RE: CCN: 245629
Cycle Start Date: April 3, 2024

Dear Administrator:

On May 8, 2024, we notified you a remedy was imposed. On May 29, 2024 the Minnesota Department of Health completed a revisit to verify that your facility had achieved and maintained compliance. We have determined that your facility has achieved substantial compliance as of May 22, 2024.

As authorized by CMS the remedy of:

- Mandatory denial of payment for new Medicare and Medicaid admissions effective July 3, 2024 did not go into effect. (42 CFR 488.417 (b))

In our letter of , in accordance with Federal law, as specified in the Act at § 1819(f)(2)(B)(iii)(I)(b) and § 1919(f)(2)(B)(iii)(I)(b), we notified you that your facility was prohibited from conducting a Nursing Aide Training and/or Competency Evaluation Program (NATCEP) for two years from July 3, 2024 due to denial of payment for new admissions. Since your facility attained substantial compliance on May 22, 2024, the original triggering remedy, denial of payment for new admissions, did not go into effect. Therefore, the NATCEP prohibition is rescinded. However, this does not apply to or affect any previously imposed NATCEP loss.

The CMS Location may notify you of their determination regarding any imposed remedies.

Feel free to contact me if you have questions.

Sincerely,

A handwritten signature in cursive script that reads 'Sarah Lane'.

Re: Reinspection Results
Event ID: VI2312

Dear Administrator:

On May 13, 2024 survey staff of the Minnesota Department of Health - Health Regulation Division completed a reinspection of your facility, to determine correction of orders found on the survey completed on April 3, 2024. At this time these correction orders were found corrected.

Please feel free to call me with any questions.

Sincerely,

A handwritten signature in cursive script that reads 'Sarah Lane'.

RE: CCN: 245629
Cycle Start Date: April 3, 2024

Dear Administrator:

On April 3, 2024, a survey was completed at your facility by the Minnesota Departments of Health and Public Safety, to determine if your facility was in compliance with Federal participation requirements for skilled nursing facilities and/or nursing facilities participating in the Medicare and/or Medicaid programs.

This survey found the most serious deficiencies in your facility to be widespread deficiencies that constituted no actual harm with potential for more than minimal harm that was not immediate jeopardy (Level F), as evidenced by the electronically attached CMS-2567 whereby corrections are required.

ELECTRONIC PLAN OF CORRECTION (ePoC)

Within **ten (10) calendar days** after your receipt of this notice, you must submit an acceptable ePOC for the deficiencies cited. An acceptable ePOC will serve as your allegation of compliance. Upon receipt of an acceptable ePOC, we will authorize a revisit to your facility to determine if substantial compliance has been achieved.

To be acceptable, a provider's ePOC must include the following:

- How corrective action will be accomplished for those residents found to have been affected by the deficient practice.
- How the facility will identify other residents having the potential to be affected by the same deficient practice.
- What measures will be put into place, or systemic changes made, to ensure that the deficient practice will not recur.
- How the facility will monitor its corrective actions to ensure that the deficient practice is being corrected and will not recur.
- The date that each deficiency will be corrected.
- An electronic acknowledgement signature and date by an official facility representative.

The Villas At Osseo LLC

April 17, 2024

Page 2

The state agency may, in lieu of an onsite revisit, determine correction and compliance by accepting the facility's ePoC if the ePoC is reasonable, addresses the problem and provides evidence that the corrective action has occurred.

If an acceptable ePoC is not received within 10 calendar days from the receipt of this letter, we will recommend to the CMS Region V Office that one or more of the following remedies be imposed:

- Denial of payment for new Medicare and Medicaid admissions (42 CFR 488.417);
- Civil money penalty (42 CFR 488.430 through 488.444).
- Termination of your facility's Medicare and/or Medicaid agreement (488.456(b)).

DEPARTMENT CONTACT

Questions regarding this letter and all documents submitted as a response to the resident care deficiencies (those preceded by an "F" and/or an "E" tag), i.e., the plan of correction should be directed to:

Susie Haben, Regional Operations Supervisor, Rapid Response

Licensing and Certification Program

Health Regulation Division

Minnesota Department of Health

Midtown Square

3333 Division Street, Suite 212

Saint Cloud, Minnesota 56301-4557

Email: susie.haben@state.mn.us

Office: (320) 223-7356 Mobile: (651) 230-2334

PRESUMPTION OF COMPLIANCE - CREDIBLE ALLEGATION OF COMPLIANCE

The facility's ePoC will serve as your allegation of compliance upon the Department's acceptance. In order for your allegation of compliance to be acceptable to the Department, the ePoC must meet the criteria listed in the plan of correction section above. You will be notified by the Minnesota Department of Health, Licensing and Certification Program staff and/or the Department of Public Safety, State Fire Marshal Division staff, if your ePoC for the respective deficiencies (if any) is acceptable.

VERIFICATION OF SUBSTANTIAL COMPLIANCE

Upon receipt of an acceptable ePoC, a Post Certification Revisit (PCR), of your facility will be conducted to validate that substantial compliance with the regulations has been attained in accordance with your verification.

If substantial compliance has been achieved, certification of your facility in the Medicare and/or Medicaid program(s) will be continued and remedies will not be imposed. Compliance is certified as of

the latest correction date on the approved ePoC, unless it is determined that either correction actually occurred between the latest correction date on the ePoC and the date of the first revisit, or correction occurred sooner than the latest correction date on the ePoC.

FAILURE TO ACHIEVE SUBSTANTIAL COMPLIANCE BY THE THIRD OR SIXTH MONTH AFTER THE LAST DAY OF THE SURVEY

If substantial compliance with the regulations is not verified by July 3, 2024 (three months after the identification of noncompliance), the CMS Region V Office must deny payment for new admissions as mandated by the Social Security Act (the Act) at Sections 1819(h)(2)(D) and 1919(h)(2)(C) and Federal regulations at 42 CFR Section 488.417(b).

In addition, if substantial compliance with the regulations is not verified by October 3, 2024 (six months after the identification of noncompliance) your provider agreement will be terminated. This action is mandated by the Social Security Act at Sections 1819(h)(2)(C) and 1919(h)(3)(D) and Federal regulations at 42 CFR Sections 488.412 and 488.456.

Please note that this notice does not constitute formal notice of imposition of alternative remedies or termination of your provider agreement. Should the Centers for Medicare & Medicaid Services determine that termination or any other remedy is warranted, it will provide you with a separate formal notification of that determination.

INFORMAL DISPUTE RESOLUTION (IDR) / INDEPENDENT INFORMAL DISPUTE RESOLUTION (IIDR)

In accordance with 42 CFR 488.331, you have one opportunity to question cited deficiencies through an informal dispute resolution process. You are required to send your written request, along with the specific deficiencies being disputed, and an explanation of why you are disputing those deficiencies, to:

Nursing Home Informal Dispute Process
Minnesota Department of Health
Health Regulation Division
P.O. Box 64900
St. Paul, Minnesota 55164-0900

This request must be sent within the same ten days you have for submitting an ePoC for the cited deficiencies. All requests for an IDR or IIDR of federal deficiencies must be submitted via the web at: https://mdhprovidercontent.web.health.state.mn.us/lrc_idr.cfm

You must notify MDH at this website of your request for an IDR or IIDR within the 10 calendar day period allotted for submitting an acceptable electronic plan of correction. A copy of the Department's informal dispute resolution policies are posted on the MDH Information Bulletin website at: https://www.health.state.mn.us/facilities/regulation/infobulletins/ib04_8.html

Please note that the failure to complete the informal dispute resolution process will not delay the dates specified for compliance or the imposition of remedies.

F 755	<p>Continued From page 7</p> <p>just lost a close friend and at times she would display such symptoms with new people.</p> <p>-At 11:09 a.m., the eMAR identified R11's 8:00 a.m. medications were past due. As LPN-D prepared the medications, R11 sat in her wheelchair by the cart. She stated she needed to go back to her room as she "need[ed] to breath." Her respirations were observed to be more rapid, and she was with furrowed brows. The DON, who sat at the nurse's station, brought R11 back to her room. Upon his return, he stated her oxygen saturation was 93 percent and her respirations were 20. In addition, he stated R11 had COPD and her orders were to keep saturations above 88 percent. When in the vicinity, the DON was not updated on the morning's medication pass status. LPN-D was unable to locate the Breo Ellipta despite an extensive search of the cart.</p> <p>-At 11:16 a.m., LPN-D approached R11 who sat in her doorway with oxygen on. She stated she needed a nebulizer as she "[was] fighting to breath." She was observed without signs/symptoms of respiratory distress. She asked LPN-D what the medications were that he handed her as they were not the medications she was supposed to get at that time. Once informed they were her 8:00 a.m. meds. She stated, "No wonder I am so confused," and injected the medications at 11:17 a.m. R11 was not administered the Breo Ellipta inhaler. As needed (PRN) Ipratropium-Albuterol inhaler was administered at 11:19 a.m.</p> <p>-At 11:26 a.m., the eMAR identified R20's 8:00 a.m. scheduled medications were past due. See F760 for insulin details. LPN-D explained, when he approached R20 earlier that morning, she</p>	F 755

F 755	<p>Continued From page 8</p> <p>declined her medications, and since then lacked the time to reapproach her. As he prepared R20's medications, R20 approached the cart. Once prepped, he administered the medications.</p> <p>-Around 12:39 p.m., LPN-D stated a past due medication was anything administered one hour past the eMAR scheduled time. In these situations, he was expected to contact the provider, and/or the unit manager, and follow any provided order directions. He denied he completed these updates, and he stated, "The moment I sit down and have some time I will call the provider and update them."</p> <p>Progress notes for R10, R11, R13, R16, and R20 lacked evidence LPN-D communicated with the provider prior to administration of the past due medications for additional orders, or that R11 and R13 had omitted medications.</p> <p>During observation on 4/2/24 at 1:02 p.m., LPN-C was approached. The eMAR screen identified R2 and R5's 12:00 p.m. medications were past due. She stated she was supposed to have already given R2 his medications; however, another resident required her attention and R5 wanted to wait for lunch before she took her medication. LPN-C was unsure if, or when, R5 ate lunch. She denied she updated the unit manager or the provider.</p> <p>During interview on 4/2/24 at 1:34 p.m., LPN-A stated she expected timely administration as ordered, and/or setup, which meant within one hour before or one hour after the scheduled eMAR time frame. If it was outside of this hour, she expected staff obtained assistance and updated the provider if the past due medication</p>	F 755

F 755	<p>Continued From page 9</p> <p>centered around certain medication classes, such as antiseizure, cardiac, warfarin (anticoagulant), due to risks of "something bad could happen," or the resident could experience upset stomach, irritable belly issues, or decreased absorption if not given with meals. In addition, she expressed concerns centered around one dose being too close to the next which increased the relevance of provider contact. Challenges with the first-floor med passes were known due to staffing changes that occurred a few weeks ago, and the floor being "very heavy" in nurse workload. She denied participation in any recent med pass audits. LPN-A updated R20's provider after LPN-D updated her; however, denied knowledge of any additional concerns that morning. Once the morning observations were discussed, she exclaimed, "Oh my gosh! That is a lot. I think we need to look at this med pass." She expected the provider to be updated in all the situations due to potential concerns expressed earlier and considered all these situations medication errors due to omission and timeliness. She explained when staff became aware of resident preferences, such as R20's wake time, she expected provider updates to assist with potential med adjustments to accommodate.</p> <p>When interviewed on 4/2/24 at 4:25 p.m., the DON stated he expected medications to be administered as ordered. The typical one hour before or one hour after administration window applied to most medications; however, anything outside of this and a specific scheduled range (i.e., with meals, before meals, etc.) was considered late, and thus a medication error, and he expected the provider, the unit manager, and himself to be updated "right away." In addition, he explained staff were expected to update the</p>	F 755

F 760	<p>Continued From page 14</p> <p>Insulin was identified as a past due medication. He explained R15 had yet to eat when he first reviewed the eMAR earlier that morning, and stated, "I should be doing it right now." He started to prepare the Lispro insulin and indicated R15's blood sugar (BS) was 188 at 7:45 a.m. Per R15's sliding scale order, he dialed up 8 units. He entered R15's room, explained to her he had her insulin, and administered the insulin at 9:40 a.m. (approximately 2 hours after the BS check). LPN-D did not question R15 on her breakfast intake status, nor did he recheck her BS. R15's room lacked evidence of a breakfast tray or used dishes; however, there was a full glass of darker colored liquid on her bed side tray table. Before leaving R15's room, the surveyor questioned R15 on her breakfast status. She stated she did not eat solid food for breakfast and only drank juice. She was unable to identify exactly when she drank her breakfast juice or how much she consumed. She explained she typically was administered her insulin between 8:00 a.m. and 9:00 a.m. "depending on when I get my food."</p> <p>-At 9:51 a.m., LPN-D reviewed R18's eMAR and stated she needed her morning insulin. He indicated R18's BS around 7:45 a.m. was 271 and explained the insulin administration was late as R18's breakfast was not yet delivered at 7:45 a.m., and he became too busy to follow-up on R18's breakfast status. Based on her scheduled and sliding scale Humalog insulin, and scheduled Lantus, he prepared 18 units of Humalog and 66 units of Lantus. He entered R15's room, explained he had her insulin, and administered both insulins at 10:00 a.m. (approximately 2 hours after the BS check). LPN-D did not question R15 on her breakfast intake status, nor did he recheck her BS. A covered food tray was</p>	F 760

F 760	<p>Continued From page 15</p> <p>located on R15's tray table and a covered plate was located on a surface just inside her door. Both plates contained untouched breakfast foods. Immediately after LPN-D exited the room, R15 was interviewed. She stated she did not like the main breakfast and requested an alternative (the plate by the door). She had yet to eat; however, she identified she ate some oatmeal around "8:45 [a.m.] or so," which she enjoyed each morning. This typically was not enough to "carry" her over until lunch and thus she also ate the provided breakfast. She was unsure when she would get to the meal in her room as there were other tasks she wished to do first. R15 stated typically she received her morning insulin between 8:30 a.m. and 8:45 a.m., however, there were times when the insulin was late. She explained 10:00 a.m. was "very late." She stated her BS's were typically higher in the morning but when she received late insulin " ...it messes up the time frame with my lunch time insulin and my [BS] numbers. If I get [the insulin] consistently then my numbers seem to be a little bit better." Despite this, she denied signs and/or symptoms of hypo/hyperglycemia (low/high BS) but commented that because she received her insulin late, and she was going to eat her breakfast late, her noon BS was going to be high.</p> <p>-Between R15's insulin administration at 10:00 a.m., until 10:50 a.m., LPN-D continued to prepare and administer oral medications to the residents identified as past due.</p> <p>-At 10:50 a.m., LPN-D was interviewed while he waited for staff to exit a resident's room that required prepped oral medications. He stated he was "super behind" as he was the only nurse on that unit, and he was responsible for 25 residents.</p>	F 760

In addition, she expressed concerns centered around one dose of insulin too close to the next that increased the relevance of provider contact. Challenges with the first-floor med passes were known due to staffing changes that occurred a few weeks ago and the floor being "very heavy" in nurse workload. She denied participation in any recent med pass audits. LPN-A updated R20's provider after LPN-D updated her on R20's insulin administration; however, denied knowledge of any additional specific medication concerns that morning. Once the mornings observations were discussed, she exclaimed, "Oh my gosh! That is a lot. I think we need to look at this med pass." She expected the provider to be updated in all three insulin situations due to potential concerns expressed earlier and considered all these situations medication errors due to omission and timeliness. In addition, she explained R15 preferred oatmeal and juice for breakfast versus a full breakfast and R20 was not always cooperative with her insulin orders. Based on this knowledge, the provider was expected to be updated on their preferences and insulin compliance to assist with potential med adjustments when staff became aware of such details.</p> <p>When interviewed on 4/2/24 at 4:25 p.m., the DON stated he expected insulin to be administered as ordered. The typical one hour before or one hour after administration window did not apply to insulin as this was a "very serious medication." Anything outside of the scheduled range (i.e., with meals, before meals, etc.) was considered late, and thus a medication error, and he expected the provider, the unit manager, and himself to be updated "right away." In addition, he explained staff were expected to update the</p>	F 760

F 760	<p>Continued From page 19</p> <p>provider when they became aware of resident preferences and/or compliance with any medication to adjust the plan of care as there were risks that potentially led to BS spikes, DM complications, and/or hospitalization. The DON identified LPN-D failed to update him that morning of concerns; however, he was updated after the fact. R15, R18, and R20 insulin administration was discussed. The DON was unaware of the degree of lateness and stated in all three instances the provider was expected to be updated and monitoring set up for potential concerns, especially for R18 as both the morning and noon doses could act together and decrease her BS significantly.</p> <p>During interview on 4/3/24 at 11:10 a.m., LPN-E stated she was expected to follow the five rights of medication administration which included the right time and medications were able to be administered one hour before or one hour after the eMAR scheduled time. If this was unable to be followed, she was to update the supervisor, and the provider, due to potential impact(s). LPN-E was questioned on past due medication concerns. She explained R9 was scheduled at 11:30 a.m. for sliding scale Novolog based on his 11:34 a.m. BS of 174. At 1:54 p.m. (approximately 2.5 hours after BS), R9's Novolog was administered. LPN-E explained R9 was in therapy when the insulin was due and thus, she planned to administer it after therapy was completed, and he had eaten, as it was better to administer insulin "when food is around." She felt R9 ate lunch but did not confirm when he ate or how much he ate prior to administering the insulin. She denied she performed a follow-up BS before 1:54 p.m. and identified she did not update the supervisor, the provider, or the ongoing nurse</p>	F 760

F 760	<p>Continued From page 20</p> <p>during shift change. LPN-E reviewed R9's evening insulin administration and BS. His BS at 5:13 p.m. was 139 and at 5:22 p.m. he was administered 2 units of Humalog. This timing concerned her "a little bit" as it was " a little bit close" and could potentially result in his BS going "low."</p> <p>When interviewed on 4/3/24 at 11:45 a.m., registered nurse (RN)-A stated, as the unit manager, she expected staff followed insulin orders especially when insulin was expected to be administered with food. She was unaware on 4/2/24 of any late insulin administration from 4/2/24; however, she discovered potential concern when she ran a report this morning. She had yet to speak with the involved nurse and continued to investigate this. She expected if such events' occurred staff were to contact her or the provider right away due to concerns with hypoglycemia especially if one insulin dose was administered too close to another.</p> <p>During interview on 4/3/24 at 1:20 p.m., nurse practitioner (NP)-A stated she expected staff followed medication orders "to a T," which included insulin. She explained insulin was usually ordered to be administered prior to meals and thus was expected to be administered at such times, or at least when they were provided their meal. If there were situations that impacted such, she expected to be updated to review for potential medication and/or medication time adjustments. Related to R9, R15, R18, and R20, she stated she was not updated yesterday morning about their insulin; however, staff have since updated her and she worked with staff on potential adjustments. These resident's 4/2/24 insulin administration observations were</p>	F 760

F 760	<p>Continued From page 21</p> <p>discussed. NP-A expressed minimal concerns related to the administration timing and R20's morning omission. Her concerns revolved more around staff's lack of provider updates. She explained, based on her current knowledge, these residents were free of any adverse impacts related to the events on 4/2/24.</p> <p>When interviewed on 4/3/24 at 3:49 p.m., consulting pharmacist (CP) stated standard insulin administration processes were expected to have a BS check and insulin administration within approximately 15 minutes, or as close to the meal as possible: "They are usually done together," but could be administered up to 30 minutes on either end of the meal. This helped to regulate the BS in relation to the meal, thus, staff would need to know when the resident last ate if the resident was provided insulin after the meal. If such processes were unable to be completed, she expected staff to update the provider to assist in BS management. If an insulin were scheduled with a meal and the meal were to be delayed, clinically and practically, the insulin would also be delayed reflecting the meal timing. Depending on how delayed, and based on when the BS was checked, a recheck of the BS would potentially be required to appropriately dose the sliding scale units. Fast acting insulin provided too close to each other was concerning; however, ensuring food was provided with the insulin was more prominent due to the risk of hypoglycemia and/or the resident's medical status and history. Prior to yesterday, CP was unaware of any med pass concerns. She indicated a medication pass audit was completed "last summer; however, none since that she was aware of. R9, R15, R18, and R20's insulin observations were discussed. She expressed these were not ideal situations and</p>	F 760

Re: State Nursing Home Licensing Orders
Event ID: VI2311

Dear Administrator:

The above facility was surveyed on April 1, 2024 through April 3, 2024 for the purpose of assessing compliance with Minnesota Department of Health Nursing Home Rules and Statutes. At the time of the survey, the survey team from the Minnesota Department of Health - Health Regulation Division noted one or more violations of these rules or statutes that are issued in accordance with Minn. Stat. § 144.653 and/or Minn. Stat. § 144A.10. If, upon reinspection, it is found that the deficiency or deficiencies cited herein are not corrected, a civil fine for each deficiency not corrected shall be assessed in accordance with a schedule of fines promulgated by rule and/or statute of the Minnesota Department of Health.

To assist in complying with the correction order(s), a "suggested method of correction" has been added. This provision is being suggested as one method that you can follow to correct the cited deficiency. Please remember that this provision is only a suggestion and you are not required to follow it. Failure to follow the suggested method will not result in the issuance of a penalty assessment. You are reminded, however, that regardless of the method used, correction of the order within the established time frame is required. The "suggested method of correction" is for your information and assistance only.

You have agreed to participate in the electronic receipt of State licensure orders consistent with the Minnesota Department of Health Informational Bulletin 14-01, available at https://www.health.state.mn.us/facilities/regulation/infobulletins/ib04_8.html. The State licensing orders are delineated on the Minnesota Department of Health State Form and are being delivered to you electronically. The Minnesota Department of Health is documenting the State Licensing Correction Orders using federal software. Tag numbers have been assigned to Minnesota state statutes/rules for Nursing Homes.

The assigned tag number appears in the far left column entitled "ID Prefix Tag." The state statute/rule number and the corresponding text of the state statute/rule out of compliance is listed in the "Summary Statement of Deficiencies" column and replaces the "To Comply" portion of the correction order. This column also includes the findings that are in violation of the state statute or rule after the statement, "This MN Requirement is not met as evidenced by." Following the surveyors findings are the Suggested Method of Correction and the Time Period For Correction.

The Villas At Osseo LLC

April 17, 2024

Page 2

PLEASE DISREGARD THE HEADING OF THE FOURTH COLUMN WHICH STATES, "PROVIDER'S PLAN OF CORRECTION." THIS APPLIES TO FEDERAL DEFICIENCIES ONLY. THIS WILL APPEAR ON EACH PAGE.

THERE IS NO REQUIREMENT TO SUBMIT A PLAN OF CORRECTION FOR VIOLATIONS OF MINNESOTA STATE STATUTES/RULES.

Although no plan of correction is necessary for State Statutes/Rules, please enter the word "corrected" in the box available for text. You must then indicate in the electronic State licensure process, under the heading completion date, the date your orders will be corrected prior to electronically submitting to the Minnesota Department of Health. We urge you to review these orders carefully, item by item, and if you find that any of the orders are not in accordance with your understanding at the time of the exit conference following the survey, you should immediately contact:

Susie Haben, Regional Operations Supervisor, Rapid Response

Licensing and Certification Program

21545	<p>Continued From page 6</p> <p>(eMAR) main screen was open and identified red colored resident specific rectangular boxes. LPN-D identified the boxes indicated past due medications. The eMAR identified seven residents were past due for their morning medication(s). The following events occurred:</p> <p>-From 9:35 a.m. to 9:40 a.m., LPN-D prepared and administered insulin to a resident. See F760.</p> <p>-At 9:43 a.m., the eMAR identified all R16's 8:00 a.m. medications were past due. LPN-D started to prepare; however, was unable to locate the oxybutynin. Due to this, he did not administer R16 the medications at that time and proceeded onto the next resident.</p> <p>-From 9:51 a.m. to 10:00 a.m., LPN-D prepared and administered insulin to a resident. See F760.</p> <p>On 4/2/24 at 10:16 a.m., LPN-C, the second-floor nurse, was asked to display her eMAR screen. The screen identified R7 and R21's 8:00 a.m. oral medications were past due. LPN-C explained R7 informed her he was not ready for them when she initially approached him earlier that morning. He wished to sleep longer. She reapproached him once without success and she planned to reapproach him again in approximately another half hour. LPN-C stated R21 declined her morning medications until she was up for the day, at which time she would take them. R21 typically got up around 11:30 a.m. LPN-C explained she was expected to follow the five rights of medication administration and was allowed one hour or one hour after the scheduled time before a medication was considered late; however, she was also expected to follow the doctor order. If a medication was directed to be given in the morning, which meant from 8:00 a.m. to 10:00</p>	21545

21545	<p>Continued From page 8</p> <p>classification, there were potential risks of past due administration, and thus he was expected to update the manager in these situations. He denied such an update and stated, "It is obvious I am behind ...someone should know." [Numerous times during the observed medication pass, the unit manager (LPN-A), the director of nursing (DON), and the administrator, walked past LPN-D.] He identified risk factors such as increased pain, drug interactions, decreased absorption, and/or gastrointestinal upset.</p> <p>-At 10:58 a.m., LPN-D reapproached R13's room. Cares continued and he walked back to the cart.</p> <p>-At 11:03 a.m., as LPN-D walked toward R13's room, he walked past R11, who sat in her doorway. She asked about her medications. He informed her he was "late", but he would return to her soon and continued to R13's room. He informed R13 he was "late" when he approached her and administered the medications at 11:03 a.m. He updated her as soon as the ordered eye drop came in, he would administer it. The Linzess and the Flovent were not administered or discussed with her. R11 was not interviewed after as she started to cry and sob. LPN-D stated she just lost a close friend and at times she would display such symptoms with new people.</p> <p>-At 11:09 a.m., the eMAR identified R11's 8:00 a.m. medications were past due. As LPN-D prepared the medications, R11 sat in her wheelchair by the cart. She stated she needed to go back to her room as she "need[ed] to breath." Her respirations were observed to be more rapid, and she was with furrowed brows. The DON, who sat at the nurse's station, brought R11 back to her room. Upon his return, he stated her oxygen saturation was 93 percent and her respirations</p>	21545

21545	<p>Continued From page 9</p> <p>were 20. In addition, he stated R11 had COPD and her orders were to keep saturations above 88 percent. When in the vicinity, the DON was not updated on the morning's medication pass status. LPN-D was unable to locate the Breo Ellipta despite an extensive search of the cart.</p> <p>-At 11:16 a.m., LPN-D approached R11 who sat in her doorway with oxygen on. She stated she needed a nebulizer as she "[was] fighting to breath." She was observed without signs/symptoms of respiratory distress. She asked LPN-D what the medications were that he handed her as they were not the medications she was supposed to get at that time. Once informed they were her 8:00 a.m. meds. She stated, "No wonder I am so confused," and injected the medications at 11:17 a.m. R11 was not administered the Breo Ellipta inhaler. As needed (PRN) Ipratropium-Albuterol inhaler was administered at 11:19 a.m.</p> <p>-At 11:26 a.m., the eMAR identified R20's 8:00 a.m. scheduled medications were past due. See F760 for insulin details. LPN-D explained, when he approached R20 earlier that morning, she declined her medications, and since then lacked the time to reapproach her. As he prepared R20's medications, R20 approached the cart. Once prepped, he administered the medications.</p> <p>-Around 12:39 p.m., LPN-D stated a past due medication was anything administered one hour past the eMAR scheduled time. In these situations, he was expected to contact the provider, and/or the unit manager, and follow any provided order directions. He denied he completed these updates, and he stated, "The moment I sit down and have some time I will call the provider and update them."</p>	21545

21545	<p>Continued From page 10</p> <p>Progress notes for R10, R11, R13, R16, and R20 lacked evidence LPN-D communicated with the provider prior to administration of the past due medications for additional orders, or that R11 and R13 had omitted medications.</p> <p>During observation on 4/2/24 at 1:02 p.m., LPN-C was approached. The eMAR screen identified R2 and R5's 12:00 p.m. medications were past due. She stated she was supposed to have already given R2 his medications; however, another resident required her attention and R5 wanted to wait for lunch before she took her medication. LPN-C was unsure if, or when, R5 ate lunch. She denied she updated the unit manager or the provider.</p> <p>During interview on 4/2/24 at 1:34 p.m., LPN-A stated she expected timely administration as ordered, and/or setup, which meant within one hour before or one hour after the scheduled eMAR time frame. If it was outside of this hour, she expected staff obtained assistance and updated the provider if the past due medication centered around certain medication classes, such as antiseizure, cardiac, warfarin (anticoagulant), due to risks of "something bad could happen," or the resident could experience upset stomach, irritable belly issues, or decreased absorption if not given with meals. In addition, she expressed concerns centered around one dose being too close to the next which increased the relevance of provider contact. Challenges with the first-floor med passes were known due to staffing changes that occurred a few weeks ago, and the floor being "very heavy" in nurse workload. She denied participation in any recent med pass audits. LPN-A updated R20's provider after LPN-D updated her; however, denied knowledge of any</p>	21545

21545	<p>Continued From page 11</p> <p>additional concerns that morning. Once the morning observations were discussed, she exclaimed, "Oh my gosh! That is a lot. I think we need to look at this med pass." She expected the provider to be updated in all the situations due to potential concerns expressed earlier and considered all these situations medication errors due to omission and timeliness. She explained when staff became aware of resident preferences, such as R20's wake time, she expected provider updates to assist with potential med adjustments to accommodate.</p> <p>When interviewed on 4/2/24 at 4:25 p.m., the DON stated he expected medications to be administered as ordered. The typical one hour before or one hour after administration window applied to most medications; however, anything outside of this and a specific scheduled range (i.e., with meals, before meals, etc.) was considered late, and thus a medication error, and he expected the provider, the unit manager, and himself to be updated "right away." In addition, he explained staff were expected to update the provider when they became aware of resident preferences and/or compliance with any medication to adjust the plan of care as there were risks that potentially led to BS spikes, DM complications, and/or hospitalization. The DON identified LPN-D failed to update him that morning of concerns; however, he was updated after the fact. All residents identified were discussed. The DON was unaware of the degree of lateness and stated the provider was expected to be updated and monitoring set up for potential concerns when applicable based on the medication.</p> <p>During interview on 4/3/24 at 11:10 a.m., LPN-E stated she was expected to follow the five rights</p>	21545

If unable to be followed, she was to update the supervisor, and the provider, due to potential impact(s). LPN-E was questioned on past due medication concerns. She explained R19 was in therapy when her medication was due and thus, she planned to administer it after therapy was completed. She identified she did not update the supervisor or the provider. LPN-E reviewed R19's administration details and stated R19's 4/2/24 12:00 p.m. medication was administered at 1:53 p.m.</p> <p>During interview on 4/3/24 at 1:20 p.m., nurse practitioner (NP)-A stated she expected staff followed medication orders "to a T." If there were situations that impacted such, she expected to be updated to review for potential medication and/or medication time adjustments. She stated she was not updated yesterday morning about the identified residents; however, staff have since updated her and she worked with staff on potential adjustments. These resident's 4/2/24 administration observations were discussed. NP-A expressed minimal concerns related to the administration timing. Her concerns revolved more around staff's lack of provider updates. She explained, based on her current knowledge, these residents were free of any adverse impacts related to the events on 4/2/24.</p> <p>When interviewed on 4/3/24 at 3:49 p.m., consulting pharmacist (CP) stated she expected medications to be administered as ordered especially as medications ordered to be given with meals was best practice for absorption or gastrointestinal tolerance. 21545	<p>Continued From page 15</p> <p>first floor. The electronic medication administration record's (eMAR) main screen was open and identified red colored resident specific rectangular boxes. LPN-D identified the boxes indicated past due medications. The eMAR identified seven residents were past due for their morning medication(s). LPN-D denied any of the past due medications were insulin(s). The following events occurred:</p> <p>-At 9:35 a.m., LPN-D clicked on R15's red box. Insulin was identified as a past due medication. He explained R15 had yet to eat when he first reviewed the eMAR earlier that morning, and stated, "I should be doing it right now." He started to prepare the Lispro insulin and indicated R15's blood sugar (BS) was 188 at 7:45 a.m. Per R15's sliding scale order, he dialed up 8 units. He entered R15's room, explained to her he had her insulin, and administered the insulin at 9:40 a.m. (approximately 2 hours after the BS check). LPN-D did not question R15 on her breakfast intake status, nor did he recheck her BS. R15's room lacked evidence of a breakfast tray or used dishes; however, there was a full glass of darker colored liquid on her bed side tray table. Before leaving R15's room, the surveyor questioned R15 on her breakfast status. She stated she did not eat solid food for breakfast and only drank juice. She was unable to identify exactly when she drank her breakfast juice or how much she consumed. She explained she typically was administered her insulin between 8:00 a.m. and 9:00 a.m. "depending on when I get my food."</p> <p>-At 9:51 a.m., LPN-D reviewed R18's eMAR and stated she needed her morning insulin. He indicated R18's BS around 7:45 a.m. was 271 and explained the insulin administration was late as R18's breakfast was not yet delivered at 7:45</p>	21545

21545	<p>Continued From page 16</p> <p>a.m., and he became too busy to follow-up on R18's breakfast status. Based on her scheduled and sliding scale Humalog insulin, and scheduled Lantus, he prepared 18 units of Humalog and 66 units of Lantus. He entered R15's room, explained he had her insulin, and administered both insulins at 10:00 a.m. (approximately 2 hours after the BS check). LPN-D did not question R15 on her breakfast intake status, nor did he recheck her BS. A covered food tray was located on R15's tray table and a covered plate was located on a surface just inside her door. Both plates contained untouched breakfast foods. Immediately after LPN-D exited the room, R15 was interviewed. She stated she did not like the main breakfast and requested an alternative (the plate by the door). She had yet to eat; however, she identified she ate some oatmeal around "8:45 [a.m.] or so," which she enjoyed each morning. This typically was not enough to "carry" her over until lunch and thus she also ate the provided breakfast. She was unsure when she would get to the meal in her room as there were other tasks she wished to do first. R15 stated typically she received her morning insulin between 8:30 a.m. and 8:45 a.m., however, there were times when the insulin was late. She explained 10:00 a.m. was "very late." She stated her BS's were typically higher in the morning but when she received late insulin " ...it messes up the time frame with my lunch time insulin and my [BS] numbers. If I get [the insulin] consistently then my numbers seem to be a little bit better." Despite this, she denied signs and/or symptoms of hypo/hyperglycemia (low/high BS) but commented that because she received her insulin late, and she was going to eat her breakfast late, her noon BS was going to be high.</p> <p>-Between R15's insulin administration at 10:00</p>	21545

21545	<p>Continued From page 17</p> <p>a.m., until 10:50 a.m., LPN-D continued to prepare and administer oral medications to the residents identified as past due.</p> <p>-At 10:50 a.m., LPN-D was interviewed while he waited for staff to exit a resident's room that required prepped oral medications. He stated he was "super behind" as he was the only nurse on that unit, and he was responsible for 25 residents. He denied prior past due insulin administrations. He explained there were a lot of BS and insulin orders, and he was expected to administer the insulin within 30 minutes in either direction of the administration directed time. In addition, he was expected to follow the five rights of medication administration, in which one of them was the right time. He stated, if an insulin was administered past the expected time, there was a risk of hypo/hyperglycemia and thus he was also expected to update the manager in these situations. He denied such an update and stated, "It is obvious I am behind ...someone should know." [Numerous times during the observed medication pass, the unit manager (LPN-A), the director of nursing (DON), and the administrator, walked past LPN-D.]</p> <p>-Between 11:03 a.m., until 11:26 a.m., LPN-D continued to prepare and administer oral medications to the residents identified as past due.</p> <p>-At 11:26 a.m., the eMAR identified R20's 7:30 a.m. scheduled Humalog insulin, and 8:00 a.m. BS, along with her 8:00 a.m. oral medications, were past due. LPN-D explained, when he approached R20 earlier this morning, she declined her BS check, along with her medications, and since then lacked the time to reapproach her. As he prepared R20's</p>	21545

21545	<p>Continued From page 18</p> <p>medications, R20 approached the cart. Medications were administered, and BS at 11:41 a.m. was 145. He instructed R20 to return to her room and he would bring her insulin to her. He did not question R20 on her breakfast or lunch intake status. R20 wheeled herself toward her room. LPN-D initially was unable to locate the insulin. At 11:55 a.m., he returned to the cart with the insulin and prepared it. At 11:58 a.m., he entered R20's room; however, she was in the bathroom, and he exited her room without conversing with her. At 12:08 p.m., 12:16 p.m., and 12:20 p.m., she continued to be in the bathroom and LPN-D did not converse with her. At 12:39 p.m., R20 was administered the Humalog. LPN-D documented the administered insulin for the 11:30 a.m.'s scheduled insulin timeframe and explained he did not want to give R20 "double." He explained, because of this, R20's morning insulin was omitted. LPN-D stated a past due medication, which included insulin, was anything administered one hour past the eMAR scheduled time. In these situations, he was expected to contact the provider, and/or the unit manager, and follow any provided order directions. He denied he completed these updates, and he stated, "The moment I sit down and have some time I will call the provider and update them."</p> <p>Progress notes for R9, R15, R18, and R20 lacked evidence LPN-D communicated with the provider prior to administration of the past due insulin for additional orders, or that R20's morning insulin was omitted.</p> <p>During interview on 4/2/24 at 1:34 p.m., LPN-A stated she expected medications were administered timely as ordered, and/or setup, which meant within one hour before or one hour</p>	21545

21545	<p>Continued From page 19</p> <p>after the scheduled eMAR time frame. If outside of this, she expected staff obtained assistance, rechecked BSs closer to the time of administration, and updated the provider if the past due medication centered around certain medication classes, such as insulin, due to the risk of hypo/hyperglycemia that potentially led to "dangerous" BS levels. In addition, she expressed concerns centered around one dose of insulin too close to the next that increased the relevance of provider contact. Challenges with the first-floor med passes were known due to staffing changes that occurred a few weeks ago and the floor being "very heavy" in nurse workload. She denied participation in any recent med pass audits. LPN-A updated R20's provider after LPN-D updated her on R20's insulin administration; however, denied knowledge of any additional specific medication concerns that morning. Once the mornings observations were discussed, she exclaimed, "Oh my gosh! That is a lot. I think we need to look at this med pass." She expected the provider to be updated in all three insulin situations due to potential concerns expressed earlier and considered all these situations medication errors due to omission and timeliness. In addition, she explained R15 preferred oatmeal and juice for breakfast versus a full breakfast and R20 was not always cooperative with her insulin orders. Based on this knowledge, the provider was expected to be updated on their preferences and insulin compliance to assist with potential med adjustments when staff became aware of such details.</p> <p>When interviewed on 4/2/24 at 4:25 p.m., the DON stated he expected insulin to be administered as ordered. The typical one hour before or one hour after administration window did not apply to insulin as this was a "very serious</p>	21545

21545	<p>Continued From page 20</p> <p>medication." Anything outside of the scheduled range (i.e., with meals, before meals, etc.) was considered late, and thus a medication error, and he expected the provider, the unit manager, and himself to be updated "right away." In addition, he explained staff were expected to update the provider when they became aware of resident preferences and/or compliance with any medication to adjust the plan of care as there were risks that potentially led to BS spikes, DM complications, and/or hospitalization. The DON identified LPN-D failed to update him that morning of concerns; however, he was updated after the fact. R15, R18, and R20 insulin administration was discussed. The DON was unaware of the degree of lateness and stated in all three instances the provider was expected to be updated and monitoring set up for potential concerns, especially for R18 as both the morning and noon doses could act together and decrease her BS significantly.</p> <p>During interview on 4/3/24 at 11:10 a.m., LPN-E stated she was expected to follow the five rights of medication administration which included the right time and medications were able to be administered one hour before or one hour after the eMAR scheduled time. If this was unable to be followed, she was to update the supervisor, and the provider, due to potential impact(s). LPN-E was questioned on past due medication concerns. She explained R9 was scheduled at 11:30 a.m. for sliding scale Novolog based on his 11:34 a.m. BS of 174. At 1:54 p.m. (approximately 2.5 hours after BS), R9's Novolog was administered. LPN-E explained R9 was in therapy when the insulin was due and thus, she planned to administer it after therapy was completed, and he had eaten, as it was better to administer insulin "when food is around." She felt</p>	21545

21545	<p>Continued From page 21</p> <p>R9 ate lunch but did not confirm when he ate or how much he ate prior to administering the insulin. She denied she performed a follow-up BS before 1:54 p.m. and identified she did not update the supervisor, the provider, or the ongoing nurse during shift change. LPN-E reviewed R9's evening insulin administration and BS. His BS at 5:13 p.m. was 139 and at 5:22 p.m. he was administered 2 units of Humalog. This timing concerned her "a little bit" as it was " a little bit close" and could potentially result in his BS going "low."</p> <p>When interviewed on 4/3/24 at 11:45 a.m., registered nurse (RN)-A stated, as the unit manager, she expected staff followed insulin orders especially when insulin was expected to be administered with food. She was unaware on 4/2/24 of any late insulin administration from 4/2/24; however, she discovered potential concern when she ran a report this morning. She had yet to speak with the involved nurse and continued to investigate this. She expected if such events' occurred staff were to contact her or the provider right away due to concerns with hypoglycemia especially if one insulin dose was administered too close to another.</p> <p>During interview on 4/3/24 at 1:20 p.m., nurse practitioner (NP)-A stated she expected staff followed medication orders "to a T," which included insulin. She explained insulin was usually ordered to be administered prior to meals and thus was expected to be administered at such times, or at least when they were provided their meal. If there were situations that impacted such, she expected to be updated to review for potential medication and/or medication time adjustments. Related to R9, R15, R18, and R20, she stated she was not updated yesterday</p>	21545

21545	<p>Continued From page 22</p> <p>morning about their insulin; however, staff have since updated her and she worked with staff on potential adjustments. These resident's 4/2/24 insulin administration observations were discussed. NP-A expressed minimal concerns related to the administration timing and R20's morning omission. Her concerns revolved more around staff's lack of provider updates. She explained, based on her current knowledge, these residents were free of any adverse impacts related to the events on 4/2/24.</p> <p>When interviewed on 4/3/24 at 3:49 p.m., consulting pharmacist (CP) stated standard insulin administration processes were expected to have a BS check and insulin administration within approximately 15 minutes, or as close to the meal as possible: "They are usually done together," but could be administered up to 30 minutes on either end of the meal. This helped to regulate the BS in relation to the meal, thus, staff would need to know when the resident last ate if the resident was provided insulin after the meal. If such processes were unable to be completed, she expected staff to update the provider to assist in BS management. If an insulin were scheduled with a meal and the meal were to be delayed, clinically and practically, the insulin would also be delayed reflecting the meal timing. Depending on how delayed, and based on when the BS was checked, a recheck of the BS would potentially be required to appropriately dose the sliding scale units. Fast acting insulin provided too close to each other was concerning; however, ensuring food was provided with the insulin was more prominent due to the risk of hypoglycemia and/or the resident's medical status and history. Prior to yesterday, CP was unaware of any med pass concerns. She indicated a medication pass audit was completed "last summer; however, none</p>	21545
