Next to the keypad a piece of paper taped to the wall had 4 numbers written on it. Written instructed indicated the numbers should be entered backwards to unlock the door. The investigator entered the 4-digit code backwards as instructed and the door unlocked.</p> <p>During observation on August 22, 2023, at 10:00 a.m., a [unknown] resident walked down the hallway in the locked unit and was attempting to open the locked door. The resident did not attempt to use the keypad and turned around and walked down the hallway.</p> <p>On August 22, 2023, at 12:00 p.m., licensed assisted living director (LALD)-A stated a section of the building was designated as the "care suite." The care suite doors to enter and exit were locked. However, the key code was written on a piece of paper next to the keypads, so the unit wasn't considered a locked unit because residents could enter the code to come and go from the care suite area. LALD-A stated she was told corporate leadership applied for an assisted living with dementia care license and the goal was to open the locked dementia care unit by November 1, 2023, after they were able to hire and train dedicated staff. LALD-A stated not all of the residents in the care suite were able to enter the code to exit the locked door.</p> <p>A review of the facility's application, dated March 16, 2023, indicated the assisted living license category applied for was assisted living, with no request for dementia care, and indicated a total licensed resident capacity of 97.</p> <p>The facility policy titled Assisted Living License</p>	0 115
