Includes nonfatal, unduplicated Minnesota resident injury events admitted as inpatients to acute care Minnesota hospitals.
Includes any listed injury meeting the Safe States consensus definition for hospital discharge data injury surveillance, additionally excluding late effect diagnosis codes.
Cases with adverse effect or late effect first-listed E-codes are excluded. First-listed E-codes classified as 'Other Injury' or 'Unspecified' are included in total counts and rates only.
Rates per 100,000 population are annualized and age-adjusted to the U.S. 2000 standard population.
Ties extending more than one row beyond the tenth rank are not displayed individually.
