## How to use this Directory

This document is intended to be a quick reference for individuals working to identify appropriate health services for refugees and immigrants. Our goal is to expand these listings over time to reflect the growing populations of refugees and immigrants throughout our state.

- Listed organizations have been selected because they either have special expertise in serving diverse populations or offer low-cost care options such as reduced fees or sliding fees.
- Listings are divided by county of location. Within each county, listings are divided by type of service (i.e., mental health, dental).
- We welcome new listings that have not been included in this edition. Please contact 651-201-5414 with additions.
