

**EBS Work Group
Meeting 3 Handout M
09/24/2009**

Services / Evidence Grid (ILLUSTRATIVE - NOT A RECOMMENDATION OF THE WORK GROUP)

<--- EVIDENCE ? --->

	Solid scientific studies	Uncertain	Poor evidence
Acute	- Coordination of care post hospital discharge		- Spinal fusion surgery
Emergency			
Preventative	- Screening for cervical cancer in women who have been sexually active	- routine use of new technologies to screen for cervical cancer	- routine screening women older than age 65 for cervical cancer if they have had adequate recent screening with normal Pap smears and are not otherwise at high risk
	- clinicians ask all adults about tobacco use and provide tobacco cessation interventions for those who use tobacco products	- screening adults for glaucoma	- routine screening for testicular cancer in asymptomatic adolescent and adult males
	- Dental prevention / basic		- Routine Ovarian cancer screenings
	- Colon cancer screenings		- Whole Body CT for screening
Chronic	- Diabete maintenance		- Arthroscopic knee surgery for osteoarthritis
Disabling			
Palliative			
End-of-Life	- Allowing a member to chose hospice		- Extraordinary interventions at very high costs with minimal evidence and minimal expected quality life gained
Elective	- Dentures		
Lifestyle	- Viagra		- Scanning solely to determine sex
