Administrator
Sylvan Court
112 St Olaf Avenue South
Canby, MN 56220

RE: CCN: 245433
Cycle Start Date: August 5, 2021

Dear Administrator:

On August 5, 2021, a survey was completed at your facility by the Minnesota Department(s) of Health and Public Safety to determine if your facility was in compliance with Federal participation requirements for skilled nursing facilities and/or nursing facilities participating in the Medicare and/or Medicaid programs.

This survey found the most serious deficiencies in your facility to be widespread deficiencies that constitute no actual harm with potential for more than minimal harm that is not immediate jeopardy (Level F), as evidenced by the electronically delivered CMS-2567, whereby significant corrections are required.

REMEDIES

As a result of the survey findings and in accordance with survey and certification memo 16-31-NH, this Department recommended the enforcement remedy(ies) listed below to the CMS Region V Office for imposition. The CMS Region V Office concurs and is imposing the following remedy and has authorized this Department to notify you of the imposition:

- Discretionary Denial of Payment for new Medicare and/or Medicaid Admissions, Federal regulations at 42 CFR § 488.417(a), effective October 17, 2021.

- Directed plan of correction (DPOC), Federal regulations at 42 CFR § 488.424. Please see electronically attached documents for the DPOC.

The CMS Region V Office will notify your Medicare Administrative Contractor (MAC) that the denial of payment for new admissions is effective October 17, 2021. They will also notify the State Medicaid Agency that they must also deny payment for new Medicaid admissions effective October 17, 2021.

You should notify all Medicare/Medicaid residents admitted on, or after, this date of the restriction. The remedy must remain in effect until your facility has been determined to be in substantial compliance or your provider agreement is terminated. Please note that the denial of payment for

new admissions includes Medicare/Medicaid beneficiaries enrolled in managed care plans. It is your obligation to inform managed care plans contracting with your facility of this denial of payment for new admissions.

This Department is also recommending that CMS impose:

- Civil money penalty (42 CFR 488.430 through 488.444). You will receive a formal notice from the CMS RO only if CMS agrees with our recommendation.

NURSE AIDE TRAINING PROHIBITION (Delete this section if SQC tags are cited and this note)

Please note that Federal law, as specified in the Act at §§ 1819(f)(2)(B) and 1919(f)(2)(B), prohibits approval of nurse aide training and competency evaluation programs and nurse aide competency evaluation programs offered by, or in, a facility which, within the previous two years, has operated under a § 1819(b)(4)(C)(ii)(II) or § 1919(b)(4)(C)(ii) waiver (i.e., waiver of full-time registered professional nurse); has been subject to an extended or partial extended survey as a result of a finding of substandard quality of care; has been assessed a total civil money penalty of not less than $11,160; has been subject to a denial of payment, the appointment of a temporary manager or termination; or, in the case of an emergency, has been closed and/or had its residents transferred to other facilities.

If you have not achieved substantial compliance by October 17, 2021, the remedy of denial of payment for new admissions will go into effect and this provision will apply to your facility. Therefore, Sylvan Court will be prohibited from offering or conducting a Nurse Aide Training and/or Competency Evaluation Program (NATCEP) for two years from October 17, 2021. You will receive further information regarding this from the State agency. This prohibition is not subject to appeal. Further, this prohibition may be rescinded at a later date if your facility achieves substantial compliance prior to the effective date of denial of payment for new admissions.

However, under Public Law 105-15, you may contact the State agency and request a waiver of this prohibition if certain criteria are met.

ELECTRONIC PLAN OF CORRECTION (ePOC)

Within ten (10) calendar days after your receipt of this notice, you must submit an acceptable ePOC for the deficiencies cited. An acceptable ePOC will serve as your allegation of compliance. Upon receipt of an acceptable ePOC, we will authorize a revisit to your facility to determine if substantial compliance has been achieved. The failure to submit an acceptable ePOC can lead to termination of your Medicare and Medicaid participation (42 CFR 488.456(b)).

To be acceptable, a provider's ePOC must include the following:

- How corrective action will be accomplished for those residents found to have been affected by the deficient practice.
- How the facility will identify other residents having the potential to be affected by the same

deficient practice.
- What measures will be put into place, or systemic changes made, to ensure that the deficient practice will not recur.
- How the facility will monitor its corrective actions to ensure that the deficient practice is being corrected and will not recur.
- The date that each deficiency will be corrected.
- An electronic acknowledgement signature and date by an official facility representative.

DEPARTMENT CONTACT

Questions regarding this letter and all documents submitted as a response to the resident care deficiencies (those preceded by a "F" tag), and emergency preparedness deficiencies (those preceded by an “E” tag), i.e., the plan of correction should be directed to:

Nicole Osterloh, RN, Unit Supervisor
Marshall District Office
Licensing and Certification Program
Health Regulation Division
Minnesota Department of Health
1400 East Lyon Street, Suite 102
Marshall, Minnesota 56258-2504
Email: nicole.osterloh@state.mn.us
Office: 507-476-4230
Mobile: (507) 251-6264 Mobile: (605) 881-6192

PRESUMPTION OF COMPLIANCE - CREDIBLE ALLEGATION OF COMPLIANCE

The facility's ePoC will serve as your allegation of compliance upon the Department's acceptance. In order for your allegation of compliance to be acceptable to the Department, the ePoC must meet the criteria listed in the plan of correction section above. You will be notified by the Minnesota Department of Health - Health Regulation Division staff and/or the Department of Public Safety, State Fire Marshal Division staff, if your ePoC for their respective deficiencies (if any) is acceptable.

VERIFICATION OF SUBSTANTIAL COMPLIANCE

Upon receipt of an acceptable ePoC, a Post Certification Revisit (PCR), of your facility will be conducted to validate that substantial compliance with the regulations has been attained in accordance with your verification.

If substantial compliance has been achieved, certification of your facility in the Medicare and/or Medicaid program(s) will be continued and remedies will not be imposed. Compliance is certified as of the latest correction date on the approved ePoC, unless it is determined that either correction actually occurred between the latest correction date on the ePoC and the date of the first revisit, or correction occurred sooner than the latest correction date on the ePoC.

FAILURE TO ACHIEVE SUBSTANTIAL COMPLIANCE BY THE SIXTH MONTH AFTER THE LAST DAY OF THE SURVEY

We will also recommend to the CMS Region V Office and/or the Minnesota Department of Human Services that your provider agreement be terminated by February 5, 2022 if your facility does not achieve substantial compliance. This action is mandated by the Social Security Act at § 1819(h)(2)(C) and 1919(h)(3)(D) and Federal regulations at 42 CFR § 488.412 and § 488.456.

Please note that this notice does not constitute formal notice of imposition of alternative remedies or termination of your provider agreement. Should the Centers for Medicare & Medicaid Services determine that termination or any other remedy is warranted, it will provide you with a separate formal notification of that determination.

APPEAL RIGHTS

If you disagree with this action imposed on your facility, you or your legal representative may request a hearing before an administrative law judge of the Department of Health and Human Services, Departmental Appeals Board (DAB). Procedures governing this process are set out in 42 C.F.R. 498.40, et seq. You must file your hearing request electronically by using the Departmental Appeals Board's Electronic Filing System (DAB E-File) at https://dab.efile.hhs.gov no later than sixty (60) days after receiving this letter. Specific instructions on how to file electronically are attached to this notice. A copy of the hearing request shall be submitted electronically to:

Tamika.Brown@cms.hhs.gov

Requests for a hearing submitted by U.S. mail or commercial carrier are no longer accepted as of October 1, 2014, unless you do not have access to a computer or internet service. In those circumstances you may call the Civil Remedies Division to request a waiver from e-filing and provide an explanation as to why you cannot file electronically or you may mail a written request for a waiver along with your written request for a hearing. A written request for a hearing must be filed no later than sixty (60) days after receiving this letter, by mailing to the following address:

Department of Health & Human Services
Departmental Appeals Board, MS 6132
Director, Civil Remedies Division
330 Independence Avenue, S.W.
Cohen Building – Room G-644
Washington, D.C. 20201
(202) 565-9462

A request for a hearing should identify the specific issues, findings of fact and conclusions of law with which you disagree. It should also specify the basis for contending that the findings and conclusions are incorrect. At an appeal hearing, you may be represented by counsel at your own expense. If you have any questions regarding this matter, please contact Tamika Brown, Principal Program Representative by phone at (312) 353-1502 or by e-mail at Tamika.Brown@cms.hhs.gov.

INFORMAL DISPUTE RESOLUTION (IDR) / INDEPENDENT INFORMAL DISPUTE RESOLUTION (IIDR)

In accordance with 42 CFR 488.331, you have one opportunity to question cited deficiencies through an informal dispute resolution process. You are required to send your written request, along with the specific deficiencies being disputed, and an explanation of why you are disputing those deficiencies, to:

Nursing Home Informal Dispute Process
Minnesota Department of Health
Health Regulation Division
P.O. Box 64900
St. Paul, Minnesota 55164-0900

This request must be sent within the same ten days you have for submitting an ePoC for the cited deficiencies. All requests for an IDR or IIDR of federal deficiencies must be submitted via the web at: https://mdhprovidercontent.web.health.state.mn.us/ltc_idr.cfm

You must notify MDH at this website of your request for an IDR or IIDR within the 10 calendar day period allotted for submitting an acceptable electronic plan of correction. A copy of the Department's informal dispute resolution policies are posted on the MDH Information Bulletin website at: https://www.health.state.mn.us/facilities/regulation/infobulletins/ib04_8.html

Please note that the failure to complete the informal dispute resolution process will not delay the dates specified for compliance or the imposition of remedies.

Questions regarding all documents submitted as a response to the Life Safety Code deficiencies (those preceded by a "K" tag) i.e., the plan of correction, request for waivers, should be directed to:

William Abderhalden, Fire Safety Supervisor
Deputy State Fire Marshal
Health Care/Corrections Supervisor – Interim
Minnesota Department of Public Safety
445 Minnesota Street, Suite 145
St. Paul, MN 55101-5145
Cell: (507) 361-6204
Email: william.abderhalden@state.mn.us
Fax: (651) 215-0525

Feel free to contact me if you have questions.

Sincerely,

Kamala Fiske-Downing

F 880	Continued From page 3 precautions (TBP) for appropriate use of personal protective equipment (PPE). This had the potential to affect 17 of 43 residents who resided on that unit. The facility also failed to ensure policies were reviewed and/or revised annually. Findings include: Observation beginning on 8/2/21 at 12:45 p.m., upon entrance to the facility, identified R143's room had a blue PPE holder on the door. A bright orange sign indicating Contact Precautions were required was tucked into a center pocket with only the top 2 inches visible. PPE required for any persons entering the room included a gown, gloves, mask, and eye protection. R143's current, undated face sheet identified R143 was admitted on 7/23/21 from the local acute care facility with diagnoses which included a history of falls, pulmonary hypertension, hypertension, chronic obstructive pulmonary disease, and diabetes. R143 was placed in a private room in quarantine for 14 days following admission, to be discontinued on 8/6/21. Observation on 8/5/21 at 12:37 p.m. with housekeeper (H)-A as she cleaned R143's room identified she wore a mask, gloves and eye protection. H-A retrieved cleaning supplies from the housekeeping cart and entered R143's room and proceeded to the bathroom to clean. H-A wore no gown when entering R143's room. Interview on 8/5/21 at 12:40 p.m., with H-A identified she had received training on Infection control, and precautions and stated she would be aware of a resident on precautions by signage placed on the door. H-A agreed she should have	F 880	the provider of the truth of the facts alleged or conclusions set forth in the statement of deficiencies. The plan of correction is prepared and/or executed solely because it is required by the provisions of federal and state law. For the purposes of any allegation that the center is not in substantial compliance with federal requirements of participation, this response and plan of correction constitutes the center□s allegation of compliance in accordance with section 7305 of the State Operations Manual. 1.On 8.2.21, H-A was coached on the viewing of PPE signage on the resident room doors prior to entry and reviewed proper PPE to wear and educated on proper use. H-A stated verbal understanding of the PPE isolation guidelines and is aware of where to locate the PPE policies and procedures and is aware to contact her supervisor, Infection Preventionist or nursing staff if questions or concerns. 2.EVS supervisor reviewed isolation precautions door signage, and standard and transmission based precautions with all environmental services staff via written communication on 8.9.21 and also during departmental meeting on 8.25.21. 3.Written communication was completed to all staff on 8.10.21 who may enter resident□s rooms focusing on reading the door signage before entering the rooms to assure the proper use of correct PPE and the specific PPE requirements for

F 880	Continued From page 4 been wearing a gown when she entered R143's room, but "hadn't thought about it". Interview 8/05/21 at 1:02 p.m., with the administrator identified all staff had received training on working with residents on transmission based precautions (TBP) and use of appropriate PPE. The administrator identified H-A usually worked in the adjacent hospital and had been brought over to the facility to assist with routine cleaning. The administrator's expectation was all staff were to follow appropriate use of PPE and TBP. Review of the 2/5/20, Standard and Transmission Based Precautions (Isolation) policy identified the use of PPE for Contact Precautions included wearing a gown, gloves, mask, and eye protection prior to entering a resident' room.	F 880	contact/droplet precautions. Annual Safety Fair was held for employees on 8.19.21 with opportunity for an education session focusing on proper donning and doffing of PPE for standard and transmission based precautions. Additionally, staff education to nursing and ancillary staff members that interact with residents of Sylvan Court will complete education and competency validation by 9.16.21 in regards to proper donning of PPE prior to entering a resident care area that requires standard or transmission based precautions, review of standard based and transmission based policy and procedure, and assuring that signage is visualized prior to entering a resident room. Staff members who have not worked a shift during this time period will receive training during their next scheduled work shift. Residents received education consistent with their capacity to understand the infection prevention control plan stressing the importance on proper use of PPE on or prior to 9.10.21. Resident representatives received review of the Infection Prevention Control Plan that was distributed electronically on 9.10.21 and for those who require a written copy, they were made available in the front entrance of Sylvan Court and families were made aware of this using an automated phone message on 9.10.21. The Standards and Transmission Based Precautions (Isolation) policy was reviewed without modifications by the Sanford Sylvan Court DON and Infection preventionist on 9.9.21. It will be reviewed

The summary of the RCA is as follows: Environmental services employee providing routine housekeeping service to a resident of Sylvan Court LTC who was on day 13 of 14 of a new admission quarantine and failed to wear a gown when entering the room. Environmental services employee did not typically work in the LTC environment but had been educated and was familiar of transmission based precautions when entering patient or resident rooms. Proximate cause of human behavior-attention to detail. Environmental services employee received coaching and education and also further review and education was completed for all staff that have resident encounters at Sanford Sylvan Court LTC on proper PPE during standard and transmission based precautions. 4.Two audits have been implemented. A random audit of 10 observations per week for 3 weeks will occur and then reduce 10 observations per month for 2 months will occur during various shifts to assure staff use all the necessary PPE and don it correctly when entering a resident□s room who is on standard or transmission based precautions. A random audit of 10 observations per month will occur during various shifts to determine if signage is clearly visible in door PPE holder for staff to know the PPE required for any persons

DIRECTED PLAN OF CORRECTION

A Directed Plan of Correction (DPOC) is imposed in accordance with 42 CFR § 488.424. Your facility must include the following in their POC for the deficient practice cited at F880:

DIRECTED PLAN OF CORRECTION - Personal Protective Equipment (PPE)

- Address how corrective action will be accomplished for those residents found to have been affected by the deficient practice.

- Address how the facility will identify other residents having the potential to be affected by the same deficient practice.

POLICIES/PROCEDURES/SYSTEM CHANGES:

- The facility's Quality Assurance and Performance Improvement Committee with assistance from the Infection Preventionist, with Governing Body oversight must conduct a root cause analysis (RCA) to identify the problem(s) that resulted in this deficiency and develop intervention or corrective action plan to prevent recurrence. Information regarding RCAs is available in the Guidance for Performing Root Cause Analysis (RCA) with Performance Improvement Projects (PIPs). https://www.cms.gov/Medicare/Provider-Enrollment-and-Certification/QAPI/downloads/GuidanceforRCA.pdf

The Infection Preventionist and Director of Nursing, shall complete the following:

- Review policies and procedures for donning/doffing PPE during COVID-19 with current guidelines to include crisis standard of care, contingency standard of care and standard care..

- Develop and implement a policy and procedure for source cotrol masks.

- Develop and implement a policy and procedure for proper use of gowns.

- Review policies regarding standard and transmission-based precautions and revise as needed.

TRAINING/EDUCATION:

As a part of corrective action plan, the facility must provide training for all staff providing direct care to residents, and all staff entering resident's rooms, whether it be for residents' dietary needs or cleaning and maintenance services. The training must cover standard infection control practices, including but not limited to, transmission-based precautions, appropriate PPE use, and donning and doffing of PPE.

- The training may be provided by the Director of Nursing, Infection Preventionist, or Medical Director with an attestation statement of completion.

- The training must include competency testing of staff and this must be documented.

- Residents and their representatives should receive education on the facility's Infection Prevention Control Program as it related to them and to the degree possible/consistent with resident's capacity.

- Online infection prevention training courses may be utilized. The CDC and MDH websites have several infection control training modules and materials.

MONITORING/AUDITING:

- The Director of Nursing, the Infection Preventionist, and other facility leadership will conduct audits of donning/doffing PPE with Transmission Based Precautions i.e. Droplet precautions.

- The Director of Nursing, Infection Preventionist, and other facility leadership will conduct routine audits on all shifts four times a week for one week, then twice weekly for one week once compliance is met. Audits should continue until 100% compliance is met on source control masking for staff, visitors, and residents.

- The Director of Nursing, Infection Preventionist, and other facility leadership will conduct real time audits on all aerosolized generating procedures to ensure PPE is in us.

- The Director of Nursing, Infection Preventionist, and other facility leadership will conduct real time audits on proper use of gowns to ensure PPE is in use.

- The Director of Nursing, Infection Preventionist, or designee will review the results of audits and monitoring with the Quality Assurance Program Improvement (QAPI) program.

In accordance with 42 CFR § 488.402(f), the DPOC remedy is effective 15 calendar days from the date of the enforcement letter.

To successfully complete the DPOC, the facility must provide documentation to support evidence the DPOC was completed.

- Documentation must be uploaded as attachments through ePOC to ensure you have completed this remedy.

- A revisit will not be completed prior to receipt of documentation confirming the DPOC was completed.

- Imposition of this DPOC does not replace the requirement that the facility must submit a complete POC for all cited deficiencies (including F880) within 10 days after receipt of the Form CMS 2567.

EPOC:

The ePOC system is programmed, so the facility cannot upload additional documents after MDH formally accepts the Plan of Correction through the EPOC system.

To resolve this, after the POC is received, and meets all the required POC components. The supervisor will reject the POC for F880 in the system, BUT will identify in the comment section, "POC accepted but waiting additional documents complete DPOC process."

By completing this process the ePOC portal opens for the facility to upload the final DPOC documents for review.

If additional information is required for the POC, the supervisor will identify this in the comment section.

Adding attachments DPOC:

When adding DPOC attachments, the software does not have a limit to the number of attachments, but each attachments cannot be greater than 4MB. If this occurs, the attachment will not upload in the ePOC system.

ASPEN web ePOC guide for providers:
https://qtso.cms.gov/system/files/qtso/ePOC-Fac_PG_11.9.4.2_FINAL.pdf

Training videos for ePOC provider: https://qtso.cms.gov/training-materials/epoc-providers

In order to speed up our review, identify all submitted documents with the number in the "Item" column.

Item	Checklist: Documents Required for Successful Completion of the Directed Plan
1	Documentation of the RCA and interventions/correction action plan, reviewed with QA committee and Governing Body President with confirmation this was completed.
2	Documentation that the interventions or corrective actions plan that resulted form the RCA was fully implemented.
3	Content of the training provided to staff, including a syllabus, outline, or agenda, as well as any other materials used or provided to staff for the training.
4	Names and positions of all staff that attended trainings, include sign-in sheet.
5	Summary of staff training post-test results, if applicable and include any follow up in response to failed tests.
6	Documentation of completed audit forms and any follow up action taken from failed audits.

K 000	INITIAL COMMENTS FIRE SAFETY An annual Life Safety Code survey was conducted by the Minnesota Department of Public Safety, State Fire Marshal Division on 08/04/2021. At the time of this survey, Sylvan Court was found not in compliance with the requirements for participation in Medicare/Medicaid at 42 CFR, Subpart 483.70(a), Life Safety from Fire, and the 2012 edition of National Fire Protection Association (NFPA) 101, Life Safety Code (LSC), Chapter 19 Existing Health Care and the 2012 edition of NFPA 99, Health Care Facilities Code. THE FACILITY'S POC WILL SERVE AS YOUR ALLEGATION OF COMPLIANCE UPON THE DEPARTMENT'S ACCEPTANCE. YOUR SIGNATURE AT THE BOTTOM OF THE FIRST PAGE OF THE CMS-2567 FORM WILL BE USED AS VERIFICATION OF COMPLIANCE. UPON RECEIPT OF AN ACCEPTABLE POC, AN ONSITE REVISIT OF YOUR FACILITY MAY BE CONDUCTED TO VALIDATE THAT SUBSTANTIAL COMPLIANCE WITH THE REGULATIONS HAS BEEN ATTAINED IN ACCORDANCE WITH YOUR VERIFICATION. IF PARTICIPATING IN THE E-POC PROCESS, A PAPER COPY OF THE PLAN OF CORRECTION IS NOT REQUIRED. PLEASE RETURN THE PLAN OF CORRECTION FOR THE FIRE SAFETY DEFICIENCIES (K-TAGS) TO:	K 000

Electronically Signed		09/10/2021

Any deficiency statement ending with an asterisk (*) denotes a deficiency which the institution may be excused from correcting providing it is determined that other safeguards provide sufficient protection to the patients. (See instructions.) Except for nursing homes, the findings stated above are disclosable 90 days following the date of survey whether or not a plan of correction is provided. For nursing homes, the above findings and plans of correction are disclosable 14 days following the date these documents are made available to the facility. If deficiencies are cited, an approved plan of correction is requisite to continued program participation.

K 712	Continued From page 7 least quarterly on each shift. The staff is familiar with procedures and is aware that drills are part of established routine. Where drills are conducted between 9:00 PM and 6:00 AM, a coded announcement may be used instead of audible alarms. 19.7.1.4 through 19.7.1.7 This REQUIREMENT is not met as evidenced by: Based on document review and staff interview, the facility failed to randomly conduct fire drills in accordance with the NFPA 101 (2012 edition), Life Safety Code, sections 19.7.1.6, 4.7.4, and 4.7.6. These deficient conditions could have a widespread impact on the residents within the facility. Findings include: 1. On 08/04/2021 between 12:00 AM to 05:00 PM, it was revealed during documentation review that the fire drills conducted on the 1st shift for the 2nd through the 4th quarters of the calendar year were not varied in time. 2. On 08/04/2021 between 12:00 AM to 05:00 PM, it was revealed during documentation review that no evidence was provided of drills being conducted for the 3rd shift during the 2nd and 3rd quarters of the calendar year. These deficient conditions were confirmed by the Facility Maintenance Director at the time of discovery.	K 712	1.Facility safety coordinator will assign fire drill times/locations that vary in time from the prior calendar year quarter. 2.Facility safety coordinator will assign fire drill times/locations that vary in time from the prior calendar year quarter. Facility safety coordinator and plant operations supervisor reviewed annual fire drill schedule for compliance with drill times/locations.

	PART I – NFPA 101 LSC REQUIREMENTS (Items in italics relate to the FSES)				
	SECTION 1 – GENERAL REQUIREMENTS				
K100	**General Requirements – Other** List in the REMARKS section any LSC Section 18.1 and 19.1 General Requirements that are not addressed by the provided K-tags, but are deficient. This information, along with the applicable Life Safety Code or NFPA standard citation, should be included on Form CMS-2567.	◉	○	○	
K111	**Building Rehabilitation** ***Repair, Renovation, Modification, or Reconstruction*** Any building undergoing repair, renovation, modification, or reconstruction complies with both of the following: • Requirements of Chapter 18 and 19. • Requirements of the applicable Sections 43.3, 43.4, 43.5, and 43.6. 18.1.1.4.3, 19.1.1.4.3, 43.1.2.1 ***Change of Use or Change of Occupancy*** Any building undergoing change of use or change of occupancy classification complies with the requirements of Section 43.7, unless permitted by 18.1.1.4.2 or 19.1.1.4.2. 18.1.1.4.2 (4.6.7 and 4.6.11), 19.1.1.4.2 (4.6.7 and 4.6.11), 43.1.2.2 (43.7) ***Additions*** Any building undergoing an addition shall comply with the requirements of Section 43.8. If the building has a common wall with a nonconforming building, the common wall is a fire barrier having at least a two hour fire resistance rating constructed of materials as required for the addition. Communicating openings occur only in corridors and are protected by approved self-closing fire doors with at least a 1-1/2 hour fire resistance rating. Additions comply with the requirements of Section 43.8. 18.1.1.4.1 (4.6.7 and 4.6.11), 18.1.1.4.1.1 (8.3), 18.1.1.4.1.2, 18.1.1.4.1.3, 19.1.1.4.1 (4.6.7 and 4.6.11), 19.1.1.4.1.1 (8.3), 19.1.1.4.1.2, 19.1.1.4.1.3, 43.1.2.3(43.8)	○	○	◉	

ID PREFIX		MET	NOT MET	N/A	REMARKS
K112	**Sprinkler Requirements for Major Rehabilitation** If a nonsprinklered smoke compartment has undergone major rehabilitation the automatic sprinkler requirements of 18.3.5 have been applied to the smoke compartment. In cases where the building is not protected throughout by a sprinkler system, the requirements of 18.4.3.2, 18.4.3.3, and 18.4.3.8 are also met. Note: Major rehabilitation involves the modification of more than 50 percent, or more than 4500 ft² of the area of the smoke compartment. 18.1.1.4.3.3, 19.1.1.4.3.3	○	○	◉	
K131	**Multiple Occupancies – Sections of Health Care Facilities** Sections of health care facilities classified as other occupancies meet all of the following: • They are not intended to serve four or more inpatients for purposes of housing, treatment, or customary access. • They are separated from areas of health care occupancies by construction having a minimum two hour fire resistance rating in accordance with Chapter 8. • The entire building is protected throughout by an approved, supervised automatic sprinkler system in accordance with Section 9.7. Hospital outpatient surgical departments are required to be classified as an Ambulatory Health Care Occupancy regardless of the number of patients served. 18.1.3.3, 19.1.3.3, 42 CFR 482.41, 42 CFR 485.623	◉	○	○	
K132	**Multiple Occupancies – Contiguous Non-Health Care Occupancies** Non-health care occupancies that are located immediately next to a Health Care Occupancy, but are primarily intended to provide outpatient services are permitted to be classified as Business or Ambulatory Health Care Occupancies, provided the facilities are separated by construction having not less than two hour fire resistance-rated construction, and are not intended to provide services simultaneously for four or more inpatients. Outpatient surgical departments must be classified as Ambulatory Health Care Occupancy regardless of the number of patients served. 18.1.3.4.1, 19.1.3.4.1	◉	○	○

K224	**Horizontal-Sliding Doors** Horizontal-sliding doors permitted by 7.2.1.14 that are not automatic-closing are limited to a single leaf and shall have a latch or other mechanism to ensure the door will not rebound. Horizontal-sliding doors serving an occupant load fewer than 10 shall be permitted, providing all of the following criteria are met: • Area served by the door has no high hazard contents. • Door is operable from either side without special knowledge or effort. • Force required to operate the door in the direction of travel is ≤ 30 lbf to set the door in motion and ≤ 15 lbf to close or open to the required width. • Assembly is appropriately fire rated, and where rated, is self-or automatic-closing by smoke detection per 7.2.1.8, and installed per NFPA 80. • Where required to latch, the door has a latch or other mechanism to ensure the door will not rebound. 18.2.2.2.10, 19.2.2.2.10	○	○	◉	
K225	**Stairways and Smokeproof Enclosures** Stairways and Smokeproof enclosures used as exits are in accordance with 7.2. 18.2.2.3, 18.2.2.4, 19.2.2.3, 19.2.2.4, 7.2	◉	○	○	
K226	**Horizontal Exits** Horizontal exits, if used, are in accordance with 7.2.4 and the provisions of 18.2.2.5.1 through 18.2.2.5.7, or 19.2.2.5.1 through 19.2.2.5.4. 18.2.2.5, 19.2.2.5	◉	○	○	
K227	**Ramps and Other Exits** Ramps, exit passageways, fire and slide escapes, alternating tread devices, and areas of refuge are in accordance with the provisions 7.2.5 through 7.2.12. 18.2.2.6 to 18.2.2.10 or 19.2.2.6 to 19.2.2.10	◉	○	○	
K231	**Means of Egress Capacity** The capacity of required means of egress is in accordance with 7.3. 18.2.3.1, 19.2.3.1	◉	○	○	

ID PREFIX		MET	NOT MET	N/A	REMARKS
K232	**Aisle, Corridor or Ramp Width** 2012 EXISTING The width of aisles or corridors (clear or unobstructed) serving as exit access shall be at least 4 feet and maintained to provide the convenient removal of nonambulatory patients on stretchers, except as modified by 19.2.3.4, exceptions 1-5. 19.2.3.4, 19.2.3.5	◉	○	○	
	2012 NEW The width of aisles or corridors (clear and unobstructed) serving as exit access in hospitals and nursing homes shall be at least 8 feet. In limited care facility and psychiatric hospitals, width of aisles or corridors shall be at least 6 feet, except as modified by the 18.2.3.4 or 18.2.3.5 exceptions. 18.2.3.4, 18.2.3.5	○	○	◉	
K233	**Clear Width of Exit and Exit Access Doors** 2012 EXISTING Exit access doors and exit doors are of the swinging type and are at least 32 inches in clear width. Exceptions are provided for existing 34-inch doors and for existing 28-inch doors where the fire plan does not require evacuation by bed, gurney, or wheelchair. 19.2.3.6, 19.2.3.7	◉	○	○	
	2012 NEW Exit access doors and exit doors are of the swinging type and are at least 41.5 inches in clear width. In psychiatric hospitals or limited care facilities, doors are at least 32 inches wide. Doors not subject to patient use, in exit stairway enclosures, or serving newborn nurseries shall be no less than 32 inches in clear width. If using a pair of doors, the doors shall be provided with a rabbet, bevel, or astragal at the meeting edge, at least one of the doors shall provide 32 inches in clear width, and the inactive leaf of the pair shall be secured with automatic flush bolts. 18.2.3.6, 18.2.3.7	○	○	◉	
K241	**Number of Exits – Story and Compartment** Not less than two exits, remote from each other, and accessible from every part of every story are provided for each story. Each smoke compartment shall likewise be provided with two distinct egress paths to exits that do not require the entry into the same adjacent smoke compartment. 18.2.4.1-18.2.4.4, 19.2.4.1-19.2.4.4	◉	○	○	

ID PREFIX		MET	NOT MET	N/A	REMARKS
K251	**Dead-End Corridors and Common Path of Travel** 2012 EXISTING Dead-end corridors shall not exceed 30 feet. Existing dead-end corridors greater than 30 feet shall be permitted to be continued to be used if it is impractical and unfeasible to alter them. 19.2.5.2	◉	○	○	
K251	2012 NEW Dead-end corridors shall not exceed 30 feet. Common path of travel shall not exceed 100 feet. 18.2.5.2, 18.2.5.3	○	○	◉	
K252	**Number of Exits – Corridors** Every corridor shall provide access to not less than two approved exits in accordance with Sections 7.4 and 7.5 without passing through any intervening rooms or spaces other than corridors or lobbies. 18.2.5.4, 19.2.5.4	◉	○	○	
K253	**Number of Exits – Patient Sleeping and Non-Sleeping Rooms** Patient sleeping rooms of more than 1,000 square feet or nonsleeping rooms of more than 2,500 square feet have at least two exit access doors remotely located from each other. 18.2.5.5.1, 18.2.5.5.2, 19.2.5.5.1, 19.2.5.5.2	◉	○	○	
K254	**Corridor Access** All habitable rooms not within suites have a door leading directly outside to grade or have a door leading to an exit access corridor. Patient sleeping rooms with less than eight patient beds may have one room intervening to reach an exit access corridor provided the intervening room is equipped with an approved automatic smoke detection system. 18.2.5.6.1 through 18.2.5.6.4, 19.2.5.6.1 through 19.2.5.6.4	◉	○	○	
K255	**Suite Separation, Hazardous Content, and Subdivision** All suites are separated from the remainder of the building (including from other suites) by construction meeting the separation provisions for corridor construction (18.3.6.2-18.3.6.5 or 19.3.6.2-19.3.6.5). Existing approved barriers shall be allowed to continue to be used provided they limit the transfer of smoke. Intervening rooms have no hazardous areas and hazardous areas within suites comply with 18/19.2.5.7.1.3. Subdivision of suites shall be by noncombustible or limited-combustible construction. 18.2.5.7.1.2 through 18.2.5.7.1.4, 19.2.5.7.1.2, 19.2.5.7.1.3, 19.2.5.7.1.4	◉	○	○	

ID PREFIX		MET	NOT MET	N/A	REMARKS
K256	**Sleeping Suites** Occupants shall have exit access to a corridor or direct access to a horizontal exit. Where ≥ 2 exits are required, one exit access door may be to a stairway, passageway or to the exterior. Suites shall be provided with constant staff supervision. Staff shall have direct visual supervision of patient sleeping rooms, from a constantly attended location or the room shall be provided with an automatic smoke detection system. Suites more than 1,000 ft² shall have 2 or more remote exits. One means of egress from the suite shall be to a corridor and one may be into an adjacent suite separated in accordance with corridor requirements. Suites shall not exceed the following size limitations: • 5,000 square feet if the suite is not fully smoke detected or fully sprinklered. • 7,500 square feet if the suite is either fully smoke detected or fully sprinklered. • 10,000 square feet if the suite is both fully smoke detected and fully sprinklered and the sleeping rooms have direct supervision from a constantly attended location. Travel distance between any point in a suite to exit access shall not exceed 100 feet and distance to an exit shall not exceed 150 feet (200 feet if building is fully sprinklered). 18.2.5.7.2, 19.2.5.7.2	○	○	◉	
K257	**Non-Sleeping Suites** Occupants shall have exit access to a corridor or direct access to a horizontal exit. Where ≥ 2 exits are required, one exit access door may be to a stairway, passageway or to the exterior. Suites more than 2,500 ft² shall have 2 or more remote exits. One means of egress from the suite shall be to a corridor and one may be into an adjacent suite separated in accordance with corridor requirements. Suites shall not exceed 10,000 ft². Travel distance between any point in a suite to exit access shall not exceed 100 feet and distance to an exit shall not exceed 150 feet (200 feet if building is fully sprinklered). 18.2.5.7.3, 19.2.5.7.3	○	○	◉	

ID PREFIX		MET	NOT MET	N/A	REMARKS
K261	**Travel Distance to Exits** Travel distance (excluding suites) to exits are measured in accordance with 7.6. • From any point in the room or suite to exit less than or equal to 150 feet (less than or equal to 200 feet if the building is fully sprinklered). • Point in a room to room door less than or equal to 50 feet. 18.2.6, 19.2.6	◉	○	○	
K271	**Discharge from Exits** Exit discharge is arranged in accordance with 7.7, provides a level walking surface meeting the provisions of 7.1.7 with respect to changes in elevation and shall be maintained free of obstructions. Additionally, the exit discharge shall be a hard packed all-weather travel surface. 18.2.7, 19.2.7	◉	○	○	
K281	**Illumination of Means of Egress** Illumination of means of egress, including exit discharge, is arranged in accordance with 7.8 and shall be either continuously in operation or capable of automatic operation without manual intervention. 18.2.8, 19.2.8	◉	○	○	
K291	**Emergency Lighting** Emergency lighting of at least 1-1/2 hour duration is provided automatically in accordance with 7.9. 18.2.9.1, 19.2.9.1	◉	○	○	
K292	**Life Support Means of Egress** 2012 NEW (INDICATE N/A FOR EXISTING) Buildings equipped with or requiring the use of life support systems (electro-mechanical or inhalation anesthetics) have illumination of means of egress, emergency lighting equipment, exit, and directional signs supplied by the life safety branch of the electrical system described in NFPA 99. (Indicate N/A if life support equipment is for emergency purposes only.) 18.2.9.2, 18.2.10.5	○	○	◉	

ID PREFIX		MET	NOT MET	N/A	REMARKS
K293	**Exit Signage** 2012 EXISTING Exit and directional signs are displayed in accordance with 7.10 with continuous illumination also served by the emergency lighting system. 19.2.10.1 (Indicate N/A in one-story existing occupancies with less than 30 occupants where the line of exit travel is obvious.)	◉	○	○

ID PREFIX		MET	NOT MET	N/A	REMARKS
K322	**Laboratories** Laboratories employing quantities of flammable, combustible, or hazardous materials that are considered a severe hazard are protected by 1-hour fire resistance-rated separation, automatic sprinkler system, and are in accordance with 8.7 and with NFPA 99. Laboratories not considered a severe hazard are protected as hazardous areas (see K321). Laboratories using chemicals are in accordance with NFPA 45, *Standard on Fire Protection for Laboratories Using Chemicals*. Gas appliances are of appropriate design and installed in accordance with NFPA 54. Shutoff valves are marked to identify material they control. Devices requiring medical grade oxygen from the piped distribution system meet the requirements under 11.4.2.2 (NFPA 99). 18.3.2.2, 19.3.2.2, 8.7, 8.7.4.1 (LSC) 9.3.1.2, 11.4.3.2, 15.4 (NFPA 99)	○	○	◉	

ID PREFIX		MET	NOT MET	N/A	REMARKS
K323	**Anesthetizing Locations** Areas designated for administration of general anesthesia (i.e., inhalation anesthetics) are in accordance with 8.7 and NFPA 99. Zone valves are: located immediately outside each life-support, critical care, and anesthetizing location of moderate sedation, deep sedation, or general anesthesia for medical gas or vacuum; readily accessible in an emergency; and arranged so shutting off any one anesthetizing location will not affect others. Area alarm panels are provided to monitor all medical gas, medical-surgical vacuum, and piped WAGD systems. Panels are at locations that provide for surveillance, indicate medical gas pressure decreases of 20 percent and vacuum decreases of 12 inch gauge HgV, and provide visual and audible indication. Alarm sensors are installed either on the source side of individual room zone valve box assemblies or on the patient/use side of each of the individual zone box valve assemblies. The EES critical branch supplies power for task illumination, fixed equipment, select receptacles, and select power circuits, and EES equipment system supplies power to ventilation system. Heating, cooling, and ventilation are in accordance with ASHRAE 170. Medical supply and equipment manufacturer's instructions for use are considered before reducing humidity levels to those allowed by ASHRAE, per S&C 13-58. 18.3.2.3, 19.3.2.3 (LSC) 5.1.4.8.7, 5.1.4.8.7.2, 5.1.9.3, 5.1.9.3.4, 6.4.2.2.4.2 (NFPA 99)	○	○	◉	

ID PREFIX		MET	NOT MET	N/A	REMARKS
K324	**Cooking Facilities** Cooking equipment is protected in accordance with NFPA 96, *Standard for Ventilation Control and Fire Protection of Commercial Cooking Operations*, unless: • residential cooking equipment (i.e., small appliances such as microwaves, hot plates, toasters) are used for food warming or limited cooking in accordance with 18.3.2.5.2, 19.3.2.5.2. • cooking facilities open to the corridor in smoke compartments with 30 or fewer patients comply with the conditions under 18.3.2.5.3, 19.3.2.5.3, or • cooking facilities in smoke compartments with 30 or fewer patients comply with conditions under 18.3.2.5.4, 19.3.2.5.4. Cooking facilities protected according to NFPA 96 per 9.2.3 are not required to be enclosed as hazardous areas, but shall not be open to the corridor. 18.3.2.5.1 through 18.3.2.5.4, 19.3.2.5.1 through 19.3.2.5.5, 9.2.3, TIA 12-2	◉	○	○	
K325	**Alcohol Based Hand Rub Dispenser (ABHR)** ABHRs are protected in accordance with 8.7.3.1, unless all conditions are met: • Corridor is at least 6 feet wide. • Maximum individual dispenser capacity is 0.32 gallons (0.53 gallons in suites) of fluid and 18 ounces of Level 1 aerosols. • Dispensers shall have a minimum of four foot horizontal spacing. • Not more than an aggregate of 10 gallons of fluid or 1135 ounces of aerosol are used in a single smoke compartment outside a storage cabinet, excluding one individual dispenser per room. • Storage in a single smoke compartment greater than 5 gallons complies with NFPA 30. • Dispensers are not installed within 1 inch of an ignition source. • Dispensers over carpeted floors are in sprinklered smoke compartments. • ABHR does not exceed 95 percent alcohol. • Operation of the dispenser shall comply with Section 18.3.2.6(11) or 19.3.2.6(11). • ABHR is protected against inappropriate access. 18.3.2.6, 19.3.2.6, 42 CFR Parts 403, 418, 460, 482, 483, and 485	◉	○	○

On 08/04/2021 between 12:00 AM to 05:00 PM, it was revealed the sprinkler head in Social Services Office close (2nd FL) 33 / 219 was obstructed by high storage of items / supplies 3. On 08/04/2021 between 12:00 AM to 05:00 PM, it was revealed the sprinkler heads in Housekeeping Closet (1st FL) was obstructed by high storage of items / supplies 4. On 08/04/2021 between 12:00 AM to 05:00 PM, it was revealed the sprinkler heads in the following Basement locations exhibited signs of corrosion and oxidation: a. Stairwell Storage Closet b. Hazard Storage Room c. Paint Storage Room d. Laundry – Soiled Linen Room 5. On 08/04/2021 between 12:00 AM to 05:00 PM, it was revealed in RM B-17 (Basement) that wiring and flex piping was impinging on the sprinkler system piping
K354	**Sprinkler System – Out of Service** Where the sprinkler system is impaired, the extent and duration of the impairment has been determined, areas or buildings involved are inspected and risks are determined, recommendations are submitted to management or designated representative, and the fire department and other authorities having jurisdiction have been notified. Where the sprinkler system is out of service for more than 10 hours in a 24 hour period, the building or portion of the building affected are evacuated or an approved fire watch is provided until the sprinkler system has been returned to service. 18.3.5.1, 19.3.5.1, 9.7.5, 15.5.2 (NFPA 25)	◉	○	○	
K355	**Portable Fire Extinguishers** Portable fire extinguishers are selected, installed, inspected, and maintained in accordance with NFPA 10, *Standard for Portable Fire Extinguishers.* 18.3.5.12, 19.3.5.12, NFPA 10	○	◉	○	1. On 08/04/2021 between 12:00 AM to 05:00 PM, it was revealed that the 2nd FL corridor fire extinguisher had obstructed access 2. On 08/04/2021 between 12:00 AM to 05:00 PM, it was revealed that the Basement – Laundry Room / Washer Area fire extinguisher had obstructed access 3. On 08/04/2021 between 12:00 AM to 05:00 PM, it was revealed that the Basement – Mechanical Fan Room was mounted higher than 5 feet
K361	**Corridors – Areas Open to Corridor** Spaces (other than patient sleeping rooms, treatment rooms and hazardous areas), waiting areas, nurse's stations, gift shops, and cooking facilities, open to the corridor are in accordance with the criteria under 18.3.6.1 and 19.3.6.1. 18.3.6.1, 19.3.6.1	◉	○	○	

ID PREFIX		MET	NOT MET	N/A	REMARKS
K362	**Corridors – Construction of Walls** 2012 EXISTING Corridors are separated from use areas by walls constructed with at least ½ hour fire resistance rating. In fully sprinklered smoke compartments, partitions are only required to resist the transfer of smoke. In nonsprinklered buildings, walls extend to the underside of the floor or roof deck above the ceiling. Corridor walls may terminate at the underside of ceilings where specifically permitted by Code. Fixed fire window assemblies in corridor walls are in accordance with Section 8.3, but in sprinklered compartments there are no restrictions in area or fire resistance of glass or frames. *If the walls have a fire resistance rating, give the rating* SMK RES *if the walls terminate at the underside of the ceiling, give brief description in REMARKS, describing the ceiling throughout the floor area.* 19.3.6.2, 19.3.6.2.7	◉	○	○	
	2012 NEW Corridor walls shall form a barrier to limit the transfer of smoke. Such walls shall be permitted to terminate at the ceiling where the ceiling is constructed to limit the transfer of smoke. No fire resistance rating is required for the corridor walls. 18.3.6.2	○	○	◉	

ID PREFIX		MET	NOT MET	N/A	REMARKS
K363	**Corridor – Doors** 2012 EXISTING Doors protecting corridor openings in other than required enclosures of vertical openings, exits, or hazardous areas resist the passage of smoke and are made of 1¾ inch solid-bonded core wood or other material capable of resisting fire for at least 20 minutes. Doors in fully sprinklered smoke compartments are only required to resist the passage of smoke. Corridor doors and doors to rooms containing flammable or combustible materials have positive latching hardware. Roller latches are prohibited by CMS regulation. These requirements do not apply to auxiliary spaces that do not contain flammable or combustible material. Powered doors complying with 7.2.1.9 are permissible if provided with a device capable of keeping the door closed when a force of 5lbf is applied, whether or not power is applied. Clearance between bottom of door and floor covering is not exceeding 1 inch. There is no impediment to the closing of the doors. Hold open devices that release when the door is pushed or pulled are permitted. Nonrated protective plates of unlimited height are permitted. Dutch doors meeting 19.3.6.3.6 are permitted. Door frames shall be labeled and made of steel or other materials in compliance with 8.3, unless the smoke compartment is sprinklered. Fixed fire window assemblies are allowed per 8.3. In sprinklered compartments there are no restrictions in area or fire resistance of glass or frames in window assemblies. 19.3.6.3, 42 CFR Parts 403, 418, 460, 482, 483, and 485 Show in REMARKS details of doors such as fire protection ratings, automatics closing devices, etc.	◉	○	○	
	2012 NEW Doors protecting corridor openings shall be constructed to resist the passage of smoke. Corridor doors and doors to rooms containing flammable or combustible materials have self-latching and positive latching hardware. Roller latches are prohibited by CMS regulation. These requirements do not apply to auxiliary spaces that do not contain flammable or combustible material. Powered doors complying with 7.2.1.9 are permissible if provided with a device capable of keeping the door closed when a force of 5lbf is applied, whether or not power is applied. Clearance between bottom of door and floor covering is not exceeding 1 inch. There is no impediment to the closing of the doors. Hold open devices that release when the door is pushed or pulled are permitted. Nonrated protective plates of unlimited height are permitted. Dutch doors meeting 18.3.6.3.6 are permitted. 18.3.6.3, 42 CFR Parts 403, 418, 460, 482, 483, and 485 Show in REMARKS details of doors such as fire protection ratings, automatic closing devices, etc.	○	○	◉	

ID PREFIX		MET	NOT MET	N/A	REMARKS
K364	**Corridor – Openings** Transfer grilles are not used in corridor walls or doors. Auxiliary spaces that do not contain flammable or combustible materials are permitted to have louvers or be undercut. In other than smoke compartments containing patient sleeping rooms, miscellaneous openings are permitted in vision panels or doors, provided the openings per room do not exceed 20 in² and are at or below half the distance from floor to ceiling. In sprinklered rooms, the openings per room do not exceed 80 in². Vision panels in corridor walls or doors shall be fixed window assemblies in approved frames. (In fully sprinklered smoke compartments, there are no restrictions in the area and fire resistance of glass and frames.) 18.3.6.5.1, 19.3.6.5.2, 8.3	◉	○	○	
K371	**Subdivision of Building Spaces – Smoke Compartments** 2012 EXISTING Smoke barriers shall be provided to form at least two smoke compartments on every sleeping floor with a 30 or more patient bed capacity. Size of compartments cannot exceed 22,500 square feet or a 200-foot travel distance from any point in the compartment to a door in the smoke barrier. 19.3.7.1, 19.3.7.2 *Detail in REMARKS zone dimensions including length of zones and dead-end corridors.*	◉	○	○	
	2012 NEW Smoke barriers shall be provided to form at least two smoke compartments on every floor used by inpatients for sleeping or treatment, and on every floor with an occupant load of 50 or more persons, regardless of use. Size of compartments cannot exceed 22,500 square feet or a 200-foot travel distance from any point in the compartment to a door in the smoke barrier. Smoke subdivision requirements do not apply to any of the stories or areas described in 18.3.7.2. 18.3.7.1, 18.3.7.2 *Detail in REMARKS zone dimensions including length of zones and dead-end corridors.*	○	○	◉	

ID PREFIX		MET	NOT MET	N/A	REMARKS
K372	**Subdivision of Building Spaces – Smoke Barrier Construction** 2012 EXISTING Smoke barriers shall be constructed to a ½ hour fire resistance rating per 8.5. Smoke barriers shall be permitted to terminate at an atrium wall. Smoke dampers are not required in duct penetrations in fully ducted HVAC systems where an approved sprinkler system is installed for smoke compartments adjacent to the smoke barrier. 19.3.7.3, 8.6.7.1(1) *Describe any mechanical smoke control system in REMARKS.*	◉	○	○	
	2012 NEW Smoke barriers shall be constructed to provide at least a 1-hour fire resistance rating and constructed in accordance with 8.5. Smoke barriers shall be permitted to terminate at an atrium wall. Smoke dampers are not required in duct penetrations of fully ducted HVAC systems. 18.3.7.3, 18.3.7.4, 18.3.7.5, 8.3 *Describe any mechanical smoke control system in REMARKS.*	○	○	◉	
K373	**Subdivision of Building Spaces – Accumulation Space** Space shall be provided on each side of smoke barriers to adequately accommodate the total number of occupants in adjoining compartments. 18.3.7.5.1, 18.3.7.5.2, 19.3.7.5.1, 19.3.7.5.2	◉	○	○	
K374	**Subdivision of Building Spaces – Smoke Barrier Doors** 2012 EXISTING Doors in smoke barriers are 1¾-inch thick solid bonded wood-core doors or of construction that resists fire for 20 minutes. Nonrated protective plates of unlimited height are permitted. Doors are permitted to have fixed fire window assemblies per 8.5. Doors are self-closing or automatic-closing, do not require latching, and are not required to swing in the direction of egress travel. Door opening provides a minimum clear width of 32 in for swinging or horizontal doors. 19.3.7.6, 19.3.7.8, 19.3.7.9	◉	○	○	

ID PREFIX		MET	NOT MET	N/A	REMARKS
K374	2012 NEW Doors in smoke barriers have at least a 20-minute fire protection rating or are at least 1¾-inch thick solid bonded core wood. Required clear widths are provided per 18.3.7.6(4) and (5). Nonrated protective plates of unlimited height are permitted. Horizontal-sliding doors comply with 7.2.1.14. Swinging doors shall be arranged so that each door swings in an opposite direction. Doors shall be self-closing and rabbets, bevels, or astragals are required at the meeting edges. Positive latching is not required. 18.3.7.6, 18.3.7.7, 18.3.7.8	○	○	◉	
K379	**Smoke Barrier Door Glazing** 2012 EXISTING Openings in smoke barrier doors shall be fire-rated glazing or wired glass panels in steel frames. 19.3.7.6, 19.3.7.6.2, 8.5	◉	○	○	
	2012 NEW Windows in smoke barrier doors shall be installed in each cross corridor swinging or horizontal-sliding door protected by fire-rated glazing or by wired glass panels in approved frames. 18.3.7.9	○	○	◉	
K381	**Sleeping Room Outside Windows and Doors** Every patient sleeping room has an outside window or outside door. In new occupancies, sill height does not exceed 36 inches above the floor. Windows in atrium walls are considered outside windows. Newborn nurseries and rooms intended for occupancy less than 24 hours have no outside window or door requirements. Window sills in special nursing care areas (e.g., ICU, CCU, hemodialysis, neonatal) do not exceed 60 inches above the floor. 42 CFR 403, 418, 460, 482, 483, and 485	◉	○	○	
	SECTION 4 – SPECIAL PROVISIONS				
K400	**Special Provisions – Other** List in the REMARKS section any LSC Section 18.4 and 19.4 Special Provisions requirements that are not addressed by the provided K-tags, but are deficient. This information, along with the applicable Life Safety Code or NFPA standard citation, should be included on Form CMS-2567.	◉	○	○	

ID PREFIX		MET	NOT MET	N/A	REMARKS
K421	**High-Rise Buildings** 2012 EXISTING High-rise buildings are protected throughout by an approved, supervised automatic sprinkler system in accordance with Section 9.7 within 12 years of LSC final rule effective date. 19.4.2	○	○	◉	
	2012 NEW High-rise buildings comply with section 11.8. 18.4.2	○	○	◉	
	SECTION 5 – BUILDING SERVICES				
K500	**Building Services – Other** List in the REMARKS section any LSC Section 18.5 and 19.5 Building Services requirements that are not addressed by the provided K-tags, but are deficient. This information, along with the applicable Life Safety Code or NFPA standard citation, should be included on Form CMS-2567.	◉	○	○	
K511	**Utilities – Gas and Electric** Equipment using gas or related gas piping complies with NFPA 54, *National Fuel Gas Code*, electrical wiring and equipment complies with NFPA 70, *National Electric Code*. Existing installations can continue in service provided no hazard to life. 18.5.1.1, 19.5.1.1, 9.1.1, 9.1.2	○	◉	○	1. On 08/04/2021 between 12:00 AM to 05:00 PM, it was revealed that electrical panels at the 1st FL and 2nd FL Nurses Station – in the resident corridor, were unsecured 2. On 08/04/2021 between 12:00 AM to 05:00 PM, it was revealed that there was obstructed access to the electrical panel in the Basement – RM B-17 3. On 08/04/2021 between 12:00 AM to 05:00 PM, it was revealed that there was obstructed access to the electrical panel in the Basement Laundry – Dryer Room
K521	**HVAC** Heating, ventilation, and air conditioning shall comply with 9.2 and shall be installed in accordance with the manufacturer's specifications. 18.5.2.1, 19.5.2.1, 9.2	◉	○	○	
K522	**HVAC – Any Heating Device** Any heating device, other than a central heating plant, is designed and installed so combustible materials cannot be ignited by device, and has a safety feature to stop fuel and shut down equipment if there is excessive temperature or ignition failure. If fuel fired, the device also: • is chimney or vent connected. • takes air for combustion from outside. • provides for a combustion system separate from occupied area atmosphere. 18.5.2.2, 19.5.2.2	◉	○	○	

ID PREFIX		MET	NOT MET	N/A	REMARKS
K523	**HVAC – Suspended Unit Heaters** Suspended unit heaters are permitted provided the following are met: • Not located in means of egress or in patient rooms. • Located high enough to be out of reach of people in the area. • Has a safety feature to stop fuel and shut down equipment if there is excessive temperature or ignition failure. 18.5.2.3(1), 19.5.2.3(1)	○	○	◉	
K524	**HVAC – Direct-Vent Gas Fireplaces** Direct-vent gas fireplaces, as defined in NFPA 54, inside of all smoke compartments containing patient sleeping areas comply with the requirements of 18.5.2.3(2), 19.5.2.3(2). 18.5.2.3(2), 19.5.2.3(2), NFPA 54	○	○	◉	
K525	**HVAC – Solid Fuel-Burning Fireplaces** Solid fuel-burning fireplaces are permitted in other than patient sleeping areas provided: • Areas are separated by 1-hour fire resistance construction. • Fireplace complies with 9.2.2. • Fireplace enclosure resists breakage up to 650°F and has heat-tempered glass. • Room has supervised CO detection per 9.8. 18.5.2.3(3) and 19.5.2.3(3)	○	○	◉	
K531	**Elevators** 2012 EXISTING Elevators comply with the provision of 9.4. Elevators are inspected and tested as specified in ASME A17.1, *Safety Code for Elevators and Escalators.* Firefighter's Service is operated monthly with a written record. Existing elevators conform to ASME/ANSI A17.3, *Safety Code for Existing Elevators and Escalators.* All existing elevators, having a travel distance of 25 feet or more above or below the level that best serves the needs of emergency personnel for firefighting purposes, conform with Firefighter's Service Requirements of ASME/ANSI A17.3. (Includes firefighter's service Phase I key recall and smoke detector automatic recall, firefighter's service Phase II emergency in-car key operation, machine room smoke detectors, and elevator lobby smoke detectors.) 19.5.3, 9.4.2, 9.4.3	◉	○	○	

ID PREFIX		MET	NOT MET	N/A	REMARKS
K531	2012 NEW Elevators comply with the provision of 9.4. Elevators are inspected and tested as specified in ASME A17.1, *Safety Code for Elevators and Escalators.* Firefighter's Service is operated monthly with a written record. New elevators conform to ASME/ANSI A17.1, *Safety Code for Elevators and Escalators,* including Firefighter's Service Requirements. (Includes firefighter's Phase I key recall and smoke detector automatic recall, firefighter's service Phase II emergency in-car key operation, machine room smoke detectors, and elevator lobby smoke detectors.) 18.5.3, 9.4.2, 9.4.3	○	○	◉	
K532	**Escalators, Dumbwaiters, and Moving Walks** 2012 EXISTING Escalators, dumbwaiters, and moving walks comply with the provisions of 9.4. All existing escalators, dumbwaiters, and moving walks conform to the requirements of ASME/ANSI A17.3, *Safety Code for Existing Elevators and Escalators.* (Includes escalator emergency stop buttons and automatic skirt obstruction stop. For power dumbwaiters, includes hoistway door locking to keep doors closed except for floor where car is being loaded or unloaded.) 19.5.3, 9.4.2.2	○	○	◉	
	2012 NEW Escalators, dumbwaiters, and moving walks comply with the provisions of 9.4. 18.5.3, 9.4.2.2	○	○	◉	

ID PREFIX		MET	NOT MET	N/A	REMARKS
K541	**Rubbish Chutes, Incinerators, and Laundry Chutes** 2012 EXISTING (1) Any existing linen and trash chute, including pneumatic rubbish and linen systems, that opens directly onto any corridor shall be sealed by fire resistive construction to prevent further use or shall be provided with a fire door assembly having a fire protection rating of 1-hour. All new chutes shall comply with 9.5. (2) Any rubbish chute or linen chute, including pneumatic rubbish and linen systems, shall be provided with automatic extinguishing protection in accordance with 9.7. (3) Any trash chute shall discharge into a trash collection room used for no other purpose and protected in accordance with 8.4. (Existing laundry chutes permitted to discharge into same room are protected by automatic sprinklers in accordance with 19.3.5.9 or 19.3.5.7.) (4) Existing fuel-fed incinerators shall be sealed by fire resistive construction to prevent further use. 19.5.4, 9.5, 8.4, NFPA 82	○	○	◉	
	2012 NEW Rubbish chutes, incinerators, and laundry chutes shall comply with the provisions of Section 9.5, unless otherwise specified in 18.5.4.2. • The fire resistance rating of chute charging room shall not be required to exceed 1-hour. • Any rubbish chute or linen chute shall be provided with automatic extinguishing protection in accordance with Section 9.7. • Chutes shall discharge into a trash collection room used for no other purpose and shall be protected in accordance with 8.7. 18.5.4.2, 8.7, 9.5, 9.7, NFPA 82	○	○	◉	
	SECTION 6 – RESERVED				
	SECTION 7 – OPERATING FEATURES				
K700	**Operating Features – Other** List in the REMARKS section any LSC Section 18.7 and 19.7 Operating Features requirements that are not addressed by the provided K-tags, but are deficient. This information, along with the applicable Life Safety Code or NFPA standard citation, should be included in Form CMS-2567.	◉	○	○	

ID PREFIX		MET	NOT MET	N/A	REMARKS
K711	**Evacuation and Relocation Plan** There is a written plan for the protection of all patients and for their evacuation in the event of an emergency. Employees are periodically instructed and kept informed with their duties under the plan, and a copy of the plan is readily available with telephone operator or with security. The plan addresses the basic response required of staff per 18/19.7.2.1.2 and provides for all of the fire safety plan components per 18/19.7.2.2. 18.7.1.1 through 18.7.1.3, 18.7.2.1.2, 18.7.2.2, 18.7.2.3, 19.7.1.1 through 19.7.1.3, 19.7.2.1.2, 19.7.2.2, 19.7.2.3	◉	○	○	
K712	**Fire Drills** Fire drills include the transmission of a fire alarm signal and simulation of emergency fire conditions. Fire drills are held at expected and unexpected times under varying conditions, at least quarterly on each shift. The staff is familiar with procedures and is aware that drills are part of established routine. Where drills are conducted between 9:00 PM and 6:00 AM, a coded announcement may be used instead of audible alarms. 18.7.1.4 through 18.7.1.7, 19.7.1.4 through 19.7.1.7	○	◉	○	1. On 08/04/2021 between 12:00 AM to 05:00 PM, it was revealed during documentation review that 90 minute time separation was not met for fire drills conducted on 1st shift from the 2nd Quarter through the 4th Quarter of the calendar year. 2. On 08/04/2021 between 12:00 AM to 05:00 PM, it was revealed during documentation review that no records were provided for review to confirm that fire drills were conducted on 3rd shift for the 2nd and 3rd Quarters of the calendar year.

ID PREFIX		MET	NOT MET	N/A	REMARKS
K741	**Smoking Regulations** Smoking regulations shall be adopted and shall include not less than the following provisions: (1) Smoking shall be prohibited in any room, ward, or compartment where flammable liquids, combustible gases, or oxygen is used or stored and in any other hazardous location, and such area shall be posted with signs that read NO SMOKING or shall be posted with the international symbol for no smoking. (2) In health care occupancies where smoking is prohibited and signs are prominently placed at all major entrances, secondary signs with language that prohibits smoking shall not be required. (3) Smoking by patients classified as not responsible shall be prohibited. (4) The requirement of 18.7.4(3) shall not apply where the patient is under direct supervision. (5) Ashtrays of noncombustible material and safe design shall be provided in all areas where smoking is permitted. (6) Metal containers with self-closing cover devices into which ashtrays can be emptied shall be readily available to all areas where smoking is permitted. 18.7.4, 19.7.4	◉	○	○	
K751	**Draperies, Curtains, and Loosely Hanging Fabrics** Draperies, curtains including cubicle curtains and loosely hanging fabric or films shall be in accordance with 10.3.1. Excluding curtains and draperies: at showers and baths; on windows in patient sleeping room located in sprinklered compartments; and in non-patient sleeping rooms in sprinklered compartments where individual drapery or curtain panels do not exceed 48 square feet or total area does not exceed 20 percent of the wall. 18.7.5.1, 18.3.5.11, 19.7.5.1, 19.3.5.11, 10.3.1	◉	○	○	

ID PREFIX		MET	NOT MET	N/A	REMARKS
K752	**Upholstered Furniture and Mattresses** Newly introduced upholstered furniture meets Class I or char length, and heat release criteria in accordance with 10.3.2.1 and 10.3.3, unless the building is fully sprinklered. Newly introduced mattresses shall meet char length and heat release criteria in accordance with 10.3.2.2 and 10.3.4, unless the building is fully sprinklered. Upholstered furniture and mattresses belonging to nursing home residents do not have to meet these requirements as all nursing homes are required to be fully sprinklered. Newly introduced upholstered furniture and mattresses means purchased on or after the LSC final rule effective date. 18.7.5.2, 18.7.5.4, 19.7.5.2, 19.7.5.4	◉	○	○	
K753	**Combustible Decorations** Combustible decorations shall be prohibited unless one of the following is met: • Flame retardant or treated with approved fire-retardant coating that is listed and labeled for product. • Decorations meet NFPA 701. • Decorations exhibit heat release less than 100 kilowatts in accordance with NFPA 289. • Decorations, such as photographs, paintings and other art are attached to the walls, ceilings and non-fire-rated doors in accordance with 18.7.5.6(4) or 19.7.5.6(4). • The decorations in existing occupancies are in such limited quantities that a hazard of fire development or spread is not present. 18.7.5.6, 19.7.5.6	◉	○	○	
K761	**Maintenance, Inspection & Testing - Doors** Fire doors assemblies are inspected and tested annually in accordance with NFPA 80 *Standard for Fire Doors and Other Opening Protectives*. Fire doors that are not located in required fire barriers, including corridor doors to patient rooms and smoke barrier doors, are routinely inspected as part of the facility maintenance program. Individuals performing the door inspection and testing have an understanding of the operating components of the doors. Written records of inspection and testing are maintained and are available for review. 18.7.6, 19.7.6, 8.3.3.1 (LSC), 5.2, 5.2.3 (NFPA 80)	◉	○	○	

ID PREFIX		MET	NOT MET	N/A	REMARKS
K754	**Soiled Linen and Trash Containers** Soiled linen or trash collection receptacles shall not exceed 32 gallons in capacity. The average density of container capacity in a room or space shall not exceed 0.5 gallons/square feet. A total container capacity of 32 gallons shall not be exceeded within any 64 square feet area. Mobile soiled linen or trash collection receptacles with capacities greater than 32 gallons shall be located in a room protected as a hazardous area when not attended. Containers used solely for recycling are permitted to be excluded from the above requirements where each container is ≤ 96 gal. unless attended, and containers for combustibles are labeled and listed as meeting FM Approval Standard 6921 or equivalent. 18.7.5.7, 19.7.5.7	◉	○	○	
K771	**Engineer Smoke Control Systems** 2012 EXISTING When installed, engineered smoke control systems are tested in accordance with established engineering principles. Test documentation is maintained on the premises. 19.7.7	○	○	◉	
	2012 NEW When installed, engineered smoke control systems are tested in accordance with NFPA 92, *Standard for Smoke Control Systems*. Test documentation is maintained on the premises. 18.7.7	○	○	◉	
K781	**Portable Space Heaters** Portable space heating devices shall be prohibited in all health care occupancies. Unless used in nonsleeping staff and employee areas where the heating elements do not exceed 212 degrees Fahrenheit (100 degrees Celsius). 18.7.8, 19.7.8	◉	○	○	
K791	**Construction, Repair, and Improvement Operations** Construction, repair, and improvement operations shall comply with 4.6.10. Any means of egress in any area undergoing construction, repair, or improvements shall be inspected daily to ensure its ability to be used instantly in case of emergency and compliance with NFPA 241. 18.7.9, 19.7.9, 4.6.10, 7.1.10.1	◉	○	○

	PART II – HEALTH CARE FACILITIES CODE REQUIREMENTS				
K900	**Health Care Facilities Code - Other** List in the REMARKS section any NFPA 99 requirements (excluding Chapter 7, 8, 12, and 13) that are not addressed by the provided K-Tags, but are deficient. This information, along with the applicable Health Care Facilities Code or NFPA standard citation, should be included on Form CMS-2567.	◉	○	○	
K901	**Fundamentals – Building System Categories** Building systems are designed to meet Category 1 through 4 requirements as detailed in NFPA 99. Categories are determined by a formal and documented risk assessment procedure performed by qualified personnel. Chapter 4 (NFPA 99)	◉	○	○	
K902	**Gas and Vacuum Piped Systems – Other** List in the REMARKS section any NFPA 99 Chapter 5 Gas and Vacuum Systems requirements that are not addressed by the provided K-Tags, but are deficient. This information, along with the applicable Life Safety Code or NFPA standard citation, should be included on Form CMS-2567. Chapter 5 (NFPA 99)	○	○	◉	
K903	**Gas and Vacuum Piped Systems – Categories** Medical gas, medical air, surgical vacuum, WAGD, and air supply systems are designated: ☐ Category 1. Systems in which failure is likely to cause major injury or death. ☐ Category 2. Systems in which failure is likely to cause minor injury. ☐ Category 3. Systems in which failure is not likely to cause injury, but can cause discomfort. Deep sedation and general anesthesia are not to be administered using a Category 3 medical gas system. 5.1.1.1, 5.2.1, 5.3.1.1, 5.3.1.5 (NFPA 99)	○	○	◉	
K904	**Gas and Vacuum Piped Systems – Warning Systems** All master, area, and local alarm systems used for medical gas and vacuum systems comply with appropriate Category warning system requirements, as applicable. 5.1.9, 5.2.9, 5.3.6.2.2 (NFPA 99)	○	○	◉	

ID PREFIX		MET	NOT MET	N/A	REMARKS
K905	**Gas and Vacuum Piped Systems – Central Supply System Identification and Labeling** Containers, cylinders and tanks are designed, fabricated, tested, and marked in accordance with 5.1.3.1.1 through 5.1.3.1.7. Locations containing only oxygen or medical air have doors labeled with "Medical Gases, NO Smoking or Open Flame". Locations containing other gases have doors labeled "Positive Pressure Gases, NO Smoking or Open Flame, Room May Have Insufficient Oxygen, Open Door and Allow Room to Ventilate Before Opening." 5.1.3.1, 5.2.3.1, 5.3.10 (NFPA 99)	○	○	◉	
K906	**Gas and Vacuum Piped Systems – Central Supply System Operations** Adaptors or conversion fittings are prohibited. Cylinders are handled in accordance with 11.6.2. Only cylinders, reusable shipping containers, and their accessories are stored in rooms containing central supply systems or cylinders. No flammable materials are stored with cylinders. Cryogenic liquid storage units intended to supply the facility are not used to transfill. Cylinders are kept away from sources of heat. Valve protection caps are secured in place, if supplied, unless cylinder is in use. Cylinders are not stored in tightly closed spaces. Cylinders in use and storage are prevented from exceeding 130°F, and nitrous oxide and carbon dioxide cylinders are prevented from reaching temperatures lower than manufacture recommendations or 20°F. Full or empty cylinders, when not connected, are stored in locations complying with 5.1.3.3.2 through 5.1.3.3.3, and are not stored in enclosures containing motor-driven machinery, unless for instrument air reserve headers. 5.1.3.2, 5.1.3.3.17, 5.1.3.3.1.8, 5.1.3.3.4, 5.2.3.2, 5.2.3.3, 5.3.6.20.4, 5.6.20.5, 5.3.6.20.7, 5.3.6.20.8, 5.3.6.20.9 (NFPA 99)	○	○	◉	
K907	**Gas and Vacuum Piped Systems – Maintenance Program** Medical gas, vacuum, WAGD, or support gas systems have documented maintenance programs. The program includes an inventory of all source systems, control valves, alarms, manufactured assemblies, and outlets. Inspection and maintenance schedules are established through risk assessment considering manufacturer recommendations. Inspection procedures and testing methods are established through risk assessment. Persons maintaining systems are qualified as demonstrated by training and certification or credentialing to the requirements of AASE 6030 or 6040. 5.1.14.2.1, 5.1.14.2.2, 5.1.15, 5.2.14, 5.3.13.4.2 (NFPA 99)	○	○	◉	

ID PREFIX		MET	NOT MET	N/A	REMARKS
K908	**Gas and Vacuum Piped Systems – Inspection and Testing Operations** The gas and vacuum systems are inspected and tested as part of a maintenance program and include the required elements. Records of the inspections and testing are maintained as required. 5.1.14.2.3, B.5.2, 5.2.13, 5.3.13, 5.3.13.4 (NFPA 99)	○	○	◉	
K909	**Gas and Vacuum Piped Systems – Information and Warning Signs** Piping is labeled by stencil or adhesive markers identifying the gas or vacuum system, including the name of system or chemical symbol, color code (Table 5.1.11), and operating pressure if other than standard. Labels are at intervals not more than 20 feet, are in every room, at both sides of wall penetrations, and on every story traversed by riser. Piping is not painted. Shutoff valves are identified with the name or chemical symbol of the gas or vacuum system, room or area served, and caution to not use the valve except in emergency. 5.1.14.3, 5.1.11.1, 5.1.11.2, 5.2.11, 5.3.13.3, 5.3.11 (NFPA 99)	○	○	◉	
K910	**Gas and Vacuum Piped Systems – Modifications** Whenever modifications are made that breach the pipeline, any necessary installer and verification test specified in 5.1.2 is conducted on the downstream portion of the medical gas piping system. Permanent records of all tests required by system verification tests are maintained. 5.1.14.4.1, 5.1.14.4.6, 5.2.13, 5.3.13.4.3 (NFPA 99)	○	○	◉	
K911	**Electrical Systems – Other** List in the REMARKS section any NFPA 99 Chapter 6 Electrical Systems requirements that are not addressed by the provided K-Tags, but are deficient. This information, along with the applicable Life Safety Code or NFPA standard citation, should be included on Form CMS-2567. Chapter 6 (NFPA 99)	◉	○	○	
K912	**Electrical Systems – Receptacles** Power receptacles have at least one, separate, highly dependable grounding pole capable of maintaining low-contact resistance with its mating plug. In pediatric locations, receptacles in patient rooms, bathrooms, play rooms, and activity rooms, other than nurseries, are listed tamper-resistant or employ a listed cover. If used in patient care room, ground-fault circuit interrupters (GFCI) are listed. 6.3.2.2.6.2 (F), 6.3.2.2.4.2 (NFPA 99)	◉	○	○	

ID PREFIX		MET	NOT MET	N/A	REMARKS
K913	**Electrical Systems – Wet Procedure Locations** Operating rooms are considered wet procedure locations, unless otherwise determined by a risk assessment conducted by the facility governing body. Operating rooms defined as wet locations are protected by either isolated power or ground-fault circuit interrupters. A written record of the risk assessment is maintained and available for inspection. 6.3.2.2.8.4, 6.3.2.2.8.7, 6.4.4.2	○	○	◉	
K914	**Electrical Systems – Maintenance and Testing** Hospital-grade receptacles at patient bed locations and where deep sedation or general anesthesia is administered, are tested after initial installation, replacement or servicing. Additional testing is performed at intervals defined by documented performance data. Receptacles not listed as hospital-grade at these locations are tested at intervals not exceeding 12 months. Line isolation monitors (LIM), if installed, are tested at intervals of ≤ 1 month by actuating the LIM test switch per 6.3.2.6.3.6, which activates both visual and audible alarm. For LIM circuits with automated self-testing, this manual test is performed at intervals ≤ 12 months. LIM circuits are tested per 6.3.3.3.2 after any repair or renovation to the electric distribution system. Records are maintained of required tests and associated repairs or modifications, containing date, room or area tested, and results. 6.3.4 (NFPA 99)	◉	○	○	
K915	**Electrical Systems – Essential Electric System Categories** ○ Critical care rooms (Category 1) in which electrical system failure is likely to cause major injury or death of patients, including all rooms where electric life support equipment is required, are served by a Type 1 EES. ◉ General care rooms (Category 2) in which electrical system failure is likely to cause minor injury to patients (Category 2) are served by a Type 1 or Type 2 EES. ○ Basic care rooms (Category 3) in which electrical system failure is not likely to cause injury to patients and rooms other than patient care rooms are not required to be served by an EES. Type 3 EES life safety branch has an alternate source of power that will be effective for 1 1/2 hours. 3.3.138, 6.3.2.2.10, 6.6.2.2.2, 6.6.3.1.1 (NFPA 99), TIA 12-3	◉	○	○	

ID PREFIX		MET	NOT MET	N/A	REMARKS
K916	**Electrical Systems – Essential Electric System Alarm Annunciator** A remote annunciator that is storage battery powered is provided to operate outside of the generating room in a location readily observed by operating personnel. The annunciator is hard-wired to indicate alarm conditions of the emergency power source. A centralized computer system (e.g., building information system) is not to be substituted for the alarm annunciator. 6.4.1.1.17, 6.4.1.1.17.5 (NFPA 99)	◉	○	○	
K917	**Electrical Systems – Essential Electric System Receptacles** Electrical receptacles or cover plates supplied from the life safety and critical branches have a distinctive color or marking. 6.4.2.2.6, 6.5.2.2.4.2, 6.6.2.2.3.2 (NFPA 99)	◉	○	○	
K918	**Electrical Systems – Essential Electric System Maintenance and Testing** The generator or other alternate power source and associated equipment is capable of supplying service within 10 seconds. If the 10-second criterion is not met during the monthly test, a process shall be provided to annually confirm this capability for the life safety and critical branches. Maintenance and testing of the generator and transfer switches are performed in accordance with NFPA 110. Generator sets are inspected weekly, exercised under load 30 minutes 12 times a year in 20-40 day intervals, and exercised once every 36 months for 4 continuous hours. Scheduled test under load conditions include a complete simulated cold start and automatic or manual transfer of all EES loads, and are conducted by competent personnel. Maintenance and testing of stored energy power sources (Type 3 EES) are in accordance with NFPA 111. Main and feeder circuit breakers are inspected annually, and a program for periodically exercising the components is established according to manufacturer requirements. Written records of maintenance and testing are maintained and readily available. EES electrical panels and circuits are marked, readily identifiable, and separate from normal power circuits. Minimizing the possibility of damage of the emergency power source is a design consideration for new installations. 6.4.4, 6.5.4, 6.6.4 (NFPA 99), NFPA 110, NFPA 111, 700.10 (NFPA 70)	◉	○	○	

ID PREFIX		MET	NOT MET	N/A	REMARKS
K919	**Electrical Equipment – Other** List in the REMARKS section any NFPA 99 Chapter 10, *Electrical Equipment*, requirements that are not addressed by the provided K-Tags, but are deficient. This information, along with the applicable Life Safety Code or NFPA standard citation, should be included on Form CMS-2567. Chapter 10 (NFPA 99)	◉	○	○	
K920	**Electrical Equipment – Power Cords and Extension Cords** Power strips in a patient care vicinity are only used for components of movable patient-care-related electrical equipment (PCREE) assembles that have been assembled by qualified personnel and meet the conditions of 10.2.3.6. Power strips in the patient care vicinity may not be used for non-PCREE (e.g., personal electronics), except in long-term care resident rooms that do not use PCREE. Power strips for PCREE meet UL 1363A or UL 60601-1. Power strips for non-PCREE in the patient care rooms (outside of vicinity) meet UL 1363. In non-patient care rooms, power strips meet other UL standards. All power strips are used with general precautions. Extension cords are not used as a substitute for fixed wiring of a structure. Extension cords used temporarily are removed immediately upon completion of the purpose for which it was installed and meets the conditions of 10.2.4. 10.2.3.6 (NFPA 99), 10.2.4 (NFPA 99), 400-8 (NFPA 70), 590.3(D) (NFPA 70), TIA 12-5	○	◉	○	1. On 08/04/2021 between 12:00 AM to 05:00 PM, it was revealed that on the 2nd Floor – Staff Development Area power-strips were daisy-chained together and supplying power to devices 2. On 08/04/2021 between 12:00 AM to 05:00 PM, it was revealed in the Basement – Room B-18 that an extension cord was in use and supplying power to a device 3. On 08/04/2021 between 12:00 AM to 05:00 PM, it was revealed in the Basement that power-strips were daisy-chained together and supplying power to devices – in the following locations: a. Activities Office b. Staff Training Room c. Material Management Office 4. On 08/04/2021 between 12:00 AM to 05:00 PM, it was revealed in the Basement – Material Management Office that a power-strip was in use to power two appliances (copier machine + air purifier unit)

ID PREFIX		MET	NOT MET	N/A	REMARKS
K921	**Electrical Equipment – Testing and Maintenance Requirements** The physical integrity, resistance, leakage current, and touch current tests for fixed and portable patient-care related electrical equipment (PCREE) is performed as required in 10.3. Testing intervals are established with policies and protocols. All PCREE used in patient care rooms is tested in accordance with 10.3.5.4 or 10.3.6 before being put into service and after any repair or modification. Any system consisting of several electrical appliances demonstrates compliance with NFPA 99 as a complete system. Service manuals, instructions, and procedures provided by the manufacturer include information as required by 10.5.3.1.1 and are considered in the development of a program for electrical equipment maintenance. Electrical equipment instructions and maintenance manuals are readily available, and safety labels and condensed operating instructions on the appliance are legible. A record of electrical equipment tests, repairs, and modifications is maintained for a period of time to demonstrate compliance in accordance with the facility's policy. Personnel responsible for the testing, maintenance and use of electrical appliances receive continuing training. 10.3, 10.5.2.1, 10.5.2.1.2, 10.5.2.5, 10.5.3, 10.5.6, 10.5.8	◉	○	○	
K922	**Gas Equipment – Other** List in the REMARKS section any NFPA 99 Chapter 11 Gas Equipment requirements that are not addressed by the provided K-Tags, but are deficient. This information, along with the applicable Life Safety Code or NFPA standard citation, should be included on Form CMS-2567. Chapter 11 (NFPA 99)	◉	○	○	

ID PREFIX		MET	NOT MET	N/A	REMARKS
K923	**Gas Equipment – Cylinder and Container Storage** **≥ 3,000 cubic feet** Storage locations are designed, constructed, and ventilated in accordance with 5.1.3.3.2 and 5.1.3.3.3. **> 300 but <3,000 cubic feet** Storage locations are outdoors in an enclosure or within an enclosed interior space of non- or limited- combustible construction, with door (or gates outdoors) that can be secured. Oxidizing gases are not stored with flammables, and are separated from combustibles by 20 feet (5 feet if sprinklered) or enclosed in a cabinet of noncombustible construction having a minimum 1/2 hr. fire protection rating. **≤ 300 cubic feet** In a single smoke compartment, individual cylinders available for immediate use in patient care areas with an aggregate volume of ≤ 300 cubic feet are not required to be stored in an enclosure. Cylinders must be handled with precautions as specified in 11.6.2. A precautionary sign readable from 5 feet is on each door or gate of a cylinder storage room, where the sign includes the wording as a minimum "CAUTION: OXIDIZING GAS(ES) STORED WITHIN NO SMOKING". Storage is planned so cylinders are used in order of which they are received from the supplier. Empty cylinders are segregated from full cylinders. When facility employs cylinders with integral pressure gauge, a threshold pressure considered empty is established. Empty cylinders are marked to avoid confusion. Cylinders stored in the open are protected from weather. 11.3.1, 11.3.2, 11.3.3, 11.3.4, 11.6.5 (NFPA 99)	○	◉	○	On 08/04/2021 between 12:00 AM to 05:00 PM, it was revealed that the 2nd Floor Med Gas Storage Room had mixed storage of full and empty cylinders in the storage racks
K924	**Gas Equipment – Testing and Maintenance Requirements** Anesthesia apparatus are tested at the final path to patient after any adjustment, modification or repair. Before the apparatus is returned to service, each connection is checked to verify proper gas and an oxygen analyzer is used to verify oxygen concentration. Defective equipment is immediately removed from service. Areas designated for servicing of oxygen equipment are clean and free of oil, grease, or other flammables. Manufacturer service manuals are used to maintain equipment and a scheduled maintenance program is followed. 11.4.1.3, 11.5.1.3, 11.6.2.5, 11.6.2.6 (NFPA 99)	○	○	◉	

ID PREFIX		MET	NOT MET	N/A	REMARKS
K925	**Gas Equipment – Respiratory Therapy Sources of Ignition** Smoking materials are removed from patients receiving respiratory therapy. When a nasal cannula is delivering oxygen outside of a patient's room, no sources of ignition are within in the site of intentional expulsion (1-foot). When other oxygen deliver equipment is used or oxygen is delivered inside a patient's room, no sources of ignition are within the area are of administration (15-feet). Solid fuel-burning appliances is not in the area of administration. Nonmedical appliances with hot surfaces or sparking mechanisms are not within oxygen-delivery equipment or site of intentional expulsion. 11.5.1.1, TIA 12-6 (NFPA 99)	◉	○	○	
K926	**Gas Equipment – Qualifications and Training of Personnel** Personnel concerned with the application, maintenance and handling of medical gases and cylinders are trained on the risk. Facilities provide continuing education, including safety guidelines and usage requirements. Equipment is serviced only by personnel trained in the maintenance and operation of equipment. 11.5.2.1 (NFPA 99)	◉	○	○	
K927	**Gas Equipment – Transfilling Cylinders** Transfilling of oxygen from one cylinder to another is in accordance with CGA P-2.5, *Transfilling of High Pressure Gaseous Oxygen Used for Respiration*. Transfilling of any gas from one cylinder to another is prohibited in patient care rooms. Transfilling to liquid oxygen containers or to portable containers over 50 psi comply with conditions under 11.5.2.3.1 (NFPA 99). Transfilling to liquid oxygen containers or to portable containers under 50 psi comply with conditions under 11.5.2.3.2 (NFPA 99). 11.5.2.2 (NFPA 99)	◉	○	○	

ID PREFIX		MET	NOT MET	N/A	REMARKS
K928	**Gas Equipment – Labeling Equipment and Cylinders** Equipment listed for use in oxygen-enriched atmospheres are so labeled. Oxygen metering equipment and pressure reducing regulators are labeled "OXYGEN-USE NO OIL". Flowmeters, pressure reducing regulators, and oxygen-dispensing apparatus are clearly and permanently labeled designating the gases for which they are intended. Oxygen-metering equipment, pressure reducing regulators, humidifiers, and nebulizers are labeled with name of manufacturer or supplier. Cylinders and containers are labeled in accordance with CGA C-7. Color coding is not utilized as the primary method of determining cylinder or container contents. All labeling is durable and withstands cleaning or disinfecting. 11.5.3.1 (NFPA 99)	◉	○	○	
K929	**Gas Equipment – Precautions for Handling Oxygen Cylinders and Manifolds** Handling of oxygen cylinders and manifolds is based on CGA G-4, Oxygen. Oxygen cylinders, containers, and associated equipment are protected from contact with oil and grease, from contamination, protected from damage, and handled with care in accordance with precautions provided under 11.6.2.1 through 11.6.2.4 (NFPA 99). 11.6.2 (NFPA 99)	◉	○	○	
K930	**Gas Equipment – Liquid Oxygen Equipment** The storage and use of liquid oxygen in base reservoir containers and portable containers comply with sections 11.7.2 through 11.7.4 (NFPA 99). 11.7 (NFPA 99)	◉	○	○	
K931	**Hyperbaric Facilities** All occupancies containing hyperbaric facilities comply with construction, equipment, administration, and maintenance requirements of NFPA 99. Chapter 14 (NFPA 99)	○	○	◉	
K932	**Features of Fire Protection – Other** List in the REMARKS section any NFPA 99 Chapter 15 Features of Fire Protection requirements that are not addressed by the provided K-Tags, but are deficient. This information, along with the applicable Life Safety Code or NFPA standard citation, should be included on Form CMS-2567. Chapter 15 (NFPA 99)	◉	○	○	

ID PREFIX		MET	NOT MET	N/A	REMARKS
K933	**Features of Fire Protection – Fire Loss Prevention in Operating Rooms** Periodic evaluations are made of hazards that could be encountered during surgical procedures, and fire prevention procedures are established. When flammable germicides or antiseptics are employed during surgeries utilizing electrosurgery, cautery or lasers: • packaging is non-flammable. • applicators are in unit doses. • Preoperative "time-out" is conducted prior the initiation of any surgical procedure to verify: o application site is dry prior to draping and use of surgical equipment. o pooling of solution has not occurred or has been corrected. o solution-soaked materials have been removed from the OR prior to draping and use of surgical devices. o policies and procedures are established outlining safety precautions related to the use of flammable germicide or antiseptic use. Procedures are established for operating room emergencies including alarm activation, evacuation, equipment shutdown, and control operations. Emergency procedures include the control of chemical spills, and extinguishment of drapery, clothing and equipment fires. Training is provided to new OR personnel (including surgeons), continuing education is provided, incidents are reviewed monthly, and procedures are reviewed annually. 15.13 (NFPA 99)	○	○	◉	

PART III – RECOMMENDATION FOR WAIVER OF SPECIFIC LIFE SAFETY CODE PROVISIONS

For each item of the Life Safety Code recommended for waiver, list the survey report form item number and state the reason for the conclusion that: (a) the specific provisions of the code, if rigidly applied, would result in unreasonable hardship on the facility, and (b) the waiver of such unmet provisions will not adversely affect the health and safety of the patients. If additional space is required, attach additional sheet(s).
