

Trauma Program 101

Basic Training for Level 4 Trauma Hospitals

New to the job?
Don't know where to start?
Need a refresher?
Worried about your upcoming site visit?
Wondering if you're doing everything right?
Then register for this class!

Trauma program medical directors, managers, coordinators, and administrators at a Level 4 Trauma Hospital, this class is for you! Learn about the duties and responsibilities of the trauma program leaders and the processes and strategies to accomplish trauma performance improvement. In this seminar tailored for Minnesota's level 4 trauma hospitals, we will discuss the trauma system participation criteria and best practices and troubleshoot your problems.

While tailored for Level 4 Trauma Hospitals, Level 3 program leaders are welcome to attend and are likely to find much of the content to be applicable.

Objectives

- Understand the trauma system requirements for participation and how to implement them in your hospital
- Learn how to prepare for a site visit
- Understand the new performance improvement requirements for Level 4 Trauma Hospitals implemented in 2020
- Establish and organize a successful trauma performance improvement process
- Learn techniques and new processes for identifying and correcting clinical and operational issues in trauma care
- Learn basic trauma PI concepts
- Leverage the expertise of the tertiary trauma case review committee to improve clinical practice
- Maintain concise and clear records of performance improvement activities
- Apply confidentiality principles to the trauma performance improvement process
