A HEALTHIER STATE OF MINNESOTA

BETTER HEALTH TOGETHER.

SHIP IS CREATING HEALTH IN YOUR COMMUNITIES

Statewide Health Improvement Partnership (SHIP) investments support community-driven solutions to expand opportunities for active living, healthy eating and commercial tobacco-free living, helping all people in Minnesota prevent chronic diseases including cancer, heart disease, stroke and type 2 diabetes. Ninety percent of the nation's health care costs are for people with chronic conditions, and the majority of those costs are preventable.

SHIP supports health across the lifespan

With a solid infrastructure and strong relationships in place, SHIP communities are well positioned to address emerging public health issues and continue creating better health across a lifespan.

Working together to support Scott County food shelves

The Food Shelf Networking Group provides a unique opportunity for food shelves in Scott County to collaborate and share best practices.

Scott County's Statewide Health Improvement Partnership (SHIP) facilitates the networking group and provides information about food access and food shelf management. The Food Shelf Networking Group has helped to break down silos between food shelves and move towards a collective approach to increasing access to healthy food.

Two food shelves, Belle Plaine Food Shelf and Peace Center, are partnering to improve their evaluation and tracking methods as a result of being a part of the Food Shelf Networking Group. While both Belle Plaine and Peace Center made strides to improve their food shelves to highlight and offer healthier options, gaps were still evident in their food tracking and evaluation systems.

With funding from SHIP, both food shelves implemented a food tracking software program called Pantry Saver. This software program has the ability to track produce tracking that integrates with a scale to track pounds. The tracking system allows the food shelf to better monitor and evaluate their changes made around healthy food options.

This year, through SHIP, both the Peace Center and Belle Plaine Food Shelf fully implemented Pantry Saver. The Peace Center has trained 29 volunteers to use and assist others with the software. The Belle Plaine Food Shelf has trained 40 volunteers. Historically they have only used paper documents and everything is now in one user-friendly database. The food shelf managers and volunteers are excited about the software and support from SHIP.

SHIP: LOCAL LEADERSHIP, LOCAL PARTNERS, LOCAL EXPERTISE

These community partners are leading SHIP activities in your communities.
