2016 Quality Measure Recommendations

Statewide Quality Reporting and Measurement System (SQRMS)
Public Forum June 22, 2015

Dina Wellbrock
Project Manager
MNCM Background

• Collaboration started in 2002
• Became separate 501(c)3 entity in 2005
• Our mission is to accelerate the improvement of health by publicly reporting health care information
  • Provide credible, statewide performance data on quality, cost and patient experience
  • Build a robust, extensive set of measures through our multi-stakeholder process
  • Fulfill our vision of public reporting both through our annual Health Care Quality and Disparities reports, Health Equity Report as well as through MNHealthscores.org
• Collaborative effort of providers, hospitals, purchasers, consumers and health plans
Background continued

- In 2008, MDH contracted with MNCM to assist with implementing SQRMS
- MNCM subcontracts with the Minnesota Hospital Association, and Stratis Health to assist with key activities
- Specifically MNCM (1) facilitates data collection and management of information (2) reviews existing measures and the development of new measures (3) develops annual recommendations of a uniform set of quality measures for the state’s consideration
2016 Quality Measure Recommendations

Physician Clinics
2015 Measures Recommendation Process

• Measure Review Committee
• April – Preliminary slate of measures (clinics); evaluation of existing measures and measure specifications incorporated
• October - March – Stratis convened the Hospital Quality Reporting Steering Committee for hospital recommendations
• Late April - May – Public commentary convened by MDH for the preliminary slate of measures
• June – Final slate of measures (clinics and hospitals); incorporates public comments obtained by MDH
• Late June – MDH Public Forum
Optimal Diabetes Care Composite

- HbA1c (less than 8 percent)
- Blood pressure control (less than 140/90 mm Hg)
- Daily aspirin use if patient has diagnosis of IVD (or valid contraindication to aspirin)
- Documented tobacco free
- Statin use
- Eligible Providers: Family Medicine; General Practice; Internal Medicine; Geriatric Medicine; Endocrinology
- Established patients ages 18-75
Optimal Vascular Care Composite

• Blood pressure control (less than 140/90 mm Hg)
• Daily aspirin use or contraindication to aspirin
• Documented tobacco free
• Statin Use
• Eligible Providers: Family Medicine; General Practice; Internal Medicine; Geriatric Medicine; Cardiology
• Established patients ages 18-75
Depression Remission at 6 Months

- Patients with major depression or dysthymia and an initial PHQ-9 score > nine whose PHQ-9 score at six months (+/- 30 days) is less than 5.
- Eligible Providers: Family Medicine; General Practice; Internal Medicine; Geriatric Medicine; Psychiatry; and Licensed Behavioral Health (if a physician on site)
- Adults ages 18 and older
Optimal Asthma Control Composite

• Asthma is well controlled demonstrated by specified assessment tool
• Patient is not at risk for future exacerbations (patient reports less than two total emergency department visits and hospitalizations during previous 12 months)
• Eligible Providers: Family Medicine; General Practice; Internal Medicine; Pediatrics; Allergy/Immunology; Pulmonology
• Established patients ages 5-17; patients ages 18-50
Colorectal Cancer Screening

- Patient is current with colorectal cancer screening (allowable screens: colonoscopy within 10 years, sigmoidoscopy within 5 years, FOBT or FIT within the reporting period)
- Eligible Providers: Family Medicine; General Practice; Internal Medicine; Geriatric Medicine; Obstetrics/Gynecology
- Established patients ages 50-75
Maternity Care - C-Section Rate

• Percentage of cesarean deliveries for first births
• Eligible Providers: Family Medicine; General Practice; Obstetrics/Gynecology; Perinatology
• Cesarean: All live, singleton, vertex, term (≥ 37 weeks gestation) deliveries to nulliparous women performed by a medical clinic site, including all cesarean and all vaginal deliveries
• All clinics part of a medical group in which the medical group has providers who perform C-sections
Total Knee Replacement

- Average post-operative status at one year
  - Function measured by the Oxford Knee Score tool
  - Quality of Life measured using specified health related quality of life tool
- Eligible Providers: Orthopedic Surgery
- Adult patients ages 18 and older undergoing a primary total or a revision total knee replacement during the required dates of procedure
Lumbar Spine Surgery

• Average postoperative status as measured by
  • Oswestry Disability Index (low back)
  • Specified health related quality of life tool
  • Visual analog pain scale
• Discectomy/Laminotomy population assessed at three months postop
• Lumbar spinal fusion population assessed at one year postop
• Eligible Providers: Orthopedic Surgery, Neurosurgery
• Adult patients ages 18 and older undergoing a lumbar discectomy/ laminotomy or a lumbar spinal fusion during the required dates of procedure
Pediatric Preventive Care: Adolescent Mental Health and/or Depression Screening

- Patient has a mental health and/or depression screening using specified assessment tools documented in medical record
- Eligible Providers: Family Medicine; General Practice; Internal Medicine; Pediatric/Adolescent Medicine
- Patients ages 12-17
- Clinics that provide well-child visit services
Pediatric Preventive Care: Obesity/BMI & Counseling

• Patient with a BMI percentile >85 has documentation of both physical activity and nutrition discussion, counseling or referral documented in the medical record

• Eligible Providers: Family Medicine; General Practice; Internal Medicine; Pediatric/Adolescent Medicine

• Patients ages 3-17

• Clinics that provide well-child visit services
Health Information Technology (HIT) Survey

• Web Survey
• Topics cover adoption of HIT, use of HIT, exchange of information, and on-line services
• Eligible Providers: All Specialties
• Collecting mid-February on current HIT status
Patient Experience of Care

- Survey Topics Cover:
  - Getting care when needed / access to care
  - Provider Communication
  - Helpfulness of office staff
  - Provider Rating
- Current CG-CAHPS Survey
- Eligible Providers: all specialties except Psychiatry
- All patients aged 18 and older with a face to face visit at the clinic during the timeframe
- Sample size calculation based on provider-scaling/clinic size according to CAHPS protocol
- Surveying on dates of service for: September 1, 2016 through November 30, 2016
