2023 Report Year/2022 Measurement Year
07/01/2022 to 6/30/2023 Discharge Dates

Topic	Description
Measure	Door-to-Imaging Initiated Time
Description	Indicator used to assess the percentage of adult stroke patients for which diagnostic imaging was initiated in 25 minutes or less following their arrival to the hospital or emergency department (ED).
Methodology	Population identification is accomplished either prospectively via concurrent case identification through daily review of emergency department logs or via a query of the hospital discharge information to find cases for inclusion. Data elements are either extracted from an EHR system or abstracted through medical record review.
Rationale	Rapid diagnosis of stroke subtype and possible contraindications to thrombolytic therapy needs to occur rapidly for administration of IV thrombolytics in the appropriate time window. Tracking when imaging was initiated may lead to streamlining of key care processes that might otherwise delay the initiation of thrombolytic therapy. Imaging should be initiated within 25 minutes of arrival.
Measurement Period	Data will be submitted on a quarterly basis on the following schedule for the 12-month measurement period: <ul style="list-style-type: none"> • Discharge dates: Third Quarter, 2022: July 1 – September 30 <ul style="list-style-type: none"> ○ Data submission deadline: February 15, 2023 • Discharge dates: Fourth Quarter, 2022: October 1 – December 31 <ul style="list-style-type: none"> ○ Data submission deadline: May 15, 2023 • Discharge dates: First Quarter, 2023: January 1 – March 31 <ul style="list-style-type: none"> ○ Data submission deadline: August 15, 2023 • Discharge dates: Second Quarter, 2023: April 1 – June 30 <ul style="list-style-type: none"> ○ Data submission deadline: November 15, 2021
Denominator	Patients with documented final clinical diagnosis of ischemic stroke, transient ischemic attack, subarachnoid hemorrhage, intracerebral hemorrhage, or stroke not otherwise specified, or whose ED visit was assigned a principal ICD-10-CM diagnosis code listed in Table 1 for ischemic stroke, Table 2 for transient ischemic attack, or Table 3 for hemorrhagic stroke.

Topic	Description
Exclusions	<ul style="list-style-type: none"> • Patients <18 years of age on date of arrival to hospital. • Patients admitted solely for elective carotid endarterectomy or any revascularization. • Patients enrolled in a clinical trial related directly to stroke care. • Patients who started experiencing stroke symptoms after hospital arrival (in ED/Observation/Inpatient). • Patients who were determined to receive comfort measures only while still in the emergency department. • Patients who expire while in the emergency department • Patients whose date or time of arrival are missing or not documented. • Patients whose last known well time is missing. • Patients whose date or time of imaging are missing or not documented. • Patients transferred into your facility from another facility through the emergency department or as a direct admit. • Patients whose last known well time is greater than 3.5 hours from hospital arrival time. • Patients whose symptoms have resolved, which may be determined using any of the following criteria: <ul style="list-style-type: none"> ○ documentation in the physician notes to the effect of “symptoms have resolved prior to arrival” or “patient has returned to baseline”; or ○ the choice “yes” is selected for the data element “had stroke symptoms resolved at time of presentation.”
Numerator	All ischemic stroke, transient ischemic attack, subarachnoid hemorrhage, intracerebral hemorrhage and stroke not otherwise specified patients whose diagnostic imaging was initiated at the reporting hospital within 25 minutes or less from time of arrival.
Suggested Data Sources	ED records, intake/face sheet/hospital admissions records, progress notes, acute physician notes, diagnostic reports, radiology notes.
