

## Getting to “Rapid HIV Testing” in CDC TRAIN

Once you are on your home page on the CDC TRAIN website and you have the HIV Capacity Building Assistance (CBA) training plan open, you will be able to scroll down to “Rapid HIV Testing” where it should indicate that all trainings in that module are required (see image below). Complete the pre-test module, modules 1-4, and the post-test module. These should all be completed before attending the Counseling, Testing and Referrals training.
