City, State Zip

Dear \_\_\_\_\_:

We recently received a report that your child or the child under your care was treated at a Minnesota hospital. During that visit, a doctor or nurse may have mentioned a concussion, or head or brain injury. I am sending this letter to share some free resources.

The Minnesota Department of Health sends information to everyone who has been hospitalized with a concussion, or head or brain injury to let them know about available programs and services.

Inside this envelope, you will find materials relating to your child's injury. For more information or help, please contact any of the agencies or organizations directly, or fill out the enclosed blue response form and return it to the health department in the postage paid envelope. **You can also visit our website at: <http://www.health.state.mn.us/injury/topic/tbi/>**

The Brain Injury Alliance offers Resource Facilitation, a service where you and your child can access free help for living with a brain injury. **If you have not received a call offering assistance with this service, you can contact the Minnesota Brain Injury Alliance at (612) 378-2742 or (800)-669-6442.**

We hope that this information is useful to you and your family. At the Minnesota Department of Health, our goal is to strengthen communities by making sure that everyone has access to the care and resources they need.

Thank you.
