

You care for your patients. You can protect them too. Get your flu shot.

- Long-term care facility (LTCF) residents and staff are at increased risk for exposure to influenza.
- Getting influenza can increase the risk of hospitalization and death for older adults (65+), people with chronic health conditions, and residents of LTCFs.
- LTCF staff can spread flu to their residents.
- Vaccination helps stop the flu from spreading and keeps our community healthier and safer.

**It's a simple step that makes
a big difference.**
