Manganese

SAMPLE COLLECTION PROCEDURE

Reference Methods EPA 200.8

Read instructions carefully.
Samples may be rejected if ALL instructions are not followed.

- Safety concerns:
  - Caution! Sample bottles contain chemicals. Open containers slowly and carefully. Do not rinse out containers.
    - View Safety Data Sheets [https://www.health.state.mn.us/communities/environment/envlab/sdsinformation.html]

- Sample bottle/preservative:
  - Manganese (Metals): 250 mL bottle and 2.5 mL of 20% Nitric Acid (HNO₃) preservative

- Shipping:
  - Ship within 3 days.

- Sample location:
  - Sample at the first sample tap following treatment (treated water).

Sample collection procedure:

1. Attach the pre-printed label to the bottle. If you do not have a pre-printed label, write the following information, using a ballpoint or permanent pen, on the generic bottle label: PWSID, PWS Name, and Location ID.
2. Remove any attachments from the sample tap.
3. Turn on the cold water tap and run for 4 to 5 minutes, or until the water temperature has stabilized, whichever is longer.
   a. If there is only one faucet handle, make sure it is in the cold water position.
4. Reduce the flow of the water so the stream is steady and the width of a pencil.
5. Remove bottle cap and hold in hand. Do not touch the underside of the cap or the inside of the bottle.
6. Fill bottle to the shoulder. **DO NOT** overfill the container.
7. Remove bottle from flow and add the nitric acid preservative.
8. Screw the cap back on the bottle. Make sure the cap is on securely. Turn the bottle upside down to make sure the water does not leak.
9. Gently mix the sample by turning the bottle back and forth for 15 seconds.
10. Replace any attachments that were removed from the faucet or sample tap.

**Complete the Chain-of-Custody form using a ballpoint or permanent pen:**

1. Name of the sample collector.
2. Date and Time collected (include a.m. or p.m.).
3. Field Number (if applicable).
4. Put your signature on the “Relinquished By” line, including date and time. The date and time are when the sample is put in the return mailer and sealed. If samples pass hands prior to packaging, both parties must sign, date, and time. The first party would put down the date and time of the transfer, and the second party would put down the date and time the sample is packaged.

**Deliver samples to the laboratory:**

1. If dropping off at the laboratory a physical hand-off is required.
2. Prepare package for shipping.
   a. Place the bottle, with pre-printed label attached, in the mailing container.
   b. Place completed Chain-of-Custody in the provided zip-lock bag and insert into the container.
3. Ship to the Public Health Laboratory:

   **If using courier service (Spee-dee, UPS, FedEx, etc.):**

   Minnesota Department of Health
   Public Health Laboratory
   Environmental Sample Receiving
   601 Robert Street North
   Saint Paul, MN 55155-2531
   
   **If using U.S. Postal Service – 1st Class:**

   Minnesota Department of Health
   Public Health Laboratory
   Environmental Sample Receiving
   P.O. Box 64899
   Saint Paul, MN 55164-0899
