

Social Vulnerability Index Scores for Minnesota Community Health Boards

FOUNDATIONAL PUBLIC HEALTH RESPONSIBILITIES GRANT (FPHR GRANT)

The Social Vulnerability Index (SVI) is a tool created by the Centers for Disease Control and Prevention (CDC) to identify socially vulnerable communities. CDC assigns each county an SVI of 0 to 1, with 0 being the lowest vulnerability and 1 being the highest.

The State Community Health Services Advisory Committee (SCHSAC) obtained 2022 SVI scores from the [CDC Agency for Toxic Substances and Disease Registry \(ATSDR\)](https://www.atsdr.cdc.gov/place-health/php/svi/svi-interactive-map.html) (<https://www.atsdr.cdc.gov/place-health/php/svi/svi-interactive-map.html>); this is the most current data. Community health boards receive a score based on their quartile ranking. Multi-county community health boards receive the score based on their highest SVI county.

For more information on the Foundational Public Health Responsibilities Grant (FPHR Grant) and how it uses SVI in its funding formula, visit: [Funding for Foundational Public Health Responsibilities \(FPHR Grant\)](https://www.health.state.mn.us/communities/practice/systemtransformation/foundationalfunding.html) (<https://www.health.state.mn.us/communities/practice/systemtransformation/foundationalfunding.html>).

Key

SVI ranking	Quartile	SVI score
0 - 0.25	Low	20
0.2501 - 0.5	Low Medium	40
0.5001 - 0.75	Medium High	60
0.7501 - 1.0	High	80

Scores

The table below is organized alphabetically by community health board. Member counties are nested below each multi-county community health board.

Community health board / county	SVI Score	SVI Ranking	Quartile
Aitkin-Itasca-Koochiching CHB	60	<i>n/a</i>	<i>n/a</i>
Aitkin	60	0.593	Medium High
Itasca	60	0.7093	Medium High
Koochiching	60	0.686	Medium High
Anoka	40	0.4767	Low Medium

Community health board / county	SVI Score	SVI Ranking	Quartile
Beltrami	80	1	High
