## Office of the Revisor of Statutes Administrative Rules

TITLE: Proposed Permanent Rules Governing Mortuary Science

**AGENCY:** Department of Health

**REVISOR ID:** R-4882

MINNESOTA RULES: Chapter 4610

The attached rules are approved for publication in the State Register

Sandy Glass-Sirany Senior Assistant Revisor

10/28/25	REVISOR	SGS/BM	RD4882
Department of Health			
Proposed Permanent R	ules Governing Mortuary Scie	nce	
4610.2810 <b>DEFINITIO</b>	ONS.		
Subpart 1. Bulking	agents. "Bulking agents" means	s a carbon-rich mater	rial used to
ncrease porosity, assist 1	moisture balance, reduce odors, a	and facilitate aeration	in the
decomposition process. I	Bulking agents include alfalfa, str	aw, tree and shrub pa	rts that have
peen chipped or shredde	d, or similar woody vegetation th	at has been chipped	or shredded,
s well as other similarly	carbon-rich materials.		
· ·	rganic reduction. "Natural organics, section 149A.02, subdivision		e meaning
Subp. 3. Prion dise	ease. "Prion disease" means a fat	al neurodegenerative	e disorder
aused by misfolded pro	teins in the brain. Prion diseases	include, among other	rs without
imitation, Creutzfeldt-Ja	akob disease, variant Creutzfeldt-	Jakob disease, varial	<u>bly</u>
Protease-Sensitive Prion	opathy, Sporadic Fatal Insomnia,	and	
Gerstmann-Straussler-Sc	cheinker disease.		
4610.2815 RECORD I	KEEPING.		
When a document is	to be completed as required in M	Iinnesota Statutes, ch	napter 149A,
each document must be d	clearly titled and contain all infor	mation required of th	ne document
by statute, including the	decedent's full legal name		

If a preparation room has both a flush bowl with water connections as provided in

Minnesota Statutes, section 149A.92, subdivision 2, and a direct drain, only the flush bowl

<b>4610.2817 VENTILATION</b>			
	<u>•</u>		
Subpart 1. Ventilation sy	ystems. Ventilation system	s for preparation roo	ms must be
maintained in a sanitary condi	tion and free of rust and de	bris.	
Subp. 2. Ventilation exha	aust fans. Ventilation exhau	ust fans, as described	in Minnesota
Statutes, section 149A.92, sub	edivision 3, must not be blo	cked or covered.	
4610.2830 <b>MAINTENANC</b>	E; CREMATORIES.		
Upon request during a sur	vey, investigation, inspecti	on, or other licensing	gactivity, the
icensee must provide the depa	artment access to or copies	of documentation that	at the human
remation system, as described	d in Minnesota Statutes, see	ction 149A.95, subdi	vision 2, has
een maintained in a manner th	nat ensures safe operation an	d that adheres to the 1	requirements
of Minnesota Statutes, chapter	149A.		
1610.2835 <b>MAINTENANC</b>	E; ALKALINE HYDROI	LYSIS.

Subpart 1. Release of reduced remains. The reduced remains must be released in enclosed containers. The finished compost must not have any visible mold growth at the time it is released to the person or persons with legal right to control disposition. The establishment must provide care instructions to the recipient of the reduced remains to carry out the final disposition of the reduced remains. The instruction sheet must:

- A. state that the final dispersal must comply with all applicable federal, Tribal, state, and local laws regarding final dispersal;
  - B. discourage the sale or use of reduced remains for commercial purposes; and
- <u>C.</u> provide instructions and best practices for inhibiting unwanted microbes such as mold while waiting for final dispersal.
- Subp. 2. **Donated compost.** If the person or persons who have the legal right to control disposition do not want to retain all reduced remains, the facility may disperse or donate any excess reduced remains. A donation constitutes release to an authorized party under Minnesota Statutes, section 149A.955, subdivision 26.
- Subp. 3. **Donating compost.** Facilities must have a location to disperse donated compost and unclaimed reduced remains. The location may be owned by the facility or owned or controlled by a third party who has a written agreement with the facility to accept compost. The facility must not knowingly donate compost for use to grow food for sale for human consumption. Containers of donated compost and unclaimed reduced remains awaiting final dispersal must be stored indoors in a way that inhibits mold growth and vector infestation. Containers of donated compost must not block walkways or methods of egress or be stored in a way that creates falling or tripping hazards.

ACTO AGES I A DOD ATODA DEC			

5.1	4610.2857 LABORATORY RESULTS.
5.2	Samples required under Minnesota Statutes, section 149A.955, subdivision 23, clauses
5.3	(3) to (6), must be submitted to:
5.4	A. one or more laboratories certified under parts 4740.2010 to 4740.2120. The
5.5	laboratory or laboratories must be certified to analyze the substances presented to it by the
5.6	facility, as required by Minnesota Statutes, section 149A.955, subdivision 23, clause (4);
5.7	<u>or</u>
5.8	B. a laboratory that is certified as Seal of Testing Assurance (STA) approved by
5.9	the United States Composting Council.
5.10	4610.2858 EQUIPMENT REQUIREMENTS.
5.11	Subpart 1. Prohibited additions to vessel. The following items and materials must
5.12	not be used as bulking agents and must not be placed inside the vessel:
5.13	A. wood or other organic material that has been painted, glued, or chemically or
5.14	pressure treated without regard to whether the wood or other organic material is or is not
5.15	chipped or shredded;
5.16	B. construction and demolition debris without regard to whether the debris is or
5.17	is not chipped or shredded;
5.18	C. acids, alkaline agents, or other solvents;
5.19	D. insects, worms, or other animals;
5.20	E. materials that will not compost other than a noncompostable tag described in
5.21	Minnesota Statutes, section 149A.955, subdivision 16; and
5.22	F. materials that, if present inside the vessel during all or part of the natural organic
5.23	reduction process, would create a risk to health or safety.
5.24	Subp. 2. Vessel requirements. The vessel must:

4610.2858 5

A. be leak-proof and capable of withstanding heating to the required temperature
for the required period;
B. enable accurate testing and recording of temperature designed to measure from
the middle of the interior of the vessel and the accurate collection of any other data required
by the natural organic process used by the natural organic reduction facility; and
C. prevent vectors from entering the vessel and control odors.
Subp. 3. Measuring and recording equipment. Each vessel must have its own
thermometer or similar instrument for measuring the heat inside the vessel. The readings

of the instrument must be recorded and saved with the records for each decedent along with

the records required in Minnesota Statutes, section 149A.955, subdivision 28.
