

**Health Information Technology (HIT)  
Ambulatory Clinic Survey Specifications  
2022 Report Year**

**09/15/2022 to 10/15/2022 Dates of Survey**

<b>Description</b>	<p>Minnesota Health Information Technology Ambulatory Clinics Survey is a biennial (formerly annual) survey of clinics in the state regarding adoption and effective use of electronic health record (EHR) systems, health information exchange, and related health information technologies. The results are used to:</p> <ul style="list-style-type: none"><li>• Measure Minnesota's status on achieving state and national goals to accelerate adoption and use of electronic health records and other HIT, and to achieve interoperability of health information;</li><li>• Identify gaps and barriers to enable effective strategies and efficient use of resources;</li><li>• Help develop programs and inform decisions at local, state, and federal levels of government; and</li><li>• Support community collaborative efforts.</li></ul>
<b>Survey Period</b>	September 15, 2022 through October 15, 2022
<b>Eligible Clinics</b>	All Minnesota physician clinics. Respondents are able to request that a single survey submission be attributed to the rest of the clinics in their medical group, if the other clinics had the same EHR and processes of care.
<b>Question Types</b>	Multiple choice, yes/no, and short answer
<b>Measure Type</b>	Survey
