

Medication Reconciliation

Pre-Questionnaire

Do not write your name on this quiz. The information received will help us learn if the Medication Reconciliation video is a helpful tool for nursing education. Thank you.

- 1) I would rate my comfort with interviewing patients regarding their medications as:
 - a. ☐ very comfortable
 - b. ☐ somewhat comfortable
 - c. ☐ sometimes don't know what to ask about
 - d. ☐ find this process very difficult

- 2) My knowledge of what types of questions to ask when talking with patients about their medications and how they take them is:
 - a. ☐ this is never a problem
 - b. ☐ sometimes struggle with how to ask to get the information I need
 - c. ☐ would like to learn more about patient interviewing techniques

- 3) I ask my patients what pharmacy/pharmacies they use when interviewing them for medication reconciliation?
 - a. ☐ Always ask this
 - b. ☐ If I think of it, I'll ask
 - c. ☐ Rarely ask this of patients

- 4) I am careful to use simple language when interviewing patients and avoid medical jargon.
 - a. ☐ Always use caution with medical jargon and use simple language
 - b. ☐ I try to avoid jargon and ask questions using simple language
 - c. ☐ Don't give much consideration to this as my focus is in completing the medication reconciliation form

- 5) Please choose the best question to use when interviewing a patient about the medications they take.
 - a. ☐ Do you take these five medications (and read them the names).
 - b. ☐ Do you take a diuretic for your blood pressure?
 - c. ☐ What other pills or creams do you take or use, even those you don't need the doctor to write a prescription for?
 - d. You take two of the blood pressure pills every morning, right?

Medication Reconciliation

Post Video Questionnaire

Do not write your name on this quiz. The information received will help us learn if the Medication Reconciliation video is a helpful tool for nursing education. Thank you.

- 1) Please choose the best question to use when interviewing a patient about the medications they take.
 - a. ☐ Can you tell me the names and doses of your medications?
 - b. ☐ Do you take any steroid inhalers to help with your asthma?
 - c. ☐ Do you ever take any medications that we haven't talked about?
 - d. ☐ Are there vitamins, ointments or other things you use to keep you healthy that you buy from places other than Smith Pharmacy?

- 2) After watching the Medication Reconciliation video:
 - a. ☐ I know that I need to ask my patients more questions when working with them on their medication list.
 - b. ☐ I'm asking the correct questions to gather all the information that I can from my patients regarding their medications and how they take the medications.
 - c. ☐ my nursing practice on discussing medications with patients won't change.

- 3) Having viewed the Medication Reconciliation video, are you more likely to implement any of the following into your nursing practice when discussing medications with your patients: (Check all that apply.)
 - a. ☐ Asking about the use of multiple pharmacies
 - b. ☐ Use of simple language, avoiding medical jargon
 - c. ☐ Asking more open ended questions (what, how, when)
 - d. ☐ Specifically asking about the use of over-the-counter medications or herbals

- 4) Information in the Medication Reconciliation video:
 - a. ☐ is very helpful
 - b. ☐ is somewhat helpful
 - c. ☐ is not helpful

- 5) Please list one tip you've learned or that was reinforced from watching the Medication Reconciliation video.
