Learning and Networking

Minnesota Department of Health
Health Care Homes

April 9, 2019
Agenda

- Welcome
- Learning Community Presentations
- Networking/Group Discussion
- BREAK: 2:30 – 2:45
- Group Activity
- Sustainability and Partnership Presentation
  - Work time
  - Group Discussion/Share Back
- Announcements
  - Evaluation
Learning Objectives

- Participants will learn from one another’s projects and build connections across Learning Communities.
- Participants will have a firm grasp of steps to develop strong cross-sector partnerships.
- Participants will be able to share ways to plan for sustainable programs.
Learning Community Projects

- North Memorial
- North Metro Pediatrics
- Lakewood
Group Discussion

● Re-organize by job category (roughly);
  ● Administration
  ● Direct Care
  ● Data Analyst

● Do brief introductions, including the last item you Googled.
Group Discussion

- How has your role influenced your project?
  - What skill sets or perspectives have you been able to offer?
  - Is this how you thought you’d be utilized?
Group Discussion

- What have you personally gained or learned through this work?
  - How does this knowledge further your daily work?
  - Has this inspired further work or other projects? If so, what?
Group Discussion

- How do you see your job, profession, or role changing with increased data sharing and access?
  - New skills, responsibilities, projects
Group Discussion

- If you were to do this project again, what would you do differently?
  - Who would be brought to the table?
    - Positions? Stakeholders? Data sets?
  - Design or scope differences?
  - Support and training?
Break

Return by 2:45
Activity
Sustainability – What Is It?

- Many perspectives, most include:
  - Continuing to implement
  - Continuing funding
  - Continuing staffing
- Multitude of resources and theories
- For today, maintaining partnerships, use of collaborative data, and energy moving forward
Sustainability – How to Plan for It?

- Clarify your vision
  - Be specific!
- Determine what you want to sustain
  - Data reviews, partnerships, collaborative planning, action plans
- Build Collaboration
  - Buy-in, leadership support
Sustainability – How to Plan for It?

- Choose the strategy and method
  - Review resources available or previously used
- Develop action steps
  - Who, what, and when
  - Consider adding to the Implementation Plan
- Document and Communicate
  - Consider who else needs to know or might need to know in the future
Sustainability – Partnerships

- Collaboration brings strength
  - Funding
  - Shared resources
  - Shared vision
- Future of data sharing
  - Interoperability
  - Connected services
- Be prepared and communicate
  - Needs will be different in 9 months than they are today
Sustainability – Resources

- U.S. Department of Labor – Moving Forward
- Program Sustainability Assessment Tool – Sustaintool.org
- CDC – Sustainability Planning Guide for Healthy Communities
Work Time

- What do we want this project to look like when the grant ends in June? (What will we have accomplished? What deliverable(s) will we have?)
- Will this project continue after June? If so, how? Who will carry it forward? At what level do we anticipate working together a year from now?
- How will we show impact of our accomplished work? Who will be better off because of our work? How will we know?
- What concerns do we have for accomplishing the tasks for this quarter?
Share Back

- What did we learn today?
- What action steps were generated?
- What did you learn about your partners?
Announcements

- Final training: 5/29/19
- TA from ACET (and others) available
- Reports and grant logistics
Evaluation

- Please take a few minutes to complete the survey about this event.
- We appreciate and value your feedback.
- Thank you!
Thank you!
