Waaxda Caafimaadka ee Minnesota waxa ay rabtaa inay u mahadceliso dhammaan dadkii nala wadaagay khibradahooda iyo aragtidooda.

### **AFEEF**

Waraaqahan waxa ku qoran ma aha talooyin caafimaad. Waxaa loo talagalay macluumaad guud oo ku saabsan faayruska lagu dhasho ee CMV. Waxaa kala duwan ilmaha iyo qoysaska oo macluumaadkan qaarkiis ayaa laga yaabaa in uusan si gaar ah u khuseyn karin ilmahaaga. Mar kasta waa in dhakhtarka ilmaha lagala hadlo wixii ah su'aalo ama walaac oo ku saabsan xaaladaha caafimaadka.

**Faayruska Calaamadadaha Badan (CMV)  
iyo CMV Nooca Lagu Dhasho**

## Waa maxay CMV?

Faayruska Calaamadaha Badan (CMV) waa faayrus caam ah oo dadku isku qaadsiiyo da' kasta. Mid ka mid ah saddexdii carruur ee ku nool Mareykanka ayuu ku dhacaaa faayruska CMV marka uu gaaro 5 jir, waa sida u qoran Xarumaha Xakameynta iyo Ka-hortegidda Cudurrada (CDC). In ka badan kala bar dadka waaweyn ayuu CMV ku dhacaa markay gaaraan 40 jir. Marka uu CMV galo jirka dadka, weligiis kama baxo noloshooda oo dhan ee wuu ku soo kacaa. Weliba dadka mar kale ayaa faayruskan la qaadsiin karaa isaga oo ah nooc kale.

Badanaa dadka caafimaadka qaba ma ay oga in la qaadsiiyey faayruska CMV, sababtoo ah faayraskani inta badan ma laha wax calaamado ah. Marka ugu horreysa ee dadka la qaadsiiyo, waxa ay mararka qaarkood isku arkaan calaamado fudud sida qandho, cune-xanuun, daal, iyo/ama murqa-xanuun. CMV waa faayrus dadka qaar ku keeni kara xanuun daran marka uu liito habdhiskooda difaaca.

## Sidee baa dadka loo qaadsiyyaa CMV?

CMV sida la isku qaadsiin karo waa dareeraha jirka dadka oo is gaara sida candhuufta, kaadida, dhiigga, shahwada, illinta, iyo caanaha naaska.

Faayraskan la iskuma qaadsiyo si aad u badan. Hase ahaatee, CMV waxaa si aad u badan isugu gudbiya dadka isku guri kula nool carruur yaryar oo la geeyo goobaha xannaannada ilmaha. In badan oo ah CMV waxa uu bilo ku dhex jiri karaa kaadida iyo candhuufta ilmihii la qaadsiyyey. Sidaas awgeed ayey carruurta yaryar u yihii sida uu ku sii faafayo CMV. Carruurtu waxay faayruska qaadsiyyaan waalidka iyo dadka haya, xataa iyaga oo aan xanuunsan. Taabashada candhuufta ama kaadida nuunnaha iyo carruurta yaryar ayaa loo maleynaya in ay tahay sababta ugu weyn ee infakshanka CMV lagu qaadsiyo haweenka uurka leh.

## Waa maxay CMV nooca lagu dhasho?

Haweenka uurka leh waxaa laga yaabaa in uu CMV uga sii gudbo mandheerta ilmaha iyagoo aan la ogeyn. Waa wax dhici kara marka hooyada uurka leh la qaadsiyo CMV marka koowaad ama mar kale inta aysan hooyadu umulin. Marka ilmaha la qaadsiyo CMV intaysan dhalan ka hor, waxa la yiraahdaa CMV nooca lagu dhasho. Inta badan dhallaanka qaba CMV nooca lagu dhasho weligood kama muuqdaan calaamado ama dhibaatooyin caafimaad, laakiin carruurta qaar ayaa xanuunsada markay dhashaan ama waxaa mar dambe lagu arkaa dhibaatooyin caafimaad oo ah muddo-dheer.

Qiyaastii mid ka mid ah 200 oo carruur oo kasta waxaa laga helaaa CMV nooca lagu dhasho. Taas macnaheedu waa in ilaa 300 oo carruur ah laga helo CMV nooca lagu dhasho Minnesota sannad kasta. CMV nooca lagu dhasho waa sababta ugu badan ee keenta iinta lagu dhasho dalka Mareykanka. CMV nooca lagu dhasho waa sababta caamka ah ee carruurta ku keenta dhagoolanimada.

## Sidee baan ku ogaan karaa haddii ilmahaygu qabo?

Haddii dhakhtarku ilmaha ka walaacsan yahay in uu jiro CMV nooca lagu dhasho, waxaa waalidka lagula talinaya in laga soo baaro ilmaha. Intaa waxaa dheer, nuunneyaasha ku dhasha Minnesota waxaa laga baaraa CMV oo waa wax qeyb ka ah barnaamijka baarista dhallaanka. Haddii baarista dhiigga ee dhallaanka cusub lagu arko CMV, taas macnaheedu waa in ay aad u badan tahay inuu ilmahaasi ku dhashay faayruska CMV. Baaris badan ayaa lagu sameynayaa si loo hubsado.

Infakshanka CMV nooca lagu dhasho waxaa badanaa laga xaqiijiyaa baarista kaadida nuunnaha. Si loo hubiyo CMV nooca lagu dhasho, baaris kale ayaa nuunnaha lagu sameeyaa ka hor intuuusan gaarin 21 maalmood. 21 maalmood ka dib, waaxaa adkaaneysa in la ogaado in uu ilmuu ku dhashay CMV ama in la qaadsiiyey CMV ka dib markuu dhashay (CMV nooca la is qaadsiyo). Marka ay ku dhashaan CMV waxay carruurta qaarkood ku dhaca dhibaatooyin caafimaad oo muddo dheer socda iyo dhagoolenimo; balse badnaa dhibaatooyinkaas laguma arko marka CMV la qaadsiyo iyagoo dhashay ka dib.

## Waa maxay calaamadaha iyo astaamaha CMV nooca lagu dhasho?

CMV nooca lagu dhasho saameyntiisa ilmaha isku mid ma aha. Badanaa nuunneyaasha kama muuqato wax ah calaamado ama astaamo ah xanuun jira. Sidaas waxaa la yiraahdaa calaamad la'aan. Marka aysan nuunneyaashu lahayn calaamado ama astaam ah xanuun jira, waxaa la yiraahdaa calaamad la'aan.

### CMV nooca lagu dhasho

Badanaa nuunneyaasha qaba CMV nooca lagu dhasho ma laha calaamado markay dhashaan. Badanaa carruurtaasi waa ay caafimaad qabaan oo marna lagama qabo welwel caafimaad oo ah faayruskan.

Qaar ka mid ah carruurta dhalata iyagoo aan lahayn calaamado waxaa ku dhacda dhegoolanimo. Dhegoolanimadu waxay noqon kartaa mid fudud ilaa mid daran iyo hal ama labada dhegood. Dhegoolanimada waxaa la arki karaa marka ilmuu dhasho ama goor dambe. Carruurta qabta CMV nooca lagu dhasho waa in si joogto ah loo baaro maqalkooda si wax looga qabto wixii iska beddela.

Fursado ah in ilmaha lagu arko caqabado kobcidda maskaxeed waa mid xoogaa yar ka sarreysa carruurta calaamad la'aanta ah ee ku dhasha CMV marka loo eego carruurta aan ku dhalan CMV nooca lagu dhasho, oo waa in ay shaqaalaha caafimaadka la socdaan marka ay kobcayaan. Carruurta aan calaamado lagu arkin ee qabta CMV nooca lagu dhasho waxaa xaq u yeelan karaan caawimaad lagu taageerayo korriinkooda iyo kobocooda maskaxeed. Fadlan eeg Qaybta 3 si aad u hesho maclumaaadka dheeraadka ah ee adeegyada la hayo.

### CMV nooca lagu dhasho ee calaamadaha leh

Nuunneyaasha qaba CMV nooca lagu dhasho qaar ayaa calaamadaha qaba markay dhashaan. Calaamaduhu waxay noqon karaan kuwa fudud ama daran. Qaar ka mid ah calaamadaha ayaa la arkaa balse qaar ayaa lagu helikaraa baaris gaar ah oo keliya.

- Cabbirka madaxa oo ah mid yar
- Miisaanka dhalashada oo hooseeya ama gaabnaan lagu dhalashada
- Beerka iyo beeryarada oo weynaada
- Heerarka xanjada dhiigga oo hoos u dhacda
- Shabaqa isha gadaasheeda oo dhaawacma
- Kaalsiyamta oo adkeysa unugyada maskaxda

Faayruska Calaamadaha Badan (CMV) waa faayrus caam ah oo dadku isku qaadsiyo da' kasta. Dhegoolanimadu waxa ay noqon kartaa mid fudud ilaa mid daran iyo hal ama labada dhegoood. Dhegoolanimada waxaa la arki karaa marka ilmuu dhasho ama goor dambe. Carruurta qabta CMV nooca lagu dhasho waa in si joogto ah loo baaro maqalkooda si wax looga qabto wixii walaac ah.

Intaas waxaa dheer, carruurta leh calaamadaha lagu dhasho ee CMV waxay halis e ugu jiraan welwel caafimaad oo ah muddo-dheer oo waa in ay shaqaale caafimaad si dhow la socdaan.

### **Walaacyada caafimaad ee muddada-dheer waxaa ka mid noqon kara:**

- Suuxitaan
- Aragga indhaha oo daciiifa
- Daahitaan ah isticmaalka murqaha waaweyn, daciifnimada, ama dhibaato ah dheellitirnaanta
- Naafanimo maskaxeed

Carruurta lagu arko calaamadaha ee qabta CMV nooca lagu dhasho waxay xaq u yeelan karaan caawimaad lagu taageerayo korriinkooda iyo kobocooda maskaxeed. Fadlan eeg Qaybta 3 si aad u hesho maclumaadka dheeraadka ee adeegyada la hayo.

## **Waa maxaybaaritaanada lagu sameynayo ilmaha haddii laga helo CMV nooca lagu dhasho?**

### **Dhakhtarka ayaa laga yaabaa in uu ku taliyo baaritaan lagula soconayo ka dib markii la hubsado CMV nooca lagu dhasho:**

- **Baarista dhiigga ee sheybaarka** – dhiig ayaa laga soo qaadayaa si loo baaro shaqada beerka ee ilmaha iyo dhiigga oo dhan.
- **Baadhitaanka maqalka ogaanshaha (maqalka)** – baaris faahfaahsan oo ah maqalka. Xataa haddii uu fiican yahay maqalka dhallaanka ee marka uu dhasho, waxaa dhici karta in uu mar dambe maqalku ka lumo. Waxaa loo baahan yahay baaritaan dheeraad ah wax yar ka dib markuu ilmuu dhashay iyo in la sii baaro carruurnimada oo dhan si loo ogaado wixii iska beddela. Fadlan eeg Qaybta 2 si aad u hesho maclumaad ah maqalka iyo CMV nooca lagu dhasho.
- **Madaxa oo lagu sameeyo uultarasawn ama MRI (magnetic resonance imaging)** – baaritaan lagu soo saara sawirro badan si loo eego isbeddelada maskaxda ilmaha.
- **Baaritaanka dhakhtarka indhaha (araggaa)** – baaris indhaha daawo lagu shubayo si loo eego isbeddelka ku dhaca indhaha ilmaha ee sababo CMV nooca lagu dhasho.

### **Waa maxay macnaha baarista natijjada lala soconayo?**

Dhallaanka ku dhasha CMV natijjooyinkoodu aad ayey u kala duwanaan karaan, markaa waa ay adag tahay in la saadaaliyo caafimaadkooda ama korriinkooda mustaqbalka. Sidaa awgeed, dhakhtarka ama shaqaalaha kale ee caafimaadka ayaa isticmaali kara baaritaan dabagal ah si ay: u ogaadaan astaamaha iyo calaamadaha CMV; si ay u helaan heerka faayruska ee ilmaha; iyo si loogu hago daawenta iyo qorshaha lagula soconayo ilmaha, sida go'aaminta in ilmuu bilaabi karo qaadashada daawada faayruska.

Dhakhtarku waa in uu kuu sharxo natijjooyinka ka soo baxa baaritaanka. Weydiiso su'aal kasta oo aad ka qabto natijjooyinka baaritaanka ilmahaaga iyo wixii ku saabsan daaweynta lagu taliyo iyo qorshaha lagula soconayo.

## Sidee baa loo daaweyaa CMV nooca lagu dhasho?

### Daawooinka faayruska

Badanaa nuunnaha qaba CMV nooca lagu dhasho uma uu baahan doono daawada faayruska. Daawooinka looga hortago faayruska waxay ka caawin karaan maqalka iyo korriinka dhallaanka qaarkooda leh calaamadaha CMV nooca lagu dhasho, oo waa wax lagula talin karo. Dhakhtarku waxa uu kuu gudbin karaa takhasuska cudurrafaa si aad ugala hadasho daawooinka kala duwan. Waxaa muhiim ah inaad kala hadasho dhakhtarka khataraha iyo faa'iidooyinka ay leedahay daawada faayruska.

### Siyaabaha kale

- **In la maamulo oo lala socdo calaamadaha.** In la hubsado in ilmaha la keeno ballamaha lagula taliyo ee ah takhasusaadka kala duwan oo dhan. Ballamahaas waxay muhiim u yihiiin maareynta arrimaha caafimaadka, hadba wixii markaas jira. Ballamaha joogtada ah sidoo kale waa muhiim si loogu ogaado wixii cusub sida ugu dhakhsaha badan, sida maqalka markuu xumaanayo.
- **Waxqabadka hore.** Help Me Grow Minnesota (Barnaamijka Caawinta Dhallaanka) oo waalidka ku sii xiri kara tasiilaad caawimaad u ah maskaxda, waxbarashada, iyo korriinka. Barnaamijkaas waxa kale oo uu waalidka ku xiri karaa iskuulka degmada ee dadweynaha si loo qiimeeyo in dhallaanka iyo socodbaradka loo bilaabi karo waxqabadka hore ama waxbarashada gaarka ah. Fadlan eeg Qeybta 3: Korriinka & Koboca Maskaxeet oo ah faahfaahinta waxqabadka hore.
- **Taageerada qoyska.** In la ogaado haddii ilmuhi qabo CMV nooca lagu dhasho oo waalidka culeys ku keeni kara. Taageerada dadka kale waalidka ayey caawin kartaa. Fadlan eeg Qeybta 4 oo ah tasiilaadka taageerada qoyska.

### Miyaa la nuujin karaa nuunnaha marka uu qabo CMV nooca lagu dhasho?

Haa, waa caadi in nuunnaha la nuujiyo oo qaba CMV nooca lagu dhasho.

Waa in lagala hadlo dhakhtarka carruurtaa haddii welwel laga qabo in la nuujin karo ilmaha.

## Miyaa nuunnaha la geyn karaa xanaanada carruurta?

Haa, dhallaanka iyagoo qaba CMV ayey la geyn karaa xanaanada ilmaha. Faayruska CMV aad ayuu ugu badan yahay dhallaanka iyo carruurta yaryar, oo waxaaba laga yaabaa in ay xannaannada carruurta joogaan carruur kale oo qabta CMV. Carruurta oo dhan ayaa faafin karta CMV, balse ma aha oo kaliya kuwa lagu soo sheegay in ay qabaan CMV. Carruurta qabta CMV waa inaan laga joojin in la geeyo meel kasta oo ah goobaha xannaanada.

Goobaha xannaanada oo dhan waa in lagu sameeyo gacmadhaqid joogto ah oo ah sida saxa ah, nadaafad fiican, iyo nadiifin guud. Saddexdaas waxyaabood ayaa dadka ka caawin kara in ay hoos u dhigaan halista faafinta CMV.

## Maxay waalidku u sheegi karaan dadka weydiinaya haddii ay ilmahoodu CMV u gudbi karo?

Faaruska CMV waa mid aad ugu badan dhallaanka iyo carruurta yaryar. Carruurta oo dhan ayaa faafin karta CMV, balse ma aha oo kaliya kuwa lagu soo sheegay in ay qabaan CMV. Caadi ahaan waxaa la isugu gudbiyaa qof ilaa qof marka la dheecaan isaga gudbo.

Mid ka mid ah siyaabaha ugu badan ee ay dadku ku qaadi karaan CMV waa marka ay taabtaan dheecaanka ilma yar oo kol dhow laga soo helay faayruska. Sababtu waa in uu faayrus badan oo ah CMV bilo ku sii dhex jiri karo kaadida iyo candhuufa ilmaha laga soo helay. Qoyska iyo dadka la xiriira waa in ay si fiican u dhaqdaan gacmahooda ka dib marka ilmaha laga beddelo xafaayadda ama la taabto qoyaanka jirka (sida candhuufta iyo xabka) nuunnaha. Qoyska iyo haweenka la xiriira ee uurka leh ama difaacoodu liito ee ka walaacsan faayruska CMV waa in ay kala hadlaan oo ay ogeysiyaan dhakhtarka ay la xiriiraan.

## Halkee baa laga heli karaa faahfaahinta CMV iyo CMV nooca lagu dhasho?

Kala xiriir dhakhtarka in uu kaaga jawaabo su'aalaha CMV iyo CMV nooca ku dhasho. Booqo:

# Qeyba<sup>2</sup>

**Maqalka Dhegaha iyo CMV  
Nooca Lagu Dhasho**

## Sababtee baa loo baaraya maqalka dhegaha ee ilmaha

Faayruska calaamadaha badan ee lagu dhasho wuxuu saameyn karaa sida dheguhu u shaqeeyaan. Faayrusku wuxuu saameyn karaa hal dheg ama labada dhegood. Wawa uu beddeli karaa sida uu nuunnuhu wax u maqlayo muddo ka dib.

Xataa haddii uu fiican yahay maqalka nuunnaha, waa in weli lagu sii wado baarista maqalka. Hadalka iyo barashada luuqadda waxa ay u bilowdaan markay dhashaan, sidaas awgeed waa in si degdeg ah loo ogaado isbeddelka maqalka dhegaha. Nuunnuhu wuxuu bilaabaa in uu waalidka la xiriio bilo badan ka hor inta uusan baran hadalka. Haddii uu is beddelo maqalka dhegaha ee nuunnaha, waalidka ama dhakhtarku badanaa ma oga sababtoo ah ilmo maqalkoodu xun yahay ayaa dhawaaqa oo u muuqda in ay wax dhageystaan. Baarista lagula soconayo ayaa ah habka keliya ee lagu ogaan karo in maqalku xumaanayo. Marka la ogaado maqalka xumaanaya waxaa la sii bilaabi karaa sida nuunnaha loola hadli karo.

## Goorta la baarayo maqalka nuunnaha; waxa ay natijjadu ka dhigan tahay

Nuunne kasta oo qaba CMV nooca lagu dhasho waa in loo geeyo xirfadlaha maqalka dhegaha (dhakhtarka takhsuska maqalka) sida ugu dhakhso badan - oo waa in aysan ka badnaan hal bil ka dib marka laga helo CMV. Haddii ay natijjadu tahay mid fiican, ama caadi, maqalka nuunnaha ayaa markaas caadi ah. Baarista waa in ilmaha lagu sii wado, sababtoo ah maqal la'aan ayaa mar dambe bilaaban karta. Baarista waxaa badanaa la sameeyaa saddexdii billoodba mar ilaa iyo da'da 2 jirka, lixdii billoodba mar da'da 2 jirka ilaa 6 jirka, ka dibna sannad kasta ilaa iyo ugu yaraan 10 jir. Xirfadlaha maqalka ayaa idin sheegaya goorta ballanta ah ee baarista maqalka ilmaha.

## Sida loo baaro maqalka dhegaha

Qalab wax lagu maqlo oo gaar ah ayaa la dhigayaa dhetga nuunnaha agteeda. Wawa loo shidayaa codad oo qalabka ayaa lagu cabbirayaa wawa dhaca dhawaqyada ka dib. Baarista maqalka waxay fiican tahay marka ilmuu aamusyan yahay, ee la quudiyo, oo xaalkisu caadi yahay. Nuunnaha yar maqalka ayaa laga baari karaa isagoo hurda; nuunnaha weynaada wawa la siin karaa daawo ku caawisa in la seexiyo wakhtiga baarista. Akhriso waraaqaha Waaxda Caarimaadka ee Minnesota MDH, "Marka ilmaha loo diyaarinayo ballanta baarista maqalkooda." Baarista maqalka waa loo beddelayaa marka ilmuu weynaado. Xirfadlaha maqalka ayaa cabbirayaa sida nuunnuhu madaxa ugu jeedinayo dhawaaqa iyadoo lagu hayo dhabta. Marka ilmuu bilaabo iskuulka barbaarinta, wawa dhageysanayaan ciyaar iyo alaab.

## Haddii uu maqalka ilmuu is beddelo

Xirfadlaha maqalka ayaa waalidka u sheegi doona siyaabaha loo caawin karo ilmaha si uu ula hadli karo dadka haddii baarista lagu ogaado in uu maqalku isbeddelayo. Haddii ilmaha si caadi loola hadlo, dhakhtarka ayaa u qori kara qalabka maqalka si uu ilmuu ugu hadalka dhawaaqyo oo uu kor ugu qaado iyo si loogu caawiyo in uu wax maqlo. Waxaa waalidka lagu sii xirayaa takhasusleyaal ama macallimiinta iskuulka ama kilinig la socon doona barashada luuqadda ee ilmaha.

## Barnaamija Early Hearing Detection and Intervention (Ogaanshaha Maqalka iyo Waxqabadka Goorta Hore ama EHDI).

Barnaamija EHDI waxa lagu aqoonsadaa dhallaanka cusub iyo dhallaanka qaba ama halista ugu jira maqal-la'aanta iyo oo qoysaska ayey ku xiraan macluumaadka iyo adeegyada, sida in ay helaan xirfadlahaa maqalka iyo tasiilaadka waxbarashada ee degaanka.

Qalabka waalidka, dhakhaatiirta, iyo xirfadleyaasha kale waxaa laga heli karaa barta ([www.health.mn.gov/people/childrenyouth/improveehdi](http://www.health.mn.gov/people/childrenyouth/improveehdi)).

## Ballanta baaritaanka maqalka ee dhallaankaaga

Taariikhda (BB/MM/YYYY):

Wakhtiga (Subaxnimo/Galabnimo):

Magaca Rugta Caafimaadka:

Telefoonka Rugta Caafimaadka:

## Maxaan horay u soo qaadaa oo aan la imaadaa ballanta dhallaankayga?

- Kaarkaaga caymiska
- Warqadda gudbinta haddii loo baahdo
- Liiska daawooyinka hadda la qaato
- Natijjooyinka baaritaanka maqalka ee hore iyo/ama qiimeynada
- Tafaasiisha ku saabsan taariikh kasta oo qoyseed ee maqal la'aanta carruurnimo
- Magacyada/cinwaanada shaqsyaadka aad rabto in warbixinta loo diro

## Maxay tahay inaan sameeyo ballanta kahor?

Tijaabooyinka ayaa inta badan si fudud loo samayn karaa iyadoo dhallaankaagu jiifo/hurdayo. Si loo hubiyo in dhallaankaagu hurdo inta lagu gudajiro baaritaanka:

- Ha u oggolaan dhallaankaaga inuu seexdo xilliga ballanta kahor ama inta uu gaariga u soo raacayo rugta caafimaadka.
- Iska ilaali inaad quudiso dhallaankaaga kahor xilliga ballanta. Wuxaad awoodi doontaa inaad ku quudiso dhallaankaaga xarunta dhexdeeda wax yar kahor xilliga baaritaanka.

## Waa maxay maqalyaqaan/dhakhtarka maqalka?

Maqalyaqaanku waa xirfadle daryeel caafimaad oo loo tababaray inuu baaro oo maareeyo maqal la'aanta ku dhici karta dhallaanka, carruurta, iyo dadka waaweyn. Qofka maqal la'aanta qaba waxaa laga yaabaa inuu awoodo inuu maqlo dhawaaqyada qaarkood halka kuwa kalena laga yaabo inay waxba aysan maqlin. Waxaa jira noocyoo kala duwan oo maqal la'aan ah iyadoo lagu salaynayo dhibaataada gaarka ah ee ka jirta hal ama dhowr qaybood oo dheg-ta(aha). Qiimaynta dhammaystiran ee nooca iyo darnaanta maqal la'aanta labudaba ee uu sameeyo khabirka maqalyaqaanka ah ee carruurta ayaa muhiim ah si loo hubiyo qorshaha ugu saxan ee dabagalka iyo maaraynta wax maqal la'aanta.

## Waa maxay sababta dhallaankaygu ula kulmayo maqalyaqaanka?

Baaritaanka maqalka ee dhallaankaagu maray markuu dhashay/wax yar kadib dhalmada wuxuu ahaa baaritaan tijaabo ah. Hadduu dhallaanku uusan ku gudbin baaritaanka tijaabada ah, wuxuu baaritaanku inoo sheegayaa inuu baaritaan dheeraad ah ku sameeyo maqalyaqaanka/dhakhtarka maqalka. Qiimaynta dhammaystiran ee uu sameeyo maqalyaqaanka ayaa ah qaabka kaliya ee sida hubaasha lagu ogaan karo in dhallaankaagu maqlayo dhammaan dhawaaqyada muhiimka u ah hadalka iyo barashada luuqadeed.

## Muddo intee le'eg ayay balantu qaadan doontaa?

Ballantu waxay qaadan kartaa 1-3 saac. Mararka qaarkood had iyo jeer suurtagal ma ahan in hal ballan lagu dhammeeyo baaritaanka maqalka. Haddii ballan labaad loo baahdo, waa la qaban doonaa sida ugu dhakhsaha badan.

## **Maxaa dhici doona inta lagu gudajiro ballanta baaritaanka maqalka?**

Maqalyaqaanku wuxuu uruurin doonaa macluumaaadka ku saabsan taariikhda caafimaad ee dhallaankaaga, urkaaga/foosha/umulida ilmahaaga, iyo taariikhda qoyska.

Inta uu ilmahaagu hurdayo, maqalyaqaanka aaya baari doona dhallaankaaga dheghiisa oo samayn doona qiimaynta maqalka. Nooca baaritaan ee la samaynayo waxaa ka mid noqon kara:

- Jawaab-celinta Maskaxda Xilliga Wax Maqalka (ABR) – Qalab dareemeyaah ah aaya lagu xiri doonaa wejiga iyo cakawga/dacallada dhegaha ee dhallaankaaga si loo cabbiro ka jawaab-celinta maskaxda ee dhawaaqyada. Samaacado telefono aaya la gelin doonaa dheg kasta si loogu daaro dhawaaqyada tijaabada ah. Dhallaankaagu jir ahaan kama jawaab-celin doono dhawaaqyada, balse qalabka wax dareema aaya cabbiri doona sida wanaagsan ee dhallaankaagu uga jawaab-celinayo dhawaaqyada kala duwan. Baaritaankani wuxuu gacan ka geystaa in la go'aamiyo inuu jiro wax maqal la'aan ah. Haddii ay maqal la'aani jirto, tijaabadani aaya bixin karta macluumaaad ku saabsan nooca wax maqal la'aanta.
- Dhawaaqyada Kooklayda Dhegta (OAE) – Caarada cinjur jilicsan aaya la gelin doonaa dheg kasta si loogu daaro dhawaaqyo hooseeya iyo si loo cabbiro gebikayeerkha dhaca marka dhegtu si caadi ah u shaqayso. Baaritaankan aaya sida caadiga ah waxaa lala sameeyaa baaritaano kale si loo helo ogaanshaha xaaladeed ee ugu saxan.
- Baaritaanka qaybta dhexe dhegta – Caarada jilicsan aaya la gelin doonaa dheg kasta taasoo cabbiraysa sida wanaagsan ee reemaha dhegtu u dhaqaaqdo. Baaritaankan, marka lala sameeyo baaritaano kale, wuxuu bixin karaa tilmaamo ku saabsan sababta suurtagalaka ah ee keentay maqal la'aanta.

## **Dhallaankaygu ma dareemi doonaa wax xannuun ah?**

Dhallaankaagu ma dareemi doono wax xannuun ah wakhti kasta inta lagu gudajiro baaritaanka. Meelaynta ama gelinta caarada cinjirka jilicsan iyo qalabka wax dareema ma dhaawici doonaan dhallaankaaga. Inta badan dhallaanka dareenkooda aaya kaca wayna isruxaan marka ugu horraysa ee qalabka tijaabada ah lagu xiro dhegtooda balse way iska degaan marka dhabta la saaro oo maro lagu qabto.

## **Ma heli doonaa natijada baaritaanka isla markaaba?**

Maqalyaqaanka aaya awood u yeelan doona inuu kuu sheego goorta natijada baaritaanka la heli karo iyo cidda ku siin doonta natijjooyinka. Haddii ay jiraan su'aalo aad ka qabto natijjooyinka, waa inaad la xiriirto rugta caafimaadka maqalka.

## **Maxaa dhici kara haddii ilmahaygu uusan ka seexan bilawga ilaa dhammaadka baaritaanka?**

Hadduu dhallaankaagu yar yahay, waxay u badan tahay inuu seexdo xilliga baaritaanka, balse mararka qaarkood ballan dheeraad ah aaya loo baahan karaa. Qaar ka mid ah dhallaanka waaweyn, suuxiso ayuu dhakhtarka ku talin karaa in la siiyo dhallaankaaga si ay uga caawiso inuu seexdo xilliga baaritaanka oo dhan ee loo baahan yahay si qimayn dhammaystiran loo sameeyo. Si loo yareeyo suurtagalnimada in suuxiso la siiyo, waxaa lagugula talinayaan inaad ballan u qabsato sida ugu dhakhsaha badan.

## **Maxaa dhici kara haddii aan mashquulo, oo aan rabo inaan dib u dhigo ballanta dhallaankayga?**

Aad ayay muhiim u tahay inuu maqalyaqaanku arko dhallaankaaga. Haddii aadan ballanta imaan karin, fadlan isla markiiba dib u dhigo ballanta baaritaanka maqalka.

Jawaabaha su'aalaha hoose inaad ka hesho dhakhtarka ilmahaaga waxa ay kaa caawin kartaa inaad si fiican u fahamto xaalka caafimaadka ee ilmahaaga iyo daryeelka loo qabanayo. Jawaabaha waxa aad sidoo kale ku ogaaneysaa heerka khabiirnimo ee uu dhakhtarka carruurta u leeyahay CMV nooca lagu dhasho.

Macluumaadka halkan ku qoran waxaa laga soo xigtay CDC: Su'aalaha Laga Yaabo Inaad Weydiiso Dhakhtarka Ilmahaaga oo ku qoran [CDC: Qalabka Lacag La'aanta ah ee barta Maqal-la'aanta Carruurta](#) ([www.cdc.gov/ncbddd/hearingloss/freematerials.html](http://www.cdc.gov/ncbddd/hearingloss/freematerials.html)).

Intee in le'eg ayaad daaweyneysaa dhallaanka iyo carruurta laga helo CMV nooca lagu dhasho?

Miyuu ilmahaygu u baahan doonaa baaris dheeraad ah marka uu qabo CMV nooca lagu dhasho? Miyey baaris kasta sheegeysaa caafimaadka iyo koboca ilmaha ee hadda iyo mustaqbalka?

Waa maxay noocyada daaweynta ee uu ilmuu u baahan doono?

Miyuu ilmuu badanaa adiga kuu imaanayaa marka uu qabo CMV nooca lagu dhasho? Intee jeer?

Khasab miyey ilmaha ku tahay inuu la kulmo dhakhaatiirta takhasuska CMV nooca lagu dhasho? Takhasusaad nooceee ah?

Sidee baan ku heli karnaas sii-gudbinta dhakhaatiirta takhasuska ah haddii ilmuu u baahdo? Maxaan sameynayaa haddii takhasus aad noo soo dirtay uu noo soo diro nooc kale oo ah takhasus kale?

Haddii aan dhibaato ku qabno siigubinta, ama haddii ay shirkadda ceymisku su'aalo ka qabto, maxaan sameynayaa?

Miyuu kiliniggan igu caawin karaa in la ii sameeyo ballamaha?

Sidee baa lagu hubin karaa in warbixin kasta oo ah takhasusaadka lagula wadaago? Sidee baan ku heli karaa koobbiyada warbixin kasta oo ah takhasusaadka?

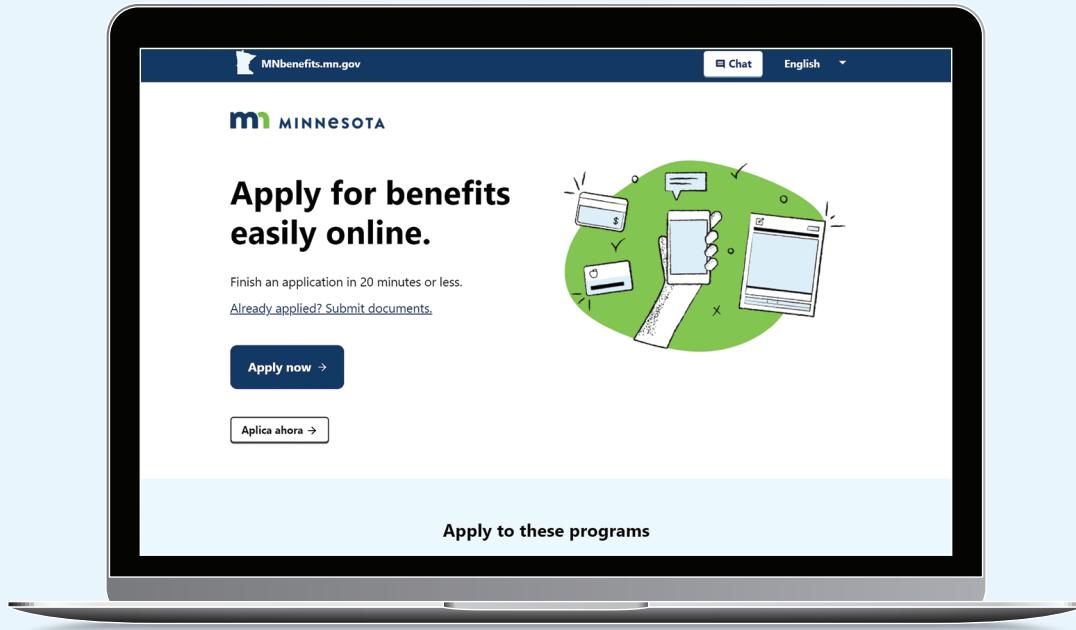

Miyuu ilmuu u qaadan karaa tallaallada sida jadwalka ay u qaataan ilmaha ay isku da'da yihii?

Immisa jeer ayaa ilmaha lagu sameynayaa baarista korriinka iyo habdhqanka? Sidee baan ku ogaan karaa natijjada baaritaanka?

# Pregnancy and parental leave

## PREGNANCY AND PARENTAL LEAVE

Employees may take up to 12 weeks of unpaid leave during pregnancy or upon the birth or adoption of their child. Employees are eligible for this leave regardless of the size of their employer and the amount of time for which they have worked for the employer.

### When does the pregnancy and parental leave start?

- The leave must be taken within 12 months of the birth or adoption.
- Employees must request the leave from their employer.
- Employees can choose when the leave will begin.
- Employers can adopt reasonable policies about when requests for leave must be made.

## FREQUENTLY ASKED QUESTIONS

### What can count against my pregnancy and parental leave?

If you have paid leave, including sick leave or paid vacation, pregnancy and parental leave can be reduced so the total leave (pregnancy and parental plus paid leave) is not more than 12 weeks. Leave taken for prenatal care may not count against pregnancy and parental leave. If you qualify for both federal Family and Medical Leave Act (FMLA) and pregnancy or parental leave, you only have a right to 12 weeks of leave in total for childbirth or adoption of a child and any other pregnancy-related leave. You may be entitled to additional leave under FMLA for a non-pregnancy related serious health condition. If you have questions about FMLA, contact the U.S. Department of Labor at 612-370-3341 or dol.gov/whd/fmla.

### Does Minnesota offer paid family and medical leave?

Minnesota's paid family and medical leave law, which provides paid time off during or following a pregnancy, goes into effect Jan. 1, 2026. Find more information at mn.gov/deed/paidleave.

### Does my employer have to continue my benefits during the leave?

Yes. Employees on pregnancy and parental leave are entitled to the same coverage and employer contribution as if they were not on leave.

### Do I get my job back when I return from leave?

Yes. You are entitled to employment in your former position or one with comparable duties, hours and pay. You are also entitled to the same benefits and seniority you had before the leave. You may return to part-time work during the leave without forfeiting the right to return to full-time work at the end of the leave. It is against the law for your employer to retaliate, or take negative action, against you for requesting or taking a leave.
