We urge you to review these orders carefully, item by item, and if you find that any of the orders are not in accordance with your understanding at the time of the exit conference following the survey, you should immediately contact me. If further clarification is necessary, an informal conference can be arranged.

A final version of the Correction Order form is enclosed. This document will be posted on the MDH website.

Also attached is an optional Provider questionnaire, which is a self-mailer, which affords the provider with an opportunity to give feedback on the survey experience.

Registered nurses from the Minnesota Department of Health (MDH) use this Licensing Survey Form during on-site visits to evaluate the care provided by Class A Licensed-Only Home Care Providers. Class A licensees may also use this form to monitor the quality of services provided to clients at any time. Licensees may use their completed Licensing Survey Form to help communicate with MDH nurses during an on-site regulatory visit.

During an on-site visit, MDH nurses will interview staff, clients and/or their representatives, make observations and review documentation. The survey is an opportunity for the licensee to describe to the MDH nurse what systems are in place to provide Class A Licensed-Only Home Care services. Completing this Licensing Survey Form in advance may facilitate the survey process.

Licensing requirements listed below are reviewed during a survey. A determination is made whether the requirements are met or not met for each Indicator of Compliance. This form must be used in conjunction with a copy of the Class A Licensed-Only Home Care regulations. Any violations of the Class A licensing requirements are noted at the end of the survey form.

SUR<u>VEY RESULTS:</u> All Indicators of Compliance listed above were met.

For Indicators of Compliance not met, the rule or statute numbers and the findings of deficient practice are noted below.

1. MN Rule 4668.0065 Subp. 1

INDICATOR OF COMPLIANCE: #5

Based on record review and interview the licensee failed to ensure that tuberculosis screening was completed every 24 months for one of four employee (#D) records reviewed. The findings include:

Employee #D's record contained tuberculosis screenings dated October of 2004 and March of 2008, two years and five months later. When interviewed October 15, 2008 the office manager confirmed the tuberculosis screening was not completed within 24 months.

2. MN Rule 4668.0065 Subp. 3

INDICATOR OF COMPLIANCE: #5

Based on record review and interview, the licensee failed to ensure annual infection control in-service training was provided for two of four employee (#C and #D) records reviewed. The findings include:

Employees' #C and #D were March of 2007 and February of 2005, respectively as unlicensed direct care staff. Documentation indicated the last time employees' #C and #D had infection control training was March of 2007 and February of 2005 respectively. There was no evidence of any other infection control inservice for them. When interviewed, October 15, 2008 the office manager confirmed there was no evidence of subsequent infection control training for employees' #C and #D.

Client #1 had a physician order for oxygen one to two liters for sleep per nasal cannula as needed. The June 2008 and August 2008 medication administration records indicated employee D, an unlicensed direct care staff administered oxygen to client #1 on June 9, 13, and 14, 2008 and August 9, 10, and 13, 2008. Client #1's record did not contain instructions for administration of the oxygen. When interviewed, October 15, 2008 employee #D stated client #1 at times used oxygen when she went to bed at night. She stated that she had been trained by a registered nurse and confirmed there were no written instructions for the administration of oxygen in the client's record or home.
