Summit Objectives
Upon completion of the Summit, each participant will be able to:

1. Describe the latest knowledge, insights, tools, and resources to connect communities and transform health and health care.
2. Understand national and Minnesota perspectives of how HIT is improving the health of individuals and communities. Gain practical and actionable knowledge from local examples at various stages of Minnesota’s EHR Implementation Plan from adoption to effective use to exchange.
3. Understand the emerging opportunities for advancing connectivity, and equity, population health in Minnesota and your role in that effort.
4. Learn how e-Health can support a culture of change in content of emerging healthcare payment and delivering models.

e-Health Website: www.health.state.mn.us/e-health

Summit Evaluation
An online evaluation of the Summit will be sent to all participant email addresses on June 16. Your input provides valuable information to the planning committee for future summits.

Conference App
Access all of the conference information on your phone using the Convene app! As a registered attendee, you should have received an email from Convene with instructions on how to download the app, as well as a private access code to get into this event on the conference app. If you are having trouble accessing the event information, visit the registration table for assistance!

Wi-Fi
Public Wi-Fi is free at Earle Brown Heritage Center. To access the network, pick up the password at registration or at any breakout session room.

PROFESSIONAL EDUCATION CREDITS

Accreditation Status: This activity has been planned and implemented in accordance with the Essential Areas and Policies of the Minnesota Medical Association (MMA) through the joint sponsorship of Stratis Health and the Minnesota e-Health Initiative. Stratis Health is accredited by the MMA through the Accreditation Council for Continuing Medical Education (ACCME) to provide continuing medical education for physicians.

Physicians: Stratis Health designates the Summit for 6.25 AMA PRA Category 1 Credits™. Physicians should only claim credit commensurate with the extent of their participation in the activity.

Nurses: The University of Minnesota School of Nursing, Office of Practice, Partnerships and Professional Development, is accredited as a provider of continuing nursing education by the American Nurses Credentialing Center’s Commission on Accreditation.

The Minnesota e-Health Summit is designed to meet the Minnesota Board of Nursing requirements for continuing education. It is the responsibility of the individual nurse to determine if the course fulfills that requirement. This program is awarded 7.5 Minnesota Board of Nursing contact hours.

Other health professionals: The Minnesota e-Health Summit may meet continuing education requirements for your focus. It is the responsibility of the individual to determine if the course fulfills that requirement.

Speaker and Planning Committee Disclosure: To comply with ACCME Standards for Commercial Support, Stratis Health requires presenters to disclose the existence of any significant financial interest or other relationship with companies whose products or services are related to the subject matter of the presentation. Each presenter has submitted a signed disclosure form. No presenter or planning committee member has a financial relationship to disclose that could be perceived as a real or apparent conflict of interest in the context of their presentation; nor will any speaker be discussing research or unlabeled uses of commercial products.
The Minnesota e-Health Summit would like to thank the following organizations for their financial support of this year’s Summit:

**Department of Health**

MDH is charged with protecting, maintaining and improving the health of all Minnesotans. Through the Office of Health Information Technology, MDH provides leadership, consultation and knowledge on health informatics and health policy related to the adoption, effective use and exchange of health information within MDH as well as across the continuum of care.

**Stratis Health**

Stratis Health, an independent 501(c)3 nonprofit based in Bloomington, Minnesota, leads collaboration and innovation in health care quality and patient safety; translates policy and research into practice; facilitates sustainable community solutions; turns data into action; leads transformation across settings of care; and furthers technology expansion all to improve person-centered care. Stratis Health advances health equity and care coordination across the health care continuum in all settings, spanning urban, rural, and underserved areas.
AGENDA

7:00 - 8:30 am Registration / Continental Breakfast (Included) ............................................ Lobby & Carriage Hall B
Poster Sessions & Vendor Expo ........................................................................................................ Lobby & Carriage Hall B

8:30 - 8:45 am Welcome and Opening Remarks .......................................................... Carriage Hall A

*Short Video from Commissioner Edward Ehlinger, MD, MSPH*
Commissioner, Minnesota Department of Health

*Moderator: Martin LaVenture, PhD, MPH*
Director, Office of Health Information Technology and e-Health, Minnesota Department of Health

8:45 - 9:45 am Keynote: Perspectives on Health in a Time of Transition .................................. Carriage Hall A

*Speaker: Karen DeSalvo, MD, MPH, MSc*
Former Assistant Secretary of Health and National Coordinator for Health Information Technology

9:45 - 10:15 am Break with Poster Sessions & Vendor Expo ............................................ Lobby & Carriage Hall B

10:15 - 11:15 am Breakout Sessions 1 - 5
1. Using Telehealth Across the Care Continuum ............................................................. Harvest B/C
2. OpenNotes: Update on National and Minnesota Adoption -
   Advancing e-Health Consumer Engagement ............................................................... Tack B
3. Leveraging e-Health to Prevent and Respond to Opioid Misuse and Overdose ........... Captain’s
4. How to Successfully Engage the Community in Care Coordination ........................... Harvest A
5. HIE Café: Let’s Talk About the Future ....................................................................... Garden City Ballroom

11:15 - 11:45 am Lunch ........................................................................................................ Carriage Hall A

11:45 - 12:30 pm Plenary Session .................................................................................... Carriage Hall A

*Minnesota e-Health 2030 Panel and Discussion*

*Speakers: Alan Abramson, PhD, Karen DeSalvo, MD, and Paul Kleeberg, MD*

*Moderators: Sunny Ainley and Meyrick Vaz*

12:30 - 12:45 pm Break with Poster Sessions & Vendor Expo ............................................ Lobby & Carriage Hall B

12:45 - 1:45 pm Breakout Sessions 6 - 10
6. Fireside Chat: Practice Facilitation to Transform Healthcare ......................................... Harvest B/C
7. Land of 10,000 Barriers: Tips and Tools for Exchanging Health Information
   in Minnesota ....................................................................................................................... Garden City Ballroom
8. Using EHRs and Data to Advance Tobacco Dependence System Change .................... Tack B
9. Using Data to Drive Population Health and Quality Improvement in
   an FQHC Network ............................................................................................................ Harvest A
10. Improving Care Through Connections Across Care Settings ....................................... Captain’s
1:45 - 2:15 pm Break with Poster Sessions & Vendor Expo ..................................................... Lobby & Carriage Hall B

2:15 - 3:15 pm Breakout Sessions 11 - 15
11. Your Accountable Health Journey in the Quality Payment Program .................................. Captain's
12. A Personal Health Record for Medical Assistance Beneficiaries ........................................ Tack B
13. Local Public Health Perspectives on Practical Public Health Surveillance ....................... Harvest A
14. Closing the Loop: Connecting Post-Acute Providers to e-Health Information ...............Harvest B/C
15. Land of 10,000 Barriers: Tips and Tools for Exchanging Health Information in Minnesota ............................................................ Garden City Ballroom

3:15 - 3:45 pm Break with Poster Sessions & Vendor Expo ..................................................... Lobby & Carriage Hall B

3:45 - 4:55 pm Closing Plenary ..................................................................................................... Carriage Hall A
Sharing Information Across Minnesota: HIOS Leading the Way
Speakers: Liz Cinqueonce, Chad Peterson, and Mary Thompson
Moderator: Peter Schuna
Introduction and Closing Remarks: Jennifer Lundblad, PhD, MBA

4:55 - 5:55 pm Networking Reception .......................................................................................... Outside Patio

Let’s make good happen, together.

Thanks to our members, HealthPartners has earned the highest overall member plan rating among Minnesota health plans for 10 straight years.

healthpartners.com/outcomes

Keynote: Perspectives on Health in a Time of Transition 8:30 - 9:45 a.m.

Keynote Speaker:
Karen DeSalvo, MD, MPH, MSc is a physician who has focused her career on improving the health of all people, with a particular focus on vulnerable populations. She has done this through direct patient care, medical education, policy and administrative roles, research, and public service. Her commitment to improving the public's health includes ensuring access to quality, affordable health care, strengthening the public health infrastructure and leveraging public-private partnerships to address the social determinants of health through environmental, policy and systems level change.

Dr. DeSalvo most recently served as Acting Assistant Secretary for Health at the U.S. Department of Health and Human Services (HHS). During her tenure, she has worked with public and private sectors to develop a blueprint for the future of public health, Public Health 3.0, that calls for the development of local public/private partnerships, strengthening of local governmental public health infrastructure, and attention to the social determinants of health. Dr. DeSalvo also served as the National Coordinator for Health Information Technology where she set policy that focused national attention on the need to move beyond adoption and focus on interoperability. She marshaled public and private stakeholders to create and execute a national strategy to health IT that shifts focus from electronic health records to standardized data and effectuating a culture and business case for information flow to support better health for individuals and communities.

Edward Ehlinger, MD, MSPH
MN Commissioner of Health
was appointed by Gov. Mark Dayton in January 2011. Commissioner Ehlinger is responsible for directing the work of the MN Department of Health. MDH is the state’s lead public health agency, responsible for protecting, maintaining and improving the health of all Minnesotans. The department has approximately 1,400 employees in the Twin Cities area and seven offices in Greater Minnesota. Prior to being appointed commissioner, Dr. Ehlinger served as director and chief health officer for Boynton Health Service at the University of Minnesota. He has also served as an adjunct professor in the Division of Epidemiology and Community Health at the University of MN School of Public Health and as the director of Personal Health Services for the Minneapolis Health Department.

Marty LaVenture, PhD, MPH, FACMI, Director, Office of Health Information Technology, e-Health and Health Informatics, MN Department of Health
leads the Minnesota e-Health Initiative, a public–private collaborative chartered in 2004 to advance EHR adoption and use in Minnesota. He has a master’s degree in epidemiology and a PhD in Health Informatics from the University of Minnesota. He is an adjunct core member of the faculty at the University of Minnesota in Health Informatics. He is lead author for the chapter on public health informatics in the new 4th edition of the Shortliffe & Cimino’s Textbook of Biomedical Informatics (BMI). He is an elected Fellow of the American College of Medical Informatics.
SESSION 1: Using Telehealth Across the Care Continuum  
Barb Andreasen, Allina  
Maureen Ideker, Essentia Health  
Marsha Waind, Altru Health System  

Learn about three successful telemedicine programs. Hear about models, network design, rationale for equipment selection, challenges encountered with connectivity and broadband capacity, ongoing operational costs, as well as eligibility for reimbursement. Discussion will include using telehealth to prevent and respond to the opioid misuse and overdose.

SESSION 2: OpenNotes: Update on National and Minnesota Adoption - Advancing e-Health Consumer Engagement  
Linda Davis, OpenNotes  
Paul Kleeberg, Aledade  
Lynn McFarling, CentraCare  
Julie Prigge, Mayo Clinic  

The ability for patients to review their physician notes electronically through OpenNotes has grown nationally from five million patients in 2015 to 12 million patients in 2017. Learn how this movement has expanded in Minnesota and the experiences of three care systems which have implemented OpenNotes. Additionally, discuss how to support its continued growth so patients can feel more in control of their care, can understand their condition and care plans, and health care providers can improve patient safety and reduce the cost of care.

SESSION 3: Leveraging e-Health to Prevent and Respond to Opioid Misuse and Overdose  
Steve Simenson, Goodrich Pharmacy, Inc.  
Laura Topor, Granada Health  

Misuse and abuse of opioid drugs is a major killer and a key public health issue. Panelist will share how e-prescribing and exchanges of clinical and administrative data can be a part of the solution. Audience discussion will focus on gaps and opportunities for addressing the opioid crisis including utilizing the Minnesota e-Health Initiative and the Minnesota Administrative Uniformity Committee.

SESSION 4: How to Successfully Engage the Community in Care Coordination  
George Klauser, Lutheran Social Service of MN, Altair ACO  
Nate Tyler, Simply Connect  

Learn how a new model for the disabily population helps guide decision-making by engaging clients, exchange partners others to better coordinate care. Hear case studies in implementing a system, process, engagement, and technology to provide community-based care coordination.

SESSION 5: HIE Café: Let’s Talk About the Future  
Moderator: Jennifer Lundblad, Stratis Health  
Matt Kane, Minnesota Department of Administration  
Karen Soderberg, Minnesota Department of Health  

The 2016 Minnesota Legislature requested a study to assess Minnesota’s legal, financial, and regulatory framework for health information exchange and make recommendations for modifications that would strengthen the ability of Minnesota health care providers to securely exchange data in compliance with patient preferences and in a way that is efficient and financially sustainable. This session will provide an overview of the study progress to date and engage the audience to share their ideas and reactions on how providers across the care continuum can connect.

Minnesota Medicaid E.H.R. Incentive Program

- Participated in the Minnesota E.H.R. Incentive Program in the past, but attested to less than six (6) years? You can return anytime through 2021 to receive up to $63,750 for full participation.

- NEW! Attesting is easier than ever. The MEIP program now supports electronic submission of clinical quality measures (CQMs). No more manual entry required.

- For more information, contact the MEIP help desk staff at 855-676-0366, or dhs.ehr.incentives@state.mn.us.
**Lunch Session: Minnesota e-Health 2030 Panel and Discussion**

An interactive panel will discuss the Minnesota e-Health 2030 Project, share initial findings and engage the audience in thinking about the future. The 2030 Project purpose is to propose improvements to the Initiative that assure a more agile Initiative that can better lead, influence, anticipate, and respond to future challenges, opportunities, and uncertainties significant to e-health.

**Moderator:** Sunny Ainley, Associate Dean of Normandale Community College’s Center for Applied Learning

Sunny Ainley led the ONC Health IT Workforce Training program for MN training over 800 health IT professionals between 2010 - 2013. She is currently the Principal Investigator (PI) for the newly awarded health IT workforce training program, awarded by the ONC in 2015 and is also working with multiple rural critical access hospitals in Southwest MN to upskill healthcare employees in health IT skills through a HRSA development grant. Sunny is a member of the MN e-Health Advisory Committee, HealthPartner’s Institute for Education and Research and co-chair of the e-Health Workforce workgroup.

**Moderator:** Meyrick Vaz, Vice President, Healthcare Solutions, Optum Global Solutions

Meyrick Vaz leads strategic healthcare solutioning at Optum Global Solutions. In this role, he closely tracks industry developments and trends, while advising clients on how to optimize and grow their business in today’s complex, rapidly changing health care system. Meyrick brings more than 23 years of business technology leadership experience in industries like healthcare, financial services, retail, information services and consulting.

Alan Abramson, PhD, Senior VP of Information Services & Technology and Chief Information Officer, HealthPartners

Alan Abramson is HealthPartners senior vice president for Information Services & Technology and chief information officer. Mr. Abramson is active as an advisor or board member to numerous regional and national organizations including: The Health Care Executive Group, University of St. Thomas Graduate Programs in Software, and BethelBiz mentorship program. He currently co-chairs the Minnesota eHealth Advisory Committee and has chaired numerous eHealth workshops.

Karen DeSalvo, MD, MPH, MSc

Dr. DeSalvo is a physician who has focused her career on improving the health of all people, with a particular focus on vulnerable populations. She has done this through direct patient care, medical education, policy and administrative roles, research, and public service. Her commitment to improving the public’s health includes ensuring access to quality, affordable health care, strengthening the public health infrastructure and leveraging public-private partnerships to address the social determinants of health through environmental, policy and systems level change. She most recently served as Acting Assistant Secretary for Health at the U.S. Department of Health and Human Services (HHS) and as the National Coordinator for Health Information Technology.

Paul Kleeberg, MD, FAAFP, FHIMSS Medical Director, Aledade

Dr. Paul Kleeberg joined Aledade as a Medical Director. He is a family physician, as well as an expert on EHR optimization, clinical decision support, and quality improvement. He has served on several health care boards during his career and has more than 25 years experience in the health care IT field; most recently helping to implement health IT in rural and underserved settings. As the Chair of HIMSS, Dr. Kleeberg led the largest national health care IT nonprofit providing professional development to more than 61,000 individual members, 640 corporate members, and over 450 nonprofits; as well as help shape public policy for the growing health care IT sector.

**Networking Reception:** 4:55 - 5:55 p.m.

Continue the conversation with panelists, presenters, and sponsors immediately following the Plenary Session.

Join us for refreshments and light fare outside on the patio (or in Carriage Hall B in the case of inclement weather).

Sponsored by T3K Health and CARETRAC
SESSION 6: Fireside Chat: Practice Facilitation to Transform Healthcare
Moderator: Claire Neely, ICSI
Amy Heikkinen, Stratis Health
Carol Lange, University of Minnesota
Kevin Peterson, University of Minnesota

This session will introduce “Practice Facilitation” and demonstrate the value it can provide to healthcare organizations in optimizing systems, processes, and people to build organizational capacity for continuous quality improvement. This role is becoming mission-critical for practices and healthcare organizations in order to meet the current challenges of better quality of care, lower costs and better health – with less resources. This session will also highlight the MN Consortium for Practice Facilitation’s new Practice Facilitation Certificate Program and spotlight real examples of individuals and organization leveraging the power of practice facilitation.

SESSION 7: Land of 10,000 Barriers: Tips and Tools for Exchanging Health Information in Minnesota
Jesse Berg, Gray Plant Mooty
Tim Johnson, Gray Plant Mooty
Julia Reiland, Gray Plant Mooty

Privacy, security and consent management are increasingly important topics as use of electronic health records (EHRs) and electronic health information exchange (HIE) are expanding. Learn about the Minnesota Department of Health grant-funded work to help ensure that health care providers have the access to the knowledge and tools required to use, disclose and share health information in a safe and secure manner. This session will provide information on educational materials for implementing leading practices for enabling safe and secure HIE across settings for care coordination and other activities.

SESSION 8: Using EHRs and Data to Advance Tobacco Dependence Systems Change
Tammy Didion, Hennepin County Medical Center
Jill Doberstein, Essentia Health
Megan Whitte, Two AppleTree Square

Learn about the importance of health systems change and best practices around EHRs and data to advance systems change for tobacco. This session will highlight two tobacco systems change initiatives funded by ClearWay Minnesota, providing rural and urban perspectives. The discussion includes approaches to modifying their EHRs and using data in their systems change work.

SESSION 9: Using Data to Drive Population Health and Quality Improvement in an FQHC Network
Lois Brown, Indian Health Board
Indi Lawrence, Indian Health Board
Lisa Moon, Advocate Consulting LLC

The Federally Qualified Health Center (FQHC) Urban Health Network (FUHN) is the nation’s first virtual FQHC-led Medicaid ACO. This session will introduce how the ten member FQHCs are using claims data along with their EHRs to target and drive population health and quality improvement projects. These projects are focused on delivering quality care, developing care management strategies and reducing the total cost of care for the underserved populations they manage. Presenters will share the methods, risks, challenges and successes of the new strategies. In addition, clinic staff responsible for their organization’s care delivery transformation will highlight stories and lessons learned.

SESSION 10: Improving Care Through Connections Across Care Settings
Cathy Gagne, St. Paul-Ramsey County Public Health
Mark Jurkovich, Northstar Health Analytics
George Klauser, Lutheran Social Services

The opportunity to improve care delivery to Minnesotans through greater information exchange is significant. There are more health care professionals delivering direct patient care outside of our large care systems than within. The ability for chiropractors, many mental health care professionals, optometrists, dentists and others to obtain and share information about patient health and care can only improve care coordination. This presentation is designed to explore these significant opportunities, discuss some of the key barriers, and identify tools that have worked effectively or may improve exchange.
SESSION 11: Your Accountable Health Journey in The Quality Payment Program (question on Medicaid Meaningful Use will also be addressed)
Lisa Gall, Stratis Health
Matthew Gravel, Minnesota Department of Human Resources
Candy Hansen, Stratis Health

The journey towards accountable health has begun: In 2017, the Center for Medicare and Medicaid Services (CMS) Quality Payment Program started its transition year. The session will provide details on how the Merit Based Incentive Program (MIPS) is setting the stage for improving health outcomes and patient experiences as organizations select their Pick Your Pace option for participating in the Quality Payment Program. In addition, a representative from DHS will be available to clarify Medicaid Meaningful Use questions.

SESSION 12: A Personal Health Record for Medical Assistance Beneficiaries
Tom Gossett, Aging and Adult Services, DHS Central Office
Rolf Hage, Aging and Adult Services, DHS Central Office
Greg Linden, Linden Tech Advisors LLC
Diane Thorson, Otter Tail County Public Health Department

The MN Department of Human Services is working with a Community Collaborative in Otter Tail County, MN, to make a Personal Health Record available to seniors and people with disabilities through a CMS-funded TEFT Demonstration Grant. Medical Assistance beneficiaries are using the system and have provided helpful feedback about what works and what needs improvement. Come hear about real-world experiences in this ground-breaking work.

SESSION 13: Local Public Health Perspectives on Practical Public Health Surveillance
Richard Carlson, Minneapolis Health Department
Renee Frauendienst, Stearns County Human Services
Emily Thompson, Hennepin County Public Health Department

This session will describe how local health departments in Minnesota are exploring, in partnership with their local health care providers, the use of data from electronic health record systems to support community health and surveillance. Presenters will describe collaborations underway in Minnesota and share tools and recommendations to better develop actionable program outreach, evaluate policies, and improve surveillance.

SESSION 14: Closing the Loop: Connecting Post-Acute Providers to e-Health Information
John Whittington, South Country Health Alliance

As hospitals and physicians become increasingly sophisticated in their ability to keep patient electronic records current across care environments, some members of the care cycle are left out of the loop. Post-acute providers need access to tools that can work alongside their existing systems, and with a low cost to entry. With its multiple access points and low entry costs, Direct is ideal for connecting post-acute providers to hospitals and physicians, most of whom already use Direct. In this session, we will review the quality improvements for Minnesota patients achieved by bringing these providers into the loop.

SESSION 15: Land of 10,000 Barriers: Tips and Tools for Exchanging Health Information in Minnesota
Jesse Berg, Gray Plant Mooty
Tim Johnson, Gray Plant Mooty
Julia Reiland, Gray Plant Mooty

Privacy, security and consent management are increasingly important topics as use of electronic health records (EHRs) and electronic health information exchange (HIE) are expanding. Learn about the Minnesota Department of Health grant-funded work to help ensure that health care providers have the access to the knowledge and tools required to use, disclose and share health information in a safe and secure manner. This session will provide information on educational materials for implementing leading practices for enabling safe and secure HIE across settings for care coordination and other activities (This Session is also available in SESSION 7 at 12:45-1:45 pm.)
Liz Cinqueonce, Southern Prairie Community Care
joined SPCC in 2014 and serves Executive Director at Southern Prairie Community Care, responsible for delivering health information exchange services to health care providers in the Southern Prairie region and beyond. Liz has more than eighteen years of experience in organizational management, health policy, and government affairs. She previously served as Executive Vice President of the MN Pharmacists Association after years of service as MPhA’s Vice President of Public Affairs. Her experience includes five years in state government, including deputy director positions in the Office of Health Information Technology and the Health Economics Program at the MN Department of Health; and in the Performance Management and Quality Improvement Division at the MN Department of Human Services. Liz earned her bachelor’s degree in political science from the University of St. Thomas in St. Paul.

Chad Peterson, Koble-MN
is the President and CEO of The Koble Group, a Health Information Technology company dedicated to advancing interoperability and helping healthcare providers across the U.S. achieve maximum benefit of their HIT investments. Peterson formerly helped launch the North Dakota Health Information Network (NDHIN), first as a governor-appointed member of the ND Health Information Technology Advisory Committee which formed the State HIE and later as the Technology and Operation Manager for NDHIN. Chad is a former Vice President of the National Association of Trusted Exchange (NATE) and is a co-founder and past president of the ND HIMSS Chapter.

Mary Thompson, Allina Health Systems
is a Program Manager reporting directly to the CIO of Information Services at Allina Health in Minneapolis, MN. Mary has responsibility for development and program delivery of Health Information Exchange. She has 25 years of experience in healthcare, the first half of which was spent in operations in both hospital and ambulatory settings. Since joining Information Services in 2005, Mary has progressed from managing Epic ambulatory implementations to Meaningful Use project management, to her current role of Interoperability Program Management. Mary brought the Allina Health enterprise live on Epic’s Care Everywhere module and continues to lead integrated & cross functional teams in optimization efforts to increase information exchange within the Allina Integrated Medical Network and throughout Minnesota.

Moderator:
Peter Schuna, Pathway Health Services
shares responsibility for overall management, development and direction of Pathway Health. He brings over a decade of health care operations experience to Pathway Health and has been instrumental in managing industry partnerships and guiding Pathway’s strategic direction of information technology. Peter is involved in industry activities related to information technology implementation and policy direction. He spent the past four years serving on state and national long-term care information technology committees and helped bring technology to the forefront of the long-term care industry. Prior to joining Pathway, Peter served as a Health Care Administrator for both the HealthEast Care System and Benedictine Health System.

Closing:
Jennifer Lundblad, PhD, MBA, President and CEO, Stratis Health
has an extensive background in leadership, organization development, and program management in both non-profit and education settings. Dr. Lundblad is chair of the Minnesota Alliance for Patient Safety (MAPS) board of directors, and a member of the boards of OnPoint Health Data, the Neighborhood Involvement Program, and eLumen Collaborative. She serves as a member of the national RUPRI (Rural Policy Research Institute) Health Panel, the Minnesota e-Health Advisory Committee, Women’s Health Leadership Trust, and Minnesota Healthcare Quality Professionals. In 2014, she was honored with leadership awards by both the Women’s Health Leadership Trust and the George Family Foundation. Jennifer has a BA in speech communication and economics from Macalester College, an MBA in public and non-profit management from Boston University, and a PhD in Education with a focus on organizational development from the University of Minnesota.

Medicity is a recognized expert in building large clinically connected communities. With nearly 20 years of experience in aggregating, readying and distributing data for population health, we’ve created a collaborative network that processes more than 6 billion clinical transactions each year. Our innovative solutions provide a powerful data foundation that enables your unique population health goals.
The Minnesota Prescription Monitoring Program (PMP) is a tool to be used by prescribers and pharmacists to assist in managing their patient’s care. It contains information provided by Minnesota licensed pharmacies and prescriber dispensers. Pharmacies and prescribers who dispense from their office submit prescription data to the PMP system for all Schedules II, III, IV and V controlled substances, butalbital and gabapentin dispensed in or into Minnesota. This protected health information is collected and stored securely. Minnesota licensed prescribers and pharmacists, and their delegated staff may be authorized to access information from the PMP database. The program was implemented to promote public health and welfare by detecting diversion, abuse and misuse of prescriptions for controlled substances as defined in Minnesota Statutes Section 152.126.

This Minnesota Department of Health unit works to prevent health care-associated infections and on efforts to slow the frequency and extent of antibiotic-resistant infections. We are presenting information on a method to measure hospital use of antibiotics, to help assure that these drugs are being used appropriately and not overused.

The Minnesota Immunization Information Connection (MIIC) is a system that stores electronic immunization records. MIIC makes keeping track of vaccinations easier and helps ensure Minnesotans get the right vaccines at the right time.
Today, more than 13 million patients in 37 states can share open notes in medical records. OpenNotes is an international movement that’s building better communication, quality of care, patient safety and trust. Our mission: spreading and exploring the effects of open notes. A small change in how we manage notes can bring about a cultural change in how health care is delivered and experienced. We can enhance the quality of care — and improve the safety of every patient — if we make visit notes transparent and easy to share.

Sage Health Management Solutions

Sage Health Management Solutions, Inc. (Sage HMS), a Minnesota-based healthcare information technology company, is focused on prescriptive and predictive analytics. To meet the new Medicare order imaging requirements, RadWise Clinical Decision Support (CDS) has the most robust imaging clinical content and most user-friendly interface strategies compared to provider preferences.

Simply Connect*

A powerful Health Information Exchange (HIE) designed specifically for the community-based post-acute-care and long-term services and supports provider, Simply Connect makes sharing and obtaining patients’ Personal Health Records—along the entire continuum of health care delivery—secure, simple and accessible to all.

South Dakota Health Link*

South Dakota Health Link is a multi-state Health Information Exchange providing secure, real-time communication and information to member organizations. SD Health Link has strategically developed services to meet member need, spur adoption, and ensure financial sustainability. SD Health Link continually evaluates the health information exchange landscape to ensure we deliver the latest technology and services to meet the ongoing needs of our members.
Poster Sessions combine a visual display with an expert ready to discuss the work of their organization and answer questions. Located in the lobby, they offer an opportunity to discover additional examples of current e-health research and implementation.

Advancing Public Health Information System Interoperability at the Minnesota Department of Health: An Informatics Framework
Sam Patnoe, Health Systems Integration Program (HSIP) Fellow, Minnesota Department of Health-Office of Health Information Technology

The Minnesota Department of Health (MDH) is taking steps to advance interoperability across its public health information systems in order to improve data quality and timeliness, optimize surveillance capabilities, better support population health, and ensure proper follow-up and action to public health threats. This informatics framework aims to provide a structured approach, practical tools, and guidance for MDH programs interested in implementing interoperable and standards-driven approaches to health information exchange with internal and external partners.

Total Care Collaborative: A Review of Integrated Models
Khalea Zobel, Licensed Social Work Care Coordinator, University of Minnesota Physicians

Review of integrated hospital, clinic and community resource models. What we did, and what others are doing effectively to reduce utilization, health care cost and improve overall wellbeing of patients by collaborating with community partners.

Not Something We Typically Text, Chat or Tweet About… Increasing Chlamydia Screening Rates Using Social Media
Sarah Sonn, Sr. Marketing Consultant, HealthPartners and Patty Graham, Sr. Quality Consultant, Quality Improvement and Compliance, HealthPartners

HealthPartners launched an innovative awareness campaign leveraging digital marketing and storytelling to encourage young adults to get screened. The result? 2.8 percent HEDIS rate improvement. Learn about their process for real-time audience message testing to create a winning message.

What Makes a Care Coordinator Most Effective? An Analysis of their Backgrounds, Competencies, and Functions
Khalea Zobel, Licensed Social Work Care Coordinator, University of Minnesota Physicians
Lauren Williams, MD, University of Minnesota Physicians

Thank you to our Bronze Sponsor
HealthEast

We hope you stop by our booth and meet our staff.

CARETRAC
DRIVEN BY DATA
Thank you to the Minnesota e-Health Initiative Advisory Committee Members, Alternates, and Workgroup Co-Chairs from 2016-17 for their leadership and contributions to the Minnesota e-Health Initiative.

**Advisory Committee Co-Chairs:**

Alan Abramson, PhD  
Senior Vice President, IS&T and Chief Information Officer  
HealthPartners Medical Group and Clinics  
Representing Health System CIOs

Paul Kleeberg, MD  
Medical Director, Aledade  
Representing: Physicians

**Advisory Committee Members:**

Sunny Ainley  
Associate Dean, Center for Applied Learning Normandale Community College  
Representing: HIT Education and Training  
Co-Chair, e-Health Workforce Workgroup

Constantin Aliferis, MD, MS, PhD, F ACM I  
Chief Research Informatics Officer, University of Minnesota Academic Health Center  
Representing: Academics and Clinical Research

Jeff Benning, MBA  
President and CEO, Lab Interoperability Collaborative  
Representing: Expert in HIT  
Co-Chair, Health Information Exchange Workgroup

Laurie Beyer-Kropuenske, JD  
Director Community Services Divisions  
Representing: Minnesota Department of Administration  
Co-Chair, Privacy & Security Workgroup

Lynn Choromanski, PhD, RN-BC  
Nursing Informatics Specialist, MVNA  
Representing: Nurses

Cathy Gagne, RN, BSN, PHN  
St. Paul-Ramsey Department of Public Health  
Representing: Local Public Health

Maureen Ideker, MBA, RN  
Director of Telehealth Essentia Health  
Representing: Small and Critical Access Hospitals

Mark Jurkovich, DDS, MBA  
Dentist, Gateway North Family Dental  
Representing: Dentists

Ruth Knapp  
Manager, Health Data Quality, Minnesota Department of Human Services  
Representing: Minnesota Department of Human Services

Marty LaVenture, PhD, MPH, FACMI  
Director Office of Health IT and e-Health, Minnesota Department of Health  
Representing: Minnesota Department of Health

Jennifer Lundblad, PhD  
President and Chief Executive Officer, Stratis Health  
Representing: Quality Improvement

Bobbie McAdam  
Senior Director, Business Integration Medica  
Representing: Health Plans

Kevin Peterson, MD  
Family Physician Phalen Village Clinic  
Representing: Community Clinics and FQHCs

Peter Schuna  
President & CEO, Pathway Health Services  
Representing: Long Term Care  
Co-Chair, Health Information Exchange Workgroup

Jonathan Shoemaker  
Information Services Director of Clinical Application, Allina Health  
Representing: Large Hospitals

Trisha Stark, PhD, LP, MPA  
Licensed Psychologist  
Representing: Behavioral Health

Meyrick Vaz  
Vice President, Healthcare Solutions Optum Global Solutions  
Representing: Vendors

Donna Watz, JD  
Deputy General Counsel, Minnesota Department of Commerce  
Representing: MN Department of Commerce

John Whitington  
South Country Health Alliance  
Representing: Health Care Purchasers and Employers  
Co-Chair, e-Health Workforce Workgroup

Ken Zaiken  
Consumer Advocate  
Representing: Consumers  
Co-Chair, Consumer Engagement Workgroup

**Advisory Committee Designated Alternates:**

Robin Austin, DNP  
Clinical Assistant Professor, School of Nursing  
Co-Chair, Consumer Engagement Workgroup
Planning Committee and Staff

Advisory Committee Designated Alternates cont.:
Sarah Cooley, MD, MS
Assistant Professor of Medicine, Division of Hematology, Oncology and Transplantations, University of Minnesota
Alternate Representing: Clinical Research

Kris Dudziak, CHCE
Senior Manager Business Operations, Home Care, Hospice, and Geriatric Services, HealthPartners Medical Group and Clinics
Alternate Representing: Large Hospitals

Nancy Garrett, PhD
Chief Analytics Officer, Hennepin County Medical Center
Alternate Representing: Quality Improvement

Mark Sonneborn
Vice President, Information Services, Minnesota Hospital Association Alternate Representing: Hospitals

Susan Severson
Director, Health IT Services, Stratis Health
Alternate Representing: Quality Improvement

Steve Simenson, BPharm, FAPhA
President and Managing Partner Goodrich Pharmacy Alternate Representing: Pharmacists

Ann Warner
Manager, Data Engineering, HealthEast Interim Co-Chair, Health Information Exchange Workgroup

LaVonne Wieland
Compliance and Privacy Officer, HealthEast Co-Chair, Privacy & Security Workgroup

Kathy Zwieg
Associate Publisher & Editor-in-Chief, Inside Dental Assisting Magazine
Alternate Representing: Clinic Managers

Planning Committee Co-Chairs:
Martin LaVenture, PhD, MPH
Director, Office of Health Information Technology and e-Health, MDH

Jennifer Lundblad, PhD, MBA
President and CEO, Stratis Health

Planning Committee Members:
Mark Benjamin
Senior Communications Specialist and CME Coordinator, Stratis Health

Jennifer Fritz, MPH
Deputy Director at the Office of Health Information Technology, MDH

Kari Guida, MPH, MHI
Senior Health Informatician, Office of Health Information Technology, MDH

Melinda Hanson, MPH
HIE Oversight Program Coordinator, Office of Health Information Technology, MDH

Bob Johnson, MPP
e-Health Project Manager, Office of Health Information Technology, MDH

Rebecca Johnson, MPP
Public Health Informatics Planner, Office of Health Information Technology, MDH

Anne Schloegel, MPH
e-Health Program Lead, Office of Health Information Technology, MDH
