How to use this resource guide:

- Resources are listed alphabetically.
- Each resource listing contains:

Title (year published)

Format: fact sheet, VHS video, booklet, online resource, etc.

How to access: method(s) for obtaining the resource.

Author: name of organization that created the resource. Abbreviations for authors and contact information for the organizations are located at the end of the guide.

Keyword(s): Active TB disease, Adherence/DOT, Blood tests for TB (Interferon-Gamma Release Assay or IGRA), Contact investigation, Epidemiology, Foreign-born populations, HIV coinfection, Infection control, Latent TB infection, Mantoux tuberculin skin testing, Nurse case management, Nurse case management, Other, Special settings, and TB elimination.

- This information is also available by keyword.

Treatment recommendations for patients with drug resistance and/or HIV infection change frequently.

Consult the Minnesota Department of Health's web site (www.health.state.mn.us/tb) or the Center for Disease Control and Prevention's web site (www.cdc.gov/tb) for current treatment guidelines.

Disclaimer:

The Minnesota Department of Health has compiled this resource guide as a service to health care providers and the public in Minnesota. Although the Minnesota Department of Health has not thoroughly reviewed each resource, only nationally recognized organizations have been included. The Minnesota Department of Health strongly advises health care providers to review each resource before using it.
