

Service Obligation

All participants are responsible for securing their own eligible employment and must begin working no later than March 31 following completion of their education or training program. Participants may complete their service obligation at more than one eligible location and may also transfer to another eligible facility during their obligation.

Participants must agree to practice in an eligible geographic area, facility type, teaching area, patient group or specialty type in Minnesota at least 30 hours per week (12 credit hours or 720 hours per year for faculty) and for a minimum of three years, *with the exception of a nurse, who must agree to serve a minimum two-year full-time service obligation, with the option to renew an additional two years.*

Award Amount

Annual loan forgiveness awards are based on 15 percent of the average educational debt of recent graduates in each profession.

A participant's annual award amount is fixed at the time of selection. A participant may receive loan forgiveness benefits for a maximum of four years.

Loan forgiveness awards are exempt from state and federal income taxes.

Minnesota Health Professional Loan Forgiveness Programs

Purpose

Minnesota’s Loan Forgiveness Program recruits and retains health care professionals to needed areas and facilities within Minnesota. Loan forgiveness is an important benefit for health care professionals as well as health care facilities and communities experiencing a shortage of access to primary health care services.

“The program is essential to maintaining nursing home RNs.”
Participating Registered Nurse

Application and Selection

The application cycle begins in November and closes early January each year. Selections are made based on suitability for practice as indicated by personal and professional experience and training noted on an application, as well as other relevant factors. The number of applicants selected for participation varies annually and is contingent upon state funding.

Eligible Health Professions	Minnesota Practice Locations	Annual Amount
