Dear Judge Eric L. Lipman,

My name is Laura Hayes, and I am writing to you from Granite Bay, CA. I am the mother of 3 children, ages 21, 19, and 17. I allowed my children to be vaccinated from 1992-1997 as a result of doctors failing to provide or require any type of informed consent. I was never given any Vaccine Information Sheets (VISs), as required by Federal Law, and as a matter of fact, the doctor would come into the examination room *after* the nurse had already given my children their multitudinous vaccines. There was never any discussion about any risks of any of the vaccines, nor any discussion of any side effects for which I should be on the lookout. No family medical history was requested or discussed, either, to determine whether or not vaccines might be contraindicated for our children.

As a result, our middle child suffered catastrophic brain injury from his "routine" childhood vaccinations. He is severely and permanently disabled, must be supervised around the clock, and will be dependent on others for the rest of his life. Our youngest child suffered seizures following his vaccines, and he also developed motor, oral, and vocal tics from them (tics are a result of mercury poisoning). His symptoms did not abate until we stopped allowing him to be vaccinated, and until we put him on a 2-year protocol of supplements to try to undo the damage that had been inflicted.

That is but a brief summary of the damage done to our children via their "routine" childhood vaccines (there is much, much more to tell), which were recommended by the CDC (an agency charged with *protecting* our health), and mandated by the state of CA. As a result, I have spent nearly 2 decades researching vaccines, advocating for a nationwide ban on vaccine mandates, fighting new restrictions on and the attempted elimination of vaccine exemptions, and doing my best every single day to educate as many people as I can regarding the dangers and inefficacies of vaccines.

My advocacy led to the writing of the attached document. I wrote it a few months ago following the November, 2012, Congressional Hearing on Autism. I hope you will read it in its entirety (it is just a few pages long), as it will shed light on a number of the problems with our nation's vaccine program. I am hoping it will help you to understand why it is imperative that you rule against adding any more vaccines to the list of mandated vaccines in the the state of MN, and I am hoping that it will help you to also rule against lowering the age at which certain vaccines are allowed to be given in the state of MN.

I will be praying that you have the ears to hear and the eyes to see how our nation's vaccine program is destroying the health and well-being of our nation's children. I will pray that you will be part of the solution to ending the damage we are inflicting on our children in the name of vaccines.

Sincerely,

Laura Hayes

Parent Mentor for Families for Early Autism Treatment

Top 10 List for How Congress Needs to Proceed Following Its Hearing On Autism on 11-29-12

Authored by Laura Hayes 12-9-12

- 1. Pass an Act of Congress banning vaccine mandates nationwide**, an Act which would override any state mandate laws. Vaccine mandates are unconstitutional, violating both the First Amendment and parental rights, they violate international codes of ethics, and they violate fundamental human rights. Rationale: No other medicine, medical treatment, or medical procedure is mandated. Vaccines, like any medicine, carry risks, including death. Vaccines have not been proven safe, and as a matter of fact, there is mounting evidence that they are a causal factor, if not **the** causal factor, in many childhood disorders and diseases, including: autism, seizure disorder, insulin-dependent diabetes, asthma, ADHD, food allergies, life-threatening peanut allergies, cancer, Guillain Barre Syndrome, rheumatoid arthritis, attention and learning problems, speech and language delays, SIDS, the list goes on and is potentially endless as we don't know all the many ways these unstudied medicines are adversely impacting the neurological and immunological systems of those to whom they are administered, most especially children. There exists in our country a very erroneous philosophy that assumes that all vaccines are safe and effective, for all people, at all times, in various combinations, without exception. To what other medicine do we ascribe such ridiculous logic? The deceptive vaccine propaganda machine has no match, as to date, there is **no evidence** that vaccines are either safe or effective for any given individual. Our nation's vaccine program is experimental and it carries grave, sometimes deadly, risks. It is immoral to mandate vaccines, and we should follow the example of other developed countries, like Canada, and reinstate medical freedom in our country.
- 2. Immediate ban of all mercury and aluminum in vaccines, including in the manufacture of vaccines. Immediate ban of mercury in the Rhogam shot given to pregnant women.** Rationale: It is a known fact that both of these metals are severely neurotoxic, and even more so when given together, which often happens when vaccines are administered. There is absolutely no safe level of either of these metals for humans, and there is absolutely no reason why they should be present in any medicine, especially those that are injected into the bloodstreams and tissues of infants, children, and pregnant women...no reason whatsoever. If these metals were given to a baby in a bottle, the person giving the bottle would be arrested, but somehow, it is acceptable for doctors to inject these neurotoxic metals directly into the bloodstreams and tissues of infants, children, and pregnant women. Ironically, infants and children would have a much better chance of surviving such a toxic assault if it occurred via a bottle, as their respiratory and digestive tracts would have a better chance of clearing the toxins than their bloodstream and tissues. Furthermore, to date, researchers do not know when the blood-brain barrier closes (and in fact, it never fully closes, as there are a number of openings that always remain open). The Research Director at UC Davis' MIND Institute told me that although they don't know the exact timing yet, the blood-brain barrier might not close until age 2 or after. The potential for catastrophic brain damage from vaccines can not be underestimated.

3. **Immediate recall of all mercury and aluminum-containing vaccines. Immediate recall of all mercury-containing Rhogam shots.** Rationale: It is completely unacceptable to “use up what’s already out there on the shelves” when we know that infants and children, pregnant women and fetuses, and people of all ages, will be harmed by these neurotoxic medicines. There is no excuse that can be given to justify using up a toxic supply of any medicine. That would be analogous to saying that it’s acceptable to leave E-Coli-tainted beef on the market to be used up, or to leave faulty tires that explode while driving on the market to be used up.
4. **Immediate retraction of the CDC’s recommendation for the Hep B series for infants, toddlers, and children.** Rationale: There is absolutely no justification for giving this vaccine to this population, none whatsoever. In the very rare event that the mother has active Hepatitis B, she should be given the full facts about the risks and benefits of the Hep B vaccine for her child, and she should then be allowed to choose, without coercion, whether or not she wants her child to have it. If the Members of Congress can be educated to understand just how unnecessary and dangerous this one vaccine is, not to mention that it has not been proven effective, they might then be better able to question ALL of the CDC’s recommended vaccines. Our nation’s routine childhood vaccine schedule has become about wealth, not health, and that is a crime of the utmost magnitude.
5. **Repeal the 1986 National Childhood Vaccine Injury Act.** Rationale: This one Act of Congress is responsible for the autism epidemic, not to mention other childhood epidemics that we are now facing as a nation. No other industry is afforded the liability protection that the pharmaceutical and medical industries are afforded by this Act. This Act completely indemnified vaccine-making pharmaceutical companies and doctors who administer vaccines for any and all harm caused by vaccine products. As a result, our nation’s vaccine schedule tripled in a very short time, with no testing of it, and with virtually zero oversight. Presently, the combination of this Act, vaccine mandates, and the nationwide attack on vaccine exemptions means that vaccine-making pharmaceutical companies have millions upon millions of captive customers, zero threat of being held accountable or liable for any of their vaccine products, and therefore, no incentive to make safe products. To make matters worse, this Act does not require doctors to report any and all suspected adverse reactions to vaccines. Our Vaccine Adverse Events Reporting System, part of the 1986 Act, is a *voluntary* one; doctors are *not* required to report. Thus, there is no accurate or official tracking of the true numbers of adverse reactions to vaccines. There is absolutely no way the CDC, FDA, NIH, or HHS can claim that our nation’s vaccine system is safe or effective, or that they have any real or accurate data or knowledge about the actual impact of our nation’s vaccine program on our population. The 1986 Act has had tragic consequences for more than 2 generations of children, and it needs to be repealed immediately, before millions more children are harmed and killed.
6. **Immediate investigation of the National Vaccine Injury Compensation Program needs to occur, with an emphasis on the entire Omnibus Autism Proceeding.** Rationale: Decisions were made based on flawed industry and government-funded studies, which were conducted and manipulated to cover-up the evidence of what had happened to hundreds of thousands, possibly millions, of children via the

government-approved and government-recommended vaccine program. Changed testimony by one of the government's own expert witnesses (Dr. Zimmerman) was purposefully ignored so as to keep hidden what has been done to U.S. children via the government-approved and government-recommended vaccine program. There needs to be justice and compensation for the horrific damage done to vaccine-injured children.

7. **Criminal charges need to be brought against those who knew that vaccines were causing autism and other childhood disorders and diseases, but who then chose to manipulate data, cover up evidence, lie about it, refuse to investigate it, continue to approve and recommend vaccines, etc.** Rationale: Evidence exists that data manipulation, lying, and cover-ups have occurred. Crimes against humanity have been committed. They can not go unpunished. Justice must be served in its most severe form against those who perpetrated these crimes and against those who perpetuated the autism epidemic, not to mention other vaccine injuries.
8. **All Members of Congress need to be educated about our nation's unproven and dangerous vaccine program, not just a small handful of them. Members of Congress also need to bear witness to what vaccine injury looks like to gain a better understanding and appreciation of the holocaust that has been carried out against our nation's children in the name of "the greater good."** Rationale: Vaccine-induced injury, permanent disability, chronic illness, and death are urgent problems facing our nation, both in terms of human costs, and in terms of financial costs. To date, Congress does not have even a basic understanding of this dire circumstance, and our nation is suffering greatly as a result. I, and others, could recommend numerous speakers to speak before the Members of Congress, and there would be many families willing to bring their vaccine-injured children to stand before Congress to bear witness to the crimes that have been committed against them.
9. **Use the monies in the Vaccine Injury Compensation Program's fund to help families bear the enormous costs of raising and caring for the vaccine-injured. Make the process to be compensated straightforward and easy, with the goal being to fully distribute the fund within a one-year timeframe, as the money belongs to those who have paid into the fund and been injured.** Rationale: The money in that fund belongs to those who have been injured by vaccines. To date, the majority of it has been hoarded away, hidden, possibly funneled elsewhere, and denied to those who have suffered vaccine injury and death. With the repealing of the 1986 Act, the VICP can be eliminated, the fund distributed, and proper liability can return to vaccine-producing companies and vaccine-administering doctors. In the event that there is any money left in the fund after one year, the remaining money can be used to train doctors to properly treat the vaccine injured, as to date, there are very few doctors trained to do this.
10. **Bring Paul Thorsen back to the U.S. to face charges for fraud, to investigate his manipulation of data, and to investigate who paid him to come up with results that would deny a link between vaccines and autism.** Rationale: The autism community is waiting for this criminal to be brought to justice. The autism community would like his accomplices brought to justice, too.
