

Chartbook Section 2

Trends and Variation in Health Insurance Coverage

Section 2: Trends and Variation in Health Insurance Coverage

- Distribution of Minnesota population by primary source of health insurance coverage¹
- Private health insurance trends

A summary of the charts and graphs contained within is provided at [Chartbook Summaries - Section 2](#). Direct links are listed on each page. Please contact the Health Economics Program at 651-201-3550 or health.hep@state.mn.us if additional assistance is needed for accessing this information.

¹Primary source of insurance coverage is defined as the payer who is the main source of paying medical and pharmacy claims. For example, for individuals who have access to both Medicaid and Medicare coverage, Medicare coverage is the primary payer of coverage. This version of Chartbook 2 was edited to account for public program enrollees who may have Medicaid equivalent coverage through private insurance.

Distribution of Minnesota population by primary source of health insurance coverage

Distribution of Minnesota Population by Primary Source of Insurance Coverage, 2015

Total Population 5.5 Million

Sources: MDH Health Economics Program; U.S. Census Bureau, Annual Estimates of the Population for July 1, 2016.
