

## Data Brief: Suicide Rate Increased in 2021, 2022

In 2021, 808 Minnesotans died from suicide. Preliminary in-state data indicates at least 835 died in 2022. This translates to an age-adjusted rate of 13.9 and 14.3 per 100,000\*, respectively, the highest rates in the past several decades, behind 2019. All rates in this brief are per 100,000 and age-adjusted, where applicable. Data are from death certificates.

## **Suicide Rates Are Not Equal Across Groups**

Males had a higher suicide rate than females in 2021 and 2022, representing 80.3% and 77.2%, respectively, each year. Data from death certificates includes male and female. Other sexes or gender identities are not included.

Suicide rates were highest in young adults, middle age, and 85+ in 2021 and 2022.

In 2021, American Indian or Alaska Natives had a higher suicide rate than other races or ethnicities and it was the highest rate since 2000. Hispanic/Latino Minnesotans had more suicide deaths in 2021 than the previous five years. Data for 2022 are not yet available.
