Source: *Hospital Discharge Data, Injury Prevention and Mental Health Division, Minnesota Department of Health, 2016-2025.*

**Counts of 1–4 are suppressed to protect patient privacy. If unsuppressed values are needed for program planning or resource allocation, submit a data request to health.drugodepi@state.mn.us.*

MDH receives approximately 95% of hospital discharge data. The data includes emergency department visits and inpatient hospitalizations for nonfatal drug overdose of unintentional or undetermined intent treated at hospitals in Minnesota or North Dakota.

Nonfatal stimulant overdoses are identified using ICD-10-CM diagnosis codes T40.5 and T43.6. A full list of included codes is available upon request.

It does not include nonfatal overdoses occurring in the community; those treated by EMS and not transferred to a hospital; or visits at federal facilities (e.g., VA, IHS), tribally operated facilities, or other out-of-state facilities. Nonfatal overdoses determined to be intentional (i.e., self-harm) are excluded.

Geography is based on the patient's residence zip code. The 7-county metro includes Anoka, Carver, Dakota, Hennepin, Ramsey, Scott, and Washington counties; Greater Minnesota includes all counties not part of the 7-county metro; Unknown County includes cases where the ZIP code is invalid or missing.
