

Influenza-like Illness* Report Form – Minnesota Schools 2016-17

*Influenza-like illness (ILI) is defined as a fever of 100.0°F or greater and cough or sore throat (in the absence of a known disease other than influenza).

WHEN TO REPORT

Please report each day throughout the school year when you reach these thresholds:

- FOR ALL SCHOOLS (INCLUDING ELEMENTARY):** The number of students with ILI who are absent or sent home reaches 5 percent of the total school enrollment on a given day (e.g., a school of 600 students should report when 5 percent of their total enrollment (30 students) with ILI are absent or sent home or $600 \times .05 = 30$).

OR

- FOR ELEMENTARY SCHOOLS ONLY:** Three or more students with ILI from the same classroom are absent or sent home on a given day.

AND

- Report one time per outbreak when either of the above thresholds is met throughout the year.
- Do not report subsequent days of the same outbreak. When reporting additional outbreaks during the same season, make sure that ILI activity has returned to below threshold levels for at least 3 weeks. Report a new outbreak if you reach the threshold again after a minimum of three weeks.
- If symptoms of illness are unknown for an absent student, include this student in your count of ILI absences.
- Please note that individual cases of laboratory-confirmed influenza do not need to be reported by schools.
