Notes

^I Cases reported to MDH, assumed to be alive, and currently residing in Minnesota as of December 31, 2015.

ⁱⁱ HIV/AIDS prevalence rate calculated by dividing the total number of prevalent cases in a stratum (e.g. persons aged 20-24 years) by the estimated population for that stratum and multiplying by 100,000. Population estimates are based on 2010 U.S. Census data.

ⁱⁱⁱ Residence information missing for 61 persons living with HIV and 5 persons living with AIDS.

^{iv} Age missing for 5 persons living with HIV and 0 persons living with AIDS.

Suburban = Seven-county metropolitan area except Minneapolis & St. Paul (Anoka, Carver, Dakota, Hennepin (except Minneapolis), Ramsey (except St. Paul), Scott, and Washington counties). Greater Minnesota = Remaining 80 counties outside of the seven-county metropolitan area.

Numbers exclude federal and private prisoners, but include 134 state prisoners, 167 refugees in the HIV-Positive Refugee Resettlement Program, and 175 additional refugees/immigrants with HIV infection prior to resettling in Minnesota.

Percentages may not add to 100 due to rounding.
