	Continued From page 218 - On 3/13/14, from 6:45 a.m. until 4:00 p.m.; - On 3/14/14, from 7:00 a.m. to 5:15 p.m.; - On 3/15/14, from 10:00 a.m. to 12 noon, - On 3/16/14, from 12 noon to 2:15 p.m., - On 3/17/14, from 7:30 a.m. to 3:30 p.m., - On 3/18/14, from 7:30 a.m. to 8:45 p.m. Staff was observed to not be able to consistently provide services for the residents as directed by their plans of care based on a comprehensive assessment of their needs. The facility failed to ensure self-administered medications were safely administered for 1 of 1 resident (R36) observed to self-administer medications (SAM). Refer to F176. The facility failed to ensure 1 of 1 resident (R89) was assessed for the restraint of having both wheelchair brakes locked and having the wheelchair placed flush against a table or desk; in addition, the facility failed to ensure the restraint was the least restrictive and clinical indications for the use of the restraint. Refer to F221. The facility failed to promote and enforce a resident environment that was free from physical, verbal, and emotional abuse of residents for 1 of 4 residents (R56) as R56 was not protected from another resident (R63) in the sample. Refer to F223. The facility failed to immediately notify the administrator and the State agency (SA) of allegations of abuse, neglect and mistreatment for 6 of 7 residents (R21, R62, R71, R17, R56, R63) in the sample reviewed for abuse prohibition. These practices had the potential to affect all 84 residents residing in the facility. Refer to F225.	F 353	Bedside care staffing is evaluated daily by the DON or nurse manager on duty during the off shifts. Additional staffing is brought in with the consultation of the DON. The facility does not routinely staff to cover 1:1 situations but will do so on a case by case basis to ensure resident assessed needs are met and the safety of all residents in the facility is ensured. A gross miscommunication related to using PTO occurred. A facility staff member inappropriately directed this activity. When the President/CEO and COO were made aware of this gross miscommunication it was corrected. The facility has a policy titled, "Vacation Policy" that was initiated in June 2012 and reviewed in 2013. This policy clearing states that PTO is requested 60 days in advance so that shift coverage is ensured. Additionally, the department heads are responsible for approving PTO in advance and the PTO requests will be denied if staff coverage is compromised. Additionally, the facility has a policy titled, "Attendance and Punctuality" that was effective 05/2012 and reviewed 01/2013. It addresses the standards of attendance and unexcused absences. Both of these policies will be made fully operational in the facility.

F 353	Continued From page 222 due to refusals of therapies and/or range of motion, potential development of skin issues due to refusal of bathing/personal hygiene/grooming and skin assessments/evaluations and refusals of doctor visits. R41's Brief Interview for Mental Status (BIMS) from the Minimum Data Set (MDS), dated 2/10/14, indicated he was cognitively intact. R41 did not have behaviors related to rejection of care or which interfered with delivery of care. R41 was assessed as totally dependent on two or more staff for toileting. On 3/14/14, at 8: 15 a.m. R41 reported it frequently took 15-45 minutes to answer call light requests for toileting. R41 explained he needed two staff to assist him to change a soiled incontinence brief with the mechanical standing lift. He reported he often waited in soiled incontinence brief for staff to assist him. R41 reported this made him feel "less than human", "terrible", "angry" and "disgusted" R41 reported he decreased the amount of times he requested help toileting as it was a bothersome process. During observation on 3/14/14 at 9:01 a.m. R41 to put his call light on. At 9:09 a.m. a trained medication aide, (TMA)-A responded to the call light and turned it off. TMA-A informed R41 nursing assistants (NA) would be in shortly. At 9:21 a.m. (20 minutes later) NA-G and NA-H entered the room with the mechanical lift and assisted R41 in changing his soiled brief. A strong odor of urine was noted. R41's activities of daily living care plan, dated 2/17/14, directed staff "[R41] is dependent on 2	F 353

F 353	Continued From page 223 staff for toileting." R41's care plan, dated 2/17/14, did not address refusal of cares. On 3/14/14 at 12:09 p.m. NA-G and NA-H explained they have had to care for more residents than usual for about a month as staff were required to take vacation during a short period of time. At times resident rooms were far apart from each other. NA-G and NA-H reported some residents reported frustration with waiting longer periods of time for assistance in activities of daily living such as transferring to bed. NA-G and NA-H reported it took awhile to assist R41 with toileting this morning due to assisting other residents. NA-G and NA-H reported R41 would at times refuse toileting cares and his brief would be heavily soiled. Additional interviews: On 3/13/14, at 9:00 a.m. trained medication aide (TMA)-A stated that there are enough staff for days and PM's and when staff call in sick they are replaced. On 313/14, at 9:10 a.m. registered nurse (RN)-B stated that if all the staff show up it's okay, otherwise they have to split up groups and improvise. On 3/13/14, at 10:00 a.m. other (O)-E stated the nursing assistants were short staffed today, so people had to pitch in and help serve breakfast, if not the residents will just take charge and do it themselves. On 3/14/14, at 12:09 p.m. licensed practical nurse (LPN)-A stated that the two floor nurses are the charge nurse, they has never been a "charge nurse assignment" on the evening or night shift. LPN-A was not aware a designed charge nurse was a regulation. LPN-A further stated that the facility had worked short, even during the survey,	F 353

F 353	Continued From page 224 everyone was on vacation time because corporate would not give any vacation time last year, so everyone had to use vacation before the end of March, that was announced to all and everyone demanded their vacation. LPN-A further stated that because the census was down, she had been directed to reduce one aide from the schedule. On 3/14/14, at 2:00 p.m. the facility owner/governing board stated there had been four administrators in the facility since the last survey and listed them in order. The facility owner verified "complaints of insufficient staffing have gotten to me, we were aware and doing everything that we can. The fact that there is any issue is disappointing." The facility owner further stated "can't compromise care over shifting gears" during change and transition, was happy to have the director of nursing (DON) here, and stated the administrator was new to the position. The facility owner stated his chief operating officer (COO) will be here more often, she will make sure that anything put into place was implemented. "We ourselves are having corporate restructuring, to make sure at least one of us is here every week. Corporate is family, my wife is a social worker (SW), and the corporate SW consultant (CSW), she had been here doing corporate team building. We have been in health care, hands on with tuff populations for 21 years. we are a small company with four facilities. We like homes that we can work with that are community based care, we have been out here more and we are going to continue to be here more and have a plan for renovations and to put capital into the building." The facility owner stated to the COO "We were talking about staffing and I let [the surveyor] know that we are remedying it with immediacy, and then talking about control of medical records and why the environmental director has the key rather than the DON and HIM person. The COO stated "It is my understanding that we do have a MR person. That's the first I heard of that [unlicensed personal with key to medical records], he [environmental director] is on a scheduled and pre-approved vacation, we can ask when he gets back." When informed of the conversation with the medical director (MD) and the MD-B's understanding that they would not be seeing patients in the facility. The COO stated "that is not what I have with any other facilities, it is not the intent of the contract. I have been made aware of that and I have directed that we went to her and told her that she needs to do that. the facility has also to find another medical director or a back up medical director to get the work done." The facility owner stated "My understanding was as late as last week that she was going to in the interim cover us." On 3/18/1,4 at 2:00 p.m. the DON stated she had been given staffing when she arrived to improve the consistency of staffing process, and had started the process of block scheduling, and then immediately handed it off, because of larger concerns. The DON verified the facility had worked short staffed, because of the vacation deadline of March 31st, that was imposed by corporate. The facility had been directed to plug	F 353

F 353	Continued From page 226 in vacation days and had done the best job possible to try to spread them out, but a lot of people had not had vacation in the prior year. A review of the facility staffing schedule from 2/23/13 through 3/8/13, revealed 96 paid time off (PTO) shifts were granted in that 14 day period, which averaged six people per day on PTO, but actually ranged as high as eight people off on 2/24/14, and multiple days of having six and seven people on a PTO in a single day.	F 353		
F 356 SS=C	483.30(e) POSTED NURSE STAFFING INFORMATION The facility must post the following information on a daily basis: o Facility name. o The current date. o The total number and the actual hours worked by the following categories of licensed and unlicensed nursing staff directly responsible for resident care per shift: - Registered nurses. - Licensed practical nurses or licensed vocational nurses (as defined under State law). - Certified nurse aides. o Resident census. The facility must post the nurse staffing data specified above on a daily basis at the beginning of each shift. Data must be posted as follows: o Clear and readable format. o In a prominent place readily accessible to residents and visitors. The facility must, upon oral or written request, make nurse staffing data available to the public for review at a cost not to exceed the community standard.	F 356	F 356 For all residents in the facility, the facility shall ensure the daily staffing of both licensed and certified staff is posted and readily available for review. Additionally the facility shall ensure that 18 months of historic daily staffing that was posted is readily available for review if requested. The facility has a policy titled, "Nursing Staff Posting Requirements" that was effective 05/2012 and reviewed 05/2013. This policy shall be made fully operational by the facility. The administrator shall designate an individual responsible for ensuring the facility daily staffing is posted every day. Additionally, the facility administrator shall ensure that all historic daily staffing sheets are kept readily available for a period of 18 months.

F 356	Continued From page 227 The facility must maintain the posted daily nurse staffing data for a minimum of 18 months, or as required by State law, whichever is greater. This REQUIREMENT is not met as evidenced by: Based on observation, interview and document review, the facility failed to ensure the Daily Staffing Hours (nurse staff posting) was posted in a prominent place accessible to be read by residents (including residents in wheelchairs), families and visitors from the public. In addition, the nurse staff posting was not consistently posted daily at the beginning of each shift. This had the potential to affect all 84 residents residing in the facility. Findings include: On 3/10/14, at approximately 11:30 a.m. upon entrance to the facility, the nurse staff posting was observed to be stored in a glass sealed frame at the front desk at the entrance to the facility. The posting was observed to be leaning against a yellow and white binder labeled State Survey Results, behind a basket, and behind a vase containing a bouquet of flowers. A maroon wing back chair was observed to potentially block access to the posting. During random observations on 3/11/4, at approximately 1:00 p.m.; 3/12/14, at approximately 9:00 p.m.; on 3/13/14, at approximately on 3:30 p.m.; on 3/14/14, at approximately 10:00 a.m. the nurse staff posting was observed to be posted at the front receptionist desk. Although the staff posting had	F 356	The QA committee will review the daily staffing sheets on a monthly basis to ensure they are posted and kept as required by federal regulation. This review will occur for 6 consecutive months. The QA committee will then review the need to continue or discontinue the monthly review or to make further recommendations as appropriate. Responsible: Administrator, QA committee Compliance date: 4/28/2014

F 386	Continued From page 237 eating. Care Area Assessment (CAA's) dated 8/9/13, triggered for activities of daily living (ADLs), urinary incontinence, psychosocial wellbeing, activities, dental care and pain. The resident had three face sheets in the chart, the first identified a short-term family medicine provider in Brooklyn Park, the second has the prior medical director hand written in as primary (MD-A), and the third identified the current medical director (MD-B). R103 currently had a physician identified on the medical record as MD-B who took over on 1/1/14. The medical record contained a physician progress note dated 8/11/13, by MD-A. R103 had follow-up urology visits outside the facility on 8/8/13, 8/9/13, and 9/23/13. R103 had follow-up orthopedic visits outside the facility on 8/8/13, 9/19/13, 10/15/13, 12/5/13, and 1/15/14. The medical record lacked evidence of MD-B ever reviewing R103's total program of care, including medications and treatments which would have evaluated the resident's condition and a review of and decision about the continued appropriateness of the resident's current medical regime. The medical record also lacked any evidence a written, signed, and dated progress note which indicated MD-B ever saw R103. The chart lacked evidence of a comprehensive physician review since 8/11/13. R33 was admitted to the facility on 8/22/13, with diagnoses of diabetes, hypertension, chronic kidney disease, chronic pulmonary embolism, vitamin B12 deficiency, Bipolar disorder, and depression.	F 386	This tracking system will also ensure that documentation of physician visit/evaluation is received by the facility and maintained in the clinical record. This includes securing copies of progress notes/visit notes from out of facility appointments. The DON/RCM in concert with ward secretary will ensure this documentation is secured. Finally, this tracking system will ensure that medical/treatment orders/regimen is reviewed and signed by the physician along with other physician orders. On a case by case basis the medical director will evaluate a resident who does not have a primary physician while the facility arranges for a primary physician. Social Services will be actively involved in securing a treating physician. If a resident refuses medical appointment the medical director will be consulted to talk with the resident regarding the risks of refusing medical treatment. Such intervention will be thoroughly documented in the clinical record. The tracking system and the record of physician visits will be reported to the QA Committee for review and further recommendation. This is an ongoing process.

F 428	Continued From page 259 were usually identified on behavior sheets." On 3/14/14, at 10:51 a.m. when asked regarding determining behavior monitoring for resident, DON stated nursing staff along with the social worker would create a behavior plan for the resident. DON verified there was no behavior plan in place for R89. The Medication Regimen Review indicated the consultant pharmacist (CP) reviewed R89's medication regimen monthly. Reviews on 1/18/14, 2/5/14 and on 3/7/14 identified the use of Zyprexa, directed to complete an AIMS (Abnormal Involuntary Movement Scale, an assessment to determine side effects for antipsychotic medications). The recommendations did not identify the lack of target behavior monitoring. On 3/14/14, at 12:15 p.m. CP was contacted via telephone and stated she "did not have her files in front of her." CP stated if she asked for the AIMS, she "would have stopped digging," and further stated "because she would want that addressed [first]." CP stated she did not look for target behavior monitoring when she did her reviews and stated she would only look in the chart and ask the staff. On 3/14/14, at 12:31 p.m. DON verified CP should have evaluated target behavior monitoring and verified the facility should have developed target behavior monitoring. R91: The facility failed to provide consultant pharmacy services that identified lack of monitoring for target behaviors for R91 for anxiety medications.	F 428

F 428	Continued From page 260 The facility failed to identify consultant pharmacy services that identified a lack of a comprehensive assessment of behaviors and non pharmacological interventions related to depression and anxiety for R91, prescribed both anti-depressant and anti-anxiety medications. R91's care area assessments, dated 10/22/13, for Mood, Cognitive Loss/Dementia, Behavior, and Psychosocial Well Being included the same summary statement under the Care Plan Considerations section: "Resident has some behavior r/t [related] medical Dx [diagnosis]. Staff will monitor her behavior and ensure pt [patient] needs are met and she is safe." The assessment did not include a thorough analysis including: specific behaviors exhibited by R91 were to be monitored, causative factors and health diagnoses related to display of behaviors and what interventions have been most effective. R91's current care plan, last reviewed 1/30/14, did not include non-pharmacological interventions related to R91's behaviors related to mood or anxiety. The care plan did identify "Psychotropic drug use: resident uses anti-depression (Prozac) and antianxiety (Buspar) R/t [related to] Dx [diagnosis] of depressant and anxiety" with an intervention to "Observe change in behavior and memory." Review of Medication Administration Record For March 2014 revealed R91 was being administered Buspirone HCL (an anti-anxiety agent) 17.5 MG twice daily for "anxiety", Mirtazapine (an anti-depressant) 30 MG at night time for "depression" , Prozac (an anti-depressant) 30 MG every day for "depression", and Ativan (a benzodiazepines	F 428

F 428	Continued From page 261 anti-anxiety agent) 1 MG twice daily as needed for "agitation." R91 had used the as needed Ativan twelve times from 3/1/14 to 3/17/14. A review behavior intervention monthly flow record for February and March, February and January 2014 revealed behavior monitoring for sad facial expression and hours of sleep. A review of progress notes for January, February and March 2014 revealed no notes regarding behavior monitoring related to anxiety or depression. On 3/14/14 at 2:14 p.m. the social service designee (SSD) reported the care area assessments for R91 were completed prior to her employment at the facility. SSD reported the care area assessments were not comprehensive, did not identify what behaviors were occurring. SSD confirmed R91's care plan did not address her mood or anxiety issues. On 3/17/14 at 11:37 a.m. LPN-D reported the facility had not been monitoring for behaviors related to the use of buspirone. She said she would check how the facility was monitoring behaviors related to the use of as needed Ativan. No further information was provided. The pharmacy Medication Regimen Review for October, November, December, January, February and March 2014 were reviewed. No suggestion including behavior monitoring, assessment or non-pharmacological interventions were included. On 3/17/14 at 1:11 p.m. the consultant pharmacist [CP] reported she would expect indications for use to be monitored for all	F 428

F 428	Continued From page 262 medications. CP reported she felt uncomfortable commenting on R91's medication regimen as she did not have access to her medical record during interview. CP was offered, but declined an opportunity to contact surveyor later with more information or provide further documentation. R1's potential side effects, sleep pattern and mood monitoring irregularities had not been identified by the consultant pharmacist. R1 was observed on 3/12/14, and 3/13/14, outside in the front designated smoking area sitting on a motorized wheelchair (w/c) smoking and dozing off with her head and chin drooping jerking up and down. During observation R1 appeared to be struggling to keep her eyes open. On 3/12/14, at 1:03 p.m. surveyor observed R1 sitting on her bed stated she was tired "All the time" and had told the facility staff but thought it was related to her "Hepatitis-C" which she was waiting for a particular medicine. R1 verified she had burn holes on her clothing stating from her cigarette "The ashes flicking off." R1 further stated she had never had a burn from the smoking but acknowledged she had neuropathy and being tired was just not working with her smoking at times. R1's diagnoses included Insomnia, chronic pain, arthritis, osteoporosis, depression and diabetes mellitus obtained from the MDS dated 12/6/13. Physician's Orders dated 2/26/14, indicated R1 received the following medications: -Trazodone 300 mg by mouth at bedtime (HS) for insomnia -Venlafaxine (Effexor) 150 mg by mouth daily for	F 428

F 428	Continued From page 263 depression -Zolpidem (Ambien) 5 mg by mouth at HS as needed (PRN) for insomnia Review of the Monthly Regimen Review dated 12/11/13, through 3/7/14 indicated "NO New Suggestions" and lacked evidence that the consultant pharmacist had identified the irregularities. When interviewed on 3/13/14, at 9:44 a.m. the LPN-D stated if a resident was on sleep aides and an antidepressant behavior or mood monitoring was supposed to be documented in the "Red book." LPN-D went over the "Red book" and the medical record verified documentation was lacking. When interviewed on 3/13/14, at 10:23 a.m. SSD stated she was responsible to check with resident's regarding the mood and how they were felt but at the same time since nursing was providing the resident's direct care the staff needed to monitor the side effects and behaviors/ mood for all medications R1 was taking including the antidepressants and sleep aides. She further stated "I would check with R1 occasionally as she is alert and able to verbalize how she felt." When interviewed on 3/14/14, at 4:00 p.m. the facility medical director stated R1's side effects, mood and sleep patterns should have been monitored and since R1's antidepressant and sleep aides had been increased R1 needed to go back to see the prescribing physician to re-evaluate the effectiveness of dosage increase. When interviewed on 3/17/14, at 8:17 a.m. the DON stated she expected the CP to have alerted	F 428

F 428	Continued From page 264 the facility that these pieces were lacking during monthly review. When interviewed on 3/17/13, at 1:11 p.m. about best practice; monitoring of sleep patterns and side effects the CP stated "I feel cornered by the surveyors asking me questions about residents which I don't have direct access to their information and I don't feel comfortable." The Mood MDS dated 12/6/13, identified R1 had this symptoms "Feeling down, depressed, or hopeless, trouble falling or staying asleep, or sleeping too much, feeling tired or having little energy, poor appetite or overeating, feeling bad about yourself-or that you are a failure or have let yourself or your family down and thoughts that you would better off dead, or of hurting yourself in some way." The assessment indicated R1 all the symptoms were nearly every day. CAA dated 12/10/13, indicated R1 used antidepressants, and sleep aides, and indicated staff would continue to monitor for effectiveness of the antidepressants and sleep aides as well as for side effects. In addition the CAA indicated R1 was at risk for adverse side effects. No temporary and comprehensive care plans developed on medications since R1 had been admitted to facility on 11/30/13. On 3/17/14, at 12:13 p.m. facility policy for side effects and behavior/mood monitoring was requested but was not provided. The Videll Healthcare, LLC policy on Psychoactive Medication Management, last reviewed on 5/2013, directed staff "1. Psychoactive medication management begins during the pre-admission process. Key data	F 428

F 431	Continued From page 267 ensure incoming (newly delivered medications) and outgoing (medications to be sent back to pharmacy or destroyed) medications were handled and disposed of properly. The facility lacked a system to ensure the medication storage refrigerator was cleaned and defrosted. These practices had the potential to affect all 84 residents. Findings include: NORTH/WEST HALL TREATMENT CART On 3/18/14, at 9:28 a.m. a licensed practical nurse (LPN)-G stated the Treatment "insulin" cart for the North hallway had insulin's, glucometers machines, treatment supplies, and "medications for residents who do not want the TMA to administer their medications." The Narcotic book was observed to be a large black bound book. When asked to explain the system for narcotic reconciliation, LPN-G removed a loose sheet of paper labeled Shift/Shift Narcotic Count Record Month of: March 2014, which was loosely placed in the front of the narcotic book. LPN-G stated two nurses from each shift were expected to count the narcotics together and compare them to the register (bound book). The Shift/Shift Narcotic Count Record was noted to have 23 blank spaces. LPN-G stated when the nurses do the narcotic count, they needed to document they were completed and needed two nurse signatures (leaving shift counting with the oncoming shift). LPN-G verified the blank spaces indicated a count may not have been completed. LPN-G verified there was a lack of signatures across all different shifts. LPN-G stated they could not speak for those days (signatures were missing), but verified if it was not signed it could not be verified as completed. LPN-G verified their	F 431	The DON/RCM will do random checks of the medication/treatment carts weekly X6 for cleanliness and sanitation. These random checks will be reported to the QA committee for review and further action as indicated. Each TMA and/or licensed nurse is responsible to ensure that medications are properly stored in the medication cart. Special attention is given to ensuring nasal preparations are stored separately from eye preparations. The DON/RCM will do random audits of the medication carts to ensure medications are properly stored. The random audits are reported to the QA committee. This is an ongoing process. The facility will also request the pharmacy check the carts on a random basis for medication storage and medication/treatment care maintenance. The reports from these pharmacy checks will be reported to the QA Committee for review and further action as indicated.

F 431	Continued From page 268 own signature and confirmed with the surveyor the narcotic count currently matched the amounts in the Narcotic Book. When LPN-G was asked what they did or should do when blank spaces were noted and the narcotic count was not completed, LPN-G stated they were "responsible to report" the lack of a narcotic count and verified they had not reported other unsigned days of the narcotic counts. LPN-G verified the loose sheet could be removed, copied or "lost" and verified the sheet of paper was started to be used on 3/5/14 (arrows indicated the form was initially started on the evening shift). The internal compartments and drawers of the Treatment cart were observed to have a heavy build-up of a white powder in the bottom and back aspects of the second drawer. LPN-G, present during the observation, stated the treatment carts were cleaned "weekly" and by the night shift. LPN-G was unclear what the white powdered substance was from and was unclear if the cart cleaning was documented. NORTH HALL TMA CART On 3/18/14, at 10:03 a.m. the TMA cart was observed with TMA-B present during the observation. The third drawer was observed to have many red colored, sticky, but dried spills in the bottom of the drawer; approximately two loose pills were also observed on the bottom of the drawers (second and third drawers). A white colored powder, debris of paper and foil pieces was observed to built-up in the corners of the drawer. TMA-B verified R51's opened artificial tears eye drops and opened tube of LubriFresh eye ointment, R111's Deep Sea nasal spray (Nasal Moisturizer), R15's Oxymetazoline HCl (used to treat nasal congestion), R70's Fortical	F 431	The medication refrigerator is checked for appropriate temperature every shift. On a weekly basis the medication refrigerator is checked for cleanliness and sanitation. The refrigerator will be thoroughly cleaned on a monthly basis at a minimum and more frequently as needed to keep clean and sanitary. The medication refrigerator will be defrosted on a monthly basis. The DON/RCM will do random checks of the medication refrigerator to ensure cleanliness and sanitation. These checks will also ensure the refrigerator is defrosted appropriately. The temperature log and weekly refrigerator check will be reported to the QA committee for review and further recommendation as indicated. Responsible: DON, RCM, licensed nursing staff Compliance date: 4/28/2014

F 431	Continued From page 269 nasal spray (used to treat osteoporosis) and fluticasone propionate nasal spray (used for the treatment of seasonal or perennial nasal allergy) symptoms, and R81's fluticasone propionate nasal spray were all stored together loosely in the top drawer of the cart. All the nasal and eye bottles were opened. TMA-B stated the cart was only cleaned when staff "volunteered" to clean it. TMA-B verified the presence of a large yellow pill in the second drawer back right corner, a pinkish colored pill third drawer back right corner, and verified the build-up of debris and spills. TMA-B stated there was no schedule to clean the medication carts. The Shift/Shift Narcotic Count Record was observed to be a loose sheet of paper placed next to the bound Narcotic Book. TMA-B verified 12 empty spaces and times the narcotic count was not reconciled. TMA-B verified the form was started on the evening shift of 3/5/14. WEST TMA CART On 3/18/14, at 10:27 a.m. TMA-A stated she was unclear on the frequency of the medication cart cleaning. The top working space of the cart had multiple areas of light pinkish colored staining on the surface. The third and fourth drawers were observed to each have three areas of sticky, dried, red spills built-up on the bottom of the drawers. TMA-A stated she did not know when the cart was last cleaned; TMA-A stated she believed the debris, spill build-up was from longer than a week. Further observation revealed all four drawers had a build-up of multiple loose pills, paper and foil debris, and a build-up of powder in all drawers. TMA-A, present during the observations, verified all findings.	F 431

F 431	Continued From page 270 TMA-A verified there were eight blank signature spaces on the Shift/Shift Narcotic Count Record (also a loose sheet of paper). TMA-A verified the signature space for the night shift/day shift count was blank and stated she should have "signed off for today" and did not. TMA-A was unclear why. TMA-A stated the form was started on 3/5/14, on the evening shift. SOUTH TMA CART On 3/18/14, at 10:36 a.m. TMA-D stated the cart was cleaned weekly, but she was "off last weekend." TMA-D remained present during the observation of the cart and verified a heavy build-up of white powder, paper and foil debris, approximately five different (pink, yellow, white) pills in all the drawers of the cart including a loose capsule in the bottom of the locked narcotic drawer. A pinkish colored staining was observed on the top surface of the cart. TMA-D wiped at the stain with a wet towelette. TMA-D showed the surveyor the towelette was stained pinkish color and the stain could be removed. TMA-D then removed the loose capsule from the narcotic drawer (even though TMA-D had verified the presence of multiple loose pills in the other drawers) and was observed to place the pill into the trash receptacle on the side of the cart. When the surveyor asked if that was where she normally disposed of medications, TMA-D stated, "Oh, I'll dig that out." Immediately dug into the trash and removed the capsule and placed it in a soufflé cup (paper medication cup). TMA-D stated she should report it to the nurse. Although the South Shift/Shift Narcotic Count Record had all signatures for all shifts and days of March 2014, the form was noted to start on	F 431

F 431	Continued From page 271 3/5/14, on the evening shift. In addition, the page was loosely stored on the top of the cart and could easily be lost, removed or altered. SOUTH/EAST TREATMENT CART On 3/18/14, at 10:48 a.m. LPN-A was observed to be already cleaning and organizing the South/East Treatment cart. LPN-A stated on 3/5/14, she implemented the "Narcotic Count Record sheet" for the narcotic counts. LPN-A stated prior to starting the sheet, each cart had a different small book which staff was "signing in and out of." LPN-A showed the small book for the South/West cart and stated, "It didn't make sense, you can't make sense of this." LPN-A and surveyor reviewed the small black bound book together at the time. The book was observed to have multiple pages of blank spaces, a vague system of lines, boxes and sporadic signatures with various dates. LPN-A stated there was "no system" for prevention of narcotic diversion. LPN-A verified all Shift/Shift Narcotic Count Record forms were loose sheets of paper and if staff observed blank spaces, it should be reported to the director of nursing (DON). - At the time of the observation and interview, TMA-D approached LPN-A and reported the capsule (from the narcotic drawer of the South TMA cart, previously disposed of in the trash by TMA-D needed to be destroyed. LPN-A directed TMA-D to dispose of the capsule in the hopper. TMA-D left the area alone, LPN-A did not accompany TMA-D to dispose of the medication. LPN-A stated to the surveyor the capsule should have been disposed of in the hopper after the TMA reported it to the nurse. When LPN-A was informed the cart the capsule came from had other loose pills in the bottoms of the drawers, and the capsule had potentially come from the	F 431

F 431	Continued From page 272 bottom of the locked narcotic drawer, LPN-A verified only one capsule was presented and the rest should have been reported (from all carts) and disposed of in the hopper. LPN-A was unclear if two nursing staff needed to dispose of wasted medications together, or if the medication required a pharmacist to be present. - LPN-A stated there was no policy for medication cart cleaning, the cleaning "should be done" at least weekly and "they know they [TMA/nursing staff] should clean it [the cart] after each use." The East TMA Cart and South/East Treatment Cart Shift/Shift Narcotic Count Record: Month of March 2014 were both noted to be loose sheets of paper and started on the evening shift of 3/5/14. The East TMA Cart was noted to have 24 empty spaces, including a complete day of no narcotic counts on 3/17/14. The East TMA cart had 22 empty signature spaces. MEDICATION ROOM On 3/18/14, at 10:59 a.m. LPN-D assisted the surveyor with access to the locked medication storage room directly behind the nursing station. Upon observation, the counter area was observed to be completely filled with multiple bottles and bags of various medications, and to contain two locked plastic (tackle type) boxes. A large grey bin was observed stored on top of a small white refrigerator. The bin was observed to be overflowing with boxes and bottles of medications. LPN-D, present during the observation, stated the medications on the counter were "just brought in," one of the locked boxes was the "emergency kit," was unclear what the other locked box was for, and the medications in the large bin were medications "waiting to be returned to the pharmacy for credit." LPN-D	F 431

F 431	Continued From page 273 pointed drawers in a cupboard directly across from the overflowing bin and stated the medications stored there were "over flow" medications for residents currently admitted to the facility. LPN-D verified the medication room was cluttered, verified there was no clear system for preventing mixing of new, old and current medications. LPN-D was unclear on the documentation for the medications to be returned to the pharmacy for credit. - The refrigerator was observed to have "over flow" insulin, vaccination and suppository medications appropriately stored. The freezer was observed to have a two-three inch thick build up frost. Two gel packs were observed to be encased in the frost. LPN-D was unclear when the refrigerator was last cleaned or defrosted. LPN-D was unclear on the schedule for cleaning and defrosting of the medication storage refrigerator. On 3/18/14, at 11:06 a.m. DON stated she expected the medication carts to be cleaned "regularly." Stated there maybe policies for medication storage, cart cleaning and narcotics, but then stated the nursing staff were not trained on the policies. DON explained staff should be documenting when they completed the narcotic counts and explained the sheets were started on 3/5/14. DON stated prior to 3/5/14, each cart had a different small book, binder or note book. The DON verified medications should be stored separately (by route). A letter dated 3/18/14, directed to the facility vice president, indicated the PharMerica Pharmacy Director was "following up on your inquiry regarding drug destruction." The letter indicated, "The pharmacy consultant is available, during	F 431

their monthly visits to assist in Controlled Substance Drug Destruction if requested by the facility. I have also made myself available to facilities who need destruction, more frequently or out of cycle of the visit." The letter further indicated, "The non-controlled medications can and should be returned to the pharmacy, where we send them off pursuant to current pharmacy regulations for destruction." The letter indicated attached were policies for medication handling, such as destruction of medications/returning medications to the pharmacy.

The Returning Medications to the Pharmacy policy dated 9/10, identified which medications would be accepted for return credit. The policy directed, "2. Prior to acceptance of any returned medications/supplies, the pharmacy must receive form the nursing care center, documentation of all returned medications/supplies on the appropriate forms, including any state specific form as required by regulation." The policy further indicated, "5. All return medications/supplies must be transported back to the pharmacy in a sealed traceable container and prevent diversion or adulteration of the return medications/supplies." The policy identified the DON and consultant pharmacist as responsible to monitor for compliance and directed to use "approved containers" to separate and securely store different types of pharmaceutical waste. The policy further indicated medications (non-controlled) "shall be destroyed by the nursing care center in the presence of a pharmacist or nurse, and one other witness as per state regulation. Documentation of non-controlled medication may be completed on a medication administration record (MAR), a medication disposition log or form..." The policy

F 441 SS=D	483.65 INFECTION CONTROL, PREVENT SPREAD, LINENS The facility must establish and maintain an Infection Control Program designed to provide a safe, sanitary and comfortable environment and to help prevent the development and transmission of disease and infection. (a) Infection Control Program The facility must establish an Infection Control Program under which it - (1) Investigates, controls, and prevents infections in the facility; (2) Decides what procedures, such as isolation, should be applied to an individual resident; and (3) Maintains a record of incidents and corrective actions related to infections. (b) Preventing Spread of Infection (1) When the Infection Control Program determines that a resident needs isolation to prevent the spread of infection, the facility must isolate the resident. (2) The facility must prohibit employees with a communicable disease or infected skin lesions from direct contact with residents or their food, if direct contact will transmit the disease. (3) The facility must require staff to wash their hands after each direct resident contact for which hand washing is indicated by accepted professional practice. (c) Linens Personnel must handle, store, process and transport linens so as to prevent the spread of infection.	F 441	F 441 For sampled residents R64 and 56 and for all residents at the facility, the facility shall ensure staff change gloves appropriate during cares. The facility shall ensure that sharps containers are changed out when they are 2/3 full and replaced with empty containers. The facility shall ensure that smoking areas are kept clean and sanitary for anyone who uses the designated smoking areas. The facility has polices related to hand hygiene and the disposal of used needles. The facility shall ensure these policies are operational. The facility defaults to the CDC standard for hand hygiene. Staff will be educated in the CDC guidelines for hand hygiene and use of universal precautions including gloves. Sharps containers will be inspected daily by the Director of Maintenance and containers that are 2/3 full or more will be immediately changed out. Smoking areas will be inspected daily for cleanliness and sanitary conditions by the Director of Maintenance. The areas will be cleaned at least 2x/shift on both the day and evening shift.

F 441	Continued From page 278	F 441		

When interviewed on 3/13/14, at 1:47 p.m. the licensed practical nurse (LPN)-A stated the sharps container should not been filled past the marked line. She further stated "The nurse knew better. Oh my God, he needs to see this to be educated." Surveyor stated to LPN-A that had been observed since that morning and LPN-B had continued to force the syringes into the container.

When interviewed on 3/13/14, at 1:58 p.m. LPN-B stated he had noticed it was full in the morning when he had gotten on the floor but did not know the key to open the sharps container was in the treatment cart keys he had been carrying. He further stated he was going to change the sharps container then "Thank you."
-At 2:01 p.m. LPN-B was overheard asking LPN-D where the filled sharps containers were stored and both LPN-B and LPN-D were observed leaving the hallway with the filled sharps container.

When interviewed on 3/13/14, at 2:03 p.m. the director of nursing (DON) stated her expectation was the sharps container was not supposed to go above the marked line. The DON shook her head during the conversation.

Hand washing and gloving practices to prevent the spread of infection was not observed during personal cares.

On 3/13/14, at 7:56 a.m. R64 was assisted by nursing assistant (NA)-D with morning cares. NA-D applied gloves, and then went to the

F 441	Continued From page 279 bathroom sink and wet several clean washcloths with water. NA-D returned to the bedside with the washcloths and used the first clean washcloth to wipe R64's peri-area from back to front. NA-D then used a second wet washcloth to cleanse R64's buttocks. NA-D applied Remedy Calazime paste to R64's perineum and groin folds. The surveyor noted two open areas on the scrotum, NA-D stated he had told the nurse about those and then applied more Remedy Calazime paste to the areas with his gloved hands. NA-D applied a clean incontinent brief still wearing the visibly soiled gloves, then also touched R64's arm, their shoulder and their hospital gown. NA-D applied R64's clean pants still wearing the soiled gloves. NA-D left the room to obtain assistance from NA-B and applied new gloves without washing their hands. NA-D sat R64 up on the side of the bed to dress the upper body, applied deodorant to R64's underarms and dressed R64's upper body. After NA-D and NA-B got R64 into the wheelchair using a standing lift, NA-D wiped R64's head with a third washcloth, attempting to smooth the hair down rather than combing, then used a fourth washcloth to wipe R64's mouth. During interview on 3/13/14, at 8:31 a.m. NA-D said he would change gloves after done with incontinence care on residents. NA-D said he usually washes his hands when he comes in a room to complete cares and washes his hands when cares are finished. NA-D confirmed he did not change gloves or wash his hands after completing the peri-care on R64 and between touching his clean brief, clothing, shoulder and arm. On 3/13/14, at 8:33 a.m. NA-B was completing morning cares on R33. NA-B handed R33 a wet	F 441

F 441	Continued From page 280	F 441		

washcloth with her gloved hands. NA-B picked up the residents urinals which were three quarters full of urine. NA-B went to the bathroom and dumped the urine in the toilet, then filled a disposable plastic cup with water from the faucet. NA-B used the plastic cup to pour water into the urinals to rinse and dumped the urinals again into the toilet. While wearing the same gloves, NA-B wiped the entire top of the toilet seat with paper towels to remove urine and water that had splashed onto the rim. While still wearing the same set of gloves, NA-B then wiped down the edges of the bathroom sink including the faucet handles with another set of paper towels. NA-B changed R33's garbage bags and then removed the soiled gloves. NA-B went to the resident bathing area and obtained a clean gown, returned to R33's room and then washed her hands, wiping the bottom of the sink out with her ungloved hands afterwards.

During interview on 3/14/14, at 8:47 a.m., the DON said it would be a concern if staff did not wash their hands in between performing peri-cares and then touching clean linen and the resident. She also added it would be a concern if staff wiped the lid of the toilet seat off and then did not change gloves or wash hands before wiping down the resident's sink.

The facility Handwashing/ Hand Hygiene policy revised April 2012, indicated all personnel shall follow the handwashing/hand hygiene procedures to help prevent the spread of infections to other personnel, residents, and visitors. In addition the policy indicated handwashing would be completed after handling soiled or used linens, dressings, bedpans, catheters and urinals; after handling soiled equipment or utensils; after

F 465	Continued From page 282 transfers. However, R5 needed supervision for toileting which included toilet use, transfers on/off the toilet, adjusting and cleansing self after elimination. During the tour at 10:11 a.m. the director of facility operations verified the armrests were loose and wobbly, stated the mounting blots needed to be tightened. He further stated the rubber to one of the legs of the armrest was missing and daily the maintenance staff did one room check. It was the staff's job to look at the whole aspect of the room and report any concerns. "I mean each room is checked every 87 days." R44's toilet armrest was loose and unsafe. On 3/11/14, at 11:29 a.m. R44's left side toilet armrest was observed loose; bent inward at the supporting base and wobbled loosely greater than four to five inches span; the armrest loosely swung out to the left with ease. R44 at the time was observed to be ambulating independent with walker and stated she wanted to use the bathroom. -At 11:30 a.m. trained medication aide (TMA)-A was notified and verified the armrest was loose. TMA-A stated "I can't answer that question, I will have to find someone else who knows the answer" when asked if she was aware of the equipment being broken. Although surveyor repeatedly stated to TMA-A if "she" knew, TMA-A repeated she could not answer the question and would have to find a staff who knew. TMA-A was observed reporting to a male staff and led him by the hand to the bathroom. -At 11:32 a.m. TMA-A stated the maintenance would fix the equipment. Maintenance staff (M)-B	F 465	Common area carpets will be cleaned professionally. Resident rooms will be professionally cleaned on a rotating schedule. All EZStands will be inspected and will be cleaned and repaired as necessary. All dining room ceiling tiles will be inspected and cleaned as necessary. Housekeeping will be provided with a daily room check list to ensure all aspects of the resident room is attended to and cleaned. Additionally, all housekeepers will be educated on the responsibilities of their jobs. Director of Maintenance will do weekly and random daily audits of resident rooms after housekeeping services have been provided. These daily/weekly audits will be reported to the facility administrator and the administrator will sign the audits. Additionally, these audits will be reported to the QA Committee for review and further recommendation as indicated. The Director of Maintenance was counseled and educated about his job responsibilities. Responsible: Administrator, Director of Maintenance Compliance date: 4/28/2014

On 3/10/14, at 4:41 p.m. the air vent radiator was observed to have several rusty patches and paint was scratched off in the front aspect of the radiator. R62's quarterly MDS dated 11/27/13, indicated R62 had moderate impaired cognition, required assist of one staff with cares and required one staff assist during ambulation. When interviewed at 10:16 a.m. the director of facility operations verified the finding and stated "This is a problem in every single room, we do not have a plan for up keeping this and if we were to fix they will have to be sanded before painting them and we will have to have a set schedule to do all the rooms with concerns." R56's radiator was noted to be with ill repair and was not clean. On 3/15/14, at 11:10 a.m. the radiator was observed with several patches of chipped paint and with grey fluffy build up substance on the vents at the top of the radiator. R56's quarterly MDS dated 12/29/13, indicated R22 had intact cognition, and required assist of one staff with ADL's and used the wheelchair for mobility. At 10:49 a.m. the director of facility operations stated "That's dust. It has probably never been cleaned."	F 465

R6's radiator was noted to be with ill repair.

On 3/11/14, at 8:58 a.m. the radiator was observed to have several rusty patches on the front aspect of the radiator and an accumulation of a thick fluffy grey build up substance on the vents.

R6's quarterly MDS dated 12/29/13, indicated R22 had intact cognition, and was independent with all functional status.

R22's radiator was noted to be in ill repair.

On 3/13/14, at 9:56 a.m. R22's radiator was observed with multiple rusty patches on the front and top aspects parallel to the window seal. In addition, multiple dark brown spots were observed on the entire carpet area between the dresser and the bed which extended to the radiator.
R22's quarterly MDS dated 1/9/14, indicated R22 had moderate impaired cognition, required assist of one staff with walking in the room and transfer needs, and R22 used both the walker, wheelchair for mobility in his room.

At 10:37 a.m. the director of facility operations verified the findings stated again the was a facility wide problem with the radiators and for the carpet he had been pushing for R22's flooring to be changed in the past because of the challenges of maintaining it clean but because of R22's risk for falls the vinyl flooring was not an option. He added to state the carpet was shampooed two times a month.
R33's light cover lens was uncovered and radiator was with ill repair.

On 3/11/14, at 9:30 a.m. the light lens over light at end of R33's bed was observed missing which exposed the wires and the bulbs. R33's space had a strong smell of urine. The two urinals at R33's bedside dresser noted one to be half full of urine and the other one was full with urine. In addition, the radiator was observed with multiple rusty patches, and chipped paint.

R33's quarterly MDS dated 11/13/13, indicated R33 had intact cognition, required assist of one staff with toileting and transfer needs, and R33 used both the walker, wheelchair and limb prosthesis for mobility.

On 3/17/14, at 11:10 a.m. both the urinals were observed hanging on R33's bedside dresser empty, director of facility operations verified R33's space had a strong smell of urine. He stated the lens was missing because the facility had an unpaid bill of forty seven dollars with a particular electric lighting company and when that was paid off the facility would be able to replace the lens and the bulbs as there were no extra bulbs.

Carpet:
R91's carpet was not kept clean

On 3/11/14, at 8:33 a.m. during interview R91 stated, "The carpet is very nasty. My roommate once had an accident and was never cleaned." "I hate to walk on this carpet and this is dirty."
-At 8:47 a.m. observed several rusty patches and chipped paint in the front aspect of the radiator.

R91's admission MDS dated 10/15/13, indicated R91 had intact cognition, had functional limitation of the lower extremity on one side, was un-steady

F 465	Continued From page 287 and needed assist of one with transfers and used both the walker and wheelchair for mobility. On 3/17/14, at 11:30 a.m. the director of facility operations verified the carpet was not clean "I see it is not clean." He further stated the radiators had never been maintained. R72's carpet was not kept clean On 3/11/14, at 2:30 p.m. the carpet was observed with multiple red stains in the room on the carpet. At 10:32 a.m. the director of facility operations verified the findings stated, "It's dirty am not sure if it is juice and seriously I can show you our carpet shampooer as it is not heavy duty." R72's annual MDS dated 2/18/14, indicated R72 had moderate impaired cognition, had functional limitation which needed assist of one staff and used wheelchair for mobility. Mechanical lift: E-Z stand was not clean On 3/13/14, at 7:15 a.m. the E-Z stand 2 stored on the alcove on the South Hall was observed with thick grey fluffy build up on the base, the left bar were observed with vinyl peeling off which exposed the foam underneath and the paint was chipping off on the handles making it not a cleanable surface. On 3/17/14, at 11:37 a.m. director of facility operations verified the build-up stated was "Dust/dirt" and the other concerns he stated he was responsible for maintaining all the mechanical lifts which included the cleaning and up keep maintenance. Dining room:
Dining room ceiling was not clean

On 3/10/14, at 4:45 p.m. during a dining observation the ceilings at the main dining room was observed to have several brown stained tiles and slightly to the middle of the ceiling were observed multiple red spots/stains on several ceiling tiles.

On 3/17/14/14, at 11:49 p.m. the director of facility operations verified the ceiling tiles water damaged stains. The director of facility operations stated that was from the water pipe condensations caused by extreme temperature changes. He further stated there was no up keep plan for the concern but had brought the concern to cooperate nine months ago but had thought the renovation was going to happen sooner. He added that he was not aware of the red spots/stains on the ceiling.

The Maintenance Request Log policy and procedure revised April 2012, directed "Administrator or designee will complete monthly audits to identify preventative Maintenance needs and will document identified repairs in log."

The undated Carpet Cleaning policy directed "Resident rooms are to be shampooed every six months. "Excessive spills and accidents will require more frequent shampooing as needed."

The Home Like Environment policy dated August 2013, directed "Videll Healthcare, LLC facilities shall provide a safe, clean, comfortable, and homelike environment."

F 490 SS=F	483.75 EFFECTIVE ADMINISTRATION/RESIDENT WELL-BEING A facility must be administered in a manner that enables it to use its resources effectively and efficiently to attain or maintain the highest practicable physical, mental, and psychosocial well-being of each resident. This REQUIREMENT is not met as evidenced by: Based on interview and document review, the administrator failed to provide adequate supervision to residents, which resulted in Immediate Jeopardy (IJ) issues at F223 related to the failure of the facility to prevent abuse, and F323 related to failure to supervise (unsafe smoking, and unsafe mechanical lift transfers); in addition, the administrator failed to adequately oversee care to ensure care and services were provided to prevent pressure ulcer development which resulted in a harm level deficiency at F314; the administrator also failed to ensure vendors were paid in a timely manner to ensure services were received in an uniterrupted manner. These administrative failures had the potential to affect all 84 residents in the facility. Findings include: Refer to F223: R56 had informed facility staff that she had suffered emotional, physical and verbal abuse from R63, and the facility did not take adequate precautions to protect R56 from the alleged physical, verbal and emotional abuse. Refer to F225 and F226: The facility failed to appropriately screen 6 of 6 newly hired	F 490	For sampled residents and for all residents at the facility, the governing body shall ensure there are resources available for establishing and maintaining policies and for management of the facility. The corporate governing body has appointed permanent and interim facility administrators that are licensed by the state of MN. Currently the corporate interim administrator is seated and the appropriate notification letter was sent to the state. Additionally, a permanent administrator has been hired. A letter will be sent to the state when he takes over the facility from the corporate interim administrator. The corporate governing body has secured an interim DON licensed in the state of MN as an RN. The appropriate notification letter was sent to the state. Additionally, a permanent DON is being recruited and the governing body has extended an offer of employment. A letter will be sent to the state when the newly hired DON takes over the facility from the interim DON.

F 490	Continued From page 290 employees (licensed practical nurse [LPN]-G, nursing assistant [NA]-A, LPN-F, NA-K, NA-D, NA-I) reviewed for screening of new employees. The facility failed to immediately notify the administrator and the State agency (SA), and failed to initiate investigations, for allegations of abuse, neglect and mistreatment for 4 of 5 residents (R21, R62, R71, R17) in the sample reviewed for abuse prohibition. Refer to F309 - The facility failed to provide medications for pain as prescribed by the physician and care planned for 1 of 3 residents (R41) in the sample reviewed for pain. Refer to F314: The facility failed to provide repositioning, comprehensively assess skin risk factors, assess and notify the physician of new pressure ulcer development in a timely manner, and provide pressure redistributing devices in the wheelchair for 1 of 1 resident (R64) reviewed for pressure ulcers. R64 experienced actual harm due to development of two stage II pressure ulcers (Partial thickness skin loss involving epidermis, dermis, or both. The ulcer is superficial and presents clinically as an abrasion, blister, or shallow crater). Refer to F319 - The facility did not ensure treatment and services were provided to aid in healthy adjustment to living in the facility for 1 of 1 resident (R91) identified as having concerns related to mood and aggressive behavior. Refer to F323: The facility failed to provide adequate supervision and interventions to ensure safe smoking practices for 3 of 28 residents (R36, R1, R22) who currently smoked in the facility. The facility's failure to provide supervision	F 490	The governing body does have policies and procedures available to the facility on the corporate remote desk top. The governing body regularly reviews and revises as necessary existing policies and procedures. The facility is notified when a policy is revised so they can read it and ensure the proper education about any changes is completed. The governing body has placed nationally accepted standard of care references at the nurses' station for the clinical staff. These standards are referred to in many of the corporate policies and procedures. The social worker that was present during the survey submitted resignation prior to the survey. The governing body in concert with the facility was recruiting for a licensed social worker at the time of the survey. The governing body has secured the services of interim social workers and the facility has 2-3 social workers in the building at least 5 days/week. The governing body continues to recruit for a qualified licensed social worker. The interim social workers will remain in place until an appropriate licensed social worker is hired and fully oriented.

F 490	Continued From page 291 and a safe environment to prevent potential burns from unsafe smoking practices constituted an immediate jeopardy for R36, R1, and R22. This practice resulted in an Immediate Jeopardy being called on 3/12/14, at 5:00 p.m. In addition, the facility did not ensure safe use of a mechanical stand lift for 1 of 2 residents (R64) in the sample. This practice resulted in an Immediate Jeopardy component being called on 3/13/14, at 1:50 p.m. The Immediate Jeopardy was removed on 3/16/14, but non-compliance remained at the scope and severity of a pattern, with no actual harm with the potential for more than minimal harm at a pattern. Refer to F353 - The facility did not provide sufficient staff to ensure residents received care per the care plans. This had the potential to affect all 49 of 84 residents who are consistently dependent for cares, and 2 of 2 residents (R11, R41) who occasionally need assistance for cares in the facility. On 3/14/14, at 2:00 p.m. the facility owner verified four administrators had been in the facility since the last survey 6/2013. When asked if he had been aware of the complaints received by the Office of Health Facility Complaints (OHFC) and from residents of: resident's not receiving showers or getting cares, insufficient staffing, and lack of bill paying (for the facility vendors), the facility owner/governing board stated "we were aware of staffing and doing everything that we can. The fact that there is any issue is disappointing." "Can't compromise care over shifting gears and change and transition. Happy to have the DON here and a new administrator." The facility owner further stated the chief operating officer (COO), will be here more often,	F 490	The governing body has directed the restructure of the clinical department. This restructure has included adding 2 resident care managers (one on the day shift and one on the evening shift), adding an RN for the admission process, transitioning the TMAs away from the med carts to the bedside for ADL care and adding licensed nurses to the med carts. The governing has directed the facility to add a full time human resource staff to ensure that employee background checks and credential verification is completed prior to working. Additionally, the HR staff will track and ensure performance evaluations are completed timely and that HR files are properly maintained for all employees. The governing body reviewed and adopted the Vulnerable Adult Act as part of the facilities abuse prohibition process. This VA Act is available to the staff both online and in the facility specific folder on the remote desktop. Please refer to the POC documented at F 223, F225, F226, F309, F314, F319, F323, F353, and F490 for additional information regarding the governing body's direction to the facility related to correction of the statement of deficiencies.

F 490	Continued From page 292 she will make sure that anything put into place was implemented. He further commented, "We ourselves are having corporate restrictions, to make sure at least one of us is here every week." The COO acknowledged corporate consisted of "my wife is a social worker (SW) and was the corporate SW consultant (CSW), and had been here doing corporate team building. We have been in health care, hands on, with tough populations for 21 years. We are a small company with four facilities. We like homes that we can work with that are community based care. We've been out here more and we're going to continue to be here more, and are planning renovations and capital funds into the building." The facility owner stated to the COO, "Were talking about staffing and I let (surveyor) know that we are remedying it with immediacy. When asked about the Medical Director (MD-B) contract, and MD-B's understanding that she would not be seeing patients. The COO stated, "That is not what I have with any other facilities, it is not the intent of the contract. I have been made aware of that and I have directed that we went to her and told her that she needs to do that. The facility also had to find another medical director or a back up medical director to get the work done." The facility owner added, "My understanding is this is at late as last week that she was going to in the interim cover us." When were you notified of the IJ? The COO stated at 7:30 p.m. on Tuesday when I landed in Seattle, and I was on a plane at 5:30 yesterday morning to come here, I was there all day yesterday and most of today." On 3/17/14, at 10:40 a.m. the administrator and corporate interim administrator (CIA) were interviewed. The administrator stated the last quality meeting should have been held in	F 490	The governing body does direct the convening of a QA committee. Please refer to F520 for additional information regarding the governing body's direction related to the convening and functioning of the QA committee. The COO/Director of Clinical Services has been physically present at the building multiple times during the survey process and since the survey process. The COO/Director of Clinical Services has recruited and secured the new facility administrator and is actively involved in recruiting, interviewing, and hiring the new DON. The COO/Director of Clinical Services is actively involved in training the RN added for the admission process and the additional resident care manager positions. The governing body has established an accounts payable process. It is a function managed at the corporate office. Facilities scan invoices they receive at the facility to the corporate office so the invoices can be entered into the accounts payable system. Facilities are asked to contact service providers/vendors that send invoices to the facility to send directly to corporate. A special accounts payable email is established and is cleared multiple times during a business day at corporate to ensure all invoices are being entered into the accounts payable system.

F 490	Continued From page 296 Outstanding Bills For Videll Healthcare Camden LLC was provided with attached copies of corresponding invoices and receipts. The sheet identified 16 vendors with outstanding bills. The list of vendors was as follows: - Double team carpet cleaning - Turf Tigers snow plowing - Xtreme Pest Control - G&K services - Plunketts - Guardian - "NAC" - Conway Fire & Summit Companies - N.E.S. electric - Midwest Lighting - Iron Mountain - "LVC" - Cummins generator service - Metro Sales - B-SAFE locks - Direct supply In addition, the list included a potential amount of money owed to facility staff that had purchased supplies for the facility out of their own pockets. O-P verified the staff waiting to be paid had accumulated the dollar amounts from purchases made last "November." The approximate total of the dollar amount owed to the 16 vendors and facility staff was $94, 918.44. O-P further stated Videll Corporation had directed facility staff to "try seeking different vendors" even though there were outstanding bills to vendors. O-P verified the listed vendors provided services to Camden care essential for maintaining quality of care and quality of life for all 84 residents admitted to the facility. On 3/18/14, at approximately 11:50 a.m. DON	F 490

F 490	Continued From page 297 provided a letter from Fultz Maddox Hovious & Dickens dated for 3/14/14, and verified the letter was from legal firm representing the pharmacy (PharMerica). The letter indicated the firm represented PharMerica "in connection with amounts owed by Camden for pharmaceutical goods and services provided to the facility..." The letter identified the facility was "currently in default" due to "its failure to pay invoices as they came due for goods and services provided by PharMerica." The letter identified the "principal amount owed" by the facility through 1/31/14, was "$137,946.49." The letter identified interest was accruing at "10% per year" and indicated "Camden" may also be responsible for attorneys' fees and costs. The letter indicated PharMerica would only provide goods and services for which Camden was responsible on a "prepayment basis" and outlined a potential payment schedule of $7,803.79 weekly before the "following week ' s shipment." On 3/18/14, at 12:10 p.m. the pharmacy (PharMerica) was contacted via telephone and the pharmacy director was contacted. The pharmacy director was unclear on billing questions and stated billing was managed corporately and stated he could not offer concrete evidence regarding outstanding bills. The pharmacy director stated his job was to fill prescriptions, ensure the medication was accurate and delivered. The pharmacy director stated he had not been directed by his supervisors to not fill prescriptions or send medications to the facility "as of this date." The pharmacy director referred the surveyor to speak with a corporate account executive. On 3/18/14, at 12:25 p.m. an account executive	F 490

F 490	Continued From page 298 for PharMerica verified he oversaw the payment account between PharMerica and Videll (specifically Camden Care Center). The account executive verified the facility owed the approximate amount of money identified in the letter, but was unclear on the exact amount. The account executive stated "at this point" the pharmacy was working with "Videll" and "it was positive." The account executive verified the pharmacy had not received the requested payment and the "two parties" were in talks "above my level." The account executive stated if the pharmacy services were stopped to the facility, the residents may be "in jeopardy." The account executive requested the surveyor email him with further requests for information on the outstanding bills. At 12:37 p.m. an email was sent to the account executive requesting information on outstanding bills, last payment, and any details of an agreed payment plan. On 3/20/14, at 5:08 p.m. a manager over facility collections for PharMerica contacted the surveyor via telephone. The manager stated the matter of the overdue bill was turned over to "their attorney." The manager stated the attorney was "handling negotiations of payment plan" with Videll/Camden. The manager verified the facility was "in collections" and there was "no current plan accepted [for payments to PharMerica]."	F 490		
F 493 SS=F	483.75(d)(1)-(2) GOVERNING BODY-FACILITY POLICIES/APPOINT ADMN The facility must have a governing body, or designated persons functioning as a governing body, that is legally responsible for establishing and implementing policies regarding the management and operation of the facility; and the	F 493

F 493	Continued From page 299 governing body appoints the administrator who is licensed by the State where licensing is required; and responsible for the management of the facility This REQUIREMENT is not met as evidenced by: Based on interview and document review, the facility's governing body failed to ensure appropriate resources were available for establishing and maintaining policies and management to operate the facility. This had the potential to affect all 84 residents in the facility. Findings Include: Refer to F223: R56 had verbalized to facility staff willful emotional, physical and verbal abuse from R63, and the facility did not take adequate precautions to protect R56 from the alleged physical, verbal and emotional abuse. Refer to F225 and F226: The facility failed to appropriately screen 6 of 6 newly hired employees (licensed practical nurse [LPN]-G, nursing assistant [NA]-A, LPN-F, NA-K, NA-D, NA-I) reviewed for screening of new employees. The facility failed to immediately notify the administrator and the State agency (SA) and failed to investigate, allegations of abuse, neglect and/or mistreatment for 4 of 5 residents (R21, R62, R71, R17) in the sample reviewed for abuse prohibition. Refer to F309 - The facility failed to ensure 1 of 3 residents (R41) reviewed for pain, received physician ordered and care planned pain medications.	F 493	F 493 For sampled residents and for all residents at the facility, the governing body shall ensure there are resources available for establishing and maintaining policies and for management of the facility. The corporate governing body has appointed permanent and interim facility administrators that are licensed by the state of MN. Currently the corporate interim administrator is seated and the appropriate notification letter was sent to the state. Additionally, a permanent administrator has been hired. A letter will be sent to the state when he takes over the facility from the corporate interim administrator. The corporate governing body has secured an interim DON licensed in the state of MN as an RN. The appropriate notification letter was sent to the state. Additionally, a permanent DON is being recruited and the governing body has extended an offer of employment. A letter will be sent to the state when the newly hired DON takes over the facility from the interim DON.

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (EACH DEFICIENCY MUST BE PRECEDED BY FULL REGULATORY OR LSC IDENTIFYING INFORMATION)	ID PREFIX TAG	PROVIDER'S PLAN OF CORRECTION (EACH CORRECTIVE ACTION SHOULD BE CROSS-REFERENCED TO THE APPROPRIATE DEFICIENCY)	(X5) COMPLETION DATE
F 493	Continued From page 300 Refer to F314: The facility failed to provide repositioning, comprehensively assess skin risk factors, assess and notify the physician of new pressure ulcer development in a timely manner, and provide pressure redistributing devices in the wheelchair for 1 of 1 resident (R64) reviewed for pressure ulcers. R64 experienced actual harm due to development of two stage II pressure ulcers (Partial thickness skin loss involving epidermis, dermis, or both. The ulcer is superficial and presents clinically as an abrasion, blister, or shallow crater). Refer to F319 - the facility did not ensure treatment and services were provided to aid in healthy adjustment to living in the facility for 1 of 1 resident (R91) identified as having concerns related to mood and aggressive behavior. Refer to F323: The facility failed to provide adequate supervision and interventions to ensure safe smoking practices for 3 of 28 residents (R36, R1, R22) who currently smoked in the facility. The facility's failure to provide supervision and a safe environment to prevent potential burns from unsafe smoking practices constituted an immediate jeopardy for R36, R1, and R22. This practice resulted in an Immediate Jeopardy being called on 3/12/14, at 5:00 p.m. In addition, the facility did not ensure safe use of a mechanical stand lift for 1 of 2 residents (R64) in the sample. This practice resulted in an Immediate Jeopardy component being called on 3/13/14, at 1:50 p.m. The Immediate Jeopardy was removed on 3/16/14, but non-compliance remained at the scope and severity of a pattern, with no actual harm with the potential for more than minimal harm at a pattern.	F 493	The governing body does have policies and procedures available to the facility on the corporate remote desk top. The governing body regularly reviews and revises as necessary existing policies and procedures. The facility is notified when a policy is revised so they can read it and ensure the proper education about any changes is completed. The governing body has placed nationally accepted standard of care references at the nurses' station for the clinical staff. These standards are referred to in many of the corporate policies and procedures. The social worker that was present during the survey submitted resignation prior to the survey. The governing body in concert with the facility was recruiting for a licensed social worker at the time of the survey. The governing body has secured the services of interim social workers and the facility has 2-3 social workers in the building at least 5 days/week. The governing body continues to recruit for a qualified licensed social worker. The interim social workers will remain in place until an appropriate licensed social worker is hired and fully oriented.

F 493	Continued From page 301 Refer to F353 - The facility did not provide sufficient staff to ensure residents received care per their individualized care plans. This had the potential to affect 49 of 84 residents who are consistently dependent for cares, and 2 of 2 residents (R11, R41) who occasionally need assistance for cares in the facility. Refer to 490 - The administrator failed to provide adequate supervision to residents, which resulted in Immediate Jeopardy (IJ) issues at F223 related to the failure of the facility to prevent abuse, and F323 related to failure to supervise (unsafe smoking, and unsafe mechanical lift transfers); in addition, the administrator failed to adequately oversee care to ensure care and services were provided to prevent pressure ulcer development which resulted in a harm level deficiency at F314; the administrator also failed to ensure vendors were paid in a timely manner to ensure services were received in an uniterrupted manner. These On 3/14/14, at 2:00 p.m. the facility owner verified four different administrators had been employed by the facility since the last survey 6/2013. When the owner was asked if he had been aware of the complaints received by the Office of Health Facility Complaints (OHFC) and from residents of resident's not receiving showers or getting cares, insufficient staffing, and lack of bill paying (for the facility vendors), the facility owner/governing board stated "we were aware of staffing and are doing everything that we can. The fact that there is any issue is disappointing. We can't compromise care over shifting gears and change and transition. We are happy to have the DON here and a new administrator." The facility owner further stated the chief operating officer (COO), will be here more often, she will make sure that	F 493	The governing body has directed the restructure of the clinical department. This restructure has included adding 2 resident care managers (one on the day shift and one on the evening shift), adding an RN for the admission process, transitioning the TMAs away from the med carts to the bedside for ADL care and adding licensed nurses to the med carts. The governing has directed the facility to add a full time human resource staff to ensure that employee background checks and credential verification is completed prior to working. Additionally, the HR staff will track and ensure performance evaluations are completed timely and that HR files are properly maintained for all employees. The governing body reviewed and adopted the Vulnerable Adult Act as part of the facilities abuse prohibition process. This VA Act is available to the staff both online and in the facility specific folder on the remote desktop. Please refer to the POC documented at F 223, F225, F226, F309, F314, F319, F323, F353, and F490 for additional information regarding the governing body's direction to the facility related to correction of the statement of deficiencies.

F 493	Continued From page 302 anything put into place is implemented. He further commented, "We ourselves are having corporate restrictions, to make sure at least one of us is here every week." The owner acknowledged corporate consisted of "my wife is a social worker (SW) and was the corporate SW consultant (CSW), and had been here doing corporate team building. "We have been in health care, hands on, with tough populations for 21 years. We are a small company with four facilities. We like homes that we can work with that are community based care. We've been out here more and we're going to continue to be here more, and are planning renovations and capital funds into the building." The facility owner then stated to the COO, who was present during the interview, "Were talking about staffing and I let (surveyor) know that we are remedying it with immediacy. When asked about the Medical Director (MD-B) contract, and MD-B's understanding that she would not be seeing patients. The COO stated, "That is not what I have with any other facilities, it is not the intent of the contract. I have been made aware of that and I have directed that we went to her and told her that she needs to do that. The facility also had to find another medical director or a back up medical director to get the work done." The facility owner added, "My understanding is this is at late as last week that she was going to in the interim cover us." The owner asked the COO, "When were you notified of the IJ?" The COO stated at 7:30 p.m. on Tuesday when I landed in Seattle, and I was on a plane at 5:30 yesterday morning to come here, I was there all day yesterday and most of today." On 3/17/14, at 10:40 a.m. the administrator and corporate interim administrator (CIA) were interviewed. The administrator stated the last	F 493	The governing body does direct the convening of a QA committee. Please refer to F520 for additional information regarding the governing body's direction related to the convening and functioning of the QA committee. The COO/Director of Clinical Services has been physically present at the building multiple times during the survey process and since the survey process. The COO/Director of Clinical Services has recruited and secured the new facility administrator and is actively involved in recruiting, interviewing, and hiring the new DON. The COO/Director of Clinical Services is actively involved in training the RN added for the admission process and the additional resident care manager positions. The governing body has established an accounts payable process. It is a function managed at the corporate office. Facilities scan invoices they receive at the facility to the corporate office so the invoices can be entered into the accounts payable system. Facilities are asked to contact service providers/vendors that send invoices to the facility to send directly to corporate. A special accounts payable email is established and is cleared multiple times during a business day at corporate to ensure all invoices are being entered into the accounts payable system.

F 493	Continued From page 303 quality meeting should have been held in December, the DON and MD-B as well as herself were all hired after that date. The administrator further stated, "since I've been here, no quality meetings have been held, but I think we were in compliance here, the lack of food complaint was not substantiated by OHFC." The CIA stated she would need to look at the 4th quarter to determine when a quality meeting should have been held, or when their 4th quarter ended. The administrator and CIA, were asked, whether there was a plan to ensure at least minimum payment for vendors to continue services so residents can receive cares. They were also asked whether that plan included repaying employees for items purchased, which included milk, Wanderguards and side walk salt. There were also asked whether there was a plan to pay the unpaid pharmacy bills to ensure delivery of medications as there were complaints from the residents about not receiving medications because of unpaid bills. The CIA stated two to three weeks ago, corporate started a centralized accounts payable (AP) process, where bills would all go to corporate to be processed. The administrator stated, "The food director purchased milk, the nursing director bought Wanderguards, as far as I know they were reimbursed. Linens were taken out at one time due to nonpayment. To be fair with that the linen service was nasty about it, they came in the back door and just started loading linens, there was no communication to me at all. The environmental director caught them and brought them to the administrator who said, "let me call corporate and get this cleared up." We did have proof of payment in our hands, but they had loaded up and left, and were just being nasty about it.	F 493	**Accounts Payable specifically mentioned in the 2567L:** Double Team Carpet Cleaning - We have not used April 2013 Turf Tigers Snow Plowing - $100.00 current Net 30 Extreme Pest Control - $96.55 current Net 30 G&K Services - No longer use them for laundry we have not used since July 2013 Plunkets - $0 We have not used them since July 2013 "NAC" – Corporate accounts payable is working on payment arrangements with this service provider and an agreement will be reached. F 493	Continued From page 309 discuss." On 3/18/14, at approximately 11:50 a.m. DON provided a letter from Fultz Maddox Hovious & Dickens dated for 3/14/14, and verified the letter was from legal firm representing the pharmacy (PharMerica). The letter indicated the firm represented PharMerica "in connection with amounts owed by Camden for pharmaceutical goods and services provided to the facility..." The letter identified the facility was "currently in default" due to "its failure to pay invoices as they came due for goods and services provided by PharMerica." The letter identified the "principal amount owed" by the facility through 1/31/14, was "$137,946.49." The letter identified interest was accruing at "10% per year" and indicated "Camden" may also be responsible for attorneys' fees and costs. The letter indicated PharMerica would only provide goods and services for which Camden was responsible on a "prepayment basis" and outlined a potential payment schedule of $7,803.79 weekly before the "following week ' s shipment." On 3/18/14, at 12:10 p.m. the pharmacy (PharMerica) was contacted via telephone and the pharmacy director was contacted. The pharmacy director was unclear on billing questions and stated billing was managed corporately and stated he could not offer concrete evidence regarding outstanding bills. The pharmacy director stated his job was to fill prescriptions, ensure the medication was accurate and delivered. The pharmacy director stated he had not been directed by his supervisors to not fill prescriptions or send medications to the facility "as of this date." The pharmacy director referred the surveyor to speak	F 493

F 493	Continued From page 310 with a corporate account executive. On 3/18/14, at 12:25 p.m. an account executive for PharMerica verified he oversaw the payment account between PharMerica and Videll (specifically Camden Care Center). The account executive verified the facility owed the approximate amount of money identified in the letter, but was unclear on the exact amount. The account executive stated "at this point" the pharmacy was working with "Videll" and "it was positive." The account executive verified the pharmacy had not received the requested payment and the "two parties" were in talks "above my level." The account executive stated if the pharmacy services were stopped to the facility, the residents may be "in jeopardy." The account executive requested the surveyor email him with further requests for information on the outstanding bills. At 12:37 p.m. an email was sent to the account executive requesting information on outstanding bills, last payment, and any details of an agreed payment plan. On 3/20/14, at 5:08 p.m. a manager over facility collections for PharMerica contacted the surveyor via telephone. The manager stated the matter of the overdue bill was turned over to "their attorney." The manager stated the attorney was "handling negotiations of payment plan" with Videll/Camden. The manager verified the facility was "in collections" and there was "no current plan accepted [for payments to PharMerica]."	F 493

F 500	Continued From page 313 aggressive behavior. The facility did not employ a qualified professional to furnish medically-related social services for the residents to attain or maintain their highest practicable physical, mental, and psychosocial well-being as the facility employed a social service designee and/or services were not completed in a timely manner. This had the potential to affect all 84 residents. Findings include: Residents of the facility were exposed to behavioral outbursts of residents who were not receiving psychiatric services for diagnosed mental illness, by interactions in the hallways, at dining, and on the smoking patio. R11 was not provided medically related social services to address behaviors of refusal/rejection of cares, or calling staff derogatory names. On 3/11/14, at 9:48 a.m. during the initial stage one interview R11 stated, "I don't like people" and his roommate "wakes him up at night screaming." R11 further verified he did not allow facility staff to assist him with activities of daily living, bathing or range of motion. R11 verified he had a contracture of his left hand. R11 stated he did not take showers "due to pain" on his left side and the facility staff did not offer bed baths. R11 explained he was not aware if he could take a tub bath. - At 10:12 a.m. surveyor asked to see R11's left hand. R11 was observed to have a contracture of the left arm, wrist and hand. R11 stated the contracture was due to an aneurysm and stroke. Stated he "didn't let them [facility staff] touch it" and only allowed staff he "trusted" to cut the nails (of the contracted hand). R11 stated he cleaned	F 500	For all residents in the facility, the Associated Clinic of Psychology will make scheduled visits. Resident with mental health diagnoses/concerns or with behavior issues will be scheduled for evaluation and/or follow up. Documentation of this visit will be kept in the medical record. The social service department will conduct audits of all residents with mental health diagnosis/concerns and/or behavior problems to determine if this service has been offered, is being used, and that the documentation and care planning reflect the current status. F 500	Continued From page 316 communication and swallowing were not impaired and none of the identified concerns were a "change" in R11's condition. The "Other Impairments" section of the form indicated R11 "denied" problems with pain, falls, pressure sores/open areas, and denied a "decline in ROM [range of motion]." The form indicated R11 "declines" splint/orthotic. The "Comments" section of the form indicated, "Pt [patient/R11] repeatedly declined offer of therapy services, stating he doesn't like people. Declines needing or wanting help for any ADL's, waiting for electronic scooter to arrive, is independent with manual w/c [wheelchair]. Requests not to have therapy services, no orders requested." The form indicated therapy services for physical therapy, occupational therapy, or speech therapy was "Refused." Although the form was dated 1/2/14, at the top of the form, the bottom of the form was signed by a therapist and dated for 3/11/14. The screening form indicated R11 was identified to refuse care and services shortly after admission. R11's admission Minimum Data Set (MDS) dated 1/6/14, indicated R11 was cognitively intact, had a mood problem of feeling tired, and had no behavior problems. The MDS indicated R11 was independent with bed mobility, transferring, locomotion on the unit and eating; required supervision with locomotion off the unit, dressing and toilet use; R11 was identified as requiring extensive physical assistance from staff for personal hygiene. The Care Area Assessment (CAA) for nutrition dated 1/7/14, identified diagnoses of spastic hemiplegia on left side, history of alcohol abuse and congestive heart failure. The CAA identified R11 had "no upper teeth and few lower teeth" and, "He does not wish to receive a mechanically altered diet." The CAA	F 500

F 500	Continued From page 317 for ADL Functional/Rehabilitation Potential dated 1/13/14, identified the CAA was triggered due to R11's need for supervision with ADLs. The CAA identified R11 had left sided hemiplegia due to a history of cerebrovascular accident (CVA, stroke). The CAA identified R11's other pertinent diagnoses to include altered mental status, and homelessness. The CAA identified R11 "was eval [evaluated] for therapy" and refused. The CAA identified R11 was continent of bowel and bladder, had no skin issues or falls. The CAA for falls and pressure ulcers (both dated 1/13/14), recapitulated the same data as ADL CAA. Although R11 initially refused therapies upon admission, and was identified to refuse therapy in the CAAs, the MDS and did not identify refusal of care behaviors. Although the behavior of refusing therapies was identified in the CAA, the clinical record lacked evidence R11 was assessed for refusals and interventions were developed to address potential risks of associated with refusing therapy, such as but not limited to, the left sided contracture getting worse, or skin breakdown of the left hand. The Social Services Comprehensive Assessment Packet dated 1/13/14, included: a LOA (leave of absence) Safety Assessment, Smoking Assessment and Vulnerable Adult Assessment dated 1/2/14. No behaviors of refusing cares were identified in the assessments. The Vulnerable Adult Assessment appeared incomplete. Although R11 was identified to have refused to take showers at the homeless shelter (resulting in R11 losing a respite bed there) and R11 had behaviors of not taking medications such as baclofen, the assessment didn't identify R11 had any behaviors, such as calling staff derogatory names and refusal/rejection of cares. F 500	Continued From page 320 "Resident vehemently refused vital sign to be obtained, even when reapproached. Noted some blood show on his nares but he adamantly rejected nursing intervention, instead he placed a tissue papper [sic] in the nose, he refused to use 4x4 [gauze]. We will continue to encourage with care and support at this moment." At 10:13 p.m. a not indicated, "Resident refused cares and re-approached throughout the shift but he refused stating to be left alone." - On 1/4/14, a note at 10:40 p.m. indicated R11 refused "all attempts for the vital signs to be taken and cares to be provided." The note identified R11 "Requires help with ADLs but refuses." Although a behavior of refusing/rejecting cares was voiced by R11, the note indicated, "No behavioral problems noted." - On 1/20/14, at 3:16 p.m. a social services note indicated social services designee (SSD) met with R11 and discussed R11's discharge plan to remain in the facility "short term [sic]." The note identified R11 had determined his stay was short-term and identified R11 "is homeless" but would "like to find placement." The note indicated SSD would assist with discharge planning. - On 2/4/14, at 12:54 p.m. a social services note indicated the county public health nurse and SSD met with R11 regarding relocation options. At this time the note indicated R11 would "like to return to the streets when it gets warmer outside." R11 refused assistance from both. The note identified SSD "explained the risks of returning to the streets." - On 2/5/14, at 11:01 p.m. R11 was identified to be abusive to staff "using N-word to the nursing staff." The note indicated staff attempted to speak with R11, but R11 cursed at staff, refused to allow staff to assist with cutting his nails "stating he [would] look for qualified person to cut his finger	F 500

F 500	Continued From page 321 nails." - From 2/5/14, through 2/24/14, all notes indicated when R11 had nose bleeds or if no nose bleeds were noted. The notes identified period, but consistent refusals of assistance with nose bleeds. The notes did not indicate the physician was notified of potential nose bleeds. - On 2/25/14, at 3:17 p.m. a note from medical records indicated, "[R11] has refused all medical appt [appointments] since admit to include cardiology on 1-19-14. He has refused all offers of appts at the Indian Health Board for Primary care follow up. D.O.N. (director of nursing), clinical care manager and Admin [administrator] updated. Plan is for pt [patient] to be seen by the Medical Director." - From 2/25/14, through 3/17/14, notes address monitoring for nose bleeds. Although R11 was noted to refuse all cares, treatments, interventions and assistance, the clinical record lacked evidence R11's refusals were assessed and clinically related social services were provided. The Follow Up Question Report for 3/1/14 - 3/13/14, identified the daily NA documentation from Care Tracker. The report indicated the following: - "Bathing: Self Performance - How resident takes full-body bath/shower, sponge bath, and transfers in/out of tub/shower" was documented "Not applicable" daily. - NA's documented a behavior of both "Rejection of Care" and "Abusive Language" as "Yes" daily. - "Dressing: Self performance - How resident puts on, fastens, and takes off all items of clothing, including donning/removing prosthesis or TED hose (anti-embolism stockings). Dressing includes putting on and changing pajamas and	F 500

F 500	Continued From page 322 housedresses" was documented "Resident Refused" for 16 out of 18 opportunities. - "Personal Hygiene: Self Performance - How resident maintains personal hygiene, including combing hair, brushing teeth, shaving, applying makeup, washing/drying face and hands (Excludes baths and showers)" indicated "Resident Refused" eight times, "Not applicable" two times, "Independent - No help or staff oversight at any time" eight times out of 18 opportunities. On 3/13/14, at 2:24 p.m. the licensed practical nurse (LPN)-D verified there was no monitoring for behaviors towards staff, such as inappropriate/derogatory name calling of staff. On 3/13/14, at 2:37 p.m. a facility staff member (O)-E verified there were no physician's visits for R11 in the clinical record. O-E stated R11 refused referrals to "Indian services," cardiology and the medical director. O-E stated R11 had expressed he was in the facility until the weather warmed, then he "planned to return to the streets." On 3/13/14, at 2:40 p.m. LPN-D stated monitoring for refusal of care was in the NA "kiosks" and documented in "Care Tracker [a computer based data collection tool for the electronic medical record]" and should report the refusals of care to the nurse. LPN-D verified refusals should be documented in the clinical record. LPN-D was unclear on evaluation of the refusals. On 3/14/14, at 10:41 a.m. SSD stated she was not aware of R11 refusing any or all cares. SSD stated R11 was "easy to communicate with" and her first impression of R11 was he "wouldn't refuse." SSD further stated she "believes if [R11]	F 500

was reapproached [when refusing]," R11 would "go for it." SSD stated facility staff should have been reporting the refusals to her and stated she would then have "approached and explained the risks and benefits" to R11. SSD stated she reviewed the (interdisciplinary team, IDT) progress notes, but stated the behaviors were not appropriately being documented in the clinical record. SSD stated "documentation was missing" and there "wasn't appropriate documentation [on behaviors]." SSD stated it was "very important for staff to document" and further stated she "relied heavily" on the documentation. SSD stated she was "not closely interactive with residents and staff." SSD verified she had access to "PCC [Point Click Care, the electronic medical record or EMR], and stated she did not know the NA staff documented R11's refusals daily "at the kiosks [in Care Tracker]." SSD stated she did not have access to the "kiosk" or Care Tracker. When asked about R11's discharge plan, SSD stated, "When [R11] came, I did my psychosocial assessment, offered him services." Although SSD stated she was unaware of R11's refusal, R11 was "easy to communicate with" and R11 would "go for it" if reapproached during a refusal of a care or treatment, SSD stated, "He [R11] refused services and said he was going to back to the streets." SSD confirmed she was aware of R11's unsafe discharge plan and stated she "referred him to the county for relocation services." SSD further verified her awareness of R11's refusals and stated the "Public health nurse attempted to visit with him, he refused for the moment." The clinical record lacked evidence of SSD's psychosocial assessment.

On 3/14/14, at 11:20 a.m. a physical therapist (PT)-J who provided a copy of R11's Therapy

F 500	Continued From page 324 Screening Form verified the evaluation was "back dated" due to not being documented at the time of admission and problems with lost documentation. PT-J verified R11 refused therapy. PT-J stated risks and benefits were provided to R11, but were unclear on documentation of the risk/benefits. On 3/18/14, at approximately 2:05 p.m. the DON verified medically related social services were not provided for R11. R111 was not provided clinically related social services to address derogatory roommate behavior. On 3/10/14, at 6:38 p.m. during the initial stage one interview, when R111 was asked if there was a problem with a roommate or any other resident, R111 stated his roommate called him a "nigger" and "we got into it." When ask if he reported the incident and what happened, R111 stated, "They [the facility staff] told me if I don't like it, I should have to move." R111 stated he "doesn't want to move" because he was admitted to the room first and R111 "didn't cause the problem." R111 stated he and his roommate were on "non speaking terms right now." R111 stated the incident occurred the prior week. R111 further stated "he [the roommate] came to move in here" and the roommate was the cause of the problem. R111 described feeling "penalized" for what "he did." Stated he feels like it's more of a "punishment" to have to move and to remain in the room with roommate and not a "solution." R111 stated he hoped it was the "last time" the roommate called him a name.	F 500

F 500	Continued From page 325 R111's Admission Record dated 1/10/14, identified diagnoses to include head injury and depressive disorder. The admission MDS dated 12/23/13, indicated R111 was cognitively intact; had mood concerns of: feeling down/depressed, trouble falling asleep, trouble concentrating, and feeling tired. The MDS identified R111 had no behavioral concerns and required physical assistance from staff for transferring, toilet use, personal hygiene, dressing and locomotion on and off the unit. The CAA for pressure ulcers dated 12/26/13, identified R111's closed head injury was "following an assault." The CAA for ADL Functional /Rehabilitation Potential dated 12/27/13, identified R111 was able to voice his needs and identified R111's specific ADL needs. The CAA for psychotropic drug use dated 12/27/13, identified R111 had vision impairment due to diabetes mellitus diagnosis and from the assault. Review of R111's care plan revealed appropriate care plan development. A copy of the care plan requested and not provided by the facility. Review of the IDT Progress Notes indicated on 3/6/14, at 12:06 a.m. a note identified R111 had "an argument with his roommate. According to his roommate the television (TV) was loud. He was very upset with his roommate for calling him the 'N' word. The nurse filled out an incident report. The administrator and DON were [sic] informed via text messag [sic]." Although the note identified an incident report, the facility lacked evidence of the notification or incident report. On 3/14/14, at 9:40 a.m. the LPN-A stated she was not aware of R111 being called derogatory name and stated "social services should be handling it." LPN-A stated room changes "are	F 500

F 500	Continued From page 326 done by social services." When asked regarding determining who should move when roommates report behavioral problems, LPN-A stated staff report the behavior to the social service designee and determine "who is the best to move." LPN-A further stated, "Our policy has been, the complainer is the one to move." On 3/14/14, at 10:59 a.m. SSD stated she was aware of a verbal altercation and stated she was notified by night shift. SSD stated she "met with both" residents separately the next morning and offered for R111 to switch rooms. SSD stated R111 refused to change rooms due to his potential discharge "next week." SSD stated R111 expressed he would keep to himself and "avoid the roommate." SSD stated she spoke with the roommate and believed the residents were friends and was "shocked" that the altercation had occurred. SSD stated she believed the roommate had just had a left below the knee amputation, was going through a rough time, lost all his belongings and he "took his frustrations out on [R111] due to the TV volume being too high." SSD stated she did not document the conversation and verified the roommate calling R111 a derogatory name would be considered verbal abuse. The Room and/or Roommate Change policy dated December 2013, directed "Residents are notified in advance of a new roommate." The policy indicated the social service director or designee was responsible to ensure a resident was informed of a new roommate, documentation in the clinical record would be completed indicating reasons for the move, residents/family input, agreement of resident/family, adjustment to the change in roommate would be monitored and	F 500

F 500	Continued From page 327 documented in the clinical record and the residents care plan would be updated. The undated Social Services/Social Work job description identified, "The social worker will work with residents in the facility by identifying their psychosocial, mental and emotional needs along with providing, developing, and/or aiding in the access of services to meet those needs." The job description indicated, "Advocacy 1. Work with the interdisciplinary team and administration to promote and protect resident rights and the psychological well-being of each resident. Prevent and address resident abuse as mandated by law and professional licensure." The job description identified clinical responsibilities of the social worker to be: complete social history and psychosocial assessment for each resident, develop a written plan of care for each resident that identified the needs from the assessment, ensure therapeutic interventions were provided to assist with coping in transition to the facility, provide support and education to residents/family, provide clinical interventions to address "catastrophic events" that occur during the resident's stay, and coordinate discharge planning. R56 had verbalized to facility staff recurrent fear from R63, and the facility did not take adequate precautions to protect R56 from the alleged physical, verbal and emotional abuse. R56 was observed and the following was noted: - On 3/11/14, at 1:54 p.m. R63 was observed to have yelled at R56 repeatedly and called her a liar. Registered nurse (RN)-B was immediately	F 500

F 500	Continued From page 329	F 500		

The care plan dated 3/6/13, indicated R56 needed social services (SW) due to recent admission to facility. The interventions noted the SW was to visit monthly and as needed (PRN), introduce self to others, encourage R56 to attend activities and the SW would make outside referrals to mental health professionals as needed. The medical record lacked evidence of how the facility intervened on keeping R56 safe from R63's physical, verbal, and emotional abuse. The medical record lacked any evidence of the SSD meeting with R56 to discuss the new roommate and/or adjustment of the room.

The care plan revised 4/21/13, incorrectly identified R56 as short stay resident to the facility and identified R56 as a vulnerable adult related to (r/t) physical limitations. The goal was to ensure R56 was safe within Camden Care Center and the interventions included "Nursing to provide cares, services according to resident needs, POS [Physician's orders] and POC [plan of care]," "Assistance in case of emergency" and "Vulnerable adult assessment per facility policy."

The Vulnerable Adult Assessment (VAA) dated 11/21/13, indicated R56 had physical limitations which made the resident susceptible to abuse. The physical limitations include wheelchair (w/c) bound and history of hip fracture. The form also identified R56 did not "have a history of any type of abuse towards others or self-abuse." The VAA was updated on 2/20/14, and noted the VAA was still current with no changes.

R56's progress notes were reviewed from 1/25/14, going forward to 3/14/14. On 3/14/14, the social worker designee met with R56 "as a

F 500	Continued From page 331	F 500		

before something happen [sic] beyond our reach." The note indicated the facility staff was going to monitor the situation every 15 minutes, however, the medical record lacked evidence of the monitoring.

A Care Conference Quarterly note dated 10/22/13, depicted R63 as having behaviors which included "becomes irritated with staff at times, barricades herself in her room with boxes, she also isolates herself in her room." The continued to note R63 "is very sensitive to noise and that causes 'nausea'." The note revealed R63 independent in ambulation to all destinations.

R63's most recent MDS dated 1/8/14, noted R56's diagnoses included dementia with behavioral disturbances, anxiety, psychotic disorder, and depression. The MDS identified R63 as being cognitively intact with a BIMS score of 15. R63's PHQ-9 was 10 which noted moderate depression. According to the MDS, R63 had trouble sleeping, had a poor appetite, had little interest, trouble concentrating, felt tired, and felt down. R63 was depicted as having no behaviors.

R63 was unavailable for interview for the untoward behavior towards R56 as R63 was transferred out of the building on the evening of 3/13/14.

On 3/12/14, at 2:37 p.m. an interview was conducted with the SSD. She indicated R56 and R63 became roommates on 3/5/14, as both women were private pay and could pay the private pay fee for the private room. The SSD indicated she was made aware of the 3/9/14, altercation in the Monday morning report meeting

F 500	Continued From page 332 on 3/10/14. The SSD revealed she did speak with R63 and stated, "[R63] used to being in her own room. She did warn us, I would not be able to get along with a roommate. 'I was brought into a private room and will not be able to get along.'" The SSD was not aware of R63's "I now know what murder feels like." and was aware of the police being called on 3/9/14. The SSD expected the staff to inform her of any situation that needed her attention. SSD stated she did meet with R63 on 3/11/14, and R63 stated "things were getting better, they are avoiding communicating with each other and talking to each other." The SSD did not put any interventions into place for the altercations between the two roommates and she was unaware if nursing had put any interventions in place to prevent the emotional, physical and verbal abuse of R63 towards R56. The medical record lacked evidence of the communication between R63 and the SSD as the SSD did not document any of the follow up conversations. It could not be determined if R63 received the monthly SW visits as indicated on the care plan revised 4/18/12, nor could it be determined if R63 adjusted to the new room and roommate as the medical record lacked evidence any SW intervention for the adjustment other than one visit on 3/11/14. On 3/17/14, at 10:00 a.m. the DON stated discharge planning was not done by SSD, she thought she only needed to call relocation services. - At 11:40 a.m. The administrator and corporate interim administrator (CIA) were interviewed regarding the SSD: what training/orientation was provided so that she could successfully carry out the job? The administrator stated, "When I started here with SSD, I asked CIA if she was	F 500

F 500	Continued From page 333 being supervised." CIA stated, "I told you she was, because the corporate social workers (CSW) was going to mentor her." The administrator stated, "When corporate came into town on 2/11/14, both of the two (facility owner and CSW) were here, and I asked when are you going to counsel SSD? The CSW acted like she did not know what was happening and stated, 'I can't supervise her.' The facility owner stopped the conversation and stated 'you will supervise her.' It was very alarming to me, a new social worker (without a mentor)." CIA stated, "When I got here in November she was already hired and here." The administrator stated a social worker was so essential to proper discharge planning, and "I was downright angry that she was not supervised, and mentored. My regional administrator stated he had hired her with the understanding that CSW was going to be her supervisor." R91: On 3/13/14, at 9:00 through 9:47 a.m. R91 was observed resting in bed with covers on her. R91 was being delivered supplemental oxygen to her through a nasal cannula. R91 nodded off during conversation with surveyor and did not respond to some questions. R91 flinched her shoulders twice and reported she had a lot of pain in her knees. R91 reported she was very depressed from living at the facility and wanted to go home. R91 explained she felt no one cared for her at the facility because, even though she was sick and in pain, no one came to check on her. R91 explained she had been prescribed antibiotics and pain medications by a physician yesterday but she did not take them because she did not trust the physician knew her well enough to	F 500

F 500	Continued From page 334 prescribe meds to her. R91 recounted how she was upset because a staff member lied to her yesterday about canceling a ride to the store for her. R91 reported it made her "angry" and "rude" when staff lied to her. R91 reported she planned on spending the rest of the day resting in bed and did not think any staff would assist her with any cares today. R91's admission MDS, dated 10/15/13, indicated the potential for moderate depression due to self-reported symptoms of little interest or pleasure in doing things, feeling down depressed or hopeless, trouble falling asleep or sleeping too much, feeling tired or having little energy and poor appetite or overeating. The MDS revealed R91 displayed verbal and physical aggression one to three days during the seven day observation period. R91's quarterly MDS, dated 1/9/14, indicated a potential for mild depression, with R91 reporting the same symptoms in addition to moving or speaking slow or being fidgety. The MDS noted verbal and physical aggression towards others occurred four to six days during the seven day observation period. Both the 10/15/13 and 1/9/14, MDS indicated R91 rejected evaluation or care on one to three days during the seven day observation period. R91's BIMS on her admission and quarterly MDS dated 10/15/13 and 1/9/14 indicated she was cognitively intact. R91's Care Area Assessments, dated 10/22/13, for Mood, Cognitive Loss/Dementia, Behavior, and Psychosocial Well Being included the same summary statement under the Care Plan Considerations section: "Resident has some behavior r/t [related] medical Dx [diagnosis]. Staff	F 500

F 500	Continued From page 335 will monitor her behavior and ensure pt [patient] needs are met and she is safe." The sections for input from resident and family or representatives for resident were all left blank; despite R91's BIMS score indicating she was cognitively intact. Each care area assessment noted a referral to another discipline in the health care team (such as social services, medical or mental health professionals) was not necessary. The assessment did not include a thorough analysis including: specific behaviors exhibited by R91, what medical or mental health concerns would impact care, triggers to behaviors, events immediately prior to behavior, consequences of behavior or tactics known to decrease or minimize behavior. R91's current care plan, last reviewed 1/30/14, did not include problems, goals or interventions related to R91's mood, rejection of evaluation or care and verbal and physical aggression. On 3/14/14, at 2:14 p.m. the SSD reported the care area assessments for R91 were completed prior to her employment at the facility. SSD reported the care area assessments were not comprehensive, did not identify what behaviors were occurring, causative factors or how best to help. SSD reported she was not aware R91 exhibited verbal and physical aggression or rejection of cares. Surveyor requested any other documentation of behavior or mood assessments, not included in the care area assessments. None was provided. SSD confirmed R91's care plan did not address her aggressive behaviors or rejection of evaluation or care. On 3/14/14, at 3:53 p.m. R91's NA-G reported	F 500

F 500	Continued From page 336 R91 rejected cares because she valued her privacy and wanted to do as much as she could herself. NA-G reported R91 at times cussed at staff, called them unkind names or threatened to get them fired. NA-G reported R91 has said unkind statements to her roommates. NA-G explained R91 could be intrusive to her roommate's privacy during cares because she thought her roommate was her daughter. NA-G explained R91's behavior varied throughout the day and that at times she was very kind. NA-G was not aware of any physical aggression towards other residents from R91. The undated Social Services/Social Work job description identified, "The social worker will work with residents in the facility by identifying their psychosocial, mental and emotional needs along with providing, developing, and/or aiding in the access of services to meet those needs." The job description indicated, "Advocacy 1. Work with the interdisciplinary team and administration to promote and protect resident rights and the psychological well-being of each resident. Prevent and address resident abuse as mandated by law and professional licensure." The job description identified clinical responsibilities of the social worker to be: complete social history and psychosocial assessment for each resident, develop a written plan of care for each resident that identified the needs from the assessment, ensure therapeutic interventions were provided to assist with coping in transition to the facility, provide support and education to residents/family, provide clinical interventions to address "catastrophic events" that occur during the resident's stay, and coordinate discharge planning. F 501 SS=F	Continued From page 337 DIRECTOR The facility must designate a physician to serve as medical director. The medical director is responsible for implementation of resident care policies; and the coordination of medical care in the facility. This REQUIREMENT is not met as evidenced by: Based on staff interview and record review, the medical director failed to collaborate with the facility staff to provide guidance in the development, implementation and evaluation of resident care policies and procedures. This had the potential to affect all 84 residents in the facility. Findings include: Refer to F309 - The facility failed to provide six days worth of physician ordered and care planned pain medications for 1 of 3 residents (R41) in the sample reviewed for pain. Refer to F314 - The facility failed to provide repositioning, comprehensively assess skin risk factors, assess and notify the physician of new pressure ulcer development in a timely manner and provide pressure redistributing devices in the wheelchair for 1 of 1 resident (R64) reviewed for pressure ulcers. R64 experienced actual harm due to development of two stage II pressure ulcers (Partial thickness skin loss involving epidermis, dermis, or both. The ulcer is superficial and presents clinically as an abrasion, blister, or shallow crater).	F 501	F 501 For sampled residents and for all residents at the facility, the facility shall ensure a medical director is involved in the operationalization of policies and procedures related to resident care, resident quality of life, and all other aspects of the facility. The facility has a policy titled, "Medical Director." This policy was effective 05/2012 and reviewed 05/2013. The facility and medical director shall ensure this policy and fully operational. The facility does have a Medical Director on contract. The facility and the medical director shall ensure this contract is in full force. On March..... a QA committee was held to discuss the results of the current survey. The Medical Director was available to the meeting via phone. On April 16, 2014 the medical director was present at the meeting to begin review and discussion of the POC for the current survey. The medical director has committed to be present either in person or over the phone for all QA committee meetings related to the POC for the survey.

F 501	Continued From page 340 had the potential to affect all 84 residents. On 3/13/14, at 12:20 p.m. the medical record coordinator (HIM) stated MD-A, gave notice in November 2013, and left in January 2014, and several patients were reassigned to MD-C who will only take residents 65 and older. "For those residents under 65 I attempted to re-assign them to doctors, and send them out to doctors, but they won't leave the building for appointments. Before MD-A left, I was told we were getting a new doctor, but the prior director of nursing (DON) told me it was a new medical director who was going to take the case load. One week before MD-A left, the prior director of nursing (DON) told me the new medical director was not going to see patients. When residents come to the building without a doctor, they default to the medical directors list (to be seen). Finally, we were able to get the medical director to see some people." On 3/14/14, at 2:45 p.m. the medical director was interviewed. The medical director was not aware she was expected to be the physician of record for the undoctored residents, on top of her other full time job. She was now seeing residents in the facility, until they could get some help, but had just returned from vacation. The signed but undated medical director contract identified Background: B. The facility requires the services of a medical director (the "Medical Director") to assist the facility in meeting the applicable standards established under state and federal law. D. The facility wishes to engage MD-B, to provide physical-related consulting services (the Consulting Services"), and to obtain the personal	F 501

F 514	Continued From page 343 R109 was admitted to the facility 10/31/13, and discharged to the community 11/22/13. R114 was admitted to the facility 12/27/13, and discharged undocumented 1/31/14. R110 was admitted to the facility 11/15/13, and discharged to the community 12/30/13. R79 was admitted to the facility 1/23/14, and discharged to the community 2/14/14 R106 was admitted to the facility 10/16/13, and discharged to the community 12/04/13. R87 was admitted to the facility 10/07/13, and discharged to the community 10/31/13. R66 was admitted to the facility 9/26/13, and discharged to acute care status 10/18/13, readmitted on 10/28/13, and discharged to acute hospital 1/03/14. On 3/12/14, at approximately 1:00 p.m. health unit coordinator (HUC) was interviewed. The interview in the medical records room noted approximately 15 filing cabinets with approximately 10 to 12 boxes stacked on top of cabinets, and approximately five to seven boxes on large shelves. The HUC verified there was no system to medical record filing and stated the filing cabinets could be current, discharged, and/or expired residents. One of the cabinets included facility staff files. The HUC indicated the director of environmental services also had a key to medical records. On 3/12/14, at 3:01 p.m. the DON stated the facility was aware that assessments were not completed, overdue and inaccurate. A list of not completed care plans included: R11, R96, R111, and R47. A list of overdue care plans included: R39, R75, R84, R15, R70, R98, R46, R2, R72, R56, R35, and R94.	F 514	On a monthly basis, the Administrator, DON, and/or RCMs will randomly audit clinical records to ensure either computer documentation or paper documentation has occurred and is readily accessible either on the computer or in the chart. This audit will ensure the records are complete and accurate based on the current status of any resident at the time of the audit. These audits will be reported to the QA committee for 6 months for review and further recommendation as indicated. All MDS once locked and transmitted will be reduced to hard copy and kept in a separate notebook either at the nurses' station or in the MDS office. 15 months of MDS will be kept in the notebooks. Authorized personnel to have keys to the medical records storage are the administrator, the DON, off hours nursing supervisor, and the maintenance director. The maintenance director must have a master key in case someone loses a key. The maintenance director does not need to access the medical records storage for any reason.

F 514	Continued From page 344 On 3/13/14, at 3:37 p.m. the DON verified there was no filing system in place for medical records stated she was not aware employee files were stored with resident records and neither the HUC nor the maintenance should have access to employee files. The DON was aware that physician visits were behind, and they had been trying to catch up, but the medical director was on vacation. On 3/17/14, at 1:59 p.m. other (O)-C stated that approximately 1/1/2 weeks of daily therapy notes had been lost when the facility converted to a new therapy documentation system. O-C verbalized a notification from corporate had come to say that a new system would be implemented; however it did not give a specific start date. The therapy staff had started to print out the daily notes, but had not completed the task. The following Monday, February 10th, 2014, the new system was in place and we could not access the unprinted (lost) notes from the other system. The facility was not able to produce the daily therapy notes requested for the time period that was lost. Hill, Jonathan T. Access to medical records: The facility lacked a medical records system which was systematically organized. In addition, the pad-locked medical record storage area (in the basement of the facility) was accessible to unauthorized personnel. On 3/12/14, at approximately 1:00 p.m. the surveyor requested to see the medical records storage area. The health unit coordinator (HUC)	F 514	Offsite storage of medical records is contracted with Iron Mountain. This is a secured medical records storage company. An inventory off all off site stored documents is kept readily available in the facility administrator's office. This inventory list will be presented to the QA committee for review and further recommendation as indicated for 6 months. Responsible: Administrator, DON, RCM, ward secretary Compliance date: 4/28/2014

F 514	Continued From page 345 and surveyor observed the medical records storage area in the basement of the facility. The storage area consisted of a large caged area in the back corner of a storage room. HUC entered the maintenance area, retrieved a key and opened the pad lock to the door of the area. The area was observed to have many large shelves containing bags of clothing, boxes of belongings and boxes containing medical records. Approximately 15 cabinets were observed to be lined up against the left aspect of the caged area. Approximately 12 boxes containing various resident records in various stages of organization were observed to be stacked on top of cabinets. Many of the boxes were open and broken, with stacks of files falling out and loose papers (containing resident names) exposed. Approximately five boxes were observed on a large metal shelf directly across from the file cabinets. The boxes had no lids and contained resident files stored in the boxes. The boxes were stored amongst the bags of clothing and personal items of residents. During the observation, HUC explained the file cabinets contained resident records which "Could be current, discharged or expired residents," the boxes on the shelves across from the file cabinets were "current records" HUC had attempted to organize. HUC explained she was "in charge of medical records," but she did not have a key to access the storage area. When asked who had a key to the storage area, HUC stated the key was locked in the maintenance area and stated "maintenance" staff had access to the key. HUC stated she believed there were two keys, but then stated the "DON [director of nursing]" did not have access to the medical records. HUC there was no system for organizing the stored clinical records and the records were accessible by unauthorized staff.	F 514

F 514	Continued From page 346 HUC pointed to one file (in amongst file cabinets identified to contain resident records) and stated the file cabinet contained "employee records." HUC verified the resident medical records contained private information, including social security numbers which should not be accessible to all staff. HUC verified the bags of clothing were resident personal belongings and verified unauthorized staff accessed the caged area to retrieve these items. On 3/12/14, at 3:00 p.m. DON verified she did not have a key to access the medical records storage area in the basement and stated she was unclear who had the second key. On 3/13/14, at 3:37 p.m. DON stated only the maintenance staff had a key to the padlock and cages medical records storage area. DON verified maintenance staff was not authorized to have access to resident medical/personal information. DON further verified there was no filing system for medical records, stated she was not aware employee files were stored with resident records. DON verified HUC did not have a key and was expected to have access to the storage area. DON verified although the medical record storage area was locked with a pad lock, resident private and medical information was not secure. On 3/18/14, at 12:02 p.m. the director of plant operations (DPO) verified he had the key to access the medical record storage area and stated he believed there was "only one" key. DPO was unclear why he had access to the area and not the HUC or DON. DPO verified he and other maintenance staff entered the area to access resident personal belongings stored in the area.	F 514

The Videll Healthcare, LLC Record Retention/Destruction policy dated as reviewed on 5/2013, indicated, "The Videll Healthcare, LLC facilities will retain and destroy medical records in compliance with all state and federal laws and regulations. Facilities will use AHIMA (American Health Information Management Association) as an authoritative resource and standard for medical record retention and/or destruction." The procedure directed the reader to the website address "For authoritative resource and guidelines regarding medical record retention and/or destruction..." Although the policy identified an authoritative source for reference to guidelines, the policy lacked practical procedural identification of the means for record storage, such as where, under what condition, security; what staff would have access to the resident medical records in storage, such as staff allowed access to the key; and organization of the medical records storage. Although the policy reference destruction of the medical records, the policy lacked practical procedural direction for when and how the facility would handle medical record destruction.

R11's clinical record contained a back dated therapy screening form, had an incomplete Vulnerability assessment, and lacked accurate and consistent documentation of behaviors.

The Admission Record indicated R11 was admitted to the facility on 12/31/13. A Therapy Screening Form dated 1/2/14, indicated R11 was screened upon admission to the facility. The form indicated R11 refused offers for therapy. Although the form was dated 1/2/14, at the top of the form,

F 514	Continued From page 348 the bottom of the form was signed by a therapist and dated for 3/11/14.The screening form indicated R11 was identified to refuse care and services shortly after admission. An admission Progress Note dated 12/31/13, at 10:47 p.m. identified R11 was admitted to the facility, identified R11 was cognitively intact, continent of bowel and bladder, and transferred independently. A note at 11:53 p.m. identified R11 was able to make changes in body position when in bed to "release pressure." Although R11 had left sided weakness and a contracture of left arm and lower leg, the note incorrectly identified R11 was "able to independently walk to and from toilet." The Social Services Comprehensive Assessment Packet dated 1/13/14, included: a LOA (leave of absence) Safety Assessment, Smoking Assessment and Vulnerable Adult Assessment dated 1/2/14. No behaviors of refusing cares were identified in the assessments. The Vulnerable Adult Assessment was incomplete. Although R11 was identified to have refused to take showers at the homeless shelter (resulting in R11 losing a respite bed there) and R11 had behaviors of not taking medications such as baclofen, the assessment didn't identify R11 had any behaviors, such as calling staff derogatory names and refusal/rejection of cares. The clinical record did not identify a potential risk factor for R11 vulnerability. R11's care plan only had a focus for activities dated 1/8/14, and an identified problem for risk for impaired nutrition dated as revised on 3/12/14. Neither care plan focuses addressed R11's concerns with roommate, refusals of care and the	F 514

F 514	Continued From page 349 behaviors of calling staff derogatory names. The clinical record lacked evidence R11 had care plans developed (including goals and interventions) to address his clinically related social service needs, such as, but not limited to: R11's identified behaviors of refusals/rejection of cares, R11's identified behavior of calling staff derogatory names, and identification of R11's increased vulnerability due to physical limitations and individual psychosocial needs (such as a history of homelessness). In addition, R11 lacked a care plan to address the risks of refusals of care, such as potential increase in contracture due to refusals of therapies and/or range of motion, potential development of skin issues due to refusal of bathing/personal hygiene/grooming and skin assessments/evaluations and refusals of doctor visits. On 3/14/14, at 10:41 a.m. social service designee, (SSD) stated she was not aware of R11 refusing any or all cares. SSD stated she reviewed the (interdisciplinary team, IDT) progress notes, but stated the behaviors were not appropriately being documented in the clinical record. SSD stated "documentation was missing" and there "wasn't appropriate documentation [on behaviors]." SSD stated it was "very important for staff to document" and further stated she "relied heavily" on the documentation. SSD stated she was "not closely interactive with residents and staff." SSD verified she had access to "PCC [Point Click Care, the electronic medical record or EMR], and stated she did not know the NA staff documented R11's refusals daily "at the kiosks [in Care Tracker]." SSD stated she did not have access to the "kiosk" or Care Tracker. SSD verified R11's medical record was inaccurate.	F 514

F 514	Continued From page 350 On 3/14/14, at 11:20 a.m. a physical therapist (PT)-J who provided a copy of R11's Therapy Screening Form verified the evaluation was "back dated" due to not being documented at the time of admission and problems with lost documentation. PT-J verified R11 refused therapy. PT-J stated the risks and benefits were provided to R11, but were unclear on documentation of the risk/benefits. R47's weight(s) were lacking in the medical record since admission. On 3/12/14, at 9:15 a.m. during review of R47's both physical and electronic medical record, it was revealed R47's weight had not been taken since admission. R47 had been admitted to the facility on 1/24/14, obtained from the admission Minimum Data Set (MDS) dated 1/30/14. During further document reviewed it was revealed the weight from the hospital Discharge Health & Physical Progress was the one used for the Nutritional Assessment and initial MDS at the facility. When approached on 3/12/14, at 9:14 a.m. registered nurse (RN)-C who was the MDS coordinator verified R47's medical record lacked weights since admission to the facility but stated she would have the dietician come talk to this surveyor. -At 9:16 a.m. returned to surveyor stated the dietician was not on site but would let her know the surveyor was looking for her. -At 9:22 a.m. surveyor approached the director of nursing (DON) stated she had been at the facility	F 514

F 520	Continued From page 357 On 3/17/14, at 10:40 a.m. an interview with the administrator and corporate interim administrator (CIA); the administrator stated she had started February 4th, and there had not been a quality meeting held since, but stated "I think we are in compliance, the lack of food was not substantiated by OHFC (Office of Health Facility Complaints). The CIA stated she would need to look at the 4th quarter to determine when a quality meeting should have been held, or when their 4th quarter ended. On 3/17/14, at 12:00 p.m. CIA stated the last quality meeting was held in 9/9/13, they had attempted to hold a quality meeting in December 2013, but OHFC came in and it was postponed. They then attempted a quality meeting after that but the medical director (MD-B) broke her leg and they had to cancel. On 3/18/14, at 3:15 p.m. chief operations officier (COO) stated she did not attend or conference into the quality meetings because they are a small company and she was the "boots on the ground at all facilities," but did ensure she got the meeting minutes quarterly. On 3/18/14, at 5:00 p.m. the new DON and administrator were not aware that a quality meeting had not been held in December 2013 and were planning an April 2014 meeting. The DON stated both she and the administrator were new to the facility, and had been putting together a list of quality issues, which included focusing on medication safety, audits and training. The undated Behavior Monitoring procedure directed staff to report all incidents of abusive behavior, such as physical, verbal, theft, etc. The	F 520

F 520	Continued From page 358 staff was to report to the supervisor immediately. New behaviors were to be reported to the nurse for appropriate follow up. The procedure indicated the nurse and social worker were to review the information weekly and follow up as needed. The facility Smoking Policy dated as revised on 1/2014, directed, "2. All smokers shall be assessed related to smoking safety at the time of admission and then at least quarterly as outlined by OBRA assessment timeframe's."; "7. Residents who smoke shall wear a smoking apron if they are found not to be safe (i.e. drop lit cigarette or do not handle the ashes properly. a. If clothing is found to have cigarette burn holes the smoker must wear an apron to protect themselves from burns. 8. All smoking materials will be stored in a secure area to ensure they are kept safe. Based on the individual resident smoking safety assessment facility staff shall determine the most appropriate method to secure storage."; "10. All smoking sessions will be supervised by facility staff members only." The Prohibition of Abuse, Neglect, Mistreatment, and Misappropriation of Resident Property policy dated as reviewed 1/2013, identified each resident had the right to be from mistreatment, neglect, involuntary seclusion and misappropriation of property. The policy identified appropriate definitions of abuse, neglect, misappropriation of resident property, and injuries of unknown source. - The policy identified employees would be screened prior to first day of employment including: license verification, registry search, criminal background check, reference checks. Screening for potentially abusive residents during the pre-admission process. The policy identified	F 520

F 520	Continued From page 359 training would be provided to employees through orientation and ongoing regarding abuse/neglect prevention, identification and recognition of signs/symptoms of abuse/neglect, protection, investigation, reporting and doc of abuse/neglect. The policy indicated residents would be educated on admission and during the stay on abuse/neglect. - The policy indicated reports would be made without fear of reprisal. The policy specifically directed to notify the administrator for injuries of unknown origin. - An addendum at the end of the policy indicated, "State of Minnesota" and, "The facility reports any reported, suspected, and/or validated occurrences of abuse/neglect or injuries of unknown source immediately to the administrator and to state agencies as required by individual state regulations." The policy did not identify the office of health facility complaints (OHFC), online reporting or Common Entry Point (CEP). The policy for quality assessment and assurance committee was requested and was not provided. There was no meeting held since 9/9/13, that would have identified potential quality deficiencies where the facility would have developed and implemented plans of action to correct those quality deficiencies, which would have included monitoring the effect of implemented changes and making needed revisions to the action plans. MINNESOTA MDH DEPARTMENT OF HEALTH

Protecting, Maintaining and Improving the Health of Minnesotans

NOTICE OF REPEAT VIOLATIONS AND IMMINENT RISK TO RESIDENT CARE OR SAFETY

Electronically Delivered: April 4, 2014

Ms. Noreen Cochran, Administrator
Camden Care Center
512 49th Avenue North
Minneapolis, Minnesota 55430

Re: Enclosed State Nursing Home Licensing Orders - Project Number S5544023

Dear Ms. Cochran:

This is to inform you that due to repeat violations within the preceding two year period which created an imminent risk to resident care or safety, and due to repeat violations in the four highest daily fine categories prescribed in rule, the commissioner of health has the authority to initiate proceedings to suspend or revoke the nursing home license for Camden Care Center or refuse to renew the license. At this time the Minnesota Department of Health is considering options and what enforcement steps are necessary in addition to the ones set out in this letter.

The above facility was surveyed on March 10, 2014 through March 18, 2014 for the purpose of assessing compliance with Minnesota Department of Health Nursing Home Rules. At the time of the survey, the survey team from the Minnesota Department of Health, Compliance Monitoring Division, noted one or more violations of these rules that are issued in accordance with Minnesota Stat. section 144.653 and/or Minnesota Stat. Section 144A.10. If, upon reinspection, it is found that the deficiency or deficiencies cited herein are not corrected, a civil fine for each deficiency not corrected shall be assessed in accordance with a schedule of fines promulgated by rule of the Minnesota Department of Health.

In accordance with MN Rules 144A.11 Subd. 2. (a) the commissioner of health shall initiate proceedings within 60 days of notification to suspend or revoke a nursing home license or shall refuse to renew a license if within the preceeding two years the nursing home has incurred the following number of uncorrected or repeated violations:

(1) two or more uncorrected violations or one or more repeated violations which created an imminent risk to direct resident care or safety; or

(2) four or more uncorrected violations or two or more repeated violations of any nature for which the fines are in the four highest daily fine categories prescribed in rule.

The following violations cited at the time of the survey completed on March 18, 2014 are repeat violations and were previously cited within the preceding two year period:

0165 - Licensee, Provision of Adequate Financing - MN Rule 4658.0050 Subp. 3.F.
0530 - Use of Restraints - MN Rule 4658.0300 Subp. 4.
0560 - Comprehensive Plan of Care, Contents - MN Rule 4658.0405 Subp. 2.
0830 - Adequate and Proper Nursing Care, General - MN Rule 4658.0520 Subp. 1.
1375 - Infection Control, Program - MN Rule 4658.0800 Subp. 1.
1695 - Plant Housekeeping, Operation and Maintenance - MN Rule 4658.1415 Subp. 4.
2000 - Reporting - Maltreatment of Vulnerable Adults - MN Statutes 626.557 Subd. 14 (a)-(c)

The following violations cited at the time of the survey completed on March 18, 2014 are repeat violations and carry fines in the four highest fine categories:

0530 - Use of Restraints - MN Rule 4658.0300 Subp. 4.
0560 - Comprehensive Plan of Care, Contents - MN Rule 4658.0405 Subp. 2.
0830 - Adequate and Proper Nursing Care, General - MN Rule 4658.0520 Subp. 1.
1375 - Infection Control, Program - MN Rule 4658.0800 Subp. 1.

In addition, repeat violations noted at the time of the survey completed on March 18, 2014 created an imminent risk to direct resident care or safety.

To assist in complying with the correction order(s), a “suggested method of correction” has been added. This provision is being suggested as one method that you can follow to correct the cited deficiency. Please remember that this provision is only a suggestion and you are not required to follow it. Failure to follow the suggested method will not result in the issuance of a penalty assessment. You are reminded, however, that regardless of the method used, correction of the deficiency within the established time frame is required. The “suggested method of correction” is for your information and assistance only.

You have agreed to participate in the electronic receipt of State licensure orders consistent with the Minnesota Department of Health Informational Bulletin 14-01, available at http://www.health.state.mn.us/divs/fpc/profinfo/infobul.htm. The State licensing orders are delineated on the attached Minnesota Department of Health orders being submitted to you electonically. The Minnesota Department of Health is documenting the State Licensing Correction Orders using federal software. Tag numbers have been assigned to Minnesota state statutes/rules for Nursing Homes.

The assigned tag number appears in the far left column entitled "ID Prefix Tag." The state statute/rule number and the corresponding text of the state statute/rule out of compliance is listed in the "Summary Statement of Deficiencies" column and replaces the "To Comply" portion of the correction order. This column also includes the findings that are in violation of the state statute after the statement, "This Rule is not met as evidenced by." Following the surveyors findings are the Suggested Method of Correction and the Time Period for Correction.

PLEASE DISREGARD THE HEADING OF THE FOURTH COLUMN WHICH STATES, "PROVIDER'S PLAN OF CORRECTION." THIS APPLIES TO FEDERAL DEFICIENCIES ONLY. THIS WILL APPEAR ON EACH PAGE.

THERE IS NO REQUIREMENT TO SUBMIT A PLAN OF CORRECTION FOR VIOLATIONS OF MINNESOTA STATE STATUTES/RULES.

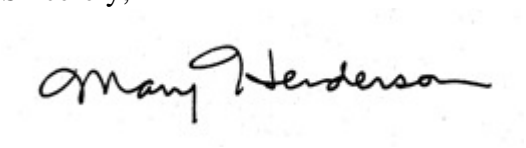
Although no plan of correction is necessary for State Statutes/Rules, please enter the word "corrected" in the box available for text. You must then indicate in the electronic State licensure process, under the heading completion date, the date your orders will be corrected prior to electronically submitting to the Minnesota Department of Health. We urge you to review these orders carefully, item by item, and if you find that any of the orders are not in accordance with your understanding at the time of the exit conference following the survey, you should immediately contact me.

You may request a hearing on any assessments that may result from non-compliance with these orders provided that a written request is made to the Department within 15 days of receipt of a notice of assessment for non-compliance.

Please note it is your responsibility to share the information contained in this letter and the results of this visit with the President of your facility's Governing Body.

Please feel free to call me with any questions.

Sincerely,



Mary Henderson, Program Assurance Unit Supervisor
Licensing and Certification Program
Division of Compliance Monitoring

2 000	Initial Comments *****ATTENTION****** NH LICENSING CORRECTION ORDER In accordance with Minnesota Statute, section 144A.10, this correction order has been issued pursuant to a survey. If, upon reinspection, it is found that the deficiency or deficiencies cited herein are not corrected, a fine for each violation not corrected shall be assessed in accordance with a schedule of fines promulgated by rule of the Minnesota Department of Health. Determination of whether a violation has been corrected requires compliance with all requirements of the rule provided at the tag number and MN Rule number indicated below. When a rule contains several items, failure to comply with any of the items will be considered lack of compliance. Lack of compliance upon re-inspection with any item of multi-part rule will result in the assessment of a fine even if the item that was violated during the initial inspection was corrected. You may request a hearing on any assessments that may result from non-compliance with these orders provided that a written request is made to the Department within 15 days of receipt of a notice of assessment for non-compliance. INITIAL COMMENTS: A licensure survey was conducted by the Minnesota Department of Health on 3/10/14 through 3/18/14, surveyors of this Department's staff, visited the above provider and the following correction orders are issued. When corrections are completed, please sign and date, make a copy of these orders and return the original to the	2 000	Minnesota Department of Health is documenting the State Licensing Correction Orders using federal software.
