Hepatitis A (Hep A)	Vaccine	Dose	MO	DAY	YR
<ul style="list-style-type: none"> • 2 doses separated by 6 months for children 12-24 months 		1			
		2			

* Suspended due to vaccine shortage 2008

ECFE/School Readiness Immunization Record

Name: _____

Birthdate: _____ Date of Enrollment: _____

ECFE/School Readiness Immunization Record-Instructions

Who should complete this form?

Either the parent/guardian or physician/clinic, can fill in the child's immunization history. You can get a legal exemption to the immunization law for medical or conscientious reasons.

Notes for Parents

1. Give your child's immunization history to the ECFE/School Readiness coordinator when you enroll.
2. Keep track of your child's shots.
3. This program will be only one of many times you will need an up-to-date shot record for your child.
 - It will save you time if you keep a shot record for each of your children.
 - Be sure to have the record updated each time your child receives a shot.
 - You will also need this record for school, camp, college, and if you go to a new doctor or clinic.
4. If your child is not up-to-date on his or her shots, you can catch up. Minnesota children are still getting diseases like measles, mumps, and rubella. These diseases are contagious. They can spread rapidly, especially among groups of children who have not received their shots. And some of them, like pertussis (whooping cough), are much more serious for children than they are for adults. As a parent, you can protect your children by making sure they get all their shots.

Note for Providers

1. Remind parents to immunize children on time.
 - As an ECFE/School Readiness provider, you are in an excellent position to help remind parents about immunizations.
 - Ask your local health department for an updated immunization schedule each calendar year so you will have the latest information on hand.

Questions?

If you have a question about immunizations, call your clinic or local public health department.
