What You Should Do If You Feel Sick - For Students: Transcript

[upbeat music]

[Narration] People with COVID-19 may feel sick in lots of different ways. If you don’t feel well, it’s important to tell your parent or a grown-up. You should not come to school.

If you’re already at school, and you start to feel sick, tell your teacher or the school nurse right away.

It’s okay to say you’re not feeling well. AND it’s important to tell someone so we all can stay safe.

If your grown-up has more questions about COVID-19, visit health.mn.gov.
