**Do you have expired or spoiled MnVFC vaccine?**  
 All nonviable MnVFC vaccine (expired or spoiled) must be returned to McKesson. Contact MDH for approval before you send the vaccine. Use the **Returning Nonviable MnVFC Vaccine** form and mail the vaccine to McKesson at the address listed on the form.

Influenza vaccine	Age indications	Preservative-free or thimerosal-free*	Dose	Unit size	Doses ordered	Packaging	Type
Fluzone (sanofi pastuer)	6 months through 35 months ONLY	Thimerosal-free, preservative-free	0.25ml	10 doses		10 pre-filled syringes	Inactivated injectable
	36 months and older	Thimerosal-free, preservative-free	0.5ml	10 doses		10 pre-filled syringes or 10 single-dose vials	
	6 months and older	Contains thimerosal preservative	0.5ml	10 doses		10 multi-dose vials	
FluMist (MedImmune)	Healthy children age 2 years and older	Thimerosal-free, preservative-free	0.2ml	10 doses		10 single-dose sprayers	Live-attenuated intra-nasal

This order form must be signed by a licensed practitioner who is authorized to procure vaccine/biologicals according to Minnesota Statutes, Section 151.37 (e.g., M.D., D.O., nurse practitioner, physician's assistant, or pharmacist). Please include the individual's title.

**Signature and title** (M.D., D.O., N.P., P.A., or R.Ph. only)

**\*Preservative-free vs. thimerosal-free**

Vaccines with trace amounts of thimerosal are labeled as preservative-free. Vaccines that do not contain any thimerosal are labeled as thimerosal-free.

Thimerosal is still used in the early stages of manufacture of a few vaccines to ensure the production line is sterile. It is removed through a purification process, with only trace remaining (about 1/100th of the amount found in older vaccines).
