

State Rapid Response Investigative Public Report

Office of Health Facility Complaints

Maltreatment Report #: HL304343204M
Compliance #: HL304345295C

Date Concluded: February 28, 2023

Name, Address, and County of Licensee

Investigated:

Saint Ann's Residence
330 East 3rd Street
Duluth, MN 55805
St. Louis County

Facility Type: Assisted Living Facility (ALF)

Evaluator's Name: Barbara Axness, RN
Special Investigator

Finding: Inconclusive

Nature of Investigation:

The Minnesota Department of Health investigated an allegation of maltreatment, in accordance with the Minnesota Reporting of Maltreatment of Vulnerable Adults Act, Minn. Stat. 626.557, and to evaluate compliance with applicable licensing standards for the provider type.

Initial Investigation Allegation(s):

The facility neglected the resident when they failed to assess the resident's skin condition. The resident developed a leg wound that was weeping for several days before the resident was sent to be evaluated by a provider. The resident was hospitalized due to the leg wound.

Investigative Findings and Conclusion:

The Minnesota Department of Health determined neglect was inconclusive. The resident was hospitalized after staff reported the resident's leg was observed to have a rash and was weeping to the point his pant leg was wet. However, it was unable to be determined when the rash/weeping started.

The investigator conducted interviews with facility staff members, including administrative staff, nursing staff, and unlicensed staff. The investigator also contacted law enforcement. The investigation included review of hospital records and facility documentation including progress notes and assessments.

The resident resided in an assisted living facility. The resident's diagnoses included a history of stroke, anxiety, and multiple sclerosis. The resident's service plan included assistance with medication administration. The resident's assessment indicated the resident did not have any active skin concerns.

About three weeks before the resident was admitted to the hospital, a progress note indicated a 90-day review was completed remotely by a registered nurse and the resident's condition was documented as stable. No other documentation regarding the resident's status was entered in the record.

Two days after the resident was sent to the ER, a progress note was entered indicating the resident was admitted for localized dermatitis.

Hospital records indicated the resident admitted through the ER with a one-week history of leg pain and swelling. Infectious disease evaluated the resident and determined no infection was present. The resident was diagnosed with stasis dermatitis (an inflammatory skin disease of the lower legs caused by edema), was treated in the hospital, and received therapy services at a skilled nursing facility.

The resident returned to the facility almost one month later and returned to his baseline condition.

During an interview, the registered nurse, who conducted the assessment prior to the resident's hospitalization, confirmed she had not personally assessed the resident's skin since she completed the assessment remotely. The nurse stated she relied on reports from staff providing care and information entered in the resident's medical record to conduct her assessments. The nurse stated she did not believe there were any skin issues present with the resident at the time she did the assessment.

During an interview, the facility registered nurse stated she could not recall any specifics related to the resident's skin condition. The facility registered nurse stated from what she could remember, the resident was very independent and not getting services at that time.

During an interview, multiple unlicensed personnel (ULP) who provided care to the resident before he was hospitalized, stated they couldn't remember when the resident's leg began to weep and could not recall any specific details from the time he was sent to the hospital.

During an interview, the resident's family member stated the facility did not contact him right away when the resident's leg started weeping and he was only notified when the resident went to the hospital. The family member stated the hospital told him the resident's leg had been weeping for about four or five days and he was under the impression someone was supposed to be checking on the resident daily.

In conclusion, the Minnesota Department of Health determined neglect was inconclusive.

Inconclusive: Minnesota Statutes, section 626.5572, Subdivision 11.

"Inconclusive" means there is less than a preponderance of evidence to show that maltreatment did or did not occur.

Neglect: Minnesota Statutes, section 626.5572, subdivision 17

"Neglect" means:

- (a) The failure or omission by a caregiver to supply a vulnerable adult with care or services, including but not limited to, food, clothing, shelter, health care, or supervision which is:
 - (1) reasonable and necessary to obtain or maintain the vulnerable adult's physical or mental health or safety, considering the physical and mental capacity or dysfunction of the vulnerable adult; and
 - (2) which is not the result of an accident or therapeutic conduct.
- (b) The absence or likelihood of absence of care or services, including but not limited to, food, clothing, shelter, health care, or supervision necessary to maintain the physical and mental health of the vulnerable adult which a reasonable person would deem essential to obtain or maintain the vulnerable adult's health, safety, or comfort considering the physical or mental capacity or dysfunction of the vulnerable adult.

Vulnerable Adult interviewed: Yes

Family/Responsible Party interviewed: Yes

Alleged Perpetrator interviewed: Not Applicable

Action taken by facility:

No action taken.

Action taken by the Minnesota Department of Health:

No further action taken at this time.

0 620	<p>Continued From page 4</p> <p>and acute cystitis (urinary tract infection). R1's hospital admission history and physical indicated the resident arrived for evaluation of confusion, a reported 101 degree Fahrenheit fever, hyperglycemia (high blood sugar), and frequent moaning. The hospital physician wrote "The patient appears acutely ill and has possible severe sepsis...evidence of end organ damage due to severe sepsis." Hospital notes indicated the patient developed multisystem organ failure and was admitted to the intensive care unit for further management. R1 died 17 days later on September 11, 2022.</p> <p>R1's death record indicated she died on September 11, 2022, and the cause of death was sepsis due to corynebacterium bacteremia (a bacterial infection) and clostridium difficile (a gastrointestinal infection). Other significant conditions contributing to death but not resulting in the underlying cause was listed as candida urinary tract infection, acute kidney injury.</p> <p>On February 7, 2023, at 11:05 a.m., assistant director (AD)-A confirmed a MAARC report was not completed since there were no concerns noted at the time R1 died and no investigation was completed. AD-A stated given what is known about the event now, it would meet their criteria to file a MAARC report. AD-A stated the facility would have a meeting with nursing once a week to review things that had happened that week and upon reviewing her notes from August and September 2022, she did not see anything indicating there were concerns around R1's death. AD-A stated she was not aware R1 had not gotten her antibiotics as ordered and had only heard the resident died of natural causes in the hospital.</p>	0 620

ULP-L was not sure if she had received her antibiotics.</p> <p>On February 7, 2023, at 11:35 a.m., health unit coordinator (HUC)-J stated R1 had returned from the hospital on August 4, 2022, with a new order for an antibiotic. HUC-J stated R1 got one dose in the hospital and the facility was to give the two remaining doses. HUC-J stated she was responsible for ordering the medication and when she tried to fill it, the pharmacy said insurance wouldn't cover it and they would need a prior authorization from the doctor before they could release it. HUC-J stated it took a couple of days for the pharmacy to get the necessary authorizations back from the doctor. HUC-J stated she notified CNS-B about the trouble filling the medication and that they were not able to get it as expected. HUC-J stated the nurse would be the one responsible for updating the doctor on the medication not being able to get filled and that would not be within her scope of job duties to do so. HUC-J stated she personally picked up the antibiotics on August 17, 2022, and she witnessed the resident receive one dose but was not sure about the second dose. HUC-J confirmed nothing was put in the MAR and there</p>	01760

HUC-J stated she was not sure how staff knew when or how to give the medication but it was on the cart and there were directions on the box.</p> <p>On February 7, 2023, at 1:30 p.m., CNS-B confirmed there were gaps in documentation and stated, "I really can't give an answer as to why, other than we usually do a better job." CNS-B confirmed an investigation or root cause analysis was not completed after R1 passed away and they had not identified any concerns regarding the resident getting the antibiotic as ordered at that time. CNS-B stated they haven't been doing root cause analyses "with everything the way its been, we were COVID central for a long time, our staffing and census has been an issue, I was the only nurse in the facility for over a year and a half...we don't do a root cause analysis like in the hospital, we have our weekly administrative meeting every Monday to talk about things and then do more of a root cause discussion at our nursing meeting. I don't recall exactly what was discussed but I probably would have reported R1 was in the hospital and had sepsis but we aren't in the habit of doing what you consider a root cause. It would be nice to do that but we just haven't had the wherewithal to do it. CNS-B stated that "in hindsight, I have some concerns. I wish we all would have done a better job with documentation to see what went on there, there were gaps." CNS-B stated at the time, she didn't consider it a medication error.</p> <p>On February 9, 2023, at 11:30 a.m., CNS-B stated she had just followed up with the pharmacy to try find out why they didn't get the antibiotic right away. CNS-B stated the pharmacy told her they had the medication ready to pick up</p>	01760

02310	<p>Continued From page 16</p> <p>R1's death record indicated she died on September 11, 2022, and the cause of death was sepsis due to corynebacterium bacteremia (a bacterial infection) and clostridium difficile (a gastrointestinal infection). Other significant conditions contributing to death but not resulting in the underlying cause was listed as candida urinary tract infection and acute kidney injury.</p> <p>On February 2, 2023, at 12:20 p.m., family member (FM)-E stated on the night R1 went to the hospital, her brother had called R1 and was concerned about how she sounded on the phone. FM-E stated she called the facility and asked if someone could go check on her and when she didn't hear anything back, she went to the facility. FM-E stated she ran in to an unlicensed personnel (ULP) in the hallway who worked with R1 and asked her how R1 was doing. FM-E stated the ULP replied by saying "I'm busy and [R1] doesn't want to go to the hospital." FM-E stated when she got to R1's room, she noticed she was rocking back and forth and moaning. FM-E stated she went back down to the front desk and called the ambulance. FM-E stated she was not sure if the nurse had been made aware of anything that night but she felt like if she hadn't come in, R1 would not have been sent in to the hospital. FM-E stated she never got any calls or communication to say her antibiotic was not started right away and was not updated on any changes in condition. FM-E stated, "I never got a call, no one called me, I don't know if she was like that all day, I just don't know. I was not happy with the fact I had to go and call 911...I don't know if she'd be stuck all night like that, the ULP said she doesn't want to go to the ER but she's also not hard to persuade."</p>	02310

03000	<p>Continued From page 23</p> <p>up with the provider after the order was not able to be filled and failed to document actions taken by the facility after the antibiotic was not able to be given as ordered.</p> <p>R1's diagnoses included hypertension (high blood pressure), congestive heart failure, and type two diabetes.</p> <p>R1's service plan, dated November 30, 2020, indicated the resident received services including medication administration, insulin and blood sugar management, and assistance with compression stockings.</p> <p>R1's most recent assessment was completed remotely by registered nurse (RN)-C on August 4, 2022, after she readmitted to the facility from the hospital. The assessment indicated the resident had a history of urinary tract infections (UTI), most recently in June 2022, when she was hospitalized with a septic UTI.</p> <p>Hospital records indicated R1 returned to the facility after a hospitalization on August 8, 2022, with a new order for Fosfomycin tromethamine, an antibiotic to treat a UTI. R1 was admitted to the hospital after a fall and was diagnosed with a UTI during the admission. The August 8, 2022, discharge summary from the hospital indicated the resident was to have a follow up urine culture in 10 days.</p> <p>R1's record contained an order dated August 8, 2022, for Fosfomycin 3 grams (g), take 3 g by mouth every 72 hours for two doses for infection. The order indicated R1 got the first dose while in the hospital on August 7, 2022 and the next two doses were to be given August 10 and August 13, 2022.</p>	03000

03000	<p>Continued From page 24</p> <p>R1's August 2022 medication administration record (MAR) included the following order: Fosfomycin tromethamine 3 g, take 1 packet by mouth W [Wednesday] and Sat [Saturday].</p> <p>The antibiotic was scheduled to be given on August 10 and August 13, 2022. Medication administration notes on the MAR indicated both doses were out of stock and not given.</p> <p>R1's progress notes lacked any documentation to show the resident had been hospitalized or eventually passed away at the hospital. R1's progress notes lacked documentation of the antibiotic not being filled or the provider being updated the medication was not available. R1's record lacked evidence a follow up urine culture was collected as ordered.</p> <p>R1's record contained a discharge summary completed remotely by RN-C on September 14, 2022. The discharge summary indicated the resident was deceased and had died of natural causes at the hospital. The discharge reason was listed as "on 8/29/22, [R1's] daughter came in to check on her mother after her brother called saying he thought something was wrong with [R1]. When she arrived, [R1] was rocking in here (sic) chair and acting like she had when she was hospitalized earlier this year. She called 911 to have her mother transferred to the ER where she was admitted for sepsis."</p> <p>Hospital records indicate R1 was admitted to the hospital on August 25, 2022, due to sepsis and acute cystitis (urinary tract infection). R1's hospital admission history and physical indicated the resident arrived for evaluation of confusion, a reported 101 degree Fahrenheit fever,</p>	03000

The hospital physician wrote "The patient appears acutely ill and has possible severe sepsis...evidence of end organ damage due to severe sepsis." Hospital notes indicated the patient developed multisystem organ failure and was admitted to the intensive care unit for further management. R1 died 17 days later on September 11, 2022.</p> <p>R1's death record indicated she died on September 11, 2022, and the cause of death was sepsis due to corynebacterium bacteremia (a bacterial infection) and clostridium difficile (a gastrointestinal infection). Other significant conditions contributing to death but not resulting in the underlying cause was listed as candida urinary tract infection, acute kidney injury.</p> <p>On February 7, 2023 at 11:05 a.m., assistant director (AD)-A confirmed a MAARC report was not completed since there were no concerns noted at the time R1 died and no investigation was completed. AD-A stated given what is known about the event now, it would meet their criteria to file a MAARC report. AD-A stated the facility would have a meeting with nursing once a week to review things that had happened that week and upon reviewing her notes from August and September 2022, she did not see anything indicating there were concerns around R1's death. AD-A stated she was not aware R1 had not gotten her antibiotics as ordered and had only heard the resident died of natural causes in the hospital.</p> <p>On February 7, 2023, at 1:30 p.m., CNS-B confirmed there were gaps in documentation and stated, "I really can't give an answer as to why, other than we usually do a better job."
