

# READY FOR TAKEOFF?

## Lay the groundwork for a smooth trip.

### Know before you go.

There may be entry and exit requirements or recommendations, which could include COVID-19 testing, masks, and vaccination. Ask your doctor about other vaccines you might need.

### Bring your COVID-19 documents.

Keep your COVID-19 test results and proof of vaccination with you in case you need them.

### Have a back-up plan.

You or people traveling with you may not be able to travel as planned if you get sick. Think about what you will do if your travel is delayed.
