Transfer Agreement between a Hospital and a Related Health Facility in Minnesota

The ______________________________________________________ hospitals and the ______________________________________related health facility do hereby join together in the following transfer agreement. The purpose of this agreement is to provide health care most suited to the individual (patients/residents) needs. This agreement shall operate to promote optimum use of the acute care facilities of general hospital and of the post-acute care services of the related health facility. This agreement shall comply with appropriate requirements of the Federal Government and the state licensing agencies.

Now, therefore, the hospital and related health facility which are signatory below, in consideration of the mutual advantages occurring to both do hereby covenant and agree each with the other as follows:

1. The governing body of the hospital signatory below and the governing body of the related health facility signatory below shall have exclusive control of the management, assets, and affairs of their respective facilities. No party by virtue of this agreement assumes any liability of any debts or obligations of a financial or legal nature incurred by the other party of this agreement. It is not the intention of either party to create a joint venture with any other party but instead that each party shall operate independent of any other party in the discharge of any obligations assumed by it and the receipt of any agreed compensation to be paid by it.

2. No clause of this agreement shall be interpreted as authorizing either signatory facility to look to the other signatory facility to pay for services rendered to an individual transferred by virtue of this agreement, except to the extent that such liability would exist separate and apart from this agreement.

3. When an individual's need for transfer has been determined by the individual's physician, the referring facility shall promptly notify the receiving facility of the impending transfer. The receiving facility agrees to admit the individual as promptly as possible, provided all conditions of eligibility for admission are met and bed space is available to accommodate that individual.

4. Both signatory facilities agree to provide medical and other related information necessary to ensure continuity of care from one facility to another. Each facility will at minimum provide a patient transfer form similar to the model attached which will accompany the transfer of the individual. Each facility will provide for the security and accountability of the patient's personal effects, particularly money and valuables, and will provide an itemized list of such items accompanying the individual.

5. The referring facility shall arrange for safe and appropriate transportation and for care of the individual during transfer.
6. Neither signatory facility shall use the name of the other signatory to this transfer agreement in any promotional or advertising materials unless review and written approval of the intended use is first obtained from the party whose name is to be used.

7. This agreement shall be, and remain, in force from the time of signing as long as it is not renounced by either signatory facility in writing to the other signatory giving ninety (90) days notice. This agreement does not constitute an endorsement of either signatory facility and it shall not be so used.
Request to Become a Party to Transfer Agreement

The following facilities desire to become a party to a transfer agreement.

In witness whereof, the facilities named below have executed this agreement this
