

## ASRH Designation 4.0 Site Visit Case Tracer Form

Hospital:	MDH Code (not medical record):
Arrival Date:	Transfer/Discharge Date:

Thrombolytic (2) (admitted thrombolytics if applicable)
  Endovascular (1)
  Hemorrhagic (1):

Process	Time	Timing Indicators	ASRH GOAL
Arrival Mode (EMS / Walk-In)			
EMS pre-notification (Y / N)			
Glucose obtained (Y / N)			
ED Arrival Time		Door Time:	
Last Known Well <u>Clock Time</u>		LKW to Door:	
Provider Evaluation		Door to Provider:	10 minutes
Stroke Code Activation		Door to Code:	15 minutes
Telestroke Activation		Door to Telestroke activation:	15 minutes
Telestroke Connection/Consultation Who activated telestroke?		Door to Telestroke connection:	20 minutes from activation time
CT Initiated		Door to CT:	25 minutes
CT Read		Door to CT read:	45 minutes
Transfer out of ED		Door to Transfer:	120 minutes
<b>IV Thrombolytic Therapy</b>		Door to Needle:	60 minutes
Weight obtained (method)			
Discussion of Risks and Benefits			
Double Check			
BP prior to thrombolytic			
Thrombolytic used: Tenecteplase (Y / N) Bolus time: Alteplase (Y / N) Bolus time: Infusion time: Flush time:			
Post-Thrombolytic Monitoring		VS 15 15 15 15 15 15 15 15 N 15 15 15 15 15 15 15 15	
<b>IV Thrombolytic Therapy Medical Record Documentation</b>			
Dysphagia Screen or NPO documented	Y / N		
NIHSS documented (whom)	Y / N		
Reason no thrombolytic documented	Y / N		
Considered disability for treatment	Y / N		
Considered for endovascular treatment	Y / N		

<b>Hemorrhagic Stroke Management</b>			
BP management with appropriate BP target implemented (if indicated)	Y / N / NA		
Reversal of anticoagulation for ICH (if available)	Y / N / NA		
Referral to hospital with neurosurgical capabilities (unless no aggressive tx desired)	Y / N / NA		
<b>Hemorrhagic Stroke Medical Record Documentation</b>			
Dysphagia Screen or NPO documented	Y / N		
NIHSS documented (whom)	Y / N
