All malignancies with a behavior code of /2 or /3 as listed in the ICD-O 3rd Edition (except those specifically excluded on pg. 3), all benign and borderline brain and CNS neoplasms, and all malignancies listed in the SEER Hematopoietic and Lymphoid Neoplasm Database. (Also refer to the Multiple Primary and Histology Coding Rules and the Hematopoietic and Lymphoid Neoplasm Database when determining reportability.) Diagnoses include, but are not limited to the following:

- Acoustic neuroma
- Acute panmyelosis
- adamantinoma of long bones
- Adenocarcinobroma
- Agnogenic myeloid metaplasia
- AIN III
- Askin tumor
- Atypical teratoid/rhabdoid tumor
- Blastaoma
- Carcinoibroma
- Carcinoid (except ECL nos, strumal, tubular)
- Carcinoma, all types (except basal cell and squamous cell of non-genital skin)
- Choroma
- Craniopharyngioma
- Cystic Pancreatic endocrine neoplasm (CPEN)
- Desmoplastic small round cell tumor
- Dygerminoma
- Ectomesenchymoma
- Endodermal sinus tumor
- Endolymphatic stromal myosis
- Endometrial stromatosis
- Epithelioma throphoblastic tumor
- Epithelioma, certain types (except basal cell and squamous cell of non-genital skin)
- Ewing tumor
- Gastrointestinal Stromal Tumor
- Germ cell tumor
- Germinoma
- Heavy chain disease
- Hepatoblastoma
- Hepatoma, embryonal, malignant, NOS
- Histiocytosis, malignant, disseminated or generalized Langerhans cell, X
- Hodgkin disease
- Hutchinson melanotic freckle
- Hyperesinophilic syndrome
- Hypernephroma
- Immunoproliferative disease, NOS; small intestinal disease
- Intraductal papillary mucinous neoplasm (ITPN)
- Intraepithelial neoplasia III
- Kaposi sarcoma
- Klastkin tumor
- Krukenberg tumor
- Laryngeal intraepithelial neoplasia, grade III (LIN III)
- Letterer-Siwe disease
- Linitis plastis
- Lobular neoplasia grade III (LN III)/lobular intraepithelial neoplasia grade III (LIN III) Breast
- Lymphomatous polyposis, malignant
- Lymphoproliferative disease of childhood, systemic EBV positive T-cell
- Lymphoproliferative disorder, chronic of NK cells; primary cutaneous; post-transplant polymorphic
- Malignant tumor, all types (except malignant hydatidiform mole)
- Mast cell disease
- Mature teratoma of the testes in adults
- Medulloepithelioma
- Melanoma, all types (except juvenile)
- Mesodermal mixed tumor
- Mesothelioma (except cystic or benign)
- Mucinous cystic neoplasm (MCN)
- Mullerian mixed tumor
- Mycosis fungoides/pagetoid reticulosis
- Myeloproliferative disease/disorder
- Myelosclerosis
- Nephroblastoma
- Neuroblastoma
- Neuroectodermal tumor (except melanotic)
- Non-invasive mucinous cystic neoplasm of pancreas
- Paget disease (except bone)
- Pancreatic intraepithelial neoplasia (PanIN III)
- Pancreatoblastoma
- Penile intraepithelial neoplasia, grade III (PeIN III)
- Pineal gland, all tumors
- Pituitary gland, all tumors
- Plasmacytoma
- Polyembryoma
- Precancerous melanosis, malignant melanoma in situ
- Pseudomyxoma peritonei
- Queyrat erythroplasia
- Rhabdoid tumor
- Sarcoma, all types
- Schwannoma, malignant and/or CNS
- Seminoma
- Sertoli-Leydig cell tumor, poorly differentiated or sarcomatoid
- Sezary syndrome/disease
- Solid pseudopapillary neoplasm of pancreas
- Spindle epithelial tumor with thymus-like element
- Spinal cord, all tumors
- Squamous intraepithelial neoplasia, grade III (SIN III, except cervix and skin
- VAIN III/VIN III/VUIN III
- Wilms tumor
- Yolk sac tumor
Reporting Requirements (Minnesota Rules 4606.3302)

- Malignant and in situ neoplasms of all sites listed in ICD-O-3 with behavior code of /2 or /3, except as noted in next section
- Basal and squamous cell carcinomas of the genitalia
- All brain and central nervous system (CNS) neoplasms regardless of malignancy
- Myeloproliferative and myelodysplastic disorders/neoplasms 2001 and later listed in ICD-O-3
- Hematopoietic/lymphoid malignancies 2010 and later listed in the SEER Hematopoietic and Lymphoid Neoplasm Database
- With or without microscopic confirmation

Diagnoses that are NOT reportable

- Intraepithelial neoplasia of cervix (CIN III) diagnosed before 1992 or after 1995
- Intraepithelial neoplasia of prostate (PIN III)
- (Adeno)carcinoma in situ of the uterine cervix after 1995
- Basal and squamous cell carcinoma of the skin (except genitalia)
- Borderline ovarian tumors diagnosed before 1992 or after 2000

Qualifier List and Ambiguous Terminology

Reportable Qualifiers/Ambiguous Terms

- Apparently/Appears to
- Comparable/Compatible/Consistent with
- Favors
- Features/Foci of
- Malignant appearing
- Most Likely
- Presumed
- Probably/Probable
- Suspected
- Suspicious (histology, peripheral smear)
- Typical of

Not Reportable Qualifiers/Ambiguous Terms

- Approaching
- Borderline
- Cannot be ruled out
- Equivocal
- Possible
- Potentially malignant
- Questionable
- Rule Out
- Suggests
- Suspicious but not diagnostic of
- Suspicious (cytology)
- Very close to
- Worrisome
