When should I get tested? Symptoms

TRANSCRIPT

[upbeat music]

[Narration]

When should you get tested for COVID-19?

You have symptoms of COVID-19, such as runny nose; congestion; sore throat; fever; cough; shortness of breath; muscle pain; headache; chills; or loss of taste or smell.

Current testing recommendations say everyone should get tested immediately if they have symptoms of COVID-19.

If you have symptoms, be sure to follow recommendations about how long to stay home and away from others. For more information visit our If You Are Sick or Test Positive webpage. (https://www.health.state.mn.us/diseases/coronavirus/sick.html)

To learn more about other times when you should get tested, and where to get tested, visit the MDH COVID-19 Testing webpage. (https://www.health.state.mn.us/diseases/coronavirus/testsites/index.html)
