Better Care, Better Health for All

MINNESOTA E-HEALTH SUMMIT

JUNE 15, 2017
BETTER, MORE AFFORDABLE CARE

HHS Delivery System Reform
- pay for care
- deliver care
- distribute information

Significant progress
- Quality and safety improved
- Patient experience improved
- Bent the cost curve

Ongoing movement
- MACRA
- Medicaid

BETTER CARE REQUIRES HEALTH INFORMATION TECHNOLOGY

Critical to HHS Value Based Care Approach (and other use cases)

◦ Make actionable data available when and where it matters
◦ Translate data into information to support higher value health care, advance science, improve the public’s health

Strategic Approach

◦ Creating a shared language for IT

◦ Establish a culture of data flow that is private and secure

◦ Build a business case for data availability and access
ACTION BEYOND THE BLUE BOX

Factors Contributing to Health

- Healthcare: 20%
- Genetics: 20%
- Social, Environment, and Behavioral Factors: 60%
- Behavioral: 9%
- Other: 1%

U.S. Health Expenditures:

- Healthcare: 90%

*$3.2 Trillion in 2015

MORE THAN HEALTHCARE – REQUIRES PUBLIC HEALTH APPROACH

What we do together as a society to ensure the conditions in which everyone can be healthy.
OUR ZIP CODE AFFECTS OUR HEALTH MORE THAN OUR GENETIC CODE...

Chetty et al. JAMA 2016;315(16):1750-1766
MANIFESTING AS “PUBLIC HEALTH 3.0”

LEADERSHIP & WORKFORCE

ESSENTIAL INFRASTRUCTURE

STRATEGIC PARTNERSHIPS

DATA, ANALYTICS & METRICS

FLEXIBLE & SUSTAINABLE FUNDING

Report that reflects **what we heard and saw** across the country, including input from thought leaders.

We proposed **5 overarching recommendations and 51 actions** that define what is most needed to support health departments and the broader public health system as it transforms to PH3.0.

PH3.0 REPORT
RECOMMENDATIONS

1) Public health leaders should embrace the role of chief health strategist for their communities.

2) Public health departments should engage with community stakeholders – from both the public and private sectors – to form vibrant, structured, cross-sector partnerships.

3) PHAB accreditation for public health departments should be strengthened to ensure that every person in the United States is served by nationally accredited health departments.

4) Timely, reliable, granular, and actionable data should be accessible to communities, and clear metrics should be developed to document success in public health practice.

5) Funding for public health must be enhanced and substantially modified.

MORE THAN HEALTHCARE – REQUIRES PUBLIC HEALTH APPROACH

What we do together as a society to ensure the conditions in which everyone can be healthy.
CREATING THE CONDITIONS WHERE EVERYONE CAN BE HEALTHY...

• Health care assessing and addressing the social determinants of health
  • New technology platforms
  • Transformation of existing platforms

• Hospitals serving as anchor institutions

• Payers directly targeting social determinants like housing, financial health

• Business as a local and national leader
“Treating a homeless man’s frostbitten toes is surely a waste, when a pair of shoes could have prevented it.”
