

Waterbody-specific Fish Consumption Guidelines: Rivers

UPDATED: APRIL 2025

Waterbody-specific guidelines provide advice for lakes, rivers, and Lake Superior where fish have been tested for contaminants. These are the waterbody-specific guidelines for creeks, streams, and rivers. Not all waters in Minnesota have been tested for contaminants in fish. Fish consumption guidelines are provided for two group of people:

- **Sensitive populations:** including women, girls, and people age 15 and older who may become pregnant, people who are pregnant, people who are breastfeeding or plan to breastfeed, and children under age 15; and
- **General populations:** people not planning to become pregnant, including boys and men age 15 and older

Guidelines for servings of fish by waterbody, county, and species

BATTLE CREEK, WASHINGTON CO.

POPULATIONS	SPECIES	2 SERVINGS / WEEK	1 SERVING / WEEK	1 SERVING / MONTH	DO NOT EAT	CONTAMINANTS
